Table of Contents

| | |
|--|------------|
| Part I Home | 1 |
| Part II Buddha Dhamma | 4 |
| 1 User's Guide to Pure Dhamma Website | 6 |
| 2 Buddha Dhamma – A Scientific Approach | 11 |
| Introduction – A Scientific Approach to Buddha Dhamma | 11 |
| Theories of Our World – Scientific Overview | 14 |
| Mind and Matter – Buddhist Analysis | 17 |
| Sensual Pleasures – The Hidden Suffering | 20 |
| Kammic Energy Leads to Consciousness | 24 |
| Brain and the Gandhabba | 27 |
| Mind Is Not in the Brain | 27 |
| Gandhabba in a Human Body – an Analogy | 31 |
| Persistent Vegetative State – Buddhist View | 34 |
| Patient H.M. – Different Roles of Brain in Memory | 37 |
| Memory Recall for Gandhabba in a Human Body | 42 |
| Autobiographical Memory – Preserved in Nāma Loka | 45 |
| 3 Buddhahood Associated Controversies | 50 |
| Buddhahood Controversies – Introduction | 50 |
| Pāṭihāriya (Supernormal Abilities) of a Buddha – Part I | 53 |
| Pāṭihāriya (Supernormal Abilities) of a Buddha – Part II | 57 |
| 4 What is Buddha Dhamma? | 62 |
| 5 Foundation of Dhamma | 66 |
| 6 The Importance of Purifying the Mind | 69 |
| 7 The Grand Unified Theory of Dhamma | 73 |
| The Grand Unified Theory of Dhammā – Introduction | 73 |
| Our Two Worlds: Material and Immaterial | 77 |
| 31 Realms Associated with the Earth | 82 |
| Gandhabba – Only in Human and Animal Realms | 86 |
| Body Types in 31 Realms – Importance of Manomaya Kāya | 90 |
| Gandhabba Sensing the World – With and Without a Physical Body | 95 |
| Nibbāna in the Big Picture | 99 |
| 8 Buddha Dhamma: Non-Perceivability and Self-Consistency | 103 |
| 9 Saṃsāric Time Scale, Buddhist Cosmology, and the Big Bang Theory | 108 |
| 10 Evidence for Rebirth | 110 |
| 11 Power of the Human Mind | 114 |
| Power of the Human Mind – Introduction | 114 |
| Difference Between Jhāna and Stages of Nibbāna | 116 |
| Power of the Human Mind – Anariya or Mundane Jhānas | 120 |
| Power of the Human Mind – Ariya Jhānā | 123 |
| Are There Procedures for Attaining Magga Phala, Jhāna and Abhiññā? | 126 |
| 12 Transfer of Merits (Pattidāna) – How Does it Happen? | 130 |
| 13 First Noble Truth is Suffering? Myths about Suffering | 134 |
| 14 Vinaya – The Nature Likes to be in Equilibrium | 137 |
| Part III Key Dhamma Concepts | 140 |
| 1 San | 143 |
| What is “Saṅ”? Meaning of Saṅsāra (or Saṃsāra) | 143 |
| Saṅkhāra, Kamma, Kamma Bija, Kamma Vipāka | 146 |
| Saṅkhāra – Life is a Bundle of Saṅkhāra | 152 |
| Difference Between Dhammā and Saṅkhāra | 154 |
| Kamma are Done with Saṅkhāra – Types of Saṅkhāra | 159 |

| | |
|--|------------|
| 2 Nibbāna | 163 |
| How to Taste Nibbāna | 163 |
| Nirāmisa Sukha | 165 |
| Nibbāna – Is it Difficult to Understand? | 166 |
| The Four Stages in Attaining Nibbāna | 170 |
| What Are Rūpa? (Relation to Nibbāna) | 174 |
| Does the First Noble Truth Describe only Suffering? | 175 |
| Nirodha and Vaya – Two Different Concepts | 179 |
| Nibbāna “Exists”, but Not in This World | 181 |
| 3 Anicca, Dukkha, Anatta | 186 |
| Anicca, Dukkha, Anatta – Wrong Interpretations | 186 |
| The Way to Nibbāna – Transcription of a Discourse by Waharaka Thero | 192 |
| Anicca – True Meaning | 193 |
| Anicca – Inability to Keep What We Like | 193 |
| Anicca – Repeated Arising/Destruction | 198 |
| Anicca – Worthlessness of Worldly Things | 199 |
| Anicca – The Incessant Distress (“Piṭṭana”) | 203 |
| How to Cultivate the Anicca Saññā | 206 |
| How to Cultivate the Anicca Saññā – II | 209 |
| If Everything is Anicca Should We Just give up Everything? | 212 |
| Anattā – A Systematic Analysis | 214 |
| Anattā in Anattalakkahana Sutta – No Soul or an Ātma | 214 |
| Anatta – No Refuge in This World | 217 |
| Dasa Akusala and Anatta – The Critical Link | 221 |
| Anatta – the Opposite of Which Atta? | 224 |
| Anattā (Mundane Interpretation) – No “Unchanging Self” | 227 |
| Anatta and Dukkha – True Meanings | 230 |
| Anicca, Dukkha, Anatta – According to Some Key Suttas | 233 |
| Tilakkhaṇa – English Discourses | 237 |
| Sotāpanna Stage and Tilakkhaṇa | 239 |
| Sakkāya Diṭṭhi and Tilakkhaṇa | 239 |
| Sakkāya Diṭṭhi – Getting Rid of Deeper Wrong Views | 244 |
| Associations (Sevana) – A Root Cause of Wrong Views | 248 |
| Why are Tilakkhana not Included in 37 Factors of Enlightenment? | 251 |
| Two Versions of 37 Factors of Enlightenment | 254 |
| Types of Bodies in 31 Realms – Connection to Jhāna | 257 |
| Finest Manomaya Kāya of an Arūpāvacara Brahma | 259 |
| 4 Gati, Bhava, and Jāti | 263 |
| Namagotta, Bhava, Kamma Bīja, and Mano Loka (Mind Plane) | 263 |
| Gati and Bhava – Many Varieties | 266 |
| Gati to Bhava to Jāti – Ours to Control | 270 |
| Memory, Brain, Mind, Nama Loka, Kamma Bhava, Kamma Vipāka | 274 |
| Bhava and Jāti – States of Existence and Births Therein | 276 |
| Difference Between Taṇhā and Upādāna | 280 |
| Pāpa Kamma Versus Akusala Kamma | 284 |
| 5 Sorting out Some Key Pali Terms (Taṇhā, Lobha, Dosa, Moha, etc) | 289 |
| Kama Taṇhā, Bhava Taṇhā, Vibhava Taṇhā | 289 |
| Taṇhā – How We Attach Via Greed, Hate, and Ignorance | 291 |
| Lobha, Rāga and Kāmaccaṇḍha, Kāmarāga | 294 |
| Lobha, Dosa, Moha Versus Rāga, Paṭigha, Avijjā | 296 |
| What is Avijjā (Ignorance)? | 298 |
| Vedanā (Feelings) Arise in Two Ways | 300 |
| Indriya and Āyatana – Big Difference | 303 |
| Hetu-Phala, Paccuppanna, and Paṭicca Samuppāda | 306 |
| Diṭṭhi (Wrong Views), Sammā Diṭṭhi (Good/Correct Views) | 308 |
| Correct Meaning of Vacī Saṅkhāra | 310 |
| Kāmaccaṇḍha and Iccha – Being Blinded by Cravings | 313 |
| 6 The Five Aggregates (Pañcakkhandha) | 317 |
| Five Aggregates – Introduction | 317 |
| Difference Between Rūpa and Rūpakkhandha | 321 |
| Rūpakkhandha and Rūpa Upādānakkhandha | 323 |
| Arising of Five Aggregates Based on an Ārammaṇa | 326 |

| | |
|---|-----|
| Memory Records – Critical Part of Five Aggregates | 332 |
| Pañca Upādānakkhandhā – Introduction | 335 |
| Five Aggregates – Connection to Tilakkhaṇa | 339 |
| Five Aggregates and Tilakkhaṇa – Introduction | 339 |
| Icca, Nicca, Anicca – Important Connections | 343 |
| “Me” and “Mine” – The Root Cause of Suffering | 348 |
| Difference Between “Me and Mine” and Sakkāya Diṭṭhi | 352 |
| Sakkāya Diṭṭhi – “Me and Mine” View | 356 |
| Atta – Two Very Different Meanings | 361 |
| Saññā (Perception) | 365 |
| Vedanā (Feelings) | 365 |
| Viññāṇa (Defiled Consciousness) | 367 |
| Rūpa (Material Form) | 370 |
| Pañcakkhandha or Five Aggregates – A Misinterpreted Concept | 373 |
| Pañcaupādānakkhandha – It is All Mental | 378 |

Part IV Living Dhamma

382

| | |
|---|-----|
| 1 Essential Buddhism | 385 |
| Four Noble Truths – Suffering and Its Elimination | 385 |
| Introduction to Citta, Vedanā, Saññā, Saṅkhāra, and Viññāṇa | 389 |
| Viññāṇa – Consciousness Together With Future Expectations | 393 |
| Connection Between Saṅkhāra and Viññāṇa | 397 |
| Viññāṇa and Saṅkhāra – Connection to Paṭicca Samuppāda | 400 |
| Breath Meditation Is Addictive and Harmful in the Long Run | 404 |
| Ānāpānasati Eliminates Mental Stress Permanently | 408 |
| Ānāpāna and Satipaṭṭhāna – Fundamentals | 412 |
| Sati in Ānāpānasati/Satipaṭṭhāna – Two Meanings of Sati | 415 |
| 2 Living Dhamma – Overview | 420 |
| Living Dhamma – Introduction | 420 |
| Peace of Mind to Nibbāna – The Key Step | 423 |
| Starting on the Path Even without Belief in Rebirth | 426 |
| 3 Dhamma with Less Pāli | 429 |
| Buddha Dhamma for an Inquiring Mind – Part I | 429 |
| Root of All Suffering – Ten Immoral Actions | 433 |
| Is Suffering the Same as the First Noble Truth on Suffering? | 434 |
| Dhamma, Saṅkhāra, Sankata, Rūpa, Viññāṇa, Gati, Āsava, Anusaya | 436 |
| Complexity of the Mind – Viññāṇa and Saṅkhāra | 441 |
| Citta, Manō, Viññāṇa – Nine Stages of a Thought | 443 |
| 4 Living Dhamma – Fundamentals | 448 |
| What Are Kilesa (Mental Impurities)? – Connection to Cetasika | 448 |
| Suffering in This Life – Role of Mental Impurities | 452 |
| Satipaṭṭhāna Sutta – Relevance to Suffering in This Life | 453 |
| How Are Gati and Kilesa Incorporated into Thoughts? | 453 |
| Noble Eightfold Path – Role of Sobhana Cetasika | 454 |
| Getting to Samādhi | 458 |
| Sexual Orientation – Effects of Kamma and Gathi (Saṅkhāra) | 459 |
| 5 Mundane Sammā Samādhi | 463 |
| Micca Diṭṭhi – Connection to Hethu Phala (Cause and Effect) | 463 |
| Suffering in This Life and Paṭicca Samuppāda | 464 |
| Suffering in This Life and Paṭicca Samuppāda II | 465 |
| 6 Transition to Noble Eightfold Path | 467 |
| Is It Necessary for a Buddhist to Eliminate Sensual Desires? | 467 |
| Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi | 470 |
| Six Root Causes – Loka Samudaya (Arising of Suffering) and Loka Nirodhaya (Nibbāna) | 475 |
| Ye Dhammā Hetuppabhavā.. and Yam Kiñci Samudaya Dhammam.. | 478 |
| 7 Samādhi, Jhāna (Dhyāna), Magga Phala | 483 |
| Samādhi, Jhāna, Magga Phala – Introduction | 483 |
| Vitakka, Vicāra, Savitakka, Savicāra, and Avitakka, Avicāra | 485 |
| Jhānic Experience in Detail – Sāmaññaphala Sutta (DN 2) | 488 |
| Ascendance to Nibbāna via Jhāna (Dhyāna) | 491 |
| Paññāvimutti – Arahant hood without Jhāna | 497 |

| | |
|--|------------|
| Mundane versus Supramundane Jhāna | 500 |
| Nirodha Samāpatti, Phala Samāpatti, Jhāna, and Jhāna Samāpatti | 505 |
| 8 Mental Body – Gandhabba | 510 |
| Our Mental Body – Gandhabba | 510 |
| Gandhabba State – Evidence from Tipiṭaka | 515 |
| Antarābhava and Gandhabba | 519 |
| Ānantarika Kamma – Connection to Gandhabba | 523 |
| Mental Body (Gandhabba) – Personal Accounts | 527 |
| Abnormal Births Due to Gandhabba Transformations | 530 |
| Satara Āhāra for Mental Body or Gandhabba | 532 |
| Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage | 535 |
| Working of kammā – Critical Role of Conditions | 539 |
| 9 Nāma & Rūpa to Nāmarūpa | 543 |
| Rūpa Aggregate | 543 |
| Bhūta and Yathābhūta – What Do They Really Mean | 543 |
| What are rūpa? – Dhammā are rūpa too! | 547 |
| Mental Aggregates | 551 |
| What is Saññā (Perception)? | 552 |
| Saññā – What It Really Means | 552 |
| Future Suffering – Why It Arises | 555 |
| Vipallāsa (Diṭṭhi, Saññā, Citta) Affect Saṅkhāra | 558 |
| What Is Vedanā (Feelings)? | 561 |
| Vedanā and Samphassa Jā Vedanā – More Than Just Feelings | 562 |
| Vedanā – What It Really Means | 565 |
| Does Bodily Pain Arise Only Due to Kamma Vipāka? | 568 |
| Saṅkhāra – What It Really Means | 572 |
| Viññāṇa Aggregate | 576 |
| Viññāṇa – What It Really Means | 577 |
| Kamma Viññāṇa – Link Between Mind and Matter | 581 |
| Anidassana Viññāṇa – What It Really Means | 584 |
| Sakkāya Diṭṭhi | 589 |
| Do I Have “A Mind” That Is Fixed and “Mine”? | 589 |
| Nāmarūpa Formation | 593 |
| Kamma Viññāṇa and Nāmarūpa Pariccheda Ñāṇa | 593 |

Part V Dhamma and Science

597

| | |
|--|------------|
| 1 Dhamma and Science – Introduction | 600 |
| 2 Origin of Life | 604 |
| Origin of Life – There is No Traceable Origin | 605 |
| Human Life – A Mental Base (Gandhabba) and a Material Base (Cell) | 608 |
| Clarification of “Mental Body” and “Physical Body” – Different Types of “Kāya” | 612 |
| Buddhist Explanations of Conception, Abortion, and Contraception | 615 |
| Cloning and Gandhabba | 618 |
| Living Cell – How Did the First Cell Come to Existence? | 623 |
| Mystical Phenomena in Buddhism? | 627 |
| Views on Life | 631 |
| Views on Life – Wrong View of Materialism | 632 |
| Wrong View of Creationism (and Eternal Future Life) – Part 1 | 636 |
| Wrong View of Creationism (and Eternal Future Life) – Part 2 | 638 |
| Worldview of the Buddha | 642 |
| Buddhist Worldview – Introduction | 643 |
| Contact Between Āyatana Leads to Vipāka Viññāṇa | 647 |
| How Do Sense Faculties Become Internal Āyatana? | 651 |
| Indriya Make Phassa and Āyatana Make Samphassa | 655 |
| Is There a ‘Self’? | 659 |
| Citta – Basis of Our Experience and Actions | 659 |
| Vipāka Vedanā and “Samphassa jā Vedanā” in a Sensory Event | 663 |
| Kāma Guṇa – Origin of Attachment (Taṇhā) | 667 |
| Vision Is a Series of “Snapshots” – Movie Analogy | 671 |
| Chachakka Sutta – No “Self” in Initial Sensory Experience | 675 |
| Sakkāya Diṭṭhi in Terms of Attā or “Self” or “Ātma” | 681 |
| An Apparent “Self” Is Involved in Kamma Generation | 686 |

| | |
|---|------------|
| Paṭicca Samuppāda – Not ‘Self’ or ‘No-Self’ | 691 |
| Tañhā – The Origin of Suffering | 692 |
| Paṭicca Samuppāda – A ‘Self’ Exists Due to Avijjā | 694 |
| Kamma, Saṅkhāra, and Abhisāṅkhāra – What Is “Intention”? | 698 |
| Vacī Saṅkhāra – Saṅkappa (Conscious Thoughts) and Vācā (Speech) | 702 |
| Tañhā Paccayā Upādāna – Critical Step in Paṭicca Samuppāda | 707 |
| Moha/Avijjā and Vipāka Viññāṇa/Kamma Viññāṇa | 711 |
| Icchā (Cravings) Lead to Upādāna and to Eventual Suffering | 715 |
| Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections | 719 |
| Paṭicca Samuppāda – From Mind to Matter | 724 |
| Kamma and Paṭicca Samuppāda | 727 |
| Kamma and Paṭicca Samuppāda – Introduction | 727 |
| Kāma Assāda – A Root Cause of Suffering | 731 |
| Gati (Habits/Character) Determine Births – Samsappanīya Sutta | 734 |
| Wider Worldview of the Buddha | 738 |
| The Framework of Buddha Dhamma | 738 |
| The Suffering (Dukkha) in the First Noble Truth | 743 |
| Dangers of Ten Types of Wrong Views and Four Possible Paths | 747 |
| Sammā Diṭṭhī – Only One Leads to the Noble Path | 751 |
| Fear of Nibbāna (Enlightenment) | 755 |
| Worldview of the Buddha – Explanatory Material | 759 |
| Ghost 1990 Movie – Good Depiction of Gandhabba Concept | 759 |
| Mental Body Versus the Physical Body | 763 |
| “Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1 | 767 |
| “Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2 | 771 |
| Origin of Life – One Creates One’s Own Future Lives | 774 |
| 3 Good Explanations – Key to Weeding Out Bad Versions of Dhamma | 780 |
| Consciousness and the Brain | 781 |
| Matter Creates Mind or Mind Creates Matter? | 781 |
| 4 Consciousness – A Dhamma Perspective | 782 |
| Consciousness Dependence on Number of Dimensions | 782 |
| Six Kinds of Consciousness in Our 3-D World | 783 |
| Expanding “Consciousness” by Using Technology | 785 |
| Expanding “Consciousness” by Purifying the Mind | 786 |
| What is Mind? How do we Experience the Outside World? | 789 |
| 5 Consistencies with Science | 793 |
| Second Law of Thermodynamics is Part of Anicca! | 793 |
| Quantum Entanglement – We Are All Connected | 794 |
| Infinity – How Big Is It? | 796 |
| Gödel’s Incompleteness Theorem | 799 |
| Truine Brain: How the Mind Rewires the Brain via Meditation/Habits | 801 |
| How Habits are Formed and Broken – A Scientific View | 805 |
| 6 Inconsistencies with Science | 809 |
| Neuroscience says there is no Free Will? – That is a Misinterpretation! | 809 |
| The Double Slit Experiment – Correlation between Mind and Matter? | 813 |
| Vision (Cakkhu Viññāṇa) is Not Just Seeing | 816 |

Part VI Three Levels of Practice

820

| | |
|---|------------|
| 1 Moral Living and Fundamentals | 823 |
| The Basics | 824 |
| The Pale Blue Dot | 824 |
| The Law of Attraction, Habits, Character (Gati), and Cravings (Āsava) | 825 |
| Habits, Goals, and Character (Gati or Gathi) | 828 |
| Wrong Views (Micchā Diṭṭhi) – A Simpler Analysis | 829 |
| Four Noble Truths: Recipe for Problem Solving | 833 |
| First Noble Truth – A Simple Explanation of One Aspect | 836 |
| Difference between a Wish and a Determination (Parāmitā) | 838 |
| Calming the Mind | 840 |
| Key to Calming the Mind – The Five Hindrances | 840 |
| Solution to a Wandering Mind – Abandon Everything? | 843 |
| Right Speech – How to Avoid Accumulating Kamma | 844 |

| | |
|---|-------------|
| Three Kinds of Happiness – What is Nirāmisa Sukha? | 846 |
| Learning Buddha Dhamma Leads to Nirāmisa Sukha | 847 |
| Need to Experience Suffering in Order to Understand it? | 850 |
| Does Impermanence Lead to Suffering? | 852 |
| Buddha Dhamma and Buddhism | 854 |
| What is Unique in Buddha Dhamma? | 855 |
| A Buddhist or a Bhauddhayā? | 857 |
| Where to Start on the Path? | 859 |
| What Reincarnates? – Concept of a Lifestream | 861 |
| Recent Evidence for Unbroken Memory Records (HSAM) | 864 |
| Buddhism without Rebirth and Nibbāna? | 866 |
| Dhamma Concepts | 870 |
| Kusala and Akusala Kamma, Puñña and Pāpa Kamma | 870 |
| Ten Immoral Actions (Dasa Akusala) | 873 |
| Puñña Kamma – Dāna, Sīla, Bhāvanā | 877 |
| The Five Precepts – What the Buddha Meant by Them | 880 |
| What is Kamma? – Is Everything Determined by Kamma? | 882 |
| How to Evaluate Weights of Different Kamma | 886 |
| Account of Aṅgulimāla – Many Insights to Buddha Dhamma | 888 |
| The Four Bases of Mental Power (Satara Iddhipāda) | 892 |
| Why is it Necessary to Learn Key Pāli Words? | 894 |
| Buddha Dhamma and Morality | 897 |
| Origin of Morality (and Immorality) in Buddhism | 897 |
| Is Eating Meat an Akusala Kamma (Immoral Deed)? | 898 |
| Do Things Just Happen? – The Hidden Causes | 902 |
| 2 Working Towards Good Rebirths | 905 |
| Sansāric Habits, Character (Gati), and Cravings (Āsava) | 905 |
| Complexity of Life and the Way to Seek “Good Rebirths” | 907 |
| How to Avoid Birth in the Apāyā | 908 |
| How the Buddha Described the Chance of Rebirth in the Human Realm | 910 |
| Nakhasikha Sutta | 913 |
| Kanakacchapa-sutta | 915 |
| Tiṅsamatta Sutta - About Thirty Monks | 919 |
| Kamma, Debt, and Meditation | 920 |
| How do we Decide which View is Wrong View (Diṭṭhi)? | 922 |
| Three Kinds of Diṭṭhi, Eightfold Paths, and Samādhi | 925 |
| Implications of the Rebirth Process in Daily Life and in Society | 927 |
| What Does Buddha Dhamma Say about Creator, Satan, Angels, and Demons? | 929 |
| Paṭisandhi Citta – How the Next Life is Determined According to Gathi | 931 |
| 3 Seeking Nibbāna | 934 |
| Aṭṭha Purisa Puggalā – Eight Noble Persons | 934 |
| Āsava, Anusaya, and Gati (Gathi) | 939 |
| The Way to Nibbāna – Removal of Āsavā | 943 |
| Kaṇha (Dark) and Sukka (Bright) Kamma and Kammakkhaya | 945 |
| Dasa Saṃyojana – Bonds in Rebirth Process | 949 |
| The Cooling Down Process (Nibbāna) – How the Root Causes are Removed | 954 |
| Why is Correct Interpretation of Anicca, Dukkha, Anattā so Important? | 958 |
| How to Cultivate the Noble Eightfold Path starting with Anicca, Dukkha, Anatta | 960 |
| Difference Between Giving Up Valuables and Losing Interest in Worthless | 962 |
| Root Cause of Anicca – Five Stages of a Sankata | 965 |
| 4 Sotāpanna Stage of Nibbāna | 969 |
| The Sotāpanna Stage | 970 |
| Why a Sotāpanna is Better off than any King, Emperor, or a Billionaire | 973 |
| Myths about the Sotāpanna Stage | 976 |
| Anuloma Paṭiloma Paṭicca Samuppāda – Key to Sotāpanna Stage | 979 |
| Sotāpanna Anugāmi and a Sotāpanna | 982 |
| Sotāpanna Anugāmi – No More Births in the Apāyā | 986 |
| Four Conditions for Attaining Sotāpanna Magga/Phala | 990 |
| Sotāpatti Aṅga – The Four Qualities of a Sotāpanna | 995 |
| Sammā Diṭṭhi – Realization, Not Memorization | 998 |
| How Does One Know whether the Sotāpanna Stage is Reached? | 1001 |
| Assāda, Ādīnava, Nissaraṇa | 1006 |

| | |
|---|-------------|
| Assāda, Ādīnava, Nissaraṇa – Introduction | 1006 |
| How Perceived Pleasures (Assāda) lead to Dukkha | 1010 |
| Kāma Guna, Kāma, Kāma Rāga, Kāmaccandha | 1013 |
| Vedanā (Feelings) Arise in Two Ways | 1018 |
| Feelings: Sukha, Dukha, Somanassa, and Domanassa | 1021 |
| What is “Kāma”? It is not Just Sex | 1024 |
| Kāma Assāda Start with Phassa Paccaya Vedana or Samphassa Ja Vedana | 1028 |
| Sakkāya Dīṭṭhi is Personality (Me) View? | 1031 |
| Akusala Citta – How a Sotāpanna Avoids Apāyagāmi Citta | 1036 |
| What is the only Akusala Removed by a Sotāpanna? | 1038 |
| Udayavaya Ñāṇa | 1042 |
| Udayavaya (Udayabbaya) Ñāṇa – Introduction | 1042 |
| Nibbatti Lakkhana in Udayavaya Ñāṇa | 1046 |
| Āhāra (Food) in Udayavaya Ñāṇa | 1049 |
| Udayavaya Ñāṇa – Importance of the Cittaja Kāya | 1052 |

Part VII Tables and Summaries

1057

| | |
|--|------|
| 1 Pāli Glossary | 1058 |
| 2 Pāli Glossary – (A-K) | 1066 |
| 3 Pāli Glossary – (L-Z) | 1075 |
| 4 List of “San” Words and Other Pāli Roots | 1087 |
| 5 The 89 (121) Types of Citta | 1092 |
| 6 Cetasika (Mental Factors) | 1095 |
| 7 Rūpa (Material Form) – Table | 1097 |
| 8 Rūpa – Generation Mechanisms | 1100 |
| 9 Rūpa Kalāpa (Grouping of Matter) | 1102 |
| 10 Akusala Citta and Akusala Vipaka Citta | 1106 |
| 11 37 Factors of Enlightenment | 1108 |
| 12 Conditions for the Four Stages of Nibbāna | 1110 |

Welcome!

Revised August 12, 2019; August 16, 2020

Buddhism (Buddha Dhamma) describes the “laws of nature” as discovered by the Buddha 2500 years ago. This website presents those teaching per the Pāli Canon, *Tipiṭaka*. Even though I am a Buddhist by birth, I never bothered to look into the question of why I was a Buddhist. When I retired several years ago, I first started reading widely on many subjects, including science, philosophy, and religion.

- When I started to glean the profound message of the Buddha, I realized that I had not known much about my own “religion.” Furthermore, it had been “contaminated” over its long history. Since 2009, I

have been trying to find the essence of the message of the Buddha. I wanted to share the results with the rest of the world.

- You can read about me at [“About.”](#)

There seem to be three types of people who become interested in “Buddhism”:

1. Those who have gone through hardships see that there is suffering “in this world,” and seeking solutions.
2. Those getting to the old age are beginning to see that there are signs of possible problems looming in the future. That includes aging, various ailments, not been able to get satisfaction from those things that provided comfort before, etc.
3. Those who are intellectually motivated, and exposed to *Dhammapada* verses or some other types of sayings by the Buddha, could see a glimpse of a broader world view of the Buddha.

Some of those who have been to meditation retreats realize that there is indeed a second option compared to seeking material wealth and indulging in sense pleasures. Especially for those people in categories 1 and 2, it becomes clear that indulging in sense pleasures does not have staying power. On the other hand, the sense of well-being achieved via insight meditation (not breath meditation) has the staying power and does not go down as one gets old.

- I believe that for people in any category, it is a good idea first to understand what the Buddha's message was. Those who are intellectually motivated will be able to get a complete picture, and thus a better intellectual satisfaction. For those in categories 1 and 2, a much better idea of how to focus their efforts will become apparent with an insight into why focusing efforts on purifying the mind will be beneficial.
- **January 30, 2019:** For those who are new to Buddha Dhamma (or just want to look at the essential fundamentals, see, [“Essential Buddhism.”](#)

I believe that anyone could benefit in some way by first getting a more complete overview of the Buddha Dhamma, which is about a “world” that is much more expansive and complex than the one we perceive with our senses. The mind is the precursor to everything in this world: [“Manopubbangamā Dhammā...”](#)

This website was launched in early January 2014. As of August 2020, it has around 600 posts. You may want to look at some new sections listed at the end of this post. Some early posts may need revisions.

- I discuss many “scientific aspects” to illustrate that Buddha Dhamma is a complete world view that has withstood all scrutiny for 2500 years. However, my main goal is to convey the benefits of actual practice.

I have experienced much of what I discuss here. The reason that I started this website is to share that experience with anyone interested. The “practice” part will come out as I lay down the basic ideas. To practice something, one needs to know what to practice. (Note added May 29, 2014: I have posted the first few essays on meditation under [“Bhāvanā \(Meditation\).”](#) November 6, 2014: The first 12 posts provide a meditation program that one could follow systematically; my own experience is in the 10th and 11th posts).

- Buddha Dhamma is NOT a religion to be followed by following rituals or blindly following a few precepts. It describes laws of nature that need to be “grasped” and “lived.” Dhamma means “to bear”; to bear something, it needs to be understood. Then it becomes clear WHY one must live life in a certain way.
- This website is not a blog but a Content Management System (CMS). The material does not belong to me, but the Buddha. What I try to do is to keep the information accurate to the best of my ability. I will be making changes to the format and even the contents either to revise as needed or to present better. So, please make sure to go back and read “old topics” once-in-a-while.
- Also, **one needs to contemplate the ideas presented; just quickly going through may not yield many benefits.**

Another aspect that I try to highlight is the CONSISTENCY of Buddha Dhamma. You will see links from any given area to other sections. The Buddha is called “Bhaghavath” [*bhagava*] because he analyzed the

same thing in many different ways. They are all consistent internally, as well as with the primary axioms such as 31 realms of existence, the concept of *kamma*, and rebirth.

- As science has progressed mainly over the past hundred or so years, consistency with science is becoming apparent as well. But science has not grasped the importance of the mind (over matter) yet. In some of the posts, I am making predictions on what will be discovered by science in the future. To have a time-stamp, I started putting the date of publication of new posts beginning in late October 2015.
- Please send your suggestions/comments/questions and also let me know of any technical issues with the site using the “Comments” tab. I do not plan to have a discussion forum, so your comments will not be published.
- I usually write four to five essays a month, and they are in the “[New/Revised Posts](#)” in the menu on the bottom of each page. Engaging/relevant news articles are also in that menu.
- I started posting the date of publication in new posts starting on October 23, 2015. Thus, if a web post is not dated, it must have been published before October 23, 2015.

The Buddha said, “*Sabba dānaṃ Dhamma dānaṃ jināti,*” or “Gift of Dhamma excels all other gifts.” Please inform others about this site if you benefit from it. [*Sabba-rasaṃ dhamma-raso jināti.* All taste(s) the dhamma-taste excels.]

- However, we should only inform others. Humanity has suffered enough from those who have tried to force their views on others. As the Buddha said, “Come and see for yourself!”

The Buddha also said, “*Sabba ratin Dhamma ratin jināti,*” or “Taste of Dhamma excels all other tastes (pleasures).” I hope you will have the patience to look around the site to learn enough pure Dhamma to start enjoying its taste.

Note added/revised December 7, 2016: I have added a “Font Size Selector” on the top right so that any reader can control the font size.

- There are two other possible tools: 1. Each post can be printed using the PRINT button below that post. 2. All the posts at the site can be downloaded using three eBook formats. One can read them on electronic readers like Amazon Kindle: [Pure Dhamma Essays in Book Format](#).

Note added June 8, 2017: As of today, there are over 450 posts on the website. Recently, I have been getting inquiries on “where to start?.” I just added the following post to summarize various sections and how to locate posts of interest: “[User’s Guide to Pure Dhamma Website](#).”

April 14, 2018: Discussion forum initiated in December of 2017: “[Forum](#).” Updates and new posts are posted at “[New / Revised Posts](#).”

March 2018: New section on “[Quantum Mechanics and Dhamma](#).”

November 20, 2018: I have disabled comments on individual posts. You can make comments at the “[Forums](#),” or send me an email: lal@puredhamma.net.

July 10, 2019: New section on “[Origin of Life](#).”

July 31, 2020: New section on “[Buddha Dhamma – A Scientific Approach](#).”

It is important to know that there is a special convention to write Pāli words: “[Tipitaka English’ Convention Adopted by Early European Scholars – Part 1](#).” There is also a “[Pāli Glossary – \(A-K\)](#).”

2.1 User's Guide to Pure Dhamma Website

June 8, 2017; revised October 1, 2017

As of early 2020,, there are over 550 posts on the website. Recently, I have been getting inquiries on “where to start?” when one first comes to the website.

1. First, there are a few general tools that can be used to navigate the website:

- Following is how the home page of the site should look like.

- If you do not see it like that with the menu system, you should update your browser (Google Chrome, Microsoft Explorer, Firefox, etc) so that you would be able to see the menu as shown above.
- Another way to look at the whole menu is “[Pure Dhamma – Sitemap](#).” All posts are categorized under sections and subsections there. One could scan through it to locate relevant posts of interest.
- The “Search” button at top right is also good at extracting relevant posts for a given keyword or keywords.
- I have added a “bread crumbs” link at the top of each page so that you can see which section/subsection the page belongs to. You can go to that section/subsection and read more on that topic.
- **January 30, 2019:** For those who are new to Buddha Dhamma (or just want to look at the essential fundamentals, see, “[Essential Buddhism](#).”

2. First, for those who are familiar with Buddha Dhamma (Buddhism), I like to point out that three main misconceptions are prevalent today. They not only block the path to *Nibbāna* but are *micchā diṭṭhi* that could be responsible for rebirth in the *apāyā*. I am not trying to scare anyone, but “making *adhamma* to be *dhamma* is a serious offense.”

- Misinterpretation of *anicca*, *dukkha*, *anatta*: “[Anicca, Dukkha, Anatta – Wrong Interpretations](#).”
- Misinterpretation of breath meditation as *Ānāpānasati*: “[Is Ānāpānasati Breath Meditation?](#).”
- Insisting that the *gandhabba* (*manomaya kāya*) is a Mahāyāna concept: “[Gandhabba State – Evidence from Tipitaka](#).”
- These misconceptions are not the fault of current *Theravādins*; they have been handed down for many hundreds of years as explained in the “[Historical Background](#).” **However, it makes no sense to adhere to them when solid evidence is presented, per the above posts and many others on this website.**
- Of course, no one should be able to insist, “this is the only truth, and nothing else is the truth”, but the truth can be verified to one’s satisfaction by critically examining the evidence. I am open to discuss any valid contrary evidence. We need to sort out the truth for the benefit of all.

3. Now, let us discuss which sections could be of interest to people with different backgrounds on their exposure to Buddha Dhamma.

- The “[Moral Living and Fundamentals](#)” section is a good start for anyone since the fundamentals of Buddha Dhamma are discussed. In particular, the subsections, “[Buddha Dhamma and Buddhism](#)” and “[Dhamma Concepts](#)” could be informative.
 - The subsection on “[Working Towards Good Rebirths](#)” broadens the concepts discussed in the above subsection, to indicate how one’s actions need to be tailored to seek rebirths in higher realms, and to avoid births in the lower realms (*apāyā*), in case one is unable to attain any stages of *Nibbāna* in this life.
 - Even those who have had exposure to “Buddhism” may realize that some fundamental aspects have been misrepresented in many textbooks as well as in various websites.
4. The “[Buddha Dhamma](#)” section is a bit more advanced version of the above-mentioned section. It discusses the basis of the Buddha Dhamma, i.e., the importance of purifying one’s mind in the first few posts.
- The Buddha described a wider world of 31 realms of which we are aware of only two: the animal and human realms: “[The Grand Unified Theory of Dhamma](#).”
 - Then it discusses how the Buddha was able to see that “bigger picture” in the post, “[Buddha Dhamma: Non-Perceivability and Self-Consistency](#).”
 - The two posts “[Samsaric Time Scale](#)” and “[Evidence for Rebirth](#)” discuss how we have been going through the birth/death/rebirth process from a beginning-less time.
5. Those who have had exposure mainly to “*Mahāyāna* Buddhism”, the following two posts will provide an idea of why *Mahāyāna* *śūtrās* are very different from the *suttā* that the Buddha delivered: “[Saddharma Pundarika Sutra \(Lotus Sutra\) – A Focused Analysis](#)” and “[What is Sunyata or Sunnata \(Emptiness\)?](#).”
- Further details on how various “schools of Buddhism” — like *Mahāyāna*, *Vajrayāna* (Tibetan), *Zen*, etc — evolved within the first 1000 years after the Buddha, can be found in the “[Historical Background](#)” section.
6. Even *Theravāda* Buddhism — which is supposed to be closest to the original teachings of the Buddha — has been contaminated over the years, mainly due to three key reasons. We will first list those three and discuss a bit more. The **first reason** is to do with losing the true interpretations of ten types of *micchā diṭṭhi* (wrong views).
- There are two types of Eightfold Paths: mundane and transcendental (*lokuttara*). One needs to first get into the mundane Path by getting rid of the 10 types of *micchā diṭṭhi*; see, “[Buddha Dhamma – In a Chart](#)” and “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#).”
 - One of the ten *micchā diṭṭhi* is “*para loka* (“*paralowa*” in Sinhala) or the world of *gandhabba* does not exist.” Many people think that *gandhabba* is a *Mahāyāna* concept, but that is a big mistake; see below.
 - One cannot even get into the mundane Eightfold Path if one believes that *para loka* and *gandhabba* are not real.
7. **Second**, various Hindu meditation techniques — including wrong interpretations of *kasina* meditation and *Ānāpānasati* (as breath meditation) — were incorporated into *Theravāda* teachings especially after Buddhaghosa’s *Visuddhimagga*; see, “[Buddhaghosa’s Visuddhimagga – A Focused Analysis](#),” and the posts referred to there.
8. **Third and most important reason** is the incorrect translation of key *Pāli* words like *anicca* and *anatta* by the Early European scholars in the 1800’s, see, “[Misinterpretation of Anicca and Anatta by Early European Scholars](#).”
- Let us discuss each of those three briefly next, and point to a few more relevant posts.
9. Many people don’t realize that the concept of *gandhabba* (mental body) is a critical component in explaining how life functions in human and animal realms.

- First, it is a misconception that *gandhabba* is a Mahāyāna concept; see, “[Antarabhava and Gandhabba](#)” and “[Gandhabba State – Evidence from Tipitaka](#).”
- Without the concepts of *gandhabba*, it is not possible to explain so many rebirth stories and out-of-body experiences that have been widely reported in recent years; see, “[Evidence for Rebirth](#)” and “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”
- The main opposition to the concept of *gandhabba* in current *Theravāda* circles is the misconception that it is an “*antarābhava*,” i.e., in between two *bhava*. But a human *gandhabba* is in the same “human *bhava*.” This is clarified in, “[Antarabhava and gandhabba](#).”
- The critical role of the mental body (*gandhabba*) in giving rise to multiple births (*jāti*) within human and animal existences (*bhava*) has been disregarded. However, not believing in the existence of *gandhabba* is a *micchā diṭṭhi*, and is a hindrance to attain the *Sotāpanna* stage; see, “[Miccā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#).”
- Because of the high importance, *gandhabba* is discussed in two main sections: “[Mental Body – Gandhabba](#)” and “[Gandhabba \(Manomaya Kāya\)](#).”

10. Regarding the problems with Buddhaghosa's *Visuddhimagga* — published 1500 years ago — the two issues mentioned above are:

- Regarding *kasina* meditations discussed in the *Visuddhimagga*, there is not a single *sutta* in the *Tipitaka* that discusses *kasina* meditation.
- Regarding the breath meditation discussed in the *Visuddhimagga*, there are no *suttā* in the *Tipitaka* that discusses BREATH MEDITATION. Those *suttā* have been mistranslated. Furthermore, there is a *sutta* in the *Tipitaka* that specifically says breath meditation is not *Ānāpānasati* meditation, see, “[Is Ānāpānasati Breath Meditation?](#).”

11. The critical problem of incorrect translation of *anicca* and *anatta* has prevented so many people from making progress over the past 200 years. I strongly recommend the post, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#).”

- More posts on that can be found in the section, “[Anicca, Dukkha, Anatta](#).” Correct interpretation of many relevant key *suttā* are discussed in that section.
- The introductory timeline on those historical developments is given in “[Incorrect Theravāda Interpretations – Historical Timeline](#),” and all relevant posts are in the “[Historical Background](#)” section.

12. Now let us turn to an issue of relevance to many who are new to Buddha Dhamma. Many people — especially in Western countries — have a hard time in believing in rebirth; see, “[Buddhism without Rebirth and Nibbāna?](#).”

- The section, “[Living Dhamma](#),” is specially designed for one to start following Buddha Dhamma even without believing in the concept of rebirth.
- The first two subsections there are good to be read by everyone. One can experience a real “cooling down” even without having belief in rebirth.
- The latter subsections gradually take one to advanced concepts, and latter sections are appropriate even for people with advanced background on Buddha Dhamma. One would be able to clarify advanced concepts in later subsections.

13. Once one starts looking into Buddha Dhamma seriously, it is a good idea to learn a few basic things about the *Pāli* language. The *Pāli* Canon, which was first transmitted orally and then was written down 2000 years ago, still has all the *suttā* as composed by the Buddha and memorized by Ven. Ānanda.

- See, “[Preservation of the Dhamma](#)” and other relevant posts in the “[Historical Background](#).”

- While the Buddha encouraged delivering Dhamma to others in their native language, there are some advantages in learning at least some key *Pāli* words, see, “[Why is it Necessary to Learn Key Pāli Words?](#).”
 - In particular, learning the meanings behind some key roots like “*san*” makes a huge difference in gaining understanding of key words like *saṃsāra* and *sammā*, see, the subsection on “[San](#).”
14. Learning the correct meanings of the *suttā* in the *Tipiṭaka* is an essential part of learning Buddha Dhamma. Most existing literature, even on *Theravāda*, have incorrect translations.
- The section “[Sutta Interpretations](#)” discusses some key *suttā* in the *Tipiṭaka*.
 - It is a good idea to first read two important posts in that section, “[Sutta – Introduction](#)” and “[Pāli Dictionaries – Are They Reliable?](#).”
 - Short and succinct sayings of the Buddha in the *Dhammapada* provide deep insights in short verses. Some of these are discussed in the “[Dhammapada](#)” section.
15. Meditation (both formal and informal) is an essential part of following the Path of the Buddha. The “[Bhāvanā \(Meditation\)](#)” provides a series of posts on the fundamentals of meditation and also on advanced topics.
- A critical misconception that is prevalent today is *Ānāpānasati bhāvanā* is breath meditation. There are several posts that discuss the correct version and the post, “[Is Ānāpānasati Breath Meditation?](#)” discusses evidence from the *Tipiṭaka* that breath meditation is not *Ānāpāna*.
 - The *Satipaṭṭhāna bhāvanā* is discussed in the subsection, “[Mahā Satipaṭṭhāna Sutta](#).”
16. Buddha Dhamma is based on the principle of causation (cause and effect), which in *Pāli* is *Paṭicca Samuppāda*. The principles are discussed in the section, “[Paṭicca Samuppāda](#).”
- While the meaning of *Paṭicca Samuppāda* is clear from its name itself, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda”](#),” the main concepts are discussed in plain English at: “[Paṭicca Samuppāda in Plain English](#).”
 - Just because causes exist, does not necessarily mean that effects (results) will follow. There must be suitable conditions present to about those results (also called *vipāka*). This is discussed in detail in the subsection “[Paṭthāna Dhamma](#).”
17. Chanting of *suttā* and reciting the virtues of Buddha, Dhamma, Saṅgha can prepare one’s mind to be receptive to learn Dhamma, and thus could be an important part of the practice, see, “[Buddhist Chanting](#).”
- The section on “[Myths or Realities?](#)” is also important, since it discusses many concepts and practices that are considered by some to not belong to Buddha Dhamma.
18. Those who would like to see how compatible Buddha Dhamma is with modern science, “[Dhamma and Science](#)” section is a good resource.
- That section points out both consistencies and inconsistencies with modern science.
 - Modern science has had to revise or come up with new theories to explain many phenomena over the past 500 years, but Buddha Dhamma (in the *Tipiṭaka*) has remained the same over 2500 years.
 - My prediction is that in the end the remaining inconsistencies will also be resolved in favor of Buddha Dhamma.
19. The section on “[Tables and Summaries](#)” is an important collection of posts summarizing bits of information or “data” that are not necessary to be memorized, but could be needed to explain things in detail.
- There are several posts with listings of types of *citta*, *cetasika*, 28 types *rūpa*, etc. in this section.
 - There is also a *Pāli* glossary with pronunciation: “[Pāli Glossary – \(A-K\)](#)” and “[Pāli Glossary – \(L-Z\)](#).”

- The section on "[Comments/Reviews](#)" has two subsections on "[Discussion of Comments](#)" and "[Book Reviews](#)."

20. There are some who either have already learned *Abhidhamma*, or would like to learn. For them, the "[Abhidhamma](#)" section could be useful. There are several subsections in this section on various topics.

- The section on "[Inconsistencies with Science](#)" highlights some overlaps between *Abhidhamma* Science.
- One of my favorite subjects is *Abhidhamma*. When one has proceeded along the Path to some extent, it could be useful to learn *Abhidhamma*, which will help gain a deeper understanding.

21. Finally, **but most importantly**, there are three important subsections that discuss issues involved in attaining *magga phala* (stages of *Nibbāna*). The primary goal of this website is to provide enough material for one to attain the *Sotāpanna* stage of *Nibbāna*.

- **First**, the concept of *Nibbāna* is a puzzle to many. It is discussed in several posts in the subsection: "[Nibbāna](#)."
- **Some critical points to consider** by those who are making an effort in that direction are discussed in the subsection: "[Seeking Nibbāna](#)."
- **The first goal of those who seek *Nibbāna* is the *Sotāpanna* stage**. Many concepts and requirements for achieving that goal are discussed in the subsection: "[Sotāpanna Stage of Nibbāna](#)."
- The section, "[Living Dhamma](#)," is especially designed for one to start following Buddha Dhamma even without believing in the concept of rebirth, all the way to the *Sotāpanna* stage. People with the more advanced background can start at later subsections, skipping the early ones.

2.2 Buddha Dhamma – A Scientific Approach

July 31, 2020

- [Introduction – A Scientific Approach to Buddha Dhamma](#)
- [Theories of Our World – Scientific Overview](#)
- [Mind and Matter – Buddhist Analysis](#)
- [Sensual Pleasures – The Hidden Suffering](#)
- [Kammic Energy Leads to Consciousness](#)

[Brain and the Gandhabba](#)

- [Patient H.M. – Different Roles of Brain in Memory](#)
- [Memory Recall for Gandhabba in a Human Body](#)

2.2.1 Introduction – A Scientific Approach to Buddha Dhamma

July 31, 2020; revised August 2, 2020

A Scientific Approach to Buddha Dhamma

1. Buddha Dhamma is the Grand Unified Theory (a theory that explains everything about this world) that scientists are seeking. They do not realize it because the correct version of it, with its deeper aspects, has not been available in English. There are two major relevant points.

- First, scientists will never get to a Grand Unified Theory until they realize that mental phenomena must be a part of such a theory. Modern science only focuses on just “material phenomena.” The reason is the following incorrect assumption by them: Psychological (mental) aspects arise from matter. The Buddha taught that it is the other way around: **Mind is the forerunner of ALL phenomena, mental and material.**
- The second point is the following. **When scientists propose a brand new theory, they just use a set of assumptions.** Some assumptions (axioms) are revolutionary and opposed by other scientists at the beginning. We will discuss such a prominent case below. The point is that they are not starting off with a truly essential set of axioms that cover mental as well as physical phenomena.

I will use the standard scientific method in this series of posts. I will start with a set of “assumptions,” even though those are NOT ASSUMPTIONS for a Buddha. Upon attaining the *Buddhahood*, a Buddha DISCOVERS those fundamental laws of Nature.

What Is a Scientific Approach?

2. Most of the time, science makes progress in a gradual step-by-step way. An existing scientific theory is “tweaked” to get a better agreement with new experimental results.

- **However, In some cases, scientists come with “previously unheard” theories to explain new observations.** Most other scientists are first skeptical about such a drastically new approach. But if it turns out to be able to explain observations, then it becomes accepted over time.
- Such a “revolutionary change” is a paradigm change. A good example is theories on atomic structure. There, paradigm changes happened twice within the past 100 years, as we will see below.

Western Theories of the Atom Started with Democritus

3. Around the time of the Buddha, Democritus (400 B.C.E.) proposed that all matter is made of indivisible particles called atoms. But nothing much was known about atoms at that time.

- Democritus just assumed that if one keeps cutting in half a piece of a given material (say, an aluminum foil), it will reach a stage where it would not be possible to cut. That ultimate “indivisible” unit, he called an “atom.”
- That picture has changed drastically over the years, especially within the past 150 years or so.
- Of course, Buddha's ultimate unit of matter was a *suddhatthaka*. It is also electrically-neutral, just as Democritus' atom. **However, a mind can create a *suddhatthaka*** with *javana citta*. A *suddhatthaka* is a billionth times smaller than an atom in modern science. See, “[The Origin of Matter – Suddhatthaka.](#)”

Modern Theories of the Atom

4. John Dalton, in 1803, proposed a modern theory of the atom. He suggested that different materials are made of different atoms and that a given atom cannot be broken down into smaller parts.

- For example, an oxygen atom would be eight times bigger than a hydrogen atom, but an oxygen atom CANNOT be made by combining eight hydrogen atoms. Hydrogen and oxygen have different types of “building blocks” or different atoms.
- Dalton was able to make some progress with his model.

Plum-Pudding Model of the Atom by J. J. Thomson

5. In the late 1800s, there were many experiments on electrical discharges. J. J. Thomson discovered that negatively-charged electrons could be removed from an atom. Since atoms are electrically neutral, in 1904, he proposed that an atom is made of a positively-charged material with electrons embedded in it.

- That is analogous to plums embedded in a pudding. Thus, it came to be known as the “plum-pudding model” of an atom. See, “[WebLink: wikipedia.org: Plum Pudding Model](http://web.archive.org/web/20160305120000/http://www.wikipedia.org/Plum_Pudding_Model)” for that model of an atom.

The following video illustrates this point:

[WebLink: youtube: Discovery of the Electron: Cathode Ray Tube Experiment](https://www.youtube.com/watch?v=8B013031800)

- Therefore, the indivisibility of the atom was no longer accepted. Yet, Thomson's model still preserved one aspect of the original model of Democritus. An atom could be visualized as a “single unit” with two kinds of particles packed together. Later on, the positively-charged component was found to be due to protons, and a neutral particle (neutron) was also found to be inside an atom.

Rutherford's Discovery of Mass-Concentrated Nucleus

6. Soon after that another English physicist, Ernest Rutherford, directed small alpha particles (much smaller than an atom) to a thin gold foil. He observed that most particles went right through the foil. However, some got deflected and a few even bounced back. It appeared that the atoms were mostly empty space, but there was something dense and small in there that bounced off some of the projectile particles.

- Based on those experiments, Rutherford, in 1911, proposed a radically new theory of the atom. He proposed that the positively-charged component of an atom be in a tiny volume in comparison to the rest of the atom. That central volume also contained the bulk of the mass of the atom. This region would be known as the “nucleus” of the atom. Negatively-charged electrons would be outside that nucleus, but Rutherford did not propose a model for that “outer layer” of the atom with electrons.

Bohr's Planetary Model of the Atom

7. In 1913, Niels Bohr came up with another paradigm change for atomic structure. He proposed that the electrons “revolved around” a tiny nucleus, a small core that contained all the protons. That is similar to the structure of the Solar System, where the planets revolve around the Sun.

- Thus, some called it the “planetary model” another name for the “[WebLink: wikipedia.org: Bohr Model](http://www.wikipedia.org: Bohr Model).” That planetary model of the atom was able to explain many experimental observations.

[WebLink: youtube: Discovery of the Nucleus: Rutherford's Gold Foil Experiment](https://www.youtube.com/watch?v=7311111111)

- Atoms of different materials have different numbers of protons (and electrons). For example, a hydrogen atom has one proton in the nucleus and one electron moving around it. An oxygen atom has eight protons and eight electrons, etc.
- However, Bohr’s planetary model unable to explain a growing number of other observations.

Quantum Mechanics

8. In the end, the planetary model of the atom was replaced by another change of paradigm. That was the modern quantum mechanical treatment of the atom. It was first postulated by Wolfgang Pauli in 1925, using Heisenberg’s matrix mechanics.

- Many other scientists including Einstein, Max Planck, Niels Bohr, and Erwin Schrödinger contributed to the development and refinement of the new quantum theory. They postulated the occurrence of energy in **discrete quantities (quanta)** in order to explain phenomena such as the spectrum of black-body radiation, the photoelectric effect, and the stability and spectra of atoms. **Thus the name “quantum mechanics.”**
- In quantum theory, the position of an electron in an orbital cannot be specified. One could only calculate the likelihood of an electron being at a given location. It is known as the Copenhagen interpretation of quantum mechanics. See, “[WebLink: wikipedia.org: Copenhagen interpretation](http://www.wikipedia.org: Copenhagen interpretation).”
- That is the accepted theory at present. However, there are still many unresolved issues in quantum mechanics. Even though it is able to calculate the results of ANY experiment, it is “too abstract” for many, including Einstein. The current position is summarized by the sentence “Shut up and calculate!” as discussed in “[WebLink: wikipedia.org: Copenhagen interpretation](http://www.wikipedia.org: Copenhagen interpretation).” I have discussed a new interpretation of quantum mechanics, “[Quantum Mechanics and Dhamma – Introduction](#).”

Ability to Explain Observations – Primary Requirement of a Scientific Theory

9. **The determining factors of a scientific theory are the ability to explain observations and self-consistency.** It does not matter how crazy the new theory appears to be, as long as it meets those two criteria. As we saw above, quantum theory is accepted today despite not being an “understandable” theory.

- In fact, as long as a theory fulfills those criteria, objections by even the most prominent scientists cannot prevent a good theory from taking hold.
- For example, Einstein opposed quantum theory. He tried to come up with a “better explanation” until he died. Despite his objections, quantum theory became firmly established.
- Quantum theory, in its current form, is incomprehensible to even many scientists. The problem is that it is just a mathematical tool to make calculations. Even physicists do not have an “intuitive grasp” of the underlying aspects of quantum mechanics.

Scientific Approach to Buddha Dhamma

10. In this section, we will use the above discussed “scientific approach.” We will start with the “new theory about the world” put forth by the Buddha. It was a revolutionary theory 2600 years ago and still remains a revolutionary theory today.

- Just like even Einstein was unable to come to terms with the quantum theory, many people today find it difficult to comprehend Buddha Dhamma.
- However, much of the current confusion lies in the fact that many people are not aware of the “full and complete theory” of Buddha Dhamma. They have seen only parts of Buddha’s theory and conclude that those ideas are too “esoteric” or “mystical.”
- **Yet, unlike quantum mechanics, anyone can understand Buddha Dhamma, if the basic principles are understood.**
- I hope that by presenting a “complete theory” using a “bottom-up approach” we can take a fresh perspective of some concepts like *kamma*, rebirth, and *Nibbāna*.

The Necessary Components of Buddha Dhamma

11. We need to convince ourselves of the validity of the basic concepts in Buddha Dhamma before being able to comprehend the deeper teachings like *Paṭicca Samuppāda*, *Tilakkhaṇa* (*anicca, dukkha, anatta*), and the Four Noble Truths.

- Those basic concepts (equivalent to “assumptions” or “axioms” in scientific theories) are the laws of *kamma*, the existence of 31 realms, and the rebirth process within those realms.
- **However, those concepts are not assumptions. They are laws of Nature, discovered by a Buddha.** When one starts understanding (and practicing) Buddha Dhamma, one will see the truth of that statement.

2.2.2 Theories of Our World – Scientific Overview

August 9, 2020

We will first briefly discuss three main theories of our world. Then we will start a broader discussion of Buddha’s description of this world.

Theories of Our World – According to Modern Science

1. Western science has been studying our world since the time of the ancient Greeks. But its focus has been on the material world. There have been investigations on TWO fronts. **The structure of matter and the origin of life.**

- Investigations on the structure of matter started with Socrates and Aristotle. As discussed in the previous post, Democritus proposed the first atomic theory, and it has evolved into current studies on quantum physics. See, “Introduction – A Scientific Approach to Buddha Dhamma” and Ref. 1 below.
- The second front is on the origin of life or the study of the living world. That includes plants and conscious life. See, “[WebLink: wikipedia.org: History of biology](http://wikipedia.org: History of biology).” Modern science believes that living cells evolved FROM inert matter (“abiogenesis.”) See Ref. 2 for more details.

- Both conscious and non-conscious (plant) life have **living cells as the basis**. See, “[Origin of Life – There is No Traceable Origin.](#)”
- There is a separate area of research looking into the question of how consciousness (or mental phenomena) can arise from inert matter. See “[WebLink: wikipedia.org: Consciousness.](#)” As discussed there, modern science CANNOT explain the origin of **conscious life**.

Theories of Our World – Religious Explanation

2. Of course, the other prevailing explanation of the origin of life is that a Creator created the whole world, including all the stars, planets, our Earth, and the first forms of life on Earth.

- Even though easiest to state, this explanation has no factual basis. One HAS TO accept it based purely on the faith of a Creator.
- See, for example, “[WebLink: answersingenesis.org: Evidence for Creation.](#)”

Theories of Our World – Buddhist Explanation

3. Even though Buddha Dhamma (commonly known as Buddhism) is normally considered a religion, it is NOT a religion in the sense described in #2. It can be treated as a scientific theory, as we will do in this series of posts.

- Buddha Dhamma provides a complete description of our world.
- However, the Buddha did not try to provide detailed descriptions of material phenomena. He taught that finding out such details will only take precious time away from the urgent need to find the truth about the unimaginable suffering associated with the rebirth process.
- Therefore, much of the *Sutta Piṭaka* and the *Vinaya Piṭaka* focus on the “problem of suffering” and how to stop future suffering in the rebirth process.
- As we know, Buddha’s teachings are contained in three *Piṭaka* or *Tipiṭaka*. The third one, *Abhidhamma Piṭaka*, describes in great detail the building blocks of our world. **That includes both material (*rūpa*) and mental (*citta* and *cetasika*) aspects**. If one is interested in figuring out those details, not in the other two *Piṭaka*, one needs to understand the *Abhidhamma* material.
- However, it is not necessary to go to great depths of *Abhidhamma* to get an idea about the underlying principles. In the upcoming posts, we will do such a simplified analysis. That discussion will augment the series of posts on “[Origin of Life.](#)”

Overview of Modern Science

4. **The focus of modern science is on figuring out the origin and the behavior of matter. Scientists consider mental phenomena to be secondary and to arise from inert matter!** Most scientists believe that mental phenomena arise in the brain.

- There are several proposals on how the mind (or thoughts) can arise from matter. But there is no credible theory that comes even close to begin to explain it. See “[WebLink: wikipedia.org: Consciousness.](#)”
- A critical outcome of this approach is that modern science falls under the “annihilation view” (*uccheda ditṭhi*.) **That wrong view says that life ENDS at the death of the physical body.**

Evidence Against Proposed Scientific Theories of the Mind

5. Since mental phenomena are supposed to arise in the brain, that conclusion (in red in #4) leads to two critical implications.

- The death of the brain — thus the death of a human — is the ABSOLUTE end of that life. There no way to “transfer” the memories of one life to another. **Thus, the rebirth process is COMPLETELY ruled out in modern science.**
- Furthermore, it also **RULES OUT the possibility of Out-of-Body Experiences (OBE) including Near-Death Experiences (NDE.)**
- Let us briefly discuss evidence regarding those three areas.

Evidence from Rebirth Accounts

6. I will just provide one account here. In their book, “Soul Survivor: The Reincarnation of a World War II Fighter Pilot”, by Bruce and Andrea Leininger detail the amazing story of their son’s recount of a past life.

Here is a recent youtube video on it:

[WebLink: youtube: Boy Remembers His Past Life As a World War II Pilot!!](#)

- More rebirth accounts discussed in, “[Evidence for Rebirth.](#)”

Evidence from Out-of-Body Experiences (OBE)

7. In his book, “Travels,” the famous author of the Jurassic Park, Michael Crichton (1988, p. 307) mentions his ability to “shift my awareness out of my body and move it around the bedroom,” and he says, “..I didn’t think anything about it... I assumed that anybody could do it..”.

- A similar account has been given by a woman recently who also thought that “everybody could do it”: <https://abcnews.go.com/Health/woman-body-experiences/story?id=22825927>
- The book “Consciousness Beyond Life”, by Pim van Lommel (2010) gives detailed accounts of case studies by a renowned cardiologist.
- A series of books, including “Journeys of the Body,” has been written by Robert A. Monroe based on his experiences.

Evidence from Near-Death Experiences (NDE)

8. Only a few people have the ability to experience OBE at will. Typically, OBE happens under stressful conditions, most commonly during heart operations. These have a special name of near-death experiences (NDE.) The following video provides a good summary of NDE accounts.

[WebLink: youtube: Near Death Experiences & Evidence of the Afterlife](#)

- There are many books on NDE. “Consciousness Beyond Life” by Pim van Lommel (2010) gives detailed accounts of case studies of NDE experienced by people undergoing heart operations.
- A recent book, “Dying to be me: My Journey from Cancer, to Near Death, to True Healing,” by Anita Moorjani (2012), describes the NDE experience of her in detail.

Current Philosophical Ideas on Consciousness

9. When science is unable to make much progress, philosophers put forth their ideas. In fact, physics evolved from philosophy.

- There are many ideas in philosophy about consciousness, including one (for example, by Daniel Dennett) that says consciousness is not real!
- The following video is a presentation by David Chalmers, a leading philosopher on consciousness. He makes much more sense and gets to the heart of the issue.

[WebLink: youtube: Hard Problem of Consciousness — David Chalmers](#)

Consciousness Is a Fundamental Aspect of Nature

10. In the following video presentation, David Chalmers makes some points that are important.
- Around 8 minutes, he explains that current theories of our world cannot accommodate consciousness.
 - Then he proposes to investigate the possibility that consciousness is a fundamental aspect of nature that CANNOT be derived from other entities (such as matter.)
 - Another philosopher who also believes that consciousness cannot be derived is Thomas Nagel. He discusses that in his book in Ref. 3. **That is indeed what the Buddha explained, as we will discuss in the next post.**

[WebLink: youtube: How do you explain consciousness? | David Chalmers](#)

Further Information

1. The scientific effort on a single theory to explain material phenomena, “[Grand Unified Theory.](#)”
2. Scientific studies on the emergence of life from inert matter, “[Abiogenesis.](#)”
3. Thomas Nagel, “Mind & Cosmos: Why the Materialist Neo-Darwinian Conception of Nature Is Almost Certainly False” (2012).
4. There is evidence emerging from several investigations that a brain is not necessary to have conscious experiences. **I encourage watching the following video.**

2.2.3 Mind and Matter – Buddhist Analysis

August 15, 2020; revised August 16, 2020

Mind and matter go together in Buddha Dhamma. It is one meaning of “*nāmarūpa*.” It starts at a level much finer than the atomic level in modern science. It is even below the elementary particle level.

The Three Basic Building Blocks of Buddha Dhamma

1. **Everything in this world arises out of three building blocks: *citta*, *cetasika*, and *rūpa*.**
 - An analogy in modern science is to start with electrons, protons, and neutrons (elementary particles would be even more fundamental). A tasty cake, an oak tree, or a nuclear bomb all have origins in those fundamental particles.
 - In the same way, Buddha Dhamma (the theory) can start with those three fundamental entities. **They can describe all mental phenomena as well as material phenomena.**
 - On the other hand, modern science can describe ONLY material phenomena. It just ASSUMES that mental phenomena come out of material phenomena. But that assumption has NOT been validated. See the previous post, “[Theories of Our World – Scientific Overview.](#)”
 - Modern science cannot explain how a living-being is born. It seems to say that “it just happens.” We will discuss that below.

Connection Between Mind and Matter

2. **In Buddha Dhamma, analysis of *rūpa* directly provides the connection between mind and matter.**
 - In *Abhidhamma*, there are 28 types of *rūpa*. However, there are only a few types of *rūpa* that are sufficient to start our discussion here.

- We will start with six types of *rūpa* directly related to the mind and are essential in sensing the external world. **First, there is *hadaya vatthu*, the “seat of the mind,”** where thoughts (*citta*) arise. **Seeing, hearing, smelling, tasting, and body touching sensations are sensed at five *pasāda rūpa*: *cakkhu*, *sota*, *ghāna*, *jivhā*, and *kāya*.**
- We are accustomed to the idea that we see things with our eyes, hear with our ears, etc. But all those five physical sense faculties just have inert matter. Inert matter cannot “sense” or “feel” anything.
- Scientists go one step further and say that eyes, ears, etc. only capture the corresponding visual, auditory,..signals. They say that it is in the brain that those sensations are processed and “detected.” But they have no idea how such a “feeling” or “sensation” can arise in a brain. After all, the brain itself is made of inert atoms and molecules!

Brain Sends Those Signals to the “Actual Sensing Units”

3. It is correct that the brain processes those sensory signals captured by eyes, ears, etc. However, there is nothing in the brain that actually “detect” or “experience” those signals.

- **As mentioned above, those actual sensing units are the *hadaya vatthu* and the five *pasāda rūpa*.** I will stick to these Pāli terms, and you will see that it is necessary to do so. The English vocabulary does not have corresponding words.
- Now, we need to discuss two issues. **Where are those six “sensing units” located? Also, how can they “feel” or “sense” those signals?** Let us consider the latter question first.
- It is *kammic* energy that creates those six elementary sensory units (*hadaya vatthu* and the five *pasāda rūpa* of *cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*) at the beginning of a new existence. **For simplicity, let us call those six entities “sensing units.”** In some existences, there are less than six. For example, a *rupāvacara Brahma* has only three, and an *arupāvacara Brahma* has only one (just *hadaya vatthu*.)
- **ONLY *kammic* energy can create those special types of *rūpa*. They have a trace of matter (*suddhāṭṭhaka*) AND also the ability to “feel” or “experience” the sensory inputs.** That is the FUNDAMENTAL connection between mind and matter.

Kammic Energy – Origin of Life

4. **It is the *kammic* energy created by a STRONG previous *kamma* that leads to a new existence as a result (*vipāka*) of that *kamma*.**

- For example, if person X kills another person, then that person X would have created a *kammic* seed (or a *kamma bija*) that can germinate and give rise to existence in hell. If the *kamma* were rape, that would create a *kammic* seed to be born an animal. **The *vipāka* (result) is according to the *kamma*.** That is described in detail in “[Paṭicca Samuppāda](#).”
- At the beginning of a new existence, *kammic* energy creates a set of “sensing units” appropriate for that existence. All living-beings in the *kāma loka* (six *Deva* realms, the human realm, and the four *apāyā*) have all six units listed in #3 above.

Examples of Various Existences

5. Without getting deeper into *Paṭicca Samuppāda*, let us try to get the basic idea of that process. It just says that an existence corresponds to the *kamma* that gave rise to that existence.

- Someone who cultivates one of the four highest *jhāna* (*arupāvacara jhāna*) will be born as an *arupāvacara Brahma*. Someone in such an *arupāvacara jhāna* does not experience any of five sensory inputs (seeing, hearing, smelling, tasting, and touching). As a result (*vipāka*) of cultivating such a *jhāna*, one would be born in the corresponding *arupāvacara* realm (there are four such realms.) An

arupāvacara Brahma cannot see, hear, smell, taste, or touch anything. **He has only a *hadaya vatthu*, and thus, can only think** (just like the experience in an *arupāvacara jhāna*.) A *hadaya vatthu* is the LEAST bit of matter that can sustain mind (mental activity.)

- Therefore, existence as an *arupāvacara Brahma* is the simplest. One is free of burdens of making a living to buy houses, cars, or even food. There is no need to eat. That “*Brahma* body” only has a *hadaya vatthu*, which is so small that a *Brahma* cannot be seen even with the finest microscope scientists have. **Kammic energy sustains that “body” with just an unimaginably small amount of “matter.”**
- At the next higher level of “complexity” are the 16 *rūpāvacara Brahma* realms. As you can guess now, birth in a *rūpāvacara Brahma* realm is a *vipāka* of cultivating *rūpāvacara jhāna*. A human can get into a *rūpāvacara jhāna* by suppressing or removing the cravings for close-contact sensory pleasures (eating, smelling, and touching.) **The bottom line is that a *rūpāvacara Brahma* can only see and hear in addition to being able to think.** Thus, a *rūpāvacara Brahma* would have only *cakkhu* and *sota pasāda rūpa* in addition to *hadaya vatthu*. Thus he would have only three “sensing units.”
- It is only in the *kāma loka* (six *Deva* realms, the human realm, and the four *apāyā*) **that living-beings have all six “sensing units”** listed in #3 above. Births in *kāma loka* are much more complex, and that is where one needs a better understanding of *Paṭicca Samuppāda* to describe various births such as animal and hell beings. **Of course, those births in the four *apāyā* are due to *akusala kamma*.**

A Human *Gandhabba* Is a Set of Six “Sensory Units”

6. At the beginning of human existence, *kammic* energy creates a human *gandhabba* (or a *manomaya kāya*) with a *hadaya vatthu* and five *pasāda rūpa*. That is the basic mind and matter overlap (*nāmarūpa*) in a human.

- Just like it is impossible to see a *Brahma*, it is not possible to see a *gandhabba*. A *gandhabba* is almost like a *Brahma*, but with a full set of *pasāda rūpa*.
- After created by *kammic* energy, a *gandhabba* stays with that “invisible body” may be for even many years. When a “matching womb” becomes available, it is pulled into that womb by *kammic* energy.
- Modern science can explain the growth of a baby, starting with an embryo in a womb. But it CANNOT explain how that baby became CONSCIOUS.
- The conception of a human baby (i.e., creating an embryo from an inert zygote) happens when a *gandhabba* comes into the womb and merges with the zygote. For details, see “[Buddhist Explanations of Conception, Abortion, and Contraception.](#)”

Many Physical Bodies For a Single Mental Body (*Gandhabba*)

7. Therefore, a human being does not start with a physical body, i.e., with physical eyes, ears, etc. or the brain. As the Buddha explained, a physical body is a temporary residence for a human *gandhabba*. Within a human existence (that may last thousands of years), a *gandhabba* may acquire MANY different physical bodies. See, “[Bhava and Jāti – States of Existence and Births Therein.](#)”

- When the *gandhabba* is trapped inside a physical body, it has to get external sensory signals indirectly. The eyes, ears, etc. capture those sensory signals, which are then processed by the brain. We will discuss how the brain transfers that information to the *gandhabba* in a future post.
- It is a human existence (*bhava*) that is hard to get. But within a human *bhava*, one may be born many times with different human bodies. That is why we have so many rebirth stories where one is reborn within several years.
- For the duration of a human *bhava*, one will have ONLY ONE mental body (*manomaya kāya*), also known as *gandhabba*. Of course, that *gandhabba* may undergo some changes. But it will last the whole duration of that human *bhava*.

Pāli Word for Eye Is Not *Cakkhu* – It Is *Nayana* or *Akkhi*

8. Most people do not realize the following critical fact. Pāli words for eyes, ears, nose, tongue, and the body, are *nayana* (or *akkhi*), *kaṇṇa*, *nāsā* (or *nāsikā*), *jivhā*, and *sarīra* or *deha* or *kāya*.

- The Pāli words *cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya* refer to the five *pasāda rūpa* associated with the *manomaya kāya* (*gandhabba*).
- Thus, two words could be used in both ways either to refer to a physical sense faculty or a *pasāda rūpa* (*jivhā* and *kāya*).
- While inside a physical body, a *gandhabba* is shielded from the external world. We will discuss how *pasāda rūpa* receive signals from the physical sensory faculties in the next post.
- In the *Abhidhamma* analysis of *rūpa*, the five *pasāda rūpa* are listed as **five fundamental types of *rūpa***. Thus, it is clear that *cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya* DO NOT refer to eyes, ears, nose, tongue, and the physical body!
- On p. 236 of Ref. 1, they are listed as “sensitive phenomena”. If you look at p. 237, the Pāli term is “*pasāda rūpa*“. The five types of *pasāda rūpa* are #5 through #9 in Table 6.1 on p. 237. I tried to make that clear in the post, “[Rūpa \(Material Form\) – Table.](#)”
- In Ref. 1, the description of *rūpa* is in Chapter VI (pp. 234-263.)
- By the way, I will use Ref. 1 as the standard text on *Abhidhamma* for this series of posts. I have provided a link to the free pdf version. Ref. 2 is good as well.

Summary – Special Types of *Rūpa* With Ability to “Sense”

9. There are six “sensing units” (created by *kammic* energy) that have the ability to “sense” or “experience.” **That *kammic* energy is created with *citta* and *cetasika*.** Therefore, it is a cyclic process (and why the rebirth process has no beginning!). We will discuss that intricate mind and matter connection in upcoming posts.

- We started the post by pointing out that *citta*, *cetasika*, and *rūpa* can describe EVERYTHING in this world.
- In the above, we went through a simple description of the arising of a living-being with a set of “sensing units.” That particular living-being will then do more *kamma* and create the seeds for more future births.
- That is how the rebirth process continues.
- However, by understanding this relationship between mind and matter, we have the ability to avoid “bad births” and also to attain *Nibbāna*. We will get into details in future posts.

2.2.4 Sensual Pleasures – The Hidden Suffering

August 22, 2020

Sensual Pleasures (*Kāma Assāda*)

1. The word *sensual* means gratification of physical senses. It may have a sexual connotation, but not necessarily. We will use that word in that sense to represent the meaning of the Pāli word “*kāma*.”

- Such sensory contacts occur in close proximity. The three main “close sensory contacts” involve eating, smelling, and body touches (including sex.) However, visuals and sounds also are used to enhance these three sensory experiences.
- Therefore, “*kāma rāga*” means craving for sensual pleasures (tasty foods, nice fragrances, bodily comforts, etc.) not just for sex. See, “[What is “Kāma”? It is not Just Sex.](#)”
- All five sensory contacts are available in most of the lowest 11 realms (four *apāyā*, human realm, and six *Deva* realms.) Thus, *kāma loka* includes those 11 realms.
- However, those sensual pleasures (*kāma assāda*) come at a price. There is much suffering in *kāma loka*, as we will see below.

What Is a Body (*Kāya*)?

2. In the previous post, we saw that out of 31 realms in this world, living-beings in 20 realms **do not have physical bodies like ours**. *Brahmā* in those 20 realms have only a trace of matter. They cannot be seen even with the best scientific instruments available today. See “[Mind and Matter – Buddhist Analysis.](#)” **Therefore, we need to abandon our perception of “solid, dense” bodies like ours to be universal.**

- There is also the following related issue. We conventionally translate the Pāli word “*kāya*” as “body.” Now, we are only used to “physical, dense bodies” like ours or animals. The idea of a living being with very little matter (and thus invisible to us) is strange to most of us.
- However, the Pāli word “*kāya*” means a “collection.” As we know, a living being is a collection of five aggregates (*pañcakkhandha*) in Buddha Dhamma. An entity that can support those five aggregates has a “*kāya*.”
- In English, also we sometimes use “body” as a collection or aggregate. Some examples are “body of water” and “body of evidence.”
- *Brahma* has a set of “bare minimum” (a trace of) *rupa* that can support the five aggregates, as discussed below. **A “*kāya*” of a living being is a collection of aggregates of mind and matter.**
- The Pāli word for a physical body is “*sarīra*” even though the word “*kāya*” is sometimes used.

Why Do Humans Need Dense Physical Bodies?

3. Then, a question comes up. Why do humans need physical bodies? We discussed that human life also starts with an “invisible body” (*gandhabba*), just like for a *Brahma*. A dense physical body arises later on. After that, *gandhabba* gets into a womb. See the previous post, “[Mind and Matter – Buddhist Analysis.](#)” Why doesn’t the *gandhabba* stay with that invisible body?

- We need physical bodies to taste the food, smell nice odors, have sex, etc. Those sensory experiences REQUIRE dense bodies. We highly value those “bodily-contacts” and constantly think, speak, and work to get more.
- But there is a “hidden price to pay” for close-contact sensory pleasures. Such dense bodies **are prone to diseases, injuries, and body pains**. Unfortunately, such problems are not very evident at a young age, and for most people, by the time they realize these problems, it is too late. Their brains are getting weak too, and they may not be able to learn the deeper teachings of the Buddha.
- Most living-beings in the 11 realms of *kāma loka* have dense bodies. The bodies of *Devas* are a bit less dense but dense enough to experience those three sensory inputs. The word “*kāma*” implies such close contacts.

- **Let us consider a different approach to see the “drawbacks” and “dangers” in sensual pleasures.** Let us look into how *Brahmā* in 20 realms (out of 31 realms in the world) overcome the desire for sensual pleasures and live for billions of years in “*jhānic* bliss” in those realms.

Sufferings Due to “Dense Bodies” Is Absent in *Brahma* Realms

4. Out of the 31 realms of our world, the higher-lying 20 realms of *Brahmā* are absent from any suffering (diseases like cancer, injuries, brain defects, or even body aches). As we discussed in #2, those *Brahmā* do not have dense bodies like ours.

- Their “physical bodies” have just an unimaginably small amount of “matter” that is a billion times smaller than an atom in modern science. It is better to call it an invisible “magnetic body” or an “energy field.” Some people think these *Brahmā* have ONLY the mind, but that is not correct. The Buddha stated that the mind could not exist without a material base. These *Brahmā* have “bodies” with the least amount of matter in Buddha Dhamma, a *suddhātṭhaka*.
- Furthermore, there is no need to eat since there is no dense physical body to maintain. The subtle “body” of a *Brahma* is sustained by *kammic* energy.
- Of course, “bodies” that are invisible is a strange notion to many people. That is why the Buddha said his Dhamma has never been known to the world.
- How do those *Brahmā* get such “invisible bodies” that are not subject to any suffering (illnesses, injuries, hunger, etc.)?

Births in *Arūpāvacara Brahma* Realms

5. As briefly mentioned in the previous post, one can be born in those four realms by cultivating the four highest *jhāna*. **In fact, those who cultivate such *jhāna* enjoy the same life experiences of *arūpāvacara Brahmā* (with just the ability to think.)**

- *Anāriya yogis* get to such *jhāna* using various techniques, but **abstaining from sensual pleasures is a requirement.** Such *anāriya yogis* normally stay away from sensual attractions by living in forests, especially away from women. But Noble Persons (*Ariyas*) get to such *jhāna* by cultivating wisdom and comprehending the dangers of sensual pleasures. Once getting to *Ariya jhāna*, one could associate with even the most beautiful women without being tempted. For example, an *Anāgāmi* has no *kāma rāga*.
- The four *arūpāvacara Brahma* realms correspond to optimum levels of *mettā*, *karuṇā*, *muditā*, *upekkhā*.
- For details, see “[WebLink: accesstoinsight.org: The Four Sublime States](http://www.accesstoinsight.org)” by Nyanaponika Thera. To quote from that article, “*Brahma* is free from hate; and one who assiduously develops these four sublime states, by conduct and meditation, is said to become an equal of *Brahma* (*Brahma-samo*). If they become the dominant influence in his mind, he will be reborn in congenial worlds, the realms of *Brahma*. Therefore, these states of mind are called *God-like*, *Brahma-like*.”
- These *arūpāvacara Brahmā* (in the four highest realms) have the “smallest bodies” of all living beings. In the *Abhidhamma* language, they only have the “seat of the mind” (*hadaya vatthu*) for thinking. They do not have any of the five “physical senses” of seeing, hearing, smelling, tasting, or body touches.

Births in *Rūpāvacara Brahma* Realms

6. *Rūpāvacara Brahmā* have only a “bit more complex bodies” with the addition of two *pasāda rupa* of *cakkhu* and *sota*. They can see and hear, in addition to being able to think. As we know, the 16 *rūpāvacara Brahma* realms lie below the 4 *arupāvacara Brahma* realms. See, “[31 Realms of Existence](#).”

- Note that *rūpāvacara Brahmā* can “see” and “hear” without having physical eyes and ears like humans. I explained in the previous post (“[Mind and Matter – Buddhist Analysis](#).”) that we do not see or

hear with our physical eyes and ears. Our physical eyes are like cameras that only “take pictures” of the external world for the *gandhabba* trapped inside the dense physical body. Also see, “[Vision Is a Series of “Snapshots” – Movie Analogy.](#)”

- A human can be assured of birth in a *rūpāvacara Brahma* realm by cultivating *rūpāvacara jhāna*. The 16 realms in *rūpāvacara Brahma loka* correspond to the four lower *jhānā* at various “strengths.”
- Even to get to the four lower *jhāna* corresponding to the 16 realms in *rūpāvacara Brahma loka*, **one needs to suppress at least the desire for sensual pleasures (or “*kāma rāga*”) in addition to abstaining from immoral deeds (*dasa akusala*.)** That is why all *suttā* on *jhāna* have a verse with, “*viviceva kāmehi, vivicca akusalehi dhammehi.*” or “withdrawn from sensuality, withdrawn from *akusala* thoughts.” See, “[Jhānic Experience in Detail – Sāmaññaphala Sutta \(DN 2\).](#)”

Why Do People Cultivate *Jhāna*?

7. Sensory pleasures due to “close contacts” (eating, smelling, sex, and other “bodily-comforts”) come at a price, as we discussed in #3. Such “close-contacts” are possible ONLY with a complex, dense body. However, such a dense body is subjected to various types of ailments.

- **In addition**, the ability of the physical body to provide such sensory experiences GO DOWN with age. At old age, the taste buds don’t work well. One may not be able to smell the roses as one used to. And, one’s sexual capabilities go down as well. One can clearly see such drawbacks.
- **Furthermore, there is also a hidden danger in such cravings for sense pleasures.** The pursuit of sense pleasures INEVITABLY lead to immoral deeds sooner or later. People kill, rape, steal, and lie to get possession of “material things” that provide those sensory contacts. Such actions are *papa kamma* (or strong immoral deeds) that can lead to bad results (*vipāka*). In particular, they can lead to rebirth in the “bad realms” or *apāyā*.
- **Ancient yogis (even before the Buddha,) realized that sense pleasures (*kāma assāda*) have such bad consequences.** They saw that by staying away from such sense pleasures, one could GET INTO *jhānic* states. So, they went deep into forests, stayed away from society in general, and from women in particular. They focused their minds on “neutral objects” such as one’s breath or a *kasina* object. With such techniques, they were able to get to both *rūpāvacara* and *arupāvacara jhānic* states.

Why Are Such “Non-Buddhist” *Jhāna* Techniques Are Useless in the Long Run?

8. We remember that ascetic Siddhattha (before attaining the *Buddhahood*) learned such mundane *jhāna* techniques from two *yogis*, Āḷāra Kālāma and Uddaka Rāmaputta. The *Bodhisatta* realized that such techniques do not remove *kāma rāga* from one’s mind, but can only SUPPRESS them.

- While cultivation of such a *jhāna* will lead to rebirths in a *Brahma* realm, the existence in that realm WILL END once that *kammic* energy runs out. Then one can be reborn in an *apāya* in the future. **The only PERMANENT solution is to end the rebirth process.** That DOES NOT mean extinction, because there is no “soul-type entity” going through the rebirth process. See, “[What Reincarnates? – Concept of a Life-stream.](#)” For a deeper analysis, “[Yamaka Sutta \(SN 22.85\) – Arahantness Is Not Annihilation but End of Suffering.](#)”
- The *Bodhisatta* spent six more years pursuing the way to permanently REMOVE *kāma rāga* (and other defilements) from the mind.

The Permanent Solution Is *Nibbāna*

9. Upon attaining the *Buddhahood*, the Buddha realized that one must **first understand the unfruitfulness and dangers** in pursuing such sensory pleasures. That is the ONLY way to PERMANENTLY remove

cravings for sensual pleasures and to avoid rebirths in the *apāyā* due to INEVITABLE temptations in *kāma loka*.

- Just with that **understanding of the *anicca* nature, one becomes a *Sotāpanna*** and be free of rebirths in the *apāyā*. That is when one ENTERS the Noble Path.
- Then, by following that Noble Path, one can become free of *kāma rāga* first, and stop rebirths anywhere in *kāma loka* at the *Anāgāmi* stage.
- The main point is that birth in ANY of the 31 realms of this world WILL end up in death. Even the “relatively peaceful” life in a *Brahma* realm will end in death. There is no refuge anywhere in the 31 realms. Therefore, the ONLY permanent solution is to stop any and all rebirths. Of course, that process starts with understanding the overall rebirth process among the 31 realms. That understanding is embedded in the Four Noble Truths (and *Tilakkhaṇa*.)
- We are going through this process to get a better understanding of that grand scheme of things.

2.2.5 Kammic Energy Leads to Consciousness

August 29, 2020

Kammic energy leads to consciousness in all living beings. In this post, I am going not going to refer to a specific type of consciousness (like *cakkhu viññāṇa* or *mano viññāṇa*) but **just the ability to generate any types of *viññāṇa* in any of the 31 realms**. Let us first recap our discussion so far in the new section, “[Buddha Dhamma – A Scientific Approach](#),”

Kammic Energy Leads to Consciousness

1. In this new section, we discuss Buddha Dhamma using a novel approach. One critical point is that the essence of ANY living being is a set of “sensing faculties” created by *kammic* energy.

- As we remember from the previous few posts, the main difficulty with the scientific community’s current efforts is identifying how feelings (consciousness) can arise in the brain made of inert matter. As some philosophers have pointed out, consciousness is NOT derived from matter. See, “[Theories of Our World – Scientific Overview](#).”
- In simple terms, the Buddha said that there is **a set of elementary units of matter** with the ability to facilitate CONSCIOUSNESS. See “[Mind and Matter – Buddhist Analysis](#).”
- **Those are the *hadaya vatthu* (seat of mind) and a set of five *pasāda rūpa* (*cakkhu, sota, ghāna, jivhā, kāya*).** These are UNIQUE bits of matter with the ABILITY to EXPERIENCE things in the world. **I cannot emphasize enough the importance of comprehending the uniqueness of these six entities.**
- *Kammic* energy leads to consciousness because *kammic* energy alone can create those six entities.

Why Life Cannot Be Created in a Laboratory

2. **Those six “sensing faculties” (unimaginably small) can ONLY be created by *kammic* energy.** That *kammic* energy is produced in THOUGHTS (specifically *javana citta*.) We will discuss this in detail in the future.

- That is why it will NEVER be possible to CREATE life (a conscious living being) in a laboratory. Consciousness does not arise in a chemical process or by increasing the processing power of computer chips.
- *Kammic* energy leads to consciousness, and our minds create *kammic* energy. **Thus, we create our own future lives!**

Seeds (*Kamma Bīja*) for New Existences

3. It is *kammic* energy that produces seeds (*kamma bīja*) that give rise to a new set of “sensing units” for future existences.

- “Good seeds” generated by good *kamma* (*puñña abhisāṅkhāra*) can give rise to good rebirths (in human and higher realms.) Births in the highest four *Brahma* realms are due to *āneñja abhisāṅkhāra*, a special kind of “good *abhisāṅkhāra*.”
- Bad rebirths (in the four lowest realms or *apāyā*) arise due to “bad seeds” generated by immoral *kamma* (*apuñña abhisāṅkhāra*)
- However, a seed cannot germinate and give rise to life if one has lost the craving for doing the corresponding *kamma*. Thus, one attains Nibbāna by cultivating *paññā* (wisdom) and getting rid of cravings (*taṇhā*.) We will discuss that later, but it has been discussed in other sections.
- First, let us discuss different types of *kamma bīja* with some examples.

Good Seeds and Bad Seeds

4. Person X likes to enjoy sensory pleasures to the extent that he/she is willing to do any immoral deed to enjoy them. If X kills a human, that mindset is very powerful and creates a *kamma bīja* that can lead to rebirth in hell. If X kills an animal that generates a “smaller *kamma bīja*,” but if X keeps killing animals regularly, that *kamma bīja* will get stronger and, at some point, will be strong enough to lead to rebirth in hell.

- There is a person Y who engages in good deeds. That person enjoys feeding those in need (*bhikkhus*, poor people, animals, etc.) He/she would instinctively help those who fall into hard times and is able to forgive actions by others. Such a person builds up strong good *kamma bīja* to give rise to rebirths in human and higher realms.
- Then there is person Z who has understood the drawbacks of sensory pleasures. He/she has a natural tendency to cultivate *jhāna* by minimizing engaging in sensory pleasures and *dasa akusala* in general. The first four *jhāna* fall under *puñña abhisāṅkhāra* and can lead to rebirths in the 16 *rūpāvacara Brahma* realms. The higher *jhāna* fall under *āneñja abhisāṅkhāra* and can lead to births in the 4 *arupāvacara Brahma* realms.
- Those are a few examples of the types of *abhisāṅkhāra* (or *kamma*) that keep us bound to the rebirth process. They ALL fall under “*avijjā paccayā saṅkhāra*” in the *akusala-mūla Paṭicca Samuppāda* process. In the detailed explanation of that step, those *saṅkhāra* are described as “*apuñña abhisāṅkhāra*, *puñña abhisāṅkhāra*, and *āneñja abhisāṅkhāra*.” See, #11 through #13 in “[Kamma, Saṅkhāra, and Abhisāṅkhāra – What Is “Intention”?](#)”
- Our own *kammic* energy leads to consciousness (in future lives.) That consciousness may arise in any of the 31 realms.

The essence of a Living Being – The “Primary Sensory Units”

5. “Awareness” happens at *hadaya vatthu*, the seat of the mind. “Seeing” happens at the *hadaya vatthu* with the help of *cakkhu pasāda rūpa*. Similarly, “hearing” happens at the *hadaya vatthu* with the help of *sota pasāda rūpa*. The other three physical senses work the same way with *ghāna*, *jivhā*, and *kāya pasāda rūpa*.

- In addition, *hadaya vatthu* can recall past memories.
- Based on those six types of external signals, thoughts arise in the *hadaya vatthu*.
- That happens in EVERY living-being. Every living being has a maximum of six of those “sensory units.”

Living Beings in Most Realms Have Only “Primary Sensory Units”

6. In the post, “[Mind and Matter – Buddhist Analysis](#),” we noted that living beings in 20 of the 31 realms in this world have only such sensory units and nothing else (no physical bodies.)

- The 16 *rūpāvacara Brahma* realms have *hadaya vatthu* and two *pasāda rūpa*.
- The 4 *arūpāvacara Brahma* realms have only the *hadaya vatthu*. They all have just a “mental body” and no “solid body” like ours. But our *gandhabba* is similar to them.

Dense Bodies In *Kāma Loka*

7. The situation in the 11 realms of *kāma loka* is more complex. That complexity is necessary to accommodate “close sensory contacts” of smell, taste, and body touch. Such contacts are not possible for the mental body (*gandhabba*); see, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#).”

- A *gandhabba* needs to get into a womb and make a physical body to experience “close sensory contacts” of taste, smell, and touch. That process is described in “[Buddhist Explanations of Conception, Abortion, and Contraception](#).”
- However, it is not the dense body that FEELS or EXPERIENCES those sensory contacts. Sensory experience happens ONLY at *hadaya vatthu* with the help of the corresponding *pasāda rūpa*.
- Depending on the type of the “physical body,” there are different mechanisms to transfer the information generated in the “physical body” to the corresponding *pasāda rūpa* and then to the *hadaya vatthu* (seat of the mind.)
- However, if the “mental body” (*gandhabba*) comes out of a human’s physical body, it can see and hear without having eyes and ears. There are many verified accounts of such Out-of-Body Experiences. See, “[Mental Body \(Gandhabba\) – Personal Accounts](#)” and “[Out-of-Body Experience \(OBE\) and Manōmaya Kāya](#).”
- Also, see the Wikipedia articles, “[WebLink: en.wikipedia.org: Out-of-body experience](http://en.wikipedia.org: Out-of-body experience)” and “[WebLink: en.wikipedia.org: Near-death experience](http://en.wikipedia.org: Near-death experience).”

Our Dense Physical Bodies are Just “Shells”

8. Our dense physical bodies weighing tens of kg (or hundreds of pounds) DO NOT sense ANYTHING.

- The crucial mental body (*gandhabba*) with the six “sensing units” is “trapped” inside the physical body. That allows it to experience the three additional senses of smell, taste, and touch. However, it also forces the *gandhabba* to experience “seeing” and “hearing” with physical eyes and ears.
- **Therefore, a *gandhabba* trapped inside a physical body cannot sense ANYTHING without the aid of the five physical senses AND the brain.**
- The (physical) sensory faculties (eyes, ears, nose, tongue, body) can be considered mechanical instruments to capture external signals. For example, eyes are like two cameras taking pictures.
- It is the brain that analyzes the sensory signals captured by those five “sensing equipment.” But the brain does not EXPERIENCE anything either. It breaks down those signals to a level that can be received by the five *pasāda rūpa*. Then each *pasāda rūpa* transfers that information to the *hadaya vatthu*. That is when we EXPERIENCE such a signal.
- Therefore, the brain is just a very fancy computer. We will discuss the role of the brain in the “Buddhist model” in a future post.

Complexity In the *Kāma Loka*

9. The simplest in the *kāma loka* are the 6 *Deva* realms. *Devas* are born with “full physical bodies.” Such “bodies” are like ours but much more subtle. We can’t see *Devas* either.

- On the other hand, we know a lot about how our physical bodies and brains work, thanks to many scientists' efforts over the past hundred years or so. Animal bodies work pretty much the same way.
- However, scientists have the wrong idea that such experiences are FELT in the brain, and it is the brain that generates our thoughts. Some scientists and philosophers are beginning to realize that, as we discussed to some extent in "[Theories of Our World – Scientific Overview.](#)"

Summary

10. I am going through this slowly because it is critically important to understand the basic structure of "our world."

- "Our world" is much more complex than what we can directly experience. We can only "see" two realms: the human and animal realms.
- That "wider world view" can be seen ONLY by a Buddha with a highly-purified mind. It covers 31 realms in total.
- Kammic energy leads to consciousness (or life) in all those realms.
- It is necessary to understand how births occur in each realm. As we discussed above, the root causes are the types of *kamma* we commit based on how we think, speak, and take actions based mainly on *vacī* and *kāya saṅkhāra*. We do not have DIRECT control over *mano saṅkhāra*. They arise automatically due to our *gati* (character/habits.) But we CAN control *vacī* and *kāya saṅkhāra* and thereby control our *gati*. See, "[Gati \(Habits/Character\) Determine Births – Samsappaniya Sutta.](#)"
- We have discussed those aspects in other sections. But we will go through some of them as needed here. I will also refer to other sections since it is not possible to cover everything in one section.

2.2.6 Brain and the Gandhabba

[Mind Is Not in the Brain](#)

[Gandhabba in a Human Body – an Analogy](#)

[Persistent Vegetative State – Buddhist View](#)

[Patient H.M. – Different Roles of Brain in Memory](#)

[Memory Recall for Gandhabba in a Human Body](#)

2.2.6.1 Mind Is Not in the Brain

September 6, 2020

The mind is not in the brain, but the brain is essential for the mind to work as long as the *gandhabba* is inside the physical body.

Relevant Summary of Previous Posts

1. In the previous posts, we discussed that only in the *kāma loka* that some living beings have physical bodies with brains. *Brahmā* in 20 realms do not have physical bodies or brains. See "[Mind and Matter – Buddhist Analysis.](#)" "[Sensual Pleasures – The Hidden Suffering.](#)" and "[Kammic Energy Leads to Consciousness.](#)"

- Of course, modern science is not aware of realms other than the human and animal realms. That is one reason that most scientists believe that consciousness arises in the brain.
- Per Buddha Dhamma, humans and animals (and other beings in *kāma loka*) REQUIRE physical bodies to have access to close sensory contacts (taste, smell, and touch.) That, in turn, REQUIRES a brain to control the movement of heavy body parts. See, "[Our Mental Body – Gandhabba.](#)"

We will discuss that more in the next post.

- But let us first review the current status of scientific research on the efforts by scientists to explain consciousness to arise in the brain.
- We already discussed the following roadblock facing “materialistic science”: How can **feelings** arise in inter matter? That is the “hard problem of consciousness” that philosopher David Chalmers discussed in the video in #9 and #10 of “[Theories of Our World – Scientific Overview](#).”

Mind Is Not in the Brain

2. The following video summarizes the current status of scientists’ attempts to prove that consciousness arises in the brain. Many of them, who spent their whole lives looking into this issue, have concluded the following: **The brain does play a role in consciousness. But consciousness does not arise in the brain.**

[WebLink: youtube: Neuroscientific Evidence: Irreducible Mind \(Part 1\)](#)

- @ 3 minutes: Neuroscientist Wilder Penfield argued that “**the causal force is missing** within the brain that can account for the **actions and intentions**.” How can **intention** arise in inter matter?
- @ 4 minutes: There are correlations between the mind and the brain, but **correlation does not mean causation**. That is where science got stuck. However, it is fully explained in Buddha Dhamma. The brain is just a conduit facilitating body movements. A *gandhabba* does not have a brain. **The brain becomes necessary only where a solid physical body is required for close sensory contacts for sensory pleasures (*kāma assāda*).**

More Comments About the Above Video

3. Around 5 minutes, the author explains the “Visual Binding Problem,” which is a part of a broader “unified perception.” This is important.

- Let me give you another example. Suppose you are in a restaurant and see someone entering the restaurant. It is an old friend you have not seen any many years. But how long does it take you to recognize who it is, and even recall some “good old memories”?
- I discussed that in detail at #4 through #6 in “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”
- The mind is not in the brain and can work MUCH faster than the brain. In the above examples, recognition happens not in the brain, but in the mind. We will discuss details in future posts.

4. At 8 minutes: Instead of the brain giving rise to mind, the evidence is emerging that **the mind can affect the brain**. The brain has this property called “plasticity.” That means our thoughts can make some brain changes, especially “re-wiring of neural connections” and even repairing some minor damages to the brain.

- The video in the following section a presentation by neuroscientist Dr. Schwartz mentioned here. He has successfully treated some patients with Obsessive-Compulsive Disorder (OCD.)
- In fact, the correct mindful meditation (*Satipaṭṭhāna* or *Ānāpānasati*; not breath meditation) can vastly improve brain function in all of us to help grasp deeper aspects of nature. That is what entails following the Eightfold Noble Path. We will get to that in the future.
- At 13:45 minutes: A study found that it is possible to control one’s sexual urges by “applying the mind.” They were able to control brain activity with “mind control.”
- It is clear that the mind is not in the brain because it can affect brain activity.

You Are More than Your Brain

5. More and more scientists and philosophers realize that “you are more than your brain.” A human the freedom and capability to change his/her destiny.

- Dr. Jeffrey Schwartz is a neuroscientist who has developed a novel program to treat OCD successfully. He has written several books on the subject of the mind, including Ref. 1 below.
- Here is a recent presentation of Dr. Schwartz on the subject:
[WebLink: youtube: Jeffrey Schwartz: You Are More than Your Brain - Science Uprising Extra Content](#)
- Dr. Schwartz was one of the early scientists to become aware that we (our minds) are more than our brains. He did most of his studies in the 1980s and 1990s. Since then, there have been more studies conducted using new techniques for brain imaging.

More Evidence against Materialism

6. The current Western tradition of thinking is that the only things that really exist are the atoms and the void. Everything else, including the mind, is reducible to matter made of atoms. That world view is “materialism.”

The following presentation by Dr. Michael Ignor provides a summary of evidence against materialism from recent research by many neuroscientists.

[WebLink: youtube: Michael Egnor: The Evidence against Materialism](#)

- At 5 minutes: Cutting a brain in half does not lead to significant changes in a person. If the brain gave rise to consciousness, one would expect such a drastic change would lead to a huge change in personality (and perhaps to two personalities). But the changes were insignificant (except that it relieved the patients of susceptibility to seizures).
- At 7 minutes: Research of Dr. Wilder Penfield showed that probing various areas of the brain could not affect personal characteristics, such as intellect, political biases, habits, etc. There is a “core personality” that does not depend on the brain. But, of course, if the brain is dead, then such attributes cannot manifest.
- More evidence that the mind is not in the brain!

Those in Vegetative States May Be Fully Conscious

7. Another notable fact from the video by Dr. Ignor is that some of the “brain-dead” patients in “vegetative states” could be fully conscious.

- At 9:30 minutes: People who are “brain dead” and are in vegetative states may be “alive inside.” They are just not able to express their feelings because they cannot talk or move body parts. A discussion of Dr. Owen’s brain scan studies (mentioned by Dr. Ignor) is in Ref. 2. **There are aspects of the mind that cannot be destroyed even with severe brain damage.** I will discuss this more in the next post.
- At 15:30 minutes: Libet experiments on free will that seemed to suggest that humans do not have free will. Also, see, [“Neuroscience says there is no Free Will? – That is a Misinterpretation!”](#) More information providing evidence that humans do have free will in Ref. 3.
- At 19:30 minutes: The book by Bennett and Hacker referred to by Dr. Ignor is Ref. 4.
- At 22:20 minutes: Importance of intentionality that we touched on in #2 above. How can intentionality arise from the lifeless matter in a brain?

Teleology – Purpose of Things in the World

8. At 25 minutes, the discussion turns to teleology. Teleology is about “a reason or explanation for something to exist.” See Ref. 5. An acorn grows into an oak tree and not to an apple tree. The blueprint for bringing an oak tree into existence is in that tiny seed. Of course, the acorn needs to germinate and extract all necessary material from the earth to grow into that huge oak tree.

- So, even scientists like Dr. Ignor cannot explain the ROOT CAUSES for either an oak tree or a human being comes into existence. Therefore, they assign that to a Creator. In their view, it is the Creator that designs EVERYTHING in this world. That is the "[WebLink: wikipedia.org: Teleological argument](http://www.wikipedia.org: Teleological argument)" for the existence of a Creator. It sometimes goes as "[WebLink: wikipedia.org: Intelligent Design](http://www.wikipedia.org: Intelligent Design)."
- As Dr. Ignor asks around 26 minutes what the purpose of an eye is. He would say that it was created by the Creator for humans to see. He says that there is a "grand mind" (that of the Creator God) behind the universe. That is because Dr. Ignor is not aware of the "previously unknown theory of the Buddha."
- But the Buddha said that we create our own future eyes because we like to enjoy seeing things in this world! Again, this needs to be explained in a bigger picture.
- An acorn giving rise to an oak tree is very similar to a *gandhabba* giving rise to a human body. That *gandhabba* is unimaginably smaller than an acorn but has the blueprint for the human body. The *gandhabba* starts building the body while inside the mother's womb, by taking nutrition from the mother. Once born, the baby starts eating food, and that is how the body of a full-grown adult comes into being. See, "[Buddhist Explanations of Conception, Abortion, and Contraception](#)."

If Mind Is Separate From the Body, What Happens to It at the Death of the Body?

9. Therefore, there is strong evidence emerging to support the idea that the mind is not in the brain, even though the brain helps facilitate the mind's workings. That gives rise to the following critical question. **If the mind is something more than the brain (and the physical body), what happens to that mind when the body dies?**

- For those who have not been exposed to true Buddha Dhamma, there could be only one option. That is the ASSUMPTION that the mind (stated to be "soul") must be going to either heaven or hell forever.
- But as we have already discussed, the mind creates "seeds" for future lives. Many such "seeds" exist for many future lives (some with physical bodies and brains) for ANY living being. That is why we all have been in this rebirth process from a time that cannot be traced back. See, "[Origin of Life – There is No Traceable Origin](#)."
- The "previously unheard Dhamma" is that living beings themselves are responsible for creating SEEDS for their future lives. Furthermore, living beings are also responsible for creating their environment to live in! That includes living things without consciousness (like vegetation) and the whole environment for all of that to exist. This is a VERY DEEP subject. But we will first address the issue of living beings creating the seeds their future lives.
- Both aspects are explained with *Paṭicca samuppāda*. We will, of course, first focus on human beings and other living beings.

2.2.6.2 Gandhabba in a Human Body – an Analogy

September 11, 2020

***Gandhabba* in a Human Body Senses Differently Than When Outside**

1. The six critical entities in the *gandhabba* (*hadaya vatthu* and the five *pasāda rūpa* of *cakkhu*, *sota*, *ghāna*, *jivhā*, *kāya*) are responsible for the amazing feats of cognition. See, “[Mind and Matter – Buddhist Analysis](#),”

- As we have discussed, a *gandhabba* has only a trace of matter and is invisible. It is essentially an invisible “mental body.”
- **When outside the physical body, a *gandhabba* can hear and see by itself without having eyes and ears like us.** This idea of a living being without a physical body like ours is hard to imagine for us. But *Brahmā* in the higher 20 realms have such “invisible bodies.”
- Of course, a *Brahma* or a *gandhabba* cannot taste, smell, or touch, since they do not have “dense solid bodies.”
- **But when trapped inside a physical body, a *gandhabba* can experience all five sensory inputs. However, now the *gandhabba* depends on the brain to receive those sensory inputs.**
- One way to get the basic idea is to look at the following analogy. **This analogy works ONLY for the five physical senses.**

A Soldier in a Totally-Enclosed Military Tank

2. Visualize a soldier operating a fully-enclosed military tank. I do not even know whether such “totally-enclosed” military vehicles exist. But one can visualize it. Consider a tank that is essentially a big metal box without even a single window. It has video cameras and microphones mounted on it to capture the scenes and sounds. It also has guns mounted on it that can shoot heavy artillery shells over long distances.

- Let us also assume that the tank’s movement is also fully automated, i.e., the soldier cannot drive it manually.
- There is a sophisticated computer system that controls all those activities. The soldier makes the decisions on where to go, what to shoot at, etc.
- Now, suppose the computer system breaks down completely. The soldier is fully alive but he/she is incapable of knowing what is happening outside. He/she is also incapable of moving the tank or firing its guns. To someone looking from outside, it appears that the tank is “lifeless.” It is no different from a nearby rock.

A *Gandhabba* inside a Physical Body

3. In the same way, a *gandhabba* trapped inside a physical body cannot see, hear, taste, smell, or touch anything without the aid of the brain.

- The physical body, just like the military tank, cannot “sense anything.” But it has a set of five “instruments” to interact with the external world (eyes, ears, tongue, nose, and body).
- Then there is a brain, just like the on board computer in the military tank, that controls those body parts. It performs two types of tasks. (1) Process external signals coming through those five body parts and pass them to the *gandhabba* inside. (2) It also carries out the instructions given by the *gandhabba* to control those body parts. Thus the *gandhabba* speaks and controls body movements with the aid of the brain.

- In the case of extensive brain damage, the *gandhabba* will not be able to get any information from outside the body. It will also not be able to speak or move body parts either because those tasks are also accomplished by the brain.
- That is why a “brain-dead person” in a “vegetative state” shows no sign of life, as we will discuss.

How Can a *Gandhabba* Move a Heavy Physical Body?

4. Again the “tank analogy” is helpful. The soldier does not have the energy to move the tank. That energy comes from the fuel in the tank. Therefore, the tank will become “lifeless” if fuel runs out. The computer system will also not have the power to run.

- The physical body, just like the tank, cannot move without energy. That energy comes from the food that the human eats.
- Furthermore, the brain cannot function either without having enough energy provided by the food human eats.
- It turns out that the brain consumes roughly 25% of the energy produced by food digestion. That gives an idea of the immense workload on the brain. It has to process all the information coming in through the five senses AND also to move body parts to speak and to carry out other bodily actions.

More Comparisons Of the Two Cases

5. More bodily actions can be visualized that way. For example, *gandhabba* cannot throw a stone. But *gandhabba* in a human body can get the physical body to throw a stone (with the help of the brain.) It takes a lot of energy to throw a stone. But that energy does NOT come from the *gandhabba*. that comes from the food consumed by the physical body.

- Correspondingly, the soldier cannot throw the heavy artillery. But he/she can set up the computer to aim and fire the guns. The energy to propel heavy projectiles comes from the fuel in the military tank.
- If the computer breaks down, the soldier will be helpless and will not be able to see or hear what is happening outside. Furthermore, he/she will not be able to move the tank or shoot artillery shells. That is just like a “brain-dead person” in a vegetative state (see below.)

Why Can't the *Gandhabba* “See-Through” the Physical Body?

6. If a *gandhabba* outside a human body can travel through walls, and see/hear through walls, why cannot it see and hear without the physical eyes and ears while inside the physical body?

- That is a manifestation of *kammic* energy dictated by the purpose of the physical body. The physical body arises to provide a way for the *gandhabba* to experience close contacts of taste, smell, and touch. That NECESSITATES its entrapment inside the physical body.
- Again, the military tank analogy is useful. The soldier will be able to see and hear without the aid of that tank-mounted equipment when he is outside the tank. But while being INSIDE the tank, he CANNOT see outside without the use of the equipment. In the same way, the *gandhabba* is TOTALLY shielded once inside the physical body.

7. There is another aspect of why a *gandhabba* in a human body becomes isolated. *Kammic* influences block the *gandhabba* from “seeing through the physical body.” That is a mechanism to make the physical body subject to *kamma vipāka*.

- Some people incur brain damage due to *kamma vipāka*. Being trapped inside one's own body and not being able to communicate with others is unimaginably harsh, as we will see below.

- In general, “being trapped inside a heavy body” is one mechanism for humans to “pay for the privilege” of having a physical body to enjoy sense pleasures. Without exception, those who have had out-of-body experiences describe a joyful feeling of “lightness.”

What Happens if the Computer System (Brain) Malfunctions?

8. There are two possible scenarios in each of the cases. Let us consider the tank analogy first.

- If part of the on board computer-controlled circuitry malfunctions**, the soldier may be able to do only certain tasks. For example, suppose the circuitry that controls automated driving and the guns malfunctions. Then he would be unable to do anything with the tank (either to move it or to fire the guns.) But he may be still capable of seeing and hearing what is happening outside.
- If the computer completely breaks down**, then the soldier would be completely isolated. He will not see or hear what is happening outside, in addition to not being able to do anything with the tank.

9. In the case of a *gandhabba* in a human body, the above two scenarios are analogous to two possible situations for a person in a vegetative state.

- If only certain areas of the brain circuitry are damaged (especially the brain stem)**, that person may be able to see and hear but may be incapable of moving body parts to respond to them.
- If the brain is totally damaged**, that person may not see or hear AS WELL AS not be able to respond either.
 - Yet, the *gandhabba* inside is alive and well in both those cases, just like the soldier in the tank.
 - We will discuss the case of a person in a “vegetative state” in detail in the next post.

How Does A Gandhabba See/Hear When Outside a Physical Body?

10. Another possible question is: “How does the *gandhabba* see and hear when outside the human body?”

- It is only in the human (and animal) realms that beings communicate via speech (and bodily gestures). In other realms, living beings communicate directly via *saññā*, one of the five aggregates (*pañcakkhandha*).
- Not all living beings can communicate with all others via *saññā* (it depends on the realm.) When possible, communications take place via *saññā* generated in one’s thoughts.

11. That mode of communication is similar to one’s experience with dreams. **In a dream, we do not “hear” what others say in the same way when we hear speech normally, i.e., through the ears.** In a dream, we perceive what they are saying. We perceive *saññā*.

- **We also do not “see dreams” with our eyes, which are closed while we sleep.**
- Here, we need to remember that the “real sensing elements” are not the physical eyes, ears, etc., but the five *pasāda rūpa*: *cakkhu*, *sota*, *ghāna*, *jivhā*, and *kāya*. See, “[Mind and Matter – Buddhist Analysis](#).”

The Blind Woman Who Could See With an Out-of-Body Experience

12. The following real-life account provides a good understanding of the working of the *gandhabba* in a human body versus outside.

- In some cases, people are born with the *cakkhu pasāda rūpa* in good condition, but the optic nerve (or the physical eye itself) may be damaged. In that case, they cannot see because the brain is not getting a signal from the eyes.
- But if the *gandhabba* can come out of the body, it can see by itself. The following video clearly illustrates this situation.

[WebLink: youtube: Near Death Experience - Blind woman 'sees' while out of body](#)

13. Note that she had “never seen anything” in her whole life. It seems that either her physical eyes or the optic nerve/visual cortex in the brain had been damaged at birth. But the *cakkhu pasāda rūpa* was fully functional. That is why she was able to see when the *gandhabba* came out of her body.

- However, in other cases, one may be born blind because one may not be born with the *cakkhu pasāda rūpa*. In that case, even if the *gandhabba* comes out of the body, it would not be able to see.
- All five sensory faculties are in the *gandhabba* or the *manomaya kāya*. Those signals are first processed by the brain before the signals arrive at the corresponding *pasāda rūpa*. Then that *pasāda rūpa* transfers the signal to the *hadaya vatthu* and it is the *hadaya vatthu* that really “sees”, “hears”, etc. See “[Mind and Matter – Buddhist Analysis](#).”

All posts in this subsection at “[Buddha Dhamma – A Scientific Approach](#).”

2.2.6.3 Persistent Vegetative State – Buddhist View

September 18, 2020; revised September 19, 2020

Some people in “persistent vegetative state” may have awareness per Buddha Dhamma. (1). As long as the physical body is alive, there is life. (2). Depending on the extent of brain damage, awareness of the external world may or may not be there.

What Is a “Vegetative State” or Unresponsive Wakefulness Syndrome?

1. A persistent vegetative state is when a person is awake but showing no signs of awareness for an extended time. Such a patient may have awoken from a coma, but still don’t seem to have regained awareness (Refs. 1,2).

- Ref. 1 states, “A vegetative state is when a person is awake but showing **no signs of awareness**.”
- According to Ref. 2, a person in a vegetative state “**completely lack cognitive function**.”
- The term “vegetative state” may have come from “vegetable-like” in the sense that the body is obviously alive, but does not show any sign of awareness. A vegetable is also “alive,” but of course, does not have any awareness.
- But there is a clear difference between “**being aware**” and “**being able to communicate that one is aware**“. Some people classified to be in a “vegetative state” may be aware but not able to communicate that they are aware. This difference is VERY CLEAR in the Buddhist explanation.

There Could be Awareness in a Person Classified to be in a “Vegetative State”

2. Scientists are beginning to realize that there is a “**thinking being**” in a human body in a “**persistent vegetative state**.” In 2010, it was proposed to refer to this condition as *unresponsive wakefulness syndrome* or UWS (Ref. 3.)

- However, many still consider ANY person in a vegetative state to be “clinically dead.” Disconnecting life-support is legally allowed.
- In Buddha Dhamma, the issues become much clear. **The *gandhabba* is fully alive inside**. Since the brain’s areas controlling body movement and speech are disabled, it cannot show awareness. But depending on the condition of the other areas of the brain, **it may or may not be aware of the surroundings. That means a person in a vegetative state COULD BE fully aware of his/her surroundings just like a normal person.**

- Progress in neuroscience now makes it possible to check whether such a person is aware of the surroundings, even if he/she cannot express that via speech or bodily movements. We will discuss that below. Let us first discuss the general picture per Buddha Dhamma.

A Person in a Persistent Vegetative State – Buddhist Explanation

3. In the previous post, we described the workings of the *gandhabba* (mental body) and the physical body where the brain plays a significant role.

- One part of the brain (neocortex) provides the *gandhabba* with the sensory inputs coming through the physical sense faculties (eyes, ears, nose, tongue, body.)
- There is a separate brain circuit (brain stem) that controls speech and bodily movements. Per *gandhabba*'s instructions, that part of the brain controls the movement of body parts.
- We discussed those two aspects using an analogy of a military tank operated by a soldier. Here, an onboard computer has two circuits: One to bring in external video and audio to the soldier. The other part of the computer-controlled circuit drives the tank and fires the guns mounted on the soldier's tank per instructions. See, "[Gandhabba in a Human Body – an Analogy.](#)"

“Vegetative State” is Proper Terminology If the Brain Is Fully Damaged

4. If there is extensive damage to the onboard computer and all circuits under its control, the soldier is completely isolated. He/she would not be able to see/hear what is happening outside OR to drive the tank or fire its guns.

- Similarly, **if the brain is fully damaged**, the *gandhabba* will not be able to see, hear, taste, smell, or touch (It will also not be able to recall any past events as we will discuss later.) Furthermore, since the brain cannot help with speech or other body movements, the *gandhabba* cannot show any life sign.
- However, the soldier inside the tank is alive. Similarly, the *gandhabba* inside the physical body is also fully alive.
- It is because that the *gandhabba* is alive that the physical body stays alive. **The physical body can be in that “persistent vegetative state” as long as the *gandhabba* stays inside AND the physical body is on life-support (food and water provided.)**
- **Thus, the term “vegetative state” is appropriate in this case**, since the *gandhabba* cannot respond AND is totally unaware of what is going on. **In *Abhidhamma* terminology, the mind is in the *bhavaṅga* state. There are no “active thoughts” or *citta vithi*.**

If Only the Brain Stem Damaged, *Gandhabba* May Have “Awareness”

5. Now, let us consider the second possible scenario. **If only the brain stem is damaged**, that person may see and hear but is incapable of moving body parts to respond to them.

- In the military tank analogy, this is similar to when the computer circuits for driving and firing of guns are damaged. The video and audio equipment are working, so that the soldier can see and hear what is going on outside, but is unable to move the tank or fire its guns. To someone looking from outside, the military tank appears to be totally disabled.
- Similarly, some people who appear to be in persistent vegetative states may be fully aware of what is going on. They have no abilities of body movements and cannot speak or move even a finger. Thus, they are unable to express anything with words or bodily movements.
- The following video is about a woman in a vegetative state for two years and was able to recover. **During those two years, she heard and saw what was going on.** However, there was “no sign of life” in her other than her vital signs.

[WebLink: youtube: Miracle Drug Wakes Up Woman In A Coma After 2 Years | My Shocking Story](#)

Gandhabba of a Person in a Persistent Vegetative State is Fully Alive in All Cases

6. Therefore, as long as the body's vital functions are intact, the *gandhabba* inside is alive and well. In other words, the fact that the physical body does not decay MEANS that the *gandhabba* inside is alive.

- Of course, if life-support disconnected the physical body will die. Then the *gandhabba* would move out of the dead body.
- Some people in a “vegetative state” may not be able to think in addition to not being able to respond. That is a “strong vegetative state,” as discussed in #4. That is similar to a living being in the *asañña* realm with no thoughts or perceptions.
- On the other hand, some who are classified to be in a “persistent vegetative state” may be fully aware of what is happening, as discussed in #5.
- The following amazing video describes the accounts of three people who were in vegetative states for years per #5. They recovered and say that they were able to see or hear everything. But they were incapable of even moving a finger, let alone talk, so they could not acknowledge that they knew what was happening.

[WebLink: youtube: This Guy Came out of a 12-Year Coma and What He Told Amazed Everyone](#)

- Imagine being in a situation like that! Totally helpless. **That is one example of *anatta* nature!** This is why *anicca* means much more than just “impermanence.” One can get into situations where one loses any control over one's situation. Most animals are like that throughout their lives. They have to bear whatever happens.

Is There a Way to Check if a Person In a Vegetative State Is Aware of Surroundings?

7. It would be horrible to discontinue life-support for a person who cannot communicate but is fully aware of what is happening. As we saw in the above video, some people in persistent vegetative states CAN see and hear everything. They cannot speak or even make bodily gestures to indicate that they can see and hear.

- Imagine being in such a situation. In some cases, the medical staff and even the family members may be talking about taking away life support! That would be a cruel punishment even though not intended.
- But new imaging technology developments have made it possible to find out whether a given patient is aware, even though unable to communicate. The following video explains the technology. A Neuroscientist Used fMRI to Communicate With People in a Vegetative State:

[WebLink: youtube: This Neuroscientist Uses fMRI to Communicate With People in a Vegetative State | Freethink](#)

- **According to this doctor, about 1 in 5 patients (from a sample of several hundred in his study) were fully aware!** Hopefully, this technique will be adopted in the future before deciding to remove life support.
- Note that the third person discussed in the video in #6 (@9.06) underwent this brain scan diagnosis.

The Buddhist Explanations Are Very Clear on Many Moral Issues

8. The prevalent “materialistic view” is making it difficult to understand some critical moral issues with clarity. What we discussed above is just one example.

- Another actively-debated issue is related to the fact that there is no clear understanding of the conception of a baby per materialistic view. The only thing that is universally accepted is that the conception STARTS with the formation of a single cell (zygote) when a sperm cell joins an egg cell in the mother's womb.
- But that zygote is inert. When does it become alive? Some people even say it is not alive until it is born! Yet, one can clearly see that the baby is alive in the womb with the heart pumping.
- In the Buddhist view, the situation is crystal clear. The inert zygote becomes alive when a *gandhabba* “descends to the womb” (*okkanti*) and merges with that zygote. That normally happens within a day or two of sexual intercourse. Thus, the time of conception is well-defined. See, “[Buddhist Explanations of Conception, Abortion, and Contraception.](#)”

2.2.6.4 Patient H.M. – Different Roles of Brain in Memory

September 25, 2020

Patient H.M. provided a critical clue to the role of the hippocampus in memory preservation. Studies on him and a few other patients point to direct and indirect roles played by the brain in preserving memories. The Buddhist description and scientific descriptions are the same for habitual (procedural) memory but are different for autobiographical (declarative) memory.

Major Components of the Brain

1. The following diagram shows the brain divided into three regions. The following bullet points provide the KEY FUNCTIONS of each area. It is a crude description but provides a simple picture.

- The **cerebellum (indicated in red)** controls **body movements**. The cerebellum also helps with body balance and remembering repetitive tasks. If there is significant damage to the **brain stem**, one is likely to die. The brain stem controls vital functions like breathing.

- The **limbic system** plays a vital role in **memory**. It also deals with emotions.

Components of the limbic system are indicated in black.

- The **neocortex (indicated in blue)** is the largest area of the brain and manages **sensory inputs such as vision and hearing**. It is also the **“thinking brain.”** It wraps around the limbic system, starting from the edge of the cerebellum.

Click on the link to download the figure: [“Major Components of the Brain.”](#)

Structural Information on the Three Regions of the Brain

2. The above figure shows a cut of the brain in the middle. **Some components of the limbic system have two parts on either side.** For example, the hippocampus and amygdala have two identical structures on the brain's left and right sides. [The **hippocampus** is a small, curved formation in the brain that plays an important role in the limbic system. The **hippocampus** is involved in the formation of new memories and is also associated with learning and emotions. The **amygdala** is a collection of cells near the base of the brain. There are two, one in each hemisphere or side of the brain. This is where emotions are given meaning, remembered, and attached to associations and responses to them (emotional memories). The **amygdala** is considered to be part of the brain's limbic system.]

- On the other hand, the brain stem and cerebellum are single structures.
- The neocortex, in contrast to both those, has different areas specialized for different tasks. Analysis of sensory inputs happens in the back (visual cortex and auditory cortex.) Parts of the frontal cortex manage planning, speech, and related motor control aspects. Neocortex accounts for 76% of the brain.

Overview of Our Discussion So Far

3. Now we can get a better visual of our discussion so far in the previous few posts, especially the post on [“Persistent Vegetative State – Buddhist View.”](#) Let us first go over that post.

- The brain stem regulates breathing, heart rate, blood pressure. Therefore, it is likely that people in vegetative states do not have major damage to their brain stems.
- The loss of motor control (body movements) is likely to be due to damage the cerebellum.

▪ The visual and auditory cortices are close to the cerebellum (left figure). Click to download the figure: [“Neocortex Areas and Cerebellum.”](#) The limbic system is hidden in this view.

▪ That roughly matches what we discussed in the previous post about different situations of people in vegetative states. For example, suppose there is damage to the cerebellum area, but minimal damage to the visual/auditory cortices. Such patients may be able to see/hear but not able to respond.

▪ On the other hand, if visual/auditory cortices, as well as the cerebellum, are damaged then the patients would not be able to see or hear as well.

▪ We discussed those two situations in the previous post.

The Opposite of a “Vegetative State” – Living Without Memory

4. Now, let us discuss a few people who were unfortunate to face a different set of problems due to a third region of the brain located close to the middle of the brain. As we can see from the first figure above, the limbic system lies underneath the neocortex and sits above the brain stem/cerebellum area.

- The limbic system is the “emotional center” of the brain because it controls emotions. It has several components, including the hippocampus, amygdala, and thalamus.
- Our focus here is on the hippocampus. As we will see, it plays a major role in memory.
- There are two symmetrically-placed hippocampi on either side of the brain. Both those were surgically removed in a patient who went by the name “patient H.M.”

The account of “Patient H.M.” – Critical Role of Hippocampus

5. Patient H.M. (or Henry Molaison) suffered from frequent bouts of seizures. In 1953, a surgeon removed his hippocampi (on both sides of the brain) in a desperate attempt to solve that problem. It did solve seizures, but HM was left with a peculiar and devastating memory loss.

- His ability to retain NEW memories was lost. He could remember events up to the operation but could not remember anything for more than a few minutes AFTER the operation. The following video explains it in more detail.

[WebLink: youtube: What happens when you remove the hippocampus? - Sam Kean](#)

- After extensive studies on patient HM (he died in 2008) and on several other patients with memory loss, neuroscientists have concluded that the hippocampus is the component in the brain that strengthens short-term memories to long-term memories and “pass them over to the neocortex.”
- However, they do not know how those memories can be “passed over to another brain region” or how such long-term memories can be kept for long times. In the next post, we will discuss some people’s ability to remember past events in extensive detail. **For example, some people can remember what they ate for lunch on a specific arbitrary date several years ago!**

- The extensive study of patient HM is **CRITICALLY** important since it allows us to pinpoint one brain component responsible for long-term memories.

Nomenclature of Memory

6. There are some standard terms used by neuroscientists that we need to be aware of. That will help us understand the content in the following videos.

- **Autobiographical (or declarative or explicit) memory** is about remembering events, facts, etc. These memories are about dates, events, names, etc. They are the same as *nāmagotta* in Buddha Dhamma. In Buddha Dhamma, *nāmagotta* are not in the brain, but in the “*viññāṇa* plane.” There is a “transmitter” in the brain that transmits memories to the “*viññāṇa* plane.” Then there is a “receiver” in the brain that makes it possible to recall memories from the “*viññāṇa* plane.” More on that in upcoming posts.
- The other is **habitual (or declarative or implicit) memory** or being able to do repetitive tasks like playing the piano, riding a bicycle, brushing teeth, etc. They are related to one's habits. These memories are “hard-wired” in the brain. It appears that the cerebellum in the brain is where such “memory connections” take place.
- **Anterograde amnesia** is the failure to store memories after trauma. **Retrograde amnesia** is the failure to recall memories before the trauma. The loss of the hippocampus leads to anterograde amnesia.

Further Details on Patient H.M.

7. The following video is a bit long. But it provides a lot of information.

[WebLink: youtube: Patient HM and Jacopo Amese](#)

- @ 4 minutes: Hippocampi on both sides of the brain surgically removed. After that, he couldn't remember anything that happened minutes ago. Of course, he could remember events before the operation.
- Imagine the hippocampi to be the “transmitter.” Suppose it transmits new memories to the “*viññāṇa* plane” where they remain intact forever. Then suppose there is another component (yet unidentified) in the brain that can help recall memories. That “receiver” was working in patient H.M. since he could recall memories formed BEFORE removing the hippocampi.
- We will discuss this “theory” in the next post. But keep this in mind as we continue the discussion here.
- @4:40 minutes: “Declarative memory” is the same as the autobiographical memory mentioned above. “Procedural memory” is the same as “habitual memory.”
- @5:40 minutes: The narrator says there is only one book on patient H.M., But there are two more. See Ref. 1.

8. The Nova clip @7 minutes says that memories are created and erased by chemical processes. But that is not consistent with either Buddha Dhamma or recent findings in science.

- @8:40 minutes: The account of H.M.'s medical problems that led to surgery.
- @10 minutes: Patient H.M. could remember everything that happened before his operation.
- @10:30 minutes: Dr. Milner concluded that the hippocampus **MAKES** long-term memories. But we will see that there is a better explanation.
- @11:00 minutes: The drawing experiment showed that he could learn repetitive processes. As we will see below, that comes under “habitual memory” (learning a motor skill) controlled by the cerebellum. But, of course, he had no memory of going through those trial runs of drawing the star.

- @12 minutes: Current scientific explanation of memory formation. This explanation is also consistent with Buddha Dhamma. Formation of “habitual memories” or motor skills do appear to take place in the cerebellum.

The Account of Patient E.P.

9. The account of a different person, **patient E.P.** starts @14:30 minutes. In 1992, E.P. suffered a viral infection that seems to have damaged parts of the limbic system. This is very similar to the case of Clive Wearing that we will discuss below.

- @ 17 minutes: Patient E.P. also did not have the ability to retain memories of events AFTER coming down with the infection. But he remembered events before that. Thus, he does not have autobiographical memories of events AFTER the infection.
- @19:30: The virus destroyed areas around the hippocampus. After that damage, any NEW autobiographical information is not retained. But he remembers everything that happened BEFORE that virus-induced damage. This is similar to the case of patient H.M.
- @22 minutes: The narrator says the hippocampus helps “record the memories.” But as we will see, the hippocampus transmits those memories to the *viññāṇa* plane.
- @ 24 minutes: Brief discussion of Clive Wearing.
- @25:40 minutes: The account on Dr. Jacopo Annese, who is compiling records of the brains of people with different backgrounds, including those with memory problems.
- @30:10 to 32 minutes: The brain of patient H.M. **The discussion relevant to our topic stops at 32 minutes.**
- @32 minutes to end: Work of Dr. Annese. He is planning to make a repository of complete brain scans of 1000 people.
- Next, we discuss a third patient who lost ALL his memories AND cannot make ANY memories.

Clive Wearing – Musician With Seven Second Memory

10. Clive Wearing was a reputable musician. A herpes virus damaged his brain (around the limbic system) just over a few days in 1985. Unlike patient H.M. and patient E.P., he cannot recall ANY memories. **He can remember only those events within the last seven seconds.** His situation is even worse than that of the previous two patients.

- Therefore, he cannot recognize anyone. Even though he cannot remember the name of his wife, he knows that she is a special person in his life.
- So, he virtually lives “just in that moment”!
- The following video is a bit long. But it provides a lot of information.

[WebLink: youtube: The Man With The Seven Second Memory \(Amnesia Documentary\) | Real Stories](#)

Important Deductions from Clive Wearing’s Case

11. Note in the beginning that he can play the piano, but cannot remember anything that happened even several seconds ago!

- Therefore, his habitual memory is intact (consistent with his cerebellum undamaged.) But he has anterograde AND retrograde amnesia, i.e., total loss of autobiographical memory. Therefore, he seems to have lost both the transmitter (hippocampus) and “receiver” (cannot be identified yet.)
- @ 6:40 minutes: He says it is like being dead. No thoughts of any kind, except the one that passes by. In that sense, his state is a kind of a “vegetative state” even though he can maintain his physical activities.

- @ 9:30 minutes: The account of how he lost memory in several days in 1985.

12. Here are more notable things from the above video:

- @ 10 minutes: How he lost memory within several days. Apparently, the herpes virus crossed the blood-brain barrier and got into the brain. There is an only one-in-a-million chance of that happening!
- @14 minutes; He says he does not have anything to think about. That is why he initially cried all day long. He says it is like being dead.
- @19 minutes: Every moment is the beginning of consciousness! He repeats that at @43 minutes. No thoughts mean like being dead! He was fortunate to be able to play the piano. **As we mentioned, such “learned memories” remain hard-wired in the cerebellum. That is a notable difference from “episodic memories,” which are not (and cannot be) “stored” in the brain.** We will discuss that in the next post. That is also why he can dress by himself, eat and do other “regular activities” by himself.

13. We can learn a lot about the working of the brain and the *gandhabba* by carefully analyzing the accounts of patient H.M., patient E.P., and Clive Wearing.

- We will continue the discussion in the next post.

2.2.6.5 Memory Recall for Gandhabba in a Human Body

October 2, 2020; revised October 3, 2020

Memory preservation and recall involve two components in the brain per Buddha Dhamma. We identify the “transmitter” as the hippocampus. The “receiver” is tentatively identified to be in the posterior visual areas of the cortex possibly the precuneus.

Key Points From the Discussion So Far

1. **When outside the physical body**, a *gandhabba* can see, hear, and recall memories “directly.” The invisible *gandhabba* sees and hears with the *cakkhu* and *sota pasāda rūpa* and recall memories directly in *hadaya vatthu*. *Kammic* energy creates up to six sensory units, including those three. See [“Mind and Matter – Buddhist Analysis.”](#)
 - **When inside a physical body**, a *gandhabba* is TOTALLY shielded from outside. But thanks to that solid, dense body, the *gandhabba* can taste, smell, and touch things too. But ALL six types of interactions with the external world now REQUIRE a functional brain.
 - Using an analogy of a military tank, we discussed how the brain analyzes the sensory inputs coming through five physical senses (eyes, ears, nose, tongue, body) and passes them to the *gandhabba*. See, [“Gandhabba in a Human Body – an Analogy.”](#)
 - Now, let us discuss the critical role played by the brain in the memory preservation/recall process.

Memory Preservation/Recall for a *Gandhabba* Inside a Human Body

2. The sights, sounds, tastes, odors, and touchable objects are in the external world. In the same way, **our memories are also in the external world.**

- Of course, that Buddhist view differs from the scientific view that the memories are “stored” in our brains. See, “[Mind Is Not in the Brain.](#)”
- The “physical world” or “*rūpa loka*” that is spread out in space (*ākāsa dhātu*) is only one part of our world.
- That physical world has a mental counterpart. **It is the “mental world” or “*nāma loka*” associated with the *viññāṇa dhātu*. Our memories or “*nāmagotta*” (as well as plans and our *kamma bija*) are in that *nāma loka*.**

3. Out of the five aggregates (*pañcakkhandha*), the *rūpakkhandha* encompasses everything associated with the *rūpa loka*. The other four aggregates (*vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha*) are associated with the *nāma loka*. We will discuss that in more detail in upcoming posts.

- As discussed in the above-mentioned posts, eyes, ears, nose, tongue, and the physical body brings in the five physical sensory inputs to the *gandhabba* trapped inside the physical body. The brain plays a key role in processing those sensory inputs and passing them to the *gandhabba*.
- Two brain components play critical roles in memory preservation/recall for the *gandhabba* trapped in a physical body. Let us discuss that now.

A Transmitter and a Receiver of Memory in the Brain

4. The five physical senses need to “bring in” external sensory inputs from the physical world. People, animals, and things in the *rūpa loka* can be seen with the eyes. Our physical bodies can touch those things, etc.

- On the other hand, records of our thoughts (*nāmagotta*) need to be first sent out of the physical body to the *nāma loka* (*viññāṇa dhātu*.) Those thoughts arise in the *gandhabba* inside the physical body. As thoughts arise in *gandhabba*, the “transmitter” in the brain transmits them to the outside.
- We can recall those records as needed, with the aid of the “receiver” in the brain.

The Critical Roles of the Transmitter and the Receiver

5. If the transmitter in the brain does not work, then records of one’s thoughts cannot be transmitted out to the *viññāṇa dhātu*. That means those records WILL NOT be saved. **If someone’s transmitter stops working, the recording of *nāmagotta* will stop.**

- **If the transmitter keeps working, but the receiver stops working, then one will not be able to recall ANY of the memories.** However, one’s *nāmagotta* will continue to accumulate in the *nāma loka*.
- **Of course, if both transmitter and receiver fail, then one’s *nāmagotta* will not be saved, AND one will not be able to recall ANY memories.**

6. Now, let us see what happens when that person dies and is reborn with a human body again. If both the transmitter and receiver work in the new life, then the only problem would be the following.

- **If the transmitter had not worked for a certain time period in the previous life, *nāmagotta* for that period would be missing FOREVER.**

- That last scenario would be similar to the case of *nāmagotta* missing for the time spent in the *asañña* realm. For that whole time spent in the *asañña* realm, there would be no thoughts, **and thus no “events” to record.**

Identification of the Transmitter of *Nāmagotta* as Hippocampus

7. In the previous post, “[Patient H.M. – Different Roles of Brain in Memory](#),” we discussed the case of patient H.M. As explained in #4 in that post, a surgeon removed H.M.’s hippocampus to treat a different medical problem.

- After the surgery, H.M. lost to the ability to recall anything that happened AFTER the operation. But he was able to recall events that took place BEFORE the operation.
- The fact that he was able to recall some memories means that the receiver was working!
- The second clue is that he cannot recall new memories made AFTER the operation, which means the transmitter was removed in operation. Only one small part of the brain (hippocampus) was removed in operation. **Thus it is a clear-cut case that the hippocampus is the transmitter!**
- By the way, patient E.P. discussed in #9 of that same post had the same issue of not recalling only those memories created AFTER an incident. In that case, a virus attacked E.P.’S brain area that contained the hippocampus. Thus his account is also consistent with the hippocampus being the transmitter.

Loss of the Receiver Leads to Complete Loss of Episodic Memories

8. What would happen if the receiver is damaged? Of course, one would not be able to recall anything at all.
- We discussed the case of Clive Wearing in that same post starting at #10. Clive did lose ALL memories. **Thus, it is clear that Clive lost the receiver.**
 - However, he lost his memories due to a viral attack just like patient E.P. It was not a specific brain component like for patient H.M.
 - There was much more damage to Mr. Wearing’s brain than for patient E.P.’s brain. **Some areas in the frontal and temporal lobes and the area around the hippocampus were damaged.** There are many small components around the hippocampus (like the amygdala.) I could not find more specific information on the damaged areas of Mr. Wearing’s brain.
 - On the other hand, his cerebellum (located in the back of the head) did not have any damage. Thus, he was able to do routine tasks using habitual memory. He was even able to play the piano, as we discussed in that post. As discussed in #12 there, **“learned memories” remain hard-wired in the cerebellum.** His cerebellum did not have any damage
 - But he would not recall playing the piano a minute after he finished playing! He could not recall ANY **“episodic memories”** because his “memory receiver” was damaged. His transmitter (hippocampus) was also damaged.

Tentative Identification of the Receiver

9. A recent study monitored various regions of the brain when a subject was asked to recall a past event. I just came across this publication today, October 3, 2020.

- The authors of the publication state, “..Results showed that initial access was very fast, did not activate the hippocampus, and **involved activation of predominantly posterior visual areas, including the precuneus.**”
- As we discussed above in #7, we believe that the hippocampus is the transmitter. Thus, this study is consistent with that.

- The publication is available for free distribution: [WebLink: PDF download: Highly Superior Autobiographical Memory-The role of the precuneus-Mazzoni-2019.](#)

Connection to the Ability to Recall Past Lives – Why Scientists Are Wrong

10. Since memories (*nāmagotta*) remain preserved in the *nāma loka* (*viññāṇa dhātu*), they will NEVER be lost. That is why some children can recall their past lives.

- On the other hand, if memories are “stored in the brain,” as some scientists speculate, recalling a past life would be impossible. Thus, even if just ONE one numerous past life accounts is correct, that model has to be discarded.
- Of course, those who cultivate *abhiññā* powers can recall MANY past lives. The Buddha recalled how he received “*niyata vivarana*” to become a Buddha from many previous Buddhas who lived billions of years ago! See, [“Pāramitā and Niyata Vivarana – Myths or Realities?”](#)
- Further evidence is building up from numerous Near-Death-Experience (NDE) studies conducted by heart surgeons. We discussed those problems with the “memories stored in the brain” theory in the post, [“Theories of Our World – Scientific Overview.”](#)

Buddha Dhamma Is Self-Consistent and Compatible With Scientific Findings

11. Buddha Dhamma is fully self-consistent. See, [“Buddha Dhamma: Non-Perceivability and Self-Consistency.”](#) All the posts at this website are self-consistent and are consistent with the *Tipiṭaka*.

- Over the years, scientific theories kept changing to be consistent with new findings. I predict that science WILL discard the idea that memories remain stored in the brain. It is just a matter of time.
- Another piece of recent evidence is the following. Some people can remember what happened in any ARBITRARILY selected day, even several years ago. It Is as though their memories were digitally recorded.
- Our brains are not digital, as proven in recent years. They do not work the same way as digital computers. It is impossible to “record” events in such detail in our brains.
- We will discuss accounts of some of those people with “perfect memories” in the next post.

All posts in this section at, [“Buddha Dhamma – A Scientific Approach.”](#)

2.2.6.6 Autobiographical Memory – Preserved in Nāma Loka

October 9, 2020

Autobiographical memory (*nāmagotta*) remains preserved in *nāma loka* (mental world.) Material things are in the *rūpa loka* (material world.)

Our Two Worlds – *Rūpa Loka* and *Nāma Loka*

1. Living beings enjoy material things in the *rūpa loka*. We are all familiar with our material world (*rūpa loka*), which has “things” that we can see, hear, taste, smell, and touch.

- We also enjoy RECALLING past experiences and also recalling anticipated future events (desires or expectations.) Both those types remain in our mental world (*nāma loka*.)
- A *satta* (living being) results when attaching to either of the two. See #6 of [“Me” and “Mine” – The Root Cause of Suffering.”](#)

Autobiographical Memory Versus Habitual Memory

2. When we say “we remember” something, that memory could be of one of two things.

- We remember past events like attending a wedding or a funeral, the birth of a child, etc. that is autobiographical memory. A memory of what one ate for dinner on any arbitrary day, even years ago, fall into the same category. Everything that you did from the moment of waking up to going to bed goes into **autobiographical memory**.
- On the other hand, remembering how to ride a bike (or play the piano) is also a memory. Even if you don't ride a bike for many years after learning it, you can recall that memory fairly quickly later on. It would not be like learning to ride a bike for the first time in your life. Such a “capability” is a **habitual memory**.
- There is recent evidence that some people have exceptional abilities with **autobiographical memory**. They can recall what happened on any arbitrary day within the past several years in great detail. Let us discuss that now.

Highly-Superior Autobiographical Memories (HSAM)

3. These studies started with Jill Price, who contacted a team of scientists in the early 2000's about her ability to recall anything from 1974 onwards. Since then, scientists have studied more people with that ability.

- Scientists have coined the term Highly-Superior Autobiographical Memories (HSAM, pronounced H-SAM) to describe their abilities.
- The following video illustrates how astounding their memories are:

[WebLink: youtube: Endless Memory, Part 1](https://www.youtube.com/watch?v=...)

Notable Facts

4. It starts with Louise Owen's account. Note that around 2 minutes, she says she “scanned through April 21 of that year to April 21, 1992.” It is like playing back a recorded file. She started on April 21, 2011 (the year she answered that question) and jumped (in her memory) year-by-year until getting to April 21, 1991. We cannot imagine how she did that, but you can see how quickly she “got to that specific date.” She said she went through 25 twenty-firsts and zeroed-in on the one in 1991. That is amazing! Of course, we cannot even imagine how she accurately described events on all those arbitrary dates given to her.

- @ 4 minutes: It is NOT memorization. Instead, it is the same way we can recall what happened a few hours ago. It just comes to our minds. But, of course, we cannot do that for more than a day or two in the past (unless it is a notable event.)
- @ 4:35: The account of Jill Price, the first person to be identified with HASM ability. But she did not want to meet with the others that we will later in the video. She was the only one who was not happy to have that ability (HSAM.)
- @ 4:50 Brad Williams, Rick Barron, and Bob Petrella. @ 5:50, the person checking the account of Bob Petrella got the date wrong, not him!
- @ 6:00 Actress Mary Lou Henner. @ 8:15, she says it is like playing back a DVD! That is not possible with “neuronal connections in the brain” (see below).
- @ 9:45 The meeting of five of HSAM memory wizards.
- @ 11 minutes: They are all “ordinary people” with no exceptional or unusual capabilities.
- @ 11:50 They “re-live” their recalled experiences.

Brain Scans of Those With HSAM

[WebLink: youtube: Endless Memory, Part 2](#)

5. Here is a list of important information from the above video.

- @ 1 minute: MRI scans of HSAM people's brains. Their left temporal lobes and the caudate nucleus (in the limbic system) are somewhat more prominent. As we saw, these are the suspected receiver and transmitters in the brain. See, "[Memory Recall for Gandhabba in a Human Body.](#)"
- Disregard the comment about the possible connection to OCD (obsessive Compulsive Disorder). Latter studies (see Ref. 2) show that there is no connection.
- @ 6:20: Memories do not need to be "memorable." They remember mundane, unextraordinary things. Bob remembered 19 seasons of Pittsburgh Steelers football games in 19 seconds! They show on the recorded video playback at 7:33 is t Bob played back in his mind a few seconds ago.
- @ 8:45: Do their memories clutter up their minds, i.e., do all those memories hang around in their minds all the time? No. They call any specific memory as needed, just like scanning through a recording. They can "pull up the right information at the right time." Dr. McGaugh says it is a puzzle, but it is NOT a puzzle in the Buddhist explanation. Those memories are fully intact in the *nāma loka*. Those with the ability can extract that information at any time.
- @ 9:35 DNA and other types of testing.

A Recent Account of HSAM With More Information

[WebLink: youtube: The woman who remembers everything | 60 Minutes Australia](#)

6. The previous two videos came out soon after finding several people with HSAM abilities. The above video is from 2019 and has further information about two other individuals, Becky and Markie.

- @ 2:10: Becky "re-lives" her old experiences. We saw that in the previous videos too, but this account is more explicit.
- @ 2:50: She can recite any page from any of the seven Harry Potter books. That is truly amazing. She must have read the books very carefully so that each word got "recorded." **It is essential to realize that what is "recorded" as *nāmagotta* are our thoughts**, as they arise.
- @ 5:00: Becky thought everyone could do it. It was a puzzle to her why her Mom could not remember something that happened five years ago!
- @ 7:00: Out of 60 people identified with HSAM capability since 2008, Becky is the only one with autism.
- @ 7:20: Relevant brain regions of HSAM people are not that unusually large, as initially thought (see #4.) However, there may be more connections between brain areas.
- @ 8:20: Account of Markie Pasternak, **who remembers every day of her life since age 10.**
- @ 10:55: Becky and Markie meet.
- @ 11:00 minutes: **Becky remembers everything from the first year she was born!**
- @ 11:45: Becky is a Harry Potter fan. No wonder she could remember all seven books, page by page.

Current Scientific Hypothesis on Memory Preservation

7. The following short video provides a good idea of the present scientific concept of "memory formation."

How memories form and how we lose them – Catharine Young

- It says memories "form in the hippocampus" and then "transfer" to other regions in the brain. They came up with that hypothesis after studies on patient H.M. As we have discussed, after removing the hippocampus from patient H.M.'s brain, he lost the ability to recall memories formed AFTER the

operation. But since he could remember old memories, scientists concluded that those old memories must have been “transferred” to other regions in the brain.

- That is the ONLY way to explain the accounts by patient H.M. within the “memory stored in the brain” hypothesis. However, they have not explained HOW that transfer process takes place. They would have a hard time explaining the abilities of those with HSAM, in particular.
- @ 1 minute: Discussion of synapses and “long term potentiation” or “stabilization of memories.” But does not jive with memory recall by those with HSAM. Preservation DOES NOT require repetition. EACH EVENT (like remembering what one ate for dinner) remains preserved. As thoughts ARISE in one’s mind, a record is kept instantaneously as *nāmagotta*. That is hard for us to imagine, but many features about *nāma loka (viññāṇa dhātu)* are not conducive to our experiences.
- @ 1:20: Memory records are NOT lost. It is only the ability to recall that is lost. However, people with HSAM have a near-perfect ability to recall memories, vividly displayed by Becky in #6 above. She can remember word-by-word that she had read! But it is true that as one gets older, the “receiver” in the brain gets weaker, and therefore the ability will become less with age.

Difference Between Autobiographical and Habitual Memories

8. The cases of Clive Wearing and patient H.M. that we discussed in “[Patient H.M. – Different Roles of Brain in Memory](#)” provides a good idea about the difference.

- Clive lost ALL of his past **autobiographical memory**, presumably due to losing both the “transmitter” and “receiver” of *nāmagotta*. But he had perfect **habitual memory** as demonstrated by his ability to conduct daily routines and also being able to play the piano.
- Patient H.M. lost only part of his **autobiographical memory** since he lost only his transmitter (hippocampus.) His **habitual memory** also remained intact.
- The above videos are about people with **exceptional autobiographical memory**. It is likely to be related to better performance of the receiver circuitry in the brain.
- It is a good idea to read previous posts in this series and absorb these key points.

Only Habitual Memories Are Stored In The Brain

9. As we discussed in “[Patient H.M. – Different Roles of Brain in Memory](#),” **habitual memory** involves an entirely different brain region, presumably the cerebellum. These memories get established by repeating a given task over and over until the neural connections become strong (in the cerebellum). **Thus, I contend that the scientific model discussed above in #7 pertains ONLY to habitual memories.**

- Synaptic wirings are indeed responsible for habit formation (see, “[How Habits are Formed and Broken – A Scientific View](#)”),
- However, it is a stretch to assume that “video-like recordings” of all past events get recorded in neural connections!
- Strengthening of neural circuits DOES NOT happen in autobiographical memory preservation. **A record of each thought or action gets preserved!** Of course, only a few people can recall most of them.

Further Problems With “Autobiographical Memory Storage in the Brain” Hypothesis

10. If autobiographical memory storage is in the brain, **one would lose all such memories at death.**

- However, there is mounting evidence that many people can recall their previous lives. See “[Evidence for Rebirth](#).” Even if just one of the thousands of such accounts is true, then the theory of “memory storage in the brain” fails.

- There is more evidence from the out-of-body experiences (OBE) and near-death-experiences (NDE.) Scientists and physicians have studied numerous cases in each category. **How do those experiences result without a physical brain?** See, “[Out-of-Body Experience \(OBE\) and Manōmaya Kāya.](#)”
- According to Buddha Dhamma, those who cultivate *abhiññā* powers can recall autobiographical memories (*nāmagotta*) with high-precision. They can recall events from previous lives as well. The level of accuracy and how far back in previous lives depend on the practitioner. The Buddha could remember as far back as he wished. **It is the same as with HSAM, but those with *abhiññā* powers can see memory records (*nāmagotta*) of past lives.**

Finally, several years ago, I wrote the following post, which has some additional information: “[Recent Evidence for Unbroken Memory Records \(HSAM\)](#)” It has a video on Jill Price, the person to be identified to have HSAM.

2.3 Buddhahood Associated Controversies

July 9, 2020

[Buddhahood Controversies – Introduction](#)

[Pātihāriya \(Supernormal Abilities\) of a Buddha – Part I](#)

[Pātihāriya \(Supernormal Abilities\) of a Buddha – Part II](#)

2.3.1 Buddhahood Controversies – Introduction

July 9, 2020

Overview

1. *Buddhahood* is a term that remains mired in controversy. In upcoming posts in this section, I will discuss three topics that have intrigued many people over the years. That will help cultivate faith in the Buddha, *Dhamma*, *Saṅgha*.

1. The wisdom and capabilities of a Buddha. We will clarify the implications of the three types of knowledge of a Buddha mentioned in #8 below.
2. Current scientific knowledge is compatible with most of the “supernormal capabilities” of a Buddha. Scientists have not taken the time to do an in-depth analysis. Of course, most scientists do not know enough about Buddha Dhamma (or physics) to do such an analysis.
3. We will also discuss how the teachings of the previous Buddha (Buddha Kassapa) were transmitted as *Vedic* teachings in distorted form. That is why there are so many common terms in Buddhism and Hinduism, like *kamma* (*karma*), *jhāna* (*dhyāna*), and even *Paṭicca Samuppāda* (*Pratītyasamutpāda*.) Of course, Buddha's *Ānāpānasati* meditation was misinterpreted as “breath meditation.” All those concepts were there (just like now) at the time of the birth of Prince Siddhattha. We will discuss *Tipiṭaka* accounts where the Buddha pointed that out.

It is easier for an average human to grasp the mundane meanings (and difficult to grasp the deeper meanings.) That is why periodically those mundane explanations come up disguised as Buddhist teachings as well.

Buddha Is a Title

2. Buddha is a title. Buddha is a human who becomes “Enlightened” or attains the *Buddhahood*. However, It is necessary to understand his teachings to a higher level to figure out the meaning of the word “Buddha.”

- A Buddha has the “perfect mind.” With a perfect mind, a Buddha knows everything about the world. Even though he lived more than 2500 years ago, he described the universe much of the same way that scientists have found out just within the past 100 years. And he provided many more details about our world (much more than the scientists) as we will discuss.
- One is not born a Buddha. The *Buddhahood* is attained or achieved. There have been many Buddhā in the past, and there will be many in the future. For example, the Buddha we are discussing now is Buddha Gotama. There was Buddha Kassapa immediately before him (a long time ago) and the next Buddha will be Buddha Maitreya.
- It is a rare occurrence to have a Buddha in the world. Sometimes, billions of years can go by without a Buddha. See #14 of “[Pāramitā and Niyata Vivarana – Myths or Realities?](#)”
- Before we get into the knowledge of a Buddha, let us discuss some basic facts about Buddha Gotama.

Prince Siddhattha

3. Buddha Gotama was born with the name of Siddhattha (Siddhārtha in Sinhala or Sanskrit) and his parents were Suddhodana and Mahā Māyā. Suddhodana was a king, and Prince Siddhattha was brought up in luxury. For example, in the [WebLink: suttacentral: Mahā Parinibbāna Sutta \(DN 10\)](#), the Buddha says that he had four palaces for the four seasons. An English translation at, [“WebLink: suttacentral: The Great Discourse on the Buddha’s Extinguishment.”](#)

- Scattered throughout many *suttā* in the *Dīgha Nikāya* and *Majjhima Nikāya* are accounts of various stages of the life of the Buddha (before and after Enlightenment.) I will refer to a few below. It is a good idea to read them. Most translations are good enough, especially regarding such life accounts. Only when deep Dhamma concepts are discussed one needs to be careful about the correctness of the translation.
- A brief account of Prince Siddhattha’s life can be found, for example, at [“WebLink: henri-van-zeyst: Basic Buddhist Concepts.”](#) More details — extracted from the *Tipiṭaka* — at, [“WebLink: accesstoinsight.org: A Sketch of the Buddha’s Life – Readings from the Pāli Canon.”](#)
- At the age of sixteen, Prince Siddhattha married princess Yasodhara. They were happily married for thirteen years and had a son, Rāhula. Yet, Prince Siddhattha was not satisfied. He felt a sense of “discontent” or “dissatisfaction” lingering even while immersed in a luxurious life.
- We will briefly go through a series of events that led to a drastic change in Prince Siddhattha. Those four events are the Four Great Omens.

Four Great Omens

4. On his rare visits outside the palaces, one day Prince Siddhattha saw an old person. He had never seen an old person. His faithful companion, Channa, explained that everyone gets old.

- On a subsequent visit, he saw a sick person and learned that everyone becomes sick. On the third visit, he saw a dead body and was told that one day he would die too. Those three encounters got him to think deeply about life and his discontent with life grew steadily.
- On a subsequent fourth visit outside the palace, the prince saw a recluse, spiritual seeker, and his calm demeanor intrigued the prince. Channa explained to him that there were many recluses like that. **They were discontent with life and were in search of a solution to the universal problems associated with life. Those are sicknesses, getting old, and dying.**
- As we note below, people at the time of the Buddha were familiar with the concepts of rebirth. Therefore, they knew about the “cycle of suffering in the rebirth process.”
- With the sight of the recluse, prince Siddhattha realized that he would also need to give up the lay-life and pursue the path **to end that suffering associated with the perpetual cycle of birth, old age, sicknesses, and death.** One dies only to be reborn to go through the same cycle!

Influence of Teachings of Buddha Kassapa

5. Remnants of the teachings of the Buddha Kassapa from the deep past had come down through *Vedic* teachings. This is a critical point. As we will see later, the Buddha explained that only the mundane interpretations of Buddha Kassapa’s teachings had survived.

- For example, people at that time were quite familiar with the laws of *kamma*, the rebirth process, five (or eight) precepts, and even *Nibbāna*. However, *Vedic brahmins* had used the Sanskrit language to transmit those teachings and used Sanskrit words *karma* and *nirvāna* for the Pāli words *kamma* and *Nibbāna*.
- For example, per *Tipiṭaka*, queen Mahā Māyā had regularly observed eight precepts.
- That is also why there were so many recluses who were trying to figure out the way to *Nibbāna* (*nirvāna*), freedom from suffering in the rebirth process. Some of them thought that by cultivating *jhāna*

and getting rebirth in a *Brahma* realm is *nirvāna* (or end of suffering.) We will discuss that in the next post.

Renunciation – Becoming a Recluse

6. Shortly after seeing the recluse, Prince Siddhattha left the palace in the middle of the night. Channa led him out on his horse Kanthaka. The prince cut his hair and put on robes suitable for an ascetic. Let us call him ascetic Siddhattha or the *Bodhisatta*.

- First, the *Bodhisatta* went to two of the well-known *yogis* of the day, Āḷāra Kālāma and Uddaka Rāmaputta. They taught him all they knew. He was able to get the highest *jhāna* (*Nevasaññā nā saññāyatana*) in a short time. Those teachers thought that they had attained *Nibbāna*.
- But the *Bodhisatta* realized that one could not get to *Nibbāna* merely by **suppressing defilements** (greed, anger, and ignorance) with breath meditation or mundane versions of *kasina* meditation. He realized attaining *Nibbāna* requires the **removal of defilements** for “complete purification.”
- The Buddha has discussed those interactions with Āḷāra Kālāma and Uddaka Rāmaputta in the “[WebLink: suttacentral: Mahāsaccaka Sutta \(MN 36\)](#),” “[WebLink: suttacentral: Ariyapariyesana Sutta \(MN 26\)](#)” and various other *suttā*.
- **You can access translations to English and several other languages by clicking the “down arrow” just above the name of the *sutta* at Sutta Central.**

Six Years of Extreme Asceticism

7. After leaving Āḷāra Kālāma and Uddaka Rāmaputta, the *Bodhisatta* tried various methods of subjecting his body to extreme hardships. Other than pursuing mundane *jhāna/kasina*, many *yogis* at that time thought one could remove defilements by inflicting such punishments to the body.

- Shortly after leaving Āḷāra Kālāma and Uddaka Rāmaputta, the *Bodhisatta* met five companions, Kondañña, Bhaddiya, Vappa, Mahānāma, and Assajī. They were impressed with the *Bodhisatta*'s determination and were convinced that one day he will become a Buddha.
- By the way, the word Buddha (and *Bhagavath*) also came down in *Vedic* teachings. *Bhagavad Gita* (or “Recitals of *Bhagavad*”), for example, has many *Vedic* teachings that originally came from Buddha Kassapa. Of course, most concepts ended up with mundane interpretations.
- For example, “[WebLink: suttacentral: Brahmāyu Sutta \(MN 91\)](#)” provides a detailed account of *brahmin* Brahmāyu who was well-versed in the three *Vedā* (*tiṇṇaṃ vedānaṃ pāragū*). At the beginning of the *sutta*, *brahmin* Brahmāyu recites the qualities of a Buddha: ‘*itipi so bhagavā arahamaṃ sammāsambuddho vijjācaraṇasampanno sugato lokavidū anuttaro purisadammasārathi satthā devamanussānaṃ buddho bhagavā’ti*. Then he sends his pupil to the Gotama Buddha to check whether he has the “thirty-two marks of a great man (*dvattiṃsamahāpurisalakkhaṇāni*).” It is good to read the English translation: “[WebLink: suttacentral: With Brahmāyu \(MN 91\)](#).”
- During most of those six years, the *Bodhisatta* subjected his body to various forms of hardship. The Buddha discussed those unimaginable sufferings in several *suttā*, including the “[WebLink: suttacentral: Mahāsaccaka Sutta \(MN 36\)](#).”

Enlightenment (Attaining *Buddhahood*)

8. Finally, the *Bodhisatta* realized that subjecting the body to suffering is not the way to cleanse the mind of defilements. The *Bodhisatta* had to undergo six years of unnecessary suffering due to a hard-to-overcome bad *kamma* that he had committed against Buddha Kassapa. He had verbally abused Buddha Kassapa. I will just provide the link to the English translation of the *sutta*, MN 81: “[WebLink: suttacentral: With Ghatikāra](#).”

- On a Full Moon day in May, the *Bodhisatta* sat at the foot of a *Bodhi* tree with a firm determination to attain the *Buddhahood*. The Buddha described the account of the events during that night in the “[WebLink: suttacentral: Bodhirājakumāra Sutta \(MN 85\)](#)” among several others.

During the night the Buddha achieved three types of higher knowledge:

1. Ability to recall one’s past lives (*pubbe nivāsānussati ñāṇa*),
 2. The ability to see any living being’s *cuti* (end of *bhava*) and *patibandhi* (grasping of a new *bhava*). This is the *cutūpapāta ñāṇa*.
 3. The attainment of the *Buddhahood* with *āsavakkhaya ñāṇa*. That involved grasping the Four Noble Truths and the Noble Eightfold Path to *Nibbāna*.
- The *Bodhisatta* was now a fully-awakened Buddha or a *Sammāsambuddha*. He had gained knowledge about the wider world of 31 realms, how beings are born in those realms according to *Paṭicca Samuppāda*, etc. It was not mere speculation. He visited those realms and confirmed his findings, as we will discuss.

Events After the Enlightenment

9. The *Vinaya Piṭaka* provides a detailed account of events following the Enlightenment. Here is the English translation, “[1. Going forth \(Pabbajjā\)](#).” Another resource is discussed in “[The Life of the Buddha](#)” by [Bhikkhu Nānamoli](#).” I highly recommend reading those accounts. It provides a good idea of the initiation of the *Buddha Sāsana*, or the “ministry of the Buddha.”

- Of course, the translations of some critical Pāli words are not correct there, especially *anicca* and *anatta*. That occurs in the account where the five ascetics attain *Arahanthood* over several days of the discussion of the first two *suttā*, the *Dhammacakkappavattana Sutta* (SN 56.11) and the *Anattalakkhana Sutta* (SN 22.59) as I have discussed in many posts.
- Other than the description of deep Dhamma concepts, most English translations of *suttā* are good. Accounts on Buddha’s life in many *suttā* in the *Dīgha Nikāya* and *Majjhima Nikāya* fall into that category.
- However, even then, most translators themselves have doubts about the various abilities of the Buddha. They openly express their doubts even about the validity of the rebirth process, or Buddha’s ability to visit various *Deva* and *Brahma* realms (even the existence of such realms), to go through walls, to “touch the Sun and the Moon,” etc. See, “[Mystical Phenomena in Buddhism?](#)”

The Buddha stated that he never taught anything that he had not verified by himself. Buddha Dhamma is not philosophy. Most “experts” who express such opinions are not even true Buddhists (in the sense of comprehending deep concepts in Buddha Dhamma.) They are “secular Buddhists” who do not believe in rebirth, the FOUNDATION of Buddha Dhamma. Furthermore, they have no background in science (particularly in physics), and do not realize that many “mystical phenomena” are not contradictory to modern physics!

2.3.2 Pāṭihāriya (Supernormal Abilities) of a Buddha – Part I

July 17, 2020

Pāṭihāriya (*prātihārya* in Sanskrit and පාටිහාරියා in Sinhala) is a supernormal ability or a miracle. Several *suttā* in the *Tiṭṭaka* discuss them.

Kevaṭṭa Sutta (DN 11)

1. I will extract a few relevant portions of the text from the English translation, "[WebLink: suttacentral: To Kevatta \(DN 11\)](#)." I did not choose the other English translation since it translated "*pāṭihāriya*" as "a demonstration" rather than a "miracle." Anyone can do a demonstration. A *pāṭihāriya* can be performed only by someone with "supernormal capabilities". As we will see below, these powers are mind-boggling!

- At the beginning of the *sutta*, Kevatta, a young householder, comes to the Buddha and says the Buddha should instruct his disciples to perform "miracles" to convince more people to embrace Buddha's teachings. The Buddha refuses, but explains that there are three types of "miracles."
- The Buddha replies: "Kevatta, there are three types of miracles which I have taught, having myself understood and realized them. And what are the three? **The miracle of psychic power, the miracle of telepathy, and the miracle of instruction.**"

The Miracle of Psychic Power (*Iddhi Pāṭihāriya*)

2. "And what, Kevatta, is the **miracle of psychic power (*iddhi pāṭihāriya*)**?"

- **"Here, Kevatta, a monk wields various psychic powers:** He becomes many and then becomes one again. He appears and vanishes, goes unimpeded through walls, ramparts, and mountains as if through space. He can dive in and out of the Earth as if it were water, and he walks on water without sinking as if it were Earth. Sitting cross-legged, he travels through space like a winged bird. **He can touch and stroke the Sun** and the moon, so mighty and powerful. He exercises mastery as far as the *Brahma*-world."

(This verse explaining supernormal abilities appears in many *suttā*, including DN 2, DN 10, DN 28, MN 6, MN 73, MN 77, SN 12.70, SN 16.9, SN 51.11, SN 51.17, AN 3.60, AN 3.101, AN 5.23, AN 6.2, AN 10.97)

- Then the Buddha points out to Kevatta, that someone who has learned the "Gandhāra Charm" ("Gandhāra Trick" would be a better translation) can do some of that too. That is why the Buddha prohibited the display of such abilities. (Apparently, Gandhāra Trick can be compared to the "magic tricks" performed by magicians like David Copperfield today. However, the Gandhāra Trick seems to be much more powerful than any magic tricks performed today.)

The Miracle of Telepathy (*Ādesanā Pāṭihāriya*)

3. "And what, Kevatta, is the **miracle of telepathy (*ādesanā pāṭihāriya*)**?"

- "Here, a monk reads the minds of other beings, of other people, reads their mental states, their thoughts, and ponderings, and says: 'That is how your mind is, that is how it inclines, that is in your heart.'"
- Then the Buddha points out that those who have mastered the "Manika Charm" can read other people's minds as well. Therefore, that also is not impressive.

The Miracle of Instruction (*Anusāsanī Pāṭihāriya*)

4. "And what, Kevatta, is the **miracle of instruction (*anusāsanī pāṭihāriya*)**?"

- "Here, Kevatta, a monk teaches in this way: 'Reason in this way, do not reason in that way. Consider this and not that. Get rid of this habit, train yourself, and live life like that.' This, Kevatta, is what is called 'The miracle of instruction.'
- The Buddha goes on to explain in great detail the fruits of such instructions by a learned *bhikkhu* who has learned Dhamma from the Buddha. How he learns to live a moral life and to cultivate *Ariya jhāna* by REMOVING defilements. Then the Buddha explains that SOME OF THEM can cultivate all those supernormal powers mentioned above as well.

- First, let us look at the scope and implications of the “psychic powers” (*iddhi bala*.) **All these are performed by a purified mind.**

Psychic Powers (*Iddhi Pāṭihāriya*) – Unimaginable

5. Technological advances drive modern society. Scientists have studied properties of MATTER in great detail and have used those new findings to create “innovative devices” that help us work more efficiently. For example, they can build robotic machines that can do a lot of work that cannot be done by humans.

- So, it is indeed a “miracle” that Ven. Cūḷapanthaka created a thousand “copies” of himself to do work around the temple. Once the work is complete, he can make them disappear. That is what is referred to as “He becomes many and then becomes one again” in #2 above. Relevant information on Ven. Cūḷapanthaka at, “[WebLink: suttacentral: Cūḷapanthaka](#)” and “[WebLink: tipitaka.net: Dhammapada Verse 25](#) – [WebLink: tipitaka.net: Cūḷapanthaka Vatthu](#).”
- Let us discuss a few more of these “miracles” to see how amazing they are.

Traveling Through the Air With Physical Body

6. Another modern technological advance is to be able to travel long distances with cars, airplanes, and rockets. These became possible due to the collective efforts of many thousands of scientists starting from the time of Galileo and Newton, over 300 years ago.

- However, as stated in the above accounts of Ven. Cūḷapanthaka, traveling through the air with one’s physical body is possible after cultivating *iddhi bala*. That is what is referred to as, “Sitting cross-legged, he travels through space like a winged bird” in #2 above.

7. All these “psychic powers” have their basis in highly concentrated energy produced in the *javana citta* of the *yogi*. Yes, even other *yogis* at the time of the Buddha had cultivated SOME of these powers via cultivating *anāriya jhāna*. They could, for example, travel through the air carrying their physical bodies.

- As we know, *javana citta* generate *kammic* energies that lead to future births. See, “[Javana of a Citta – The Root of Mental Power](#).”
- The intensity or the power of *javana citta* can be vastly increased for those who have cultivated *pāṭihāriyā* powers. Such a *yogi* can set up an “energy field” around his physical body, and that energy-field can be controlled to move the physical body as he wishes.
- The video below demonstrates the basic idea of “electromagnetic levitation.” A *yogi* would create such an “energy field” around his body and control it to move the body.

[WebLink: youtube: Electromagnetic levitation device](#)

- By the way, these days one can buy various “levitating things” like “levitating globes.”

Traveling to a Star System “In an Instant” – With *Manomaya Kāya*

8. The closest star (possibly with a set of planets) to us is four light-years away. That means if a rocketship travels **at the speed of light**, it would take four years to get there. For comparison, the distance from the Earth to our Moon would take only 1.5 SECONDS. Therefore, a rocketship traveling at the speed of light will take **only 1.25 to arrive at the Moon!** But our rocketships take about 3 days to get to the Moon. Therefore, with a modern rocketship, it would take **about 600 years** to get to the NEAREST star.

- The capabilities of the Buddha (and some of his disciples with *pāṭihāriyā* powers) can be truly astounding. The Buddha could travel anywhere among the 10,000 “world-systems” (*dasasahassi lokadhātu*). A “world-system” is a set of planets associated with a star, where one planet would have life. In our “Solar system,” the Sun is the star, and life is based on Earth. See, “[31 Realms Associated with the Earth](#).”

- Therefore, it is mind-boggling to even imagine someone traveling to a star that is thousands of light-years away in an instant. Of course, the Buddha would travel such vast distances only with his “mental body” (*manomaya kāya* or *gandhabba*.)
- By the way, *Brahmā* from such 10,000 world-systems can visit Earth too. They have “bodies” that are equivalent to our mental bodies. They do not have dense physical bodies. *Brahmā* from the 10,000 world-systems came to listen to the first discourse of the Buddha, *Dhammacakkappavattana Sutta*.
- Many *suttā* state that the Buddha would arrive in a *Brahma* world within the time taken for someone to straighten a bent arm, i.e., less than a second! That is how *Brahmā* from other world systems came to listen to *Dhammacakkappavattana Sutta*. “*Brahma* bodies” are almost equivalent to *manomaya kāya* of a *gandhabba*. (In comparison, a modern rocketship takes three days to get to the Moon.)
- Nothing analogous to such fast travel has been even discussed in modern physics yet. I suspect that this is related to the recently established “non-locality” (or “quantum entanglement”) in quantum mechanics: [“Quantum Mechanics and Dhamma – Introduction.](#)

Going Through Walls, Mountains, etc.

9. Compared to “traveling through air with the physical body” discussed in #6,#7 above, a much more complex technique comes into play when “going through walls or diving into the Earth.” I have not seen such an action attributed to *anāriya yogis*. In this case, one breaks down the physical body to the elementary level of *suddhāṭṭhaka*.

- “Matter” is mostly empty space. An atom is virtually empty. This basic idea is illustrated in the first 3 minutes of the following video.

[WebLink: youtube: What Are Atoms Made Of?](#)

“Solid Matter” Is Mostly Empty Space!

10. We can get an idea about “how empty” and atom is, by just watching the first 3 minutes of the above video. As shown there, an atom is more than 99.999% empty!

- Then why is it that we cannot go through a wall? The answer is that two atoms cannot get too close to each other due to electromagnetic forces. That is not discussed in the above video. In a solid, two atoms cannot come too close, because the outer “electron cloud” of one atom will repel that of the second atom. Therefore, even a steel bar is mostly empty space.
- However, the Buddha taught that matter can be reduced a level below that of electrons and protons. That is the *suddhāṭṭhaka* level where there are no electromagnetic interactions (like the repulsion among electrons.) All the “material stuff” in a physical body can be reduced to **an invisible** *suddhāṭṭhaka* level. Scientists now know that an atom is divisible to smaller parts. The recently detected Higgs boson could be at the *suddhāṭṭhaka* level.
- But scientists cannot reduce bulk matter to the *suddhāṭṭhaka* level. Moreover, they cannot take an object like an apple, break it down to below the atomic level, and then put it all back together. But one with high-end *iddhi* powers can do that!
- **Such a *yogi* can reduce one’s own body to the *suddhāṭṭhaka* level, move it all to another location very quickly and then put it back together!** This was discussed in a bit more different way in #6 through #10 in the post, [“Mystical Phenomena in Buddhism?”](#)
- That approach of reducing the “material stuff” in a body to a form that can be transported to far destinations at high speed and then “re-assembling” back to the original form is part of **science fiction** these days, see [“WebLink: wiki.org: teleportation.”](#) I remember watching the popular movie [“WebLink: wikipedia.org: The Fly \(1986 film\).”](#) In that movie, a fly gets into the “teleportation machine” with the human, and the “re-assembly” at the other end produced a “human fly”!

Comparison With Modern Technology

11. As we can begin to see, modern science and Buddha Dhamma have two very different approaches for dealing with even material phenomena. **Science is exclusively based on the study of inert matter. Buddha Dhamma can explain material properties in terms of mental phenomena.** Of course, the scientists are still way behind the Buddha.

- From what we discussed above, just think about one comparison. While the Buddha was able to visit *Deva* and *Brahma* worlds within a split-second, scientists have only made it to the Moon and that takes three days.
- The scientists are not even aware of the existence of *Deva* and *Brahma* realms.
- *Deva* and *Brahma* realms are up there above the Earth. They have very little “matter” and that is why scientists cannot see them or their habitats. Our rocketships can go through their habitats without them even noticing it.
- The closest analogy that we have is the depiction of a *gandhabba* in the 1990 movie “Ghost.” See, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept.](#)” We can get a good idea of why we cannot see *Devā* or *Brahmā* (or their habitats) from watching that movie. *Devā* or *Brahmā* have “bodies” even more subtle compared to a human *gandhabba*.
- Unless the scientists can figure out how to implement teleportation, they will not be able to even travel to the nearest star with rocketships. The “mind-based” technique of the Buddha is based on a different paradigm.
- In the *Sīsapāvana Sutta* (SN 56.31), Buddha stated that he taught only a small fraction of what he knew. See, “[WebLink: suttacentral: In a Rosewood Forest.](#)”

There is no need to study or learn about *iddhi pāṭihāriya* in detail. I am providing this account to establish the following point. **By controlling the mind, even a single person can get ahead of many hundreds of years of scientific effort.** We will discuss the other two “miracles” in the next post.

Additional Resources

1. There is a Wikipedia article, “[WebLink: wikipedia.org: Miracles of Gautama Buddha.](#)”
2. The above video is the second of a series of videos. More information on atoms in the following set of videos:

[WebLink: youtube: What Is an Atom and How Do We Know?](#)

2.3.3 Pāṭihāriya (Supernormal Abilities) of a Buddha – Part II

July 24, 2020

Introduction

1. A **different paradigm** involves controlling material phenomena in Buddha Dhamma compared to modern science. For example, scientists have developed rocket technology to travel to the Moon. The Buddha was able to go much further and much faster with “mind power” 2600 years ago. We discussed some examples in the previous post; see, “[Pāṭihāriya \(Supernormal Abilities\) of a Buddha – Part I.](#)”

- The mind-based approach of Buddha Dhamma is much more powerful. Such unimaginable powers MAY ARISE automatically by just cleansing or purifying one’s mind. However, only certain people can develop such abilities to control material phenomena. They had cultivated such powers in recent past lives.

- **What is the use of being able to fly through the air like a bird or being able to travel to the Sun instantly and touch it if one is to be born as an animal or worse in a future life?**
- Controlling material phenomena is of no use to get a resolution to the universal problem of suffering associated with the rebirth process.
- That is why the Buddha explained to Kevaṭṭa that the **miracle of instruction** is the most important. Only a Buddha or a true disciple of the Buddha can provide such guidance as to how one can **understand the problem of *samsāric* suffering and learn how to overcome it.**

The Miracle of Instruction (*Anusāsana Pāṭihāriya*)

2. In the *Kevaṭṭa Sutta* (DN 11), the Buddha explains to Kevaṭṭa that a Buddha (*Tathāgata*) arises in the world with the perfect knowledge about the world. Then anyone could learn his teachings and follow them to reach full release from future suffering via attaining *Nibbāna* (*Arahanthood*.) The Buddha in that *sutta* describes the steps a *Bhikkhu* would go through, but the process is similar (and less strict) for a lay-follower.

- He would live a moral life, abstaining from killing/hurting other living-beings, without using improper forms of speech, and also controlling greed and anger. **Most of all, he would learn the true nature of this world and remove many ingrained wrong views about this world.** See, "[Micchā Ditthi, Gandhabba, and Sōtapanna Stage.](#)"
- Most of the first half of the *sutta* describes the recommended (more strict) lifestyle of a *bhikkhu*. It is a good idea to read the second half starting with the section on "Restraint of the Sense Faculties." See the English translation, "[To Kevaṭṭa \(DN 11\).](#)"
- The Buddha advised a "middle-of-the-way" lifestyle that is away from both making one's body to hardships AND indulgence in sense pleasures.
- While following the Buddha's path, some people may also attain the ability to control material phenomena with **psychic power (*iddhi pāṭihāriya*.)** Let us specifically discuss that briefly now.

What Are *Iddhi*?

3. *Iddhi* means "to cultivate" or to "grow" or "to make better."

- **Those "supernormal" abilities that we discussed in the previous post result from cultivating four mental capabilities (*Cattāro Iddhipādā*.)** They are *chanda* (desire for spiritual development/to attain *Nibbāna*), *citta* (the mindset for that goal), *virīya* (the effort), and *vīmaṃsā* (figuring out the way by investigating.) The "[Vibhaṅga Sutta \(SN 51.20\)](#)" discusses those factors in detail. It is a good idea to read the English translation there and also "[Iddhipada-vibhaṅga Sutta: Analysis of the Bases of Power.](#)"
- **Note that *chanda* here does not refer to the desire for sensual pleasures (*icchā*.)** Instead, it relates to a yearning for spiritual progress (for *anariya yogis*) and the desire to attain *Nibbāna* for those who are on the Noble Eightfold Path.
- While *anariya yogis* can attain some supernormal powers, those achieved by *Ariyā* (Noble Persons with *magga phala*) are much more potent or powerful. Furthermore, an *anariya yogi* could lose those abilities (just like the ability to get into *anariya jhāna*) **even in this lifetime.**

Anāriya Iddhi Powers Are Temporary

4. The *Tipiṭaka* account of Devadatta clearly illustrates this point. He was able to cultivate *anariya jhāna* and had developed some supernormal powers (*iddhi*) as well.

- By performing some supernormal tasks, Devadatta was able to impress Prince Ajātasattu. Having assumed the form of a young boy clad in a girdle of snakes, he appeared in Prince Ajātasattu's lap. Prince Ajātasattu was highly impressed and became a devout follower. Devadatta started thinking about

“replacing Buddha to lead the order of *Saṅgha*.” With that thought, Devadatta lost his supernormal capabilities.

- Still, Devadatta did not lose his ambition to “become the Buddha.” Later on, he tried to take the life of the Buddha in several attempts. In the end, he was born in an *apāya*.
- The details are in the section starting with “The story of Devadatta” at, [“Schism in an Order \(*Saṅghabheda*\)”](#). It is a long read up to the end of the post, but it is worthwhile.

What Is the Basis of Such *Iddhi* Powers?

5. This is where we start understanding the basis of “mental power.”

- A mind burdened with greed, anger, and ignorance (about the real nature of this world) has no “strong and beneficial” abilities. Instead, such minds create “dark *kammic* energies,” leading to unpleasant *kamma vipāka* in general and also rebirths in “bad realms.” We know that those undesired realms are the *apāyā* or the four lowest realms. **The Pali terms for those three bad causes are *lobha*, *dosa*, *moha*.**
- If a mind is absent from those three primary defilements, then actions (*kamma*) by such a “non-contaminated mind” create “clean *kammic* energies.” Those lead to good *kamma vipāka* and rebirths in the 27 “good realms” lying at and above the human realm. **In the absence of *lobha*, *dosa*, and *moha*, a mind creates *kammic* energies with, of course, *alobha*, *adosa*, *amoha*. Those are the three good causes.**

Births in the Four Lowest Realms Arise Due to Actions with *Lobha*, *Dosa*, *Moha*

6. The “dark energies” associated with thoughts associated with *lobha*, *dosa*, *moha* create “*kammic* energies” that can bring births (*jāti*) in the *apāyā*. Those energies are “*bhava*” in the *Paṭicca Samuppāda* process. **Therefore, “*bhava paccayā jāti*” means a “bad *bhava*” leads to a corresponding “bad birth.”**

- With the more robust the level of ignorance (*moha*), the easier it is to do the seven *akusala kammā*. Those are false, hurtful, deceitful, and vain speech and killing, stealing, and sexual misconduct.
- A mind that free of *lobha*, *dosa*, *moha* (i.e., with *alobha*, *adosa*, *amoha*) is a “moral mind”. It would know the difference between moral deeds and immoral deeds. In particular, it would try to avoid the seven *akusala kammā* done with speech and bodily actions.

Births Above the Human Realm Arise Due to Actions with *Alobha*, *Adosa*, *Amoha*

7. There are 26 realms above the human realm (six *Deva*, sixteen *rupāvacara Brahma*, and four *arupāvacara Brahma* realms.) Such births arise due to *bhava* energies created with thoughts devoid of greed and anger. Here deep ignorance or *moha* is absent and, thus, *amoha*. However, as we will see, there is still ignorance about the true nature of the world (*avijjā*) left in mind.

- In other words, **births in the 26 “good realms” arise due to the three root causes of *alobha*, *adosa*, *amoha*.**
- Because of that, lives in those realms are relatively free of harsh sufferings.
- If we look at the lifetimes of those realms, they become longer for higher realms. See, [“31 Realms of Existence.”](#)

- The human realm is also “good,” but there is significant suffering too. So, we need to treat the human realm differently from the other 30 realms. We discuss that now.

The Human Realm is Unique

8. Human births could arise due to combinations of all six root causes.

- There are three main types of humans. Some have *tihetuka* births, meaning that particular human birth was due to a *kamma* with the three “good roots” of *alobha*, *adosa*, *amoha*. Another set of humans have only two good roots (*dvihetuka* births), either *alobha/amoha* or *adosa/amoha*. The third type has only one good root of *amoha*. Those are *ahetuka* births because they are “unfortunate births.” (The word “*ahetuka*” here does not mean the absence of even a single good root)
- It is not possible to distinguish between *tihetuka* and *dvihetuka* births. But it is relatively easy to identify *ahetuka* births because they have little intelligence.
- All three types of humans experience both good and bad *kamma*. Even *tihetuka* people can come down with disease or injury. Even though the *Deva* realms also belong to the *kāma loka* (just like the human realm,) the bodies of *Devā* are not dense enough to cause any diseases/injuries.
- The root causes and how they lead to rebirths discussed in, [“Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\).”](#)

Second Uniqueness of the Human Realm

9. **The human realm is also unique in the following way.** Most rebirths are determined while in the human realm. Then they spend the lives in either lower or higher realms until the corresponding *kamma vipāka* are “paid off.” For example, a given human may do some bad deeds suitable for births in *apāya* but may change the lifestyle and cultivate *jhāna*. So, he/she would have created both good and *bhava*. Since developing a *jhāna* is an *anantariya kamma*, a *Brahma* birth will come at his/her death. But unless he/she had attained a *magga phala*, a birth in an *apāya* will result after exhausting time in the *Brahma* realm.

- As we remember from the post, [“Buddhism and Evolution – Aggañña Sutta \(DN 27\),”](#) a newly-formed Earth would be entirely populated by humans (with *Brahma*-like subtle bodies.) But with time, cravings arise due to *anusaya*, and those with “bad *gati*” will be reborn in lower realms. If a Buddha does not appear in a given eon, most humans end up in the lower realms sooner. It is a complex issue.
- More details on *anusaya* at, [“Āsava, Anusaya, and Gati \(Gathi\).”](#)

Living-Beings in Lower Realms Have Denser Bodies in General

9. In general, living-beings in the *kāma loka* (four lower realms, the human realm, and six *Deva* realms) have dense bodies with five sense faculties. In most cases, sensing odors, tastes, and bodily-touches REQUIRE dense bodies.

- Most living-beings have a craving for those “close-proximity” sense pleasures. They like to eat tasty foods, smell sweet odors, and to engage in sex. As long as a living-being does not lose cravings, they WILL NOT be free from the *kāma loka*. Now, some may cultivate *anariya jhāna* and be born in a *Brahma* realm but will return to the human realm at the end of that life.
- As we mentioned earlier, *Devā* do enjoy such ‘close contacts,’ but those contacts are “softer.” In Pali, the word “*olarika*” implies “close contacts with dense bodies in human and lower realms.” In the *Deva* realms, the contacts and bodies are “*sukuma*” or softer. *Devā* also can be born in the *apāyā* after they exhaust their *Deva* lifetimes.

The Journey Among the 31 Realms Is Perpetual

10. The above process has been going on for any of us from a time that is not possible to trace back. That is the *saṃsāric* journey or the rebirth process.

- Unfortunately, most of those births are in the four lower realms or *apāyā*. But, of course, we would not know all this unless we learn it from a Buddha or a disciple of the Buddha.
- The “suffering” in the First Noble Truth is the harsh suffering in the *apāyā*. Any pain and suffering that we FEEL NOW are due to past causes. We need to use appropriate medical treatments to alleviate such suffering.
- The First Noble Truth of Suffering refers to the harsh FUTURE suffering associated with the rebirth process. The good news is that the Buddha also explained how to stop that future suffering.

The Miracle of Instruction (*Anusāsana Pāṭihāriya*) of a Buddha

11. The above description of the real nature of our world with 31 realms and a beginning-less rebirth process is not known to the world in the absence of a Buddha. Only a Buddha can discover them and explain it to the world. Furthermore, a Buddha also provides instructions on how to stop the perpetual suffering in the rebirth process.

- Those two aspects involve the “Miracle of Instruction (*Anusāsana Pāṭihāriya*)” of a Buddha.
- The other two “miracles” of psychic powers and telepathy are just two byproducts. But, as the Buddha told Kevaṭṭa in the *Kevaṭṭa Sutta* (DN 11), those are not that different from “magic tricks.” They are real and not magic, as I have explained in “[Pāṭihāriya \(Supernormal Abilities\) of a Buddha – Part I](#)” and “[Mystical Phenomena in Buddhism?](#)”
- What is the use of being able to fly through the air like a bird or being able to travel to the Sun instantly and touch it if one is to be born as an animal or worse in a future life?
- In the same way, what is the use of accumulation of billions of dollars in this life, only to be reborn an animal in a future life?
- This is why the Buddha advised us to focus on attaining *Nibbāna*. At least the *Sotapanna* stage of *Nibbāna*.
- We will focus on the “Miracle of Instruction of a Buddha” in the upcoming posts. Then it will become apparent, from yet another angle, the uniqueness of Buddha Dhamma.

2.4 What is Buddha Dhamma?

Revised on January 16, 2016; major revision September 12, 2018; revised August 7, 2019; March 2, 2020

Introduction

1. Many people, who are to a bit of Buddha Dhamma, see that there is something good about it. So, they just go to a meditation retreat and try to get a dose of Dhamma over several days.
 - It is good to do that initially. But there is much more to Dhamma than to attain some temporary relief from the stresses of this life. If one can see that, then one needs to spend a bit more time and learn the full message of the Buddha.
2. If we learn the laws of motion from someone who does not really understand them, it is harder to digest. We may even learn them incorrectly, in the case of a bit harder subject, say, relativity. If the person who explains does not have a good understanding of the theory of relativity, then it is likely that the person who learns it will not learn much.
 - I have not only learned Buddha Dhamma, but have practiced it over the past ten years, and have seen the benefits for myself.
 - As a scientist, I am amazed at the depth of Buddha Dhamma. You will be able to see what I mean if you spend some time here.

A Wider World View

3. Benefits from Buddha Dhamma or the “worldview of the Buddha” can be two-fold.
 - First, is the spiritual aspect. One will be able to experience “peace of mind” even by reading and learning, but when one starts comprehending the critical message of the Buddha, that can have a profound impact.
 - Second, is the “intellectual aspect.” Buddha Dhamma thoroughly explains the “laws of Nature.” I have spent ten years studying it, and I am still learning. Once one starts digging deeper, one will see that modern science is far behind.
4. As I build up this site, anyone will be able to see that Buddha Dhamma is the ultimate Grand Unified Theory; see “[The Grand Unified Theory of Dhamma.](#)”
 - It explains everything not only that we can see, but also the existence of infinite number of worlds with living beings in 29 other realms of existence. We can only see the human and animal realms.
 - Thus Buddha Dhamma is not a religion in the sense of providing salvation. Buddha was not a God, a prophet or a messenger. He was a human being who purified his mind to perfection so that he could see the whole of existence. He was the perfect scientist, who investigated the problem of life and found the complete solution. We all need to find our salvation by following the Path that he prescribed to purify our minds.

Why Are There So Many Versions of Buddhism?

5. Thus Buddhism (Buddha Dhamma) is the most elaborate theory of “this world.” It is called “*pubbe anumussetu dhammesu*” or a “Dhamma (or a theory on nature) that is not known to the world before a Buddha comes along.” The Buddha uttered this phrase multiple times in his first sutta; see, “[Dhammacakkappavattana Sutta – Introduction.](#)”
 - However, it has “evolved” into many different versions since the Buddha Gotama revealed it to the world over 2500 years ago.

- During the past 2500 years many different versions of “Buddhism” have emerged; see, “[Historical Background – Introduction](#).” No one can claim, “this is the original version that was delivered by the Buddha.” It is up to each individual to examine different versions and decide which version makes sense.
- Thus it pays to spend some time and try to find the version(s) closest to the original. This is not an easy task these days.
- My goal is to present the closest version that I found. It is up to you to examine it and see whether you agree.
- I content that is in the Pāli *Tipiṭaka*, not Sanskrit *sutras*, and not in Buddhaghosa’s *Visuddhimagga*. I have pointed out the inconsistencies in both Mahāyāna version and also in the current Theravāda versions with *Visuddhimagga* as the basis; see, “[Historical Background](#)” section.

Key Concepts of Buddhism

6. It will be quite beneficial to read the “[Moral Living and Fundamentals](#)” section to get an idea of the basic principles.
 - One cannot even begin to follow Buddha Dhamma unless one learns about the key concepts, see “[Key Dhamma Concepts](#).”
 - The first stage of *Nibbāna* (*Sotāpanna* stage) is attained just by fully comprehending the “world view of the Buddha.” Then one clearly sees the fruitlessness of seeking lasting happiness in “this world” of 31 realms.
7. What is the central message of the Buddha? It is essential to read the section, “[Anicca, Dukkha, Anatta](#).”
 - It is also important to realize that *dukkha* is not the **feeling** of suffering; that is *dukha*; see, “[Does the First Noble Truth Describe only Suffering?](#).”
 - If one did not know that he was talking about a much “bigger world” than the world we directly experience, one would think of that statement as nonsensical. The laws of *kammā* do not make sense unless one at least knows that the Buddha was talking about a rebirth process that has no beginning.
8. Newton discovered the three laws of motion which helped describe gravity. Instead of re-discovering them, we learn them at school. We have to learn from a teacher. But if the teacher does not know the material well, then a student will not be able to learn the correct laws of motion.
 - One needs to learn from a true disciple of the Buddha, one who has not only studied it, but also has experienced the benefits.
 - Even though I use some “science examples”, there is no need to know any science. A science background may be helpful mainly in the “[Dhamma and Science](#)” sections, but even there it is not necessary.
 - The new section on “[Quantum Mechanics and Dhamma](#)” is more suitable for those who have at least a high-school background in physics.

The Big Picture

9. Before one embarks on a journey, one needs to know what the trip is about, and what the destination is. Furthermore, whether it is worthwhile to undertake the trip. Please be patient and first find out what Buddha Dhamma is about, the big picture, first. Please spend some time learning about the key message of the Buddha, before undertaking the journey. If one does not know where one is going (or the terrain), how can one reach the destination?
 - Buddha Dhamma describes the true nature of “this world.” But “this world” does not just mean our life as a human. “This world” is unimaginably complex. Scientists admit that they are aware of only 4% of the things in this universe; see, “[The 4 Percent Universe: Dark Matter, Dark Energy, and the Race to](#)

[Discover the Rest of Reality](#)”, by Richard Panek (2011). Also see, [“Dhamma and science”](#) section for details.

- Please be patient and scan through the main sections to get a brief idea first. Getting the “whole picture” will take time, see, [“User’s Guide to Pure Dhamma Website.”](#)

10. The next question (especially when one sees that it is indeed a complex picture) that comes to one’s mind is that “How do I know this picture is right?.” One makes that decision based on one’s own experience. But even before that, one could get an good idea by treating Buddha Dhamma as a scientific theory. That is why the section on [“Dhamma and Science”](#) is useful.

- Please pay special attention to the rebirth process. Many people wonder why rebirth bad. But they do not realize that the chance of rebirth as a human is extremely rare; see, [“How the Buddha Described the Chance of Rebirth in the Human Realm.”](#)
- One must also realize that *jāti* (birth) and *bhava* (existence in a given realm) are two different things; see, [“Bhava and Jathi – State of Existence and Births Therein.”](#)
- Most are reborn in planes below the human realm where suffering is much worse. Scientists estimate that at any given time, there are one quadrillion (1000 trillion) ants living on Earth; this means for each human, there are million ants. Compared to about 7 billion of human population, an incredible number of other living species live on this planet.
- Even on our bodies, we carry a large number of sentient beings: see, [“There are as many creatures on your body as there are people on Earth!”](#)
- The human population is insignificantly small compared to the animal population. Statistically, that gives an idea of “probability of a human birth.” We do not see the much higher populations in the other lower three realms because our minds are covered by defilement. If one develops *jhānā* and acquires *abhiññā* powers, one can see beings in some of those realms.
- **October 25, 2019:** I recently started a new subsection, [“Origin of Life,”](#) that discusses many scientific, philosophical, and religious views of the origins of life.

Is Buddhism Pessimistic?

11. Many people think Buddha Dhamma is pessimistic. The Buddha just revealed the suffering in “this world” and that it can be overcome; see, [“Does the First Noble Truth Describe only Suffering?”](#)

- He showed that there is a better type of happiness, called *nirāmisa sukha*, that one gains as one moves away from “this world” towards *Nibbāna*; see, [“Three Kinds of Happiness – What is Nirāmisa Sukha?”](#)
- This *nirāmisa sukha* increases gradually as one starts on the Noble Eightfold Path, and makes quantum jump at the first stage of *Nibbāna*, the Stream Entry (*Sotāpanna*) stage. There are three more levels, and at the final level, *Arahant*, one becomes free from “this world” (no more rebirths) and attains *Nibbāna*.
- Thus *Nibbāna* is not just a promise to be fulfilled at death; it can be experienced in this very life. I invite you to take this journey with me for a while and see for yourself. As the Buddha said, “Come and see for yourself” [Dhamma quality: *ehi-passiko*].

12. My goal is to provide at least some details of the complex world view that was provided by the Buddha, which has been muddled and distorted within the past 2500 years.

- “Our world” is much more complicated than what is grasped by our senses; see, [“The Grand Unified Theory of Dhamma.”](#)
- And our lives do not end with this one; see, [“Evidence for Rebirth.”](#)
- Those two facts constitute the basis of the true nature of existence. One cannot comprehend the message of the Buddha until one at least has some idea about this “big picture.”

- Many questions people have on concepts like *kamma*, morality, *Nibbāna*, etc, as well as philosophical questions like “why I am here?”, or “why is the world the way it is?”, will have answers within this big picture. It is a complete world view, but it is up to each individual to determine whether it makes sense. As the Buddha pointed out, the stakes are very high, and it is a good idea to take time and critically evaluate this big picture.

2.5 Foundation of Dhamma

Revised October 25, 2019

If you have not read the introductory post, "[What is Buddha Dhamma?](#)," please read and understand that first. It describes the unique aspects of Buddha Dhamma, in the sense that it is not a religion by some definitions. and the Buddha was not a savior.

A Worldview Not Known Without a Buddha

1. There are two co-existing facets of Buddha Dhamma:

- The Buddha said, "This Dhamma is unlike anything that the world has ever seen." **It needs a paradigm change to get into the "new perspective about this world view of the Buddha."** One needs to be able to put aside all preconceived notions to understand the core message.
- However, the Buddha also said, "My Dhamma is good in the beginning, good in the middle, and good at the end." **There is something to be gained from Buddha Dhamma for people who just come to know about it to those who have really grasped the core concepts.** That is why I have separated posts into three categories on the site.
- Many important terms and verses, even whole *suttā*, can be interpreted at several levels, ranging from superficial to profound meanings. As I build the site, I will try to give some examples. For example, the five precepts have much deeper meanings than the ones that are apparent. It is gratifying, and exhilarating, to see deeper meanings as one progresses. Thus, there is something to be gained at any level.

Three Levels of Practice

2. There are three basic ways to practice Dhamma:

- At the fundamental level (see, "[Moral Living and Fundamentals](#)"), one can find happiness or suffering according to the way one lives one's life. One whose actions are harmful to oneself or the others will be living in misery. Someone may seem to be living in luxury, but could be living with a stressed mind. We know about many wealthy/famous people who even committed suicide.
- At the next level, one leads a moral life and accumulates good *kamma* that could lead to a good rebirth. However, we need to keep in mind that even if one does not commit a single immoral *kamma*, the next birth could be a bad one. That is because we may have done enough immoral deeds in our previous lives; see, "[Working Towards Good Rebirths](#)."
- At the highest level, one will act to remove all evils from one's mind so that the mind becomes liberated from the body, which causes all suffering. Thus one will be working to achieve *Nibbāna*, the unconditioned, permanent happiness; see, "[Seeking Nibbāna](#)" and "[Sotāpanna Stage of Nibbāna](#)."

3. The organization of this site at three levels:

- Most people intuitively know the benefit of a moral life. Dhamma will help understand why, and even point to some possible improvements.
- When one lives a moral life and EXPERIENCES the benefit of that, one will be automatically drawn to think about whether there is a life after death. One reads about the evidence for/against this possibility. If the answer is "yes", then one can find possible ways to work towards a better life in the next birth. This is not much different from the moral behavior in above. It is just that one will learn a lot about "the world" that we live in.
- Once achieving the second stage, some may want to explore the third stage. That third stage encompasses THE message of the Buddha, that no matter where one is born in the next life, there are

NO guarantees that the lives after that will be suffering-free. That is the path to *Nibbāna*, to cease suffering permanently.

A Systematic Approach Is Required

4. Going straight to the third level will be like trying to get into high school without finishing the primary and secondary schooling.

- However, even if one has not even heard anything about Buddha Dhamma before, some may be already at the second stage, and few may even be ready for the third stage. This life did not start at this birth. Each of us have come a long way and have molded our character through countless lives in the past. Thus, even if one is unaware of it, one may already be mentally prepared to tackle the third stage. So, please look around and find a starting point that you are comfortable with; see, [“Where to Start on the Path?”](#) Only you know about yourself!
- Also, see, [“Starting on the Path Even without Belief in Rebirth”](#) and [“Is It Necessary for a Buddhist to Eliminate Sensual Desires?”](#)

Critical Thinking Is Essential

5. It is critical to realize that “knowledge” is not perfect at any level as long as one remains “in this world.” Even though he was not talking about that, the famous physicist Richard Feynman illustrates this point well in this video:

[WebLink: YOUTUBE: Feynman Magnets and Why questions](#)

- Let us take his example of someone slipping on ice. A drunk person stepping onto ice-covered surface does not even realize that it is icy and slippery. At the next level, an alert person knows that the surface is slippery, and thus will be careful. But if one needs to know why the icy-surface is slippery, then a bit of basic physics is needed to understand “why ice is slippery.” See the next post, [“The Importance of Purifying the Mind.”](#)
- It is not necessary to understand “why ice is slippery” if one has an uncontaminated mind; a sober person with a calm mind will take precautions when stepping on a icy surface. More complex situations require the cleansing of an “average mind” further. This is where Buddha Dhamma makes a difference.

A Defiled Mind Is Unable to Grasp Deep Dhamma

6. Even though humans have an innate sense of what is right and what is wrong, the human mind becomes cloudy due to the five hindrances (see, [“Key to Calming the Mind – The Five Hindrances”](#)).

- Once Dhamma Theory is understood, just that understanding leads to the clearing up of some of these hindrances; furthermore, the logic of a moral life comes naturally out the Dhamma Theory. At least some idea of the foundations of Buddha Dhamma is CRITICAL before the “practice stage.”
- If one living a moral life reads about the Dhamma Theory, he/she may be motivated to explore the second stage, i.e., to think about the validity of the process of rebirth, which is a fundamental axiom of Buddha Dhamma.
- When one LIVES a life with the belief that what one does in this life will affect how one will fare after this life, then one may realize the danger in this traversing this endless cycle of rebirths. That will lead to exploring the third stage, which is THE real message of the Buddha.

Each Person Needs to Take the Initiative

7. [No one else can steer anyone else to any meaningful mundane happiness with *nirāmisā sukha* \(in this life or next\) or to *Nibbāna*.](#)

- The Buddha said, “*Attā hi attano nātho, ko hi nātho paro siyā,*” or, “One indeed is one’s own refuge; how can others be a refuge to one?”
- Purification of the mind is the key. That means removing greed and anger and dispelling wrong views by learning Dhamma. That is the key to attain a peaceful life now, a better rebirth, or even to attain *Nibbāna*.
- Each one is in charge of one’s mind. Others can only help.
- It is entirely up to the individual. This site will help one find the right path.

Next, “[The Importance of Purifying the Mind](#)”,

2.6 The Importance of Purifying the Mind

Revised October 25, 2019

1. Analysis of a given situation always needs to be taken in the proper context. Let us again listen to Dr. Feynman's video that was in the previous post, "[Foundation of Dhamma.](#)"

[WebLink: YOUTUBE: Feynman Magnets and Why questions](#)

- It is worthwhile to discuss the case of an icy surface to look a bit deeper than even Dr. Feynman did. He merely pointed out that there is no end to the sort of questions especially when a child keeps asking: "what is the reason for that?" at every step: "Why is Aunt Mimi in the hospital?" leads to the answer, "She fell on ice." Then, "Why did she fall on ice?" leads to "Because ice is slippery", which leads to, "Why is ice (and not concrete) slippery?."

Material Phenomena – No "Ultimate" Explanation

2. Up to this point, the child (or an average adult) can understand each answer, BECAUSE, based on their life experiences, all those answers make sense. But the last question cannot be answered to the complete satisfaction of a child or an average adult, who does not have a background in physics.

- Unlike most other solids, ice has this peculiar property. When water is cooled, it expands when turning into ice.
- So, when Aunt Mimi stepped on ice, the pressure of her weight caused ice to shrink (i.e., become water). Thus a thin layer of water was formed between her shoes and ice, which causes her to slide and fall. Other solids tend to get more hardened under pressure, so there no slipping due to that particular cause.

3. Now one DOES NOT need to know that bit of physics to avoid falling on ice. What was required to prevent falling was to have a keen sense of knowing that ice is slippery and one needed to take necessary precautions.

- May be Aunt Mimi was in an agitated state of mind and hurried out of the door without realizing that there was a thin sheet of ice on the driveway. If she was drunk, that would have also lead to the same result. If she was in a calm, relaxed state of mind, she would have been more careful.
- An agitated mind can result from excess greed and hate too. Most people do not realize this, but if we think back, each of us can remember instances where we made bad decisions because of greedy or hateful state of mind. This is why getting into heated arguments can be risky. People even kill in a moment of rage.

Buddha Dhamma – Mind at the Forefront

4. The teaching of the Buddha are unique. The mind is at the forefront, not material phenomena; see, "[Manōpubbangamā Dhammā...](#)"

- Material phenomena originate with the mind. A deeper and lengthy discussion at, "[Origin of Life.](#)"
- But in order to understand those deep teachings, one's mind must be calm and clear. There are five things called hindrances that cause our minds to be clouded; see, "[Key to Calming the Mind – Five Hindrances.](#)" These have accumulated via bad habits that we have developed over countless lives; see, for example, "[The Law of Attraction, Habits \(Gathi\), and Cravings \(Āsavas\).](#)"
- Each one has a different set of bad habits, but we all have them. Yet we can function "in this world" with that "baseline" (for example not fall while walking on ice), if we do not make it worse by substance abuse, or making the mind agitated (by getting angry or overly greedy), etc.

Living a Moral Life Is Not Enough

5. Most people live their lives without resorting to extreme behaviors. That still does not allow us to see the true nature of “this world.” We are just carried by the tide without us trying to examine whether it is a good idea to “just go with the flow.”

- We do our best to make our lives better (materially) and eventually die without knowing that all those life struggles were in vain at the end.

Importance of the Rebirth Process

6. The worse thing is that the story does not end at death, but just moves on to another phase (rebirth), where we will be doing precisely the same again.

- We have gone through this unending process for innumerable lives. Most those have been much worse than our current human life. If one learns true Buddha Dhamma, one will “see” the fruitlessness of our struggles to seek happiness in a “world” that is inherently not able to provide that. Then one will try to get out of “this world” by following the Noble Eightfold Path of the Buddha and achieve permanent happiness..
- **That is the crux of the message of the Buddha.**
- We will be able to “see” the truth in the above paragraph (i.e., the true nature of “this world”) if we start cleaning our minds to get rid of the five hindrances (see, “[How to Calm the Mind](#)”).
- There is mounting evidence for rebirth; see, “[Evidence for Rebirth](#).”

We will be able to “see” the truth in the above paragraph (i.e., the true nature of “this world”), if we start cleaning our minds to get rid of the five hindrances (see, “[Key to Calming the Mind - The five Hindrances](#)”).

A Wider Worldview

7. A wider worldview is necessary for the rebirth process. We need to understand the broader view of “this world” of the Buddha. Many people plunge into “practicing Dhamma” without even having an idea of the “world view” of the Buddha. **How can one practice, if one does not know what the goal of that exercise is?** The goals could be threefold:

- i. to gain some peaceful state of mind in this life
- ii. looking at a more extended range, to make sure one will have a better life-experience also in the upcoming births,
- iii. to be released from this cycle of rebirths filled with dissatisfaction, and to seek permanent happiness, *Nibbāna*.

If the goal is one of the above three (and especially if (ii) and (iii)), then one needs to know what the complete “world view” of the Buddha was: This is the Buddha Dhamma.

- A comprehensive discussion at, “[Origin of Life](#).”

Original Teachings Are in the *Tipiṭaka*

8. It has been over 2500 years since the Buddha declared his message about the previously unknown broader world view. During that time, many distorted versions of Buddha’s teachings appeared. See, “[Historical Background](#).”

- My goal is to provide a more sensible, logical explanation based on the *Theravada Tipiṭaka* that has remained unchanged. I have pointed out that in that section.

- Throughout this website, I have shown that Buddha Dhamma is self-consistent (within the *Tipiṭaka*), and is also compatible with many findings of modern science. See, “[Buddha Dhamma: Non-Perceivability and Self-Consistency](#)” and “[Dhamma and Science](#).”

9. Since many are “just looking” and have no reason to believe the truth of this world view, I am going to present it as a theory. We will be continually testing this theory to see whether it meets the established scientific standards. I am used to that methodology as a scientist.

- Many people, especially in the earlier times, made that decision on the enhanced EXPERIENCE as they followed the path. As one moves along the Path, this EXPERIENCE starts to transcend the sensory experience or sensual pleasures. There is crucial difference between the sensory experience and the **vastly enhanced experience of a purified mind.**

True Nature of This World

10. Now, once one understands what this broader world view is, then one can see that the solution to our problem existence does not depend on trying to probe deeper into material aspects at each step in an endless loop. We just do not have enough time in this life to learn all that.

- **Instead, it is just a matter of purifying our minds.** A purified mind can “see” through one’s own **refined experience as one follows the Path.**

11. Stated succinctly, the Buddha discovered that the solution to the problem of the existence is the failure to “see” the true nature of “this world.” That true nature of this world is even more complex than what the science is finding out. See, “[Worldview of the Buddha](#).”

- But one only needs to see that “whole picture” and to realize that no matter where we are born, we will never find long lasting happiness “in this world.” That is because “this world” is inherently ever-changing and that change is unpredictable.
- Everything “in this world” is in constant flux, but we cannot “see” that because our minds are “too cloudy” or “too impure.”

Different Worldviews

12. There are religious approaches too, but I am going to stay away from that subject. By the way, Buddha Dhamma is not a religion. It is scientific and is based on cause and effect (*Paṭicca Samuppāda*.) There are no hypotheses about a Creator. The “conventional scientific method” started with the ancient Greeks, about at the same time that the Buddha lived.

- So, we have two scientific approaches. The mind-based scientific method of the Buddha, and the conventional matter-based scientific method.
- Currently, most scientists are trying to figure out how the mind works in terms of the workings of brain. However, mind is not in the brain.
- **Buddha Dhamma is entirely consistent with the material aspects of science (as we will discuss). But in Buddha Dhamma, mind precedes matter; matter is secondary.**

Three Characteristics of This World

13. Let us go back to the case of slipping on ice that was discussed in Dr. Feynman’s video. To cope with an icy surface, all we need to know is to have prior EXPERIENCE with such a scenario. We also need an alert mind (that is not distracted by alcohol, anger, lust, etc.) to apply that experience to cope with the situation. That is the mind-based approach.

- When one carefully examines the “world view” within the Buddha Dhamma, one will be able to see the problem of existence. ALL PARTS of this world are unsatisfactory, and thus one can never maintain anything to one’s liking for long times. See, “[Anicca, Dukkha, Anatta.](#)”
- **That is all one needs to really understand, not just to read about. That is the hardest; that is what requires an effort. Of course, one first needs to read and learn about this “world view.”**

Conventional Scientific Approach – The Focus Is on Material Phenomena

14. On the other hand, one could keep going down the line of questions probing deeper to the causes as to why ice is slippery, why does water expand when it is cooled, the nature of chemical bonds, about electrons and protons, about quarks that make up those protons, etc.

- It is quite true that this probing has led to many technological advances that we all enjoy today. I can write something on this site and get it to you within minutes; it is fantastic and very beneficial. But my point is that all this “probing deeper into material aspects” has not gotten us any closer to the questions on the existence. **Right now, science is approaching the limits of this probing because now we know that all matter is just energy.**
- Even though we may benefit from the technological advances, such benefits can be enjoyed only for a brief moment (about 100 years) in the *samsāric* time scale. Buddha Dhamma provides a long-term solution.

Buddha Dhamma – The Focus Is on the Mind

15. What the Buddha stated 2500 years ago was that, in the end, there is no benefit in probing deeper into material properties as far as one’s existence is concerned. All one needs to realize is that no matter what we achieve, they are all transitory, not stable. That requires purifying one’s mind.

- When one truly comprehends the three characteristics of existence (see, “[Anicca – True Meanings](#)”), and thus the unsatisfactory nature of this existence, one will not seek to gain “material things” but will endeavor to achieve *Nibbāna*. **That only requires purification of one’s mind. It does not require examining the outside material world in detail.**
- **When one goes deeper into the Buddha Dhamma, it becomes clear that mental energy is the basis of all existence.** But that is a long story. We first need to see whether the “broader world view” of the Buddha makes sense.
- In 2019, I started a new subsection, “[Origin of Life](#)” that gets into a deeper analysis.

Next, “[The Grand Unified Theory of Dhamma](#)”,.....

2.7 The Grand Unified Theory of Dhamma

Expanded May 20, 2016

- [The Grand Unified Theory of Dhammā – Introduction](#)
- [Our Two Worlds: Material and Immaterial](#)
- [31 Realms Associated with the Earth](#)
- [Gandhabba – Only in Human and Animal Realms](#)
- [Body Types in Different Realms – Importance of Manomaya Kāya](#)
- [Gandhabba Sensing the World – With and Without a Physical Body](#)
- [Nibbāna in the Big Picture](#)

2.7.1 The Grand Unified Theory of Dhammā – Introduction

Revised May 20, 2016; December 22, 2018; July 6, 2019; August 21, 2019

1. According to Buddha Dhamma, EVERYTHING in existence can be put into four ultimate realities (*paramattha*):

- Thoughts (*citta*)
- Thought qualities or mental factors (*cetasika*)
- Matter (*rūpa*)
- *Nibbāna*

These entities described in detail in the [Tables and Summaries](#) and *Abhidhamma* sections; see, “[Abhidhamma – Introduction](#).”

- All existence “in this world” described in terms of the first three. And they are all conditional; each is born due to the presence of a cause. If there is no cause, none of these three will arise. That is the fundamental cause and effect (*paṭicca samuppāda*) in Buddha Dhamma.
- Causes are numerous, but the root causes are six: greed, hate, ignorance, non-greed, non-hate, and non-ignorance.
- *Nibbāna* and those other three entities are mutually exclusive (things in this world are absent in *Nibbāna*); see, “[WebLink: suttacentral: Pathamanibbānapatisamyutta Sutta \(Ud 8.1\)](#)” (English translation: “[WebLink: suttacentral: The First Discourse about Nibbāna](#)”).

2. *Nibbāna* results with the removal of the three roots of greed, hate, ignorance (*rāgakkhoyo, dosakkhoyo, mohakkhoyo Nibbānaṃ*).

- It is necessary to cultivate the three moral roots non-greed, non-hate, and non-ignorance first while in the mundane eightfold path. That allows one to comprehend *Tilakkhaṇa* (*anicca, dukkha, anatta*) and get to the Noble Eightfold Path; see, “[Buddha Dhamma – In a Chart](#).”
- Therefore, one strives to remove greed, hate, and ignorance, which are “*san*”; see, “[What is ‘San’?](#).” That is the key to *Nibbāna*, as laid out in the Noble Eightfold Path.

3. The *citta* arise and decay at a fast rate: billions of *citta* can arise and pass away each second. But as we will see in the *Abhidhamma* section, “active thoughts” occur relatively infrequently in “fast bursts” or *citta vūthi*. *Cetasika* is “embedded” in each *citta*. There are 89 types of *cittā* in all, and 52 types of *cetasikas*; see, “[Tables and Summaries](#).” Thus the mental realm is very complicated.

- For an introduction to the mind, see “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#),” “[The Amazing Mind – Critical Role of Nāmagotta \(Memories\)](#),” and “[Do I Have “A Mind” That Is Fixed and “Mine”?](#)” in that order.
4. Matter (*rūpa*) constitutes of 28 basic units, of which only four are truly fundamental. However, the smallest indivisible unit is called a “*suddhatthaka*”; see, “[Rūpa – Generation Mechanisms](#)” and “[The Origin of Matter – Suddhatthaka](#).” These *suddhatthaka* have very long lifetimes of a *mahā kalpa* (basically the age of the universe). *suddhatthaka* are the building blocks of any “tangible thing” in this world.
- Any *saṅkhata* (*sankata* in Sinhala) in “this world” are subject to change. Each *saṅkhata* (*sankata* in Sinhala) (basically any material things) has a lifetime which could be shorter than a second or as long as billions of years (for a star for example).
5. Many people confuse “*udayavaya*” or “formation and breakup of *saṅkhata* (*sankata* in Sinhala)” means anything, including *suddhatthaka*, is perpetually in flux. They try to tie this with “impermanence” which they incorrectly translate *anicca* to be. In the contrary, *suddhatthaka* have very long lifetimes.
- It is only those “composites” such as humans, animals, trees, etc, that undergo decay and death at time scales that are discernible to us; a gold bar, does not decay for a very long time; see, “[Does any Object \(Rūpa\) Last only 17 Thought Moments?](#).”
 - For a discussion on *udayavaya ñāṇa*, see, “[Udayavaya Ñāṇa](#).”
6. The “result” of this *udayavaya* nature of all *saṅkhata* (*sankata* in Sinhala) embedded in the Three Characteristics of “this world”: *anicca*, *dukkha*, *anatta*. But *anicca* is NOT impermanence, and *anatta* is NOT “no-self”; see, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#).”
- Briefly, (i) it is not possible to find AND maintain happiness in anything in “this world.” (ii) Because of that, we become distraught and suffer, and (iii) Thus, one becomes helpless (not in control). It is essential to realize that these are characterize of not just this life, but our beginning-less rebirth process in “this wider world” of 31 realms described below.
 - Even though gold bars are virtually permanent relative to our lifetimes, we still cannot “maintain it to our satisfaction.” That is because we have to leave it (and anything else) behind when we die.
 - And all this is due to “*udayavaya*” of *saṅkhata* (*sankata* in Sinhala), all that we experience; see, “[Root Cause of Anicca – Five Stages of a Saṅkhata](#).”
7. **Therefore, there is NOTHING “in this world” that is permanent (except “*nāma gotta*“; see below).** Everything is constantly changing. That is the fundamental reason why nothing in “this world” will meet one’s expectations; see, “[Second Law of Thermodynamics is Part of Anicca!](#).”
- Some things can last longer than others, but nothing is permanent. Anything is CONDITIONAL, i.e., arises due to causes. It would not come to existence in the absence of root causes. Thus it is said that everything “in this world” is CONDITIONED.
 - The only exception is “*nāma gotta*,” which are the permanent records of a given “life-stream”; see, “[Recent Evidence for Unbroken Memory Records \(HSAM\)](#).” That is how one with *abhiññā* powers can go back and look at one’s past lives; some children can recall their past lives too. That record is permanent.
8. This world made of *citta*, *cetasika*, and *rūpa* is very complicated. Living beings can be born in 31 realms out of which we can “see” only two realms: human and animal.
- **Think about the fact that all biological matter arises from just four bases of DNA, and all computer codes based on two units, 0 and 1.** Thus, one could see how complex the mind is when there are 89 types of *cittā*, and 52 types of *cetasikas* are involved!
9. *Nibbāna*, in contrast to *citta*, *cetasika*, and *rūpa*, is UNCONDITIONED. *Nibbāna* attained by removing all root causes. Thus *Nibbāna* itself does not arise due to root causes and therefore is permanent.

- *Nibbāna* is attained at four steps or stages: Stream Entry (*Sotāpanna*), Once-Returner (*Sakadāgāmī*), Non-Returner (*Anāgāmī*), *Arahant*.
- At each stage, bad character or “*gathi*” (pronounced “*gathi*”) that could result in births in some realms are “removed”; see, “[Gati, Bhava, and Jāti](#).” For example, at the *Sotāpanna* stage, those *hateful gati* suitable for beings in *niraya*, *greedy gati* suitable for *petā* (hungry ghosts), etc. are removed.
- All causes (and all “*gati*”) removed at the *Arahant* stage. However, an *Arahant* lives as a normal human being until death and is not reborn anywhere in “this world.” Let us first examine what the Buddha meant by “this world” in the next section.

Thirty-One Planes of Existence

Here is a video from Carl Sagan to get an idea of how vast our “detectable universe” is:

[WebLink: YOUTUBE: Carl Sagan “100 Billion Galaxies each W/100 Billion Stars”](#)

The “worldview” of the Buddha is not merely about the living beings on this planet. Our Solar system is one of an infinite number of “world-systems” (planetary systems). In EACH planetary system with life (scientists have not found even one yet, but they are out there!), there are 31 “planes of existence.” As we find out below, we can “see” only two of these realms: our human realm and the animal realm. Thus our “world” is much more complicated than even the present-day science believes.

As some of you may already know, **science cannot account for 95% of the mass of the universe**, which they label “dark energy” and “dark matter”; see, “The 4 Percent Universe” by Richard Panek (2011), or do a Google search on “dark energy and dark matter.” That is why I say that the Buddha transcended “this world”; see, “[Power of the Human mind – Introduction](#).” He was able to “see” the whole of existence: see “[Godel’s Incompleteness Theorem](#)” under “[Dhamma and Science](#).”

- A being in a given plane of existence is reborn in any of the 31 realms at death. That happens instantaneously, and evidence for such a mechanism is slowly emerging from quantum mechanics; see, “[Quantum Entanglement – We are all Connected](#).”

The Buddha has described these different realms of existence in many *suttā*, and a convenient summary is at: “[The Thirty-one Planes of Existence](#).” It is not easy to describe in detail the 31 planes of existence in a short essay, and I will describe their various characteristics as needed in other posts. In the following, I will use a visual to simplify things a bit and to provide a simple description of *Nibbāna* with respect to this “wider world of existence.”

Imagine a sphere with 31 shells, with a small sphere in the middle. Thus the total volume of the big sphere is filled by the center sphere and surrounding shells. The 31 sections represent the 31 planes of existence. I emphasize that this is just a visual. The reality is different. For example, animal and human realms co-exist. Also, both time and space are infinite.

1. The inner 11 shells represent the *kāma loka*, where all five physical sense faculties are present.
 - The innermost sphere represents the *niraya* (hell) where there is non-stop suffering; next is the animal realm. There are two more realms where suffering is higher than in the human plane.
 - The human plane is the fifth shell. That is the last realm where greed, hate, and ignorance all prevail. However, this is unique in the sense that humans can also get rid of all those three and attain *Nibbāna*.
 - The sixth through eleventh shells represent the realms of the *devā* (wrongly translated as gods by many). *Devas* do not have dense bodies with flesh and blood, and thus, they do not have the physical ailments. They do not generate greedy thoughts.

2. The next 16 shells represent realms where only two physical sense faculties (eye and ear) are active, in addition to mind. These beings have very fine bodies, even less dense than *devā*. These are called *rūpa lokā*.
3. The last four shells represent the *arūpa lokā*, where beings have ultra-fine bodies and only the mind faculty; they do not have physical senses.
4. In *rūpa* and *arūpa lokā*, living beings are in *jhānic* states, and those beings do not have either greed or hate; but they still have ignorance.
 - Humans can attain these *jhānic* states, and thus humans can “temporarily live” in those *lokā*; see, [“Power of the Human Mind – Anāriya or Mundane Jhānā.”](#)
 - The 16 realms in the *rūpa loka* correspond to the four lower *jhānā*, and the four realms in the *arūpa loka* correspond to the four higher *jhānā*.
5. Now, a lot of you may be thinking, “How do I know all this is true? Is there any evidence?.” There are a lot of things we do not know about “this world.” We cannot rely on our senses or even science to verify/confirm these; see, [“Wrong Views \(Micchā Ditthi\) – A Simpler Analysis”](#) and [“Dhamma and Science.”](#)
 - Only within the last 50 years or so that science has accepted that our universe has more than a few galaxies (now science has confirmed that there are billions of galaxies!).
 - Furthermore, the newest findings (yet unconfirmed) in string theory indicate that we live in a 10-dimensional world (of course we cannot see the other spatial dimensions), not a 3-dimensional world. For a fun look at different spatial dimensions, see, [“Consciousness Dependence on Number of Dimensions.”](#)
6. Any living being (including each of us) has been in all realms in this beginning-less *samsāra*. We have been in the *niraya* (hell), and we have been at the highest (except the five pure abodes in *rūpa loka* which can be accessed only by *Anāgāmī* or Non-Returners).
7. Above the human realm, there is relatively less suffering (except at death, which is inevitable). However, unless one has achieved at least the Stream Entry (*Sotāpanna*) stage, even a living being in the highest plane can fall to any lower level. Therefore, a normal human is bound to end up in the *niraya* (hell) at some point; once there one will spend a long agonizing time there and eventually come out. Each of us has done this many times over. The cause of births in different realms is explained in terms of “*kamma* seeds”; see, [“Sāṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka”](#)).
8. So, each living being moves from one realm to another, **but spends most time in the four lower worlds**, mainly because once fallen there, it is hard to come out. **This “*samsāric* wandering” is the critical point to think about and comprehend.**
9. As one moves away from the center, the level of suffering decreases and the level of mundane pleasure increases up to the 11th realm. After that in the *rūpa* and *arūpa lokā* it is mainly the *jhānic* pleasures, not the sense pleasures; see, [“Three Kinds of Happiness – What is Nirāmisa Sukha?”](#)
10. The human realm and the animal realm are the only ones where a being is born to parents. In all other realms, living beings are born instantaneously, formed fully, within an instant (*cittakkhana*) of dying in the previous life. *That is an opapātika birth*. That is why the Buddha said, “*mano pubbaṅgamā dhamma.....*” The mind is the root cause, not matter.
 - As discussed in the *Abhidhamma* section, even the humans and animals start their “*bhava*” *opapatically* as *gandhabbā*; see, [“Manomaya Kāya.”](#) They begin building a “dense physical body” after getting into a womb.
11. A person who becomes an *Arahant* or attains *Nibbāna*, will not be reborn in any of these 31 realms. Thus, *Nibbāna* is not difficult to understand: see, [“Nibbāna – Is it Difficult to Understand?”](#), and [“What are](#)

[Rūpa? Relation to Nibbāna](#)”, and other posts (by the way, you can type a keyword in the “Search box” at top right to get a list of relevant posts).

- *Nibbāna*, in the present model, corresponds to getting out of all 31 shells, out of the big sphere; no more rebirth in any of the 31 realms. *Nibbāna* is where the permanent *sukha* or *nirāmisā sukha*, is.
- When one attains *Nibbāna* or *Arahanthood*, he/she looks just like any other human but has no attachments to any worldly things. Until death, an *Arahant* is subjected to *kamma vipāka*. When that *kammic* power is used up, he dies and is not reborn because he/she will not “willingly grasp” (or “*upādāna*”) any of the possible births.

12. Why are we trapped in the 31 realms? Because we perceive that there is happiness to be had in “this world.” We are not aware that there is much suffering in the lower four realms. Many people look at their lives and say, “where is this suffering the Buddha was talking about?”: It is the hidden suffering that is there not only in this world but mostly in the lowest four realms. The problem is that once fallen there, it is hard to come back up. In those realms – animal realm included – beings are more like robots. They do not have developed minds like humans.

- No one or no external force is keeping us in “this world” of 31 realms. Content with sense pleasures, do not see the suffering “in the long term” or even in this life as we get old. Thus **we are clinging to everything in this world like an octopus grabbing its prey with all eight legs**. And we are not aware that there is a better kind of pleasure in *Nibbāna*, in detaching from “this world”; see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#).” (Also, unless a Buddha comes along, we do not know about the 31 realms and are not aware of the suffering in the lower four realms).

13. Can we taste *Nibbānic* “pleasure”? Yes. We can feel it in increments, even below the Stream Entry (*Sotāpanna*) stage; see, “[How to Taste Nibbāna](#).” That is *nirāmisā sukha*, the “pleasure of giving up worldly things.”

- This *nirāmisā sukha* has “quantum jumps” (substantial instantaneous changes) at the four stages of *Nibbāna*: Stream Entry, Once-Returner, Non-Returner, *Arahant*. Thus when one is on the Path, one can experience *nirāmisā sukha* at varying degrees, all the way to *Nibbānic* bliss, during this very lifetime; see, at the end of “[The Four Stages in Attaining Nibbāna](#).”

14. All these 31 realms are in our solar system (*cakkavāla* or *Chakrawāta* in Sinhala). They are associated with the Earth. There are billions of such *cakkavāla* (planetary systems) in existence at all times with living beings.

- These are in clusters of the small, medium, and large “world systems” (galaxies, galaxy clusters, and superclusters?). But none is permanent. They come into being and eventually perish. Within the past 100 years or so, scientists have confirmed the existence of billions of planetary systems within each galaxy. And there are billions of such galaxies in our universe!.

We have been born in almost all of these realms in our *samsāric* journey that has no traceable beginning.

Continues the discussion in , “[Our Two Worlds: Material and Mental](#)”,

2.7.2 Our Two Worlds: Material and Immaterial

May 14, 2016; Revised November 25, 2016; September 30, 2019; October 26, 2019; January 11, 2020

Material World and Immaterial (Invisible) World

1. Our “human world” is made of two types of worlds:

- The material world that we experience with the five physical senses. This is our familiar world with living beings and inert objects. This world has sights, sounds, smells, tastes, and body touches. For example,

we experience sights via, “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*,” where *cakkhuvīññāṇa* is “seeing.” Other four sensory faculties have similar expressions; see, “[Contact Between Āyatana Leads to Vipāka Viññāna](#).”

- We can also recall our memories from the past and any future hopes/expectations that we have. Those are in the “immaterial world” that we experience with our minds. **It is also called the “*nāma loka*.”**
 - Here we use the phrase “immaterial world” to describe those *dhammā* that can only be experienced with the mind VIA, “*manañca paṭicca dhamme ca uppajjati manovīññāṇaṃ*.” Those *dhammā* includes concepts, memories, etc in addition to *kamma bija* with energy; see below.
2. **Those two worlds co-exist. It is just that we cannot “directly experience” the immaterial (invisible) world or the *nāma loka*.**
- There are many things that we cannot “see” but we know to exist. For example, we know that radio and television signals are all around us, but we cannot “see” them. We need special equipment like radios or TVs to detect those signals.
 - Those *dhammā* in the immaterial world are just like that. There is an organ (*mana indriya*) in the brain that detects those *dhammā*. Scientists are not aware of that yet. They think past memories, for example, are stored in the brain. They are not. Those memories are in that immaterial world that co-exists with the material world. Just like a radio can detect those invisible radio waves, *mana indriya* detects those “unseen” memories (and also *kamma bija* that bring *kamma vipāka*.)
 - You may ask how can all those different memories and uncountable *kamma bija* from our past lives be sorted out by the *mana indriya*. Did you realize that there are numerous radio and TV signals in a major city? Just like a radio or a TV can sort out and detect those signals, *mana indriya* can detect various types of *dhammā*.

What Are Dhammā?

3. *Dhammā* are what we perceive with the mind with the help of the *mana indriya* in the brain. They include our memories including those from past lives. Only those with *iddhi* (super-normal) powers can recall memories from past lives. However, some children can remember past lives; see, “[Evidence for Rebirth](#).”

- But *dhammā* (plural) also includes numerous *kamma bija* due to our past *kamma* (not only from the present life but from past lives.) They are not mere memories but have energies.
- **Those *dhammā* with energy (i.e., *kamma bija*) are CREATED by our minds. Specifically, they are created in *javana citta*.** For deep analysis, see, “[The Origin of Matter – Suddhatthaka](#).”
- We know from modern science that matter and energy are related by the famous equation of Einstein: $E = m \times c^2$, where E is energy, c is the speed of light, and m is mass (amount of matter.)
- Just like plant seeds can germinate and become trees, our *kamma bija* (*kamma* seeds; *bija* means “seeds”) can germinate in our minds and bring *kamma vipāka*.

Rūpa and be Dense or Fine (Subtle)

4. *Rūpa* in Buddha Dhamma cannot be translated to English as “matter” or “solid objects.” As we discussed above, our minds can make very fine *rūpa* called *dhammā*, and can also detect those *dhammā* that are in the immaterial world.

- Of course, the word “*dhamma*” refers to a theory or teaching, like in Buddha Dhamma. Only when used in the plural, *dhammā* refer to those fine *rūpā* detected with the mind (with the help of *mana indriya*.)
- Therefore, those very fine *rūpā* are called “*dhammā*” They are “*anidassanaṃ, appaṭighaṃ*,” meaning they **cannot be seen or detected by our five physical senses**; see, “[What are Dhamma? – A Deeper Analysis](#).” **They include “*kammic energies*” that can bring *vipāka* at any time.**

- The fine *rūpas* are normally not called *rūpa* but are called *dhammā* to make the distinction. ***Dhammā* are very fine *rūpa* which are at or below the *suddhaṭṭhaka* stage.** They are the *rūpa* that are grasped only by the *mana indriya* or *dhammayatana*: “*anidassanaṃ, appaṭighaṃ, dhammayatana pariyaṇa rūpaṃ.*” For a more in-depth analysis, see, “[What are Rūpa? – Dhammā are Rūpa too!](#).”

5. The five physical senses detect “dense” *rūpā* that are in the material world. Such dense *rūpā* are ABOVE the smallest “unit of matter” in Buddha Dhamma, called *suddhaṭṭhaka*. (A *suddhaṭṭhaka* is a billion times smaller than an atom in present-day science). The 28 types of *rūpa* consist of these “dense types of *rūpa*”; see, “[Rūpa \(Material Form\)](#).”

- The fine *rūpas* are normally not called *rūpa* but are called *dhammā* to make the distinction. ***Dhammā* are very fine *rūpa* which are below the *suddhaṭṭhaka* stage.** They are the *rūpa* are grasped only by the *mana indriya* or *dhammayatana*: “*anidassanaṃ, appaṭighaṃ, dhammayatana pariyaṇa rūpaṃ.*” For a more in-depth analysis, see, “[What are Rūpa? – Dhammā are Rūpa too!](#).”

All Thirty-One Realms Share the Immaterial World

6. The immaterial world is like a fine fabric that connects all living beings. It is just that we cannot “see” the immaterial world, while we can see most of the material world. [All 31 realms share the immaterial world.](#)

- In the four realms of the *Arūpa loka*, “dense matter” formed by *suddhaṭṭhaka* are absent (except for the *hadaya vatthu* of the *arūpa brahmā*). Beings in the *arūpa loka* experience only *dhamma*. They do not have any of the five physical senses and have only the mind (*hadaya vatthu*).

Click to open in pdf format: [WebLink: PDF File: Two Types of Loka](#)

- Thus the “material world” is accessible only to living beings in the *kāma loka* and *rūpa loka*.
- *Arūpa loka* means there are no “condensed *rūpa*” (like those in *kāma loka* and *rūpa loka*), but of course, *dhammā* are there (those *arūpa* beings can think and recall past events just like us).
- Furthermore, even in the *rūpa loka* only fine and subtle matter exists. There are no “solid objects” like trees. If we visit a *rūpa loka*, we may not see anything.

The World in Terms of *Dhātu*

7. Let us briefly discuss the main points depicted in the above chart. Everything in this world is made of 6 *dhātu*: *pathavi*, *āpo*, *tejo*, *vāyo*, *akāsa*, and *viññāṇa*. Five of them constitute the “material world” and the *viññāṇa dhātu* represents the “immaterial world.”

- By the way, *akāsa* is not merely “empty space.” We will discuss this later.
- The basic building block for the material world is *suddhaṭṭhaka*. Not long ago, scientists thought that atoms were the building blocks, but now they say that even those elementary particles have structure. A *suddhaṭṭhaka* is much more finer than any elementary particle.
- In the immaterial world (or the mental plane), there are the mental precursors to *suddhaṭṭhaka*. They are *dhammā*, *gati*, and *bhava*. Based on our *gati*, we make *suddhaṭṭhaka* in our *javana citta*; see, “[The Origin of Matter – Suddhatthaka](#).”

Five Physical Senses Detect Dense *Rūpa* and *Mana Indriya* Detects *Dhammā*

8. We have five sense faculties to experience the material world: eyes, ears, tongue, nose, and the body. They pass down the sense inputs to the five *pasāda rūpa* located in the *gandhabba* or the *monomaya kāya*, that overlaps our physical body); see, “[Gandhabba \(Manomaya Kāya\)](#).” By the way, *gandhabba* is not a Mahāyāna concept: “[Gandhabba State – Evidence from Tipitaka](#).”

- On the mental side, we have a *mana indriya* in the brain to sense the immaterial world; see, “[Brain – Interface between Mind and Body](#).”
- Based on those five physical sense contacts with the material world and the contacts of the *mana indriya* with the immaterial world, our thoughts arise in the *hadaya vatthu* (also located in the *gandhabba* or the *monomaya kāya*); see, “[Does any Object \(Rūpa\) Last only 17 Thought Moments?](#).”
- That is a very brief description of the chart above. One could gain more information by clicking on the links provided and by using the “Search” button. Don’t worry too much if all this does not make complete sense yet.

9. Thus it is important to understand that there are two types of *rūpa* in our human world:

- Tangible matter in the material world that we experience with the help of the five physical senses.
- Then there are unseen (*anidassana*), intangible (*appaṭiṅgha*) *rūpa* such as thoughts, perceptions, plans, memories. They are *dhammā*, *mano rūpa*, *gati*, *bhava*, *nāma gatta*. It is the *mana indriya* in the brain that helps detect subtle *rūpa*.
- Both types of *rūpa* are eventually detected and experienced by the mind (*hadaya vatthu*). The *hadaya vatthu* is not located in the brain but in the body of *gandhabba* and **overlaps** the physical heart region of the physical body; see, “[Gandhabba \(Manomaya Kāya\)](#).”
- Comprehending this “wider picture” may need a little bit of effort. The world is complex and most of the complexity is associated with the mind. The seat of the mind is not in the brain but in the fine body (*manomaya kāya*) of the *gandhabba*.

The Dream World

10. Another part of our immaterial world is the dream world.

- When we dream, we “see” people and material objects. But we cannot say where those are located. They do not have a physical location; they are in the immaterial plane. **And we do not “see” those dreams with our eyes, but with the *mana indriya*.**
- When we sleep, our five physical senses do not function. But the *mana indriya* in the brain does. Scientists do confirm that parts of our brains are active during sleep.

- What is experienced in *Arūpa Loka* is somewhat similar to seeing dreams. Of course, one has the ability to contemplate in the *arūpa loka*. However, one is unable to read or listen. Therefore, one cannot learn *Tilakkhaṇa* (*anicca, dukkha, anatta*) from a Noble Person. Thus, one is unable to attain the *Sotāpanna* stage of *Nibbāna* in the *arūpa loka*. But if one had attained the *Sotāpanna* stage prior to being born there, one is able to meditate and attain higher stages of *Nibbāna*.

Dense *Rūpa* for “Rough” Sensory Contacts

11. There is another way to look at our sense experiences. Living beings are attached to this world because they expect to gain pleasures from this world. Such pleasures are obtained by making contact with *rūpa*. Those *rūpa* come at various densities.

- Bodily pleasures are achieved by the strongest contacts (touch). Then come taste, smell, vision, sounds, becoming less dense in that order.
- The softest contact is via *dhamma*. This is our immaterial world; we think, plan for the future, remember things from the past, etc: We do this all the time, and we can do it anywhere. Another way to say this is to say that we engage in *mano, vacī, and kāya saṅkhāra*.
- Thus, contacts by the *mana indriya* with *dhammā* in the *mano loka* constitute a significant portion of sense experience. That involves *mano rūpa* (*dhamma, gati, bhava, nāma gotta*) in the mind plane or the immaterial world.

12. The way a living being experiences and enjoys (or suffers) sense contacts is different in the three main categories of existence: *kāma loka, rūpa loka, and arūpa loka*.

- Most “rough” or “*olārika*” sense contacts are available only in the *kāma loka*. Even here, they are roughest in the *niraya* (the lowest realm) and in general reduces in “roughness” as moving up to the human realm, the fifth. The 6 *deva* realms are significantly “softer” than the human realm; *deva* bodies are much more finer (like that of a *gandhabba*) and a normal human cannot see them.
- The roughest sense contacts (touch, taste, and smell) are absent in the *rūpa loka*. Only visual and sound contacts are available for the *brahmā* in the 16 *rūpa loka* realms, in addition to the mind.
- Those *arūpi brahmā* in the 4 *arūpa loka* realms have only the mind, with which they experience only the finest *rūpa* (*dhamma*) that are below the *suddhatṭhaka* stage.
- Those *brahmā* in both *rūpi* and *arūpi loka* have seen the perils of “*kāma assāda*” that are available in the *kāma loka*. They had enjoyed *jhānic* pleasures as humans and value those more than the “rough” sense pleasures. **They have given up the craving for those “rough” sense pleasures that are available via touch, taste, and smell.**

Stronger Cravings Match “Denser Sensory Contacts”

13. We can get an idea of such “soft” and “rough” sense contacts with the following example. Suppose someone (a grandmother is a good example) watching her grandchild laughing and dancing around having a good time.

- At first, she may be watching from a distance and enjoying the sight of the little baby having fun.
- Then she goes and hugs the child. It is not enough to just watch from a distance; she needs to touch the child.
- If the child keeps on wiggling and having a good time, the grandmother may start kissing the child. In some cases, the grandmother may start tightening the hold on the child, even without realizing it and may make the child cry out in pain.
- This last scenario is an example of how the craving for extreme sense pleasures can instead lead to suffering. Of course, it is the **craving for *olārika* sense pleasures** that leads to most suffering.

- But suffering is there even in the *rūpi* and *arūpi* realms. Even at the level of *arūpi brahmā* — where the attachment is only to pleasures of the softest of the *rūpa* (*dhamma*) —, there is inevitable suffering at the end when they have to give up that existence and come back down to the human realm.

Less Suffering in “Less-Dense” Realms

14. Therefore, the level of inevitable suffering goes hand in hand with the “denseness” of the sensory contact.
- Pains, aches, and illnesses are there only in the lowest 5 realms (including the human realm) where there are dense physical bodies. In the higher realms, those are absent. This is the price even the humans pay for being able to experience “rough contact pleasures” such as a body massage, sex, eating, and smelling.
 - We humans in the *kāma loka* like to enjoy close and “rough” sense pleasures. In addition, most times, just enjoying sense pleasures is not enough; we like to “own” those things that provide sense pleasures. For example, people like to “own” vacation homes; it is not enough to rent a house in that location just for the visit.
 - This tendency to “own” pleasurable things also go down in higher realms. There are fewer material things to “own” in *brahma lokas*, especially in the *arūpi brahma* realms.

Connection to *Magga Phala*

15. As one attains higher stages of *Nibbāna*, craving for “rough” sense pleasures, as well as the desire to “own” things go down.
- A *Sotāpanna* has only “seen” the perils of *kāma assāda*; he/she still enjoys them. Thus, he/she will still be born in the *kāma loka* realms. but not in the *apāyā*.
 - A *Sakadāgāmī* may still enjoy “*kāma assāda*,” but has no desire to “own” those things that provide pleasures. It is enough to live in a nice rented house, and there is no desire to own a nice house. In fact, a *Sakadāgāmī* can clearly see the burden of “owning things.” A *Sakadāgāmī* will be born only in realms above the human realm.
 - An *Anāgāmī* has no special interest in enjoying *kāma assāda*. He/she eats to quench the hunger (but will eat delicious foods when offered). An *Anāgāmī* will never give priority to any sense pleasure over the “pleasure of Dhamma” (of course, Dhamma here means Buddha Dhamma). He/she will be born in the *rūpa* realms reserved for the *Anāgāmīs* upon death, and will not be reborn in *kāma loka*.
 - An *Arahant* has no desire for even *jhānic* pleasures and will not be born anywhere in the 31 realms upon death.

16. Each habitable planetary system (*cakkavāla*) has all 31 realms of existence, even though we can only see two realms (human and animal) in ours.

This is discussed next: “[31 Realms Associated with the Earth](#)”,

2.7.3 31 Realms Associated with the Earth

May 20, 2016; revised November 29, 2018; April 25, 2019; August 27, 2019; March 10, 2020

1. There are many things in “this world” that we cannot see, hear, etc. (i.e., perceive with our six senses). Scientists admit that they cannot account for 96% of the “stuff” that makes our universe. See, “The 4 Percent Universe: Dark Matter, Dark Energy, and the Race to Discover the Rest of Reality”, by Richard Panek (2011). For more information, Google “dark energy, dark matter.”

- Many forms of energy that apparently do not have significant mass (or weight) but exist out there in the world.

- A good example is the fact that we are unaware of the huge amounts of “information” that surrounds us. There are hundreds and thousands of radio and television signals in a major city. **We cannot see or hear any of those programs (i.e., we are unaware of their existence) without having a radio or a television “tuned” to the correct frequency.**
- In the same way, we are unaware of the existence of 29 of the 31 realms centered around the Earth. Living beings in some of those realms live side-by-side by us, but we are unaware of them. **Most of these beings have bodies “more like energy forms” than solid bodies.**
- With better detection technologies, we may be able to communicate with some of these living beings with subtle bodies in the future. Of course, those who develop *abhiññā* powers can also see some of them. We will get back to this issue below, but let us first discuss the relative locations of the 31 realms.

2. Buddha Dhamma says there are 31 realms associated with each habitable planetary system (*cakkavāla*). And there are an infinite number of them in the universe (this latter fact has been confirmed by science).

- Modern science is gradually confirming this broader world view explained by the Buddha 2500 years ago; see, “[Dhamma and Science – Introduction](#).” Only a few hundred years ago, Western world accepted a universe that centered around the Earth with stars “embedded in a celestial sphere”; see, “[WebLink: WIKI: Celestial spheres](#).”

3. In the post, “[The Grand Unified Theory of Dhamma](#),” we described a model that consisted of 31 concentric “shells.” The actuality is pretty much close to that analogy, with some additional features. I have compiled a summary of the 31 realms in the table “[31 Realms of Existence](#).”

- The sphere with 31 concentric shells overlaps the Earth. The lowest realm, *niraya* (or hell) is located deep inside the Earth.
- The next four realms (*preta*, *asura*, animal, and human) are closer to the Earth’s surface. There are some *preta apāyā* deep inside the Earth, but some *pretās* live on the surface. *Asurās* also live on the surface, but mostly in remote locations such as the ocean and isolated mountains. Both cannot see both *pretās* and *asurās*.
- There are many *suttā* in the *Tipiṭaka* that describe those three realms (*niraya*, *preta*, *asura*) in detail. We will discuss it in the future. The *Peta Vatthu* in the *Khuddaka Nikāya* of the *Tipiṭaka* describes *pretās* as well as *gandhabbā*.

4. Of course, humans and animals live on the surface of the Earth. *Gandhabbā* only belong to either the human and animal *bhava*. Those *gandhabbā* are waiting for a suitable womb to be born with human (or animal) bodies; see the section: [Gandhabba \(Manomaya Kāya\)](#).

- Thus we say that those *gandhabbā* are in *para loka* (nether world). Even though they live alongside us, we cannot see their very subtle bodies: “[Hidden World of the Gandhabba: Netherworld \(Para Loka\)](#).”
- So, our world is much more complicated than we think.

5. Then come the six realms for the *devas*. The lowest of the six deva realms are again located on the surface of the Earth. Those *devas* are called *Bhummatta devas*, and they belong to the *Cātummahārājika deva* realm; see, “[31 Realms of Existence](#).” They live mostly in their residences (*deva vimāna*) based on trees. Of course, we cannot see them or their “residences.”

- The higher *deva* realms extend out from the Earth.
- The 16 *rūpa* realms extend even higher above the Earth.
- The four *arūpa loka* realms are located even further from the Earth.
- All these realms are concentric with Earth’s center. As the Earth spins around its axis and rotates around the Sun, all 31 domains move along with the Earth, just like the human realm does.
- Buddha has named these various realms in several key *suttā*, for example, in [WebLink: suttacentral: Dhammacappavattana Sutta \(SN 56.11\)](#) and [WebLink: suttacentral: Mahā Samaya Sutta \(DN 20\)](#).

6. In general, beings in higher realms can “see” those in the lower ones, but not the other way around (if come “face-to-face”). For example, *devas* can see us, but cannot see the *rūpi* or *arūpi brahmā*. *Rūpi brahmā* can see *devas*, but cannot see the *arūpi brahmā*.

- From the previous post, “[Our Two Worlds: Material and Immaterial](#),” we know that there are only traces of “real” matter (*suddhaṭṭhaka*) in the *arūpa* realms. Thus beings in the other 27 realms cannot “see” those *arūpi brahmā*.
- When one develops *abhiññā* powers, one is said to be able “see” successively higher realms. Of course, one needs to be able to get into the fourth *jhāna* to develop such *abhiññā* powers. Eventually, when one develops the eighth *jhāna* (and can get into *attha samāpatti*), one could be able to see many of the 31 realms.

7. Now let us look at “things” in this world from a different perspective. A fundamental premise of Buddha Dhamma is the following. “Energy” is embedded in **spin** (*bramana* in Pāli; *bramana* or බ්‍රමණ in Sinhala), and in **rotation** (*paribbramana* in Pāli; *paribbramana* or පරිබ්‍රමණ in Sinhala).

- The smallest unit of matter, a *suddhaṭṭhaka*, does not stay still. Depending on its rotation or spin (*bramana*) and its rotation around something else (*paribbramana*), other “modes of energy” and “types of *rūpa*” arise.
- It is easy to visualize by considering the motions of the Earth. We all know that the Earth rotates (*paribbhramana*) around the Sun, and it takes a year to complete one revolution around the Sun.
- While doing that the Earth rotates around its North-South axis; this is the spinning (*bramana*). It takes a day for the Earth to complete one such spin.
- Here is an excellent video that discusses this universal feature:

[WebLink: YOUTUBE: Rotation in Space - Professor Carolin Crawford](#)

8. There are an infinite number of such *cakkavāla* (star systems or a collection of planets revolving around a star) in our universe. Each planet in such a “star system” undergoes spin around its own axis and rotation around the star. Science has confirmed this within the past hundred years.

- Each of those *cakkavāla* may have “Earth-like” planets with their own 31 realms.
- A cluster of thousand such *cakkavāla* is called a “*cūlanikā lokadhātu*” or a “small world system.” Thousand of such systems is a “*majjhimikā lokadhātu*” or a “medium world system.” A cluster of thousand of such systems is a “*mahāsahassī lokadhātu*” or a “large world system”; see, “[WebLink: suttacentral: Cūlanikā Sutta \(AN 3.80\)](#).”
- Also see, “[WebLink: suttacentral: Pathamakosala Sutta \(AN 10.29\)](#)” and “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”

9. Scientists have also confirmed that all elementary particles (the smallest particles scientists can detect) have spin. Furthermore, in an atom, the electrons can be said to “rotate” around the nucleus, in a crude analogy with the Earth rotating around the Sun.

- Then our Solar system rotates too. The next higher conglomerates (for example, galaxies) also undergo rotation. Because of these rotations, all these structures tend to flatten out. For instance, in our Solar system, all the planets are on a plane. In the same way, all galaxies in a galaxy cluster in a flattened disk.
- Therefore, even though we see a very calm starry night sky, things out there are in constant motion. Furthermore, there are violent explosions of stars (supernova) that occur a billion times a year in the visible universe.
- That is why the realities out there are much more different than what we perceive with our very crude sense faculties. All the atoms and molecules in our bodies are in constant motion, not to mention the spins and rotations of uncountable *suddhaṭṭhaka* that constitute them.
- Thus everything around us is in constant flux. Our senses are just not capable of detecting them.

10. Modern science has also enabled us to see more and more of living beings around us. For example, the Western world was not aware of the existence of microscopic living beings until the advent of the microscope by Leeuwenhoek in the late 17th century: [WebLink: WIKI: Antonie van Leeuwenhoek](#).

- Now we know that there are billions of living beings in the body of a human being. See, “[There are as many creatures on your body as there are people on Earth!](#).”
- Hopefully, new technologies will enable us to “see” many living beings belonging to the *preta*, *asura*, and *deva* realms — as well as *gandhabbā* — in the future.
- Even though there are some claims of detection of horrible sounds from the *niraya* deep inside the Earth, they have not been confirmed; see, “[Does the Hell \(Niraya\) Exist?](#).”

11. As one moves up to higher realms, attachments to the material aspects decreases. That is why living beings in higher realms have less number of sense faculties.

- In the *kāma loka*, one has all six sense faculties. Even there, the higher *deva* realms have “less strong sense contacts” with less dense bodies that we cannot see.
- *Rūpi brahmā* have much more delicate “bodies” compared to *kāma loka devas*. They do not have touch, taste, and smell sensations.
- “Matter” is very subtle in higher *rūpa loka* and *arūpa loka* realms. Therefore, even in the final destruction of a *cakkavāla* (in a supernova explosion), the realms above the *Abhassara* realm (realm #17) are not destroyed. That is why the lifetimes of those *Brahmā* are much longer than a single *mahā kappa* (an eon or the age of the universe); see, “[31 Realms of Existence](#).”

12. Now we can understand why we cannot see the other 29 realms.

- In the higher realms around the Earth, living beings (and their environments) have very little solid matter. That is why we cannot see them or their habitats.
- The four *arūpa realms* are mostly devoid of even the smallest unit of matter (*suddhaṭṭhaka*). Realms in the *rūpa loka* and even in the *deva* realms of the *kāma loka* are made of very fine matter that we cannot see.
- The beings in the *niraya* (hell) have very dense bodies subjected to various forms of torture; of course, that realm is located deep inside the Earth.

13. We are used to the perception of “solid tangible physical bodies” of humans and animals. That is called the “*ghana saññā*.” However, those physical bodies are mostly “empty.” That is because atoms, which are the basic building blocks, are mostly empty.

- Furthermore, our physical bodies all start with a single cell (zygote) in a mother’s womb. One needs a microscope to see a single cell. A *gandhabba* (which is even smaller than a cell) merges with that zygote that was formed by the union of a mother and a father. See, “[Buddhist Explanations of Conception, Abortion, and Contraception](#).”
- Before entering the womb, that *gandhabba* had a fine body similar to that of a *rupi brahma*. Then that cell grows by taking in food first from the mother and then by eating once coming out of the womb. Our heavy physical bodies result from the accumulation of inert matter (by eating food).
- And as we discussed in “[Bhava and Jāti – States of Existence and Births](#),” a human *bhava* may not end at the physical death of the solid body that lives about 100 years. A human *bhava* may last thousands of years, and that life-stream continues its existence in many “physical bodies” with the *gandhabba* as the basis.

14. For example, in rebirth stories, the physical bodies in successive births are different, even though there may be some similarities; see, “[Evidence for Rebirth](#).” In between consecutive lives, the life-stream continues just in the form its core, the *gandhabba*.

- The solid body of a few hundred pounds that we consider to be “me,” is just a shell. When the *gandhabba* leaves the body — either at death or sometimes during a heart operation (see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#)”), it has no attributes of life.
- That is an excellent way to contemplate the “*ghana saññā*” or to realize that our physical bodies are mostly dead matter; **a shell that the *gandhabba* resides in**. If a person of 300 pounds loses 100 pounds of weight, really that person “loses” one-third of his/her identity? It is the same person because the *gandhabba* is the same.
- All beings in the 31 realms eventually have “mental bodies” that are very fine comparable to that of a *gandhabba*. Even with our most excellent microscopes, we cannot see their ultra-fine “bodies.”

15. The above picture gives us a perspective on how foolish we are to focus on material wealth, titles, etc. for at most 100 years in this life. By living a moral life, and by doing meritorious deeds we can make a much bigger “investment” in the future. That is by accruing merits that could lead to rebirths in the *Deva* or *Brahma deva* worlds where there is much less suffering and no physical illnesses.

- But even in those higher realms, death is inevitable no matter how long the lifetimes are. Most of all, there is no escape from the possibility of future births in the lowest four realms. Thus *Nibbāna* is the only permanent solution.

16. Following is a fairly good video describing the general features of the 31 realms:

Next in the series, “[Gandhabba – Only in Human and Animal Realms](#)”,

2.7.4 Gandhabba – Only in Human and Animal Realms

June 4, 2016; revised October 3, 2019

Difference Between *Bhava* (Existence) and *Jāti* (Births)

1. There are many posts on the critical concept of *gandhabba* not only in this series, but scattered throughout the site, and especially in the section, “[Gandhabba \(Manomaya Kaya\)](#).” These posts discuss the details on how a living being goes through the rebirth process without having an unchanging “soul.” But they maintain (ever-changing) personal characteristics or *gati* (pronounced “gathi”) between two adjacent lives.

- It all started with a post on this basic concept at the start of this website: “[What Reincarnates? – Concept of a Lifestream](#).”
- While it is good to get an idea of the nature of all living beings in the 31 realms, it is not necessary to learn those in detail. I want to provide a complete and inter-consistent picture per original teachings of the Buddha in this section.
- However, the concept of the *gandhabba* is essential to understand **how we are reborn with physically different bodies — multiple times — in a single human existence (human *bhava*.)** That human *bhava* may last thousands of years; see, “[Bhava and Jāti – States of Existence and Births Therein](#).” Unlike *devas* and *Brahmā* who are born just once, we live and die to be reborn human multiple times before switching to another realm.

This World Has Thirty-One Realms of Existence

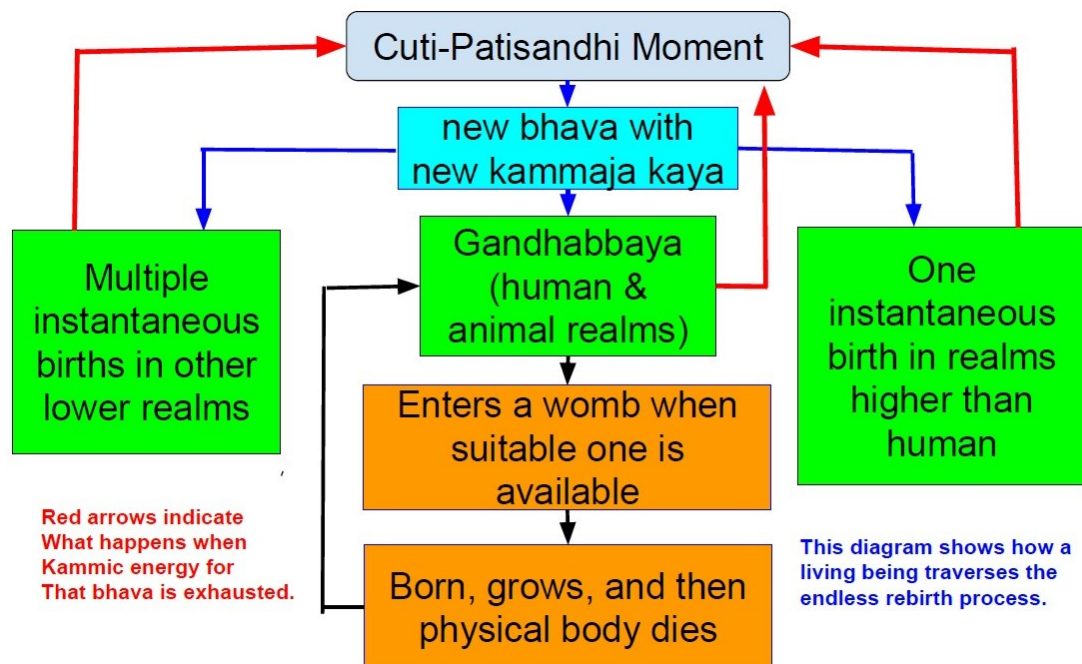

2. We will first review two significant aspects of the 31 realms. Then we will discuss the concept of a *gandhabba* (which applies only to human and animal realms) in more detail.

- **First is that the transition from one existence (*bhava*) to another is ALWAYS instantaneous**; it happens at the *cuti-patisandhi* moment (“*cuti*” pronounced “chuthi”); see, “[Patisandhi Citta – How the Next Life is Determined According to Gathi](#)” and “[Cuti-Patisandhi – An Abhidhamma Description](#).”

- The second aspect is that in the 20 higher-lying realms, those beings (Brahmā) weigh less than a billionth of an atom in modern science!
- All beings with dense bodies are in the 11 realms of the *kāma loka*. Even there, the six *deva* realms have less-dense bodies compared to humans.

Death of Physical Body Different From the End of an Existence

3. The following chart shows the major features of what happens at the *cuti-paṭisandhi* moment. That is when a living being makes a transition from one *bhava* (existence) to another, say from being a human to a Brahma.

Click to open the pdf file: [WebLink: PDF File: Births in Different Realms](#)

- Without exception, at each such *cuti-paṭisandhi* moment, a new *kammaja kāya* is generated by the *kammic* energy fueling a new existence. That *kammaja kāya* ALWAYS has a *hadaya vatthu*. That is the seat of the mind (the quality of which depends on the realm).

Types of “Bodies” In Different Realms

4. Thus it is essential to realize that the critical thing that happens at the *cuti-paṭisandhi* moment is the generation of the unbelievably small *kammaja kāya*, which contains the blueprint for the new existence. At that point, the mechanism of “birth” can be roughly divided into three categories, as shown in the chart.

- The Brahmā in the *rūpi* and *arūpi* realms (top 20 realms) are instantaneously born with very little else other than several *suddhatṭhaka*-size “material elements.” Their body features discussed below. The main feature here is that they are spontaneously born in those realms and live very long times there until death. Then another *cuti-paṭisandhi* moment takes that being to a new *bhava*.
- The only difference in the six *deva* realms (in *kāma loka*) compared to the Brahmā is that they do have well-defined physical bodies (*karaja kāya*) like us. However, those bodies are much less dense, and we are not able to see them even if they stand right in front of us.
- A *deva* is born with the body equivalent of a 16-year-old, and their food is a drink called *amurtha*. Devas have all five sense faculties like us and are said to the optimum sense pleasures available in *kāma loka*. They also live that one life until death and then switch to a new existence (*bhava*) at the *cuti-paṭisandhi* moment.

- That completes the discussion on the green box to the right.

5. What happens in the green box to the left is a bit more complicated. That is because each realm in the *apayas* (lowest four realms) is somewhat different. We will discuss the animal realm together with the human realm (middlebox) below. Let us first discuss briefly the lowest three realms indicated by the green box on the left.

- The lowest is the *niraya* (hell), where beings are born with full dense bodies like ours instantaneously. They undergo ceaseless cutting, burning, and various other forms of torture. They die innumerable times, only to be reborn promptly. Only when the *kammic* energy for that existence is exhausted (usually after millions of years) that they encounter the next *cuti-paṭisandhi* moment.
- Beings in the preta (*peta*) realm also are born instantaneously and can have subtle or dense bodies. The distinguishing feature there is suffering due to hunger.
- Beings in the *asura* realm are beings with massive, very inactive bodies. They are also born instantaneously and live those miserable lives until the next *cuti-paṭisandhi* moment.

Kammaja Kāya (Gandhabba) Can Last Thousands of Years With Many Human Rebirths

6. That brings us to the middle green box, which represents the human and animal realms. A little bit more complicated process takes place here. Here also, a being with a subtle (energy) body is produced at the *cuti-paṭisandhi* moment, just like in the *rūpa loka* realms. It is called a *gandhabba*.

- A *gandhabba* has the basic *thrija kāya* of a *rūpi Brahma*: *kammaja kāya*, *cittaja kāya*, and *utuja kāya*, which we will discuss in detail below. Besides, a *gandhabba* may acquire a very fine *karaja kāya* (physical body) by inhaling the aroma. Thus a *gandhabba* is denser than a *rūpi Brahma*. It has a “body” more like that of a *deva* in density.
- A *gandhabba* could be in that state for many years until a suitable womb becomes available. A suitable womb (more precisely the mental state of the mother at that time) must match the *gati* of the *gandhabba*. The evolution of the *gandhabba* in the womb is discussed in, “What does Buddha Dhamma (Buddhism) say about Birth Control?.” Then it is born as a new baby, grows, and eventually, that physical body also dies. If there is more *kammic* energy left for the *bhava*, then the *gandhabba* leaves that dead body and waits for another womb. That process continues until the *bhava* energy is exhausted, and then it goes through the *cuti-paṭisandhi* moment to receive a new *bhava*; see the chart above.
- In addition to going into a womb, (in some animal species), *gandhabba* enters an egg inside a female animal. Upon growing to a full animal and death, *gandhabba* comes out and waits for another egg. It is the same procedure as above.

Physical Body is Just a Temporary Shelter

7. One of the main benefits of learning about the *gandhabba* is in helping remove the wrong view that “I am my physical body.”

- In the contrary, a physical body is a temporary shelter that the *gandhabba* uses to experience the much-coveted “sense pleasures.” In particular, smelling, eating, and touch (most of all, sex) require a dense human body. Unfortunately, a human body can last only about 100 years. Even that body is in the “decay mode” after 50 years or so. Thus, those sense pleasures start diminishing, and eventually, that body dies.
- Then the *gandhabba* comes out of that dead body and waits for a suitable womb. If and when it gets into a womb, the new physical body is influenced by the new parents. Thus the new body can be very different from that in the previous birth. Even during this same “human *bhava*,” our human bodies may look very different from one birth to another (as confirmed by rebirth stories).

- Of course, the *gandhabba* does not stay the same either. The only things that can be called “personal” to that *gandhabba* are its *gati*, and those evolve too.
- That is a brief explanation of the above chart.

***Brahma* “Bodies” Have Only a Trace of Matter**

8. As we mentioned in #4 above, most lifeforms in the 31 realms have unbelievably tiny physical bodies. They are more like “energy bodies.” Any individual being in the 16 *rūpa loka* realms and the four *arūpa loka* realms weighs less than a billionth of an atom! They may be thought more as energy packets.

- In case it was not clear from previous posts, we recall that an *arūpa loka Brahma* has a *kammaja kāya* consisting of just a *vatthu dasaka*.
- *Rupa loka Brahmā* have *vatthu dasaka* (seat of the mind) and two *pasāda rūpa* for seeing and hearing. They also have *kāya dasaka* and *bhava dasaka*. Thus their *kammaja kāya* has five *suddhaṭṭhaka*-size elements. A *rūpa loka Brahma* also has a *cittaja kāya* (thought stream) and a *utuja kāya* (very fine).
- Thus any of these *Brahmā* cannot be seen with the most sophisticated microscope we have today.
- More details in, “[Body Types in 31 Realms – Importance of Manomaya Kaya.](#)” A *manomaya kāya*, when referred to the human and animal realms, is the same as *gandhabba*.

Kammaja Kāya* of a Human *Gandhabba

9. Let us again summarize the make up of a *kammaja kāya* of a human *gandhabba*. It has a *hadaya vatthu* (consisting of a *vatthu dasaka*), *bhava dasaka*, and *kāya dasaka*, and four *pasāda rūpa* (*cakkhu dasaka*, *sota dasaka*, *gandha dasaka*, *jivaha dasaka*).

- This *kammaja kāya* consists of 7 *suddhaṭṭhaka* in different *bramana* (spin) and *paribramana* (rotation) modes. That is how they become *dasaka* (units of ten or decads); see, “[31 Realms Associated with the Earth.](#)”
- Six of these define the sense faculties of the *gandhabba*: *vatthu dasaka* is the mind, and *kāya*, *cakkhu*, *sota*, *gandha*, and *jivaha dasaka* are the “fine senses” that correspond to body, eyes, ears, nose, and tongue in the physical body. *Gandhabba* can interact with the external world directly via them when outside the physical body. It can smell and inhale aroma giving rise to a very fine and subtle material body. However, that body is not solid enough to physically touch anything or to eat.
- The seventh *dasaka* is *bhava dasaka*, which — together with the *kāya dasaka* — defines what kind of a physical body it will start building once inside a womb. For example, *bhava dasaka* determines sex.

10. As soon as the *kammaja kāya* forms at the *cuti-paṭisandhi* moment, the mind becomes active. The thought stream (*cittaja kāya*) starts, and the mind will be mostly in the *bhavaṅga* state. Simultaneously, an *utuja kāya* forms by the *suddhaṭṭhaka* generated by both the *kammaja kāya* and *cittaja kāya*.

- Thus immediately after the *cuti-paṭisandhi* moment, *gandhabba* has three “bodies” or *thrija kāya*. However, the *cittaja kāya* is all mental, and both the *kammaja kāya* and *utuja kāya* are very fine. They are more like “energy bodies.”
- Soon after this “initial formation,” the *gandhabba* can build a “subtle, misty” body (*karaja kāya*) by inhaling aroma (from fruits, trees, etc.). Still, an average human cannot see it, since it is not “dense enough.” However, some people (especially those with *abhiññā* powers) can see “sufficiently solidified” *gandhabbas*.

The desire for a Dense Human Body

11. But this *gandhabba* is continuously under stress because it is unable to enjoy the most coveted sense pleasures of those with dense human bodies, i.e., eating and sex. It can see people enjoying these sense pleasures and is very much frustrated not being able to acquire a “real physical body.” Some can stay in this state for many, many years if a suitable womb does not become available.

- In some cases, they may spend the *kammic* energy for the human *bhava* and undergo another *cuti-paṭisandhi* moment without inheriting a human body. That is why one is indebted to one's parents, no matter how bad they may be.

12. The story of the *gandhabba* gets more interesting (and complicated) after it goes through the first birth as an average human and dying. The *gandhabba* that comes out of that dead body is, of course, different from the original *gandhabba*. Its *kammaja kāya* has changed due to whatever *abhisankhāra* that the human cultivated. But the *kammic* energy for the human *bhava* does not change; if it had 1000 years worth of *kammic* energy at the *cuti-paṭisandhi* moment, that would deplete with time.

- Of course, there is no *cuti-paṭisandhi* moment when a human dies with extra *kammic* energy for the human *bhava*. Death is the death of the physical body. The *gandhabba* comes out of that dead body awaits a new womb; see the above chart. Thus all three components of the *thrija kāya* continue after the “death of the human.”

New Physical Body Incorporates Characteristics of New Parents Too

13. Let us consider some important features of this *gandhabba* that comes out of that dead body after its birth as a human.

- The *kammaja kāya* still has a copy of the previous physical body. However, when it starts a new physical body in the new womb, it takes some features from the new parents too. Thus the new physical body is a trade-off between those three influences. It may keep some distinguishing features (birthmarks or gunshot wounds, for example, as we have encountered in rebirth accounts. But it will acquire new features also from the new parents (skin color, size, etc.).
- The *gandhabba* that comes of the dead body is just a “misty, fine version” of the person at death. Most times, they come out with imprints of the clothes they were wearing at death and may look just like that (in a ghostly, misty form) until going into a new womb. My teacher *Thero* has seen *gandhabbas* of people who died hundreds of years ago “wearing” those old costumes. Of course, they are not real physical clothes.

14. Since the *cittaja kāya* also continues, their thought streams continue. So, if someone dies in an accident, he may not realize that he is dead for a little while. If he died from a gunshot instantly, the *gandhabba* comes out of and will be looking at the dead body trying to figure out what happened. He may wish to go home and finds himself instantly at home. And he will try to shout to others, but of course, they don't hear. He may try to touch them, but he cannot. It takes seven days for a *gandhabba* to comprehend what happened entirely and to resign to his/her new life.

- That is also why children can recall their past life. But just like we start forgetting things from years ago, those children start forgetting about the previous life when they grow older. Furthermore, it is harder to remember from past life compared to this life.
- Another point is that most such rebirth accounts are from people who died while young in accidents. Those *gandhabbas* who come out of the bodies of people dying at old age are not likely to remember that life. That is because even during that life, they might have lost their memories.

Next in the series, “[Body Types in 31 Realms – Importance of Manomaya Kaya](#)”,

2.7.5 Body Types in 31 Realms – Importance of Manomaya Kāya

Published before October 23, 2015; revised May 31, 2016; major revision Dec. 1, 2018

1. There are three main categories that the 31 realms can be divided into: *kāma loka*, *rūpa loka*, and *arūpa loka*.
 - Living beings in the *kāma loka* are in 11 realms: four lowest realms (*apāyā*), human realm and six *devā* realms.
 - *Rūpa loka* has 16 *rūpāvacara brahma* realms. A “*rūpāvacara brahma*” means a *brahma* in the *rūpa loka*.
 - *Arūpa loka* has 4 *arūpāvacara brahma* realms.
2. Different sets of sense faculties are associated with beings in those three types of “*loka*.”
 - Those in the *arūpa loka* have just the mind. Therefore, the only *rūpa* (or matter) associated with an *arūpi brahma* is the *hadaya vatthu*, which is of the size of the smallest unit of matter in Buddha Dhamma called a *suddhātthaka*.
 - That *suddhātthaka* is much smaller than an atom in modern science. So, we cannot see these beings. It is important to note that cannot even see many microscopic beings that live among us, like those in drinking water. Just because we cannot see them, it does mean they do not exist.
3. Those in the *rūpa loka* have just sense faculties: eyes, ears, and the mind.
 - But the eyes and ears are not solid and tangible things like the physical eyes and ears that we or the animals have.
 - Seeing and hearing for those *rūpāvacara brahmā* happen with the aid of *cakkhu* and *sota pasāda rūpa*. Each of those two are also of the size of a *suddhātthaka*.
 - Therefore, even for a *rūpāvacara brahma*, the whole “body” is made of basically three *suddhātthaka*, unimaginably small. **This collection of *hadaya vatthu* and the two *pasāda rūpa* is called the *manomaya kāya* of that *brahma*.**
 - **An *arūpāvacara brahma* has a *manomaya kāya* that has only a *hadaya vatthu*.**
 - Therefore, even with the aid of the most sophisticated microscope it will be impossible see any of *brahmā* in those 20 realms.
4. In fact ALL BEINGS have the **basic sense faculties** of the size of a *suddhātthaka* each. **The basic sensing unit for a *kāmāvacara* being has six units for seeing, hearing, tasting, smelling, touch, and thinking.**
 - Any *kāmāvacara* being (including humans, animals, and *devās*) has a “fine body” with those unseen five sense faculties called “*pasāda rūpa*”: *cakkhu pasāda rūpa* for seeing, *sota pasāda rūpa* for hearing, *ghāṇa pasāda rūpa* for tasting, *jivhā pasāda rūpa* for smelling, *kāya pasāda rūpa* for touching.
 - **These five sets of *pasāda rūpa* and the *hadaya vatthu* make up the “mental body” or “*manomaya kāya*” of a *kāmāvacara* living being.**
 - It is easy to see that a *rūpāvacara brahma* has a *manomaya kāya* with just two *pasāda rūpa* (for seeing and hearing) and a *hadaya vatthu* for thinking. An *arūpāvacara brahma* has just the *hadaya vatthu* for the mind.
5. The physical (solid) eyes, ears, nose, tongue, and the body of a *kāmāvacara* being (human or animal) just act as “sensing equipment” to collect external signals.
 - Then the brain processes those signals and send to the *manomaya kāya* that is inside this solid body. I will explain this in the next post.
 - This is why even for humans, the essence is in the *manomaya kāya*. The solid body is just an inert shell that is “powered by” the *manomaya kāya*. **When the *manomaya kāya* comes out at death, the physical body becomes inert just like a log of wood.**

6. This “*manomaya kāya*” is the one that takes hold of the zygote in a womb at conception. That zygote is made by the union of the mother and father; see, “[Buddhist Explanations of Conception, Abortion, and Contraception.](#)”

- A *gandhabba* that descends to the womb originally has a bit more denser body than this *manomaya kāya*. In addition to the “*manomaya kāya*”, it has a “material body” too, but that is still too fine to be seen by us. When the *gandhabba* enters the womb, that “material body” is shed and only the “very fine *manomaya kāya*” combines with the zygote.
- As discussed in that post, that zygote is the cell formed by the union of the mother and father and is well understood in modern science. Of course the modern science is not aware of the *manomaya kāya* of the *gandhabba* that merges with the zygote.
- **In fact, scientists do not know how that zygote becomes a “new life”, a brand new living being.**
- *Gandhabba* is discussed at: “[Mental Body – Gandhabba.](#)”

7. Now that zygote with the *manomaya kāya*, starts dividing into more and more new cells. The energy needed for making those new cells comes from the mother (i.e., from the food eaten by the mother).

- That initial single cell grows to a baby of the size that comes out of the womb after nine months. Now, we can see that the critical *manomaya kāya* — with those basic sensing faculties — is negligibly small compared to that baby.
- Of course once outside the womb, the baby grows by eating food and eventually grows to an adult. **Virtually all solid matter in an adult is just lifeless matter.** This is why a person can lose one-third or even half of the body mass, and still remain the “same person.”

8. **Therefore, there is not much in the heavy solid body that really defines that “person.” All the key aspects are in the mental body or the *manomaya kāya*.**

- That solid body is made alive by the *manomaya kāya* with the *hadaya vatthu* and the five *pasāda rūpa*. Hard to believe but that is what happens.
- At the death of the physical body, that *manomaya kāya* comes out. When it comes out, it also has a very fine “physical type” body that resembles the body of the person that just dies. That combined fine body is really “ghost-like” and can be seen by even some people. That is what is called *gandhabba* and it now waits for another suitable body to enter, if there more *kammic* energy for the “human *bhava*” is left.

9. **For *brahmā* in the *rūpa loka***, three units of matter are formed by *kammic* energy at the moment of birth; because it has three units of matter such an initial “body” formed at the moment of *paṭisandhi* is called a “*thrija kāya*.” The three units are *kammaja kāya*, *cittaja kāya*, and the *utuja kāya*. The *utuja kāya* is a very fine physical body, and those “*rūpi brahmas*” can “see” and “hear.”

- Those *rūpi brahmā* have a *kammaja kāya* consisting of *kāya dasaka*, *vatthu dasaka*, *bhava dasaka*, and also two *pasāda rūpa* for seeing and hearing: *cakkhu pasāda* and *sota pasāda*. These *pasāda rūpa* are also essentially *suddhāṭṭhaka*, with different modes of spin/rotation (“*bramana*”/“*paribramana*”); see, “[31 Realms Associated with the Earth.](#)”
- Even though “*kāya*” is translated as “body”, the only “physical body” of a *rūpi brahma* is the “*utuja kāya*.” Thus a “*kāya*” does not mean a “physical body.”

10. The physical bodies (*utuja kāya*) of those *rūpi brahmā* are much finer compared to those of the *devas*, and thus *devas* cannot see those *rūpi brahmā* just like we cannot see the *devas*.

- The *brahmā* (and also *devas*) can “see” without the aid of light and “hear” without the having air to transmit sound waves; their “physical bodies” do not have “eyes” and “ears” like ours. Thus they can “see” and “hear” over great distances. And they can be anywhere they wish within a short time.

- The closest analogy of how their “vision” works is how we “see” dreams; we don’t need eyes to see dreams. The *brahmā* just “see” (perceive may be a better word). These things will become clear in the future, as we get into details.

11. A basic rule of thumb is that beings in lower realms, in general, cannot see the beings in the higher realms; humans of course have the capability to develop *abhiññā* powers and “see” those beings in higher realms.

- In the *kāma loka*, the highest realms are of course the *deva* realms. *Devas* are also born instantaneously (*opapātika* births) just like the two kinds of *brahmā*. However, *devas* have a fourth types of a body called the “*karaja kāya*,” which is like of our physical body. And just like us they need to consume food (“*amurtha*”) regularly to sustain their “*karaja kāya*” which is also called the “*āhāraja kāya*” since it requires food (“*āhāra*”) for sustenance.
- Thus *devas* have “four bodies” or “*chatuja kāya*,” i.e., the four bodies of “*kammaja kāya*,” *cittaja kāya*, *utuja kāya*, and the “*karaja kāya*.” are collectively called a “*chatuja kāya*.”
- But *devas* (and *brahmā*) do not get sick. They just die and disappear when the *kammic* energy for that existence runs out.

12. When humans and animals are first “born” into that existence, they are also instantly formed in a form close to that of a *brahma*. This is the *manomaya kāya* generated by *kammic* energy at the *cuti-paṭisandhi* moment.

- That *manomaya kāya* is condensed into the *gandhabba* state that we have talked about in previous essays; see, “[Gandhabba \(Manomaya Kāya\) – Introduction](#)” and follow-up posts.
- For example, if a man dies and if he still has *kammic* energy for the “human *bhava*” left, then he will be reborn as human; otherwise, he will latch onto another “*bhava*” depending on his past strong *kamma vipāka*. For example, his next “*bhava*” could be as a deer.
- If he is reborn a human, a “human *gandhabba*” will emerge from the dead body; if he is to be born a deer, then a “deer *gandhabba*” will emerge from the dead body.

13. The body of a human or animal *gandhabba* is also a “*chatuja kāya*” like that of a *deva*; but it is finer than the body of a *deva*. A *gandhabba* can only inhale odours (“*gandha*” + “*abba*”) as food, and thus the name.

- **Just like *brahmā* or *devas*, a *gandhabba* can “see” and “hear” over great distances.** A *gandhabba* does not have a solid body to support physical eyes or ears. (Of course we have hard time imagining that. But it can be compared to what happens when we see a dream. There is no need for light to see dreams; we see dreams when it is pitch black at night; we do not “see” dreams with our eyes).
- Even though one could think that it would be nice to be a *gandhabba*, a human *gandhabba* is in perpetual stress (agony may be a better word). A *gandhabba* cannot enjoy any kind of “contact” sense pleasure since the body is so fine; cannot taste food, or grasp anything. **Most of all, a *gandhabba* suffers mentally because he/she can “see” normal humans “enjoying life” eating tasty foods, enjoying sex, etc.**

14. Of course, *brahmā* and *devas* can also “see” humans engaging in those activities (if they want to), but they do not have any liking (*upādāna*) for such “coarse pleasures.” Their mental state is much higher, just like a human who has developed *abhiññā* powers. They are actually said to be repulsed by human bodies. Just like we do not “miss out” on the activities of worms, they are not interested in human activities. It all depends on the mindset associated with the particular *bhava*.

- But a *gandhabba* has received the human or animal “*bhava*” because he/she very much DESIRES “coarse sense pleasures”: “*upādāna paccayā bhava*.”

15. Thus we can see that we get these solid, dense bodies BECAUSE that is what we so eagerly desired. As long as we have craving for these “coarse sense pleasures” we will be born in the *kāma loka*. Even though

the *devas* are also in the *kāma loka*, their desires are not as “coarse.” They do not need to “tightly grab things” to get the enjoyment.

- *Brahmā* in *rūpa loka* are even further removed from “coarse sense pleasures”; they do not have a desire for tastes, smells, or body touches. Seeing and hearing is enough for them.
- *Brahmā* in *arūpa loka* do not even have a desire for sights and sounds. Mind pleasures are enough for them, and the presence of matter is minimal in the *arūpa loka*.

16. What we do not realize is that having “dense body” also leads to various ailments, and also subject to decay as it gets old.

- Furthermore, now the ability to “see” and “hear” over great distances is gone. Now the *gandhabba* is trapped inside a heavy, solid, body shell and has to “see” and “hear” through the “physical doors” that are attached to that body. That is the sacrifice made to be able to have the “grabbing experience”, to be able to enjoy coarse foods and sexual pleasures, etc.
- The Buddha called the physical body (“*karaja kāya*” or “*āhāraja kāya*”) a “cave” or a “shell” that a *gandhabba* uses temporarily. It has a certain lifetime and during that time it grows, decays, and finally dies. Then the *gandhabba* needs to find another body. Especially in the *kāma loka*, we just build a “new shell” when the old one dies, but also spend a lot of time as a frustrated *gandhabba* waiting for a suitable womb to start building a new body.

17. Thus it should be clear now that it is only the “physical body” that decays and finally dies; a human *gandhabba* will keep evolving and will find a “new body” similar to the old one IF the *kammic* energy for that *bhava* is not exhausted. Otherwise, the human *gandhabba* will just disappear (like a *deva* or *brahma* does at death), and a new animal *gandhabba* will emerge if the new *bhava* is that of an animal; see, [“*Bhava and Jāti – States of Existence and Births Therein.*”](#)

- Thus we can see now that even for the humans and animals, “the basis” is a fine body of a *gandhabba* that has a fine body like a *rūpi brahma* (and less dense than the body of a *deva*). The “solid body” starts growing inside the mother’s womb and continues after the “birth” as a baby by eating food.

18. The nature uses this physical body or the “shell” to impart *kamma vipāka* as well. We need to constantly clean this body all the time, and also need to take care of vital body parts. These are part of the “physical suffering” that we do not think twice about.

- And of course, we can come down with not only minor colds and headaches, but also major ailments like heart problems or cancer; this is also part of the “physical suffering.” Both kinds of “physical suffering” arise due to the physical body.
- However, these hardships are “masked” by our sense of “anticipated future happiness” by acquiring such and such “pleasurable things.”

19. When some of those “hopes and dreams” do not materialize, we get severely distraught. Most of the suicides are committed under such circumstances, and this “mental suffering” could be worse than the “physical suffering” discussed above. It helps to read about WHY even famous, rich people commit suicide; that is also a form of meditation. We need to understand how suffering arises, in order to feel the full impact and be motivated to stop FUTURE suffering from arising.

- However, the main goal of this essay is to point out the true nature of the physical body. Even though we are enamored (especially at young age) about the appearance of our bodies, as we get old we can see and experience the suffering that we endure because of this temporary “shell” that we value so much. It is there only for about 100 years, and then we will move onto another one; this is what we have been doing for countless eons.

20. The other point, which is even more important, is the special nature of the human body that has a well-developed brain; see, [“*Brain – Interface between Mind and Body.*”](#) That is what makes a human life special,

because that is what allows us to understand the message of the Buddha and be able to get release from the suffering-filled round of rebirth.

- How the bodies of the hell beings are prepared by *kammic* energy to just impart *kamma vipāka* (they are unable to do *abhisankhāra*, especially *puññābhisankhāra*) It is discussed in “[Does the Hell \(Niraya\) Exist?](#).”

Next in the series: [Gandhabba Sensing the World – With and Without a Physical Body](#)

2.7.6 Gandhabba Sensing the World – With and Without a Physical Body

June 10, 2016; revised January 24, 2020

***Gandhabba* Is The “Mental Body” of a Human**

1. Physical bodies are just temporary shelters for the *gandhabba*.

- In a single “human *bhava*” or the “existence as a human”, *gandhabba* could be using one to hundreds of different physical bodies; see, “[Bhava and Jāti – States of Existence and Births Therein](#)” and “[Gandhabba – Only in Human and Animal Realms](#).”
- Such “human births” could be anywhere on Earth. However, they normally take place in a specific region based on one’s *gati*. Most rebirths occur within a given country, as seen from rebirth accounts. See, “[Evidence for Rebirth](#).”
- In between two consecutive “physical lives,” the *gandhabba* is in the nether world or “*paralowa*”; see, “[Hidden World of the Gandhabba: Netherworld \(Para Loka\)](#).”

Racial and Cultural Differences Are Meaningless

2. Thus all racial and cultural divisions that people fight daily are meaningless; those identities change as the *gandhabba* “switches physical bodies” from life to life. In principle, a Chinese may be born as a “black person” in Africa or as a “white person” in Europe in the next life. However, adjacent lives are generally in similar geographic locations because of the condition for matching “*gati*.” Still, in the next “human *bhava*” — which may come after billions of years — one’s *gati* would have changed drastically.

- As more and more people start grasping the Buddha Dhamma, most of the violence in the world could reduce. Along that line, one who may be born to poverty in this life may be born a wealthy person in the very next life (if enough merits accrued), and vice versa. All these struggles we go through are only for an insignificantly short time in the scale of *samsāra* (cycle of rebirths) or even compared to the duration of a single human *bhava* (which could last many hundreds of years). Thus it is wise to “invest in the long term.”

Sensory Faculties Are in *Gandhabba*

3. The physical body shields the *gandhabba*’s sensory system, while the *gandhabba* is inside the physical body. The *gandhabba* has *lā* sensory faculties. But now those “external sensory signals” need to come through eyes, ears, nose, tongue, body, and *mana indriya* in the brain; see below.

- When outside a physical body (and waiting for a suitable womb), the *gandhabba* cannot eat or physically touch tangible things, because it does not have a “dense body.” But it can see, hear. Furthermore, it uses a very sophisticated sensory system (not light or sound waves) to see and here, which we will also discuss briefly below.

Difference Between *Indriya* and *Āyatana*

4. The Buddha analyzed the world in many different ways. Here we present another such analysis, since it can provide different insights about the *gandhabba*.

- We have six sense faculties (*indriya* or *āyatana*) to sense six different types of “matter” (*rūpa*) in our world. There is a subtle connection between our six sense faculties and the types of “matter” in our world. We will discuss this connection.
- By the way, *indriya* and *āyatana* have totally different meanings. For example, eyes are *indriya* when we just happen to see things. Still, they BECOME *āyatana* when they are used for pleasure, i.e., to deliberately look at mind-pleasing things to enjoy them. Only an *Arahant* uses his/her sense faculties are *indriya* all the time.
- This is another way to define and analyze our world. Everything in our world belongs to those 12 *āyatana*. Sometimes they are called 6 *ajjhata āyatana* (or internal *āyatana* or sense faculties) and 6 *bahiddha āyatana* (things in the external world that we sense).

5. These are listed in Pāli in #6 of the post, “[What are Dhamma? – A Deeper Analysis.](#)” A simpler account is at, “[What are Rūpa? – Dhammā are Rūpa too!](#).”

- We touch the densest material (*phoṭṭhabba*) out there with our bodies (*kāya*).
- Next, less dense tastes (*rasa*) with our tongues (*jivhā*).
- We smell with next less dense minute particles with smell (*gandha*) with our noses (*ghāṇa*).
- Hear uses vibrations propagating through air (*sadda*) with our ears (*sota*).
- We see with the aid of photons propagating through space (*varna*) with our eyes (*cakkhu*).
- Our consciousness arises via *dhammā* in the mind plane with our minds (*mano*).

***Dhammā* Are Just Energy**

6. The last type of *rūpa* (*dhamma*) are not solid matter, but just energy; see, “[What are Dhamma? – A Deeper Analysis.](#)”

- Thus *dhammā* do not occupy space (*ākāsa*) and are in the mind plane or the mental world.
- All other five types of *rūpa* occupy space and are in the material world.
- ***So rūpa cannot be translated as “matter.”*** See, “[Our Two Worlds: Material and Immaterial.](#)” That is why sometimes it is better use the Pāli words.

How Does a *Gandhabba* “See” While Inside a Physical Body?

7. It is actually through a complicated process that a *gandhabba* sees, hears, etc while being inside a physical body (*karaja kāya*) such as ours. I have explained the basics in “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises.](#)” “[Gandhabba \(Manomaya Kāya\)- Introduction.](#)” and many other posts.

- **However, it is much easier to grasp how a *gandhabba* sees and hears while being outside the physical body.** Even though most of us may not have had such “out-of-body experiences,” it can happen, especially during heart operations; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\).](#)” Some people have a natural ability to do that on their own, as discussed in that post.
- Thus, let us discuss how a stand-alone *gandhabba* sees and hears while being outside a physical body; **this is not only simpler but provides us with some insights.**

The Sensory Faculties In *Gandhabba*

8. The real sense faculties produced by *kammic* energy at the *cuti-paṭisandhi* moment are in the *kammaja kāya* of the *gandhabba*. The subtle body of the *gandhabba* has three components, as we have discussed and will again discuss below. **The sense faculties are all in the *kammaja kāya*.**

- The *kammaja kāya* of the *gandhabba* has seven essential elements called *dasaka*, meaning entities with ten items (decads). They arise from *suddhātṭhaka*, which is composed of eight “items,” as we have discussed; see, “[The Origin of Matter – Suddhatṭhaka](#).” Different types of *dasaka* are formed just by incorporating one mode of spin (*bramana*) and one mode of rotation (*paribramana*); see, “[31 Realms Associated with the Earth](#).”
- One added component gives rise to *jīvita rūpa* (pronounced “jeevitha roopa”); this is likely to come from the spin (*bramana*) mode, but I cannot be sure. This *jīvita rūpa* is in all these other types of *dasaka* because that is what “maintains life.” Thus different types of *dasaka* (see below) arise due to different modes of rotation (*paribramana*). [*jīvita* :[nt.] life; span of life.]

9. Now we can list the different types of 7 *dasaka* (or decades) that are in the *kammaja kāya* of the *gandhabba*.

- *Vatthu dasaka* (mind; also called *hadaya vatthu*): *suddhātṭhaka* + *jīvita rūpa* + *hadaya rūpa*
- *Kāya dasaka* (body plan): *suddhātṭhaka* + *jīvita rūpa* + *kāya pasāda rūpa*
- *Cakkhu dasaka* (eye *indriya*): *suddhātṭhaka* + *jīvita rūpa* + *cakkhu pasāda rūpa*
- *Sota dasaka* (ear *indriya*): *suddhātṭhaka* + *jīvita rūpa* + *sota pasāda rūpa*
- *Ghana dasaka* (nose *indriya*): *suddhātṭhaka* + *jīvita rūpa* + *ghāṇa pasāda rūpa*
- *Jivha dasaka* (ear *indriya*): *suddhātṭhaka* + *jīvita rūpa* + *jivhā pasāda rūpa*
- *Bhava dasaka* (*bhava*): *suddhātṭhaka* + *jīvita rūpa* + *itthi* **or** *purisa rūpa* (determines female/male nature of the body)

Again, it is to be noted that *jīvita rūpa*, *itthi* and *purisa rūpa*, and the five *pasāda rūpa* are not “physical matter”, but modes of energy in spin and vibration of *suddhātṭhaka*.

- That is analogous to different electron orbitals giving rise to different types of molecules in chemistry.

Components of the *Gandhabba* or “Mental Body”

10. A *gandhabba* is born with those 7 *dasaka* (i.e., *kammaja kāya*) and **immediately the mind starts generating *citta* (thoughts)**, which are *vipāka citta* and for the most part in the *bhavaṅga*. Thus now the *gandhabba* has a *cittaja kāya* as well. **Note that *cittaja kāya* is all MENTAL.**

- Almost at the same time, both the *kammaja kāya* and the *cittaja kāya* start producing more *suddhātṭhaka* giving rise to the *utuja kāya*. This *utuja kāya* is similar to the “aura” that surrounds our bodies; **in fact, that aura is part of our own (i.e., *gandhabba*’s) *utuja kāya***. Some people claim to be able to see “body aura”; those with *abhiññā* powers can see them. Also, see “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#).”
- Thus the best way to visualize a *gandhabba* is to imagine a human with just the “body aura” (without the physical body). Since *kammaja kāya* consists of only a few *suddhātṭhaka*, and the *cittaja kāya* is just thoughts, something like an “aura body” is all a *gandhabba* has.
- Right now, this subtle body of my *gandhabba* overlaps my own physical body. All parts of my physical body are in the subtle body of my *gandhabba* (which is a blueprint for my physical body).
- While waiting for a physical body, this *gandhabba* can inhale scents from fruits, vegetables, etc. and acquire a subtle physical body (*karaja kāya*) too. Then it expands to the grown size of a human. But of course, it is only an “energy body” that we cannot see.

- Thus a free-standing *gandhabba* may have four types of “bodies”: *kammaja kāya*, *cittaja kāya*, *utuja kāya*, and *karaja kāya*.

Gandhabba Outside the Physical Body

11. This *gandhabba* can see over vast distances and hear over large distances and travel instantly to remote destinations. Sight does not need light, and sound does not require vibrations in the air. It is equivalent to seeing and hearing with *abhiññā* powers. That is how those with *abhiññā* skills can see through walls and hear over vast distances; they have control over their *gandhabba kāya* or the *manomaya kāya*.

- However, since it has only a very fine body (like air), it cannot taste food or touch solid things. The *gandhabba* needs to be inside a dense human body to be able to touch, taste, or smell. That is why it has to take possession of a zygote in a womb and build a physical body.
- See, “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” and “[Cloning and Gandhabba](#).”

12. When a *gandhabba* builds a physical body (inside a womb), those seven *dasaka* — each of which are the “size of a *suddhātṭhaka*” — determine all critical functions. Furthermore, *gandhabba* has the blueprint for that physical body.

- The physical body (*karaja kāya*) of the human grow according to *kāya dasaka* and *bhava dasaka*, but also takes into account physical qualities mother and father (eye and skin color, as well as size are good examples).
- When inside a physical body, the external signals that come to the physical body via eyes, ears, nose, tongue, body touches, are converted in the brain into the form that can be sensed by the 5 *pasāda rūpa* (they are really the 5 *dasaka* with corresponding *pasāda rūpa*). This somewhat complicated process is discussed in “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises](#),” “[Gandhabba \(Manomaya Kāya\)- Introduction](#),” among others.

Why Are Some Born With Deformed Body Parts?

13. The blueprint in the *kammaja kāya* of the *gandhabba* has all the details of physical organs as well. When the *utuja kāya* is formed, it has this blueprint. Some people are born without limbs because past *kamma vipāka* taken into account by the *kammaja kāya*.

- Some are born with physical eyes, but without the *cakkhu pasāda* in the *kammaja kāya*, so they will never be able to see; they are the ones who are born blind. Similarly, there are born deaf, and sometimes both. That is because the *gandhabba* in them does not have the *cakkhu pasāda* and *sota pasāda*.
- However, in some cases, the *gandhabba* may have the *cakkhu pasāda*, but during birth, the optical nerves in the brain may get damaged. In such cases, it may be possible to have vision restored.

Gandhabba Is The Blueprint For the Physical Body

14. It is, in fact, the *gandhabba* that controls the otherwise inert physical body. There is a carbon copy of all parts of the physical body (including the nervous system) in the fine *utuja kāya* of the *gandhabba*.

- What is the mechanism used by the *gandhabba* to control the inert physical body? The easiest way to visualize this is to consider the following. If we put some iron dust on a piece of paper and move a magnet below the paper, we can see that those dust particles move along as one moves the magnet. If we move the magnet in a circle, dust particles move along that circle. In the same way, when the *gandhabba* moves its *utuja kāya*, the physical body follows that motion.
- Thus, what the *gandhabba* does is similar to what the magnet did in the above analogy. But it is a bit more complicated, because moving heavy body parts need much more energy. That is where the physical

nervous system comes into play. The brain, in synchronization with the mind (*hadaya vatthu*), sends signals to muscles to move. **Energy to move those muscles come from the food we eat.**

- Both the “magnetic nervous system” or the “ray system” of the *gandhabba* AND the physical nervous system based on the brain are needed to move the physical body.

Two Nervous Systems

15. Thus, there are two nervous systems in the body: one is the physical nervous system known to modern science. The other is the very subtle nervous system (ray system) of the *gandhabba*.

- When they go “out-of-sync,” our physical bodies start aching. Even in a perfectly healthy human, it is not possible to maintain a given posture for too long.
- *Kamma vipāka* can shift the nervous system (ray system) of the *gandhabba* away from that of the physical body. Then body muscles need to move to the new equilibrium position, causing us discomfort or even pain.
- We will discuss more important consequences that are experienced during meditation in future posts.

Physical Body Comes With a Price

16. The physical body can impart various other forms of suffering as well. It can develop diseases such as cancer in various parts of the body; body parts can break or injured.

- The effects that we have discussed above may be the reason that we humans (and animals) have this complicated mechanism involving repeated births in a single *bhava* using a *gandhabba* and multiple physical bodies.
- The *Brahmā* and even *Devas* do not suffer physical ailments; their subtle bodies can also last longer times, and do not need to be “regenerated” via this mechanism using an intermediary *gandhabba*.
- Another important aspect is that our physical brain slows down the generation of *javana citta* in a given time. The “signal processing” in the brain the brain is much slower than the very high-speed generation of *cittā* in the *hadaya vatthu*; see, “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises.](#)” Important implications of this will also be discussed later.

2.7.7 Nibbāna in the Big Picture

July 8, 2016

Here we will discuss how one can get an idea about *Nibbāna* within the Grand Unified Theory of Dhamma.

1. In the posts in this series I described the wider world of 31 realms according to the Buddha, and why ALL living beings have been just meandering through these 31 realms from beginning-less time. We can summarize the results succinctly as follows:

- The lowest four realms (*apāyā*) are where all beings suffer the most during the beginning-less rebirth process. Unfortunately, this is where each and every living being spends the most time in the long run. **This is the real suffering that the Buddha tried to convey.**
- The fifth realm or the human realm is where one is most likely to be able to grasp Buddha Dhamma and become a *Sotāpanna*. This is the only realm where one can experience (or at least see) both suffering and sense enjoyments.
- A *deva* in the next six realms is also capable of becoming a *Sotāpanna*, but due to the absence of much visible suffering, incentive to strive for the *Sotāpanna* stage is almost non-existent (think about a healthy, wealthy teenager!).
- The same is true for *rupi* and *arupi brahmā*, who enjoy *jhānic* pleasures in the higher realms.

2. Thus one can clearly see that as one proceeds to higher realms, suffering is reduced in stages. The worst sufferings are in the lowest 4 realms (*apāyā*), and we can see animal suffering if we pay attention and think especially about the animals in the wild. **There are no “old animals” in the wild.** As soon as they get a bit slow due to old age they are killed for food by stronger animals.

- **One could try to stay away from the *apāyā* (in future births) by avoiding from immoral acts. But the problem with just that approach is that we have almost certainly done such immoral acts in our previous lives,** and thus are likely to have accumulated enough *kamma* seeds to be born many times over in the *apāyā*.
- **Thus the key is to cleanse our minds of the worst defilements, which will prevent *apāyagāmī citta* from arising at the *cuti-paṭisandhi* moment;** see, “[Akusala Citta – How a Sotāpanna Avoids Apāyagami Citta.](#)” Such thoughts cannot just be suppressed; they arise in a billionth of a second. Thus the practical way to do that is to reduce cravings (*āsavas*) in STAGES; see, “[The Way to Nibbāna – Removal of Āsavas,](#)” and “[Āsava, Anusaya, and Gati \(Gathi\).](#)”
- As mentioned above, the first stage of the cleansing process is possible mainly in the human and *deva* realms, but the incentive to do that is virtually non-existent in the *deva* realms.

2. Another subtle reason for the uniqueness of the human realm is that one's future destiny is MOSTLY determined while in the human realm. Humans are the unique species who can access all 89 types of *citta* that are present in all 31 realms. Moreover, they are the ones who can generate the all important *javana citta* that can produce *kamma bīja* (seeds) for future existences (*bhava*).

- Here is a simile that hopefully will convey this idea: **Human realm can be compared to a training school, and the other realms can be compared to where one gets employment depending on one's qualifications upon completing the training.**
- Those who did not make progress and caused problems for others are born in the *apāyā* and will have to suffer the consequences. Another way to say this is to say that they cultivated *saṅkhāra* (or *gathi* or habits) suitable for a being in the *apāyā*: cruel and hateful *gathi* correspond to the lowest realm of *niraya* (hell); extreme greed correspond to the *pretha* realm; those who are lazy and depend on others are born in the *asura* realm; those with different combinations of those bad *gathi* are born in the animal realm.
- Once born in the *apāyā*, they are more like programmed machines. They just suffer their fate without having any way to even lessen the suffering (in contrast, humans are capable of devising ways to make their lives better).

3. This last point is worth discussing a bit more.

As we can see, animals just live their lives like robots. They are incapable of sorting out moral from immoral and also from being able to come up with ways to improve their lives. Birds have been building the same kind of nests for billions of years. Ants have been building the same types of anthills, and the dolphins (who are one of the animals with higher intelligence) have been the same way over billions of years.

- In the same way, *rupi* or *arupi brahmā* also just live their serene lives until the lifetime is exhausted. It is like a nice vacation. Then they come back to the human realm and start over.
- It is mostly humans and *devas* who are CAPABLE of forging their own future, but the *devas* enjoy so much sense pleasure, they have no incentive to think about *Nibbāna*.

4. Continuing that analogy, those who do well in the training school can go to one of the 27 higher realms. those who cultivate *rūpa jhānā* are born in the 16 *rūpa* realms. Those who cultivate higher *jhānā* are born in the 4 *arūpa* realms. The *brahmā* in those 20 realms are like beings who are on a nice, very long vacation. They just live happy lives in *jhānic* bliss.

- Of course there are some *brahmā* who had attained a *magga phala* in either human or a *deva* realm previously and they can proceed to higher stages. And there are a few *rūpa* realms reserved for the *Anāgāmīs* only.

- But in general, the *rupi* and *arupi brahmā* are the ones who graduated with high qualifications and thus get to enjoy the fruits of those efforts for long times. Yet, when they come back to the human realm, they may be born into environments where they could go in a wrong path and fail next time around and thus could be born in the *apāyā*.

5. Those who want to enjoy sense pleasures without causing problems to others work on it by doing meritorious deeds and are qualified to be born in the 6 *deva* realms (according to the level of merits accrued). They may not have even known about Buddha Dhamma, but knew moral from immoral.

- Life in a *deva* realm is more like a vacations to a “pleasure island.” Those who cultivate “*deva gathi*” (high moral character, but with attachment to sense pleasures) are qualified for those realms. *Devas* are more like humans but with fine bodies that do not age (until close to death), and are not subject to diseases. Thus if one really wants to “enjoy sense pleasures” one should focus more on doing good deeds instead of just focusing on making a lot money in this life, because this human life is so short and the human body is subjected to diseases and old age problems.
- However, *devas* can build up extreme attachment to sense pleasures and are capable of tailoring their future lives down to the animal realm. After their “pleasurable vacation” they could even come back to the animal realm instead of the human realm.

6. Finally, those who cultivate “human *gathi*” are born in the human realm. They are more like *deva gathi*, but generally have more attachment to sense pleasures at close contact.

- However, those humans who may have cultivated high moral values AND had some inkling of the *sansāric* suffering (via exposure to Buddha Dhamma) are like to come back to the human realm to “complete their training.” That is because that is what they desired (*upādāna*).
- That is a very simple outline of the existence in the 31 realms.

7. Now, if one has attained the *Sotāpanna* stage in the human realm, then his/her number of possible destinations become less and better. In #7 and #8, we will discuss how a *Sotāpanna* goes through higher realms as he/she approaches *Arahanthood*.

- Of course that person will never be born in the *apāyā*, because those “*apāya gathi*” have been permanently removed via *Sammā Diṭṭhi* with a grasp of the *anicca* nature.
- A *Sotāpanna* starts to comprehend the futility and even dangers of sense pleasures (*kāma rāga*).
- Then one first loses the desire to “own” sense objects (“*vatthu kāma*”) that provide sense pleasures; one is merely satisfied with enjoying them. Thus one has not given up all *kāma rāga*, just “*vatthu kāma*.” Now one is at that *Sakadāgāmī* stage, and will not be born again below the *deva* realms. Thus one is freed from rebirth where diseases are possible (including the human realm) and one is said to be “healthy forever.”

8. When a *Sakadāgāmī* contemplates on the *anicca* nature more (while in the human or *deva* realms) he/she can remove *klesha kāma* and also *paṭigha* from their minds and become free of all *kāma loka* realms. Then one becomes an *Anāgāmī*, i.e., not coming back to the *kāma loka* ever again.

- But an *Angami* has not removed the liking for Dhamma, and thus will be born in one of the five *rūpa* realms reserved for the *Anāgāmīs*. He/she will attain *Nibbāna* from there.
- An *Anāgāmī* becomes an Arahant by removing *rūpa rāga*, *arūpa rāga*, *māna*, *uddhacca*, and remaining *avijjā*.
- Of course one can proceed all the way to the *Arahanthood* while in the human realm. An Arahant will not be born anywhere in the 31 realms at death. His/her mind becomes free of even a trace of matter that is subject to decay and destruction; see, “[What Are Rūpa? \(Relation to Nibbāna\)](#).”

9. This gives a brief summary of how a living being goes from realm to realm in the rebirth process, until the *Arahanthood* is attained. It is NOT a random process. Everything happens due to causes. The following are two (related) ways to analyze that process.

- The key point to comprehend is that a birth in a given realm occurs because one has developed *gathi* suitable for that realm; see, “[Patisandhi Citta – How the Next Life is Determined According to Gathi.](#)”
- One develops any kind of *gathi* by cultivating corresponding *saṅkhāra*, i.e., one tends to think, speak, and act in ways suitable for that realm. This is what is described in detail in *Paṭicca Samuppāda*; see, “[Paṭicca Samuppāda – “Pati+ichcha?”+”Sama+uppāda.](#)”

10. It is also clear why it is futile to seek happiness anywhere in the 31 realms.

- One could live for millions of years in *deva* realm with much higher sense pleasures than in the human realm (and without being subjected to diseases), but then one has to come back to human realm or even a lower realm.
- Even if one is born in the highest *brahma* world (31st realm) and lives 84,000 eons in *jhānic* bliss there (each eon is roughly 30 billion years!), one has to eventually come back to the human realm and start over. Then at some point after that, birth in the *apāyā* is unavoidable. This is why infinite time (or beginning-less time) is a concept that is hard to wrap one's mind around; see, “[Infinity – How Big Is It?](#)” and “[Sansaric Time Scale.](#)”
- Thus one needs to contemplate whether it is worthwhile to seek happiness in a 100-year human life! I know by experience that this is not easy to fully grasp, even when logically proven, because our minds are enamored and blinded with sense pleasures. That truth starts to sink in when the mind loses more and more defilements (greed, hate, and ignorance) and start seeing the perils of sense pleasures to some extent.

2.8 Buddha Dhamma: Non-Perceivability and Self-Consistency

Revised November 9, 2018; March 13, 2020

What We Perceive is Limited

1. Many people try to analyze and interpret Buddha Dhamma in terms of what is readily perceivable through our six senses. However, there is much about this world that we are not aware of, as science has shown in recent years; see below.

- The Buddha said his Dhamma “had never been known to the world.” But many people try to explain the core teachings of the Buddha using conventional concepts. Only a Buddha can truly perceive the true nature of this world with 31 realms; see, “[Wider Worldview of the Buddha](#).” A Noble disciple of the Buddha (one who has attained a *magga phala*) can start perceiving some aspects of the wider world.
- This has happened ever since Nagarjuana and other forefathers of “Mahayana Buddhism” tried to explain *Nibbāna* in terms of various concepts such as “*sunyata*” or “emptiness”; see, “[Saddharma Pundarika Sutra \(Lotus Sutra\) – A Focused Analysis](#)” and “[What is Sunyata or Sunyata \(Emptiness\)?](#).”
- The same thing happened to “Theravada Buddhism” too. Buddhaghosa, like Nagarjuana and others, was not even a *Sotāpanna*. He was a *Vedic brahmin* before converting to “Buddhism” molded and twisted Buddha Dhamma to fit his *Vedic* concepts; see, “[Buddhaghosa’s Visuddhimagga – A Focused Analysis](#).”
- Buddha’s *anapana bhavana* was replaced by the *Vedic pranayama* breath meditation, for example.

Buddhaghosa and Nagarjuna Were Not Noble Disciples

2. It is quite possible that Buddhaghosa, Nagarjuna, and others did not intentionally try to distort Buddha Dhamma, but just described Buddha Dhamma as they understood it with their background in *vedic* concepts.

- Even today, there are many “scholars.” who write books explaining what “Buddhism” is. They are also explaining it in terms of their own mundane frames of reference.
- When you look at most of the books written today about Buddha Dhamma, it seems that there is not much difference between Buddha Dhamma and any other religion. They all teach “how to live a moral life.”
- There is very little discussion, if at all, on the foundational concepts such as *anicca*, *dukkha*, *anatta*, *Paṭicca Samuppāda*, *Ānāpānasati*, *Satipaṭṭhāna*. Whatever discussed is mostly incorrect.

3. I think that is the biggest obstacle for most people in figuring out the true teachings of the Buddha Dhamma.

- We really need to contemplate what the Buddha meant by when he said, “my Dhamma has never been known to the world before.”
- It is not something one can grasp within the “conventional framework”, what is readily perceivable to a normal human with a defiled mind. It involves a wider world with 31 realms (we see only the human and animal realms), and a rebirth process, and is based on the Laws of *Kamma*; see, “[Essence of Buddhism – In the First Sutta](#).” Details at, “[Origin of Life](#).”

What is Perceivable to an Average Human?

4. First, let me clarify what I mean by “perceivable” or “comprehensible” to us as normal humans. Our six senses can “detect” only a tiny sliver of the “world.”

- At a base level, science today can account for only 4 percent of the mass of our universe; see, "[The 4 Percent Universe: Dark Matter, Dark Energy, and the Race to Discover the Rest of Reality](#)", by Richard Panek (2011).
- There are many, many things that have not been "discovered" by science (or philosophy) yet. In particular, nothing significant about the MIND has been discovered yet. For example, scientists are at a loss explaining how consciousness can arise in a brain made up of inert atoms and molecules.

5. Therefore, trying to gauge the validity of Buddha Dhamma **using only the known facts from science** is like a blind man trying to figure out what an elephant looks like by touching a leg of the elephant; see, "[How do we Decide which View is Wrong View \(Ditthi\)?](#)."

- A frog living in a well does not know anything about the wider world. Similarly, a normal human, including all the scientists, face the problem of trying to figure out the "reality" by only using data available through our limited six senses. Thus it is impossible for a scientific theory to be ever "complete" as proven by the mathematician Kurt Gödel; see, "[Gödel's Incompleteness Theorem](#)."

Science Is Still Far Behind the Buddha

6. Most people think and believe that the only way to confirm what the Buddha taught is to see whether those teachings are compatible with science. However, it is not any different from believing that one can get an idea of what an elephant looks like by asking a blind man who has touched the leg of an elephant. OR asking a frog what the world outside the well looks like.

- This may sound ridiculous to many, but let us think back a few hundred years. Just 400 years ago, "science" believed in the geocentric model of the universe. That the Earth was at the universe and that the stars were embedded in a celestial sphere far above; see: [WebLink: wiki: Geocentric model](#)
- Not only science, but all other major religions tried to attune their religions to this model at that time. Most religions still adhere to those concepts; see the same Wikipedia article above.

7. But 2500 years ago, the Buddha clearly described our Solar system as a "*Cakkavāla*" or a planetary system. Not only that, he also said there are uncountable such systems in the universe. It is a waste of time trying to find such details about the universe.

- Through the years, and especially since the beginning of the 20th century, science has "re-discovered" some aspects of the Buddha's wider world, including the existence of billions of galaxies EACH OF WHICH contains billions of planetary systems like our Solar system.
- But someone living in the 19th century was likely to ridicule the idea of innumerable planetary systems (*Cakkavāla*) and could have said, "where is the evidence from science?." That aspect of Buddha Dhamma was not amenable to "science" at that time.
- **Just like that many aspects of Buddha Dhamma are not amenable to science at the current time. But with time, more and more will be shown to be correct as science advances.**

What the Buddha Taught

8. In *Abhidhamma*, it is described in detail how all types of energies in the universe are "stored" in orbital motions ("*brahmana*" in Pali or Sinhala); see, "[31 Realms Associated with the Earth](#)."

- For example, planetary systems are planets orbiting stars. Those planetary systems combine to make galaxies and those galaxies also undergo circular motion in the shape of disks. See: [WebLink: wiki: Retrograde and prograde motion - Formation of celestial systems](#)
- Scientists discovered that atoms are basically electrons orbiting the tiny nucleus made out of protons and neutrons.

9. If one is going to wait for the full confirmation of Buddha Dhamma by science, one is as foolish as those who lived five hundred years ago, and embraced the geocentric model and dismissed Buddha Dhamma as “exotic” or “mystical.”

- We are fortunate to live in a time where science had made impressive progress and has confirmed many aspects of the Buddha’s world view.
- Just as the invention of the telescope led to the discovery of a much bigger cosmos, the discovery of the microscope (and its sophisticated versions) led to a previously unknown “microscopic world” teeming with innumerable microscopic living beings. There are billions of such beings in a single human body. See, [“There are as many creatures on your body as there are people on Earth!”](#)

Scientific Tools Are Still Primitive

10. Science can accept only those phenomena that can be observed and measured with scientific instruments. Such scientific instruments are basically “extensions” for our six senses; see, [“Expanding ‘Consciousness’ by Using Technology.”](#)

- For example, while we cannot see the moons of the Jupiter with our naked eyes, we can see them with telescopes. While we cannot see those microscopic creatures in our bodies with our naked eyes, we can see them with sophisticated microscopes. These are just two examples of many.
- When the Buddha said there are innumerable beings in this world, people looked around and laughed. The Mahayanists are still under the impression that one could wait to attain the Buddhahood itself (not merely *Nibbāna*) until “everyone” is ready to attain the Buddhahood! However, they did not realize that all those billions of microscopic creatures on one’s body must be included in the category of “everyone.”

11. This is just the tip of the iceberg. While science has confirmed that there are uncountable planetary systems, it has not been able to find life on another planetary system yet. When that happens, the “wait for the Buddhahood” for the Mahayanists will become much longer.

- Similarly, the job of any “Creator” who looks after each and every being (even if just humans), will also become unbearably burdensome. That is because there are uncountable world systems with human beings as well.
- I am not trying to make fun at the expense of others, but merely trying to get the point across that, for those who can think for themselves, it is time to get rid of all such nonsensical beliefs and wrong views; these are all *micchā ditṭhis*.
- Getting rid of such wrong views must be done before starting any fruitful meditation. Purification through “correct views” comes before “purification through formal meditation.” *Sammā ditṭhi* or “correct views of this world” comes first in eightfold Path.

12. When we hear about something that cannot be explained with the CURRENT SCIENTIFIC KNOWLEDGE, we categorize them as “esoteric” or “mystical.” Of course, there are many such “made up theories” that are out there without any substance. However, Buddha Dhamma can be SHOWN TO BE CONSISTENT with all our knowledge of the world.

- If we can bring back someone who had died before the 20th century and tell him that we can “see” an event going on in a distant country in real time, he will not believe it. If we turn on a television and show him the actual event taking place, he will be flabbergasted; he will refuse to believe it saying it is some sort of a magic trick.
- But now we know that the visuals and sounds of that event can be transformed and transmitted over long distances almost instantaneously, and can retrieve those signals by “tuning a television set” to the correct frequency.
- *Kamma vipāka* (energy stored) or rebirth taking place at a distant location work the same way. Even though we cannot “see” or perceive, that energy can materialize when the conditions become right; see,

“[Anantara and Samanantara Paccaya](#).” It will take some time to really sink in these concepts, but the more you read, the more you will understand.

Self Consistency Is Critical

13. There are two key methods used in science to verify a given scientific theory. They have some basic axioms that appear to be inviolable. Then all other currently accepted scientific theories must be CONSISTENT with that axioms.

- If a currently accepted scientific theory is proven to be inconsistent with a newly discovered phenomenon, then that scientific theory is discarded and a new theory is adopted.
- No scientific finding up-to-date has shown to be inconsistent with pure Buddha Dhamma as given in the *Tipiṭaka*.
- However, there are many things in Buddha Dhamma that have not been confirmed by science. More are being confirmed as new findings emerge.
- And, Buddha Dhamma is self-consistent. Thus my obsession with making sure all my posts are inter-consistent.

14. **There are two ways to test the validity of the Buddha Dhamma.** First is the self-consistency within the foundational concepts, such as *Tilakkhaṇa*, Four Noble Truths, Noble Eightfold Path, *Paṭicca Samuppāda*, etc. Second is the compatibility with “new findings” by science.

- Here “new findings by science” does not necessarily mean the explanations given by science depict the “absolute truth.” That is because scientific explanations can change with time (for example, the geocentric model had to be changed).
- If science finds evidence for life in outer space, that will be consistent with Buddha Dhamma. However, what science proposes as how such life arose may not be the correct one.

Power of a Purified Mind

15. One needs to contemplate on the implications of these points (and there are many as I will mention in other posts). How can a human being who lived 2500 years ago was able to come up with such an elaborate way of describing our world? Those are just beginning to be “re-discovered” by the efforts of thousands of scientists over many generations.

- It is quite clear that the Buddha was able to transcend all “normal human capabilities” by purifying his mind. Thus Gödel’s Incompleteness Theorem does not apply to Buddha Dhamma; see #5 above.
- Thus his Dhamma may not to “amenable” to the basic frame of reference that we all have as normal human beings. Concepts like rebirth and *kamma vipāka* may sound mysterious. The only way to see the truth in such concepts is to put them to the standard scientific method as discussed above.

16. The fact remains that the Buddha was able to see those and much more just by purifying his mind. And science has not yet figured out the “[Power of the Human Mind](#).”

- Modern science is way behind Buddha Dhamma regarding the mind; see the “[Abhidhamma](#)” section.
- A human can purify the mind to the level of a Buddha only once in many eons on the average. However, it is possible for each of us to purify our minds to enough extent to see many facts about the nature that science is unaware of.
- **The sense of relief and well-being that one can achieve by purifying one’s mind is beyond any sensory pleasure.**

17. For example, while one can enjoy even the best food on Earth only while eating that food. How long does that last? *Jhānic* experiences (*Ariya* or even *anāriya jhānā*) can be longer.

-
- However, the “base level” of “cooling down” or *Nibbāna* or “*niveema*” or “*nivana*” that comes at the *Sotāpanna* stage is forever. There is no comparison to any briefly-lived sensory pleasure or even “*jhānic* pleasures.”

2.9 Samsāric Time Scale, Buddhist Cosmology, and the Big Bang Theory

Revised May 22, 2018

1. In order to really understand the Buddha's message, one needs to grasp the unimaginable length of the *samsāra* (the rebirth process). The Buddha said that there is no discernible beginning to sentient life. It always existed, and it will exist until one attain *Nibbāna*.

- Infinity is a mind-boggling concept; see, "[The Infinity Problem in Buddhism](#)."

2. This a bit difficult concept for many, because many cultures/religions have the concept of a set time of Creation. If there is a First Cause (such as Creation), then there must be a time that everything got started. But if there is no Creation, then there cannot be a set time for a beginning.

- Even as recently as at beginning of the 1900s, Lord Kelvin, one of the top scientists of the day, estimated that the age of the Sun was < 40 million years based on gravitational contraction (atomic structure was not known at that time), and our knowledge of the universe was pretty much limited to the Solar system.

3. Vindication of the Buddha's teachings on the long *samsāra* started at the beginning of the 1900s with the advent of quantum mechanics and relativity: Discovery of radioactivity in 1898 by Becquerel and Einstein's explanation of the photoelectric effect in 1905 led to the quantum theory of atomic structure, which in turn led to the correct picture of atomic fusion as the source of solar energy.

- So, by 1956, the age of the solar system was known to be > 4 billion years. Yet, even billions of years is hardly the same as "beginning-less time!"

4. But there was more to be discovered. By 1929, Edwin Hubble proved that the distant galaxies are moving away from each other and from our galaxy, and that our galaxy is but just one of many galaxies. This was a vast understatement since now we know that there are billions of galaxies in our observable universe! And they are flying away from each other, i.e, the universe is expanding.

- The discovery of the microwave background radiation in the 1960s led to the conclusion that our universe started off with the "Big Bang" about 14 billion ago.
- However, it is just a theory.

5. The most accepted explanation for such "big bang origin of the universe" is the inflationary theory of Alan Guth (see, "The Inflationary Universe" by Alan Guth, 1997). In the inflation theory, if one "Big Bang" is possible, then it is a given that many other "Big Bangs" are possible. The total energy of our universe is completely consistent with adding up to zero.

- If a universe requires a sum total of zero energy to produce, then "the universe is the ultimate free lunch," as Guth explains in his book (pp. 247-248). Thus, implied in the inflation theory is the existence of multiple universes.
- According to the "cyclic theory" model, which is an alternate theory, the same universe comes to a "Big Crunch" which leads to another Big Bang, and the whole process keeps repeating. So, there is no beginning to time either; time is infinite.

6. There are several theories currently being explored in quantum mechanics that are related to cosmology. There is one theory that requires a universe being existing for each possible event! So, there may be an infinite number of parallel universes. For example, see "The Beginning of Infinity" by David Deutsch (2011). In all these theories there are multiple universes that always exist.

- If that is not enough to boggle one's mind, there is another theory in quantum mechanics called the "Many Worlds Interpretation of Quantum Mechanics." It speculates that multiple universes are created at each time a quantum event takes place!

7. Buddha's explanation of how the universe operates is detailed in the *Aggañña Sutta* (DN27). However, all English translations available today are not correct. A good translation of the *sutta* with details would need to a good background in Buddha Dhamma.

- I provided a summary of that “Buddhist Cosmology” in a recent discussion at the discussion forum: [“WebLink: Multiverse: Different Physical Laws and Different Dhamma?”](#)
- Also see, [“Infinity – How Big Is It?”](#)

8. I would like to close this essay with a simile from the Buddha that he used to describe the unimaginable length of *saṃsāra*, and to point out that our time in this life is less than a blink of an eye compared to the length of *saṃsāra*. The Buddha used a great eon as the measurement unit to help his followers visualize the enormous length of *saṃsāra*.

- In Buddha Dhamma, the Earth keeps going through a cyclic process: it forms, stays in that state, starts being destroyed, and stays in that destroyed state. That whole process takes a great eon (*mahā kappā*), and then the whole process repeats, again and again.
- The length of a great eon (*mahā kappā*) is said by the Buddha to be longer than the time it would take a man to wear away a mountain of solid granite one *yojanā* (about 7 miles) around and one *yojanā* high, by stroking it once every hundred years with a silk cloth.
- These days scientists use the word “eon” to denote the duration of a universe (from the “big bang” either to a “big crunch” or just fading away). That will be proven to be incorrect in the future. I hope I will live to that day!

9. Just for fun, I estimated the mass of the material that needs to be removed by the silk cloth each time (this happens every 100 years). Using a 7-mile cube of stone with a density of 2515 kg per cubic meter, I calculate the mass of the mountain to be 3.5×10^6 kg.

- Assuming the lifetime of our Solar system to be 10 billion years, I calculate the mass removed by each stroke is about 36 grams or about 1.2 ounces. This appears to be a reasonable number!
- So, a *mahā kalpa* in Buddha Dhamma turns out to be approximately an eon as perceived by the scientists. When we try to visualize the wearing of a mountain we can imagine how long a time period that is.

10. Yet, that is still nothing compared to the length of the *saṃsāra*. Infinity is a concept that is hard to wrap one's mind around; see, [“Infinity – How Big Is It?”](#)

- One day the *bhikkhus* asked the Buddha how many great eons had already passed and gone by. The Buddha told them, “Suppose, *bhikkhus*, there were four disciples here each with a lifespan of hundred years, and each day they were each to recollect a hundred thousand great eons. There would still be great eons not yet recollected by them when those four disciples pass away at the end of a hundred years. Because, *bhikkhus*, this *saṃsāra* is without discoverable beginning.”
- Another simile given by the Buddha to indicate the length of *saṃsāra* is the following: Each and every living being has been one's mother, father, or a close relative in this unimaginably long *saṃsāra*.
- One could get an idea of why infinity is so hard to fathom by reading about what scientists say about infinity; a very entertaining book is “The Beginning of Infinity” (2011) by the physicist David Deutsch.

2.10 Evidence for Rebirth

Revised January 18, 2020; September 3, 2020

Introduction

Most people in Western societies are not familiar with the concept of rebirth. However, that is changing, because there is a lot of evidence emerging, and scientists and philosophers are beginning to take it seriously.

- One needs to look at the mounting evidence without any preconceived ideas. There is no plausible way to explain these accounts from a purely “materialistic” point of view, i.e., that consciousness arises from inert matter.
- Here is a video of a recent discussion on Western research on children’s past lives, Near Death Experiences, etc:

[WebLink: Youtube: Is There Life after Death? Fifty Years of Research at UVA](#)

Rebirth Accounts

The late Professor Ian Stevenson at the University of Virginia conducted over 20 years of research on the authenticity of rebirth accounts, which is being continued by Professor Jim Tucker.

- Several books about rebirth have been written by these two professors. A good book is “Twenty Cases Suggestive of Reincarnation” by Ian Stevenson. By the way, Professor Stevenson became a Buddhist later on in his life presumably because of his studies (see, “Rebirth as Doctrine and Experience” by Francis Story (2003); first edition 1975). He mentions this in the introduction he wrote to this book by Francis Story; I have scanned that introduction: [“Introduction to “Rebirth by Francis Story – Ian Stevenson.”](#)

Here is a video that discusses the work of the late Dr. Ian Stevenson, Dr. Jim Tucker, and colleagues at the University of Virginia:

[WebLink: YOUTUBE: Evidence of Reincarnation](#)

In their book, “Soul Survivor: The Reincarnation of a World War II Fighter Pilot”, by Bruce and Andrea Leininger detail the amazing story of their son’s recount of a past life, mentioned in the above video. Here is an ABC News report on the story:

[WebLink: YOUTUBE: Reincarnation - Airplane Boy](#)

Here is another story of the rebirth of a Civil War General:

[WebLink: YOUTUBE: Reincarnation, BORN AGAIN?](#)

Here is a three-year-old chanting Buddhist *suttā* (and doing a very good job). Can a three-year-old memorize such complex lines of *suttā*?

[WebLink: YOUTUBE: 3-year-old boy in Isan chants in Pāli](#)

- Also see the post, [“Boy Who Remembered Pāli Suttā for 1500 Years.”](#) This is a true story about a boy (Dhammaruwan) who recited complex and lengthy Pāli *suttā* at five years of age, that sounded very different from current chantings. Furthermore, he remembers accounts of his previous life 1500 years ago, when he accompanied the famous Buddhaghosa on his trip to Sri Lanka.

Child Prodigies

Another piece of evidence comes from child prodigies. Here is the story about Jake Barnett from a 60 Minutes report:

[WebLink: YOUTUBE: Jacob \(Jake\) Barnett "Math and Science Prodigy" on 60 Minutes](#)

Evidence for Rebirth Much Stronger Than Perceived

1. Many people say that direct “proof” for rebirth cannot be given; it is actually the other way around. If one’s memories are in the brain (as science believes), then all those memories will be lost when one dies. There is no “physical connection” between the brains of those involved in the rebirth stories.

- **Therefore, even if just one of those rebirth accounts can be proven to be true, then there is no way to explain that in any way other than rebirth. How can the brain in this life recall memories from the brain in a previous life?**
- If there is a connection between two lives that lived in two geographical locations (also separated by time), there is no explanation for that in current science, i.e., no way to make a connection between the DNA of those two “persons.” A purely materialistic view cannot explain it.
- Recent findings in science show that matter in different locations are entangled at a fundamental level; see, [“Quantum Entanglement – We Are All Connected.”](#) Also, “a living being just goes from one physical body to another”; see, [“What Reincarnates? – Concept of a Lifestream.”](#)

2. Also, it is by having this presumption of rebirth that all of the seeming anomalies and inequalities of life can be explained; see, [“Vagaries of Life and the Way to Seek Good Rebirths.”](#)

- And how could we ever explain the birth of such prodigies as Jeremy Bentham, who already in his fourth year could read and write Latin and Greek? John Stuart Mill, who at the age of three read Greek and at the age of six wrote a history of Rome? Babington Macaulay, who in his sixth year wrote a compendium of world history? Beethoven, who gave public concerts when he was seven; or Mozart, who already before his sixth year had written musical compositions? Voltaire, who read the fables of Lafontaine when he was three years old?
- Does it not seem infinitely more probable that all these prodigies and geniuses, who in many cases came from illiterate parents, had already in previous births laid the foundations for their extraordinary faculties?

Here is a list of child prodigies from Wikipedia. You will recognize many of the names:

[List of Child Prodigies](#)

Here is the link to Wikipedia article on child prodigies:

[Child Prodigy](#)

Healing with Hypnosis

The late Dr. Richard Feynman was skeptical about the claims in hypnosis studies until he subjected himself to hypnosis in two different occasions. In both instances, he verified for himself that if done correctly hypnosis works. He describes these two cases in his book, “Surely You’re Joking, Mr. Feynman!” (1985), pp. 66-68.

- Therefore, hypnosis provides yet another set of “supporting material.” There are many cases of people remembering past lives when hypnotized. It is hard to evaluate the validity of most such cases.
- However, there is a branch of hypnosis that uses it as therapy. Some people seem to have “phobias” based on a horrific event from a past life. They cannot figure out why they have these phobias, but when a hypnotist brings out that experience, they become cured. Here is a 20/20 documentary of three such cases, where they vouch for the authenticity of the therapy sessions:

[WebLink: YOUTUBE: Past Lives](#)

There are hundreds of youtube videos on rebirth stories and also many on child prodigies and hypnosis-based curing of certain ailments.

Following books are also good reads:

- “Many Lives, Many Masters”, by Brian Weiss (1988).
- “Many Mansions: The Edgar Cayce Story on Reincarnation”, by Gina Cerminara (1988).
- “Children’s Past Lives: How Past Life Memories Affect Your Child” by Carol Bowman (1998)
- “Return to Life: Extraordinary Cases of Children Who Remember Past Lives”, Jim B. Tucker (2013).

OBE and NDE Studies

There is an ever-growing number of reports of Out-of-Body Experiences (OBE) and Near-Death Experiences (NDE) that not only support rebirth, but also are consistent with the concept of a “*manomaya kāya*”; see, “[Out-of-Body Experience \(OBE\) and Manomaya Kāya](#)” and other related posts.

Here is a popular youtube video on presentation of a physician on Near-Death Experiences:

[WebLink: youtube: From life to death, beyond and back | Thomas Fleischmann | TEDxTUHHSalon](#)

There are many youtube videos, but here are three recent books on these two subjects:

- “Consciousness Beyond Life”, by Pim van Lommel (2010) gives detailed accounts of case studies by a renowned cardiologist.
- “Brain Wars” by Mario Beauregard (2012) is a book by a scientist on NDE, OBE, and the mind-body problem in general.
- “Dying to be Me: My Journey from Cancer, to Near Death, to True Healing”, by Anita Moorjani (2012) is a personal story of a cancer survivor who had been diagnosed to die within a few weeks but had an “unexplainable recovery” within days during which time she had an “out-of-body experience.”

Discussion

1. Some of you may be wondering whether there is an inconsistency here. I have repeatedly mentioned that the Buddha clearly stated that it is extremely rare to be born a human. Yet, from the above rebirth case studies it appears that people have been born in the human realm in successive lives. If it is so hard to attain a human birth, how can this be?

2. There is nothing inconsistent. The key problem here is another misinterpretation. “*Bhava*” or existence is not the same as a “*jāti*” or a birth; see, “[Bhava and Jāti – States of Existence and Births Therein](#)”.

- A living being, upon exhausting the *kammic* energy for one existence, grabs hold of another strong *kammic* potential for the next existence. A human existence (*bhava*) can last thousands of years. Yet, each human birth (*jāti*) lasts only about 100 years. Therefore, there can be many births (*jāti*) within human existence (*bhava*.)
- In between successive human births, that human lives in *para loka* with just the “mental body” or *manōmaya kāya*. Another word for that entity is *gandhabba*. The concept of *gandhabba* is explained in simple terms at, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#).”
- The same is true for the animal realm. The life of a dog is less than 20 years, but a “dog *bhava*” can last thousands or more years.

3. Thus, if one has done a highly meritorious deed, and at some point in *samsāra* (rebirth process) latches on to that “*kamma* seed” (see, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#)”), that energy may be able to sustain that existence for many rebirths.

- In these cases, when physical death occurs BEFORE exhausting the energy of the *kamma* seed, the *manomaya kāya* (also called *gandhabba*) leaves the dead body and waits until a suitable womb is ready; see, “[Manomaya Kāya and the Physical Body](#).” In this case, the *gandhabba* may carry the physical resemblance to the next life, including scars of any significant wounds, birthmarks, etc.
- When rebirth takes place there, the new physical body could have many resemblances to the old body. In many rebirth cases, such physical resemblances have been confirmed (as in the case of the civil war general in one of the above videos).

4. In summary, it is important to remember that in *Paṭicca Samuppāda*, it is “*upādāna paccayā bhavo*,” i.e., grasping or craving (*upādāna*) that leads to existence (*bhava*); for example, existence as a dog.

- That existence (*bhava*) may have enough *kammic* energy to support many repeated births as a dog. Therefore, once a given *bhava* or existence is grasped, the next step of “*bhava paccayā jāti*,” will lead to repeated births as a dog until that *kammic* energy is exhausted; see, “[Bhava and Jāti – States of Existence and Births Therein](#).”

5. On the other hand, if the *kammic* energy for that “*bhava*” has run out by the time death occurs, then a new “*bhava*” will be grasped at the death moment.

- For example, a human may exhaust the *kammic* energy for that human existence (*bhava*) and grasp a *kammic* seed for a *bhava* (existence) of an elephant. In that case, an “elephant *gandhabba*” will come out of the dead body of the human. Then it will stay in that “mental body” until a matching “elephant womb” appears. That means the mother elephant needs to have *gati* similar to this new elephant.

6. It may be difficult to grasp these concepts initially. One needs to look up the links given and may need to go back several layers to grasp these ideas. It is not possible to explain everything in one post. Buddha Dhamma can be very deep, if one wants to really comprehend how nature works.

You may want to read the posts in the section on “[Origin of Life](#)” and “[Buddha Dhamma – A Scientific Approach](#).”

2.11 Power of the Human Mind

- [Power of the Human Mind – Introduction](#)

2.11.1 Power of the Human Mind – Introduction

Revised August 27, 2018

1. Most people know about Buddha Gotama as a very intelligent and compassionate human being. In "[Dhamma and Science – Introduction](#)," I pointed out the similarities and differences between a scientist and a Buddha. Here I want to discuss in detail the incomprehensible complexity of a human mind, and how a Buddha achieves the peak performance of that complex entity.

- As I pointed out in "[Godel's Incompleteness Theorem](#)," a normal human mind works within the sense sphere of a normal human and thus inherently incapable of providing a complete theory about our world; but the mind of a Buddha can transcend our sensory experience and see the whole of existence.
- Here I point out, in a systematic way in a series of posts, the progression of the human mind to higher levels achieved **by purifying the mind (not by merely learning)**, and why a Buddha is at the very pinnacle. At the end of this series you will see why no other human being, no matter how intelligent, can even remotely approach the mind of a Buddha.

2. In the "[The Grand Unified Theory of Dhamma](#)," we discussed the 31 realms of existence as laid out by the Buddha.

- Out of these, the human realm is at the fifth level (and our knowledge base is limited to our sensory experience within it, and Godel's Incompleteness Theorem applies to any theory derived within it). There are four realms below the human realm, AND 26 realms above.
- Out of the 31 realms, we can see only the human realm and the animal realm (which is one of the four lower realms or the *apāyā*). But we can access the thoughts enjoyed by the beings in the higher realms, AND we can access the transcendental (*lokuttara*) *cittā* too. **Please do not put too much significance initially to the number of *cittā* in each realm, etc. Be patient with me as I need to lay out the "big picture" first.**
- As we proceed systematically in a few posts, you will see various connections to other concepts discussed in other parts on the site, and eventually all fit together. This is why I keep saying that it is a complete and self-consistent world view on a scale unimaginable to a normal (unpurified) human mind.

3. The types of thoughts (*cittā*) that can be experienced in the whole of existence (31 realms) is 89 (or 121 depending on the scheme); see, "[The 89 \(or 121\) Types of Cittas](#)." In the three main *lokas* (or planes) of *kāmaloka*, *rupaloka*, and *arupaloka*, different types of *cittā* are of common occurrence. **While most of the 89 *cittā* are possible in all three *lokas*, normally a subset of *cittā* operate mostly in a given realm.**

- For example, in the *kāmaloka*, only 54 *cittā* are mainly experienced. The *kāmaloka* consists of the lower eleven realms, with sixth through eleventh shells representing the realms of the *devas*. Beings in these 11 realms have all six sense bases, and in the *deva* realms the sense pleasures are higher than in the human realm.

4. Out of all 89 types of thoughts, only 12 are immoral or *akusala cittā* and these are experienced only in *kāmaloka*; see, "[Akusala Citta and Akusala Vipāka Citta](#)."

- In the higher 20 realms belonging to the *rupaloka* and *arupaloka*, only *jhānic citta* are mostly present, and *akusala citta* normally do not arise.
- So, as one can imagine, the beings in the lower realms entertain more immoral *citta*, and with higher frequency too. Human realm is kind of in the middle, with both moral and immoral *citta*.
- Mostly *vipāka citta* arise in the lowest four realms; they basically “pay for their previous *kamma*.” It is said that the beings in the lowest realm, *niraya* (hell) experience basically two immoral *citta* based on hate, because of the high degree of suffering there.

5. The human realm is unique in that the human mind can access not only the *citta* in the *rūpa* and *arūpa lokas*, but also the eight types of *citta* that transcend the 31 realms. These *citta* are the four path (*magga*) *citta* for the four levels of *Nibbāna* (*Sotāpanna*, *Sakadāgāmi*, *Anāgāmi*, *Arahant*), and the corresponding resultant (*phala*) *citta*. Thus all 89 types of *citta* are possible for a human.

- Beings in the higher realms can also attain the 8 *magga/pahala citta*, but do not normally experience the *citta* that are typical of the lower realms.
- Furthermore, the most potent *citta*, those with highest *javana* (impulse) power in “*mahā kusala citta*.” They are accessible mostly by humans and those in higher realms; see, “[Javana of a Citta – Root of Mental Power](#).” More posts will follow in the future.
- **This is the basis of the power of the human mind.** It is possible for a human to attain the mindset of a being in the lowest realm (*niraya*) and it is possible also to go all the way up to the mindset of a Buddha.

6. The *citta* in the *rupaloka* and *arupaloka* are easily categorized according to the *jhānic* states. **These are the same *jhānic* states attained by people via meditation.**

- A human can attain all eight *jhānic* states, and the lower four correspond to the *rupaloka* and the higher four to the *arupaloka*.
- By the way, the Buddha never referred to the *arupāvacara* states as *jhānā*. Rather they are referred to in the *suttā* by their names: *ākāsānancāyatana*, *viññānancāyatana*, etc.
- Each *jhānic* state correspond to three types of *citta*: wholesome (*kusala*) *citta* and the corresponding *vipāka* (resultant) *citta* are two; when the same *jhānic kusala citta* experienced by an *Arahant* it is called a *kriyā* (functional) *citta*, because it does not lead to a *vipāka citta*.

7. In the 16 realms belong to the *rupaloka*, where only two physical sense faculties (eye and ear) are active. These beings have very fine (less dense) bodies.

- In *rupaloka* 15 types of thoughts (*citta*) are mostly experienced corresponding to the five *jhānic* factors: *vitakka*, *vicara*, *pīti*, *sukha*, *ekaggata*; see, “[Power of the Human Mind – Anāriya or Mundane Jhānā](#).” These are the lower five *jhānic kusala citta*, corresponding five *vipāka citta* and five *kriyā citta* (the last five are effective only for the *Arahants* who get into these *jhānic* states).
- The highest four realms represent the *arūpa lokas*, where beings have ultra fine bodies and only the mind faculty; no physical senses. Here there are only 12 types of *jhānic citta* mainly present. These are the higher four (fifth through eighth) *jhānic kusala citta*, corresponding four *vipāka citta*, and corresponding four *kriyā citta* (which are effective only for the *Arahants* who get into these *jhānic* states, which do not have corresponding *vipāka citta*).

8. The *rupaloka* and *arupaloka* are collectively known as *Brahma* realms, which comprise the higher 20 realms. In the *Brahma* realms, beings are mostly devoid of both greed and hate, but they have dormant ignorance (*moha*) in their *kamma* seeds; see, “[Saṅkhāra, Kamma, Kamma Bija, Kamma Vipāka](#).” In the *deva* worlds (which belong to *kāmaloka*), those beings are mostly devoid of hate-rooted *citta*, but have greed-rooted *citta* since they enjoy sensual pleasures.

- It is possible for a human to attain any of those *jhānic* states via *samatha* meditation, and one does not have to be a Buddhist to attain those mundane or *anāriya jhānic* states.

- Those *anāriya jhānic* states are temporary; a *yogi* in a *jhānic* state can be “taken out” of the *jhāna*; see the next post. They may be lost if one does not keep practicing, and the ability to enter such *jhānā* is lost when one dies, i.e., he/she may not have the ability to get into *jhānā* in the next life, even if they are born human.
- **However, if one dies while in even an *anāriya jhānic* state, he/she will be born in the corresponding *rupaloka* or *arupaloka*.** Yet, a being who gets into even the highest *arupaloka* via *anāriya jhānā* will end up eventually in the four lower realms (*apāyā*).
- However, *Ariya jhānā* are permanent. Once one gets into an *Ariya jhāna*, it will hold through future lives.

More information with references to *suttā* at: [“Samādhi, Jhāna \(Dhyāna\), Magga Phala.”](#)

2.11.2 Difference Between Jhāna and Stages of Nibbāna

March 24, 2017; revised April 28, 2018

1. There are many misconceptions about the relationship between *jhāna* and *magga phala* (the four stages of *Nibbāna*). Some view that *jhāna* are necessary to attain *magga phala*, and others believe that being able to get into *jhāna* means one has attained *magga phala*.

- The first assumption is wrong, and the second is true if one has attained an *Ariya jhāna*.
- We can resolve these issues by looking into what are meant by *jhāna* and *magga phala*, and also the difference between *anāriya* and *Ariya jhāna*.

2. **One attains *magga phala* (various stages of *Nibbāna*) by permanently removing greed, hate, and ignorance (about the nature of this world or *Tilakkhaṇa*):** “*Ragakkhayo Nibbanan, Dosakkhayo Nibbanan, Mohakkhayo Nibbanan.*”

- This can also be stated as “one needs to remove 7 *anusaya*” or equivalently “10 *saṃyojana*” to attain *Nibbāna*. At the *Sotāpanna* stage one removes 2 *anusaya* and 3 *saṃyojana*; see, [“Conditions for the Four Stages of Nibbāna.”](#)
- The most commonly used evaluation is that a *Sotāpanna* has removed the three *saṃyojana* of *sakkaya diṭṭhi*, *vicikicchā*, and *silabbata paramasa*.
- Therefore, a **critical first step** for attaining *magga phala* is to be exposed to the correct interpretations of *anicca*, *dukkha*, *anatta*; see, [“Anicca, Dukkha, Anatta – Wrong Interpretations.”](#)
- The **second step** is, of course, to grasp the *anicca* (and *dukkha* and *anatta*) *saññā* to some extent; see, [“What is Saññā \(Perception\)?”](#)

3. ***Jhāna* (sometimes written as “*dyāna*”) can provide blissful bodily sensations.** These arise due to the “cleansing of the physical body and the nervous system” induced by “defilement-free” thoughts; see, [“Jhānic Experience in Detail – Sāmaññaphala Sutta \(DN 2\).”](#)

- ***Jhāna* are mental states corresponding to *rupavacara* and *arupavacara* realms; they still belong to “this world” of 31 realms.** Just like the human realm is “more peaceful in general” than the animal realm, *jhānic* states are “more peaceful in general” than the human realm.
- We all have been born in most of the 31 realms (except for the realms reserved for the *Anāgāmis*) an uncountable times, and thus had attained those *jhānic* states uncountable times in previous lives.
- Even this second phenomenon of *jhāna* is completely outside the realm of modern science. Scientists cannot explain *jhānic* phenomena, but soon they will not be able to ignore these as “hallucinations” because more and more people are attaining *jhāna*.

4. There are two main factors that come into play in cultivating *jhānā*.

- Some people have cultivated *jhānā* in their recent previous lives and are able to get into *anāriya jhānā* very quickly. For a few it comes without any effort, just lying on the bed (by the way this can be any person who lives a moral life, whether exposed to Buddha Dhamma or not).
- The second factor involves the “cleansing of the physical body”, as we discuss below. **This means the actual physical body with its nervous system**, in addition to cleansing the mind.

5. My late Noble teacher, Waharaka Thero, has given the following simile to explain the main difference between a *jhāna* and *magga phala*. I hope you have at least heard about — preferably seen — an old oil lantern with a glass enclosure where the wick is soaked in oil or gasoline that comes up through the wick from a built-in reservoir.

- If gasoline is contaminated, the glass enclosure gets dirty quickly. In the same way, our defiled thoughts leads to a “contamination effect” in our physical body.
- Many body ailments, including bodily pains and even some diseases COULD BE reduced by cleansing one’s mind. Of course, those initially arise due to *kamma vipāka*, and the stronger ones may not be overcome by this process; see, [“What is Kamma? – Is Everything Determined by Kamma?”](#)

6. Our thoughts can be compared to the burning wick and the physical body to the glass enclosure, in the above simile. When the thoughts become defiled, the body will be “contaminated” giving rise to discomforts and even diseases. We will discuss the causes below.

- The glass enclosure of the lamp needs to be taken out and cleaned in order to get the lamp to shine bright again, i.e., to make the “body of the lamp” clean again.
- **In contrast, there is a built-in mechanism for our bodies to be cleansed.**
- This built-in mechanism is our *cittaja kaya* or our thoughts. We can state the basic mechanism this way: The *javana citta* in our thoughts (*cittaja kaya*) produce good or bad energy fields called *utuja kaya*. These are actually *rūpa* below the *suddhaṭṭhaka* stage (very fine), which are analogous to electromagnetic waves in physics.
- Bad thoughts associated with *dasa akusala* lead to the contamination of the body, and good thoughts generate *utuja kaya* that can clean-up such contamination.
- The “Search box” on the top right can be used to find more relevant posts, if one needs more information on these terms.

7. This *utuja kaya* (which is really an energy field) can and does affect our physical body. This is why people who are depressed, or have high levels of anger or greed, are more likely to be subjected to ailments and diseases, and people with joyful mindsets have relatively healthy bodies.

- This effect can be enhanced via *nirāmisā sukha* that arises due to “moral living.” The more one stays away from the *dasa akusala*, the more happier one becomes, and starts feeling “*sukha*” in the body itself. It may not be fast, but it definitely happens over time.
- It can be much more enhanced by comprehending *Tilakkhaṇa*. **The difference here is that one will then stay away from *dasa akusala* mainly because one would have realized the fruitlessness and danger of seeking sensual pleasures by committing *dasa akusala*.**

8. I have discussed — starting with basics — how our thoughts can affect our well-being in the [“Living Dhamma”](#) section. Understanding those basic concepts is crucial in order to understand deeper concepts and to do *Ānāpāna* and *Satipaṭṭhāna bhāvanā* effectively as discussed later in that section.

- When defiled thoughts are suppressed at least for short times (during a *desanā* or while reading Dhamma), one’s mind becomes joyful and one will be able to get to *samādhi* for a short time (*tadanga pahāna*).

[*pahāna* : (nt.) removal; giving up; abandoning; avoidance.

pahāna : ‘overcoming’, abandoning. There are 5 kinds of overcoming:

- (1) overcoming by repression (*vikkhambhana-pahāna*), i.e. the temporary suspension of the 5 hindrances (*nīvarana*, q.v.) during the absorptions, [*vikkhambhana* : [nt.] arrest; elimination; discarding; suppression.]
- (2) overcoming by the opposite (*tadanga-pahāna*),
- (3) overcoming by destruction (*samuccheda-pahāna*),
- (4) overcoming by tranquillization (*patipassaddhi-pahāna*),
- (5) overcoming by escape (*nissarana-pahāna*).

(1) “Among these, ‘overcoming by repression’ is the pushing back of adverse things, such as the 5 mental hindrances (*nīvarana* q.v), etc., through this or that mental concentration (*samādhi*, q.v.), just as a pot thrown into moss-clad water pushes the moss aside....

(2) “ ‘Overcoming by the opposite’ is the overcoming by opposing this or that thing that is to be overcome, by this or that factor of knowledge belonging to insight (*vipassanā* q.v.), just as a lighted lamp dispels the darkness of the night. In this way, the personality-belief (*sakkāyadiṭṭhi*, s. *ditthi*) is overcome by determining the mental and corporeal phenomena ... the view of uncausedness of existence by investigation into the conditions... the idea of eternity by contemplation of impermanency ... the idea of happiness by contemplation of misery....

(3) “If through the knowledge of the noble path (s. *ariyapuggala*) the fetters and other evil things cannot continue any longer, just like a tree destroyed by lightning, then such an overcoming is called ‘overcoming by destruction’ ” (Vis.M. XXII, 110f).

(4) When, after the disappearing of the fetters at the entrance into the paths, the fetters, from the moment of fruition (*phala*) onwards, are forever extinct and stilled, such overcoming is called the ‘overcoming by tranquillization’.

(5) “The ‘overcoming by escape’ is identical with the extinction and *Nibbāna*” (Pts.M. I. 27). (App.)]

- If one spends more and more time doing such activities, the length of this calm mindset (*samādhi*) can be lengthened, even up to weeks (*vikkambana pahāna*).
- That may not be *jhāna* yet, but it is possible to get into *jhāna* by increasing one’s efforts by either *samatha* or *vipassana* meditation.
- For some people, it is easier to get *jhāna*, because they had cultivated *jhānā* in recent previous births.

9. The power of the *javana citta* are increased when one is in *samādhi* and is even more when one gets to a *jhāna*. The “body cleansing effect” is enhanced and one starts feeling joy in the face, *sukha* in the body.

- This can be compared to the wick in the oil lamp generating a “high-power laser light” that automatically cleans the dirty glass enclosure.
- That bright “*utujaya kaya*,” which are also called “*kirana*” (or electromagnetic waves in physics), can burn those long-accumulated “bad deposits” in our bodies and also “straighten out” the nervous system.
- **This is the first confirmation of the effect of the mind on the body for someone starting on the Path. One can actually convince oneself that the body CAN BE affected by one’s thoughts.**

10. All this can be done by just SUPPRESSING the *pancanivarana* for long times, see, “[Key to Calming the Mind – The Five Hindrances.](#)”

- Even before the Buddha, ancient *yogis* were able to get to *jhāna* by SUPPRESSING defiled thoughts or *pancanivarana*. They did this mainly by staying away from sensual objects (usually in a forest or in an isolated place).
- In fact, they were able to cultivate powerful *abhiññā* and even travel through the air. Therefore, it is possible that those who get into the fourth *anāriya jhāna* will also experience the “white light” surrounding them.
- As long as one’s mind can be kept away from greedy and hateful thoughts, such states of *samādhi* and *jhāna* can be maintained for long times (*vikkambana pahāna*).

- This is related to the fact that how people can go to even *anāriya* meditation retreats (breath meditation) and attain a sense of peace for many days at a stretch. However, when they come back and get back into the regular lifestyle, it slowly fades.
11. The problem is that those effects, no matter how powerful, are only temporary with *anāriya jhāna*. They have not removed the root cause for getting attached to greed and hate. **They remain hidden deep down as *anusaya/saṃyojana*.**
- This is discussed in detail in “[Power of the Human Mind – Anāriya or Mundane Jhāna.](#)”
 - *Jhāna* belong to the 31 realms: “[Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi.](#)”
12. Now we are getting closer to see the difference between *anāriya* and *Ariya jhāna*.
- **The main difference difference between them is that *Ariya jhāna* are permanent since they are attained via REMOVING and not just SUPPRESSING some of those *anusaya/saṃyojana*.**
 - Once removed via wisdom (*paññā*) when attaining the *Sotāpanna* stage of *Nibbāna*, some of those *anusaya/saṃyojana* are permanently removed from one’s mind (*ucceda pahāna*).
 - After that, no matter how strong an attractive/hateful sense input comes in, strong defiled thoughts CANNOT arise in a *Sotāpanna*; see, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta,](#)” and other relevant posts in the “[Sotāpanna Stage of Nibbāna.](#)”
13. The remaining key to the puzzle is that it is possible to attain *magga phala* just by getting into *samādhi* and not necessarily to *jhāna*.
- There are many types of people based on their *gathi* (personalities) and capabilities: *saddhā*, *viriya*, *samādhi*, *sati*, *paññā*. In fact, the *suttā* in the *Tipiṭaka* are separated into five *Nikāyas* based on that so that people can study appropriate *suttā* for them, see, “[Nikāya in the Sutta Piṭaka.](#)”
 - Without getting into details, people with predominantly *paññā indriya* can attain *magga phala* without going through *jhāna*.
 - Others can go through *jhāna* to attain *magga phala*. This is not clear-cut, but just to get an idea.
14. The bottom line is that *jhāna* can be quite helpful in getting to *magga phala*. **Furthermore, one may attain both within reasonably short times.** But *magga phala* (at least the *Sotāpanna* stage) comes before *Ariya jhāna* are attained.
- The reason is that *ucceda pahāna* mentioned in #11 that is necessary for the *Ariya jhāna*, cannot take place unless one has comprehended the *Tilakkhaṇa* and attained the *Sotāpanna* stage.
 - One normally attains *Ariya jhāna* by recalling the (stage of) *Nibbāna* that one has seen, and the “cooling down” that one has thus experienced; see, “[Power of the Human Mind – Ariya Jhāna.](#)”
15. For people with high levels of *paññā*, even brief state of *samādhi*, called *tadanga pahāna* (see #7 above) is enough to attain the *Sotāpanna* stage. A famous example is Bahiya Daruchiriya who attained the *Arahantship* upon hearing just a single verse.
- Then there are accounts of many people who attained the *Sotāpanna* stage via *vishkambana pahāna* (see #7 and #9 above), mainly while listening to a *desanā* by the Buddha.
 - For example, Alavaka yaksa (not a *niraya yaksa* but a *deva yaksa*) threatened the Buddha just before sitting down to listen to a *desanā* and attained the *Sotāpanna* stage during the *desanā*. Aṅgulimāla chased the Buddha with the intention of killing him, but attained the *Sotāpanna* stage immediately afterwards.
 - More information on the three kinds of *pahāna* can be found at, “[What Are Kilesa \(Mental Impurities\)? – Connection to Cetasika.](#)”
16. **Therefore, there can be people with *magga phala* without any *anāriya* or *Ariya jhāna*.**

- If there are people with *magga phala* without *jhāna*, they cannot not experience the “*jhānic sukha*” in the body. Even though they do not generate “bad thoughts” to further contaminate their bodies, they have not cleansed the old contaminants. *Jhānic javana citta* (that can run continuously for long times, compared to just 7 *javana citta* in a normal *citta vīthi*) are like laser beams that can clean contaminants in the body even in an *anāriya jhāna*; see, #4 of “[Citta Vīthi – Processing of Sense Inputs.](#)”
- In the simile of #4 above, this is like a wick not emitting any more smoke, but the glass enclosure not yet cleaned.
- Of course, it would be easier for a person with *magga phala* to attain *Ariya jhāna*, and they will not attain *anāriya jhāna*.

17. Finally, from the above discussion it appears that the only way to confirm the attainment of the *Sotāpanna* stage is to see whether one has removed the three *saṃyojana* (*sanyojana*) of *sakkaya diṭṭhi*, *vicikicchā*, and *silabbata paramasa*; see, “[Sakkāya Diṭṭhi is Personality \(Me\) View?](#).”

- And that cannot be determined by anyone else, but oneself.

18. April 28, 2018: I found a *desanā* by Waharaka Thero where he present clear evidence that *jhāna* are not necessary to attain *magga phala*:

[WebLink: Download “Are Jhāna Required for Magga-Phala”](#)

- The main point the Thero makes is that we know that there are *jāti Sotāpannas* born in the human realm. But if a *jhāna* was REQUIRED to attain the *Sotāpanna* stage, then that person WOULD NOT be born in the human realm, but in a *brahma* realm corresponding that *jhāna*.

More information with references to *suttā* at: “[Samādhi, Jhāna \(Dhyāna\), Magga Phala.](#)”

2.11.3 Power of the Human Mind – Anariya or Mundane Jhānas

1. The 54 types of *cittā* (thoughts) belonging to the *kamaloka* (called *kamavacara cittā*) are not very strong; they can just have enough power to grasp the thought object (*arammana* in Pāli or *aramuna* in Sinhala).

- The power of a thought comes from *javana*; see, “[Javana of a Citta – The Root of Mental Power](#)” for an analysis based on *Abhidhamma*.
- But the *jhānic cittā* belonging to the *rupaloka* and *arupaloka* have much more power and have a firm grasp of the object. This is why it is possible for someone who can get to the fourth *jhānic* state to acquire some capabilities that exceed the “normal” human potential, like telekinetic (move things with the mind) or the ability to see or hear from long distances; see below.
- The Pāli word “*jhāna*” has two roots: “to concentrate” and also “to burn up.”

2. The *Anariya* or mundane *jhānā* are attained simply by SUPPRESSING the five hindrances. One simply focuses the mind forcefully onto one thought object, not letting those five hindrances come to surface.

- Since there is only one *citta* at a time (even though there are billions of *cittā* a second), when one forces the mind to one thought object, the five hindrances are kept at bay, and one feels the serenity of a mind unpolluted by the hindrances. **This is called *samatha* meditation.**

3. Thus attaining mundane *jhānā* is purely a mechanistic process. While some Buddhists use them to calm the mind before getting into insight (*vipassana*) meditation, it is used widely by the Hindus. Even before the Buddha, there were many Hindu *yogis* who could attain the highest *jhānā*.

- There are many reports of people of other faiths also attaining such *jhānic* states (see, for example, “Interior Castle” by the Christian nun St. Teresa of Avila; edited by E. Allison Peers, 1946, for a fascinating description of “seven mansions” which seem to correspond to these *jhānic* states).

- But such *jhānic* states are not permanent; one could lose them in an instant, if the moral conduct is broken and defiled thoughts (*anusaya*) come to the surface (*anusaya*).

4. There are many techniques for conducting such *samatha* meditation. The popular ones are breath (whether focusing the mind on the breath at the nostrils or on the rising/falling of the stomach) and *kasina* meditation (where a certain object, for example a colored disk is used to focus the attention on). As one's mind gets absorbed in that object, the five hindrances are suppressed, and the mind advances to higher and higher calm states.

- Obviously, it is easier to attain *jhānic* states via *samatha* meditation if one follows at least the five precepts (not killing, stealing, sexually misbehaving, lying, or taking drugs or alcohol). This is because the greedy and hateful thoughts are at a lower baseline state for a person observing the five precepts.
- If one abstains from all ten immoral acts (*dasa akusala*), then it is even easier to calm the mind and to attain these *jhānic* states; see, "[Ten Immoral Actions \(Dasa Akusala\)](#)."

5. The five *jhānic* states corresponding to the *cittā* in the *rupaloka* themselves are related to the five hindrances. To get to the first *jhānic* state, one needs to suppress the five hindrances; this is done by developing five *sobhana* [beautiful qualities of consciousness] mental factors (*sobhana cetasika*) to counter the five hindrances:

- *Vitakka* inhibits the hindrance of sloth and torpor (*thina middha*). This is how one trains to direct the mind to one thought object, say the breath. *Vitakka* is normally translated as "initial application", but it comes from "*tharka*" or going back and forth among many *arammana* (thought objects); when this is stopped one has "*vitharka*" or *vitakka*, i.e., staying on one thought object, for example, breath or a *kasina* object.
- Sustained application (*vicara*; pronounced "vichāra") is the continued presence of the mind on that object, i.e., maintaining concentration on that object; *vicara* comes from stopping "*chara*" or moving around. *Vitakka* and *vicara* are compared to a bee flying towards a flower and then buzzing and hanging around the flower while extracting honey from it. *Vicara* serves to temporarily inhibit the hindrance of *vicikicchā*.
- As the mind gets absorbed in the object, thoughts of ill will are suppressed and zest or mental happiness (*pīti* or "*preethi*") arises in the mind. This is the *jhānic* factor of *pīti*, and it suppresses the hindrance of ill will (*vyāpāda*). This happiness is felt mainly on the face.
- The body becomes light due to physical happiness (*sukha*). This *jhānic* factor counters the hindrance of restlessness and worry (*uddhacca kukkuccha*).
- Thus the mind now becomes totally absorbed in the thought object, and one has one-pointedness (*ekaggata*). This is the primary *jhānic* factor in all *rupaloka jhānic* states and the essence of concentration (*samādhi*). This one-pointedness temporarily inhibits sensual desire (*kamachanda*).

When all five *jhānic* factors are present, the five hindrances are temporarily suppressed, and one is in the first *jhānic* state.

6. The higher *jhānā* are attained by **successively eliminating** the grosser *jhāna* factors and by refining the subtler *jhāna* factors through sustained concentration.

- Thus in the *Abhidhamma* it is stated that there are five *jhānic* states, where the last four are attained by the elimination of a *jhāna* factor at each stage; thus in that method, the second *jhāna* is attained by removing *vitakka*. But in the *suttā*, the Buddha expounds the *jhānā* as fourfold, where both *vitakka* and *vicara* are removed to get to the second *jhāna*. Therefore the difference comes in at the second *jhāna*.
- For someone cultivating *jhāna*, this is not of any practical concern. In practice, it is not easy to distinguish between two steps of removing *vittakka*, *vicara*; they seem to go away together. That is probably why the Buddha just combine them into one *jhāna* in the *suttā*.

Possible Perils of Mundane Jhānā

First of all, the *anāriya* (mundane) *jhānā* are not stable as *Ariya jhānā*. A *yogi* can be taken out of the *jhāna* by the *anusaya* (temptations) triggered by an external stimulus, for example seeing an attractive woman or hearing a seductive voice; see, “[Āsava, Anusaya, and Gati \(Gathi\)](#).”

- There is this story about a *yogi* who was travelling by air with *abhiññā* powers and saw a flower in the shape of a woman (called “*nārilathā*”) and lost the *jhānic* state and came down; there is another such story where the *yogi* heard the singing of a woman and had to face the same fate.
- In contrast, when someone gets into an *Ariya jhāna*, that *jhāna* cannot be broken by any such influence even though the *yogi* may see or hear such external stimuli; see, “[Power of the Human Mind - Ariya Jhānā](#),” and “[11. Magga Phala and Ariya Jhānā via Cultivation of Saptha Bojjanga](#).”
- Thus even though the *yogi* may have not removed some *āsavas*, the *anusaya* are PREVENTED from arising in an *Ariya jhāna*; this is because the object of concentration (*arammana*) in an *Ariya jhāna* is not a mundane object, but *Nibbāna*.
- **June 8, 2018: The critical differences between *Ariya* and *anāriya jhāna* discussed in “[Pathama Mettā Sutta](#).”**

1. There are many people even today, who can get into these mundane *jhānā*. **But it is not a good idea to attain such mundane *jhānā* at or above the fifth *jhāna*.**

- This is because, if someone dies while in such an *arūpa jhānic* state, he/she will be born in the *arūpa loka*: it is not possible to attain the *Sotāpanna* stage in the *arūpa loka* because the eye and ear faculties are not present (so one could not learn Dhamma), and thus cannot become a *Sotāpanna*. Thus one would spend a very long time there, and has to start all over when one returns to the human world. Once in the human world, it is possible that one could accumulate bad kamma *vipāka* and be destined to the *apāyā*.
- Thus it is better to make the effort to become a *Sotāpanna*, rather than seeking any *jhāna*. A *Sotāpanna* will never be born in the *apāyā* (lowest four realms).

2. There is yet another danger in attaining these mundane *jhānā*. Even before the *jhānā*, one could start seeing objects of one's liking (such as religious figures of any religion, religious symbols, colorful lights, etc).

- Thus many people tend to believe that they have attained some of sort of advancement in meditation or in their belief system; some Buddhists may believe they have attained *Nibbāna* or something close to it. It could be dangerous to play with such illusions. **When such lights or other images appear, one should completely ignore them.** I used to see them too, but luckily I found my teachers before getting heavily involved with these illusions.

3. It is said that in some rare instances, lowly spirits try to convince meditators that they are *devas* or *brahmā* (beings in the realms higher than the human realm). It is dangerous to get involved with them too. It is possible that some of the horror stories we hear from time to time about people killing their own families were committed under such influences.

Extrasensory Perceptions and Powers (*Abhiññā*)

1. When one attains and perfects the fourth *jhāna*, one could start developing several extra sensory perceptions and powers, which could take considerable effort. No reports are available on anyone with ALL these abilities at the present time. However, when one attains the *Arahant* stage, certain extra sensory powers can be attained if cultivated, including the last one on the following list, the ability to “see” the past lives:

- **Psychokinesis (*iddhividha*) or various manifestations of the “power of will.”**

- Clairaudience (*dibbasota*), the faculty of perceiving sounds even at long distances, far beyond the range of ordinary auditory faculties.
- Clairvoyance (*dibbacakkhu*), which enables one to see far events as well as heavenly worlds (i.e., other beings that are not visible to normal human eye).
- Telepathy (*cetopariya ñāna*), which enables one to comprehend the general state as well as the functioning of another's mind.
- Ability to recollect one's own past lives (*pubbenivasanussatinana*).

2. It is possible for a *yogi* to develop the *abhiññā* to the extent that he/she can see past lives through half of a *Mahā Kalpa* (which can be taken to be roughly 15 billion years). The ancient *yogis* with such power saw that the *Mahā Brahma* has been there all through that time period. Therefore, they came to the wrong conclusion that the *Mahā Brahma* was the one who created the world at that time in the past.

- Those *yogis* who are born in the *asanna* realm spend 500 *Mahā Kalpas* there like a lifeless log (no thinking, that is what *asanna* means). When they exhaust that lifetime, they normally are reborn in the human realm, and because of this past “*gathi*” to cultivate *jhānā*, they may again develop *abhiññā* powers. Now they look back at past lives, but do not see any because they can look back only half of a *Mahā Kalpa*, which is only a thousandth of the duration of the past life. Thus, they also conclude erroneously that they are “new” beings, who did not have any past lives.
- The Buddha, upon his Enlightenment, could see thousands of *Mahā Kalpas* in the blink of eye. This is why he said there is no discernible beginning to life.
- An *Arahant* with *abhiññā* powers can see back through numerous *Mahā Kalpas* since *Ariya jhānā* are much more powerful.

3. Further details can be found in:

- “The Manuals of Dhamma”, by Ven. Ledi Sayadaw (2006), p. 105.
- “Abhidhammattha Sangaha – Comprehensive Manual of Abhidhamma” by Bhikkhu Bodhi (1999), p. 344.

4. These kinds of direct knowledge are all mundane and are dependent on the mastery of the fourth *jhāna* and focusing attention on these tasks. The Buddha discouraged *bhikkhus* from pursuing these mundane powers, and also prohibited *bhikkhus* from public display of such powers, calling them “childish.” That is because all these powers are temporary. Since one has not removed *avijjā* (ignorance) and has only suppressed greed (*lobha*) and hate or ill will (*dosa*), they can resurface any time and remove all those achievements.

- One good example from the Buddha's time was Devadatta, who was a brother of princess Yasodhara. Devadatta became a monk and developed the mundane *jhānā* and attained those direct knowledges described above. He could perform many “miracles”, and one time he appeared in the bedroom of Prince Ajasattu to impress him. But when Devadatta went against the Buddha and at one time injured the Buddha, he lost all his mundane powers and ended up in the lowest realm (*avici niraya*) because of those offenses.

By now one should be able to get a sense of the potential of the mind. With even these mundane *jhānā*, a human can access the higher realms of existence and also attain super normal powers, but these mundane *jhānā* are at a much lower level than *Ariya jhānā*.

Next, “[Power of the Human Mind - Ariya Jhānā](#)”,

2.11.4 Power of the Human Mind – Ariya Jhānā

Revised February 12, 2018

1. We saw in the previous post that *Anariya jhānā* are attained via focusing the mind (*vitakka*) on ANY thought object (*ārammaṇa*).
 - That *ārammaṇa* could be breath, a *kasina* object, or any other religious symbol of any religion. Then keeping the mind there (*vicāra* or sustained application) helps one to get to a *jhāna*.
2. Therefore, *anāriya* or mundane *jhānā* are attained by SUPPRESSING the five hindrances via concentrating on mundane objects (breath, a *kasina* object, etc.) On the other hand, *Ariya jhānā* are attained via using *Nibbāna* as the *ārammaṇa* (thought object.) However, *Nibbāna* is not “an object” in this world, so what is meant here is to recall some “cooling down” that one has experienced.
 - One can start “cooling down” first by living a moral life and by staying away from *dasa akusala*; see, “[Living Dhamma](#).”
 - When one comprehends the Three Characteristics (*Tilakkhaṇa*) of *anicca*, *dukkha*, *anatta* at least to some extent, there is definitely more permanent “cooling down” over time. One can look back and notice such a “cooling down.” For example, one may not “flare-up” at the slightest provocation as one used to, or one may have lost cravings to some extent, etc. That is what needs to be recalled while cultivating *Ariya jhāna*; see #4 below for the *kammaṭṭhāna*.
3. Thus the key is to first experience some “cooling down” by comprehending the Three Characteristics of “this world” of 31 realms. One examines the real-life situations and understands that no lasting happiness is possible, either in this life or anywhere in these 31 realms; see. “[Anicca, Dukkha, Anatta – Wrong Interpretations](#),” and “[Why is Correct Interpretation of Anicca, Dukkha, Anatta so Important?](#).”
 - This gives rise to *nirāmisā sukha* (see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#)”) of *Nibbāna*, i.e., some sort of a “cooling down”, over time. How long it takes to experience some “cooling down” will depend on the person.
4. When one has experienced some “cooling down” that one can recall, then one can use it in a *kammaṭṭhāna* to cultivate *jhāna*. This procedure is more effective for those who have attained the *Sotāpanna* stage. One can sit in a quiet place and recite the following *kammaṭṭhāna*:
 - “*etaṃ santam etaṃ paṇītam, yadidaṃ sabbasaṅkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhayo virāgo nirodho nibbānan’ti,*” which means, “It is the only peace, the only happiness: prevent *saṅkhāra* from arising (via) eliminating *taṇhā* and excess greed, and thus stopping the arising of defilements, which is *Nibbāna*.” This needs to be done while recalling an instance of one’s own “cooling down”; see #3 above.
 - However, the above procedure is not much effective unless one has at least some understanding of *anicca*, *dukkha*, *anatta* and has experienced some “cooling down”; it can be used to quickly enter a *jhāna* that had been cultivated.
5. Thus the difference between the mundane and *Ariya* versions of *samatha* meditation is the meditation object, and this is the reason that *asañña jhānā* are avoided in the *Ariya* meditation. In the former, one can focus on ANY object; in the latter one focuses on *Nibbāna*. **Thus, *vitakka*, *vicāra* for *Anariya samatha* meditation becomes *savitakka*, *savicāra*, emphasizing the focus on *Nibbāna*, with the prefix “sa.”**
 - “*etaṃ santam etaṃ paṇītam,*” cannot be used just as a chanting without understanding what is meant by heart. Thus the chant will become more and more effective as one starts feeling the *nirāmisā sukha* at least to a certain extent. (One does not chant out loud; one could just say it in the mind to oneself or say it very quietly meaningfully).
 - One could also start with any *Anāriya samatha* meditation (the breath meditation is easy to do), and once starts feeling the calmness and early stages of *nirāmisā sukha*, one could permanently switch over to the *Ariya* version, by contemplating on *anicca*, *dukkha*, *anatta* and recalling one’s own “cooling down.”

6. Another thing to remember is that *nirāmisā sukha* has no equivalent sensation in any type of *āmisā sukha* or sense pleasures that are available with the five physical senses. It is more like a relief sensation. When one has a headache and it goes away, one feels a relief, a calmness, a peace of mind. The *nirāmisā sukha* is something like that. The more *nirāmisā sukha* one feels one becomes calm inwardly AND outwardly.

- When one gets into *jhānā*, *jhānic* pleasure can be felt in the body.
- In the post, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta](#),” I have explained how a *Sotāpanna* automatically removes the five types of *citta* that are responsible for rebirth in the *apāyā* (the lowest four realms). In that discussion, it was also shown how *vicikicchā* is responsible for such bad *kamma*, and how contemplation on *Tilakkhaṇa* (*anicca, dukkha, anatta*) can remove *vicikicchā*, and also four other greed-rooted *cittā* that arise because of the wrong views.

7. Thus as one contemplates on *anicca, dukkha, anatta*, one automatically starts **reducing, not just suppressing the hindrances.**

Jhānic states are mental states of the *Brahma* realms lying above the realms in the *kāma loka*. In any realm in *kāma loka*, including the human and *deva* realms, *kāma rāga* and *paṭigha* are present. Both *kāma rāga* and *paṭigha* are absent in *Brahma* realms, as in *jhānic* states.

One gets to *anāriya jhāna* by SUPPRESSING *kāma rāga* and *paṭigha*. One gets to *Ariya jhāna* by REMOVING *kāma rāga* and *paṭigha*.

- The two hindrances of *kāmacchanda* and *vyāpāda* were reduced to *kāma rāga* and *paṭigha* levels at the *Sotāpanna* stage. *Kāma rāga* and *paṭigha* are reduced further at the *Sakadāgāmī* stage, are removed at the *Anāgāmī* stage. Thus it is only an *Anāgāmī* who has REMOVED *kāma rāga* and *paṭigha*.
- As one moves to higher stages of *Nibbāna*, it should become easier to attain *jhānā*.

8. In summary, *Ariya jhānā* are permanent in nature compared to *Anāriya jhānā*. By that, I do not mean that one will be permanently in a *jhānic* state. What I mean is that it will be possible for one to attain the *jhāna* at will.

- On the other hand, *anāriya jhāna* can be “lost.” By that I mean one who has cultivated *anāriya jhāna* may lose the ability to get to that *jhāna*. The best example is Devadatta who attained the highest *anāriya jhanas* AND also cultivated supernormal (*iddhi*) powers. He lost all that and ended up in an *apāya*.
- The clearest distinction of an *Ariya jhāna* is that once in the *jhāna*, the *jhāna* cannot be interrupted by *anusaya* or a lustful or a hateful thought. Even if one forcefully tries to think about such a thought, it does not “stick”; the mind rejects it; see, “[11. Magga Phala and Ariya Jhānā via Cultivation of Saptha Bojjhaṅga](#).”
- One can contemplate Dhamma concepts (*savitakka, savicāra*) while in a *jhāna*. Only *vitakka* and *vicāra* are reduced at the first *Ariya jhāna*, and completely eliminated at higher *jhānā*. Doing insight meditation (contemplating on *anicca, dukkha, anatta* or any Dhamma concept) can be done with a clear, bright mind.
- All *jhānā* are mundane in the sense that they provide the *jhānic* experience in the *rūpaloka* and *arūpaloka*, which still belong to the 31 realms of existence. The *Nibbānic* bliss is the ultimate bliss.
- The *nirodha samāpatti* that can be attained by an *Arahant* is incomparably better compared to any *jhāna*. An *Arahant* can enjoy the sensation of *Nibbānic* bliss continually for up to seven days in *nirodha samāpatti*.
- Thus ultimately what is most important is the purification of one’s own mind; see, “[The Importance of Purifying the Mind](#).”

9. One gets to the first *Ariya jhāna* by removing (*uccheda pahāna*) *kāma rāga*, whereas one can get to the first *anāriya jhāna* by suppressing (*vikkhambana pahāna*) *kāma rāga*. **Therefore, one will be an *Anāgāmi* by the time one gets to the first *Ariya jhāna*.**

- This is discussed in detail and evidence from the *Tipiṭaka* provided in the post: “[Mundane versus Supramundane Jhāna](#).”
- Even some followers of Waharaka Thero in Sri Lanka do not seem to understand this point. However, Waharaka Thero has clearly explained this in the following short *desanā* (in Sinhala): “[WebLink: Ariya and Anariya Jhāna \(Audio\)](#).”

More information with references to *suttā* at: “[Samādhi, Jhāna \(Dhyāna\), Magga Phala](#).”

2.11.5 Are There Procedures for Attaining Magga Phala, Jhāna and Abhiññā?

April 23, 2017; revised July 15, 2020

1. Learning Dhamma (or following the Path) is very different from learning mundane subjects like history, economics, or even science and mathematics.

- *Ariya jhāna* and subsequent *abhiññā* powers are realized as “by products” after one attains the *Sotāpanna* stage. Of course, only some of those can cultivate *jhāna* and subsequent *abhiññā* powers.
- Even attaining *magga phala* does not have set procedures, other than following the Eightfold Path. However, *kammaṭṭhāna* based on one’s personality can be helpful.
- The most important thing is to cleanse one’s mind. **Things just become clear with a purified mind.**

2. There is an excellent example described in the *Tipiṭaka*. There were two *bhikkhus* at the time of the Buddha called Mahāpanthaka and Cūḷapanthaka. They were brothers and Ven. Mahāpanthaka was the elder. Ven. Mahāpanthaka had been trying to teach a certain verse (*gāthā*) to Ven. Cūḷapanthaka for **six months**, but Ven. Cūḷapanthaka was unable to memorize it.

- Ven. Mahāpanthaka got frustrated and asked Ven. Cūḷapanthaka to disrobe and he left crying. The Buddha saw this incident and realized that Ven. Cūḷapanthaka had very unique hidden capabilities.
- He gave proper instructions to Ven. Cūḷapanthaka, and Ven. Cūḷapanthaka was able to attain not only the *Arahantship* but also attain vast super-normal (*abhiññā*) powers within the same day. The trick for Ven. Cūḷapanthaka was to go beyond a certain sticking point that had been blocking his mind.
- **He recited not one but 500 *gāthā* that day.** There are many reports of his *abhiññā* powers. One time he made 999 copies of himself and they were all engaged in various activities at the temple.
- The point is that none of that was gained via “book knowledge.” Once the breakthrough came with the instructions from the Buddha, the rest of it came gushing through immediately.
- **No one taught him how to memorize all those 500 verses or how to cultivate *abhiññā* powers.** A decent version of this story can be found at [WebLink: Dhammapada Verse 25 – Cūḷapanthaka Vatthu](#).

3. Another example is how Ven. Ānanda attained the *Arahantship* and many *abhiññā* powers overnight. Three months after the *Parinibbāna* of the Buddha, the first Buddhist Council (*Sangāyana*) was set to take place, and the day before that Ven. Ānanda had not attained the *Arahantship*. He had been a *Sotāpanna* while the Buddha was alive.

- Since only “*sivpilisimbiya*” *Arahants* (those with *patisambhida ñāṇa* [‘analytical knowledge’ or ‘discrimination’]) were allowed to attend the *Sangāyanā*, Ven. Ānanda was under pressure to attain the *Arahantship*. Despite his efforts, he had not attained the *Arahantship* the night before, and he decided to lie down to take a rest. As he was getting into bed while thinking about a *Dhamma* concept, he attained the *Arahantship* while not in any of the four postures (was not on the bed yet, but was off the ground).

- Simultaneous with that he acquired many *abhiññā* powers too. The next day, when he went to the *Sangāyanā* hall, everyone was inside. He stood by the door and announced that he had attained the *Arahantship* and requested the door to be opened. One of the *Arahant* asked Ven. Ānanda to remove doubts of everyone present about his attainment.
 - So, Ven. Ānanda went inside through the closed door, traveled through air and took his seat. Then it was clear to everyone that he had not only attained the *Arahantship*, but also had cultivated *abhiññā* powers overnight; see, “[WebLink: Ānanda - The Guardian of the Dhamma.](#)”
4. Waharaka Thero has given the following simile to understand what happens when one attains the *Sotāpanna* stage, and WHY it takes only a fraction of second.
- Suppose person X is running back and forth past a sign that has written on it some information in small letters. It is not possible to read the sign while running, no matter how many times you run past it.
 - But suppose X stops for a few seconds to read the sign, then resumes running back and forth again. Now that he has read the message that is on the post, he KNOWS what is written on the post, even though he again cannot read it while running.
 - In the same way, it takes only a fraction of a second to the mind to grasp the true nature of this world (*anicca, dukkha, anatta*) when the mind is calm AND if one has learned enough background material (in the simile, he must know the language the sign was written in).
 - While one is gathering this supporting material one is a *Sotāpanna Anugami*. Then the *Sotāpanna phala* moment can come at any time. It comes and goes even without one realizing it. Only weeks or months later, one will start realizing the permanent change in oneself.
5. This is why I said in #1 above, that there are no set procedures for making progress on the Path or developing *abhiññā* powers (of course *anāriya* techniques are different). **As one makes progress, one will AUTOMATICALLY receive the results based on one’s progress.**
- One will automatically attain *magga phala*.
 - One may also attain *Ariya jhānic* states subsequently, if one had cultivated them in recent previous lives. For others, it may take some time to cultivate *Ariya jhāna*. As I described in a previous post, *jhāna* are very different from *magga phala* and it may not be easy to verify whether one has attained *Ariya* or *anāriya jhāna*; see, “[Difference Between Jhāna and Stages of Nibbāna.](#)”
 - While certain meditation techniques COULD be helpful, the two main factors are *kusala sīla* (moral living) and comprehending the real nature of this world, i.e., *Tilakkhaṇa*.
6. **Our goal should be to eliminate future suffering by cultivating wisdom (*paññā*), and thereby getting rid of *micchā diṭṭhi*.**
- Of course, learning correct *Dhamma* is a joyful experience which can motivate one to learn further and thereby help comprehending the true message of the Buddha.
 - The key is to not confuse “learning” with just “memorization.” One needs to get the key idea or *saññā* of a given concept. When one gets the *saññā* of a concept, one will never lose it: “[What is Saññā \(Perception\)?](#).”
7. This website with hundreds of posts could discourage people, thinking that one needs to memorize all these different things to learn *Dhamma*.
- It is not necessary to MEMORIZE ANYTHING. Most of the material on the website is for REFERENCE. If one forgets some details about a concept it is easy to use the menu system, “Search” button on the top right, or the [Pure Dhamma – Sitemap](#) to locate relevant posts.
 - However, listening to *desanā* or reading *Dhamma* (and then grasping concepts, not memorizing) is an essential part of learning (grasping concepts).

- Getting into *jhānā* or attaining *magga phala* do not have set procedures. They will AUTOMATICALLY be realized as one follows the Path and one's wisdom grows.
- The key is to stay away from *dasa akusala*, live a moral life, and comprehend the key message embedded in *anicca, dukkha, anatta* by learning *Dhamma* and contemplating.
- **By the way, there is a connection between *dasa akusala* and *anatta* as we discussed last week; see, "[Dasa Akusala and Anatta – The Critical Link](#)." So, *anicca, dukkha, anatta* are related to *dasa akusala*.**

8. Memory and wisdom are two different things, even though somewhat related. In order to comprehend the message of the Buddha, **one should cultivate wisdom (*paññā*) instead of memorizing verses.** Let us take a simple example to explain this.

- A child can learn addition by just memorizing. Then he/she would be able to give the right answer to the addition of two numbers that has been memorized, but will not be able to add two randomly chosen numbers.
- However, if the child is taught HOW TO add two numbers, using a technique like using the fingers in the hand to represent numbers. it will be possible to "see" WHY two plus three equal to five. Then the child will be able to add any two numbers.
- Once that is grasped, it would easy for the child to then learn subtraction, multiplication, and division.
- However, it will be an impossible task to MEMORIZE the addition, subtraction, multiplication, and division of ANY two numbers.

9. There is a basic difference between "real learning" (grasping concepts) and memorization (just blindly following rules/instructions).

- This is a concept that is hard to grasp for many these days, because we are so much used to "book learning." There are many people who can repeat certain tasks mechanically without even bothering to think through. And then when the situation changes somewhat they do not know how to handle the "new situation."

10. **The message of the Buddha is unique. It goes far beyond moral living.** Some people think that by living a moral life one would be able to get an afterlife in heaven forever.

- On the other end of the spectrum, another set of people believe that killing those who are unfaithful to their God can also lead to a heavenly life, which should be beyond belief for any reasonable person.
- However, if a mind is contaminated from an early age, such dangerous ideas sink into the mind and are very hard to change.
- Both those extremes are faith-based.
- **Hopefully, one would be able to see that there is a key element of reasoning, not faith, involved in Buddha Dhamma. It can be grasped by a reasonably moral person. It can be followed to a very deep level if desired.**

11. Buddha Dhamma cannot be learned by books or with this website. But they can help by providing (correct) information; if it is incorrect information, then it would be just a waste of time.

- Since Buddha Dhamma is really different from any other religion or philosophy, one first needs to get that basic information from someone who really knows the fundamentals (*kamma/vipāka, dasa akusala, Paṭicca Samuppāda*, etc) and then the deeper aspects like *anicca, dukkha, anatta* once the basics are absorbed.
- It is not possible to even absorb the fundamentals, unless one is already living a moral life. It may sound hard to believe, but a defiled mind CANNOT absorb Buddha Dhamma.

- A defiled mind is like a dirty cloth, which cannot be made colorful by soaking in a dye. The cloth needs to be cleaned in order to absorb the dye and to become bright.
- Therefore, the first step is to stay away from the worst of the *dasa akusala*, which are also called “*panca dushcharitha*” or “five immoral qualities”: killing, stealing, sexual misconduct, lying, and alcoholism/drug use.

12. What is discussed in the *Kalama Sutta* is this very first step: Understanding that what one does not like to be done to oneself, another wouldn't like either. No one likes to be hurt and to put to misery. Any normal human should be able to comprehend that simple concept.

- That step needs to happen before one starts on the five precepts or moral conduct (*panca sila*) which are deeper; see “[The Five Precepts – What the Buddha Meant by Them.](#)”
- Only then one can start comprehending the deeper concepts like *anicca, dukkha, anatta*, the Four Noble Truths, and start on the Noble Eightfold Path; see, “[What is Unique in Buddha Dhamma?.](#)”
- The ability to understand deeper concepts gets easier as one purifies one's mind.

13. Even though this website will be a useful resource, one should not start memorizing key concepts. First of all, it is not possible to do that. There is so much material that it is impossible to remember everything. But it is essential to read various aspects and try to “fill in gaps” in the “big picture.”

- Of course, I myself do not remember all the details. But I do know where to refer to get any needed information. It is all in the *Tipiṭaka*, and the late Waharaka Thero has clarified the key terms for us, so that we can find our own way gradually.
- It becomes easier to analyze a given concept as one progresses. The more one grasps about a concept (not merely memorize the wording), the meanings (and how to use them in other situations) start to come flowing through.
- At some point, when one starts comprehending key concepts, one will be able to see connections among different aspects and start seeing the big picture or to make that big picture even more clear. That is when a *Sotāpanna Anugami* becomes a *Sotāpanna*.

2.12 Transfer of Merits (Pattidāna) – How Does it Happen?

Revised July 7, 2018; Revised August 16, 2019; February 12, 2020

Introduction – Unseen Mental Energy

1. Even some Buddhists are skeptical that merits can be “transferred” to other beings: It does not appear to be “scientific.” However, Buddha Dhamma is far ahead of science, and this is another example. Even though the vocabulary is different, mechanisms of “energy transfer” (mental energy) are also explained in Dhamma.

- It is possible to transfer the merits of a good deed, and also many other versions of “mental energy.”
- **The basic idea can be thought of as follows.** Suppose one has a lighted oil lamp, and many others have oil lamps that they are unable to light. Wouldn't it be better to let others use one's lamp's flame to light their lamps?
- Of course, it is not possible to “create” many oil lamps starting with one. But it is possible to make thousand other lamps by sharing the flame of one oil lamp. In the same way, the receiving person needs to have a essential ingredients to reap the benefits, as explained below. But since all those lamps will be useless without a way to light them, the person providing the light is doing an excellent service.
- One “giving merits” is doing *pattidāna* or “conditions” for good *kamma bija* (or *bīja*) to germinate. The receiver must have good *kamma bīja* or “root causes” and receive those *pattidāna* willingly, which is called “*puñña anumodanā*” which rhymes as “*puññānumodanā*.” [*pattidāna* :[nt.] transference of merit or share.]

What is *Anumodanā*?

2. *Anumodanā* means the receiving mind is becoming joyful with the merits it received (“*anu*” + “*odanā*,” which rhymes as “*anumodanā*”). The giver is giving (“*dāna*”) the “*paccayā*” or the auxiliary causes. (The common word is “*pratyaya*” but that is the incorrect Sanskrit word; the correct Pāli word is *paccayā*). It is *paccayā* that represents “*patī*” in “*pattidāna*” (pronounced, “*paththidāna*”).

- Other than in direct giving (see below), the giver cannot make the receiving party “receive what is intended” unless the person receiving has a mindset that is attuned to receiving.
- It is the receiving person that is doing the “*puñña anumodanā*,” i.e., gladly receiving the *pattidāna* of the giver and becoming joyful with the merits received. That is also called “*pattānumodanā*.” [*pattānumodanā* :[f.] transference of merit.]

Giving Can Be Mental Too – *Dāna* and *Pattidāna*

3. Giving and receiving can be done in many ways:

- The direct way of giving/receiving is when one gives money or something material. It is deducted from the giver's ledger and is added to the receiver's: Transfer is complete.
- When a teacher teaches a classroom full of kids, he/she is giving instructions the same way to all the kids. But how much a particular kid “receives” or comprehends depends on that specific kid's ability to receive.
- A radio/television station is broadcasting a program. But the reception of the program by a radio/TV depends on the quality of that receiving device. Furthermore, it has been “tuned” to the correct station.
- This transfer can happen instantaneously or with a time lag, because that mental energy is in the “*nāma loka*” and is accessible at any time; see, “[Memory, Brain, Mind, Nama Loka, Kamma Bhava, Kamma Vipāka](#),” “[What are Dhamma? – A Deeper Analysis](#),” and “[Our Two Worlds: Material and Immaterial](#).”

4. Therefore, only in “direct giving,” the amount received is the same as given. The amount received in the other other two “indirect giving” methods depends on the receiver. A similar mechanism is at work when one does a good deed and “transfers merits” to another person who may be far away.

- All intentions have *kammic* energy. You may remember that the Buddha said, “*Cetanā ahaṃ bhikkave kammaṃ vadāmi,*” or “*Bhikkhus, I say that intention is kamma.*” **And kamma is the vital potential energy for everything in this world.** [*Cetanāhaṃ, bhikkhave, kammaṃ vadāmi. Cetayitvā kammaṃ karoti—kāyena vācāya manasā.* AN 63. Nibbedhikasutta]
- People very much underestimate the power of the human mind. Those who have experienced at least anāriya jhānā can sense at least a little bit about the power of the mind; see, “[Power of the Human Mind – Introduction](#)” and the two follow-up posts.
- Direct giving is “*dāna*”; indirect giving is “*pattidāna*.” These are two of the ten meritorious deeds (*puñña kamma*); see, “[Puñña Kamma – Dāna, Śīla, Bhāvanā.](#)”

Giving Merits – *Pattidāna*

5. One such mechanism is the *anantara-samanantara paccayā*; see “[Anantara and Samanantara Paccaya.](#)” This is a universal law governing how *kamma* and *kamma vipāka* operate (*kamma niyama*). Many people pronounce “*niyama*” as “*niyaama*,” but “*niyama*” is the Pāli or Sinhala word for “principle.”

- Thus *kamma niyama* are the universal laws of *kamma* (like the law of gravitation).

6. Suppose one is “transferring merits” by sincerely saying that “May so and so receive merits from this good deed that I have done.” One could do *metta bhāvanā* by saying, “May all beings be free from the suffering in the *apāyā*” or some version of it. In both cases, one is BROADCASTING one’s intention.

- However, just because one is doing such a “giving,” the intended recipient may not receive the benefits UNLESS the recipient has a matching mindset. It is just like the case of a radio/TV, where the receiving device need to be set to the “right frequency” to receive the signal.
- That is explained in the post, “[Anantara and Samanantara Paccaya.](#)” Don’t be discouraged by those Pāli words. Sometimes, as in the case of *Paṭicca Samuppāda*, it is best to use the Pāli words and to understand the meaning of them.

7. Transfer of merits is efficient when the giver and the receiver are together, and each is aware of the other’s intention. For example, in Asian countries, it is customary to transfer merits to deceased relatives. Alms-giving to the *Saṅgha* and *pattidāna* offered to the deceased relative belong to this category.

- The deceased party can receive merits if it is in a state where it can receive such merits, for example, if it is in a *gandhabba* state.
- But if the deceased is reborn an animal or human, then it cannot receive full benefits, even though it may benefit to some extent.

Dhamma Dāna Is The Ultimate Giving

8. It is possible to “give Dhamma” or to “give *kusala*” too. The Buddha said, “*sabba dānaṃ Dhamma dānaṃ jināti*” or, “from all kinds of giving, Dhamma giving is the most meritorious.”

- When the Buddha gave a discourse, those who were listening “received” Dhamma or *kusala* in varying degrees. Some became *Arahants*, some attained the *Sotāpanna* stage, etc during the discourse itself. But others did not achieve any stage but possibly still accumulated merits of *kusala*. *Kusala* (“*ku*” or “*kunu*” or “dirty”+“*sala*” or “remove”, and thus shedding defiled thoughts from the mind). That means gaining wisdom, non-greed, non-hate AND discarding greed, hate, and delusion.
- During such a discourse, one mainly cultivate wisdom. That, in turn, results in discarding greed and hate.

Importance of State of Mind

9. How much merits a given person receives depends on the state of mind of that person. It also depends on the intellectual level of that person. But it is not possible to quantify the intellectual level using modern standards of “book knowledge.” It is not directly related to one’s formal education. It is easier to give some examples.

- Ven. Ānanda was highly literate, a former prince, and had a fantastic memory power. He had the whole *sutta piṭaka* in his memory. And he was with the Buddha for many years but attained the *Arahanthood* only after the *Parinibbāna* (passing away) of the Buddha.
- Sunīta was of low-caste and was carrying buckets of feces when the Buddha met him. The Buddha with his supernormal powers saw that Sunīta was capable of comprehending Dhamma and asked Sunīta to become a *bhikkhu*. Ven. Sunīta became an *Arahant* within seven days.

10. A given person who may be receptive to “receiving Dhamma” when his mind is in a calm state. But the same person may not comprehend anything when his mind is excited, or distracted. That is the same as saying that the five hindrances are active; see, “[Key to Calming the Mind – Five Hindrances](#).” Therefore, it is IMPORTANT to have a correct mindset when learning Dhamma, whether by listening or reading.

- Therefore, try to read these posts at quiet times, when the mind is receptive, and NOT during the brief breaks at work when the mind is occupied or agitated.
- In Asian countries, that is a significant reason for going to the temple. At the temple, people make offering of flowers to the Buddha or the *Bodhi* tree. Such activities get the mind into a calm, peaceful state suitable for listening to a Dhamma discourse afterwards; see, “[Buddhist Chanting](#)” and “[Tisarana Vandana and Its Effects on One’s Gathi](#).”

Both *Anantara* and *Samanantara* Must be Optimized

11. Therefore, both *anantara* and *samanantara* must be optimized to make all these activities efficient.

- Of course if one is not learning the true Dhamma, *anantara* is not right, and one is wasting one’s time.
- On the other hand, even with an excellent Dhamma delivery, the receiver's mind needs to be receptive to get full benefits. In other words, *samanantara* must be good too.

12. The following example may help in clarifying this concept: Having “good *kamma bīja*” is like having “good seeds.” Suppose person X has potent seeds but does not have water and nutrients for those seeds to germinate and grow. Now, if person Y can provide X with water and nutrients, X can plant those seeds and get them to germinate and grow.

- Like that, some beings that have “good *kamma* seeds,” but do not have the necessary conditions for them to bring the corresponding good *kamma vipāka*. When one is doing *pattidāna*, that is like donating water and nutrients in that simile (example).

13. A seed is the *anantara* or the cause (*kamma bīja*), and the receiving party must have that. However, unless that field is moist, has nutrients, and has exposure to sunlight, the seed cannot grow, i.e., the *samanantara* (or suitable conditions) must be there too.

- Therefore, the receiver can accept those conditions from the giver, and get those existing good *kamma bīja* to bring their good *vipāka*.
- It is only when both *anantara* and *samanantara* are optimized and matched that full benefits result. i.e., optimum transfer takes place. For those whose are familiar with the “resonance effect” in physics, it is quite similar to that. Only when the energy of photon matches an energy gap of an atom that the absorption of that photon by the atom is optimum.

Different Types of *Anumodanā*

14. There is a type of “*anumodanā*” that happens in day-to-day life too. Suppose X starts a project to feed the hungry. Many poor people benefit from it. When Y sees that Y may become joyful seeing the hungry getting fed, and may thank X for doing it. This joy of heart, even if Y did not contribute, counts as “merits”; it becomes a good *kamma vipāka* for Y. That does not take any merits away from X.

- It is not possible for something to come out of nothing. So, where do those kinds of benefits come from? It comes from the mental energy of Y, who became joyful upon seeing the kind act. This is part of the mental energy (*javana*) that a human possesses; see, “[Power of the Human Mind](#).”
- That is true of immoral acts too. Suppose X is beating up Y. Person Z may be glad to see that and may encourage X to beat up Y. Now, suppose Y dies as a result of the beating. Then not only X, but Z also gets bad *kamma vipāka* for that immoral act.
- In our societies also, the same principle applies. If the police investigating the death of Y has evidence that Z also encouraged the killing, then Z as well as X, could be prosecuted.
- Thus our feelings (good or bad) play an important role in accumulating good and bad *kamma vipāka*.

2.13 First Noble Truth is Suffering? Myths about Suffering

Most people believe that the First Noble Truth just says there is suffering. Some also think that it is possible to “remove” this existing suffering IN THIS LIFE by following extensive and elaborate meditation techniques.

1. The Buddha said, “My Dhamma has not been known in this world. It is something people have never heard of previously.” So we should carefully examine to see what is really new about the suffering that he talked about.

- What is new about knowing that there is suffering around us? Everybody knows that there is suffering with old age, diseases, poverty, etc.
- And it is possible to REMOVE existing suffering by doing meditation? For example, if one has come down with a disease, can one overcome that by doing meditation? If someone is getting old and is feeling the pains and aches of old age, can that be PERMANENTLY removed by doing meditation? Even though some issues can be handled due to special reasons, in most cases we CANNOT change such EFFECTS or end results.

2. Let us discuss these two points one at a time.

3. Let us first see whether it is possible to REMOVE the existing suffering.

- For example, if someone has aches and pains due to old age, it is not possible to get rid of them other than to use medications or therapy to lessen the pain and manage it. If someone gets cancer, it is normally not possible to get rid of it by meditation. It may be handled by medication. Even the Buddha had pains and aches due to old age, and had a severe stomach ache at the end.
- In the context of that last sentence, It must be noted that there are two types of *vedanā* (feelings): those due to *kamma vipāka* and those due to *saṅkhāra* (attachment to sensual pleasures), and an *Arahant* gets rid of only the second kind until the *Parinibbāna* (death); see, “[Vedanā \(Feelings\) Arise in Two Ways.](#)”
- In fact, it may not even be possible to do meditation under any of such conditions. Even someone who has developed *jhānā*, may not be able to get into *jhānā* if the pains are too distracting.
- The purpose behind Buddhist meditation is to contemplate on the true nature of the world and find the CAUSES of such suffering, so that those causes can be stopped and FUTURE suffering can be stopped.
- It is true that one can get a relief from day-to-day stresses by doing different kinds of meditation. And it is good to do them. But such practices were there even before the Buddha. There was no need for a Buddha to reveal to the world that one could get some “calming down” by doing breath meditation or *kasina* meditation.
- In a way, such “*samatha*” meditations are comparable to taking an aspirin for a headache. One can get relief in the short term but it is temporary. But the problem that the Buddha addressed involved a much longer time scale, and will lead to a *nirāmisa sukha* that is permanent.

4. So, what was the “never heard truth about suffering” that the Buddha revealed to the world? In short it is the “suffering that is hidden in sense pleasures; the suffering that WILL ARISE in future lives.”

- Let us take an example to get a simple version of this “new idea.”
- When a fish bites the bait, it does not see the suffering hidden in that action. Looking from the ground we can see the whole picture and we know what is going to happen to the fish if it bites the bait. But the fish is unable to see that whole picture, and thus does not see the hidden suffering. It only sees a delicious bit of food.
- In the same way, if we do not know about the wider world of 31 realms (with the suffering-laden four lowest realms), and that we have gone through unimaginable suffering in those realms in the past, we only focus on what is easily accessible to our six senses.

- In order to really comprehend suffering through repeated rebirths, one needs to comprehend that most suffering is encountered in the 4 lowest realms (*apāyā*); see, “[The Grand Unified Theory of Dhamma](#).”
- Thus, stopping suffering requires one to first stop the causes for rebirths in the *apāyā* by attaining the *Sotāpanna* stage of Nibbāna; see, “[Nibbāna in the Big Picture](#).”

5. **Seeing this hidden suffering is indeed difficult.** It is not possible to convey the whole message in one essay, but I will try to get across the main idea. One really needs to spend some time thinking through these issues. When the Buddha attained the Buddhahood, it said that he was worried whether he could convey this deep ideas to most people.

- Everything happens due to one or (usually) many causes. The famous Third Law of motion in physics says that every action has a reaction; and the First Law says that an object will not change its status unless a force acts on it. It is easy to see these “cause and effect” principles at work in mechanical objects. If something needs to be moved, it needs to be pushed or pulled. If a stone is thrown up, it must come down if there is gravity pulling it down.
- We seek pleasures that are highly visible. But if we gain such pleasures with immoral acts, the consequences of such immoral acts are not apparent. We can see a stone thrown up coming down, but we cannot see any bad consequences to the drug dealer who seems to be enjoying life.

6. **The main problem in clearly seeing the “cause and effect of mind actions” is that the results of those actions have a time delay and that time delay itself is not predictable.** In contrast, it is easy to predict what is going to happen with material things (moving an object, a vehicle, a rocket, etc). The success of physical sciences is due to this reason. Once the underlying laws are found (laws of gravity, laws of motion, electromagnetism, nuclear forces, quantum mechanics, etc), one has complete control.

- But the mind is very different. To begin with, no two minds work the same way. Under a given set of conditions, each mind will chose to act differently. With physical objects, that is not so; under a given set of conditions, what will happen can be predicted accurately.
- Effects of some actions (*kamma*) may not materialize in this life and sometimes it may come to fruition only in many lives down the road (but with accumulated interest).
- Even in this life, mind phenomena are complex: This is why economics is not a “real science.” It involves how people act sometimes “irrationally” for perceived gains. No economic theory can precisely predict how a given stock market will perform.

7. **When mechanical systems have time lags, those are predictable. We can set off a device to work in a certain way AT A CERTAIN TIME, and we know that it will happen at that time if all mechanical components work properly. Not so with the mind. When we act in a certain way, the RESULTS of those actions may not be manifested for many lives. This is a key point to contemplate on.**

- But cause and effect is a nature’s basic principle. **When something is done, it will lead to one or more effects.** In mind-related causes, the effects may take time, sometime a long time over many lives, to trigger the “corresponding effect.”
- Thus it should be clear that “action and reaction” associated with mind effects REQUIRE the rebirth process. It is not readily apparent and is an essential part of the “previously unheard Dhamma” that the Buddha revealed to the world.
- **This “cause and effect” that involves the mind is the principle of *kamma* and *kamma vipāka* in Buddha Dhamma.**
- But unlike in Hinduism, *Kamma* is not deterministic, i.e., not all *kamma vipāka* have to come to fruition; see, “[What is Kamma? Is Everything Determined by Kamma?](#).” All unspent *kamma vipāka* become null and void when an *Arahant* passes away.

8. The life we have as a human is a RESULT of a past good deed. The life of a dog or an ant is the result of a past deed by that sentient being.

- And what happens to us in this life is a COMBINATION of what we have done in the past (*kamma vipāka*) AND what we do in this life.
- What happens to an animal is MOSTLY due to *kamma vipāka* from the past.
- The difference between a human and an animal is that the animal does not have much control over what is going to happen to it. But human birth is a special one: We have a higher level mind that CAN change the future to some extent, and with possible enormous consequences.

9. What can we change and what cannot be changed?

- We are born with a certain *kamma vipāka* built in. Our body features, major illnesses (such as cancer) are mostly, not completely, built-in. We can avoid many *kamma vipāka* by acting with mindfulness, i.e., by planning well, taking precautions, etc.
- But we CANNOT change the fact that we are going to get old and eventually die, no matter what we do. Our life a RESULT.
- What we CAN change are the CAUSES for future lives.
- Even though meditation cannot relieve us of most of the pre-determined suffering, proper meditation CAN provide temporary relief, as well as PERMANENTLY removing future suffering.

10. The second Noble Truth is describes those CAUSES that we need to work on. The root causes are greed, hate, and ignorance, but they need to be removed mainly via understanding the Three Characteristics (see #12 below) and also via removing our bad *sansāric* habits; see a series of posts starting with, "[Habits, Goals, Character \(Gathi\)](#)" to "[The Way to Nibbāna – Removal of Āsavas.](#)"

11. The Third Noble Truth is about what can be achieved by systematically removing those causes. *Nirāmisa sukha* increases from the point of embarking on the Path, and has four levels of PERMANENT increases starting at the *Sotāpanna* stage and culminating at the Arahant stage; there are several posts starting with, "[Three Kinds of Happiness – What is Nirāmisa Sukha?](#)"

12. And then Fourth Noble Truth is the way to attain *nirāmisa sukha* and then various stages of *Nibbāna*. *Nirāmisa sukha* starts when one lives a moral life (see, "[Ten Immoral Actions \(Dasa Akusala\)](#)" and follow-up posts). The root causes of immoral behavior are greed, hate, and ignorance. Ignorance can be reduced to the extent of attaining the *Sotāpanna* stage just via comprehending the Three Characteristics of "this world of 31 realms," i.e., *anicca, dukkha, anatta*; see, "[Anicca, Dukkha, Anatta – Wrong Interpretations](#)," and the follow-up posts. It is that powerful.

- Once one attains the *Sotāpanna* stage, one can find the rest of the way by oneself.

13. There are many different ways to describe and analyze what I summarized above. Different people can grasp Dhamma by looking at it from different angles. That is what I try to cover with sections like "Dhamma and Science", "Dhamma and Philosophy", and for those who like to dig deeper into Dhamma, the section on "Abhidhamma" which means "Higher or Deeper Dhamma."

- My goal is to provide a "wide view" that accommodates most people. Even though I cannot even begin to cover even a significant fraction of Buddha Dhamma, one does not need to understand "everything" even to attain the *Arahanthood*. The Buddha has said that one could attain all four stages of *Nibbāna* just via comprehending *anicca, dukkha, anatta* at deeper and deeper levels. This is because with deeper understanding, one's mind automatically directs one in the right direction.
- Another reason that I try to cover many topics is to illustrate the point that Buddha Dhamma is a complete description of nature.

2.14 Vinaya – The Nature Likes to be in Equilibrium

Our lives and existence are based on constantly getting into debt and then paying off debts. This latter is done by Nature whether we like it or not. When we steal, kill, lie, or do any of the *dasa akusala*, we get into debt, and the nature keeps track of that via *kammic* energy.

- We are reborn to pay debts. This is another way of looking at the cycle of rebirths. Nature will automatically make sure that the largest debts are paid off first; this is how the next existence (*bhava*) is determined.
- During a given lifetime, debts are paid off when suitable conditions appear; see, [“Anantara and Samanantara Paccaya.”](#)
- Nature is the final arbitrator. A criminal may be able to get away with a crime by hiring a good lawyer, but will have to pay for the crimes in the nature’s court. Similarly, when we do something good, we will get the rewards regardless of whether we wish for anything in return or not. Most people do not realize this because of the time delay between the act (*kamma*) and its result (*kamma vipāka*).

1. When we do either a moral or an immoral act, that is done with an intention and has some energy associated with it. This is called *kammic* energy. That energy resides in the universe until spent or otherwise reduced by some means (this is related to quantum entanglement; see, [“Quantum Entanglement – We are All Connected”](#)). It is really the principle of energy conservation in physics.

- We can become indebted to a living being or to the “world as a whole.”
- There were no *vinaya* rules in Buddha *sāsana* for about 20 years after the Buddha attained Enlightenment. When Buddha Dhamma started flourishing, unscrupulous people started becoming monks to live a comfortable life depending on the kindness of the devotees. The Buddha admonished them about the consequences of becoming indebted and started setting up the *vinaya* (“vi” + “naya”, where “naya” in Pāli or Sinhala means debt) rules to rein in those people.

2. When there is an energy imbalance, nature tries to bring it to balance. For a given individual (in the conventional sense), i.e., a life stream (absolute sense), the biggest imbalances are settled first.

- Thus at death when *paṭisandhi* takes place, the biggest *kamma* seed with highest imbalance come into play, and releases that energy by initiating the next birth in the corresponding “*bhava*”; see, [“Bhava and Jāti – States of Existence and Births Therein.”](#) Thus the next “*bhava*” is determined by the biggest *kammic* seed at the end of the current “*bhava*” (this is really a simple interpretation of a complex process).
- During a lifetime (*pavutti vipāka*), in addition to the energy content, the prevailing conditions also come into play for delivering *kamma vipāka* or the release of *kamma* seeds. This is why we can prevent many bad *kamma vipāka* from come to fruition by acting with *yoniso manasikara* or by “being mindful”; see, [“What is Kamma? Is Everything Determined by Kamma?”](#)
- In both cases (*paṭisandhi* and *pavutti vipāka*), “matching conditions” plays a big role; see, [“Anantara and Samanantara Paccaya.”](#) For example, a seed does not germinate if it is in a dry place; it needs to be in the ground with water and sunlight in order to germinate.

3. Getting back to the issue of coming to equilibrium, a stone is in equilibrium when it stays on the ground. If we pick it up and throw it up it goes up because we gave it some energy. But now it is not in equilibrium, and it will fall down to find its equilibrium position on the ground. The only difference with *kammic* energy is that the *kammic* energy could be released much later; **it has to find suitable conditions to release that energy**; see, [“Saṅkhāra, Kamma, Kamma Bija, Kamma Vipāka,”](#) and [“Paṭicca Samuppāda – Overview”](#); Thus the release of *kammic* energy is more akin to the process of germination of a seed; there is a time lag until suitable conditions appear.

- A seed, when placed in the ground, germinates and becomes a tree by releasing the energy that is trapped in the seed. When the energy is all spent, the tree will die. Unless the tree itself made more seeds during its lifetime, that tree is the only “result” of that original seed.
4. Through numerous lives in the past we have accumulated innumerable number of both good and bad *kammic* energy packets, or *kamma bīja*, or *kamma* seeds and we keep producing them in this lifetime too; some are big and some are small (actually, those done beyond 91 *mahā kalpas* have lost their energy; like everything else in this world, *kammic* energy is not permanent either). **The small *kammic* seeds bring in results (*vipāka*) during any lifetime, and the really big ones (*kamma patha*) are the ones that determine “*bhava*” for a new life at the *cuti-paṭisandhi* moment.**
- Does that mean we have to remove all *kamma* seeds to stop rebirth, i.e., to attain *Nibbāna*? No. A new “*bhava*” is grasped at the “*upādāna paccayā bhavo*” step in the *paṭicca samuppāda* cycle; see “[Akusala-Mūla Paṭicca Samuppāda.](#)” If one has removed ignorance (*avijjā*) and understood the true nature of the world, then there is no “*taṇhā*” and thus there is no *upādāna* at the “*taṇhā paccayā upādāna*” step, and thus no “*bhava*,” and no “*jāti*” or rebirth.
 - However, in order to remove ignorance (*avijjā*), we have to purify our minds. For that we need to understand the true nature of “this world”, i.e., *anicca, dukkha, anatta*. For that we need to get rid of the five hindrances (*panca nivarana*) that are covering our minds and not letting the mind comprehend *anicca, dukkha, anatta*. That is where the removal of bad *kamma* seeds and accumulation of good *kamma* seeds (i.e., doing good deeds and avoiding bad deeds) become important; of course “deeds” here include actions, speech, and thoughts.
5. The point is that every time we do a moral or an immoral act we generate a *kamma* seed that embeds the “*javana* power” of the thought that led to the act; see, “[Javana of a Citta – The Root of Mental Power.](#)” The *kammic* power associated with a moral act can be considered surplus in one’s “account” that can be used to enjoy things in life; an immoral act leads to a debt, i.e., it appears on the negative side of the ledger. If one does an immoral act against another living being, then one be in debt to that being until it is paid off; see, “[Kamma, Debt, and Meditation.](#)”
6. The nature tries to keep things in balance: the good *kamma* bring good results and bad *kamma* brings bad results when the nature implements this balancing act. In both cases, we can take advantage of this by arranging conditions for good *kamma* seeds to germinate and not letting bad *kamma* seeds to germinate; see, “[What is Kamma? Is Everything Determined by Kamma?.](#)” The development of good habits and getting rid of bad habits go along with this process; see, “[Habits and Goals,](#)” and “[Sansaric Habits and Āsavas.](#)” Please review these links carefully. All these tie up together.
7. Thus we are bound to this *samsāra* or the cycle of rebirths because we do things to make an “imbalance” either via moral or immoral deeds: good deeds lead to good rebirths and bad one to bad rebirths. They both extend the *sansāric* journey. **However, it is essential to engage in moral deeds in order to avoid birth in the four lowest realms (*apāyā*), where the suffering is great AND also there is no opportunity to moral deeds. Thus one MUST do moral deeds until one attains *Nibbāna*.**
- Moral deeds WILL have their consequences (they add up in the “plus side of the ledger”), whether or not one wishes for anything in return, i.e., the nature will pay back. However, if one does a moral deed AND wishes for something other than *Nibbāna*, then that is done with greed, and thus one is simultaneously doing an immoral act.
 - Only an *Arahant* does not do any moral or immoral deeds that have *kammic* consequences that are potent enough to bring rebirth. All an *Arahant* does is low-level *saṅkhāra* or “*kriya*” (like walking and talking), and is “in equilibrium” with nature.
8. When one goes “off the equilibrium”, greed and hate intensify and one is likely do immoral acts to become indebted. On the other hand, when one is in some kind of a *samādhi*, the mind is close to equilibrium, and thus greed and hate are under control. If one attains *rūpāvacara* and then *arūpāvacara jhānā* then the mind gets even more closer to equilibrium. *Samādhi* attains perfection when one becomes an *Arahant*.

-
- This is why one needs to stay away from doing immoral acts, if one wants to get results in meditation. A purified mind can easily get to *samādhi*; see, “[The Basics in Meditation](#).”
 - One becomes indebted via greed, hate, or ignorance (here ignorance means not knowing the true nature of the world or *anicca, dukkha, anatta*); thus there is *lobha vinaya*, *dosa vinaya*, and *moha vinaya*.

III Key Dhamma Concepts

Within thousand years of the Buddha's *Parinibbāna* (passing away), certain key concepts became distorted. For many years, I had nagging questions on the compatibility of certain concepts that are widely published in "Buddhist literature", including Theravāda literature. For example, explanations of *anicca*, *anatta*, *sunyata*, did not make sense to me. Furthermore, I got lost in a myriad of explanations for terms like *saṅkhāra*; there are three different meanings for that word in standard Theravāda texts.

When I started listening to the *desanās* by Waharaka Thero in Sri Lanka, it became immediately apparent to me that "this was the true Dhamma"; see, "[Parinibbāna of Waharaka Thero](#)." Furthermore, concepts like *samsāra*, *sammā*, *saṅkhāra* became crystal clear while I was just listening. I hope I will be able to convey this information as clearly below.

This main section has the following sub-sections:

- [Kamma are Done with Saṅkhāra – Types of Saṅkhāra](#)

3.1.1 What is “Saṅ”? Meaning of Saṅsāra (or Saṃsāra)

Revised May 17, 2018; revised December 18, 2018; February 16, 2020

1. A key Pāli word, the meaning of which has been hidden for thousands of years, is “*saṅ*” (pronounced like son). “*Saṅ*” is basically the term for “good and bad things we acquire” through our moral/immoral deeds.

- By understanding this root word, one can easily see the meanings of many important Pāli words, without looking for roots in Sanskrit.

2. There is a reason for calling what we “acquire or add” as “*saṅ*.” In Pāli and Sinhala, the word for numbers is “*saṅkhyā*,” and *saṅkhyā* = “*saṅ*” + “*khyā*,” meaning add and subtract. Addition and subtraction involve *saṅkhyā*. [*saṅkhyā* : [f.] enumeration; calculation; a number; definition.]

- From this, “*saṅ*” gives the idea of “acquiring or adding.”
- In the same way, “*khyā*” implies “removal or subtraction.”

3. Therefore “*saṅ*” is used to indicate things we do to lengthen our *saṃsāric* (or *saṅsāric*) journey. See below for examples.

- These “*saṅ*” are nothing else but *dasa akusala* (that lead to rebirth in the *apāyā*) and also *puñña kamma* (that lead to rebirths in the “good realms”); see, “[Kusala and Akusala Kamma, Puñña and Pāpa Kamma.](#)”
- One may wonder why “*saṅ*” includes moral deeds or *puñña kamma*. That is because they also lead to rebirths (“add” to *saṃsāric* journey).
- However, one MUST do *puñña kamma* to avoid rebirth in the *apāyā*.

4. In the same way “*Khyā*” or “*Khaya*” indicate the shortening of the *saṃsāric* journey.

- Removal of defilements (*rāga*, *dosa*, *moha*) lead to *Nibbāna*. Thus *Nibbāna* is “*rāgakkhaya*,” “*dosakkhaya*,” and “*mohakkhaya*.”
- Those three words have roots in “*khaya*” or “subtraction or removal.” For example, *rāgakkhaya* comes from “*rāga*” + “*khaya*,” which combined to pronounce as *rāgakkhaya*.
- Thus it is quite clear that *rāgakkhaya* means “removing *rāga*.” Same for “*dosakkhaya*,” and “*mohakkhaya*.” Removal of *rāga*, *dosa*, and *moha* lead to *Nibbāna*.

5. Just by grasping these key ideas, it is possible to understand the roots of many common words, such as *saṅkhāra*, *saṃsāra*, *saññā*, *sammā*, etc. Let us analyze some of these words.

- We “add to” our rebirth process when we do “*saṅ*.” The Pali word for “doing” is “*khāra*” (Sinhala word is “*kāra*” or කොට). That is the origin of the word “*saṅkhāra*” (“*saṅ*” + “*khāra*”); the Sinhala word is *saṅkhāra* or සංකොට).

6. From *Paṭicca Samuppāda*, all sufferings start with, “*avijjā paccayā saṅkhāra*.” Thus, when one gets rid of *avijjā* completely, all *saṅkhāra* are stopped and one attains *Nibbāna*. That is accomplished in the *Arahant* stage.

- From the [WebLink: suttacentral: Manasikāra Sutta \(AN 11.8\)](#): “*etaṃ santam etaṃ paṇītam, yadidaṃ sabbasaṅkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhayo virāgo nirodho nibbānan’ti*.”
- **Translated:** “It is peaceful, it is serene, the expelling of all *saṅkhāra*, breaking of bonds, removing greed and hate; *Nibbāna*.” So, it is quite clear that by stopping all *saṅkhāra* one attains *Nibbāna*.

7. However, a distinction needs to be made between *saṅkhāra* and *abhisāṅkhāra*. The prefix “*abhi*” means “stronger” or “coarse.”

- *Saṅkhāra* involves EVERYTHING that we do to live in “this world” of 31 realms; these include breathing, walking, eating, pretty much everything. Even an *Arahant* has to be engaged in *saṅkhāra* until *Parinibbāna* or death.
- *Saṅkhāra* become *abhisāṅkhāra* by engaging in the “wheeling process”; see, “[Nibbāna – Is it Difficult to Understand?](#).” The ***saṃsāric* process or the rebirth process is fueled by *abhisāṅkhāra*.**

8. The bad things we acquire – with *lobha* (greed), *dosa* (hate), *moha* (delusion) – contribute to rebirth in the lower four realms; these are *apuññābhisāṅkhāra* (or *apuñña abhisāṅkhāra*). Here “*apuñña*” means “immoral.”

- The good things we acquire via *alobha*, *adosa*, *amoha* help gain rebirth in human realm and above; these are *puññābhisāṅkhāra* (or *puñña abhisāṅkhāra*). Here “*puñña*” means “moral.”
- Thus, both kinds contribute to lengthening the rebirth process, but we DO need to do *puññābhisāṅkhāra* for two reasons: (i) it prevents us from doing bad things, (ii) done with right intention, it will help purify our minds, i.e., *puñña kamma* can become *kusala kamma*; see #18 below.

9. Another important term “*sammā*” which comes from “*saṃ*” + “*mā*,” which means “to become free of *saṃ*.” Here “*mā*,” means “becomes free of.” For example:

- “*Mā hoti jati, jati*,” means “may I be free of repeated birth.”
- “*mā me bāla samāgamo*” means “may I be free of association with those who are ignorant of Dhammā.”

10. The keyword *sandiṭṭhiko* comes from *saṃ* + *diṭṭhi* (meaning vision), i.e. ability to see “*saṃ*” or defilement.

- One becomes *sandiṭṭhiko* (one who is able to see “*saṃ*” clearly) at the *Sotāpanna Anugāmi* stage. Most texts define *sandiṭṭhiko* with inconsistent words like self-evident, immediately apparent, visible here and now, etc.

11. Another very important word is *saññā* which come from *saṃ* + *ñā* (meaning knowing) = knowing or understanding “*saṃ*.” This actually happens when one attains *Nibbāna*. Until then one has a distorted perception (*saññā*) is clouded or distorted. See, “[Saññā – What It Really Means.](#)”

- When we see people, for example, we identify them according to our familiarity with them or based on our perceptions of them. We do not “see” the true nature of anything until *Nibbāna* is attained. Thus it is said that until we attain *Nibbāna*, we have distorted (*vipallāsa*, Sinhala is *vipareetha*) *saññā*.
- Don’t worry about some of these deeper meanings, if you are not familiar with them. At least one is able to see a connection to the root word “*saṃ*.”

12. *Samvara* (or *saṃvara*) = *saṃ* + *vara*, where *vara* means “remove.” Therefore, *saṃvara* means removing “*saṃ*” via moral behavior, also called “*sīla*.”

- “*Yam samādānaṃ taṃ vataṃ. Saṃvaraṭṭhena sīlaṃ*” means just trying to live by set precepts would not work. Moral behavior comes automatically upon one becoming a *Saṅḍiṭṭhiko* (a *Sotāpanna Anugāmi* or a *Sotāpanna*.)
- *Saṃvara sīla* will be automatically enforced 24 hours a day, not just on specific days. That is because it comes naturally, with understanding.
- On the other hand, “*Yam samādānaṃ taṃ vataṃ*”, means observing the five precepts or eight precepts on specific days is just a ritual, or “*vata*.” Such rituals are good starting points but will be “upgraded to” *Saṃvara sīla* when one gains wisdom (*paññā*).

13. Another keyword is *saṃsāra* or *saṅsāra* which means “rebirth process.”

- That, of course, comes from *saṅ* + *sāra*, where “*sāra*” means fruitful. We do “*saṅ*” willingly because we perceive them to be good (“*sāra*”). Then we get trapped in the rebirth process.
- Note that sometimes it is natural to pronounce with the “m” sound; that is the reason for writing is as “*saṃsāra*.” See more examples in #15 below.
- We have the wrong perception that “*saṅ*” are good and fruitful. Thus one continues in the long rebirth process by doing *saṅkhāra* (and especially *abhisāṅkhāra*) with the wrong perception that those are fruitful.

14. A nice example to illustrate the significance of “*saṅ*”, is to examine the verse that Ven. Assaji delivered to Upatissa (the lay name of Ven. Sariputta, who was a chief disciple of the Buddha):

“*Ye dhammā hetupabbavā, Tesam (te saṅ) hetuṃ Tathāgato āha, Tesañca (te saṅ ca) yo nirodho, Evaṃ vādī mahāsamaṇo*”

Te = those, *hetu* = cause, *pabbava* = *pa* + *bhava* or “repeated birth” (see, “[Pabhassāra Citta, Radiant Mind, and Bhavaṅga](#),” *nirodha* = *nir*+*udā* = stop from arising.

- The translation is now crystal clear:

“All *dhammā* that give rise to the rebirth process arise due to causes arising from the “*saṅ*”s: *rāga*, *dosa*, *moha*. The Buddha has shown how to eliminate those “*saṅ*”s and thus stop such *dhammā* from arising”

- “*Dhammā*” here does not mean Buddha *Dhammā*, but *dhammā* in general; see, “[What are Dhammā? – A Deeper Analysis](#).”

15. Knowing the correct meaning of such terms leads to a clear understanding of many terms:

- *Saṅgāyanā* = *saṅ* + *gāyanā* (meaning recite) = recite and categorize “*saṅ*” (and ways to remove them) in organizing *Dhammā* for passing down to future generations. The first *Saṅgāyanā* took place just three months after the *Parinibbāna* of the Buddha.
- *Saṃyutta Nikāya* of the *Tipiṭaka* contains *suttā* that explain “*saṅ*”: “*saṅ*” + “*yutta*”, with “*yutta*” meaning “connected with” (it rhymes as “*saṃyutta*”). Note that most English translations refer to *Saṃyutta Nikāya* as “Connected Discourses, but do not say connected to what.
- *Sanvega* (or “*samvega*”) = *saṅ* + *vega* (meaning speed) = forceful, strong impulses due to “*saṅ*.”
- *Sanyoga* (or “*samyoga*”) = *saṅ* + *yoga* (meaning bond) = bound together via “*saṅ*.”
- *Sansindheema* = *saṅ* + *sindheema* (meaning evaporate, remove) = removing *saṅ*, for example, via the seven steps described in the [Sabbāsava Sutta](#). This leads to *nirāmisā sukha* or *Nibbānic bliss*.
- *Sansun* = *saṅ* + *sun* (meaning destroy) = with the removal of “*saṅ*” (“*sun*” rhymes like *soup*) one’s mind becomes calm and serene.
- *Sancetanā* = *saṅ* + *cetanā* = defiled intentions.
- *Samphassa* = *saṅ* + *phassa* = defiled sense contact.

Over 70 Pāli words with the “*saṅ*” root are given at [“List of “San” Words and Other Pāli Roots.”](#)

16. We will encounter many such instances, where just by knowing what “*saṅ*” is, one could immediately grasp the meaning of a certain verse. Most of these terms are easily understood in the Sinhala language.

- Contrary to popular belief, it is NOT Sanskrit that is closely related to the *māgadhi* language that the Buddha spoke, it is Sinhala (or Sinhalese) that is closely related to *māgadhi* (*māgadhi*= “*maga*” + “*adhī*” = Noble path).

17. The *Tipiṭaka* is in Pāli with Sinhala script (Pāli does not have its own alphabet). Pāli is a version of *māgadhi* suitable for writing down oral discourses in summary form suitable for transmission; see, [“Preservation of the Dhamma.”](#) More posts on that at, [“Historical Background.”](#)

- Many Pāli words have complex meanings and need to be explained in detail. That is the reason for many commentaries. However, most early commentaries no longer exist and those recent ones have many errors; see, [“Misinterpretation of Anicca and Anatta by Early European Scholars.”](#)
- A good example is the key Pāli word “*anicca*.” That word got confused with “*anitya*,” which is a Sanskrit word. That Sanskrit word does mean “impermanence,” but the Pāli word “*anicca*” has a very different meaning.
- The actual meaning of *anicca* becomes clear when one realizes that the Pāli word “*icca*” (pronounced “ichcha”) means “this is what I like.” Thus *anicca* has the opposite meaning (“*na*” + “*icca*”) or “cannot keep it the way I like”; see, [“Anicca, Dukkha, Anatta.”](#)
- Pāli words are written not with “Standard English” but with “*Tipiṭaka* English.” See, [““Tipiṭaka English” Convention Adopted by Early European Scholars – Part 1”](#) and [““Tipiṭaka English” Convention Adopted by Early European Scholars – Part 2.”](#)

18. One’s tendency (i.e., *gati*) to do *dasa akusala* gets one bound to this world of 31 realms. Until one removes such “bad *gati*,” one will have the following associated characteristics: *āsava*, *anusaya*, *saṃyojana*, etc; see, [“Conditions for the Four Stages of Nibbāna.”](#)

- **As long as one has any type of *gati*, *āsava*, *anusaya*, *saṃyojana*, one has the ability to pile up more “*saṅ*” or to do *dasa akusala*.**
- Once one removes the strongest of the *dasa akusala* (and especially the 10 types of *micchā diṭṭhi*), one will be able to grasp the *Tilakkhaṇa*.
- Then one’s *puñña kamma* will become *kusala kamma*, leading to the four stages of *Nibbāna*. This is a subtle point, but is explained in simple terms in the post, [“Is It Necessary for a Buddhist to Eliminate Sensual Desires?”](#)
- Some *saṅkhāra* arise from with *alobha*, *adosa*, or *amoha* as a root cause; see, [“Kusala-Mūla Paṭicca Samuppāda.”](#) The other types of *saṅkhāra* arise from *avijjā* (ignorance), and have *lobha* (greed), *dosa* (hatred), or *moha* (delusion) as a root cause; see, [“Akusala-Mūla Paṭicca Samuppāda.”](#)

3.1.2 Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka

Revised May 12, 2016; February 23, 2019

There is much confusion about these words. These are key Dhamma concepts, and one needs to sort them out in order to really understand other key concepts like rebirth and *Paṭicca Samuppāda*. Please read the post, [“What is “San”? – Meaning of Sansāra \(or Samsāra\)”](#) before reading this post.

Saṅkhāra (what we accumulate)

1. “*Punnābhi saṅkhāra, apuññābhi saṅkhāra, ānenjābhi saṅkhāra ayan vuccathi avijjā paccayā saṅkhāra.*” This is how the short verse of “*avijjā paccayā saṅkhāra*” in *akusala-mūla paṭicca samuppāda* is explained in detail.

- Thus only *abhisāṅkhāra* (“*abhi*” means higher or stronger), those *saṅkhāra* done with *avijjā*, lead to the rebirth process.
- Note that *puññābhi saṅkhāra* is *puñña+abhisāṅkhāra*, and similarly the other two are also *abhisāṅkhāra*. Also, “*apuñña*” means immoral,” *puñña*” means moral, and “*ānenja*” means “higher *jhānic*.” All three modes lead to rebirth in one of the 31 realms (lowest 4 realms with *apuññābhi saṅkhāra*, realms 5 through 27 with *puññābhi saṅkhāra*, and realms 28 through 31 with *ānenjābhi saṅkhāra*, respectively).
- Thus any kind of *abhisāṅkhāra* is done with ignorance (*avijjā* or not knowing the real characteristics of this world of 31 realms: *anicca, dukkha, anatta*).
- However, we will see below that we do need to accumulate *puññābhi saṅkhāra* in a strategical way, mainly to avoid rebirth in the *apāyā* (lowest four realms) until we attain *Nibbāna*.

2. As we saw above, “*san*” is what one acquires when one does anything with *sañcetanā* (“*san*” + “*cetanā*”). *Saṅkhāra (san+kāra)* is simply actions that lead to acquiring “*san*.” However, it is only “*abhisāṅkhāra*” or *saṅkhāra* that arise through *avijjā* that can lead to rebirth. There is a difference between *saṅkhāra* and *abhisāṅkhāra*: [*kāra*, (m.) , deed; service; act of homage]

- When deeds are done to live in this world, one has to do *saṅkhāra*. They become *abhisāṅkhāra* when those are done with greed, hate, and/or ignorance. *Saṅkhāra* become *abhisāṅkhāra* when one starts generating further thoughts (“wheeling process”) about the sense experiences (pictures, sounds, tastes, etc) ; see #9 on “[Nibbāna – Is It Difficult to Understand?](#).”
- Thus an *Arahant* does *saṅkhāra* to live; even breathing is *kāya saṅkhāra*. But an *Arahant* has stopped the “wheeling process” or form an attachment to what is seen, heard, etc. It is that “wheeling process”, which is detailed in the *Paṭicca Samuppāda* section that leads to *abhisāṅkhāra*.
- When those *saṅkhāra* become strong, they are called “*abhisāṅkhāra*” or “strong *saṅkhāra*” that can lead to rebirths.

3. *Abhisāṅkhāra* are three kinds as mentioned above:

- There are actions that lead to bad consequences during life and also to bad rebirths in the four lowest realms (*apāyā*). These are “*apuññābhi saṅkhāra*” or immoral deeds: *apuññā abhi saṅkhāra*..
- Actions that lead to good consequences in life and also to good rebirths are called “*puññābhi saṅkhāra*” or meritorious deeds; these lead to birth in good realms (human, *deva*, and the *rūpa lokas*), thus avoiding rebirth in bad realms where one could get trapped for many eons. Thus it is important to accumulate *puññābhi saṅkhāra*: *puññā abhi saṅkhāra*.
- When one cultivates “*lokiya jhānā*” or mundane higher meditative states (*arūpa jhāna* leading to rebirth in the highest four *arūpa loka* realms), via breath meditation for example, one is able to be reborn in the four higher Brahma worlds. These also prolong *saṃsāra*, and are called “*ānenjābhi saṅkhāra*”: *ānenja abhi saṅkhāra*.
- It is interesting to note that “*ānenja*” means “no more rebirths” and thus “permanent”: the ancient *yogis* (including Alara Kalama and Uddakarama Putta) thought these realms have infinite lifetimes and equated the births there to the “ultimate release.” Of course, the Buddha found out that those also have finite lifetimes, even though extremely long, lasting eons (billions of years).
- Here those *yogis* can temporarily suppress all desires for *kāma loka* or *rūpa loka* existences. However, since they had not comprehended the *anicca* nature, they still have “hidden *avijjā*” or “*avijjā anusaya*.”

4. Therefore, it is easy to remember *abhisāṅkhāra* as those actions that lead to prolonging *saṃsāra* (or *saṃsāra*), the cycle of rebirths. There is a “latent energy” that is produced by each such action (*abhisāṅkhāra*) that will give fruits at a later time.

- Such “actions” can be done via the mind, speech, or the body; these lead to *mano saṅkhāra*, *vacī saṅkhāra*, and *kāya saṅkhāra* respectively. The “defiled actions” are *abhisāṅkhāra*.

5. Does this mean one should not do meritorious deeds (with *puññābhisaṅkhāra*) because those also prolong *saṃsāra*? No. The Buddha emphasized that one should not shy away from doing meritorious deeds.

- There is a way to do meritorious deeds without prolonging *saṃsāra*, and that is detailed in the “**Kusala-Mūla Paṭicca Samuppāda**,” an important part of the Buddha’s *Paṭicca samuppāda* doctrine that has been hidden for thousands of years. But one needs to stay away from wishing for “things in return” for such meritorious deeds as much as possible, because such thoughts are based on greed.
- In the Abhidhamma language, one should generate “*ñāṇa sampayutta, somamnassa saḥagata citta*” (thoughts generated with wisdom and joy), which is the highest moral (*sobhana*) *citta*. Here wisdom means comprehension of the true nature; it starts with getting rid of 10 *micchā diṭṭhi* and then further grows as one understands *anicca, dukkha, anatta* to higher levels. Wisdom culminates at the *Arahant* stage.
- Any good deed will have its good consequences whether one wishes or not. By wishing for “material things” or “*jhānic* pleasures” one turns a meritorious action to either a less potent “*ñāṇa vippayutta*” (devoid of wisdom) moral *citta* or even an *apuññābhi saṅkhāra*. We will discuss that below.

Kamma (Actions to Prolong Saṃsāra)

Kammic energy is generated when one turns *saṅkhāra* to *abhisāṅkhāra* by the “wheeling process”; see above. For example, when one sees an object, that is just *saṅkhāra* due to a *kamma vipāka*. However, if one then starts thinking about how good it is, or think about how to acquire it, then it becomes *abhisāṅkhāra*; here one now has INTENTIONS about that object, one is hoping to get something.

- That is why the Buddha said, “*cetana ham Bhikkhave kamman vadami*,” i.e., “I say that intention is *kamma*.”
- So it is important to remember that *kamma* is intention, and even though it can be done by the mind, speech, or the body, all those have their root in the mind. We cannot say anything or do anything without a thought in the mind to do so (see the Abhidhamma section for details).
- For example, the intention to go for a walk is a *kamma* that does not have any power to generate a good or bad *vipāka* in the future. That *kamma* will only get that task done.

Thus the key to *Nibbāna* is to stop valuing and thinking about *kāma āsvada* [*kāma assāda*] (sense pleasures; *āsvada* in Sinhala). This cannot happen until one sees the fruitlessness of sense pleasures in the long run (*anicca, dukkha, anatta*); see, the section “Assāda, Ādīnava, Nissarana” under *Paṭicca Samuppāda*. [*assāda*: [m.] “mind-made pleasures”; taste; enjoyment; satisfaction.]

Kamma Bīja (Kamma Seeds) or Kamma Bhava

When a *kamma* (*abhisāṅkhāra*) is committed, the *kammic* potential of that *kamma* is deposited in a *kamma bīja* (*kamma* seed); *kamma* seed is NOT a physical entity, it is an “energy” or “potential” to bring about an effect in the future. It can also be called a “*kamma bhava*.”

- A *kamma* seed can be compared to a normal seed, say for example, a seed of an apple tree. The potential to bring about a fully grown apple tree is in the apple seed. However, if the seed is kept in a dry

place with no contact with soil, it does not get to germinate. It will germinate if placed under soil and fed with water and nutrients. Then it can grow to an apple tree which can yield thousand more seeds.

- Similarly, a *kamma* seed has the **POTENTIAL** to germinate or come to fruition if suitable conditions appear; but a *kamma* seed is an energy lying below the *suddhaṭṭhaka* stage. It can then yield results with an impact that is many times the impact of the original deed (this holds true for both good and bad); the results are the *kamma vipāka*; see, [“What is Kamma? – Is Everything Determined by Kamma?”](#)
- It is also possible to remove many of one’s bad *kamma* seeds. When we acquire a “bad *kamma* seed” we get indebted to another being. Just like one can be debt-free by paying off existing loans, one can “pay back” old debts that have been accumulated in the cycle of rebirths by “transferring merits” when one does good deeds, and also by doing the *Ariya metta bhāvanā*; see, [“Transfer of Merits \(Pattidana\)- How Does that Happen?”](#) and [“5. Ariya Metta Bhāvanā \(Loving Kindness Meditation\).”](#)

Nothing in this world is permanent (but that impermanence is not *anicca*); *kammic* energy in a *kamma* seed also eventually loses its power, and the “staying power” depends on the strength of the particular *kamma*. For example, those seed corresponding to “*anantariya akusala kamma*” such as killing one’s parents or an *Arahant*, will bring fruits without delay (i.e., in the very next birth) before they lose their power.

Kamma Vipāka (Results of a Kamma Seed or Kamma Bhava)

So it is important to distinguish between *kamma* and *kamma vipāka*: the first is the action, second is the consequence. When someone laments “this is my *kamma*” when he/she faces a bad situation, what is really meant is that this happens “because of what I had done in the past.” It is a *kamma vipāka*.

When one does something good or bad that *kammic* energy is deposited as a *kamma bīja* (seed), which is also called a *kamma bhava*. Then that *kammic* energy can give rise to *kamma vipāka* in the future when suitable conditions materialize. There are two ways to avoid *kamma vipāka*:

- Just like a seed will not germinate until the right conditions appear (soil, water, sunlight), *kamma vipāka* cannot materialize until suitable conditions appear. Thus by acting mindfully (not getting into “bad situations”) one can avoid them; see, [“Anantara and Samanantara Paccaya.”](#)
- Most importantly, we can remove many *kamma* seeds by doing *metta bhāvanā*. When we acquire a bad *kamma* seed we become indebted to another being; we can get rid of that *kamma* seed by paying off that debt. The best way to do that is to ask for forgiveness and transfer merits of one’s good deeds to all beings (since we have become indebted to uncountable number of beings); see, [“Kamma, Debt, and Meditation.”](#)

Kamma vipāka (from the germination of seeds) lead to two main consequences:

- They can lead to consequences during a lifetime (either the present or a future life). These are called “*pavutti kamma bhava*.”
- Some strong *kamma vipāka* give rise to new existence (in the rebirth process). These are called “*uppatthi kamma bhava*.”

In either case, *kamma vipāka* are NOT deterministic. Both types can be reduced in strength or even be made ineffective. This can be done via several ways:

- When one becomes an *Arahant*, since there is no more rebirth, all *kamma* seeds that do not get to come to fruition before the death of an *Arahant* become ineffective in producing a rebirth: Because an *Arahant* has removed *avijjā*, the “*akusala-mūla paṭicca samuppāda* cycle” becomes ineffective and thus “*bhava paccayā jāti*” does not get to initiate a new birth.
- However, even an *Arahant* is subjected to any *kamma vipāka* that get a chance to emerge during the current life, especially the strong ones. Even the Buddha suffered from physical pains during the last years of his life. Even if one transfers merits to other beings (as *Arahants* do), **if the other being cannot**

accept those merits, then those debts do not get paid off; see, "[Transfer of Merits \(Pattidana\) – How Does it Happen?](#)." Thus even the Buddha had a few "unpaid debts" left.

- We all have done innumerable *kamma* in this long *samsāra*. Thus many *kamma* seeds are waiting to "bear fruit" under right conditions. This is a key point one really needs to digest. Just like a seed can lay dormant for long times, and start germinating only under the right conditions (soil, water), a *kamma vipāka* bears fruit only when the conditions become right.
- Thus most *kamma vipāka* can be suppressed and avoided (not letting them germinate) by acting with mindfulness (*yoniso manasikara*). This is where a calm mind helps. An agitated mind is not able to make rational decisions. See, "[Key to Calming the Mind](#)." As mentioned there, working on the Five Hindrances (*panca nivarana*), that covers a mind, is important.

How to do Meritorious Deeds without Accumulating *Abhisankhāra*

Most people, even born Buddhists, do not get this right. They think *Nibbāna* can be attained by just doing meritorious deeds. Here are some key points to consider:

1. One definitely needs to avoid *apuññābhi sankhāra* (unmeritorious deeds) that will lead to bad life events and/or bad rebirths, i.e., the four lower realms; see, "[The Grand Unified Theory of the Dhamma](#)." They are "akusala" by definition, but ones of the worst kind; these are called "pāpa" in Pāli and Sinhala and "paw" (rhymes like "cow") in Sinhala. This is what one needs to avoid in leading a moral life; see, "[Moral Living and Fundamentals](#)."

2. *Punnābhi sankhāra* (meritorious deeds) may be accompanied by *apuññābhi sankhāra* if one's intention is not good. If one does a good deed AND wishes for something in return, that wishing is done with greed. Any good deed WILL produced good results whether one wishes or not. They actually lead to good life events and good rebirths (at or above human realm). Thus *puññābhi sankhāra* can help in pursuing *Nibbāna*, and should be done without greedy intentions. A *Sotāpanna* automatically does meritorious deeds with such understanding; we will discuss this in the "[Kusala-Mūla Paticca Samuppāda](#)." Thus the *Aryan* way is to do a good deed and share the merits of that deed with all beings, instead of wishing for something in return.

- Thus one needs to be careful here because one may be acquiring *apuññābhi sankhāra* at the same time. This is a bit complex and is best illustrated with an example. Suppose one donates a meal to a hungry person. That act is inherently one that will produce a good outcome. However, if the person "makes a wish" such as "may I get delicious foods in the future because of this good deed", that is a greedy thought, a greedy intention (*cetana*). Thus while this does not negate the good deed, it also could produce ANOTHER *kamma vipāka* leading to bad life events.
- This pitfall can be avoided by doing the good deed with a pure intention, that is not associated with greed, hate, or ignorance. One gives a meal to hungry person out of compassion; to quench the hunger. That is all. Here one does not lose any possible benefits of the act.
- When one starts comprehending *anicca* (that one cannot maintain anything to one's satisfaction over the long run), one AUTOMATICALLY stops wishing for "good things."
- Furthermore, one can reap more benefits by additionally doing a mental act to quench the potential of previous bad *kamma* seeds. This is called "giving of merits" or "*pattidana*" which is mislabelled as "*puñña anumodana*" frequently; see, "[Punna Kamma – Dāna, Sīla, Bhāvanā](#)." One could wish that the merits of this good deed be shared with all other beings. We have built-up debts with all the beings in this long *samsāra*, that needs to be paid off (see, "[Kamma, Debt, and Meditation](#)"). Thus, sharing the merits actually becomes a "*visankhara*" or "unwinding the power of previous *sankhāra*." This is thus one way to lessen the impact of previous bad *kamma vipāka*.
- The Buddha said that one always need to do good, meritorious, deeds. Giving is especially encouraged. One could turn these deeds to *visankhara* by sharing the merits. By the way, sharing

merits does not remove any possible good outcomes to oneself. Those were already acquired in the original act itself. The key here is not to wish for “profits in return”, because such thoughts are associated with greed (of course this cannot be stopped by sheer will power until one comprehends *anicca*).

3. The third kind of *abhisāṅkhāra*, “*ānenjābhi saṅkhāra*” are associated with higher (*arupavacara*) *jhānic* states attained via *samatha bhāvanā*, such as breathing meditation or *kasina* meditation. They are pursued in order to achieve higher meditative states, and thus are pursued with a greedy thought (pleasure).

- These meditation techniques do not help with the cleansing of the *āsavas*; see, “[Samsaric Habits, Character \(Gathi\) and Cravings \(Āsava\)](#),” and “[The Way to Nibbāna – Removal of Āsavas](#).”

4. *Jhānic* states are achieved automatically when pursuing *Nibbāna* (not *anāriya jhānā* but *Ariya jhānā*). The goal here was to achieve *Nibbāna*, and thus no *saṅkhāra* are accumulated in this process. This brings up another question: Is seeking *Nibbāna* another type of craving (*āsava*)?

- *Nibbāna* is attained via removing craving for **everything in this world**: “*ragakkhaya Nibbanan, Dosakkhaya Nibbanan, Mohakkhaya Nibbanan*.”
- “Craving” for *Nibbāna* is called *chanda* (one of the [The Four Bases of Mental Power \(Satara Iddhipāda\)](#)). This “liking for *Nibbāna*” is the key factor that fuels the other three: *virīya* (effort), *citta* (thoughts), and *vīmaṃsā* (investigations).
- Thus in seeking *Nibbāna*, one is not craving for anything **in this world**. One is thinking and working diligently to comprehend the true nature of the world (*vīmaṃsā*), and with that wisdom gained, the mind automatically gives up craving for anything.

Kāya, Vacī, and Mano Saṅkhāra

1. *Saṅkhāra* can lead to body movements, speech, and thoughts; they are respectively called *Kāya, Vacī, and Mano Saṅkhāra*. If those are not done with greed, hate, or ignorance, they are merely *saṅkhāra*. But if they are done with greed, hate, or ignorance, they become *abhisāṅkhāra*.

- The recent post, “[Saṅkhāra – What It Really Means](#)” for a detailed description.

2. Briefly, *mano saṅkhāra* are automatically generated based on our *gathi*. All our thoughts that make body parts move (except for speech) are *kāya saṅkhāra*. *Vacī saṅkhāra* are generated when we move our mouth, lips, tongue, etc to speak.

- When we are thinking about doing something we “play it out” in the mind (for example reciting something silently in the mind). That is mostly *vacī saṅkhāra* and are also called *vitakka* and *vicara*; when we are thinking and contemplating Dhamma concepts, they are called *savitakka* and *savicara*, with the prefix “*sa*” denoting “good.”
- Thus “talking to oneself” is done with *vacī saṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra](#).”
- *Mano saṅkhāra* are just feelings (*vedanā*) and perceptions (*saññā*) that arise automatically due to a sense input that comes via a *kamma vipāka*.

3. Thus it is clear that most enjoyments that we experience come through *vacī saṅkhāra*. We can be sitting at one place quietly and generating enormous amounts of *vacī saṅkhāra*, thoroughly enjoying the experience. Most people do this when they go to bed at night while waiting to fall asleep.

- It is a good idea to try to keep the mind away from defiled thoughts while falling asleep; this can be done getting to habit of thinking about a Dhamma concept, or to listen to chanting of *sutta* (*pirith*), keeping the volume low (like playing background music); see, “[Sutta Chanting \(with Pāli Text\)](#).” It will be easier to fall asleep and one will have a restful sleep too.

For more details, see, “[Kamma are Done with Saṅkhāra – Types of Saṅkhāra](#).”

3.1.3 Saṅkhāra – Life is a Bundle of Saṅkhāra

Revised November 26, 2017

In the previous introductory post, [“What is ‘San’?”](#), we introduced the term “*saṅkhāra*”, and in the next post *saṅkhāra* was discussed in somewhat technical terms. Since it is such an important term, in this post I will discuss it in a bit more detail.

1. Buddha Dhamma is based on the fact that all “*saṅkhāra*” are done in vain: “*sabbe saṅkhāra anicca.*”

- As we saw in the previous post, *saṅkhāra* (“*san*” + “*kara*” or actions; සන් + කර in Sinhala) are anything (thought, speech, bodily actions) done while living in “this world” of 31 realms. This includes breathing, walking, or thinking about the chores for the day.
- All *saṅkhāra* arise in the mind. We cannot utter a word or lift a finger without generating *saṅkhāra* in the mind. It happens very fast, so it feels like we just speak or do things; see, [“Saṅkhāra – What It Really Means”](#) and [“Difference Between Dhammā and Saṅkhāra.”](#)

2. So, all *saṅkhāra* involve thinking (some could be manifested as speech or bodily actions), but some actions like breathing happens without CONSCIOUS thinking. Those are just *saṅkhāra* that do not have *kammic* consequences.

- However, *saṅkhāra* become *abhisāṅkhāra* when they involve conscious thinking with *lobha*, *dosa*, *moha* (or *alobha*, *adosa*, *amoha*) coming to play roles. Those *abhisāṅkhāra* have bad (or good) *kammic* consequences.
- Thus even an *Arahant* keeps doing *saṅkhāra* until death. But an *Arahant* does not do *abhisāṅkhāra*, a “stronger version” of *saṅkhāra* that will lead to accumulating mental energy (*kamma*) for future repercussions (*kamma vipāka*) until that *kammic* energy is exhausted.
- In order for a *saṅkhāra* to become an *abhisāṅkhāra*, one of the six root causes (greed, hate, ignorance, generosity, kindness, wisdom) need to be involved.

3. If the “bad roots” of greed, hate, and ignorance are involved, then those thoughts, speech, actions will create *kamma bīja* (or energy seeds) that either lead to bad outcomes during a life or to rebirth in the lowest four realms (*apāyā*). These are *apuññābhisāṅkhāra* (“*apuñña*” + “*abhisāṅkhāra*” where “*apuñña*” means non-meritorious).

- On the other hand, *abhisāṅkhāra* done with the “good roots” of generosity, kindness, wisdom either lead to good outcomes during a life or to rebirth in the realms at or above the human realm. These are *puññābhisāṅkhāra* (“*puñña*” + “*abhisāṅkhāra*” where “*puñña*” means meritorious).
- If no roots are involved, they are just *saṅkhāra*, and their *kamma* seeds are duds; there is no energy in them. Basically one can say, *saṅkhāra* (that are not *abhisāṅkhāra*) do not generate *kamma* seeds.

4. Let us take some examples. When we see someone is walking with a knife in hand, we cannot come to a conclusion about what kind of *saṅkhāra* is that person is generating.

- He may be just taking the knife from one place to another, in which case, it is just *saṅkhāra*.
- If he is planning to stab someone, then he is generating *apuññābhisāṅkhāra*.
- If he is planning to rescue an animal who got entangled in a trap, then he is generating *puññābhisāṅkhāra*.
- In any type of speech or bodily action, what really matters is the INTENTION behind the speech or action.

5. In another example, we may see two people have built and donated two hospitals for the poor. Even though both seem to be “good actions”, we cannot say both had *puññābhisāṅkhāra*. One could have had an ulterior motive of getting elected in an upcoming election, rather than thoughts of loving kindness for poor

people. In that case, he would be generating mostly *apuññābhisāṅkhāra*, even though there may be some *puññābhisāṅkhāra* involved too.

- This is why sorting out *kamma* is impossible for anyone but a Buddha. Some of our actions could involve both kinds of *abhisāṅkhāra*. For example, if we see a bird digging up a worm and chase the bird away, we would have done both kinds of *abhisāṅkhāra*: Saving the life of the worm is a *puññābhisāṅkhāra*, but we also did an *apuññābhisāṅkhāra* because we denied the bird of its meal. Both types of *abhisāṅkhāra* can bear fruits (*vipāka*) in the future.

6. There is this famous “trolley problem” in ethics, where one could save five people from death by sacrificing the life of a single person; see, [WebLink: WIKI: Trolley problem](#)

This “thought experiment” has been debated for many years. We can make the following observations based on Buddha Dhamma:

- If one decides to take action (i.e., save five by sacrificing one), then one will acquire “good *kamma*” for saving the five lives, and “bad *kamma*” for killing the other person. Both types can bear fruits in the future.
- But it goes even deeper. What if the person that we sacrificed was an *Arahant* or at least a *Sotāpanna*, and the other five were normal people or even criminals? Then we would have acquired much more bad *kamma* than good *kamma*.

7. When someone is talking or doing some bodily action, we can at least try to guess what kind of *saṅkhāra* are involved. But if a person is just sitting down quietly, he/she could be generating any kind of *saṅkhāra* ranging from just thinking about whether or not to go out for a walk (just *saṅkhāra*) to planning a murder (worst kind of *apuññābhisāṅkhāra*).

- We generate more *abhisāṅkhāra* via thinking than via speech or actions.
- When we have disagreement with other people, we normally do not hit the person or even refrain from saying anything. But depending on the purity of our minds, we may be generating a little to unimaginable amounts of *apuññābhisāṅkhāra*. This is a key factors that most people tend to disregard.
- If someone’s outward actions/speech seem to be “disciplined”, we automatically assume that he/she is a good person; and the person may be trying to fool himself/herself by displaying that outward appearance. But if the mind is impure, there could be a lot of hateful/greedy thoughts in that mind. Whether or not any verbal or bodily actions are committed, those thoughts still accumulate *kamma* seeds.

8. Therefore, it is utterly useless to judge other people. Each person has true awareness AND control only over one’s own thoughts, speech, actions, which are ultimately based on the intentions.

- **But we know exactly what our own intentions are.** And that is what really matters. We may be able to fool a court of law by hiring a good lawyer, but we will have to reap the results of what we sow in the future at some point.

9. This is the basis of *ānāpāna* meditation, to be aware of the types of *saṅkhāra* involved in a given action; see, “[7. What is Ānāpāna?](#)” If someone asks us to join in fishing trip, we need to think what kind of *kamma* will be associated with killing fish for our pleasure; this is the basic form of “*kāyānupassanā*.” Contemplate on any bodily action one is about to do and abstain from doing it if it involves *apuññābhisāṅkhāra* (in this case taking the lives of several fish for our pleasure).

- Bodily actions are easier to prevent, because they take time and we have time to contemplate.
- Speech is a bit more tricky, because speech comes out faster than carrying out bodily action. Still one can stop oneself even after uttering a few sentences.
- Thoughts are the hardest, and that is why “*cittānupassanā*” comes after one has practiced “*kāyānupassanā*.”

10. If one wants to start doing *ānāpāna* meditation, one should first control one's bodily actions, and the more one does it, the easier it becomes. And then it also becomes easier to control one speech. When both actions and speech are brought under control, one's thoughts will be easier to control too.

- Furthermore, willfully engaging in *puññābhisaṅkhāra* also helps to keep *apuññābhisaṅkhāra* at bay. By concentrating on meritorious deeds, one's mind is automatically turned away from thinking about unmeritorious deeds.
- This is why real Buddhist meditation is much more than just formal sitting meditation. **The key is to purify the mind, and avoid defiling the mind at anytime. One could be doing the breath meditation for a lifetime, but may not get anywhere in purifying the mind.**
- This is explained in detail and how to start practice in the "[Living Dhamma](#)" section. One does not even need to believe in rebirth in the beginning.

11. *Nibbāna* is attained not by abstaining from both *puññābhisaṅkhāra* and *apuññābhisaṅkhāra* as some suggest. On the way to *Nibbāna*, one needs to do *puññābhisaṅkhāra* AND also engage in learning Dhamma so that one could comprehend the true nature of all types of *saṅkhāra*, i.e., that all *saṅkhāra* are *anicca*, *dukkha*, *anatta*. This leads to the purification of the mind; just by doing *puññābhisaṅkhāra* is not enough to purify the mind.

- Ultimately, just by doing *puññābhisaṅkhāra* is not enough to purify the mind. However, one MUST start there before being able to comprehend *anicca*, *dukkha*, *anatta*; see, "[Living Dhamma](#)."

Next, "[Difference Between Dhamma and Saṅkhāra \(Sankata\)](#)",

3.1.4 Difference Between Dhammā and Saṅkhāra

Revised March 22, 2017; April 17, 2017; November 5, 2017; July 19, 2018; August 9, 2019; January 11, 2020

Introduction

We will discuss the difference between *saṅkhāra*, *saṅkhata* (*sankata* in Sinhala), and *dhammā*. Some of the descriptions given here are not compatible with meanings given in many current *Theravāda* texts. However, they are fully compatible with the *Tipiṭaka*. Please send me a comment (lal@puredhamma.net) if you find evidence to the contrary.

- First, it is essential to remember that the word "*dhamma*" can mean somewhat different things in different contexts. In "Buddha Dhamma", it means the "Buddha's teachings."
- *Dhammā* (with a long "a" at the end) is mostly used to indicate energy created by the mind; it is also called a *kamma bīja*.
- But "*sabbe dhammā*" in "*sabbe dhammā anattā*" **includes everything, all phenomena belonging to this world of 31 realms. *Nibbāna* is not in this world, as discussed below.**
- I always give links to other posts. It is not necessary to read them, but if one needs more information or clarification, one should read them. That will make the concept to "really sink in."

Famous *Dhammapada* verses

1. There is confusion about the terms *saṅkhāra* and *dhammā* in the *Dhammapada* verses 277, 278, and 279; the first lines in those three verses are:

- "***Sabbe saṅkhāra aniccā***" or "all *saṅkhāra* are *anicca* (things cannot be maintained to one's satisfaction in the long run)." A better way to say it is that it is futile to make plans for such things **in the long term**. Of course, we must make plans for the necessary items to live this life.

- “*Sabbe saṅkhāra dukkhā*” or “all *saṅkhāra* eventually lead to *dukkha* (suffering).”
- “*Sabbe dhammā anattā*” or “all *dhammā* are without substance (not fruitful) at the end.”

Saṅkhārā Are Our Thoughts

2. *Saṅkhāra* are involved in thinking, speaking, and acting based on our intentions, hopes, and dreams. It is essential to realize that *saṅkhāra* are really our current thoughts.

- “*Saṅkhāra*” include all three types (*kāya saṅkhāra*, *vacī saṅkhāra*, *mano saṅkhāra*) that lead to any action, speech, or just thought (in that order). They all arise in *citta* (our thoughts).
- We say “Hello” to someone that is done with *vacī saṅkhāra*. If we walk from the living room to the kitchen to get a drink, that is done with *kāya saṅkhāra*. But those do not initiate *kamma vipāka* and are *kammically* neutral. But if we verbally abuse someone, that is done with strong *vacī saṅkhāra* (*abhisāṅkhāra*), and that will have *kamma vipāka*.
- More on *saṅkhāra* at, “[Saṅkhāra – What It Really Means.](#)”

3. Those *saṅkhāra* (or *abhisāṅkhāra*) that we generate may lead to the arising of an inert object or a living form. It leads to the arising of a *saṅkhata* (*sankata* in Sinhala).

- If one comes up with the idea of building a house, then the following steps may happen. He will carefully think about it (*mano saṅkhāra*, *vacī saṅkhāra*), and may talk about it with others (*vacī saṅkhāra*). If he decides to do it, then he may take actions (*kāya saṅkhāra*) to make it happen. In this case, our *saṅkhāra* gave rise to a house, and that house is a *saṅkhata* (*sankata* in Sinhala).

4. When we do something with the body (i.e., body movement), that is controlled by *kāya saṅkhāra* that arise in our minds.

- We are not robots (most lower animals are like robots). We can control our thoughts, speech, and actions. Sometimes we may do things automatically. But if we want to, we can change our speech or actions. Just try it out.
- When we speak or talk to ourselves, that involves *vacī saṅkhāra*; those also arise in our minds; see, “[Correct Meaning of Vacī Saṅkhāra.](#)”
- *Mano saṅkhāra* are thoughts that arise **automatically** (due to *kamma vipāka* and also our “gatī”).

5. Building a house in #3 above may not involve moral/immoral intentions. One may not generate strong *saṅkhāra* (called *abhisāṅkhāra*) that can create *kamma bīja* (*dhammā*), that can bring *kamma vipāka* in the future. Building a house is just a *kammically*-neutral action.

- However, planning to kill a human, for example, involves *mano saṅkhāra* and *vacī saṅkhāra* (in the planning stage) and then doing it with *kāya saṅkhāra*.
- In this case, all those *saṅkhāra* are *abhisāṅkhāra*, that can bring future bad *kamma vipāka*, in the form of rebirth in the *apāyā*, which includes the animal realm.

Abhisāṅkhāra Are Strong Saṅkhāra

6. *Abhisāṅkhāra* (potent or strong *saṅkhāra*) give rise to *kamma bīja*, which are also part of *dhammā*. **These are energies that were created by *javana citta***; see, “[Javana of a Citta – The Root of Mental Power.](#)” They can bring *kamma vipāka*.

- However, there are *dhammā* do not have energies (for example, *nāma gotta*, which are just past memory records are also *dhammā*).
- At the moment of death, such a strong *kamma bīja* or a *dhammā* comes to the mind via “*manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ*.” That new *viññāṇa* is the *paṭisandhi viññāṇa* for the new life; see, “[What are rūpa? – Dhammā are rūpa too!](#)”

- Therefore, now a new life is formed as a result of that *abhisankhāra*. This new life-form is also called a *saṅkhata* (*sankata* in Sinhala) because it arose due to that *abhisankhāra*.

7. That *saṅkhata* (*sankata* in Sinhala) came to existence because of that *abhisankhāra* during that immoral act. It came to life at a later time via *kamma vipāka*.

- Moral *abhisankhāra* or *puñña abhisankhāra* lead to good *kamma bīja/dhammā* that will lead to good rebirths (in human, *deva*, and Brahma realms).
- Immoral *abhisankhāra* or *apuñña abhisankhāra* lead to bad *kamma bīja/dhammā* that will lead to unfortunate rebirths (in the *apāyā*).
- **That is the link between mind and matter.** An *abhisankhāra* that arose in the mind led to the *saṅkhata* (*sankata* in Sinhala) is a *rūpa* (made of matter).
- That house in #3 was built using existing *rūpa*. But it is also possible to “create” new matter if one has *abhiññā* powers. Both are called *saṅkhata* (*sankata* in Sinhala).

All Rūpa Are Saṅkhata (Sankata in Sinhala)

8. Any *rūpa* (including visible objects, sounds, smells, tastes, and body touches) that we experience in this world is a *saṅkhata* (*sankata* in Sinhala), and they all undergo unpredictable change and eventually are destroyed; see, “[Root Cause of Anicca – Five Stages of a Saṅkhata.](#)”

- **The point is that we make our own future via our actions, speech, and thoughts; these are (abhi)saṅkhāra.**
- However, any of these new *saṅkhata* (*sankata* in Sinhala) will not last forever. Even if born in *deva* or Brahma realms, that *kammic* energy will run out one day. Then one will be directed to the next birth depending on the most potent *kamma bīja/dhammā* present at that time.
- The only difference is that one will be subjected to much suffering in the *apāyā*, while one will get to enjoy a “good life” in a higher realm. We all have been going through this “unending journey through most of the 31 realms,” which does not have a traceable beginning.

No Rūpa (Saṅkhata) Can Be Maintained in the Way We Like

9. Another critical point is that the net result of all these “journeys through various realms” is suffering. **That is because we tend to do more immoral things in “seeking pleasure” and are born mostly in the apāyā.**

- Any *saṅkhata* (*sankata* in Sinhala) that we make for ourselves (whether it is a house or a new life in the *deva* realm) that cannot be maintained to our satisfaction in the long run. The home will need repairs, and may even get burned down or flooded. A new life in the *deva* realm will end one day, and one will be back to square one.
- That is why it is said that “*Sabbe saṅkhāra aniccā.*” It is there because any *saṅkhata* (*sankata* in Sinhala) (that arise due to *abhisankhāra*) has a finite lifetime, and moreover, is subjected to unexpected changes (*vipariṇāma*) during that existence.

That Anicca Nature Leads to Suffering

10. When we don't get to maintain things to our satisfaction we suffer. Even if one makes a billion dollars and has a lovely family, one will have to leave all that behind when one dies. But even before that there could many other instances where one suffers (deaths of friends/family, diseases, loss of property, etc). That is the *vipariṇāma* nature that arise due to *anicca* nature.

- And **the root cause of that suffering is saṅkhāra (more correctly abhisankhāra).** That is why it is said, “*Sabbe saṅkhāra dukkhā.*”

- Again, ***saṅkhāra* are basically our CURRENT thoughts**; as soon as those thoughts go to the past, they become *nāma gotta* or memories.

11. The only thing that is not destroyed is *nāma gotta*, which are just **records** of “all events” (*saṅkhāra* and *abhisāṅkhāra*) of any given life-stream; see, “[What Reincarnates? – Concept of a Life-stream](#).”

- All these different terms could be confusing at first. They will all make sense eventually because they are all pieces of a big puzzle.

Nibbāna* Not Included in *dhammā

12. Ven. Walpola Rahula *Thero*, in his famous and otherwise excellent book, “What the Buddha Taught” did not get it right when he interpreted those verses. He included *Nibbāna* in *dhammā* (p. 57 of 1974 edition). **He took the difference between *dhammā* and *saṅkhāra* to be *Nibbāna*.**

- But as you can see, *saṅkhāra* and *dhammā* are two different entities. *Saṅkhāra* is what we generate in our minds.
- Strong *saṅkhāra* or *abhisāṅkhāra* lead to the creation of *kammic* energy, and that is a *dhammā* or a *kamma bīja*.
- However, there are many *dhammā* other than *kamma bīja*, and the only *abhisāṅkhāra* lead to *kamma bīja*. But both *saṅkhāra* or *abhisāṅkhāra* lead to memory records or *nāma gotta*. Also, *dhammā* includes concepts and even Buddha Dhamma.

13. Furthermore, *Nibbāna* does not belong to this world. **Therefore, to say *Nibbāna* is *anatta* is a terrible mistake.** There are four ultimate realities (*paramattha*): Thoughts (*citta*), mental factors (*cetasika*), matter (*rūpa*), and *Nibbāna*.

- Everything “in this world” can be described in terms of the first three. *Nibbāna* does not belong to “this world.”
- Furthermore, *anatta* is also mistranslated as just “no-self.” The problems with the traditional interpretation of *anicca*, *dukkha*, *anatta* are discussed in “[Anicca, Dukkha, Anatta – Wrong Interpretations](#).”
- Furthermore, *anicca*, *dukkha*, *anatta* are characteristics of “this world of 31 realms”; *Nibbāna* is not included.

***Nāma Gotta* are Permanent**

14. When we do *abhisāṅkhāra* (strong types of *saṅkhāra*), that lead to the formation of good or bad *kamma bīja*, or *dhammā*. That strong *kamma bīja* can lead to the arising of a *saṅkhata* (*sankata* in Sinhala) (living beings and even inert things).

- And ***nāma gotta*** (pronounced “*nāma goththā*”) are just records of what happened.

15. Unlike *saṅkhāra*, *kamma bīja*, and *saṅkhata* (*sankata* in Sinhala), *nāma gotta* are PERMANENT (they are only records). As stated in the “[WebLink: suttacentral: Najirati Sutta \(SN 1.76\)](#)”: “*Rūpaṃ jīrati maccānaṃ, nāmagottaṃ na jīrati*,” or “material things decay and get destroyed, but *nāmagotta* do not decay.”

- That is why someone with *abhiññā* powers can go back at any point in time to recall past events; also see, “[Recent Evidence for Unbroken Memory Records \(HSAM\)](#).”
- Whenever we do something (a *saṅkhāra*) an “record” (“*nāma gotta*”) of it is made. Thus for a given sentient being, a record of all activities from the beginning-less time survives and is one’s *nāma gotta*. All previous lives and all activities of past lives are in that “record stream,” like a movie reel (not physical, of course).

- Someone who has developed *abhiññā* through *anāriya jhānā* can trace back the *nāma gotta* for several past lives. But with well-developed *abhiññā* powers, a much deeper history can be probed. A Buddha can trace back as far back as he pleases with astonishing speed. (Yet he could not see “a beginning” to any sentient being’s *nāma gotta*). That is why it is said that there is no traceable beginning to the rebirth process.)

16. It is easier to explain this “*nāma gotta*” with an example. Let us take two popular US presidents, John Kennedy and Ronald Reagan. Their “physical bodies” are no longer with us, i.e., their “*rūpa*” or physical bodies (**which were *saṅkhata* (*sankata* in Sinhala)**) decayed long ago. But their *nāma gotta* are with us to a certain extent. How much of their memories or “*nāma gotta*” remains with a given person depends on how closely that person associated with them. The moment we say, “John Kennedy” or “Ronald Reagan,” their picture comes to our mind. Not only that, those who met them may remember that vividly and probably can recall that event just like watching a movie.

- Similarly, we can recall many of the “events” of our lives or parts of our “*nāma gotta*”; some young children can remember some events in their “*nāma gotta*” in their previous lives.
- What can be done with *abhiññā* powers is very similar. The *abhiññā* capabilities enormously stretch the memory or the ability to “look back” at past events in one’s *nāma gotta*.

Anatta Nature

17. We are subjected to suffering only because we make *saṅkhāra* (or plans) and since they do not work out in the LONG RUN. Therefore, those *saṅkhāra* lead to *dukkha* at the end and thus to helpless in the long run (*anatta*).

- But *nāma gotta* or other types of *dhammā* does not lead to suffering. Therefore, *dhammā* do not have the characteristics of *anicca* and *dukkha*.
- But there is nothing substantial to be had with *dhammā* too; **they are also *anatta***.

18. The Buddha’s last words were, “*Vaya dhammā saṅkhāra, appamādena sampādetā.*” Everything in this world (including *saṅkhāra*) is *dhammā*. Only *saṅkhāra*, i.e., those that lead to one’s demise (i.e., lead to adverse outcomes); therefore, sort out such “*san*” without delay” (“*san*” “*pādetā*”, which rhymes as “*sampādetā*”).

18. The Buddha’s last words were, “*vaya dhammā saṅkhāra, appamādena sampādetā.*” Basically everything in this world (including *saṅkhāra*) are *dhammā*. Only “*saṅkhāra* are *vaya dhammā*”, i.e., those that lead to one’s demise (i.e., lead to bad outcomes). Therefore, the Buddha instructed us to “sort out such ‘*san*’ without delay” (“*san*” “*pādetā*”, which rhymes as “*sampādetā*”).

- “*Vaya*” means destruction; here, it means leading to the destruction of one’s future: *saṅkhāra* are *vaya dhammā*.
- *Saṅkhāra* are those these three types (*mano, vacī,* and *kāya saṅkhāra*) that lead to “*san*” for extending *saṅsāra*; see, “[What is “San”? – Meaning of Sansāra \(or Samsāra\).](#)”
- Thus the Buddha was admonishing the *bhikkhus* that all *saṅkhāra* are “*vaya dhammā*” (those leading to adverse outcomes), and therefore to comprehend what *saṅkhāra* are.

19. In the “[WebLink: suttacentral: Najirati Sutta \(SN 1.76\)](#),” the nature of *nāma gotta* is clearly stated:

- “*Rūpaṃ jīrati maccānaṃ, nāmagottaṃ na jīrati,*” or, “material things are subject to decay or *jirati* (pronounced “*jeerathī*”) and death or destruction (*maccānaṃ*; pronounced “*machchānaṃ*”), but *nāma gotta* do not decay.
- The “*rūpa*” of those two US presidents we mentioned earlier have decayed and gone. But their *nāma gotta* remain with us. We can access our *nāma gotta* with memory. Someone with *abhiññā* powers can

look at a complete *nāma gotta* not only spanning a current life but also going back to many lives. All of our *nāma gotta*, back to beginning-less time, are there whether accessed or not.

20. *Dhammā* — in the general sense — are **causes that we create ourselves for the future** and will bring NET suffering. Thus, they are without any substance. *Nāma gotta* and *paññāti* or concepts are also without any substance. They are all *anatta*. There is no point in “hanging on to them.”

- Even Buddha Dhamma, which enables us to attain *Nibbāna* should ultimately be abandoned (at *Arahanthood*). The Buddha compared Buddha Dhamma to a raft that one uses to cross river. Once one crosses the river, there is no point in carrying the raft on one’s back. So, even Buddha Dhamma is of value only until one reaches *Nibbāna*.
- Only *Nibbāna*, which is attained by “giving up EVERYTHING in this material world” is *atta* or “of value”; see, “[Anatta – the Opposite of Which Atta?](#)” and “[Dasa Akusala and Anatta – The Critical Link.](#)”

More information on the connection between *dhammā*, *kamma bīja*, and *paṭisandhi viññāṇa* is at, “[Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections.](#)”

3.1.5 Kamma are Done with Saṅkhāra – Types of Saṅkhāra

May 13, 2019; revised May 14, 2019

This replaces an old post in this section entitled, “Saṅkhāra and Kammā, Viññāṇa and Kamma Bīja.” I have re-written it with a new title.

Origin of the Words *Saṅkhāra* and *Sansāra*

1. All *kamma* are done with *saṅkhāra*. However, only *abhisāṅkhāra* lead to strong *kamma* that can fuel the rebirth process.

- It is important to realize that *saṅkhāra* involves EVERYTHING that we do, to live in “this world” of 31 realms. These include breathing, walking, eating, pretty much everything we do; see, “[Complexity of the Mind – Viññāṇa and Saṅkhāra.](#)”
- Anything anyone does, need to start as a thought in one’s mind. For example, to lift a leg, one’s mind needs to decide on that first, even though it appears automatic. Anything one does, starts with a thought of “*san*,” i.e., something to do with “this world”; see “[San](#)” and “[List of “San” Words and Other Pāli Roots.](#)” All these belong to *saṅkhāra* (“*san*” + “*khāra*” or action).
- Even an *Arahant* has to be engaged in *saṅkhāra* until *Parinibbāna* or death of the physical body.

2. *Saṅkhāra* become *abhisāṅkhāra* when acting with greed, hate, and ignorance; see, “[Nibbāna – Is it Difficult to Understand?](#)”

- The *sansāric* process or the rebirth process is fueled by *abhisāṅkhāra*. The prefix “*abhi*” means “strong.”
- An *Arahant* does not generate *abhisāṅkhāra*, i.e., thoughts with greed, hate, and ignorance.
- It must be noted that an *Arahant* would not generate *puññābhisāṅkhāra* (*puñña abhisāṅkhāra*) but can do *puñña kriya*; see, “[Kusala and Akusala Kamma, Puñña and Pāpa Kamma.](#)”
- *Kriya* basically means “actions” or “deeds” without the involvement of greed, hate, and ignorance.
- One’s *puññābhisāṅkhāra* turn to *puñña kriya* when one fully comprehends *Tilakkhaṇa* (*anicca, dukkha, anatta*).

3. Therefore, the *sansāric* process — or the rebirth process — is fueled by *abhisāṅkhāra*.

- The word *samsāra* comes from “*san*” + “*sāra*” where “*sāra*” means “beneficial”; see, “[What is “San”? Meaning of Sansāra \(or Samsāra\).](#)”
- One will have the perception that “this world is beneficial or fruitful” as long as one cannot grasp the fact that most births in the this world are filled with suffering.
- Even though some realms (like human, *deva*, and *brahma*) may have long stretches of “pleasures”, those are negligible compared to long stretches of suffering in the *apāyā* (the four lower realms including the animal realm).
- *Sansāric* process is fueled by (*abhi*)*saṅkhāra*. This is why an *Arahant* will not be reborn in the 31 realms of this world. He/she would not generate *abhisāṅkhāra*.

Connection Between *Saṅkhāra* and *Kammā*

4. *Kammā* is any action by us via body, speech, and thoughts (*kāya*, *vacī*, and *mano kammā*). **Those three types of *kammā* are initiated by our thoughts, i.e., *kāya*, *vacī*, and *mano saṅkhāra*.**

- We can see that *kammā* and *saṅkhāra* are closely related.
- The Buddha said, “*cetanāhaṃ, bhikkhave, kammaṃ vadāmi*”, i.e., “Bhikkhus, I say *kammā* is intention.” [[WebLink: suttacentral: AN 6.63. Nibbedhikasutta](#)] That intention is in *saṅkhāra*, embedded in the types of *cetasika* (mental factors) as we will see below.
- “Intention” depends on the types of *cetasika* in a thought (*citta*). For example, in a thought with “greedy intention”, will have the *lobha cetasika*, but it may also have *issa* (jealousy) *cetasika*.

5. Let us take some examples to illustrate this relationship. If you swing your arm, that is a *kāya kammā*, i.e., that action involved moving a body part. That corresponded to *kāya saṅkhāra* generated in the mind.

- Now, if you swung your arm to get hold of a cup, that is a *kammically* neutral action (*kammā*) or a just a *saṅkhāra*. You did not do either a moral or immoral act. The intention was to grab a cup, and that did not involve any *sobhana* or *asobhana cetasika*. **That is called a *kiriya* (*kriyā* in Sanskrit).** [*kiriya* : [nt.] action; deed; performance.]
- On the other hand, if you swung your arm to hit someone, then it was done with anger. So, the *dosa cetasika* (an *asobhana cetasika*) was in your thoughts. So, it was an *apuññābhi saṅkhāra*. It can also be called a *akusala/apuñña kammā* or an immoral deed.
- If you put your arms together to pay respects to the Buddha at a temple, that was done with *saddhā cetasika* (a *sobhana cetasika*) and thus it was a *puññābhisāṅkhāra*. It can be also called a *kusala/puñña kammā* or a moral deed.

6. **Now we can see that all *kamma* involve the mind; they are initiated by *saṅkhāra*.**

- *Mano saṅkhāra* are thoughts that comes automatically to the mind when a sense object is experienced.
- Then if that object is of interest, we start generating conscious thoughts (speaking to ourselves) without talking and then we may speak out; both these are *vacī saṅkhāra*.
- If we then start moving body parts to respond, then those are done with *kāya saṅkhāra*.
- Also see, “[Saṅkhāra – What It Really Means](#)” and “[Correct Meaning of Vacī Saṅkhāra.](#)”

7. Thus it is important to note that *kāya saṅkhāra* are also thoughts. They are responsible for body movements, i.e., *kāya kammā*. They are also responsible for making “bodily gestures” or “*kāya viññatti*.”

- In other words, all *saṅkhāra* are generated by the mental body (*gandhabba*). It gives commands to the brain to move body parts or to move lips and tongue to speak; see, “[Our Mental Body – Gandhabba](#)” and other posts on *gandhabba*.

- Furthermore, *kāya kammā*, *vacī kammā*, and *mano kammā* are all done by the respective types of *saṅkhāra*: *kāya*, *vacī*, and *mano saṅkhāra*.
- More information on these terms can be found at, "[Saṅkhāra, Kamma, Kamma Bija, Kamma Vipāka.](#)"

Saṅkhāra and Kammā Can be Good or Bad

8. Therefore, *saṅkhāra* can be understood in a deeper sense by realizing that types of *saṅkhāra* generated are defined by the types of *cetasika* (mental factors) in one's thoughts.

- Some *citta* (thoughts) do not have either good (*sobhana*) *cetasika* or bad (*asobhana*) *cetasika*. Such *citta* are said to have *kammically* neutral *saṅkhāra*. These *kammically* neutral *saṅkhāra* involve only the types of *cetasika* like *vedanā*, *saññā*, *virīya* that do not belong to either *sobhana* or *asobhana* categories.
- *Kammically* relevant *saṅkhāra* (or *abhisāṅkhāra*) involve either *sobhana cetasika* (for *kusala kammā*) or *asobhana cetasika* (for *akusala kammā*).
- Therefore, it is easy to see that *abhisāṅkhāra* that involve *sobhana cetasika* are *puñña abhisāṅkhāra* or *puññābhisāṅkhāra*. Those that involve *asobhana cetasika* are *apuññābhisāṅkhāra*; see, "[Cetasika \(Mental Factors\).](#)"

9. Knowing a bit of *Abhidhamma* can be helpful in clarifying certain key *dhamma* concepts. It is not hard to learn. *Since Abhidhamma was finalized after the Parinibbāna of the Buddha* (see, "[Abhidhamma – Introduction](#)"), *these details are not in the Suttā*.

- Now we can get a new perspective for *cetasika*, in terms of "san." As we know, "san" is what keep us in the rebirth process or *saṅsāra*; see, "[What is "San"? Meaning of Sansāra \(or Samsāra\).](#)"
- We can see that those *asobhana cetasika* are what give rise to "san" in *apuññābhi saṅkhāra*, that lead to rebirth in the bad realms.
- On the other hand, *sobhana cetasika* are what give rise to "san" in *puññābhi saṅkhāra*, that lead to rebirth in the good realms.

Do We Need to Avoid Good *Saṅkhāra* (*Puñña Abhisāṅkhāra*)?

10. However, this does not mean we should stay away from *puññābhi saṅkhāra*. In fact, we MUST engage in *puññābhi saṅkhāra*, in order to avoid rebirth in the bad realms and also to cultivate morality and also to prepare the necessary environment (especially to be healthy and to avoid poverty).

- The Buddha has emphasized the need to engage in meritorious deeds (*puññābhi saṅkhāra*) in many *Suttā*; see, for example, "[WebLink: suttacentral: Sumana Sutta \(AN 5.31\).](#)"
- *Nibbāna* is attained via realizing the fruitlessness in rebirth anywhere in the 31 realms, and for that one needs to comprehend *anicca*, *dukkha*, *anatta*, and for that one needs to attain the correct mindset by engaging in *puñña kammā* (*puññābhi saṅkhāra*).
- Once one FULLY comprehends *anicca*, *dukkha*, *anatta* (i.e., when one becomes an *Arahant*), one's *puññābhi saṅkhāra* will turn into *puñña kriyā*. This is a subtle point.

Puññābhisāṅkhāra* Are Also Done With *Avijjā

11. In [WebLink: suttacentral: Paṭiccasamuppāda Vibhaṅga](#), the term "*avijjā paccayā saṅkhārā*" in *akusala-mūla Paṭicca Samuppāda* (that leads to suffering) is explained as follows: "*Tattha katame avijjā paccayā saṅkhārā? Puññābhisāṅkhāro, apuññābhisāṅkhāro, āneñjābhisāṅkhāro, kāyasāṅkhāro, vacīsāṅkhāro, cittasāṅkhāro.*"

Translated: “What is *avijjā paccayā saṅkhārā*? *Puññābhisāṅkhāra*, *apuññābhisāṅkhāra*, *āneñjābhisāṅkhāra*, *kāyasaṅkhāra*, *vacīsaṅkhāra*, *cittasaṅkhāra*.” (here, *cittasaṅkhāra* is the same as *manosaṅkhāra*).

- It needs to be noted that these are all ***abhisāṅkhāra***, even though the verse is simplified as “*avijjā paccayā saṅkhārā*.”
- There are two categories of *saṅkhāra* mentioned there: **one category refers to types of *kamma* accrued. The other refers to whether they are done by the body, speech, or the mind.**
- Therefore, *saṅkhāra* has a much deeper meaning than just “mental formations”, even though that is better than the translation for *viññāṇa* as consciousness.

Instead of *Puññābhisāṅkhāra* an Arahant will do *Puñña Kiriya*

12. A question may arise how *puññābhisāṅkhāra* (or meritorious thoughts) arise with *avijjā*.

- A simple answer is that until one FULLY comprehends *anicca*, *dukkha*, *anatta* (i.e., that anywhere in this world of 31 realms is not devoid of suffering), one does even meritorious deeds with expectation of “good outcomes/ good rebirths” in this world.

13. Once one FULLY comprehends *anicca*, *dukkha*, *anatta* (i.e., when one becomes an *Arahant*), **one's *puññābhi saṅkhāra* will turn into *puñña kiriya* without *kammic* consequences.** Thus one will do meritorious deeds **without any expectations (this is what is meant by “*viññāṇa nirodha*” too).**

- Then those meritorious actions will not lead to rebirth even in the “good realms.” An *Arahant* does not wish to be reborn in any realm, because he/she has seen the “*anicca* nature” of all 31 realms. This is a subtle point.
- This last part may not be clear to everyone. This is the “previously unheard *Dhamma*” that is hard to grasp (“*pubbe ananussutesu dhammesu*” that the Buddha mentioned in the *Dhammacakkappavattana Sutta*).

3.2 Nibbāna

- [Nibbāna “Exists”, but Not in This World](#)

3.2.1 How to Taste Nibbāna

Revised November 24, 2018; April 26, 2020

1. Elsewhere on the site, I have described *Nibbāna* in a deeper sense. But we can look at the early stages of *Nibbāna* in a simple way.

- In Sinhala language (spoken in Sri Lanka), *Nibbāna* is also called “*nivana*” or “*niveema*” (නිවේම). This means “cooling down.” As one move towards *Nibbāna*, one feels cooling down, a sense of well-being.

2. Do you remember the last time when you got really mad? How did that feel? You get hot. Whole-body becomes hot and agitated. Blood pressure goes up and the face becomes dark because the blood becomes dark. By the way, this is clear evidence that the mind can affect the body.

- This “burning up” is called “*tāpa*” in Pāli (තෘප් in Sinhala), and is due to greed, hate, and ignorance. “*Ātāpi*” means the opposite, “cooling down via getting rid of those defilements.” This is what is meant by “*ātāpi sampajāno*” in the *Satipaṭṭhāna sutta*; see, “[Mahā Satipaṭṭhāna Sutta](#).”
- When someone can get to the “*ātāpi sampajāno*” state, one feels calm and “cooled down”; see, “[Kāyānupassanā – The Section on Habits \(Sampajānapabba\)](#).”

3. Do you remember how you felt when you made someone happy, either via a good deed or word? You cooled down; felt good. Didn’t you feel the opposite of when you got mad?

- When one acts with greed, “heating up” still happens, may be to a lesser extent than when one is angry. As a kid, when I was stealing something, I felt heated and uncomfortable.
- The same is true when one acts with ignorance too. One is not certain whether that is the right thing to do; the mind goes back and forth: is this right or wrong? should I do it or not? This is called “*vicikicchā*” in Pāli. Because one does not really know, one is not certain, one becomes anxious, and the body gets heated up.

4. Thus, when one gives up acting with hate, greed, or ignorance, one becomes less agitated, at ease, with a sense of peacefulness. This is an early sense of what *Nibbāna* is.

- As one can see the benefits of cooling down, one will avoid actions done with hate, greed, and ignorance. And one will be looking forward to doing actions of goodwill, generosity, and with mindfulness.
- Avoiding greed, hate, and ignorance is the same as avoiding *dasa akusala*.

5. Also, note the state of thoughts (*citta*) in the two opposing situations. When one acts with the defilements, thoughts run wildly; they come fast and they are energetic. The “*javana*” (impulsive power) of a thought is high when acting with a defilement.

- On the other hand, thoughts run more smoothly and the *javana* (impulsive power) of a given thought is calm when acting benevolently, with kindness, with generosity, and with mindfulness; they are powerful too, but only in making one calm. Thus one can experience a taste of *Nibbāna* or “cooling down” even at the very early stages of the Path.

6. Now, one could get to TEMPORARY cooling down by not letting thoughts run wildly. The easiest to do is to keep the mind on a single focus. This can be done by focusing the mind on a religious symbol or just on the breath. Thus this “temporary relief” is felt by people of any religion when they contemplate on a religious symbol with faith, or by doing “breath meditation” or mundane “*Ānāpānasatī*” meditation.

- However, the only way to achieve permanent sense relief is to REMOVE greed, hate, and ignorance gradually by cleansing one’s mind. This is done by “taking in” (*āna*) of good thoughts, speech, and actions, and “getting rid of” (*apāna*) defiled thoughts, speech, and actions. **This is the Buddha’s *ānāpāna* meditation that can lead to PERMANENT happiness.**
- When one does this correct “*ānāpāna*” consistently, one’s bad habits (“*gathī*”) will be gradually removed and good habits (“*gathī*”) will be cultivated.
- When one has removed the defilements to a significant extent, then this relief becomes permanent and will not reduce from that state even in future births. **This first stage of *Nibbāna* is called the *Sotāpanna* stage.** A *Sotāpanna* is guaranteed not to be reborn in the *apāyā* or the four lowest realms; he/she has removed all “*gathī*” suitable for beings in the *apāyā*. See, “[Gati to Bhava to Jāti – Ours to Control.](#)”

7. However, it is impossible to remove greed and hate just by sheer will power, i.e., forcefully. For example, one cannot get rid of greed even by giving away one’s wealth; if that is done without understanding, then it could lead to remorse and hate.

- Rather, getting rid of greed and hate comes AUTOMATICALLY as one understands the worldview of the Buddha: that we cannot maintain anything to our satisfaction in the LONG RUN. This worldview is embedded in the Three Characteristics of “this world” or *anicca, dukkha, anatta*.
- Not knowing the Three Characteristics is the ignorance or *avijjā*.
- Even before comprehending the Three Characteristics, one needs to reduce total ignorance (*moha*) to the *avijjā* level by getting rid of the 10 types of *micchā ditṭhi*; see, “[Micchā Ditṭhi, Gandhabba, and Sotāpanna Stage.](#)”

8. This is why *Sammā Ditṭhi* or “correct world view” comes first in the Noble Eightfold Path. When one comprehends the true nature of “this world”, one’s mind will AUTOMATICALLY start rejecting thoughts, words, and actions through greed and hate.

- Then *Sammā Ditṭhi* (correct vision) will automatically lead to *Sammā Saṅkappa* (fruitful thoughts), *Sammā Vaca* (fruitful speech), *Sammā Kammanta* (fruitful actions), *Sammā Ajiva* (livelihood), *Sammā Vayama* (efforts in those), *Sammā Sati* (moral mindset) and then will culminate in *Sammā Samādhi* (peaceful state of mind). This *Sammā Samādhi* is permanent for a *Sotāpanna*.
- Thus it is clear that such a *samādhi* cannot be attained with breath meditation or any other way of “focusing attention” on one thought object.
- Purification of the mind is the key, and that comes first through reading, listening, and comprehending the true and pure Dhamma.

9. As one follows the Noble Eightfold Path of the Buddha, one can EXPERIENCE a sense of well-being called *nirāmisā sukha* which is different from the sense pleasures; see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#).”

- If you did experience a sense of well-being just by reading this post, that is a good start. That sense of well being will only grow as the understanding gets deeper. I have gone through this process myself and that is what I am trying to convey to others.

10. **September 22, 2016:** I have started a new section: “[Living Dhamma](#),” where an experience-based process of practicing Buddha Dhamma (Buddhism) is discussed with English discourses (*desanā*). *Nibbāna* can be experienced at various levels, one needs to experience the earlier stages of *nirāmisā sukha* first.

Next, “[Need to Experience Suffering in Order to Understand it?](#)”, ..

A deeper analysis of *Nibbāna* at “[Nibbāna](#).”

3.2.2 Nirāmisā Sukha

Revised September 15, 2017; July 1, 2018; June 15, 2020

1. Another critically important aspect of Buddha’s teachings that have been lost, is the importance of the *nirāmisā sukha*. **There is happiness in giving up sense pleasures, giving up hate, and giving up ignorance (by learning Dhamma), and that is called *nirāmisā sukha*.** This is a part of Dhamma that many people do not realize.

2. Contrary to another misguided perception we have today, the Buddha never said that there is no *āmisā sukha* (sense pleasure) to be had. The only reason why people cling to this world is BECAUSE of the sense pleasures that are available.

- What the Buddha said is that such sense pleasures are transient, not lasting. Even if one inherits a fortune and lives in luxury the whole life, the suffering is inevitable in the next life or next lives. The real suffering (*dukkha*) is in the four lowest realms (*apāvā*).
- *Nirāmisā sukha* is present where there is no suffering.
- It can be compared to the relief one gets if one had been suffering from a chronic headache all through one’s life if it went away at some point.
- In a way, we are all living with a baseline “chronic headache” that we don’t even realize. We have gotten used to it, and don’t even realize that there is a “better state.” Only when one starts feeling the “reduced stress” of *nirāmisā sukha*, one realizes that. That is the real inspiration for trying to attain the higher stages of *Nibbāna*.

3. The *nirāmisā sukha* has a different quality compared to *āmisā sukha* or the pleasures from the senses that we all enjoy. It is also different from the *jhānic* pleasures in quality. *Jhānic* pleasure is better than the sense pleasures (as the meditators know), and *nirāmisā sukha* is of even better quality.

- Both *āmisā sukha* and *jhānic* pleasures are transient, not lasting.
- The *nirāmisā sukha* starts increasing as soon as one starts on the Noble Eightfold Path and becomes permanent at the *Arahant* stage. Furthermore, this whole progression up to the *Arahant* stage can be attained in this very life.

4. It is important to realize that *nirāmisā sukha* cannot be attained by “just giving up things” or by leaving everything behind and going to seclusion. This is another misconception that many people have.

- The Buddha never asked anyone to give up their lifestyle. There were wealthy people and even kings who attained the *Sotāpanna* stage and up to the *Anāgāmi* stage while living a “householder life.”
- There is no point in giving up everything; even when one gives to charity, one needs to make sure one has enough left for oneself and one’s family. Fulfilling one’s responsibilities is as important as being charitable.

5. The “giving up worldly things” needs to come through a true understanding of the real nature of “this world.” Many people did give up worldly things and became *bhikkhus*, but only after they saw the fruitlessness of craving for worldly things.

6. It is the nature of the mind that it has to see the benefit or pleasure of something before embracing it.

- One may force the mind to “give up” some sense pleasures, but that cannot be sustained. Most people who try to do that out of ignorance (misunderstanding of Dhamma) actually end up becoming dissatisfied and giving up the effort.
- The mind has to “see” that there is a better option compared to the *āmisā sukha* or sense pleasures. When one starts on the Path and start living a moral life one will gradually see the *nirāmisā sukha* emerge.

7. The Buddha gave a simile to explain this effect. In the old days, when people took to the oceans to look for new lands, they took caged birds with them. When they were lost or wanted to find whether they were close to land, they released a bird. The bird would fly around and come back to ship if no land is found.

- The same is true for the mind. It will not latch on to something new (*nirāmisā sukha*) unless it is better than the one it already has (*āmisā sukha*).
- As the reader Siebe points out (June 30, 2018), the points in #6, #7 are discussed in the “[WebLink: Cūladukkhakkhandha Sutta \(MN 14\)](#).” A reasonable translation at: “[WebLink: 14. Lesser Discourse on the Stems of Anguish](#).”

8. Yet, in the beginning, it takes some time for the *nirāmisā sukha* to be noticeable. We have lived with clouded minds for so long, that it takes a little while to “clean things up.”

- It is like developing a new technology these days. Initially it is difficult to get started; one has to make a concerted effort just to “stay in.” But once the benefits of the technology are realized by the public, it starts to take off: [WebLink: WIKI: Technology life cycle](#)
- But unlike a new technology, once the *nirāmisā sukha* starts increasing it never comes down ever (after the *Sotāpanna* stage is reached).
- It makes “quantum jumps” (instantaneous big changes) at the *Sotāpanna* stage and the other three subsequent stages, and becomes complete and permanent at the *Arahant* stage. However, even an *Arahant* will experience the results of previous *kamma vipāka* and will have PHYSICAL ailments that will still cause suffering until the life comes to an end.

9. The difference between *āmisā* and *nirāmisā sukha* is explained in the “[WebLink: suttacentral: Nirāmisā Sutta \(Samyutta Nikāya 36.31\)](#).”

- The “[WebLink: suttacentral: English translation](#)” and the “[WebLink: suttacentral: Sinhala translation](#)” — as well as translations in several other languages — are also available at the Sutta Central site. That is the case for most *suttā*, so it is a useful resource.
- **However, one needs to keep in mind that many key Pāli words are translated incorrectly there. That includes translating *anicca* as impermanence and *anatta* as “no-self.”**

10. The *Nibbānic* bliss is different and is the absence of both *āmisā* and *nirāmisā sukha*.

- *Nibbānic* bliss is the total absence of ANY type of suffering. Ven. Sāriputta explained that in the [WebLink: suttacentral: Nibbānasukha Sutta \(AN 9.34\)](#).
- The status of an *Arahant* is not comprehensible to anyone just starting on the Path. It is better not to investigate that at the beginning, because that could lead to confusion.

Next, “[What are Rūpa? Relation to Nibbāna](#)”,

3.2.3 Nibbāna – Is it Difficult to Understand?

Revised December 6, 2016 (#9); Re-revised December 20, 2016; November 22, 2018; January 3, 2019

Our distresses and sufferings are due to our defiled minds. As one purifies one's mind, one starts experiencing *Nibbāna*.

- I advise reading through any post one time without clicking on the links first. Once you get the main concept, then the links can be used to clarify the other related key concepts.
 - *Nibbāna* may not be easy to attain, but it is easy to figure out what it is. You don't need complex concepts like emptiness (*sunyātā*) and *Bodhi citta* to describe or to understand *Nibbāna*.
1. The Buddha said we suffer because of the defilements we have in our minds: greed, hate, ignorance, and other mental qualities that arise from them. *Nibbāna* has many synonyms, and “*Nivana*” (“cooling down”) is one that conveys the above idea better; *Nivana*, which is also called “*niveema*” (නිවේම) in Sinhala, conveys the same idea as *nirāmisā sukha*.
 - As one moves away from hate, greed, and ignorance, one can feel oneself “cooling down” INSIDE. *Nibbāna* (“*Nib*”+“*bāna*”, where “*bāna*” means bonds) and thus *Nibbāna* means to break free of bonds that make one bound to the 31 realms.
 - I like the word *Nivana* or *niveema* because it conveys the benefits of the Path as one experiences gradual “cooling down” until it becomes complete at *Nibbāna*; see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#),” “[How to Taste Nibbāna](#),” and “[Learning Buddha Dhamma Leads to Nirāmisā Sukha](#).”
 2. In order to “cool down”, we first need to know what is “burning” (“*thāpa*” in Pāli); our minds are constantly burning due to greed, hate, and ignorance, and we don't even realize this; see the “[Living Dhamma](#)” section and specifically the post, “[Satipatthāna Sutta – Relevance to Suffering in This Life](#).”
 - This “burning” is really worse in the lowest four realms or the “*apāyā*.” Thus one really needs to understand the first Noble Truth about suffering, in order to realize the value of *Nibbāna*. There are several posts at various levels on the real, deeper meaning of what the Buddha meant by “suffering in this world of 31 realms.”
 - Our sufferings are masked by the apparent sensory pleasures, which do not last. A *Sotāpanna* understands suffering better than a normal person, and as one gets to higher stages of *Nibbāna* one will be able to see the meaning of the First Noble Truth even more clearly.
 3. The key point is that one CAN start feeling “*nivana*” RIGHT NOW. *Nivana* is experienced by giving up the ten defilements (see, “[Ten Immoral Actions \(Dasa Akusala\)](#)”). One does not have to get rid of all of them at once, and that is not advised either. One should get rid of the BIGGEST ones that can be easily gotten rid of.
 - Killing, stealing, lying (and gossiping, slandering, verbally abusing), engaging in sexual misconduct, and being intoxicated (not just with alcohol or drugs, but also with wealth, power, etc.) are the first to be considered.
 - Just abandon the relatively easy ones first for a few weeks and experience the “*nivana*,” the ease of mind, the “inner peace”, that comes from that. That is the biggest incentive to continue on the Path.
 4. One also needs to understand the relative weights associated with dealing with animals and humans, and also there are different levels among humans. For example, it is very difficult to be born human; thus even saying a hurtful thing to a human (especially to an *Ariya* or a Noble One), could have thousand-fold *kammic* weight compared to killing an animal; see, “[How to Evaluate Weights of Different Kamma](#).”
 - Another key concept is that one does NOT need to worry about the past *kamma*. The role of *kamma* has been exaggerated; see, “[What is Kamma? Is Everything Determined by Kamma?](#).” *Nibbāna* is not attained via removal of *kamma*, but the removal of *āsavā* or cravings; see, “[The Way to Nibbāna – Removal of Āsavā](#).”
 - The main thing is not to repeat the same mistakes. The more one stays away from the ten defilements, it automatically BECOMES easier. It is like pushing a stalled car: initially hard, but it becomes easier when it starts moving.

5. *Nibbāna* is **NOT removing everything from the mind, just removing the defilements**: *Nibbāna* is *rāgakkhaya* (greed elimination), *Nibbāna* is *dosakkhaya* (hate elimination), *Nibbāna* is *mohakkhaya* (delusion elimination); those three are more synonyms for *Nibbāna*.

- **Thus one sees *Nibbāna* with a thought (*citta*) that is devoid of *rāga* (greed), *dosa* (hate), *moha* (delusion).** This PURE MIND does not want to be burdened with a “material existence” anywhere in the 31 realms; see, “[What are Rūpa? Relation to Nibbāna.](#)”
- By the way, *citta* is pronounced chiththa; see, “[Pāli Glossary – \(A-K\)](#)” and “[Pāli Glossary – \(L-Z\)](#).”

6. The suffering is a direct result of having a “material aspect” associated with the mind: **that material body is subject to decay and death. The mind gets associated with a body that it gets “attached” to with greed, hate, and ignorance.** If you look at the 31 realms of “this world” (see, “[The Grand Unified Theory of Dhamma](#)”):

- It is clear that suffering is there in the lowest five realms — including the human realm — where all three (greed, hate, ignorance) can be present; the bodies of beings in these realms are, in general, dense and are subject to decay and diseases. Of course, there is unimaginable suffering in the lowest four realms.
- However, the human realm (#5) is unique, because one COULD attain *Nibbāna* as a human, even though they are also subject to bodily pains, decay, and diseases.
- In the *Deva lokā* (realms 6-11), hate is not there and suffering is less. And the bodies of *devā* are less dense and not subject to physical ailments (until the death of course).
- In the *Brahma lokā* (realms 12-31), both hate and greed are absent, and suffering is even less. They have very fine (less-dense) bodies and no physical ailments.

7. **However, since ignorance is there in all 31 realms, complete, absolute state of happiness is absent anywhere in the 31 realms.** Even if one is born in a *deva* or *Brahma* world, one will eventually end up in the lowest four realms (unless one has attained the *Sotāpanna* or a higher stage of *Nibbāna*).

- The suffering is of course unimaginably intense in the lower realms.
- This is the key message of the Buddha: **He said that suffering never ends as long as one keeps coming back to “this world of 31 realms” when one dies (i.e., unless one attains *Nibbāna*);**
- Suffering totally ends with the death of an *Arahant*; no more births in this world of 31 realms.
- However, one could get depressed by thinking that *Arahanthood* is “annihilation”; but that is not true. One just needs to follow the Path step-by-step; see, “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)” and “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#).”

8. Therefore, one could visualize a gradual decrease of suffering as one gets rid of hate, greed, and ignorance in that order.

- And one CAN experience this happiness called *nirāmisasukha* in this human life itself, all the way up to *Nibbāna*; see, “[Three Kinds of Happiness – What is Nirāmisasukha.](#)” That is the uniqueness of a human birth.

9. When the mind “starts thinking” about a given thought object (*arammana*), say a visual object, it starts as “just seeing”; this is the *citta* stage. But within a fraction of a second, the mind starts adding defilements (based on greed, hate, ignorance), if that object is “of interest.”

- It develops further thoughts defiled by greed, hate, ignorance (possibly a combination) by going around and around that thought object and ends up in the “defiled thought” (*viññāna*) stage even before one realizes it; see, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”
- This is also described in *paṭicca samuppāda*; see, “[Paṭicca Samuppāda – “Pati + ichcha” + “Sama + uppada](#),”” and the links below that. *Viññāna* is a *citta* that is **defiled** by *rāga* (greed), *dosa* (hatred), *moha* (ignorance).

- *Paṭicca samuppāda*, which is Buddha Dhamma, is discussed in detail in the series, “[Paṭicca Samuppāda in Plain English.](#)”

10. When *rāga*, *dosa*, and *moha* are removed from the mind, *cittā* (plural of *citta*) become *pabhassara* (bright); there is no more defilements there clouding the *cittā*. **At this stage, it is said that the pure *citta* “sees *Nibbāna*.”**

- After one attains *Nibbāna* with one *citta*, the *cittā* fall back to the “normal state” and the person lives like a normal human (but without doing anything with greed, hate, and ignorance) until the *kammic* energy of the *kamma* seed that started the present life is exhausted.
- At death (called *Parinibbāna*), the mind of an Arahant does not grab (*upādāna*) another *kamma* seed (even if there may be many *kamma* seeds), and thus there is no further rebirth. **The mind becomes free of a “body” that can be subjected to decay and death. That is *Nibbāna* or “complete *Nivana*” or “complete cooling down.”**

11. We are bound to this rebirth process basically due to two causes: *avijjā* and *taṇhā*. The first version of *taṇhā* is *lobha*, the strong greed, which could easily turn to *dosa* (strong hate) when someone else gets in the way. Thus those two causes of *avijjā* and *taṇhā* effectively become three: *lobha*, *dosa*, *moha*.

- Even though *dosa* arises due to *lobha*, *dosa* brings about the worst *vipāka*: rebirth in the *niraya* (hell), where the suffering is optimum. Thus *dosa* actually has origins in the 4 greed-based “*somanassa saḥagata, diṭṭhi sampayutta citta.*”
- When *diṭṭhi* is removed at the *Sotāpanna* stage, all four of these greed-based *citta* stop arising. Thus at that stage, *lobha* and *dosa* become *rāga* and *paṭigha*, which are removed successively at the *Sakadāgāmī* and *Anāgāmī* stages. *Avijjā* keeps reducing at each stage of *Nibbāna*, and is removed at the *Arahant* stage.

12. When the mind is devoid of *rāga*, *dosa*, and *moha*, the mind (and thus *cittā*) become devoid (*sunya*) of them; that is the purified state of a *citta*, ***anidassana viññāṇa* (consciousness devoid of defilements) or *paññā* (wisdom).**

- The forefathers of *Mahayana* Buddhism could not grasp the concept of *Nibbāna*, so they came up with misleading descriptions including that of *Sunyata*: see, “[What is Sunyata or Sunyata \(Emptiness\)?](#).”
- Even among the current *Theravāda* Buddhists, there are many debates about what is meant by *Nibbāna*. That is sad to see.

13. When *rāga*, *dosa*, *moha* are removed, a *citta* stops going around and around a given thought object (*arammana*). **This “wheeling” is what fuels the sansāric journey.** Thus stopping this process is called “taking off the wheels of the sansāric vehicle.”

- The Pāli (and Sinhala) word for a vehicle is “*riya*,” and stopping of the “*riya*” is called “*Ariya*”; one who has taken the wheels off the vehicle for the *sansāric* journey is called an “*Ariya*.” Thus contrary to popular usage, “*Arya*” is not the word for a Noble Person, it is *Ariya*.
- **Therefore, it is clear that “*Ariya*” has nothing to do with a race, “*Arya*.”**
- Furthermore, “*virīya*” (“*vi*” + “*riya*”) means staying away from the “wheeling process” (and the effort to do so). Therefore, *virīya* really means actively engaging in *Satipaṭṭhāna* and *Ānāpānasati*; see, “[Satipaṭṭhāna Sutta – Relevance to Suffering in This Life.](#)”

14. Anyone who has at least attained the first stage of *Nibbāna*, i.e., *Sotāpanna*, can be called an *Ariya*, or a Noble Person. This is because the “*āsavā*” or deep-seated cravings that a *Sotāpanna* has removed stay permanently removed even in any future lives.

- All the *āsavas* are removed at *Nibbāna*; thus “*Āsavakkhaya*” (elimination of *āsavā*) is another synonym for *Nibbāna*. People who had been in the lowest social ladder or lowest caste at the time of the Buddha were able to become *Ariyā* or Noble Persons.

15. When one sees *Nibbāna*, one's mind does not crave for anything "in this world" of 31 realms. There is nothing for the last *citta* (*cuti citta*, pronounced "chuthi chiththa") of this life (at death) to grab (nothing to *upādāna*) and to start a new birth in "this world", and the mind becomes totally free.

- **The mind becomes PERMANENTLY pure and be detached permanently from any type of physical body, dense or fine.**

16. Thus an Arahant will not be reborn in "this material world" of 31 realms (see "[The Grand Unified Theory of Dhamma](#)"), i.e., one attains *Parinibbāna*. He/she is simply "gone" from "this world" of 31 realms. The suffering stops permanently.

- Thus it is quite clear WHAT *Nibbāna* is: it is the stopping of the rebirth process in the material world. What is hard to understand is WHY stopping the rebirth process can relieve one of all suffering.
- No matter how much hardship one has endured, one likes to live. This is true for a human or a lowly worm. For any living being, the most precious thing is its life. **When one starts understanding the "big picture of the Buddha", one will slowly start seeing the dangers of staying in this endless rebirth process.**

Other analyses of *Nibbāna* can be found at, "[Nirodha and Vaya – Two Different Concepts](#)" and "[Difference Between Giving up Valuables and Losing Interest in Worthless](#)",

3.2.4 The Four Stages in Attaining Nibbāna

Revised February 4, 2016; revised October 25, 2017

1. The 31 realms discussed in "[31 Realms Associated with the Earth](#)" are divided into three main categories based on the sense faculties and the level of suffering:

- The lowest eleven realms belong to the "*kāma loka*", where all five physical sense faculties are present; "*kāma*" is the indulging in the five sense faculties.
- Beings in the next sixteen realms have only two physical senses: vision and hearing. They have less-dense bodies, and this subset of realms is called the *rūpa loka*. In *rūpa loka*, there is mainly *jhānic* pleasures corresponding to the first four mundane *jhānā* that are achievable by humans. There is relatively less suffering in the *rūpa lokā*.
- The highest four realms correspond to the higher *arūpa jhānic* states (*jhānic* levels five through eight) that are also attainable in the human realm. Thus there is mainly *jhānic* bliss in these realms and relatively less suffering. These realms are commonly known as *arūpa loka*, because the beings have very fine bodies with no physical senses and only the mind.

2. The lifetimes of the beings in the *rūpa loka* are very long, and those in the *arūpa loka* are even longer. The lifetime in the highest *arūpa lokā* are so long (84,000 eons or *mahā kappā*), that it is beyond comprehension to us.

- This is why the ancient yogis mistakenly thought that such realms correspond to *Nibbāna*. The Buddha himself (or rather Sidharata Gotama), who attained the eighth *jhāna* within months after leaving the palace to become an ascetic. But he realized that it would lead to rebirth in a Brahma realm that still has a finite lifetime.
- Even though very long time in the number of years, that lifetime is insignificant in the *samsāric* time scale (see, "[Samsāric Time Scale Buddhist Cosmology, and the Big Bang Theory](#),"), which is infinite (see, "[Infinity – How Big Is It?](#)")

3. One in the human realm can experience the *jhānic* pleasure of both *rūpa* and *arūpa lokā* by attaining such *jhānic* states via *samatha* meditation.

- Furthermore, it is possible to gain access to both *rūpa lokā* and *arūpa lokā* in the next birth by developing the corresponding *jhānā* and by being in a *jhānic* state at death. As I understand, this is the goal of most Hindu practices.

4. *What the Buddha pointed out was that even the highest jhānic state is impermanent, and once that kammic energy is exhausted, it is possible to be born in any of the 31 realms. In fact, unless the being had not attained at least the Sotāpanna stage, it is guaranteed that at some point in the future rebirth in one of the lowest realms is inevitable.*

- He said that many of the beings still in the rebirth process (*saṃsāra*), i.e., we all, are likely to have been born in the higher *arūpa lokā*, as well as the lowest realm (*niraya*) in the past. The *saṃsāra* is that long.

5. From this discussion, it is clear that the actual suffering is mostly in the *kāma lokā*. But the problem is that beings spend the most time in *kāma lokā* in their beginning-less journey in the *saṃsāra*.

- The Buddha gave a simile to describe this situation. We leave home only to go on short, or may be even extended, trips; but we always come back home. **The Buddha said that the four lowest realms (the *apāyā*) are the home base for most living beings.**

Suffering in the *Kāma loka*

1. Suffering in the *kāma lokā* ranges from unfathomable suffering in the lowest realm, the *niraya* (hell), to relatively little suffering and highest sense pleasures in the *deva lokā* (the highest six realms in the *kāma loka*).

- Just below the *deva lokas*, there is the human realm with both suffering and sense pleasures at about equal levels.
- Below the human realm, there is *peta loka* (hungry ghosts), *asuras*, animal realm, and the *nirayas*, and the level of suffering generally increases in that order.

2. The lowest four levels in the *kāma loka* are collectively called the *apāyā* (the undesirable realms). **More than 99% of the beings are trapped in these four realms.** The problem is that once born in any of those four realms, it is virtually impossible to get out.

- This is because these realms are such that one is forced to commit *apuññabhi saṅkhāra* or evil actions (see, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#)”) by the very nature of that existence. For example, in the animal realm, most animals have to kill others for survival. In the *niraya*, virtually every thought is of hate, because of the incessant suffering.
- **Still, when we analyze *Abhidhamma*, we will be able to see that the *javana* of the *cittā* are much less potent for animals, and thus the *kammic* power of those actions are relatively small compared to *kammic* power of such actions by humans. This is an important point that I wish to discuss in the future.**

3. Just as it is likely that we have been born in the higher *rūpa lokā* in the past, it is even more certain that we ALL have been in the *apāyā*. Luckily we do not remember those past lives.

- But in certain realms (particular the *peta realm*) beings do remember their past lives and that increases the level of suffering.

Why We Need to Strive Now

1. From the above discussion, it is clear that most suffering is in the four lowest realms, below the human realm which is the fifth realm. Essentially, there is relatively less suffering above the human realm, starting with the *deva loka* which is the highest realm in the *kāma loka*.

2. Even though the suffering is highest in the lower four realms, the beings there are helpless to do anything about the suffering. Their limited minds are not capable of grasping the causes that lead to suffering.

- Many people wrongly believe that one needs to feel suffering in order to understand it and to get an incentive to seek *Nibbāna*. But when one really suffers (say, when one gets too old) it is NOT possible to clearly contemplate the deep concepts of Dhamma.
- The Noble truth on suffering needs to be seen with wisdom (*paññā*), not via feelings (*vedanā*), i.e., by understanding the complete world view AND the Three Characteristics of this “wider world”: *anicca*, *dukkha*, *anatta*.

3. Beings in the realms above the human realm, the 26 realms starting with the *deva* realms, do not even feel much suffering. **This is the other extreme; there is no incentive for them to be concerned about suffering.** The only real suffering there is that when their lifetimes get near to the end, they do realize that and become distraught.

4. Thus it is only at the human realm that one is at least exposed to the suffering, even if one may not be subjected to much suffering. Furthermore, the human mind is the best suited for grasping the true nature of “this world of 31 realms”, i.e., the Three Characteristics (see, “[Anicca, Dukkha, Anatta](#)”). **This is why the Buddha said that a human should not miss this opportunity to attain *Nibbāna*.**

The Four Stages of Attaining *Nibbāna*

1. The first stage of *Nibbāna* is attained by “seeing” (not just reading about, but actually grasping) the true nature of the existence: *anicca*, *dukkha*, *anatta*.

- Thus one needs to first learn from someone (like from this website), the nature of existence with the 31 realms, the aimless wandering of a being through endless rebirths (*samsāra*), the reasons for the rebirths, etc.
- Thus the key areas to understand are the Three Characteristics, the Four Noble Truths, and the Noble Eightfold Path. No one but a Buddha is capable of finding these and this is why it is important to have exposure to the PURE DHAMMA.

2. At the first stage (*Sotāpanna* or Stream Enterer), one partially comprehends the validity of the Buddha’s world view. This is called attaining *Sammā Ditṭhi* (elimination of defilements through clear vision) to a significant extent.

- He/she understands the “true nature” of existence: significance and the true meaning of the Three Characteristics of Existence (see, “[Anicca, Dukkha, Anatta](#)”).

3. The realization that it is not worthwhile or fruitful to stay in any of the 31 realms, in the long run, makes one to conduct oneself in a moral fashion. One’s mind makes the decision that it is not worthwhile or beneficial to do those actions that destine oneself to birth in the lower four realms.

- This realization leads to a *Sotāpanna phala citta* (one thought -moment of realizing the *Sotāpanna* stage). When that is achieved, one will never again be reborn in the lower four realms (“free of suffering in the *apāyā* forever.”) That is explained in, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta.](#)”

4. At this stage, one has realized the First Noble Truth of suffering (*dukkha*), and one earnestly starts on the Noble Eightfold Path. At this stage he still has greed and hate left in him to some extent, but at the next stage (*Sakadāgāmī*), he loses more of the strength of such greedy or hateful thoughts.

- A *Sakadāgāmī* is not fully released from the *kāma loka* since he/she will be born in the *deva loka* (but not in the human realm).
- In the *deva loka* (and in the *brahma* realms above that where a *Sakadāgāmī* can be born subsequently), the bodies are not subjected to diseases. Thus a *Sakadāgāmī* is said to be “healthy forever.”

5. When the third stage of *Anāgāmī* (Non-Returner) is attained, one loses any desire to be born in the *kāma loka*. One is not capable of generating any greedy or hateful thoughts belonging to the *kāma loka*.

- Thus, he/she will be born only one time more in a higher *Brahma* world reserved for the *Anāgāmīs*.

6. All through these three stages, *avijjā* or ignorance gradually diminish. But it is completely removed only at the *Arahant* stage.

- Once the *Arahant* stage is reached, the mind becomes totally pure (*anidassana viññāṇa* or *paññā* is attained), and is incapable of desiring anything “in this world of 31 realms.” Thus there is no more rebirth, and one attains the perfect happiness at the peak of *nirāmisa sukha*.

Also, see “[Nibbāna - Is it Difficult to Understand](#)” and “[The Way to Nibbāna – Removal of āsavas](#).”

Why Living a Moral Life Would Not Prevent a Birth in the Four Lower Realms

1. We desperately cling to “things in this world” because we have the perception that lasting happiness can be achieved. We crave the sensory pleasures. As mentioned before, there is nothing or no one holding us in this world of 31 realms. We cling to existence in these realms like an octopus grabbing its prey with all eight legs.

2. Even some Buddhists would, in the back of their minds, like to stay in this world a bit more. They do not realize the level of happiness associated with the *Nibbānic* bliss; see, “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#).”

- A popular blessing given by some Buddhist monks even today goes like the following. “May you be reborn in prosperous (*deva* or human) realms AND THEN attain *Nibbāna*.” Even they do not understand the permanent happiness associated with *Nibbāna* or the possibility of much suffering possibly in the next birth.

3. The danger in such thinking is due to the following reason. We all have done both good and bad deeds in the lives before and have acquired uncountable *kamma* seeds both good and bad. See, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#).”

- **At death it is possible for any one of those seeds to bear fruit.** If it is a good *kamma* seed, one will get a good birth, but if it is a bad *kamma* seed one will get a bad birth.

4. Our future births are not necessarily determined by how we live this life, because we have done uncountable number of both good and bad *kamma* in previous lives.

- This is why the Buddha said that even if one lives a perfectly moral life he cannot say that one will get a good rebirth UNLESS one has attained at least the *Sotāpanna* stage. A *Sotāpanna* has made ineffective all those bad *kamma* seeds that could give birth in the lower four realms.
- The Buddha also said that even if one lives immorally that also does not necessarily lead to a bad life in the next birth unless a *anantariya kamma* committed. (*Ānantariya kamma* is an extremely bad *kamma* like killing one’s parents.)
- However, those bad acts will bear fruit at some point in the future. It is just that there are many good seed as well as bad seeds with any life-stream. See, “[What is Kamma? Is Everything Determined by Kamma?](#).”
- Thus the goal of this life should be to attain at least the *Sotāpanna* stage of *Nibbāna*.

A different analysis on *Nibbāna* can be found at, “[Difference Between Giving up Valuables and Losing Interest in Worthless](#)”,

Next, “[Nirāmisa Sukha \(Happiness Arising from Dissociating from the 31 realms\)](#)”,

3.2.5 What Are Rūpa? (Relation to Nibbāna)

Revised May 25, 2018; February 19, 2020

1. In Buddha Dhamma, everything in “this world” of 31 realms can be put into two categories: *mana* or *mano* (mind) and *rūpa* (material form).

- The mind is *citta* (thoughts) and the mental properties in the thoughts, *cetasika*.
- Everything else is *rūpa* (material forms).

2. Now let us look at *rūpa*: Many people think *rūpa* is just the body or “material things.” A better translation for *rūpa* is “matter and energy.” As stated in #1 above, everything else in the 31 realms that is not *citta* or *cetasika* is *rūpa*.

- There are five types of *rūpa* that we experience with our five senses: With the eye (*cakkhu*), we experience *vaṇṇa rūpa* (whatever that is visible.) We experience sounds (*sadda*) with ear (*sota*) and smells (*gandha*) with the nose (*ghāṇa*). Taste (*rasa*) is experience with the tongue (*jivhā*) and the touch (*phoṭṭhabba*) with the body (*kāya*.)

3. We can see that smells are due to tiny material particles that enter the nose. The taste is also due to food and drinks that touch the tongue; touch is also contact between “material things.”

- But what about visible objects? We need light to see any objects; without light, we cannot see. Thus “seeing” involves matter and energy. Same for sound. Thus *vaṇṇa rūpa* (or *varna rūpa*) are really “matter and energy”, which in the end is just energy. Since the turn of the 20th century, **science has confirmed that matter is just energy**: they are related by Einstein’s famous formula of $E = mc^2$.
- It is important to realize that what is meant by “*cakkhuñca paṭicca rūpe ca uppajjati cakkhu viññāṇam*.” That means the light impinging on the eye *indriya* to give us the sensation of vision. Thus, in *vaṇṇa* (also called *varna* or *rūpa rūpa*), *sadda*, *gandha*, *rasa*, and *phoṭṭhabba* (the five senses), *rūpa* are really types of energy or particles.
- Modern science now agrees that there is no distinction between matter and energy. However, matter/energy is created by the mind (as “*dhammā*.”) See, “[Manopubbangamā Dhammā..](#)”
- Matter above the *bhūta* stage will eventually be destroyed in the “*loka vināsa*” in a supernova type explosion. See, “[WebLink: Sansāric Time Scale, Buddhist Cosmology, and the Big Bang Theory.](#)”

4. Thus the *rūpa* can vary in “density” from almost pure energy to the solid objects that we can see with our eyes.

- They go through three stages: At the “*gati*” stage, they overlap with energy; in the “*bhūta*” stage, they are more solidified but the human eye still cannot see (this is why some beings that the humans cannot see are called “*bhūta*” in Pāli or Sinhala); it is only in the “*dhātu*” stage that the human eye can see; see, “[The Origin of Matter – Suddhatthaka.](#)”
- At Parinibbāna (death) of an Arahant, the mind is not attached to a *rūpa* in any of the three forms: *dhātu*, *bhūta*, or *gati*.

5. When one is born anywhere in the 31 realms, it is the *viññāṇa* (impure consciousness) that keeps the mind bound to a material body. As the purity level of the mind goes higher one moves up from the lower realms with dense bodies to higher realms with less dense bodies.

- In the lower realms (at or below the human realm, which is the fifth realm), the mind is normally attached to a dense body that the human eye can see. This is **dense *dhātu* form**.
- In the *deva lokā* (realms 6-11), the bodies are finer (subtle.) Their minds are devoid of hate and thus are purer. In the realms 6-11, the bodies are made of *rūpa* still in the “***dhātu*” form, but less dense.**

- The minds are devoid of both hate and greed, and are thus more purer, in the *rūpa loka* and *arūpa loka*. In the *rūpa loka* (realms 12-27), the bodies of the beings are much more less dense than the *devas* and are in the “*bhūta*” form.
- In *arūpa lokā* (realms 28-31) there are no *rūpa* even in the sense of *bhūta*. But the **four mahā bhūta are still associated with those being’s “gati”** (see, *Kevaddha Sutta* in *Dīgha Nikāya*.) In those realms, *rūpa* can be thought of as indistinguishable from energy.
- When the mind becomes purified, *viññāṇa* becomes “*anidassana viññāṇa*”, which is the *viññāṇa* of an Arahant (also called *paññā*). **Here there is no association of the mind with even fine rūpa associated with “gati.”** The mind is completely detaches from *rūpa*. The mind becomes pure and free. When one attains Arahthood, one still lives with the “solid body” of a human being until death. At *Parinibbāna*, the mind becomes completely free of *rūpa*. See, “[Pabhassara Citta, Radiant Mind, and Bhavanga.](#)”

6. At a deeper level, the *anicca* nature, i.e., our inability to maintain anything to our satisfaction, is based on the fact that any *rūpa* is subjected to not only decay (impermanence) but also to unexpected change (*viparinama* nature).

- This fact is embodied in the Second Law of Thermodynamics; see, “[Second Law of Thermodynamics is Part of Anicca.](#)”

7. **Thus to attain *Nibbāna* is to attain the perfectly purified mind, which refuses to be burden with a physical body that leads to decay and rebirth repeatedly (and thus to *dukkha*).**

8. In the 31 realms, one is born with a dense body (*kāma loka*), fine-material body (*rūpa loka*), or only a trace of “matter” in the form of “*gati*” (*arūpa loka*). When the mind becomes free of a “body” anywhere in the 31 realms, that is *Nibbāna*. **This is another way to understand *Nibbāna*.**

9. In Buddha Dhamma, any given thing or concept can be looked at from many different angles. They are all consistent. It is a complete “world view.” Some people think, why do we have to worry about 31 realms, etc., but the world is very complex. Scientists are just beginning to appreciate this complexity.

- The amazing fact is that the Buddha discerned all this with his mind. Furthermore, he was able to present it all in a coherent manner.

10. Please re-read and contemplate on the above. In the long run, it will be very helpful. If you do not really understand it now, do not worry. You will be able to understand more when you get familiar with other concepts discussed in other posts. Everything at this site is inter-connected. It may take some time to “fill-in-the-blanks.”

More details at, “[Nāma & Rūpa to Nāmarūpa.](#)”

3.2.6 Does the First Noble Truth Describe only Suffering?

Revised October 24, 2018; re-written August 5, 2019

Difference Between *Dukha* and *Dukkha*

1. Buddha Dhamma describes nature’s laws. **Many people think that *dukkha Sacca* (the First Noble Truth, pronounced “*dukkha sachcha*”) says everything is suffering.** That is not true; there is a lot of apparent happiness, which makes people unaware of the hidden suffering until it is too late.

- The key is to develop *paññā* or wisdom to see the **hidden suffering**. And one does not necessarily need to feel pain to understand the *dukkha sacca*, even though it may motivate one to investigate.

2. There is a difference between **suffering** (the feeling or *vedanā*) and the ability to understand the causes for it (*paññā* or wisdom) thereby to **remove future suffering**.

- Pāli word for **suffering** is **dukha**. On the other hand, **dukkha** is *dukha* + *kha* or the “**removal of dukha**.” [*khaya* or *kha* means removal]
- **Dukha (suffering) is the opposite of sukha (pleasure)**. That is in several *suttā*. For example, in the “[WebLink: suttacentral: Bhāra Sutta \(SN 22.22\)](#)”:

“*Bhārā have pañcakkhandhā,
bhārahāro ca puggalo;
Bhārādānaṃ dukhaṃ loke,
bhāranikkhepanaṃ sukhaṃ.*”

Translated: “The five aggregates are burdens,
The burden-carrier is the person;
Carrying the burden is **suffering** in the world,
Laying the burden down is **blissful**.”

- Of course, the word **dukkha** appears in most *suttā*, because that is what Buddha Dhamma is all about, i.e., **removal of suffering**.

3. We do not realize that the five aggregates are burdens. We like our bodies and mind-pleasing objects in the world (*rūpakkhandha*). We crave for what we experience with the mind (aggregates of *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*).

- It is evident that there are bouts of happiness everywhere. If everything FELT LIKE suffering, everyone will be seeking *Nibbāna*. It is hard for people even to see the real suffering out there.

4. Apparent pleasures mask pain and suffering we experience. In the HUMAN REALM, suffering and happiness both exist; one can experience both.

- In the realms higher than the human plane, suffering is relatively much less, and that is why it is hard for *devās* to even think about *Nibbāna*. However, even those *devās* and *Brahmā* end up eventually in the lowest four realms. Of course, each birth in any realm ends with death, and that is unavoidable as long as one is in the rebirth process.
- Beings in the lowest four realms (*apāyā*) are the ones who experience a lot of *dukha*. Of course, they have no idea about the *Dukkha Sacca*. The key point is that each living being spends a lot of time in the *apāyā*, compared to other realms in the rebirth process, see, “[How the Buddha Described the Chance of Rebirth in the Human Realm](#).”
- That is why the rebirth process is filled with suffering. The good news is, that suffering can be stopped.

What is the Noble Truth of *Dukkha*?

5. Let us see how the Buddha described the First Noble Truth on suffering in the *Dhamma Cakka Pavattana Sutta*:

“*Idaṃ kho pana, bhikkhave, dukkhaṃ ariyasaccaṃ—jātipi dukkhā, jarāpi dukkhā, byādhipi dukkho, maraṇampi dukkhaṃ, appiyehi sampayogo dukkho, piyehi vippayogo dukkho, yampicchaṃ na labhati tampi dukkhaṃ—saṃkhittena pañcupādānakkhandhā dukkhā.*”

- Let us go through this “definition” of *dukkha* step-by-step.

6. In the first part, it says, “*jātipi dukkhā, jarāpi dukkhā, byādhipi dukkho, maraṇampi dukkhaṃ...*”

Translated: “birth is **suffering (that can be overcome)**. Getting old is **suffering (that can be overcome)**. Sickness is **suffering (that can be overcome)**. Death is **suffering (that can be overcome)**...”

- Other than “birth,” the others (getting old, sickness, and death) are clearly associated with suffering.
- However, the other three types of inevitable sufferings are attached to every birth.

- Furthermore, the other three types of sufferings cannot be eliminated without stopping birth, i.e., the rebirth process.
- Even though this is easy to see logically, it requires much more contemplation to understand.

7. The Buddha further clarified *dukkha* in the next verse, where he explicitly said: “*appiyehi sampayogo dukkho, piyehi vippayogo dukkho.*” That means, “it brings sorrow to associate with persons/things one does not like. It also brings sorrow when one has to dissociate from people/things that one likes.”

- We all know the truth of this first hand. It is unpleasant to associate with people one does not like, and also to have a job that one does not like, etc.
- Of course, the reverse of those is true too: “it brings sorrow when a loved one has to depart, and it also to lose a job or an object that one likes.”

***Dukkha* Arises Due to *Anicca* Nature**

8. Then comes, “*yampicchaṃ na labhati tampi dukkhaṃ*” which is shortened for “*yam pi icchaṃ na labhati tampi dukkhaṃ.*”

Here we see, “*iccha*” (same as “*icca*”) that we encountered in both *anicca*, *dukkha*, *anatta* and also in *Paticca Samuppāda* (“*pati+icca*” “*sama+uppāda*”). And “*labhati*” means “get”, and “*na labhati*” means “not get.” Note that “*iccha*” (in Sinhala ඉච්ච) emphasizes the “liking” in “*icca*” (in Sinhala ඉච්ච).

- **Translated: “If one does not get what one wants or likes, that leads to suffering.”**
- We also note that *anicca* comes from “*na*” + “*icca*” or “not getting what one desires.” Of course, *anicca* is the first of the three characteristics of Nature (*Tilakkhaṇa*).
- **Therefore, this is a statement of the *anicca* nature**, i.e., it is a natural law that one WILL NOT get what one desires in the long run. That is why it is not possible to eliminate suffering in the long term within the rebirth process.
- Suffering ends only with the ending of the rebirth process.

9. That same concept is in the [WebLink: suttacentral: Yadanicca sutta \(SN 22.15\)](#) as, “*yadaniccā tam dukkham, yam dukkham tadanattā.*” That is the abbreviated version of “*yad aniccā tam dukkham, yam dukkham tad anattā.*” **Translated: “if something is *anicca*, *dukkha* arises, and one becomes helpless (*anatta*).”**

- Of course, the verse, “*yampicchaṃ na labhati tampi dukkhaṃ*” corresponds to just the first part of that verse: “*yad aniccā tam dukkham.*”

10. The Buddha never said there is only suffering in this world. It is these bouts of “apparent happiness” that keeps the real suffering hidden. We always try to look at the bright side, and our societies also try to “cover-up” most of the pain and suffering that is out there.

- Both suffering and happiness are out there. **The key is to see the pain and suffering masked in apparent joy.**
- When a fish bites the bait, it sees only a bit of delicious food and does not see the hook, the string, and the man holding the fishing pole. It is not capable of understanding that “whole picture,” with the suffering hidden (the hook). In the same way, humans cannot see the pain and suffering hidden in apparent sense pleasures until a Buddha comes to the world and reveals it.
- On television, we see mostly glamorous people. Look at what happens to such beautiful people when they get old: [WebLink: RANKER: Celebrities Who Have Aged the Worst.](#)
- We need to realize that we all will go through such inevitable changes as we get old. No matter how hard we try, it is not possible to maintain ANYTHING to our satisfaction in the LONG-TERM.

- Furthermore, there is both suffering and happiness in the broader world of 31 realms. There is much more happiness in the planes above the human plane (but that happiness is temporary). And there is unimaginable suffering in the lower four, especially in the lowest one, the hell (*niraya*).

The Necessity of the Rebirth Process in Comprehending *Anicca*

11. The verses discussed in #8 through #10 above describe *anicca* nature. In the long run “we cannot maintain things to our satisfaction, and that leads to suffering”; This is “*ya da niccam tam dukkaham*” that was discussed in, “[Anicca, Dukkha, Anatta – Wrong Interpretations.](#)”

- Later in the *sutta*, it says, “.....*dukkhō anariyō anatta samhitō.*” One becomes *anatta* or helpless because of that. That is, “*tam dukkham tad anatta*” part of the verse in #9.
- In the *Anatta Lakkhana Sutta* (the second *sutta* delivered after the *Dhamma Cakka Pavattana sutta*), these concepts were further detailed; see, “[Anatta – No Refuge in This World.](#)”
- *Anicca, dukkha, anatta* are thus the foundational “vision” that can be achieved only by a Buddha. It is “*pubbe ananussutesu dhammesu...*” as emphasized at the beginning of the *Dhamma Cakka Pavattana sutta*.

12. That is why it is imperative to understand the “big picture” of “this world” with 31 realms, the process of rebirth, laws of *kamma*, and most importantly, *Paticca samuppāda*. Then we realize that most beings, due to their ignorance, are trapped in the lower four realms.

- There are only 7 billion or so people on Earth, but each of us carries in/on our bodies millions of living beings. See, “[There are as many creatures on your body as there are people on Earth!](#)”
- A household may have 4-6 people, but how many living beings are there in that house and in the yard? Millions, possibly billions. In a single scoop of dirt, there are thousands of tiny creatures.

13. The concept of *dukkha* (*dukha* that can be stopped) is seen only in the context of the rebirth process. It is all about removing suffering associated with FUTURE births.

- One’s current life has already started (which is a result of past *kamma*) and WILL go through until the *kammic* energy for the physical body runs out. We can only MANAGE any suffering associated with sicknesses, injuries, etc. Those are associated with the life that has already started.
- However, those future sufferings can be stopped by stopping the rebirth process. That is the *Dukkha Sacca*.

Five Aggregates – What We Like to Maintain to Our Satisfaction

14. Finally, the last line of the verse summarizes it all: “*saṃkhittena pañcupādānakkhandhā dukkha.*”

Translated: “The suffering that can be stopped arises because of the craving for the five aggregates.”

- What we crave for in this world can be divided into five groups: *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*. We want to maintain our bodies and other inert or live bodies to our satisfaction. We want to keep our *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* (our thoughts) to our satisfaction.
- In other words, what we crave (*icca*) — and thus have *upādāna* for — are the five aggregates (*pañcakkhandha*). The “portion” of *pañcakkhandha* that we desire is called *pañcupādānakkhandha* (*pañca* + *upādāna* + *khandha*).

15. Therefore, *dukha* (suffering or the *vedanā* felt) arises BECAUSE we crave for things in this world and do “*san*” to acquire such things.

- Again, we crave *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*, ONLY because we believe those will bring us happiness. But the reality is that those cravings will inevitably bring suffering as the net result. We can stop suffering by stopping those cravings via understanding the real nature of this world, i.e., *anicca* nature leads to *dukkha*.

- This truth (*dukkha sacca*) is realized by cultivating wisdom (*paññā*), i.e., by comprehending *anicca*, *dukkha*, *anatta*. Please re-read this until you get the idea. That is the “*pubbe ananussutesu dhammesu...*” or the message only a Buddha can discover.

16. Just like the fish does not see the danger in the “tasty worm”, we do not see the suffering hidden in the apparent pleasures. **There is suffering hidden in ALL sense pleasures**, but that can be realized only via stages. At the *Sotāpanna* stage, one willingly gives up only the intense greed and strong hate; ALL cravings are removed only at the *Arahant* stage.

- The realization of the actual characteristics of nature leads to giving up craving (*upādāna* due to *taṇhā*), which in turn leads to the release from the 31 realms, i.e., *Nibbāna*.
- Then *pañcupādānakkhandha* becomes just *pañcakkhandha* (i.e., no attachments even if the “world exists as before”).

17. It is essential to realize that this craving cannot be removed by force. The mind needs to see the benefits of that through the cultivation of wisdom via comprehending *anicca*, *dukkha*, *anatta*; see, “[Anicca – True Meaning](#)” and “[Anattā – A Systematic Analysis](#).”

- Another critical concept to understand is the benefits one gets by the removal of craving for worldly things; see, “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#).”

3.2.7 Nirodha and Vaya – Two Different Concepts

1. I know of several “Buddhist” groups who try to “stop” thoughts, believing that is what happens at the *Arahant* stage of *Nibbāna*, i.e., they believe that the Buddha spent 45 years of his life trying to teach people how to stop thoughts, which is an even worse interpretation of *Nibbāna* than the Mahāyānists.

- When we are in deep sleep or are unconscious, we do not “think thoughts.” Does that mean we attain *Arahanthood* during such times?
- **What the Buddha advised was to stop immoral thoughts, and to ENCOURAGE moral thoughts; that is how one purifies the mind. This is what one does in the correct *ānāpāna* meditation too; see, “[7. What is Ānāpāna?](#).”**
- The reality is that an *Arahant*’s thoughts are crystal clear (and pure), because they are devoid of defilements. Their memory is actually enhanced.
- Stopping all thoughts can lead to loss of perception and memory.

2. Many misconceptions about *Nibbāna* arise because the true meanings of some key Pāli words that the Buddha used are misunderstood. We have discussed how Mahayana forefathers twisted the concept of *sunyata* (emptiness) because they could not understand the concept of *Nibbāna*; see, “[What is Sunyata or Sunnata \(Emptiness\)?](#).”

3. There are several key words in Buddha Dhamma that need to be comprehended without even the slightest change. Most of these misconceptions arise because such key Pāli words are misinterpreted and also mistranslated. Buddha’s teachings were delivered in *Maghadhi* language and made to a form suitable for verbal transmission in the Pāli language (“Pāli” means “lined up”). Many times problems arise when people try to use Sanskrit translations as originals and try to interpret those Sanskrit words.

4. Three such words are *anicca*, *dukkha*, *anatta*: see, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#).” Three more such words are *nirodha*, *khaya*, and *vaya*. In this case the three words have apparently similar, but very different meanings. Let us look at the origins of these words:

- ***Nirodha*** comes from “*nir*”+“*udaya*”, where “*nir*” means stop and “*udaya*” means “arise.” Thus *nirodha* means stop something from arising. In Buddha Dhamma anything happens due to one or more causes. Thus if one does not want something to happen, one should remove the causes for it, and thus stop it from arising.

- **“San” causes anything in this world to arise** via “*saṅkhāra*”; see, [“What is “San”? – Meaning of Samsāra.”](#) However, anything that arises is subjected to the natural law of decay; **this “*khaya*.”**
- **“San” and “*khaya*” go together:** As explained in [“What is “San”? – Meaning of Samsāra”](#), “*sankhya*” in Pāli or Sinhala means numbers, and “*san*” means adding (or multiplying) thus contributing to “building or arising” and “*khaya*” means subtracting (or dividing) and thus leading to “decay or destruction.”
- Things that undergo this “arising” and “destruction” are called **“*saṅkhata (sankata in Sinhala).*”** Everything in this world is a *saṅkhata (sankata in Sinhala)*.

5. Anything that arises in this world (a *saṅkhata (sankata in Sinhala)*) starts decaying (“*khaya*”) from the moment it starts arising. For example, when a baby is born, all the cells in the baby’s body would have died in a couple of months, but more cells are born than those died; until that baby becomes a young person of around twenty years of age, more cells arise in a given time than decayed. Thus the baby “grows” into a young person, and then things are sort of in balance until about forty years of age, and then the “*khaya*” process starts dominating and person slowly starts to get weaker. Eventually, that person dies or destroyed; **this is “*vaya*.”**

- Once starts arising, a *saṅkhata (sankata in Sinhala)* cannot be stopped; it needs to undergo its natural process of growing, come to an apparent stationary state (but not stationary even momentarily), and eventually is destroyed. If someone commits suicide, this life may end, but that unspent energy starts a new life right away. **Thus all one can do is to stop something from arising. This stopping of a *saṅkhata (sankata in Sinhala)* via removing its causes is called “*nirodha*.”**

6. A “*saṅkhata (sankata in Sinhala)*” is anything in this world that arises due to “*san*” and decayed inevitably (*khaya*), and is eventually destroyed (*vaya*). Any living being is a *saṅkhata (sankata in Sinhala)* and arises due to “*san*.” We acquire “*san*” via “*saṅkhāra*” because we do not comprehend the true nature of the world (*avijjā* or ignorance) and thus cling to things in this world with “*taṇhā*”; see, [“*Taṇhā - How we Attach via Greed, Hate, and Ignorance.*”](#)

- We can begin to see with clarity when we get rid of *taṇhā* and *avijjā* via removing *lobha* (greed), *dosa* (hatred), and *moha* (delusion) from our minds gradually; this is also a “*khaya*” process for such defilements (“*āsava*”), where we gradually remove these three defilements (*āsava*) from our minds; see, [“*The Way to Nibbāna – Removal of Āsavā.*”](#) When a mind is pure (i.e., all *āsava* are removed), it does not do any *saṅkhāra* and thus no “*saṅkhata (sankata in Sinhala)*” can arise. At that stage, one has attained “*nirodha*” of any future “arising”, i.e., one has attained *Nibbāna*.

7. Now let us take some famous verses from the *Tipiṭaka* and see how the meanings come out naturally, without effort:

- **The third Noble truth is “*dukkha nirodha sacca*”** (here “*sacca*” is pronounced “*sachcha*”; *sacca* is truth), i.e., that suffering can be stopped from arising. Most people misinterpret “*dukkha nirodha sacca*” as “existing suffering can be stopped.” Our current life is a *saṅkhata (sankata in Sinhala)* that was caused by PREVIOUS causes; this life and any associated suffering CANNOT be stopped, and need to undergo its natural cause until death. That is why an *Arahant* (or even a Buddha) feels suffering due to past *kamma* (old causes).
- However, an *Arahant* has stopped FUTURE suffering from arising. This is indicated by **another meaning of *nirodha*: “*nī*” + “*roda*”, where “*roda*” means wheels; this *nirodha* also means “taking the wheels off of the *sansāric (rebirth) process.*”** There is no rebirth with a physical body that could result in old age, sickness, and death. Thus *Nibbāna* is removal of the causes that could lead to future suffering.

8. This is why the *Nibbāna* is of two kinds: “*saupadisesa Nibbāna*” and “*anupadisesa Nibbāna.*”

- When a person attains *Nibbāna*, it is called *saupadisesa Nibbāna* because that person is still “in this world of 31 realms”; he/she still has a body that needs to undergo its natural destruction; but one can still experience the *Nibbānic* bliss by getting into *nirodha samāpatti* for up to 7 days at a time.

- When that person dies, there is no rebirth and *Nibbāna* is “complete”; this is called *anupadisesa Nibbāna*. Suffering ends permanently.

9. Finally, not absolutely everything in this world of 31 realms is *saṅkhata* (*sankata* in Sinhala) or *saṅkhāra*. Absolutely everything is denoted by “dhamma”, which includes *sankata* (*saṅkhāra*) AND *nama gotta*. Here *nama gotta* are the “records” of all events of all beings in the mental plane that are truly permanent; see, “[Difference Between Dhamma and Saṅkhāra \(saṅkhata \(sankata in Sinhala\)\)](#).”

- This is why the Buddha’s last words were, “*vaya Dhamma saṅkhāra, appamādena sampādettha*,” or “All perishable Dhamma are *saṅkhāra* (or *saṅkhata (sankata in Sinhala)*); thus strive diligently and identify “*san*” (“*san*” + “*pā*” “*detha*“).”
- From beginningless time, we all built a new *saṅkhata* (*sankata* in Sinhala) each time the old *saṅkhata* (*sankata* in Sinhala) got destroyed. We do this uncountable times DURING each lifetime and also at death: we have been *brahmā*, *devas*, and humans countless times, but we have spent much more time in the four lowest realms. Thus in his last words the Buddha advised us to stop this senseless rebirth process which is filled with so much suffering, and to attain the permanent happiness of *nirāmisa sukha* in *Nibbāna*.
- By the way, *Nibbāna* is the only “entity” that does not ARISE due to causes; it is “*asankata*” (“*a*” + “*saṅkhata (sankata in Sinhala)*” or “not *saṅkhata (sankata in Sinhala)*” or “not conditioned”) because it does not have causes. It is reached via ELIMINATING THE CAUSES for everything that arise due to causes, i.e., *nirodha* of *saṅkhata (sankata in Sinhala)* automatically leads to *Nibbāna*.

3.2.8 *Nibbāna* “Exists”, but Not in This World

September 2, 2016; Revised November 24, 2016 (#9); Revised April 17, 2017; March 22, 2020

Introduction

1. Misconceptions about *Nibbāna* arise because the true meaning of it had been hidden for many hundreds of years. In the previous posts in this series, I have described what *Nibbāna* is. See, “[Nibbāna](#).”

- The question many people have is, “what happens to an *Arahant* upon death?.” One simply is not reborn anywhere in the 31 realms of this world. It is called *Parinibbāna* (“*pari*” + *Nibbāna*”; meaning “full *Nibbāna*”).
- Until *Parinibbāna*, an *Arahant* lives like a normal person and is subjected to *kamma vipāka*. However, “stressful thoughts that arise due to greed, anger, and ignorance” do not arise in a living *Arahant*. Until the death of the physical body, an *Arahant* has *saupadisesa Nibbāna*, i.e., *Nibbāna* is not complete.

2. It is not possible to “describe” *Nibbāna* (or more precisely what happens after *Parinibbāna*) in terms of the terminology rooted in “this world.” **Not a single word that we use can be used to describe what *Nibbāna* is like.**

- We simply do not have any “data” or “concepts” or “terminology” that pertain to *Nibbāna* because those would be totally foreign to us living in “this world.”
- One crude analogy would be trying to explain to a fish what life is like outside the water. A fish would not understand the need to breathe air instead of water.
- Another would be like trying to explain to a person who has time-traveled from thousand years ago, how radio or television works. He would not have sufficient “data” to be able to comprehend how radio or TV works.

Suttā on *Nibbāna*

3. **But *Nibbāna* “exists” because one can attain it.** But it does not exist in this world of 31 realms.

- There are four *suttā* in the *Udāna* section of the *Aṅguttara Nikāya* that explain *Nibbāna* (Udāna 8.1 through 8.4).
- Once you open a *sutta* at the Sutta Central website, click on the left-most drop-down to choose one of several languages. This is a good resource; consider making a donation if you find it useful. **Note: I am not associated with Sutta Central.**
- Of source, the translations are incorrect frequently for key Pāli words, as is the case for many websites/book. But at least one can see the correct Pāli version.

Paṭhama Nibbāna Paṭisaṃyutta Sutta – Nibbāna Exits

4. Let us look at the first one, “[WebLink: suttacentral: Pathama Nibbāna Patisaṃyutta sutta.](#)” It says, “*Atthi, bhikkhave, tadāyatanaṃ, yatha neva pathavī, na āpo, na tejo, na vāyo, na ākāsānañcāyatanaṃ, na viññāṇaṃcāyatanaṃ, na ākiñcaññāyatanaṃ, na nevasaññānāsaññāyatanaṃ, nāyaṃ loko, na paraloko, na ubho candimasūriyā. Tatrāpāhaṃ, bhikkhave, neva āgatiṃ vadāmi, na gatiṃ, na ʔhitiṃ, na cutiṃ, na upapattiṃ; appatiṭṭhaṃ, appavattaṃ, anārammaṇamevetamaṃ. Esevanto dukkhassāʔti.*”

- Let us consider the first part: “*atthi, bhikkhave, tadāyatanaṃ.*” Here “*atthi*” means “exists”, and “*tadāyatana*” is another word for *Nibbāna*. *Tadāyatana* comes from “*tath*” + “*āyatana*,” where “*tath*” (pronounced “thath”) means “perfect” and “*āyatana*” means “faculties.” Phonetically, the combined word is “*tadāyatana*” (pronounced “thadayathana”).
- It is a good idea to be familiar with how to spell Pāli words with the “*Tipiṭaka English*” convention. It is DIFFERENT from “Standard English.” See, “[Tipiṭaka English Convention Adopted by Early European Scholars – Part 1](#)” and “[Tipiṭaka English Convention Adopted by Early European Scholars – Part 2](#)”
- Thus the translation of “*Atthi, bhikkhave, tadāyatanaṃ*” is, “*Bhikkhus, Nibbāna exists (where everything is perfect)*”.

5. The second part in the blue says what can be said about *Nibbāna*. First, “*appatiṭṭhaṃ, appavattaṃ, anārammaṇamevetamaṃ*” means, “It is without support (causes), unmoving, without any *ārammaṇa* (thought object.)” The last part in the blue, “*Esevanto dukkhassāʔti*” means, “it is the end of suffering.”

- Therefore, those sentences in the blue state ALL that one can say about *Nibbāna*.
- The rest of that verse (in the red) says what is ABSENT in *Nibbāna*.

Paṭhama Nibbāna Paṭisaṃyutta Sutta – What is Absent in Nibbāna

6. The first part marked in deep red is, “**there is no *pathavi, āpo, tejo, vāyo (mahā bhūta)* there; there is no *ākāsānañcāyatana, viññāṇaṃcāyatana, ākiñcaññāyatana, nevasaññānāsaññāyatana*; furthermore, there is no “this world (that we experience), there is no *para loka* (where *gandhabbā* live, see, “[Hidden World of the Gandhabba: Netherworld \(*para loka*\)](#)”); and the Moon or the Sun would not arise there**” (*candimasūriyā* is Moon and the Sun).

The second part marked in red says, “*Bhikkhus, I say there is surely no coming and going between *ayam loko* and *para loko*, no living in either of those, no passing away (*cuti*), no birth.*”

- The absence of *pathavi, āpo, tejo, vāyo* means NOTHING made of matter that we see around us (people, animals, trees, other planets or stars) is there in *Nibbāna*.
- So, all that we experience (including *jhāna*) will not be there, after *Parinibbāna*, as discussed in #2 above.
- And, of course, there is no *gandhabba* going back and forth between “*ayam loko*” and “*para loko*.”
- Our terminology regarding ANYTHING AT ALL simply does not apply there.

Without *Nibbāna* There Would Not Be an End to Suffering

7. The *Tatiya Nibbāna Paṭisaṃyutta Sutta* (Udāna 8.3) has the following key verse: “*Atthi, bhikkhave, ajātaṃ abhūtaṃ akataṃ asaṅkhataṃ. No ce taṃ, bhikkhave, abhaviṣṣa ajātaṃ abhūtaṃ akataṃ asaṅkhataṃ, na yidha jātassa bhūtassa katassa saṅkhataṃ nissaraṇaṃ paññāyetha. Yasmā ca kho, bhikkhave, atthi ajātaṃ abhūtaṃ akataṃ asaṅkhataṃ, tasmā jātassa bhūtassa katassa saṅkhataṃ nissaraṇaṃ paññāyatī*”^{ti}

Translated: “*Bhikkhus*, “not born”, “not formed”, “not made”, “not conditioned” exists. **For *Bhikkhus*, if there had not been that which is “not born”, “not formed”, “not made”, “not conditioned”, an escape here from the born, become, made, and conditioned cannot be discerned.** But *Bhikkhus*, since there is a “not born”, “not formed”, “not made”, “not conditioned”, an escape from the born, become, made, and conditioned is evident.”

- The “not born”, “not formed”, “not made”, “not conditioned” is *Nibbāna*. It is reached by **eliminating** all that is formed, made, and conditioned.
- In other words, “this world” comes to existence (for a given person) because of the *bhava* and *jāti* built via defiled thoughts (*saṅkhāra*) generated due to *avijjā* (in the *Paṭicca Samuppāda* process.) With the cessation of *avijjā*, that mechanism or process stops and no more rebirths will be possible. That results in *Nibbāna*.
- There are two more companion *suttā* that describe *Nibbāna*: “[Dutiyanibbānapatisamyutta Sutta \(Ud 8.2\)](#)” and “[Catutthanibbānapatisamyutta Sutta \(Ud 8.4\)](#).” The translations available there are good enough to get further insights.

The Fire Analogy

8. One time, the inquisitor Vacchagotta (there is a whole series of *suttā* in the *Vacchagottavagga* of the *Saṃyutta Nikāya* about his probing questions put forth to the Buddha), asked the Buddha what happens to an *Arahant* upon death: “Where would he/she go?.”

- The Buddha showed him a burning fire, and asked him, “when this fire is extinguished, can you say where it went?.” Vacchagotta understood. When the fire is extinguished, it simply is not there anymore. That is all one can say. In the same way, when an *Arahant* dies, he/she is not reborn and thus cannot be “found” anywhere in the 31 realms.
- On the other hand, someone with *abhiññā* powers (with the *cutūpapāda ñāṇa*) can see where a normal person is reborn upon death. That life-stream exists somewhere in the 31 realms.

Rāgakkhaya Dosakkhaya Mohakkhaya—Idaṃ Vuccati Nibbānan

9. The Buddha could only explain to us the way to attain *Nibbāna*, by relinquishing our desire for worldly things based on the unsatisfactory nature (or the *anicca* nature) of this world.

- The Buddha said, “*rāgakkhaya dosakkhaya mohakkhaya— idaṃ vuccati nibbānan*” *ti*,” i.e., one attains *Nibbāna* via getting rid of *rāga*, *dosa*, *moha* in one’s mind. **Thus cleansing our minds is the only way to *Nibbāna*.** See, for example, [WebLink: suttacentral: Nibbānapañhā Sutta \(SN 38.1\)](#) and [WebLink: suttacentral: Sāmandaka Sutta \(SN 39.1.\)](#)
- However, it is not possible to even start on “*rāgakkhaya*” until one gets to the *Sotāpanna* stage. “*Rāgakkhaya*” attained partially at the *Anāgāmī* stage (via removal of *kāma rāga*) and fully at the *Arahant* stage (via removal of *rūpa rāga* and *arūpa rāga*). A *Sotāpanna* reduces *dosa* to *paṭigha* level (removed at the *Anāgāmī* stage), and *moha* to *avijjā* level (removed at the *Arahant* stage).
- In the new section, “[Living Dhamma](#),” we discuss these points and start from a basic level, even without referring to deeper concepts like rebirth.

Nibbāna Reached In Stages

10. The point is that *Nibbāna* is to be comprehended in stages.

- The very first stage of *Nibbāna* or “*Niveema*” or “cooling down” that can be experienced even before getting to the *Sotāpanna* stage. In fact, it is not possible to get to the *Sotāpanna* stage by skipping this step.
- To attain the *Sotāpanna* stage one MUST comprehend the *anicca* nature of this world to some extent. In order for the mind to grasp that concept, it must be free of the “coarse defilements” or “*pañca nīvaraṇa*” or “five hindrances” that cover one’s mind.
- For that one MUST live a moral life, start contemplating Buddha Dhamma, and experience the “cooling down” that results.

11. Many people try to attain or comprehend *Nibbāna* by reading about deep concepts about what it is. There are so many books out there on explaining what *Nibbāna* is, by people who may not have experienced even the basic “cooling down” or “*nirāmisā sukha*.”

- They try to explain concepts like *suñyata* or “emptiness” and *bodhicitta*; see, “[What is Suñyata or Suññata \(Emptiness\)?](#).” That is a complete waste of time because as we saw above, it is not possible to describe *Nibbāna* with words that we know.
- **Rather, one starts experiencing *Nibbāna* in stages.** One can start experiencing the RELIEF or COOLING DOWN that results when one starts living a moral life and start discarding *dasa akusala* in STAGES.
- **Furthermore, it is important to understand that one does not start on the Path by first comprehending the *anicca* nature; the *anicca* nature will gradually become clear.**
- The Buddha clearly stated the importance of following a gradual Path in the “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#).” Also, see, “[Buddha Dhamma – In a Chart](#).”
- Even a person who does not believe in rebirth can start from this level: “[Living Dhamma](#).”

Nibbāna Is Not a Dhamma – It Is a *Paramattha* Dhamma

12. In the post, “[The Grand Unified Theory of Dhamma – Introduction](#),” we saw that everything that EXISTS, can be put into four ultimate constituents (*paramattha dhamma*):

(i) Thoughts (*citta*)

(ii) Thought qualities or mental factors (*cetasika*)

(iii) Matter (*rūpa*)

(iv) *Nibbāna*

- Any ***dhamma*** in this world is normally be a COMBINATION of ALL THREE of the **first three *paramattha dhamma***. Note that ***Dhammā*** “bear” things in this world.
- The fourth ***paramattha dhamma*** in the list above, *Nibbāna*, does not exist within the 31 realms. But *Nibbāna* exists, i.e., it can be attained. An *Arahant* merges with *Nibbāna* at the death of his/her physical body.
- ***Nibbāna* is NOT *dhamma*.** It does not “bear” anything in this world.

Nibbāna Can Be Experienced in *Nirodha Samāpatti*

13. Let us discuss some relevant characteristics of an *Arahant*, i.e., one who has attained *Nibbāna*. He/she cannot experience *Nibbānic* bliss (experience of *Nibbāna*) unless getting into *Nirodha Samāpatti* for a maximum of 7 days at a time.

- When an *Arahant* is in *Nirodha Samāpatti*, there are no *citta* or thoughts flowing through his/her mind. There is no breathing and is not very different from a dead body (other than the fact that the body of the *Arahant* will have normal body temperature.). The point is, that *Arahant* will not be able to explain to us “the experience of *Nibbāna*.” In our terminology, all he/she can say is that he/she did not experience any “worldly thoughts.”
- At other times, an *Arahant* will be experiencing “this world” just like another human: he/she will recognize people/things, sounds, smells, etc. The only exception is that thoughts burdened with *rāga*, *dosa*, *moha* cannot arise: *Asobhana* (non-beautiful) *cetasika* will not be associated with those thoughts; see, “[What Are Kilesa \(Mental Impurities\)? – Connection to Cetasika.](#)”
- But he/she will be engaged in *puñña kriya* (meritorious deeds like delivering discourses), just like the Buddha did; they are just “actions”, and are not *puññābhisaṅkhāra* or *puñña abhisaṅkhāra*.

Nibbāna and Parinibbāna

14. Here is another interesting point. Some *Arahants* may have *kammic* energy for the “human *bhava*” left when he/she dies; see, “[Bhava and Jāti – States of Existence and Births Therein.](#)” But still, there will not be another rebirth for any *Arahant* **in this world of 31 realms.**

- The reason is that the “status of the *Arahanthood*” could not be borne (or sustained) by any other “finer body” than a dense human body. For example, if he/she were to be reborn human, then a human *gandhabba* need to come out of the dead human body; see, “[Gandhabba \(Manomaya Kāya\).](#)” But the fine body (*trija kaya*) of the *gandhabba* cannot “bear” the energy associated with an *Arahant*.
- In the same way, the fine bodies of a *deva* or a *brahma* also cannot sustain the mind of an *Arahant*. Thus if a *Deva* or a *Brahma* attains the *Arahanthood*, they will immediately attain *Parinibbāna*. In other words, there are no living *Arahants* in *Deva* or *Brahma* realms.

15. We can consider the following analogy to make clear what happens. A heater-coil is immersed in water, can “bear” the current that passes through it, while immersed in boiling water. But if we take a coil out of the water, it will burn. The heater coil cannot “bear” the current passing through it unless immersed in water.

- In the same way, the “*Arahanthood*” can be “borne” or be “sustained” only with a solid human body. Once the *gandhabba* comes out of that body –upon the death of that physical body — the “*Arahanthood*” cannot be “borne” by that very fine body. In fact, the “*Arahanthood*” cannot be “borne” by an even a layperson for more than 7 days. Once attaining the “*Arahanthood*,” one must become a *Bhikkhu* within 7 days, or one will die because a layperson cannot “bear” the “*Arahanthood*.”
- With *Parinibbāna* (death of an *Arahant*) “the *Nibbāna* is complete.” The Sinhala word is “*pirinivana*,” where “*nivana*” is *Nibbāna* and “*piri*” means “full” or “complete.”
- Therefore, *Nibbāna* exists. But one who has attained “full *Nibbāna*” or *Parinibbāna* will no longer be in this world of 31 realms. One would be totally free of any and all sufferings in this world, including harsh sufferings in the *apāyā*.

3.3.1 Anicca, Dukkha, Anatta – Wrong Interpretations

Revised October 25, 2016; April 11, 2017; September 13, 2017; November 25, 2017; January 26, 2018; May 25, 2019; August 6, 2019; January 11, 2020

Introduction

1. No other factor has contributed to help keep *Nibbāna* hidden in the past many hundreds of years than the incorrect interpretations of *anicca* as just “impermanence” and *anatta* as just “no-self.” If one can find even a single instance in the *Pāli Tipiṭaka* (not translations) that describe *anicca* and *anatta* that way, please let me know at lal@puredhamma.net. Also, before quoting English translations of the *Tipiṭaka*, please read the post, “[Misinterpretation of Anicca and Anatta by Early European Scholars.](#)”

- I consider this series of posts on “*anicca, dukkha, anatta*” to be the most important at the website. Reading the posts in the given order could be very beneficial.
- **A Buddha comes to this world to reveal three words and eight letters (in Pāli). “Attakkarā thīnapadā Sambuddhena pakāsithā, na hī sīla vatan hotu uppajjati Tathāgatā.” That means “a Buddha (Tathāgata) is born NOT just to show how to live a moral life, but to reveal three words with eight letters to the world.”** So far, I have not seen this verse in the *Tipiṭaka*; it is likely to have been in an old commentary.
- **These three words with eight letters are *anicca, dukkha, anatta*.** (when written in Sinhala/Pāli: අනිච්ච ඉත්තං අනන්තං but with last two letters in each term in the “old script” combined to become one, so the number of letters becomes eight instead of 11. I was able to find only අනන්ච for අනන්ත, but you can see how four letters become three there).

Anicca is pronounced “anichcha,” rhymes with “picture.”

[WebLink: Listen to pronunciation of: anicca](#)

Dukkha pronounced similarly, duk+kha.

[WebLink: Listen to pronunciation of: dukkha](#)

Anatta is pronounced “anaththa.”

[WebLink: Listen to pronunciation of: anatta](#)

See, “[Pāli Glossary and Pronunciation](#)” for more meanings of Pāli terms and sound files on pronunciations.

2. *Asubha* (“non-auspicious” or “unfruitful” nature) is another characteristic of nature. It appears together with *anicca, dukkha, anatta* in several *suttā*, for example, “[WebLink: suttacentral: Vipallāsa Sutta \(AN 4.49\).](#)”

- Furthermore, the word, *Tilakkhaṇa*, does not appear in the *Tipiṭaka* to my knowledge.
- However, *anicca, dukkha, anatta* appear as a group in many *suttā*, as we discuss below. Thus it is justifiable to clump them together as *Tilakkhaṇa*.

Why Are *Tilakkhaṇa* so Important?

3. The Buddha clarified these “three characteristics of this world” in his very first *sutta*; see, “[Does the First Noble Truth Describe only Suffering?](#)”

- These are the three primary characteristics of “this world.” A Buddha comes to the world to reveal the true nature of the world.
- Any moral person instinctively knows (and most religions teach) how to live a righteous life; see, “[Buddha Dhamma – In a Chart.](#)”
- The Buddha stated that if one comprehends the true nature of “this world,” as codified in these three words, then one would attain the Stream Entry (*Sotāpanna*) stage of *Nibbāna*; see, “[Why is Correct Interpretation of Anicca, Dukkha, Anatta so Important?](#)”

4. Therefore, a good understanding of the words *anicca*, *dukkha*, *anatta* is critical. If one sticks to incorrect interpretation of these three words, no matter how much effort one exerts, there is no possibility of attaining the *Sotāpanna* stage. Even in most *Theravāda* English texts, these three words have incorrect translations as impermanence, suffering, and “no-soul” or “no-self.” The correct meanings are the following.

- Nothing in this world can be maintained to one's satisfaction (*anicca*).
- When one strives to achieve that, it leads to suffering (*dukkha*). However, many people try to gain “happiness” by resorting to immoral deeds, and then end up in the *apāyā*. That is how one becomes genuinely helpless.
- Striving to achieve the impossible (i.e., seeking happiness in worldly things), only leads to suffering. Thus, one efforts are not only unfruitful, but one becomes helpless in the rebirth process (*anatta*).

Pāli Words for Impermanence Are “*Adduwan*” or “*Aniyata*”

5. The Pāli word for impermanence is NOT *anicca*; it is *addhuva* or *aniyata*. For example, “*Jīvitam aniyataṃ, Maraṇaṃ niyataṃ*” means, “life is not permanent, death is.” [*addhuva* :[adj.] unstable; impermanent. *aniyata* :[adj.] uncertain; not settled.]

“*addhuvam jīvitam, dhuvam maraṇam*” means the same thing.

- Therefore, the critical mistake was in translating the original Pāli word *anicca* to *Sanskrit* as “*anitya*,” which does mean impermanence.
- This term, “*dhuva*” comes in the *Brahmanimantanika Sutta* (*Majjhima Nikāya* 49), where the Baka Brahma says his existence is permanent; see #12 of “[Anidassana Viññāna – What It Really Means.](#)”

Anatta Is Not “Self” or “No-Self”

6. Now let us examine the damage done by translating the original Pāli word *anatta* to *Sanskrit* as “*anātma*.”

- At the time of the Buddha also, there were two opposing views on the idea of a “self.” One camp believed in an unchanging “soul” (*ātma*) associated with a being. This camp thus corresponds to the major religions of the world today with the concept that when one dies, one's soul goes to heaven or hell.
- The opposing camp argued that there is “no-soul” (*anātma*) and that when one dies, there is nothing that survives the death. This view is the materialistic view today that our minds arise from matter, and thus, there is nothing that survives death.

7. The Buddha said it was neither. There is no “self” permanently associated with a living being: both the mind and the body are in constant flux (see the Section on “[The Grand Unified Theory of Dhamma](#)”), and thus there is no “soul” or an “unchanging self.” See, “[What Reincarnates? – Concept of a Life-stream.](#)”

- However, one has a choice of how to respond to an external stimulus. Therefore, it is also incorrect to say that there is “no-self.”
- Furthermore, there is continuity at death based on cause-and-effect (*paṭicca samuppāda*; see, “[Paṭicca Samuppāda – Introduction](#)”).
- The new living being is a continuation of the old living being, just as an older man is a continuation of the process from the baby stage. Change is there at every MOMENT, based on cause-and-effect; the “new” is dependent on the “old.”
- That is also why it is not correct to say that an *Arahant* is annihilated at death (i.e., at *Parinibbāna*). See, “[Yamaka Sutta \(SN 22.85\) – Arahant hood Is Not Annihilation but End of Suffering.](#)”

They Are Related to Each Other

8. The Buddha stated that the three characteristics of “this world” are RELATED to each other:

“*yadaniccaṃ taṃ dukkhaṃ, yaṃ dukkhaṃ tadanattā*” (“*yad aniccaṃ taṃ dukkhaṃ, yaṃ dukkhaṃ tad anattā*”), i.e.,

“if something is *anicca*, *dukkha* arises, and one becomes helpless (*anatta*).” Note that “*yaṃ*” and “*yad*” have the same meaning and are used interchangeably. In the same way, “*yadidaṃ*” comes from “*yad idaṃ*.”

- (In the *Samyutta Nikāya (Anicca Vagga)*, many *suttā* including [WebLink: suttacentral: Ajjhattanicca Sutta \(SN 35.1\)](#), [WebLink: suttacentral: Bahiranicca Sutta \(SN 35.4\)](#), and [WebLink: suttacentral: Yadanicca sutta \(SN 22.15\)](#) have the above verse.)

9. Now let us see what happens if we take *anicca* to be impermanent and *anatta* to be “no-soul.” Then the above verse reads, “if something is not permanent, suffering arises, and because of that one becomes “no-self.”

- Many people take a human body as “it,” and say that since the body is impermanent, suffering arises. But the *suttā* mentioned above describe this for all six internal senses (*Ajjhattanicca* or *Ajjhatta Anicca Sutta*) and for everything **external** that is sensed by the six sense faculties (*Bāhiraṇicca* or *Bāhira Anicca Sutta*). Therefore, that verse holds for anything and everything “in this world.”
- Thus if a headache does not become permanent, it is meaningless to say it has no self.
- But there are many things in the world, if become permanent, would lead to happiness: health, wealth, association with someone liked, moving away from someone disliked, etc.
- As we will show in the next post (“[Anicca – True Meaning](#)”), the correct translation holds for any case.

10. Now the opposite of the above statement must be correct, too (in mathematical logic, this is not correct generally, but in this particular case, it can be shown to be right. It is due to the assumption that “*dukkha*” depends only on “*nicca*” or “*anicca*” and no other factor); see, “[Logical Proof that Impermanence is Incorrect Translation of Anicca.](#)”

Let us consider the incorrect interpretations, that say:

“if something is permanent, suffering does not arise, and because of that, it implies a “self.”

- If one has a permanent headache or a sickness, how can that stop suffering? And in what sense a “self” arise?
- There are many things in this world if it become permanent, would lead to suffering: a disease, poverty, association with someone disliked, moving away from a loved one, etc.

Thus we can see that *anicca* and *anatta* do not mean impermanence and “no-self.”

- However, if we take the correct translation, we can show that the reverse statement also holds as we discuss in the next post: “[Anicca – Inability to Keep What We Like.](#)”

Everyone Knows Anything in This World is Impermanent

11. Permanence and impermanence are inseparable PROPERTIES of living beings, objects, and events. On the other hand, *nicca/anicca* are PERCEPTIONS IN ONE’S MIND about them.

- We cannot maintain anything to our satisfaction (including “our” own body) in the long run, and that is *anicca*. And because of that, we become distraught, and that is *dukkha*. And since we are unable to prevent this sequence of events, we are truly helpless in the long run (nothing of real substance left in the end.) That is *anatta*.
- Here is a video that illustrates the concept of *anicca* clearly:

- We need to realize that we all will go through this inevitable change as we get old. No matter how hard we try, it is not possible to maintain ANYTHING to our satisfaction. It is the nature of “this world”: *anicca*.
- Now, of course, any of these celebrities (or their fans) will be saddened to see that comparison in the video above. They have not been able to maintain their bodies to their satisfaction. However, a person who is in bad terms with any of these celebrities could be happy to see those pictures, since he/she would like to see something terrible to happen to that celebrity.

12. Thus “impermanence” is inevitable; it is a property of anything in this world. **But “*anicca*” is a perception in someone’s mind. That perception CAN be changed; that is how one gets rid of suffering.**

- In the above case, celebrities’ bodies ARE impermanent; but that did not necessarily cause suffering to ALL. It caused pain to only those who did not like them getting old. If they had any enemies, those would be happy to see them losing their “good looks.”
- Impermanence is a fact; see, “[The Grand Unified Theory of Dhamma](#).” But impermanence is NOT the MEANING of *anicca*.
- These pictures provide the visual impact that we do not usually get. We don’t see changes in ourselves because the change is gradual.

13. A Buddha is not needed to show that impermanence is an inherent characteristic of our universe. Scientists are well aware of that, but they have not attained *Nibbāna*. *Anicca* is a profound concept with several meanings, and they are all related. Here are three ways to look at it:

- “[Anicca – Inability to Keep What We Like](#)” (listed above also).
- “[Anicca – Repeated Arising/Destruction](#).”
- “[Anicca – Worthlessness of Worldly Things](#).”

14. Finally, the Buddha has said, “*Sabbe Dhammā anattā*.” So, what does “all *dhammā* are “no-self” mean (if *anatta* meant “no-self”)? *Dhammā* means “to bear” and include those *kammic* energies that can bring future *vipāka* including future rebirths. We strive to make such *Dhammā* which will only bring NET suffering in the future. Nothing in this world is of any real value in the end. They all have transient existence: That is *anatta* nature.

- This is systematically explained in “[Origin of Life](#)” and specifically in the post, “[Dhammā, Kamma, Saṅkhāra, Mind – Critical Connections](#).”
- Another keyword that had lost its true meaning is “*san*”; see, “[What is “San”? Meaning of Sansara \(or Samsara\)](#).”

Possible Historical Reasons for Mistranslations

15. We can see the origins of some of these incorrect translations by looking at how Buddha Dhamma was transmitted over time. For details, see “[Historical Background](#).”

- For about 500 years after the *Parinibbāna* of the Buddha, the Pāli *Tipiṭaka* was transmitted orally, from generation to generation of *bhikkhus*, who faithfully passed down the Pāli Canon. Of course, it had been DESIGNED for easy oral transmission.
- See, “[Preservation of the Dhamma](#)” for a discussion on this aspect. The original teachings of the Buddha are still intact.

16. Then it was written down for the first time in 29 BCE in Sri Lanka with Sinhala script. Pāli is a phonetic language that does not have an alphabet.

- The *Tipiṭaka* was never translated to any other language until the Europeans discovered “Buddhism” in the late 1600s; see, “[Background on the Current Revival of Buddha Dhamma.](#)”
- *Tipiṭaka* was not translated to even the Sinhala language until 2005.

17. When Rhys Davis and others started doing those English translations, they were heavily influenced by Sanskrit *Mahāyāna sūtras*, as well by *Vedic* literature. Think about it: when the Europeans first started discovering all these different Pāli and Sanskrit documents, they must have been overwhelmed by the complexities.

- It took them some time to separate Buddhism from Hinduism, and in the process, some concepts got mixed up; see, “[Misinterpretation of Anicca and Anatta by Early European Scholars.](#)”
- For example, They ASSUMED that “*anatta*” was the same as “*anātma*,” which is a Sanskrit word, with a different meaning of “no-self.” Similarly, they took “*anicca*” to mean the same as Sanskrit “*anitya*,” which does mean “impermanent.”

It Will Take Time to Untangle These Issues

18. The worst was that even contemporary Sinhala scholars like Malasekara (who was a doctoral student of Rhys Davis), “learned” Buddhism from the Europeans, and thus started using wrong interpretations. Other Sinhala scholars like Kalupahana and Jayathilake also learned “Buddhism” at universities in the United Kingdom.

- Following the original translations by Rhys Davis, Eugene Burnouf, Olcott, and others, those Sinhala scholars also write books in both English and Sinhala. Of course, scholars in other Buddhist countries did the same in their languages, and the incorrect interpretations spread throughout the whole world.
- To correct this grave problem, we need to go back to the *Tipiṭaka* in Pāli and start the process there.
- Pāli *suttā* should not be translated word-to-word. Most of the *suttā* are condensed and written in style conducive for oral transmission; see, “[Sutta – Introduction.](#)”
- Commentaries were written to explain critical concepts in the *Tipiṭaka*, and only three of those original commentaries have survived. We need to rely heavily on those three: *Paṭisambhidāmagga*, *Peṭakopadesa*, and *Nettipakarana*.
- Instead, most people rely on incorrect commentaries written in more recent years, especially Buddhaghosa’s *Visuddhimagga*. For details, see “[Buddhaghosa and Visuddhimagga – Historical Background.](#)” However, Buddhaghosa did not change the meanings of the words *anicca*, *dukkha*, *anatta*. That is likely to have happened in more recent times, as I explained above). But he incorporated many other Hindu concepts like breath meditation and *kasina* meditation; see, “[Buddhaghosa’s Visuddhimagga – A Focused Analysis.](#)”

19. It is also important to note that mass printing was not available until recent years, and became common only in the 1800s; see, “[WebLink: newworldencyclopedia.org: Printing press.](#)”

- Thus mass production of books became possible only with the new printing presses that came out in the 1800s. By that time, key concepts had been mistranslated.
- In the early days, *Tipiṭaka* was written on specially prepared leaves and needed to be re-written by hand every 100-200 years before they degraded. So, we must be grateful to the *bhikkhus* in Sri Lanka who did this dutifully over almost 2000 years.
- Sinhala language (both spoken and written) changed over the past 2000 years. **The need to re-write the *Tipiṭaka* every 100 or so years made sure that any changes in Sinhala script were taken into account; see #21, of “[Misinterpretation of Anicca and Anatta by Early European Scholars.](#)”**

Other Related Issues

20. I came across another problem in a recent online forum. People are debating on the meanings of words “*anatta*” (අනත්ත in Sinhala) and “*anatta*” (අනත්ථ in Sinhala). They mean the same, but with more emphasis is added in the latter word.

- So, most people write it as “*anatta*.” It does not matter how one writes it, as long as one understands the meaning as “with no refuge” or “without essence,” and NOT “no-self.”
- But it does mean “it is not fruitful to take anything in this world to be mine.”

21. Two more main misconceptions are prevalent today. They not only block the path to *Nibbāna* but are *micchā diṭṭhi* that could be responsible for rebirth in the *apāyā*. I am not trying to scare anyone, but “making *adhamma* to be *dhamma* is a serious offense.”

- Misinterpretation of breath meditation as *Ānāpānasati*: “[Is Ānāpānasati Breath Meditation?](#).”
- Insisting that the *gandhabba* (*manomaya kāya*) is a Mahayana concept: “[Gandhabba State – Evidence from Tipitaka.](#)”

22. All these misconceptions are not the fault of current *Theravādins*; they have been handed down for many hundreds of years, as explained in the “[Historical Background](#).” **However, it makes no sense to adhere to them when substantial evidence is presented against them, per the above posts, and many others on this website.**

- Of course, no one should be able to insist, “this is the only truth, and nothing else is the truth.” But the truth can be verified to one’s satisfaction by critically examining the evidence. I am open to discuss any valid contrary evidence. We need to sort out the truth for the benefit of all.

23. Finally, it may not be possible to comprehend *anicca*, *dukkha*, *anatta* straight away. One must first follow the mundane path to learn basic concepts like kamma and rebirth.

- More details at “[Transition to Noble Eightfold Path.](#)”
- A systematic approach at “[Living Dhamma.](#)”

24. *Anicca* and *anatta* are complex Pāli words that cannot be translated into English directly. There is no English word that can convey the meaning of *anicca* (or *anatta*). The following subsections discuss those two complex Pāli words:

[Anicca – True Meaning](#)

[Anattā – A Systematic Analysis](#)

July 10, 2020: A new series of posts on “[Origin of Life](#)” systematically explain *Tilakkhaṇa* and *Paṭicca Samuppāda* and also makes the connection between them.

3.3.2 The Way to Nibbāna – Transcription of a Discourse by Waharaka Thero

July 6, 2020

This was one of the first discourses by the late Venerable Waharaka Abayarathanalankara *Thero*. Janith Boniface Fernando has made it into a youtube video with transcription in Sinhala and English languages.

[නිවන් දක්න හරිමග කුමක්ද ? \(What is Nibbāna?\) | With English Subtitles](#)

1. This discourse is an introduction to *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*) that is critical for one to start on the Noble Eightfold Path.

- I have revised and expanded the English transcript that can be downloaded as a pdf file: [Waharaka Thero Discourse – The Way to Nibbāna](#)

- This is an updated version of the document that I posted in the discussion forum (see #3).
2. A few comments:
- As I mentioned, this was one of the early discourses, soon after Waharaka *Thero* started explaining the correct meanings of the Pali words *anicca* and *anatta*.
 - At that time, Waharaka *Thero* was also used to the incorrect interpretation of “*anicca*” and “*anatta*” as “*anitya*” and “*anātma*” in the Sinhala language (and “impermanence” and “no-self” in English.)
 - Therefore, even while describing the correct interpretation, he also inadvertently referred to “*anicca*” as “*anitya*” and “*anatta*” as “*anātma*” once-in-a-while. I have corrected those, of course.
 - Furthermore, I have expanded the original text and also referred to a few relevant posts at puredhamma.net.
3. Any comments/questions can be discussed at the discussion forum: [WebLink: Pure Dhamma Forum: Waharaka Thero English Subs Discourse](#)
- Janith Fernando has transcribed a few more of Waharaka *Thero*’s discourses and both English and Sinhala transcripts (from him) are available under my entry at that forum on June 19, 2020. As he transcribes more discourses, I will add them there. I do not plan to work on other discourses (than the one posted above in #1) any time soon.
 - Many merits to Janith and several readers at the discussion forum who contributed to this effort.
4. I just finished updating the section on “[The Five Aggregates \(Pañcakkhandha\)](#).”
- It has a subsection on “[Five Aggregates – Connection to Tilakkhana](#).”
 - There is a new section on “[Buddhahood Associated Controversies](#)” Most people are not aware of the qualities of a Buddha and the capabilities of a Buddha.

3.3.3 **Anicca – True Meaning**

Anicca is commonly translated as “impermanence.” But it is a fundamental concept in Buddha Dhamma, which has many related — but somewhat different — meanings. Some are discussed in the following posts:

- [Anicca – Inability to Keep What We Like](#)
- [Anicca – Repeated Arising/Destruction](#)
- [Anicca – Worthlessness of Worldly Things](#)
- [Anicca – The Incessant Distress \(“Pīlana”\)](#)
- [How to Cultivate Anicca Sanna](#)
- [How to Cultivate the Anicca Sanna – II](#)
- [If Everything is Anicca Should We Just give up Everything?](#)

3.3.3.1 **Anicca – Inability to Keep What We Like**

Re-written May 26, 2019; June 13, 2020

This post was originally had the title, “Anicca – Inability to Maintain Anything.” I have re-written with a new title to emphasize the meaning in the *Dhammacakkappavattana Sutta* (SN 56.11); for more details: [“Dhammacakkappavattana Sutta.”](#)

***Anicca* in the First Noble Truth**

1. The First Noble Truth clearly states that *anicca* nature is the root cause of suffering. Let us look at how the Buddha summarized the First Noble Truth about suffering in that very first *sutta* he delivered.

Idaṃ kho pana, bhikkhave, dukkhaṃ ariya saccaṃ:

jātipi dukkhā, jarāpi dukkhā, byādhipi dukkho, maraṇampi dukkhāṃ, appiyehi sampayogo dukkho, piyehi vippayogo dukkho, yampicchaṃ na labhati tampi dukkhāṃ—*saṃkhittena pañcupādānakkhandhā dukkhā.*

Translated: *Bhikkhus*, What is the Noble Truth of Suffering?

“Birth is suffering, getting old is suffering, getting sick is suffering, dying is suffering. Having to associate with things that one does not like is suffering and having to separate from those things one likes is suffering. **If one does not get what one likes, that is suffering** – in brief, the origin of suffering is the **craving** for the five aggregates of *rūpa, vedanā, saññā, saṅkhāra, viññāṇa* (*pañcupādānakkhandha*). *Pañcupādānakkhandha* (*upādāna* or the “tendency to keep close” of *pañcakkhandha*) includes all that we crave for in this world.

Analysis of the First Noble Truth

2. The first part in bold indicates what we consider to be forms of suffering: Birth, getting old, getting sick, and dying.

- We may not remember, but birth is a traumatic event, just like the dying moment. Coming out of the birth canal is a traumatic event for both the mother and the baby. More importantly, all births LEAD to suffering, because getting old, getting sick, and eventual death is built-in with ANY birth. **Each and every birth ends up in death. That is another, inevitable suffering associated with birth.**
- We also DO NOT LIKE to get old, to get sick, and we definitely do not like to die. If we have to experience any of them, that is suffering.
- What we WOULD LIKE is to stay young, not get old, not get sick, and not to die ever. If we can have those conditions fulfilled we will be forever happy.
- Therefore, the suffering that the Buddha taught in his first discourse was associated with the rebirth process.

3. **That is what the second part of the verse in #1 (not in bold) says:** Having to associate with things that one does not like is suffering and having to separate from those things one likes is suffering.

- We all have experienced the sorrow when separating from those who we like. We also feel distressed when we have to associate with those who we do not like.
- If we can be born instantaneously at a young age (say, 15 to 25 years), and stay at that age without getting old or sick and never die, that is what we WOULD LIKE. But no matter how much we would like to associate with such a life, we will NEVER get it.
- Instead, we have to suffer through each life. Each birth ends up in death. Furthermore, we suffer when getting old, when getting sick/injured, and finally when dying. There is no way to dissociate from those four things that we do not like.
- But that is not the end of it. We keep doing this over and over in the rebirth cycle. Furthermore, things can get much worse in the lowest four realms, including the animal realm.

We Suffer When We Do Not Get What We Desire

4. Both those parts are combined into one succinct statement in the third part of the verse in #1 (in bold): **“*Yampiccaṃ nalabhati tampi dukkhaṃ.*”**

“*Yampicchaṃ na labhati tampi dukkhaṃ*” is actually a shortened version of the verse (that rhymes).

The full sentence is “*Yam pi icchaṃ na labhati tam pi dukkhaṃ.*”

- “*Yam pi icchaṃ*” means “whatever is liked or craved for.” “*Na labhati*” means “not getting.” “*Tam pi dukkhaṃ*” means “that leads to suffering.”
- **Therefore, that verse simply says: “If one does not get what one craves or likes, that leads to suffering.”**
- **This is a more general statement and applies in any situation.** We can see that in our daily lives. We like to hang out with people we like and it is a stress to be with people that we do not like.
- **Furthermore, the more one craves something, the more suffering one will endure at the end.** But this requires a lot of discussions.

Anicca – The inability to Fulfill Our Desires

5. The negation of the word “*nicca*” is “*anicca*” (“*na*” + “*icca*”), just like the word *Anāgāmi* comes from “*na*” + “*āgāmi*.” Therefore, even though we would like the Nature to be “*nicca*,” in reality, it is “*anicca*,” i.e., it is not possible, in the long run, to have, to be with, what we like, and that is the root cause of suffering. One may live most of one’s life happily, but one would have to leave all that behind when one dies.

- A deeper point is that we all like to born in good realms, but most future births will NOT be to our liking, but are based on “[Paticca Samuppāda](#).”
- By the way, Pāli words “*icca*” and “*anicca*” are pronounced “*ichcha*” and “*anichcha*.”
- Not getting what one desires or craves is the opposite of “*icca*” or “*na icca*” or “*anicca*.” This is the same way that “*na āgāmi*” becomes “*Anāgāmi*” (“*na āgāmi*” means “not coming back”; but in the context of *Anāgāmi*, it means “not coming back to *kāma loka* or the lowest 11 realms. **Both these are examples of Pāli sandhi rules (connecting two words together).**

6. Therefore, “*yampiccaṃ nalabhati tampi dukkhaṃ*” is the most important verse in the first *sutta* delivered by the Buddha, *Dhammacakkappavattana Sutta*. It provides the key to understanding the Buddha’s message and led to the attaining of the *Sotāpanna* stage by the five ascetics.

- Note that *icca* and *iccha* (ඉච්ච and ඉච්ඡ in Sinhala) appear in the *Tipiṭaka* under different *suttā*. The word “*iccha*” with the emphasis on the last syllable is used to indicate “strong *icca*” or “strong attachment.”
- The word “*icca*” (liking) is closely related to “*taṇhā*” (getting attached). *Taṇhā* happens automatically because of *icca*.
- The intrinsic nature of this world is “*anicca*,” i.e., we will never get what we crave for, and thus at the end (at least at death) we will leave all this behind and suffer, that is *dukkha*.

Nicca – The Wrong Perception We Have

7. It is important to realize that *nicca* is the PERCEPTION that one can maintain things that one likes to one’s satisfaction.

- If this is indeed the case, then one is happy, i.e., *sukha* arises, or at least suffering does not arise. In that case, one is in control, and there is something fruitful to be had, i.e., *atta*. Thus even if one needs to work hard to get something that can be maintained to one’s satisfaction, in the end, one can find permanent happiness, and one is in control of one’s own destiny.
- Humans normally have that *nicca saññā*, and work hard to gain material things. But at death, one has to leave behind all those possessions, and thus one’s life ALWAYS ends in despair and suffering (in addition to suffering due to old age).

- Until one realizes the true “*anicca* nature”, one will be trapped in the rebirth process, and will be subjected to much suffering because of that inherent “*anicca* nature.” The Buddha advised cultivating the *anicca saññā*.
- More information on *anicca* as the opposite of “*nicca*”: “[Three Marks of Existence – English Discourses.](#)”

Root Cause of Suffering Is *Anicca* Nature

8. Thus the root cause of suffering is NOT impermanence, even though it does play a role.
- The world is inherently impermanent (see, “[The Grand Unified Theory of Dhamma](#)”). However, **impermanence by itself does not lead to suffering**. If that is the case, since no one can change that fact, no one will be able to end the suffering (and to attain *Nibbāna*).
 - It is the wrong PERCEPTION (*saññā*) of *nicca* that leads to suffering. We struggle to find lasting happiness in a world that intrinsically has *anicca* nature.
 - That wrong perception CAN BE changed by learning and contemplating on *Dhamma*, i.e., by cultivating the *anicca saññā*.
 - The CORRECT PERCEPTION of *anicca* (once accepted by the mind), will lead to cessation of suffering (via the four stages of *Sotāpanna*, *Sakadāgāmi*, *Anāgāmi*, *Arahant*).

Also see, “[Does Impermanence Lead to Suffering?](#)”,

Things We Like Cannot Be Kept That Way for Too Long

9. The above point can be illustrated using this set of pictures:

“[WebLink: ranker.com: Celebrities Who Have Aged the Worst](#)“

- We need to realize that we all will go through such inevitable changes as we get old; no matter how hard we try, it is not possible to maintain ANYTHING to our satisfaction. It is the nature of “this world.”
- Now, of course, any of these celebrities (or their fans) would be saddened to see the comparison. They have not been able to maintain their bodies to their satisfaction.
- However, a person who is in bad terms with any of these celebrities could be happy to see the picture, because that person’s wish is to see something bad to happen to the celebrity (in this case to lose their “looks”).
- Thus “impermanence” is something that is inevitable; it is a property of anything in this world. **But the perception of “*anicca*” is in someone’s mind.** In the above case, bodies or celebrities ARE impermanent; but that did not necessarily cause suffering to ALL. Even those celebrities, if they realize that *anicca* nature cannot be avoided, would not undergo additional suffering by subjecting themselves to plastic surgeries, botox treatments, etc. Most of all, depression can be avoided.
- *Anicca* nature leads to suffering for ALL. But many go through added suffering by trying to “overcome it.” More importantly, one can stop future suffering by comprehending the *anicca* nature.

Root Cause of Depression

10. When one realizes that one cannot maintain something that desired after a long struggle, one becomes distraught, depressed, unsatisfied (“*yam pi iccham na labati tam pi dukkham*”, where “*na labati*” means “not get”). Thus the wrong perception of *nicca* (or a sense of fulfillment of one’s desires) ALWAYS leads to *dukkha* or suffering at the end.

- The mindset is that even if something is not permanent and breaks down, one can always replace it with a new one and feel a sense of fulfillment one desires. It is not the impermanence that gives a sense of

invincibility **but the mindset that one can always find a replacement for it and maintain one's happiness.**

- But if one carefully examines the wider world view of the Buddha, one can easily see that this mindset of the possibility of “long-lasting happiness in this world” is an illusion.
- No matter what we achieve in this life, we HAVE TO leave it all behind when we die.
- And in the new life, we start all over; this is what we have been doing from beginning-less time.
- And of course, we make it worse by doing immoral things “trying to maintain things to our satisfaction” and thus generating bad *kamma vipāka*, leading to immense suffering in the four lowest realms (*apāyā*).

Anicca Nature Leads to Suffering and Helplessness

11. In the *Saṃyutta Nikāya* (*Anicca Vagga*), many *suttā* including [WebLink: suttacentral: Ajjhannicca Sutta \(SN 35.1\)](#), [WebLink: suttacentral: Bahiranicca Sutta \(SN 35.4\)](#), and [WebLink: suttacentral: Yadanicca sutta \(SN 22.15\)](#), the Buddha stated that the three characteristics of “this world” (*anicca, dukkha, anatta*) are RELATED to each other:

“*yadaniccaṃ taṃ dukkhaṃ, taṃ dukkhaṃ tadanatta*” (expanded to “*yad **aniccaṃ** taṃ dukkhaṃ, taṃ dukkhaṃ tad **anatta***”), or,

– “**if something cannot be maintained (or managed depending on the case) to one's satisfaction, suffering arises, therefore one is helpless in the end.**”

Impermanence Does Not Always Lead to Suffering

12. Let us consider the same examples that we considered in bullet #6 of the introductory post “[Anicca, Dukkha, Anatta – Wrong Interpretations.](#)”

- If we take a “headache” as the “something”, the statement now reads as follows. “**If a headache cannot be maintained (managed is a better word here) to one's satisfaction (i.e., if one cannot get rid of the headache), suffering arises, therefore one is helpless.**”
- Similarly, you can substitute anything that we considered in the previous post and see that it will hold.
- On the other hand, if *anicca* means “impermanence”, the statement reads: “**if a headache is impermanent, suffering arises, therefore one is helpless.**” That is obviously not correct. Suffering would arise only if the headache becomes permanent!

Anicca Nature Is There in All the Realms of This World

13. No existence in “this world” is exempt from these three characteristics. It applies to all 31 realms. Even though one may be able to find happiness at certain times, nothing we do can get us out of the realities of getting old, sick, and finally dying. Then the cycle repeats in the next life, and next,

- Furthermore, any such “happy times” are insignificantly small in the *sansāric* time scale; see, “[The Four Stages in Attaining Nibbāna](#),” and “[How the Buddha Described the Chance of Rebirth in the Human Realm](#).”

14. But the good news is that we can gain a kind of happiness that will not go away by comprehending the *anicca* nature, especially if one attains at least the *Sotāpanna* stage of *Nibbāna*; see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#),” and “[Nibbāna – Is it Difficult to Understand?](#).”

15. The *Tiṭṭaka* describes the concept of *anicca* in many different ways. Two more are discussed in, “[Anicca – Repeated Arising/Destruction](#)” and “[Anicca – Worthlessness of Worldly Things](#).”

3.3.3.2 Anicca – Repeated Arising/Destruction

1. *Anicca* has been analyzed in several different ways in the *Tiṭṭaka*. In the *Patisambidhā Magga Prakarana* in the *Tiṭṭaka*, it is explained as,

“*uppāda vayattena anicca*”,

which means “(this world is) *anicca* because we just keep going through the birth (arising)/ death (destruction) process.”

- Of course, in between birth and death there is mostly suffering (in the realms at and below the human realm, where most beings spend time). This is the *dukkha* characteristic.
2. This is what we have been doing for an unimaginably long time (beginning-less), there is no break from it until one attains *Nibbāna*.
- We see some people committing suicide hoping to end it all; but ending this life does not solve the “problem.” In fact, it may lead to a birth in a lower realm, which will only increase the suffering.
 - Thus continuing this ceaseless birth/death process is *anatta*, i.e., it is fruitless, burdened with suffering, and thus one is truly helpless.
3. We can see the Three Characteristics (*Tilakkhaṇa*) of this world by carefully examining the fate of anything that arises in this world, which goes by the name *saṅkhata* (*sankata* in Sinhala).
- Whether it is a living being or an inert thing any *saṅkhata* (*sankata* in Sinhala) arises, lasts for a certain time, and then perishes.
 - For an inert object, the process stops at the destruction step, and it does not feel anything as it goes through the process.
 - But for a living being, there is (mostly) suffering during arising/living/death, even though there may be spurts of “happiness” if one is fortunate enough to be born in human realms or the realms above it.
 - And the process does not stop at death unlike for an inert object. It just keep repeating.

The arising/destruction of a *saṅkhata* (*sankata* in Sinhala) is described in, “[Root Cause of Anicca – Five Stages of a Saṅkhata \(Sankata in Sinhala\)](#),” and in “[Nirodha and Vaya – Two Different Concepts](#).”

4. A living being’s suffering is also enhanced by the “*saṅkhata* (*sankata* in Sinhala) characteristics of inert objects” too. We work hard to acquire “things” but either they get run down/destroyed (houses, cars, furniture,...) or we die leaving them behind. Then if we are lucky to be born human in the next birth we just start this “accumulation process” and get distraught at death again. ...

- If we think through logically (and this is real meditation), we should be able to grasp this main concept of *anicca, dukkha, anatta*.
 - Through the ages, philosophers (as well as most people) have wondered, “What is the meaning of life?.” And they normally think about just this present life; see, “[Why Does the World Exist?](#)” by Jim Holt“
5. Someone who has accomplished something significant may think otherwise at the moment of that accomplishment. But it lasts only a short time; at death, it is all gone. If he/she wanted to accomplish something significant in the next life (provided one is lucky to be reborn human), then one has to start all over.
- This point becomes poignantly clear, if one takes a little time and think about the life of any famous personality (emperors, kings, politicians, movie stars,... from times past to the present). Most of them are bound to be born in lower realms because of the heinous acts they did to get some of those positions.
 - If one knows the “big picture” about the wider world and the beginning-less journey we have made, it becomes clear that all through uncountable number of lives we have struggled in vain “seeking an elusive happiness.” There is no meaning to life in the long run, AND it makes one suffer, and this is the nature of this world: *anicca, dukkha, anatta*.

6. If there is a birth, there MUST be a death. There is no exception, other than *Nibbāna*.

This is the “*akālika*” or “timeless” quality of *Nibbāna*.

- All *saṅkhata* (*sankata* in Sinhala) operate on the basis of *kamma vipāka*, which normally take time to bring their fruits. This is why people are unable to “see” the working of *kamma*. There may be drug dealers who live like kings, but they will be paying with interest in the future.
- *Nibbāna* brings fruits instantaneously, there is no time gap involved (it is “*akalika*”), unlike a *saṅkhata* (*sankata* in Sinhala). Furthermore, once attained there is no time duration after which it is destroyed; it is forever.
- The *magga phala* (*Sotāpanna*, *Sakadāgāmī*, *Anāgāmī*, *Arahant*) are attained in one *citta* (lasting less than a billionth of a second). And since they were attained via ELIMINATION OF CAUSES, there is no destruction associated with them. i.e., they are forever.
- In comparison, a living being arises DUE TO CAUSES, and when the underlying cause or the fuel is spent, the living being dies. But the process does not stop, because the being had acquired NEW CAUSES (new *kamma*) during that life or in the previous lives.

7. In the *Dhamma Vandana*:

“*Svākkhato Bhagavatā Dhammo Sandiṭṭhiko Akāliko Ehi-passiko Opanāyiko Paccattam veditabbo vinnuhitī*”,

the quality of *Dhamma* that is described by “*akālika*” is that it leads to effects that do not depend on time.

- And that is achieved via the quality listed before that: “*sandiṭṭhiko*” (“*san*” + “*diṭṭhiko*”). *Dhamma* explains and clarifies “*san*” that are the causes (*avijjā* and *taṇhā*) for arising of *saṅkhata* (*sankata* in Sinhala) (whether they are living or inert); see, “[What is “San”? Meaning of Sansāra \(or Samsāra\).](#)”
- “*Bhagavatā Dhammo*” can be taken as “*Buddha’s Dhamma*,” but it has a deeper meaning too (This *Dhamma* was only DISCOVERED by the *Buddha Gotama*, as had countless other Buddhas before him. “*Bhagavatā*” (“*bhaga*” + “*vata*” where “*bhaga*” means divide and “*vata*” means “the process” that looks like a “living being”) means this *Dhamma*, by analyzing a “person” in terms of “actions”, illustrates that there is no enduring entity in a “living being.”
- And this process leads to “*svakkhata*” (“*sva*” for “self” and “+ “*akkata*” or “*akrutha*” or “*akriya*” means putting out of action) meaning it leads to getting rid of the concept of a “me” (*asmai māna*) — which happens at the *Arahant* stage. It is not about whether a “self” exists or not; it is rather to realize that nothing in this world is worth to be considered “mine.”

8. Some people erroneously interpret “*uppāda vayattena anicca*” as “things are IMPERMANENT because EVERYTHING is formed and destroyed within 17 thought moments.”

- This serious misconception is discussed in the post, “[Does any Object \(Rūpa\) Last only 17 Thought Moments?](#).”
- Each *saṅkhata* (*sankata* in Sinhala) that arises has its own lifetime: a fly lives only for a few days, a human lives for about 100 years.

Next, “[Anicca – Worthlessness of Worldly Things](#)”,

3.3.3.3 **Anicca – Worthlessness of Worldly Things**

August 20, 2017; revised June 8, 2020

Different Meanings of *Anicca*

1. *Anicca* (pronounced “*anichcha*”) is a profound concept that has several meanings (impermanence is only a small part of it). We discussed one interpretation as “it is not possible to maintain anything in this world to one’s satisfaction”; see, “[Anicca – Inability to Keep What We Like.](#)”

- Another interpretation is the following. Whatever that seems to provide lasting happiness arises and destroyed. Anything is subjected to unpredictable changes (*vipariṇāma*) while it lasts. See, “[Anicca – Repeated Arising/Destruction.](#)”
- Here we discuss another: There is nothing in this world that is valuable and can provide lasting happiness. Not only that, but more craving can only lead to more suffering!

We Like to Get Hold of Things That We Like (Crave)

2. The desire (*iccā* or *icchā*; pronounced “*ichchā*”) for any object depends on the value that one places for that object. If one realizes that the object does not have any significant value, then one would not have any desire for that object.

- One has *iccā* for a given object which one perceives it to be of “*nicca*” (pronounced “*nichcha*”) nature, i.e., that one thinks has value and can provide happiness.
- If one realizes that a given object does not have a real value, one loses craving for that. The *anicca* nature means NOTHING in this world has real value. Of course, full comprehension comes only at the *Arahant* stage. The starting point is to see that immoral actions MUST BE avoided regarding even “seemingly high-value things.”

The Perception of “Value” Depends on One’s Level of Understanding

3. Suppose you give the following choices for a five-year-old. A giant chocolate bar or the title to a brand new house (written to his/her name so that the child will be the owner of the house).

- What will the child choose? Of course, the child will want chocolate, and he/she will have no idea how a piece of paper can be more valuable than tasty chocolate! Thus the child has the perception of *nicca* for the chocolate, i.e., that it can bring happiness whereas the happiness from the house is hard to be grasped by the child.
- However, when that same child grows up and becomes an adult, he/she will choose the title to the house without hesitation. By that time, he/she would have realized that a house is much more valuable than a bar of chocolate. The adult will recognize the “*anicca* nature” of the chocolate: it can only bring happiness only for a few minutes!
- Did anyone have to explicitly tell that adult that the title to the house is much more worth than chocolate? No. One would realize that when one learns more about the world.
- Just the same way, when one learns Dhamma, one will AUTOMATICALLY realize that nothing in this world has real value. But that realization comes gradually.

The Tendency to Do Immoral Deeds Based on Cravings

4. All immoral deeds (*dasa akusala*) are done because of the “value” that one places on worldly things. A child may hit another over that chocolate. An adult may be willing to lie, steal, or even kill to get possession of a house.

- When that adult grasps the critical message of the Buddha, he/she will realize the “*anicca* nature” of the house too. That even craving for a house is not worth compared to the “cooling down” one can gain by getting rid of the **cravings** associated with the house. Of course, one does not need to get rid of the house.

- He/she would realize that collecting “valuables” like houses, cars, etc. or making a lot of money (**much more than one needs**) can bring only suffering at the end (and lose precious time one could have spent on learning Dhamma and making progress towards *Nibbāna*).

Adverse Consequences of Cravings

5. Craving for sense objects can have adverse consequences in a wide range. At a lower level, just enjoying sense pleasures without harming others will make one bound to the *kāma loka* (via “*paṭi icca sama uppāda*” or “what one likes is what one gets”); see, “[Paticca Samuppāda – “Paṭi+ichcha” + “Sama+uppāda.”](#)”

- However, if one does immoral deeds (*dasa akusala*) to get such “valuables,” then one will be subjected to *dukkha dukkha* (direct suffering) in the *apāyā* in future lives; see, “[Introduction -2 – The Three Characteristics of Nature](#)“. That is the worst kind of future suffering, and one would not be able to comprehend that if one does not believe in rebirth or that *kammā vipāka*, i.e., if one has *micchā diṭṭhi*.
- Once one gets rid of *micchā diṭṭhi*, it will be easier to see one aspect of the *anicca* nature. That is “***aniccam* *khayaṭṭhena*,**” which means “***anicca* nature leads to one to the downside,**” i.e., to do immoral acts and to end up experiencing unimaginable suffering (*dukkha dukkha*) in the *apāyā*.
- Thus ***anicca* nature not only means that one cannot maintain things to one’s satisfaction in the long run but ALSO, it can lead to much suffering in the future.**

The Understanding Leads to the *Sotāpanna* Stage

6. One can get to the *Sotāpanna* stage by comprehending the above harsh consequences of *anicca* nature.

- Buddha also said, “*dukkham bhayaṭṭhena*” or “one should be fearful of the *dukkha* nature” when describing the characteristic of *dukkha*. At the *Sotāpanna* stage, one can see that not comprehending the *anicca* nature can lead to suffering in the *apāyā*. But he/she may still not realize that **much suffering (even though less than in the *apāyā*) can also arise due to just being attached to sense pleasures, i.e., *kāma rāga*.**
- The full impact of “*dukkham bhayaṭṭhena*” is realized only at the *Anāgāmi* stage (having seen a glimpse of it at the *Sakadāgāmi* stage). **That is when one realizes the *dukkha* associated with just the craving for sensual pleasures.**
- Craving for sense-pleasures lead to *saṅkhāra dukkha* and *vipariṇāma dukkha*, as explained in detail in the post, “[Introduction – What is Suffering?](#)“.

7. At the *Sotāpanna* stage, one comprehends the “*anicca* nature” at a preliminary level and grasps the *dukkha dukkha*. Even though one can see the truth of the other two types of *dukkha* (*saṅkhāra dukkha* and *vipariṇāma dukkha*), one does not “truly grasp their effects.” Those two aspects of *dukkha* are present in the higher realms of *kāma loka* (human and *deva* realms).

- One truly starts comprehending *saṅkhāra dukkha* and *vipariṇāma dukkha* at the *Sakadāgāmi* stage, and it will be completed only at the *Anāgāmi* stage. That leads to further strengthening of “*dukkham bhayaṭṭhena*.” One can see the danger in the types of ***dukkha* arising from attachment to sense pleasures (even without engaging in immoral acts).**
- Comprehending the bad consequences of sensual pleasures is much harder than seeing the dangers associated with immoral deeds. That is why a *Sotāpanna* is still “not free” from rebirths in *kāma loka*.

Cravings for Sense Desires Lost Only at the *Anāgāmi* Stage

8. By the time one gets to *Anāgāmi* stage, one would have removed the lower five types of bonds (*orambhagiya saṃyojana*) that bind one to the realms in the *kāma loka*; see, “[Dasa Saṃyojana – Bonds in Rebirth Process.](#)”

- There are five higher *saṃyojana* associated with higher *rūpa* and *arūpa* realms. First one removes *rūpa rāga* (attachment to *rūpa jhāna*) and then *arūpa rāga* (attachment to *arūpa jhāna*).
- The *rūpa* and *arūpa* realms (highest 20 realms) mostly have *rūpa* and *arūpa jhānic* pleasures. In those realms, *dukkha dukkha* and *saṅkhāra dukkha* are mostly absent, and only the *vipariṇāma dukkha* (death at the end) is present. **One lives with *jhānic* pleasure until the end when one becomes helpless and could end up even in the *apāyā*.**

9. In comprehending the Three Characteristics of nature, the critical step is in realizing that collecting “valuables” (houses, money, etc.) as an adult is as foolish as collecting candy wrappers as a child.

- To make that step of “higher wisdom” per Buddha Dhamma, one needs first to understand the “world view of the Buddha,” that the world is of *anicca* nature, i.e., **CRAVING for those “valuables” only lead to suffering in the long run.** “Long-run” involves not only this life but future lives.
- That is why belief in rebirth is an important requirement to even start on the mundane Path.

The World is of *Anicca* Nature, Not *Nicca* Nature

10. It is an illusion to believe that ANY object in this world will have the “*nicca*” nature. **That there are things in this world that have real, lasting value. The reality is the opposite expressed by the word “*anicca*.”** One meaning of “*anicca*” is that there is nothing in this world of value that can bring lasting happiness.

- **However, it is challenging for one to comprehend this “*anicca* nature” unless one believes in the laws of *kammā*. That one’s actions will have consequences. A natural extension of the laws of *kammā* is the validity of the rebirth process.**
- Many actions committed in this life do not bring their results in this life. But they will appear in future lives. Therefore, the laws of *kammā* necessarily REQUIRE the rebirth process.
- One has more “*iccā*” (or more attachment) for an object that one perceives to be of high value. Then one would have the perception of “*nicca*” nature for that object. He/she thinks that it can provide happiness.
- **But the reality is that either that object loses its value OR one dies, making any perceived value zero at the end. One of those two outcomes is inevitable.**

It is Impossible to Comprehend *Anicca* Nature Without Belief in Rebirth Process

11. If one does not believe in the rebirth process, then one could be compelled to do immoral deeds to get possession of valuable objects. That is a hidden defilement (*anusaya*) that may not manifest unless the temptation is high.

- For example, one may not steal anything for a lifetime but could be tempted to take a bribe of a million dollars.
- Or, a drug addict could say, “I am just going to enjoy inhaling drugs until I die from it,” thinking that there will not be any consequences after the physical body dies.
- However, one’s outlook on such things will dramatically change if one can see the reality of the rebirth process. Most people just believe what “science says” and do not even bother to look at the ever-increasing evidence for the rebirth process. See “[Evidence for Rebirth](#).”
- Science agrees that causes lead to corresponding effects. Any action has a reaction. However, since science does not know much about how the mind works, it is unable to provide answers to issues that involve the mind. ***Kammā* and *kamma vipāka* are causes and corresponding effects.**

Greed Comes from the Perception of *Nicca* Nature

12. *Lobha* (*abhijjhā*) is the greed generated in a mind that puts a “very high value” for an object. One is willing to do immoral acts to get possession.

- One with just *kāma rāga* (desire for sensual pleasures) has the desire to enjoy sensual objects but would not hurt others to get them. Most “moral people” belong to this category UNLESS the temptation becomes high. A *Sotāpanna* has *kāma rāga* but will not succumb to ANY temptation to do *apāyagāmi* deeds.
- A *Sakadāgāmi* has lost the desire to “own” such sensual objects but still likes to enjoy them.
- Any desire for sensual pleasures goes away at the *Anāgāmi* stage.

13. In other words, one starts losing the value that one places for “mind-pleasing” objects as one progresses to higher stages of *Nibbāna*.

- But the critical point to understand is that one LOSES such desires AUTOMATICALLY. One does not need to, and one CANNOT, lose such desires by sheer will power. One needs to “see” the dangers of such cravings by developing the “*dhamma eye*,” or *paññā* (wisdom) by learning and contemplating on the *Tilakkhaṇa*.
- Even if one forcefully keeps such desires SUPPRESSED, such desires will just stay dormant (remain as *anusaya*.) Those *anusaya* WILL resurface later in this life or future lives. They can only be removed by comprehending *Tilakkhaṇa*. See, “[Āsava, Anusaya, and Gati \(Gathi\)](#).”
- With gradual cleansing of the mind, one will start seeing the worthlessness of worldly things.

Also, see, “[Anicca, Dukkha, Anatta – According to Some Key Suttā](#).”

3.3.3.4 Anicca – The Incessant Distress (“Pīḷana”)

Revised July 14, 2018; June 15, 2019; re-written with the new title June 1, 2020
[Old Title: The Incessant Distress (“Pīḷana”) – Key to Dukkha Sacca]

Key Verse in The *Girimānanda Sutta*

1. In the “[WebLink: suttacentral: Girimānanda Sutta \(AN 10.60\)](#)“, the Buddha stated key features of the *anicca* nature of “all *saṅkhāra*”: “*Katamā cānanda, sabbasaṅkhāresu anicchāsaññā? Idhānanda, bhikkhu sabbasaṅkhāresu aṭṭiyati harāyati jigucchati. Ayaṃ vuccatānanda, sabbasaṅkhāresu anicchāsaññā*”.

Translated: “Ānanda, what is the *anicca saññā* associated with all *saṅkhāra*? One is **subjected to stress, one should be ashamed of engaging in such useless activity, and liking *saṅkhāra* is like embracing urine and feces**. That is the *anicca saññā* associated with all *saṅkhāra*”.

- We will briefly discuss the “*aṭṭiyati*” nature. “*Atti*” means “bones” (අෆ්ට්ට in Sinhala). A dog thinks that a bone is precious. It spends hours and hours chewing it and becomes tired in the end. Sometimes, the bone would scrape the gum, and the dog would taste its own blood thinking that the taste it from the bone.
- In the same way, we only get tired and stressed out (*pīḷana*) by generating all types of *saṅkhāra*. However, we do not realize that while making that effort. That is why *saṅkhāra dukkha* remains hidden.
- We engage in *mano, vacī*, and *kāya saṅkhāra*; see, “[Saṅkhāra – What It Really Means](#).”

The Mental Suffering (*Pīḷana*)

2. Most people think that the first Noble Truth on suffering is the physical suffering itself, i.e., they associate it with *dukkha vedanā*, which is part of the *vedanā cetasika*. However, the Buddha said, “This *Dhamma* is unlike anything that the world has ever seen.” **The real truth about suffering is the following. It is the**

suffering hidden in what everyone perceives to be happiness. That needs to be seen with the *paññā* (wisdom) *cetasika*.

- It is difficult to understand the first Noble Truth on suffering for someone who is feeling too much suffering. When someone is hurting with an ailment or when someone's mind is too weak at old age, it is not possible to contemplate the profound message of the Buddha, as we will see below.

3. *Dukkha sacca* (pronounced, “sachcha”) is the Truth of Suffering; *sacca* is truth.

- “*Pīlana*” (pronounced as “peelana”) is the Pāli word for distress or hardship. That is part of the suffering we undergo, even without realizing it.
- “*Peleema*” is the Sinhala word for distress, or hardship, where the first part “pe” rhymes like “pen.”
- The spelling of Pāli words is according to an adopted convention that is different from “standard English.” See, “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)” and “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 2](#).”

That is the kind of meditation (contemplation) one needs to do initially, even before starting on the *Ariya Ānāpānasati bhāvanā*. I cannot emphasize enough the importance in understanding the real message of the Buddha first.

Incessant Distress/Depression (*Pīlana*)

4. Even though we do not realize it, we are stressed out ALL THE TIME. Constant work is necessary to keep our physical body in good condition. Anyone who has had temporary relief from this constant **distress** (*pīlana*) via a good meditation program knows this; it is called *nirāmisā sukha*. It is even more apparent if one can have a *jhānic* experience. Only when one gets into a *jhānic* state that one realizes that one had been under incessant stress all life.

- We do not realize this because this is the “baseline” for existence (our “comfort zone”); this is what we have done over innumerable rebirths.
- To get some relief from this constant distress, we strive to bring about periods of happiness. We keep thinking of ways to get a better house, car, or zillions of other “things” that are supposed to provide us with joy. Thus, we are ALWAYS stressing out to adjust this “baseline comfort zone.” We move to a bigger house, buy a set of new furniture, work harder to get a better job, etc.
- Furthermore, when we go a little bit below the current “comfort level,” we need to do work (*saṅkhāra*) to remedy that. For example, when we get hungry, we may have to prepare a meal or walk/drive to a restaurant to get a snack.
- Or, we may be sitting at home, satisfied after a meal, but then all of a sudden, we again go “below the comfort level” for no apparent reason; we just become “bored” sitting at home and think about going to a movie. So, we get in the car drive to a movie theater.
- I am sure you can think about zillion other things we do all day long.

Dukkha Dukkha – Doubling the Suffering

5. We have to endure injuries and various forms of sicknesses because of the physical body that we have. That physical body had origins in past *kamma*. Then, based on such physical ailments, we also suffer mentally.

- Such “distresses” belong to one type of *dukkha*. That is ***dukkha dukkha***. Thus, on top of physical suffering, we double that suffering by such “mental suffering. That mental suffering is part of “*samphassa-jā-vedanā*.” See, “[“Vedanā \(Feelings\) Arise in Two Ways](#).”

- In addition to direct ailments, we have other forms of suffering associated with the physical body. We get hungry, thirsty, lonely, bored, etc. etc. Thus, we need to attend to the needs of our physical bodies continually. It is like taking care of an invalid. These are all part of *dukkha dukkha*.

Saṅkhāra Dukkha

6. Our senses continually ask for **enjoyment**. We want to see beautiful things, hear pleasurable sounds, smell sweet fragrances, taste sumptuous foods. The body wants luxurious touches, and the mind likes to think about pleasant thoughts.

- Then we have to do things (via *saṅkhāra*) to satisfy these “urges”. **That is the second type of *dukkha*: *saṅkhāra dukkha*.**
- In addition to doing work going to a restaurant, traveling to a cinema, etc., we also need to do a job to make money for all those activities. Constant work (*saṅkhāra*) is required to keep us afloat.
- Most times, we get one urge on top another: we may want to eat and drink, we may want to watch a movie, but also may want company (gather friends).
- **We do not realize this suffering because our minds are focused on the result, the pleasure we MIGHT get after doing all that work.** That “made-up mental pleasure” is another part of “*samphassa-ja-vedanā*” mentioned above.
- You may be thinking, “What is he talking about? Isn’t this what life is supposed to be?”. Exactly! We do not even realize this because this is our “baseline” of existence. We have done this over and over extending to beginning-less time, and we PERCEIVE this to be “normal.”

Dukkha Dukkha and Saṅkhāra Dukkha Go Together

7. What we perceive as happiness comes from the relief we get when the distress level decreases due to our efforts. All we do is to suppress the constant “imbalances.” Let us consider an example.

- We naturally get hungry and thirsty, which are two main “*pīlana*” that we cannot avoid as long as we have this physical body.
- However, when we eat and drink, that leads to a sense of happiness. But we never think that this “happiness” actually arose due to inevitable distress.
- If we cannot find water when we get thirsty, that will lead to real suffering. At that point, a glass of water will taste heavenly. However, after drinking a glass or two, we will not be able to enjoy drinking any more water.
- That “happiness” actually arose when getting rid of the *pīlana* due to thirst.

8. The reality is that no matter what we do to please the senses, those delightful moments are limited. They do not arise without “*pīlana*” or inherent distress associated with the body. Even if we can maintain that sense input for long times, we become tired after a while. Then the mind asks for a different kind of experience. Let us look at some examples.

- When we are in a warm climate, we are thrilled to be in an air-conditioned room. But we would not like to be in an air-conditioned room in the middle of winter in Alaska, where we would like the place to be warmed up. “Happiness” is not associated with cold or hot air. We will feel happy when we remove “*pīlana*” or the discomfort/distress for the body by cooling or warming the environment.
- We can be lying in the most comfortable bed, but sooner or later, we start shifting and rolling, trying to find a better posture, and eventually cannot stay in bed anymore.
- The most beautiful scenery can be watched only for so long and would get bored. The joy of sex is gone once satisfied, and that urge will not arise until at a later time again.

Vipariṇāma Dukkha

9. **Then there is a third type of suffering called *vipariṇāma dukkha*.** That is also associated with the body but is due to “unexpected changes” and eventual death. That is called “*vipariṇāma*” *dukkha*.
- For example, an accident can cause injury. We may come down with a major illness like cancer anytime.
 - Death cannot be avoided in ANY realm and is “built-in” suffering. That WILL NOT be stopped until *Parinibbāna*.
 - **All three types of suffering are associated with *anicca* nature.**

The Three Types of Suffering

10. In summary, out of the three types of suffering, we notice (and worry about) only the *vipariṇāma dukkha*.

- One may not even notice the other two types of suffering (*dukkha dukkha* and *saṅkhāra dukkha*). They are masked by our perceived “happiness”. Especially those of us who are born with a reasonable level of wealth can overcome both easily.
- Most of us get to eat before we become starving, and it becomes a “suffering”. Furthermore, we don’t need to go hunting and kill an animal to eat; we can go to a restaurant and have a nice meal.
- Therefore, those two types of sufferings are hidden from us. But we know that many feel such pain.

11. **The worse part is that in the lowest four realms, beings become truly helpless. There is little one can do (*saṅkhāra*) to make amends for the incessant *dukkha dukkha* in those realms.**

- For example, a wild animal has very few choices when it gets hungry. It will go hungry for days with much suffering.
- In the wild, you do not see any old, sick animals. When they become weak, they are eaten by bigger, stronger animals. That is the true meaning of *anatta*. There is absolute helplessness, especially in those lower realms.

Suffering Is Present in All Realms

12. There is nowhere in the 31 realms where *dukkha* is absent. The three types of *dukkha* are present in the 31 realms in varying degrees:

- In the lowest realm, the *niraya*, *dukkha dukkha* is predominant; there is only suffering, and no way to get relief by doing *saṅkhāra*. Even in the animal realm, there is relatively little *saṅkhāra dukkha*; they just suffer directly, as pointed out above.
- In the higher realms (above the human realm), there is very little *dukkha dukkha* because those are “good births” that originated due to meritorious *kamma*. In these higher realms, it is the *vipariṇāma dukkha* that ends the life there. Also, any *Brahma* has not overcome suffering in the lowest four realms in the future, unless they have attained *magga phala*.
- It is in the human realm that all three types of *dukkha* are present at significant levels. The *saṅkhāra dukkha* is highest in the human realm compared to all the realms.

13. What we discussed is the First Noble Truth, *Dukkha Sacca*. There is hidden *dukkha*, even in bouts of apparent happiness. There is no place within the 31 realms where *dukkha* can be overcome.

3.3.3.5 How to Cultivate the Anicca Saññā

Revised November 26, 2017

1. Many people tell me, “I think I understand what *anicca* means. But then what?.”
 - That statement itself says that person has not yet understood *anicca* at least to some extent. I am not saying this in a derogatory manner. Even a *Sotāpanna* is supposed to have comprehended *anicca* only to a certain extent. Thus if one gets at least a glimpse of what is meant by *anicca*, that goes a long way. And that is not hard, if one can just contemplate on it.
 - Reading and learning about *anicca* and experiencing *anicca saññā* are two different things. First, it is a good idea to figure out what *saññā* is; see, “[Saññā – What It Really Means.](#)”
 - **One really needs to contemplate on the *anicca* nature with real examples from one’s own life to get that *anicca saññā* to sink in one’s mind.**
2. It is true that a Buddha is needed to first point out the basic truth about this world, i.e., “**that we cannot maintain anything in this world to our satisfaction.**” But once told, it is not difficult to see the truth of it by just critically evaluating that statement.
 - If one CAN maintain ANYTHING to one’s satisfaction, that HAS TO BE one’s own body and mind: “This is my body and these are my thoughts.” Therefore, one should start by contemplating on one’s own body and mind.
3. Close your eyes and try to fix your mind on something, your wife, husband, friend, house, anything at all. Can you keep your thoughts on that one subject for any significant time?
 - It is not possible to do that. Our minds like to wander off, seeking “more enticing thought objects.” You will notice that it is even harder when one’s mind is excited, for example, when one has seen an attractive object or when one has done something strenuous and one is breathing hard (in the first case, *kamachanda nivarana* is strong and in the second case *uddhacca nivarana* or the “excitability” is high).
 - Thus when one’s mind is calm it is a bit easier to keep the mind on something, but still not for too long.
4. It is important to verify for oneself about these examples. Buddha Dhamma is to be experienced, not just to read about.
 - One can cultivate wisdom only by “verifying for oneself that what the Buddha said is indeed true.” Blind faith will not get anyone close to the truth. **Thus true meditation is to learn the true and pure Dhamma and critically evaluate it based on one’s own experiences.**
5. Once we confirm that indeed one is unable to even keep one’s own mind to the way one wants, the next step is to think about whether one can maintain one’s own body the way one likes.
 - It is quite obvious that we cannot change our basic body features like height, the color of the skin or the hair, etc. Furthermore, if one is born blind or without a limb, there is nothing much one can do about that either. Thus to a major extent, we just have to live with the body that we were born with.
6. Next, consider the body that we have at the present time, and see whether we will be able to maintain it like that, if we like that appearance.
 - Of course we can do that for a while, especially if one is young. But it is inevitable that there comes a time when one will not be able to do that. One can verify that by looking at one’s own parents and grandparents: look at their old pictures and see how young and vibrant they were back when they were at your age.
 - Therefore, we need to contemplate on the fact that we cannot even maintain things that we consider as “our own” to our satisfaction in the long run. This is to help cultivate the “*anicca saññā*” to a large extent.
7. Contrary to those who believe that thinking along these lines is “depressing”, it can be actually liberating to realize the truth. It is those who just keep on trying to “patching up one’s losing body assets” by artificial

means end up “highly depressed” at the end, and then even commit suicide. It is better to have thought about “inevitable of life” ahead of the time.

- If one contemplates deep enough, one realizes that no matter how much money one can throw at such problems, in the end one will become helpless. Just think about any of the old movie stars, beauty queens, bodybuilders, politicians, kings, emperors, etc and see how they died helplessly at the end.
- Each person dies helplessly at old age or die unexpectedly of an accident or a major illness. There is nothing that can be called “graceful death.” It may seem to outsiders that “one is aging gracefully”, but that person knows how hard it is, even if at normal health. One simply cannot do things the way once one did them and one cannot enjoy any sense pleasure at the same level. All our sense faculties degrade with time.

8. This was the basic message of the Buddha, and it is not something he made up. **He just revealed that truth about the nature of this world**, of which any normal person would not think about on himself/herself. We are too busy enjoying sense pleasures (or trying to get possession of enjoyable objects), even to take time to think about it.

- **The Buddha also showed that unless we do something about it, this is what we will be doing forever in the future. We will be reborn and will go through the same cycle over and over.** It is actually much worse, since most births in this cycle of rebirths is in the lower four realms where the hardships and sufferings are much higher.
- More importantly, he revealed a way to get rid of this cycle of births wrought with suffering.

9. **The Buddha explained that the reason that we keep coming back to this world is the fact that we don't realize “this unsatisfactory nature.”** No matter how much suffering we go through, we always think we can overcome them (and sometimes we do, but at the end we all die). We have the wrong perception that somehow we can “beat the system”, i.e., **attain happiness and MAINTAIN that happiness.** We have the incorrect “*nicca saññā*.”

- He said as long as we have this “*nicca saññā*” we can never escape future suffering. The solution is embedded in that first truth about suffering (*Dukkha Sacca*, the suffering that can be eliminated): What we need to do is to fully realize the “*anicca* nature” of this world, that “**we cannot maintain anything to our satisfaction in the long run.**”
- **The fact that most people do not realize is that the mere change of perception can lift a heavy load that one has been carrying.** This is the basis of “*nirāmisā sukha*.”
- That does not mean one will give up trying to give up everything and go to a forest; see, “[If Everything is Anicca Should We Just give up Everything?](#).”

10. When we have this wrong “*nicca saññā*,” we willingly embrace this world, and that is “*paṭicca*” (“*pati*” + “*icca*,” where “*pati*” is bind and “*icca*” means willingly). When that happens, “*sama uppada*” (where “*sama*” is similar and “*uppada*” means birth) follows inevitably; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda”.](#)”

- Thus, we will be born in whatever the type of existence that we craved for.
- But that does not mean if we crave for a human rebirth we will get that. Rather the birth is according to “*gathi*,” the key aspects of one's mindset. If one is excessively greedy, one may be born in the realm of “hungry ghosts”; if one is excessively angry or hateful, one will be born where that mindset prevails, i.e. in the *niraya* (hell).
- To put it another way, when one has the wrong “*nicca saññā*” one tends to do immoral things to get what one perceives to provide sense pleasures. Then those *kamma vipāka* will lead to worse existences in the future both in this life and more importantly in future lives.

11. As one cultivates the “*anicca saññā*,” one begins to stay away from the ten immoral actions more and more due to clear comprehension **that such actions are unfruitful.**

- What is the point of stealing money at the expense of others and acquiring a “good lifestyle” that will last only 100 years at most? And one will have to pay that with interest?
- What is the point of verbally abusing someone for a momentary satisfaction, if that will only hurt oneself at the end (even just by leaving oneself agitated, let alone those *kamma vipāka* that will come down later)? If one can stop with effort such an incident, then one can look back and see the “cooling down” that resulted from that effort. This is what “*ānāpāna*” or “*satipaṭṭhāna*” is all about.
- Even if someone physically hurt you, what is the point in hitting back? Will you feel PHYSICALLY better by hurting that person? Will your bodily pain go away? By the way, that also did not happen without a cause; it was a result of a bad *kamma* done sometime back (a *kamma vipāka*).
- By the way, *kamma vipāka* are not guaranteed. One can avoid many *kamma vipāka* by not allowing conditions for them to take place; see, “[What is Kamma? – Is Everything Determined by Kamma?](#).” Thus when one lives life with “*sati*,” many such *kamma vipāka* can be avoided.

12. It may take some contemplation to sort these out, but one always has to look at the broader picture. Ignorance is not being aware of the “whole picture.” We tend to act impulsively with what is discerned at that moment. But that tendency will diminish when one cultivates the “*anicca saññā*.”

- Acting with “*sati*” or “being mindful” is being mindful of the “*anicca* nature of this world.” This is the basis of both “*ānāpāna*” and “*satipaṭṭhāna*.”
- *Nibbāna* or “cooling down” can be experienced in this very life by cultivating the “*anicca saññā*” and thus be motivated to strive harder; see, “[Living Dhamma](#).”

Next, “[How to Cultivate the Anicca Saññā – II](#)”,.....

3.3.3.6 How to Cultivate the Anicca Saññā – II

Revised November 26, 2017

1. *Saññā* is normally translated as “perception”, but it has a much deeper meaning; see, “[Saññā – What It Really Means](#)” and the first part of the current post, “[How to Cultivate Anicca Sanna](#).” *Anicca saññā* has many different aspects, and in this and the next post we will discuss some of these deeper aspects.

- When reading about it, it may make sense that *anicca* means, “that we cannot maintain anything to our satisfaction.” And from the examples given, one can see that truth of that statement. **But that is just the start.** One just has just been informed of what *anicca* is. **Now one has to “see it with wisdom”**, in order to get to the *Sotāpanna* stage. This is what is called “*dassanena pahathabba*” or “start seeing things as they are.”
- One needs to develop the “*anicca saññā*”; the mind needs to grasp the essence or the correct perception of what *anicca* implies. Book knowledge is one thing, and “grasping it with the mind” is much more deeper.
- In the previous post we determined that it is not possible to keep to our satisfaction what we think of as ours, our bodies and our thoughts; see, “[How to Cultivate the Anicca Saññā](#).”

2. When contemplating on external objects, there are many “levels of *saññā*”: the more one KNOWS about a given object, one tends to cultivate a “better *saññā*” about it.

- Let us take an example to illustrate this important difference. Suppose a person from a remote region in the Amazon forest, who has never seen an apple, is shown an apple. He would not know what it is. If we give him the apple to hold and teach him the word “apple”, now he knows what an apple is, but only in the sense that if he is shown an apple again, he will say “that is an apple.” But he would still not know how it tastes. He will have to eat some apples to get an idea of its flavor. He may still not know how to identify a “ripened apple” that will taste better, etc. All that comes when he gets to experience apples at various stages of “ripeness” and even different varieties.

- All those different aspects of an apple needs to be experienced in order to really get the *saññā* about an apple. Only then that one can picture an apple, know what it feels like to hold it, how it tastes, etc. At the mention of the word “apple” all that instantly comes to that person’s mind.

3. In another example, if we see someone at work regularly at a distance, we can recognize him as X if we meet him at the market. But we would not know much ABOUT him. However, if we get to associate with him and start doing things together, pretty soon we will know much more about him.

- At that point, when we even catch a glimpse of him, everything about him comes to our mind. If we wanted, we can recall how many kids he has, where he went school, etc.
- Thus “*saññā*” can be at different levels. The more one gets to associate with someone or something, then our “*saññā*” on that person or concept will grow.
- **However, it is possible that our “*saññā*” about person X may not be really correct.** One day, police find video evidence that X is a child molester, and it becomes clear that there is no doubt about it. At that moment, our “*saññā*” or perception about X is altered permanently. We will no longer let him even come close to our children.

4. The Buddha said our “*saññā*” about “this world” — that it can provide happiness — is a “*vipareetha saññā*,” i.e., **it is a distorted or wrong perception.** If one carefully examines the rebirth process in the 31 realms, that wrong perception has provided us with mostly suffering in the long run.

- When we realize the “*anicca* nature” of this world to some extent, our wrong perception will change. That is when one really sees “*Sammā Diṭṭhi*” or “correct vision” about this world. One becomes a *Sotāpanna*.
- Just like a fish does not see the “hidden hook” and that it will undergo unbearable suffering by biting the tasty worm, we normally do not “see” the suffering hidden in the “tasty materialistic things.” **A fish will never be able to figure that out, and as normal human beings we cannot figure it out ON OUR OWN either.** Only a Buddha can figure it out, and a Buddha can TEACH us, and we can figure it out by spending some time contemplating on it.

5. Therefore, one should not be discouraged if one does not even realize “what the big deal is” about *anicca*. Like everything else, understanding comes with repeated application and by thinking about it. If one can see that “it makes sense” to say, “*anicca* describes the inability for us to maintain anything to our satisfaction in the long term” that is a good start. Then one should start checking the validity of that concept at every opportunity in real life.

- Also, *anicca* is not merely, “the inability for us to maintain anything to our satisfaction in the long term.” **There are many other implications that arise because of this characteristic of *anicca*. Another way the Buddha described *anicca* was to use the term “*atteeyathi*”; i.e., “it is like a dog chewing on a meatless bone.”** The dog thinks very highly of the bone, and values its “taste.” But there is not even any real taste in that bone. It is taste that is made up by the mind, but sometimes, its gums start bleeding and it may taste its own blood.
- Various aspects of *anicca* are discussed at: “[Anicca – True Meaning](#).”

6. Just like a dog will spend hours and hours chewing its “highly valued” bone, we also give much value to sense pleasures that are fleeting in nature. We do get brief instances of real pleasure, **but we do not realize the effort and suffering that we go through to get that brief sense of pleasure.** Most of the time, the pleasure is a “pleasure of anticipation.” We trudge through hard work with the mind cheering on showing the “possible pleasures to be had.”

- The Buddha likened this to a cow (in the old days) who drags a heavy cart with eagerness to get to the pile of straw being held in front of it by a pole. It does not realize the futility of its efforts because it is only thinking about the “prize” being held in front of its eyes. It does not even feel the burden of the heavy load, or even if feeling it, just disregards that pain in anticipation of the “reward” that it thinks can be had by “just taking a few more steps.”

- Most of our pleasures are short lived and arise just out of putting down the “fires” or distresses. The water tastes best when we are thirsty. Think about how you felt when you were very thirsty; the first sip of water was heavenly. But as the thirst went down with drinking more water, the “sense of pleasure” went down as well. After at most two glasses, the “feeling of pleasure” turns to a discomfort.

7. Same thing applies in any of the sense pleasures. We are constantly under pressure from the mind to “provide relief to one or another sense faculty”; this is *dukkha dukkha* that we discussed elsewhere. If we have not eaten anything for a while, we get the urge to eat something tasty. If we have not listened to some good music for a while, that urge kicks in. If you think about any sense pleasure, this is true.

- Many people value sex very highly. But how long can one keep that pleasure going? Most of the sexual pleasure is gained by just thinking about it; it is mostly mind-made. One needs to think about this carefully. How much time does one spend “fantasizing” versus “actually having sex”?
- Even if we eat the most delicious food in the whole world, it will not taste good after the stomach gets full. But we keep thinking about that “great experience” of eating that meal many times afterwards. Then we form an urge to do it again.
- This “feeling of unsatisfactoriness” or even feeling of “something is missing” is “*atteeyathi*.” The dog may get tired of chewing the bone and may leave it alone, but after a while the urge comes back and he is at it again.

8. Even if we are fully content and lying on a comfortable couch, we may get a “feeling of unfulfillment”, that something is “missing.” We then get the idea, “to go and watch a movie” or to “drop by a friend’s place to chat.” Then we have to get in the car and drive there. We do not even feel the burden associated with getting dressed and driving because our minds are focused on the pleasure of “watching the movie” or “having a good time with the friend.” And after that session, we have to drive back and if it was a bad movie we might even get a bit depressed.

- This is “*atteeyathi*.” Just like a dog that incessantly is chewing on a dry bone to get a mental satisfaction and eventually gets tired doing it, this is what we have been doing life after life (if born in the human realm). Many people eventually realize this at old age, but then it could be too late to do anything about it.
- As one gets old, the ability to derive pleasure from such activities goes down. If you have friends, relatives, parents, or grandparents who had enjoyed life at younger age, but now are in distressful situations it is easy to see what happened to them over the years. Now they do not have the energy to try to do all those activities and even if they do to some extent, their sense faculties have degraded to the point of not providing much sense pleasures.
- But most people still keep thinking back about the pleasures they had when they were young. This may even prompt them to seek ways to “somehow get those experiences back.” And when that fails depression sets in.

9. As the mind realizes the burdens of the “incessant distress”, and that one has endured all that for no real benefit, it will gladly give up those burdens and the mind will start losing those cravings automatically. This is the key to “giving up unnecessary attachments”; see, “[The Incessant Distress \(“Pilana”\) – Key to Dukkha Sacca.](#)”

- That post discusses how we encounter suffering when *anicca* inevitably leads to unexpected “changes” in things we value; this is *viparinama dukkha*. We encounter more suffering by trying to overcome the effects due to *viparinama dukkha* by doing more *saṅkhāra*, and that is *saṅkhāra dukkha*. And if we do “bad types of *saṅkhāra*” or *apuññabhi saṅkhāra*, they lead to rebirths in realms where direct suffering or *dukkha dukkha* is unbearable. Thus all types of sufferings eventually arise due to *anicca*.

10. Those are key concept to meditate (or contemplate) on. This is real *vipassana bhāvanā*.

- However, it is important to make sure one starts abstaining from at the least the conventional five precepts and possibly the “BIG EIGHT” discussed in the “[2. The Basics in Meditation.](#)” Otherwise, the

mind will not be calm enough to grasp these concepts. The difference between “book knowledge” and “developing *anicca saññā*” will become slowly clear as one proceeds.

- That is why reading, listening, and contemplating on Dhamma concepts is so crucial. This is one component of the *Saptha Bojjanga* (*dhamma vicaya*) and one of the *Satara Iddhipada* (*vīmaṃsā*). **When concepts become clear, one will automatically develop *anicca saññā*.**
- And with time, one will be able to grasp it better. One will “start feeling” things in one’s own body; see, [“11. Magga Phala and Ariya Jhānā via Cultivation of Saptha Bojjanga.”](#)
- This is a process that goes all the way to the *Arahanthood*. It is said that one truly understands *anicca* only at the *Arahant* stage. But our goal here is to at least to get to the *Sotāpanna* stage. And that CAN BE DONE in this very life, as I discussed my own experience in the above post.

11. Finally, if anyone has spent long times — may be years — meditating on “impermanence” without results, it would be worthwhile to spend some time meditating on the “*anicca*” nature. I know by experience that will make a big difference if one does it right.

- I spent 4-5 years contemplating on wrong *anicca*, *dukkha*, and *anatta* (and a few other things like the wrong *ānāpāna sati bhāvanā*). I really believe that the very first *desanā* that exposed me to correct interpretation of *anicca*, *dukkha*, *anatta* changed my progress instantaneously. It was a profound effect.
- It is also important to realize that what ultimately matters is not just a “good feeling” or even getting to *jhānā*, but whether one has removed “*gathi*” suitable to be born in the *apāyā*. Thus one should be able to look back at one’s life and see significant improvements in getting rid of greed, hate, ignorance; see, [“Transition to Noble Eightfold Path.”](#)

3.3.3.7 If Everything is Anicca Should We Just give up Everything?

Revised February 11, 2020

Introduction

1. *Anicca* means “we cannot maintain anything to our satisfaction in the LONG RUN.” The time scale of existence is an important factor when we contemplate the significance and implications of this fundamental characteristic of nature.

- So, the question is, “if nothing can be maintained to our satisfaction, what is the point in spending so much time in learning, getting a decent job, making plans for businesses, etc.?”
- We do need to pursue those short-term goals while keeping the “big picture” in mind. The “big picture” is the non-existence of a future birth without suffering. Since investigating that “big picture” takes time, we need to make sure we have the means to live a comfortable life that leaves time for such contemplation/investigations.

Short-Term Goals Are Necessary to Comprehend the “Big Picture”

2. During life, we do see many instances where we can attain certain things (pass exams, get jobs, initiate successful businesses, have a comfortable life, etc.) and be happy about such achievements. Of course, there are many times we encounter unexpected things too (coming down with health problems, traffic accidents, floods, hurricanes, loss of jobs, etc.).

- That is the nature of existence as a human. It is a mixed bag, at least until we get to the old age; then it becomes increasingly difficult to maintain things (especially our bodies) to our satisfaction, and of course, at death, we have to leave everything behind whether we like it or not.

- In the realms above the human, in fact, life is even more predictable and enjoyable, that is of course until death comes calling.
- But the real problems encountered in the four realms below the human realm. It is increasingly difficult to “maintain things to one’s satisfaction” in lower realms. Animals are truly helpless, especially the vast majority that lives in the wild. There are no “old animals” in the wild; they either get sick and die or even worse: they get eaten up as soon as they slow down a bit.
- There is no happiness at all in the lowest realm, the *niraya* (“*ni*”+“*ra*” means without ANY happiness).

The “Big Picture”

3. Thus the main reason why “we cannot maintain things to our satisfaction in the LONG RUN” is that all beings spend most of their lives in the lower four realms; see, “[How the Buddha Described the Chance of Rebirth in the Human Realm.](#)”

- It may take time to convince oneself that this “big picture” about the rebirth process is correct. See, “[Evidence for Rebirth.](#)”
- When one truly understands that, one will see the dangers in living an immoral life first. Then one will start getting rid of wrong views. Only then one would be able to “see” the bigger picture clearly. It is a step-by-step process. See, “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)”
- Then one will see that one’s own actions decide one’s future rebirths. See, “[Origin of Life.](#)”
- The above is a very brief summary. It will require a real effort to go through them and the references therein.

Some Implications of the “Big Picture”

4. Then we can examine the question in terms of this “big picture” while keeping in mind the need to attend to “short-term goals.”

- If we do give up everything, we will probably die a miserable death (because we will be poor, unhealthy, etc. because we would not be able to even support ourselves,) and be born most likely in a lower realm. That it will make the situation much worse.
- We do need to contemplate on this situation. If one thinks through this line of thoughts, one can see that one is really helpless in this cycle of rebirths, which is the third characteristic of existence, *anatta*. Until a Buddha comes to this world and shows humans this “big picture”, AND shows how to get out of it, no one is able to escape this trap.
- The only solution is to at least attain the *Sotāpanna* stage of *Nibbāna* in this life. We MAY have some *kammic* energy left for one or more human lives (see, “[Bhava and Jāti – States of Existence and Births Therein](#)”), but this COULD BE the last for a long while, which could be billions of years. Even if we get another human birth, we do not know under what circumstances; it could be somewhere Buddha Dhamma is not readily accessible.

5. There is another point that we need to consider when tackling this issue. We have become indebted to numerous beings in this journey of rebirths, and thus we have debts to pay back. Having all these debts is a hindrance to attain any stage of *Nibbāna*; see, “[Kamma, Debt, and Meditation.](#)”

Short-Term Actions

6. Therefore, instead of abandoning our families (to whom we owe the most), we need to do our utmost to make sure they are well-off. We also need to make sure that we do not become dependent on the society (and thus accumulate more debt). Even in this life, we depend on others for so many things: we are indebted to our teachers, friends, as well to many unknown people who contribute to providing us with essentials to

sustain life; we all are interconnected, and have responsibilities for each other. We have “to do our part” to live in a society.

- Therefore, part of the solution is to first prepare oneself (or one's children if one is a parent) with a good education so that supporting oneself (and a family) is possible. Furthermore, a good education helps with understanding Dhamma too. And if one can make a lot of money (by honest means) then one can do many meritorious deeds too, thereby helping oneself spiritually as well.
- In any case, giving up everything and hiding in a forest will not solve the problem of existence. But there are some who have a *sansāric* tendency to abandon the “householder life.” What I am saying here is for the majority of people, not for everyone: Of course, we need to sustain the *bhikkhus* who spend all their time for the benefit of others as well as themselves.

Coping With Both “Long-Term” and “Short-Term” Concerns

7. Therefore, what needs to be done is to understand the true nature of existence and realize that the ONLY solution is to try the best to attain at least the *Sotāpanna* stage of *Nibbāna*. Then one becomes free of rebirths in the lower four realms forever. This is THE solution to the problem.

In order to do that we need to,

1. Fulfill our obligations to our families, friends, and the society in general,
2. Make our best effort to learn pure Dhamma and attain the *Sotāpanna* stage of *Nibbāna*.

When one does this, one will become happy, not depressed, about the outlook. One has understood the problem and knows what to do about it. And when one starts working on it, one's confidence will grow because one can feel the difference in oneself. One will become even more determined AND energetic, not just to save oneself, but also to help out the others.

3.3.4 Anattā – A Systematic Analysis

December 12, 2018

The Pāli word *anattā* has a mundane meaning and a deeper meaning. The deeper meaning is discussed in a series of posts in a systematic manner.

[Anattā in Anattalakkahana Sutta – No Soul or an Ātma](#)

[Anatta – No Refuge in This World](#)

[Dasa Akusala and Anatta – The Critical Link](#)

[Anatta – the Opposite of Which Atta?](#)

[Anattā \(Mundane Interpretation\) – No “Unchanging Self”](#)

3.3.4.1 Anattā in Anattalakkahana Sutta – No Soul or an Ātma

May 31, 2019

1. *Attā* is a Pāli word with two basic meanings that are very different and depend on the context.

- In the conventional sense, “*attā*” just means “a person” like calling someone “John.” In rural Sri Lanka, to refer to someone, one could say “this *attā*” (මෙහෙයුනි or මෙහෙයුනි) just like we say “this person.”
- The deeper meaning of “*atta*” is “full control” and “with substance.”

- If one is in full control of SOMETHING, that THING can be called his or her *attā*. If something is not under full and complete control that is *anattā*.
- This is related to the key concepts of “*anattā*” and “*anatta*” (one of the three characteristics of Nature or *Tilakkhaṇa*); see, “[Anicca, Dukkha, Anatta](#).” “*Anatta*” is having “no control” and “without substance” or “without essence.”

2. Therefore, we need to be able to determine which “*attā*” is meant based on the *context* where the word is used.

- For example, “**bear**” refers to the large animal in “I saw a **bear**” but in “to **bear** a burden” it has a completely different meaning.
- Let us clarify those two meanings of *attā* directly using the *Tipiṭaka*.

3. The usage of “*attā*” in the mundane sense is clearly seen in the famous *Dhammapada* verse; see, “[Attā Hi Attanō Nāthō](#).” There “*attā*” refers to “any person.” It just says that each person has strive for his/her own salvation (*Nibbāna*). Even the Buddha can only teach the way.

- Another is “*attānaṃ damayanti panditā*,” which means, “a wise person would control/discipline **oneself**.” This is in *Dhammapada* verse 80.

4. The second and deeper meaning of “*attā*” (or actually of opposite of “*attā*” or “*anattā*”) was described by the Buddha in his second discourse delivered after attaining the *Buddhahood*.

The second discourse, “[WebLink: suttacentral: Anattalakkhana Sutta \(SN 22.59\)](#)” starts with the verse: “*Rūpaṃ, bhikkhave, anattā. Rūpaṃca hidam, bhikkhave, attā abhaviṣṣa, nayidaṃ rūpaṃ ābādhāya saṃvatteyya, labbhettha ca rūpe: ‘evaṃ me rūpaṃ hotu, evaṃ me rūpaṃ mā ahoṣī’ti. Yasmā ca kho, bhikkhave, rūpaṃ anattā, tasmā rūpaṃ ābādhāya saṃvattati, na ca labbhati rūpe: ‘evaṃ me rūpaṃ hotu, evaṃ me rūpaṃ mā ahoṣī’ti.*”

- **Translated:** “*Bhikkhus*, form (physical body) is *anattā* (or not *attā*). For if, *bhikkhus*, if one’s body is *attā*, one would have full control over it, and it would be possible to say: ‘Let my body be like this; let my body not be like this.’ But because the body is *anattā*, it is subjected to decay and disease, and it is not possible to have it the way one desires: ‘Let my body be this way; let my body not be this way.’”

5. The verse in #4 is a very important because it clearly describes what is meant by *attā* and *anattā* in the deeper sense: *Attā* would be one in full control. If one has full control of something, one would be able to maintain it to the way one wants.

- For example, we like to think that if we “own” something we should be able to “have full control” over it. But we know that is not the case (cars, houses, anything we own evolve in their own way. Even though things like gold jewellery are stable, we will lose control over them when we die).
- Specifically, if one’s body is *attā*, one should be able to make it the way one would like it to be: say, strong, healthy, and handsome/beautiful; one would be able to maintain it without catching any disease or injuries; furthermore, one would be able to make it live forever. But our bodies evolve in their own way. No matter how hard we try, they age, decay, and die.

6. This is emphasized in the another verse in that *sutta*: “*Taṃ kiṃ maññatha, bhikkhave, rūpaṃ niccaṃ vā aniccaṃ vā*”*ti?* “*Aniccaṃ, bhante.*” “*Yaṃ paṇāniccaṃ dukkhaṃ vā taṃ sukhaṃ vā*”*ti?* “*Dukkhaṃ, bhante.*”

Translated: ““What do you think, *bhikkhus*, can one’s body be maintained to one’s liking or not?”—“not possible, *bhante.*”—“Does that lead to suffering or happiness?”—“Suffering, *bhante.*”

- As we have seen before, it is the *anicca* nature (inability to satisfy one’s desires/expectations) that leads to suffering; see, “[Anicca – Inability to Keep What We Like](#).”

- We encounter such suffering whenever something that we own breaks down (houses, cars, etc) and when people we love get sick or die. However, the worst suffering is when we ourselves get sick or when we face death ourselves. This is expressed in the next part of the above verse.

7. The verse continues: “*Yaṃ paṇāniccaṃ dukkhaṃ vipariṇāmadhammaṃ, kallaṃ nu taṃ samanupassitum: ‘etaṃ mama, esohamasmi, eso me attā’*”*ti?* “No *hetam, bhante.*”

Translated: ““If something cannot be maintained to one’s liking, if it undergoes unexpected change, and lead to suffering, is it appropriate to say: ‘**This is mine, this I am, this is my attā (my essence)**’?”—“No, *bhante.*”

- **Now we are getting to the deeper aspect.** If X owns a car, X would say, “**this car is mine.**” If that car breaks down, X will become unhappy (suffer).
- However, X will never says, “**this car is me, this is my attā (my essence).**”
- On the other hand, X is likely to say, “**this body is me, this is my attā (my essence).**”

8. What the Buddha logically pointed out in the above section of the verse is since one’s **body** also cannot be maintained to one’s liking, since it undergoes unexpected change, and since leads to suffering, is it NOT appropriate to say: “**This is mine, this I am, this is my attā (my essence)**” **about one’s body too.**

- This needs to contemplated at depth.
- This is one key aspect of grasping what is meant by *sakkāya diṭṭhi*, as we will discuss in a future post.

9. Furthermore, it is not only our body, but any *rūpa* (family, friends, cars, houses, etc) that is not under our control. In our deep past, we never had that control over any external or internal *rūpa*, and we will never be able to have such control in the future either. **Therefore, the whole rūpakkhandha is anattā.**

- The *sutta* now repeats the same argument for the other four *khandhās* or aggregates: *vedanākkhandha, saññākkhandha, saṅkhārakkhandha, viññāṇakkhandha.*
- Those are our thoughts, experiences, hopes and dreams. We do not have much control over them, and whatever control we have will be lost at death. We have no idea where we will be born next.
- **We are really helpless in this beginning-less rebirth process and that is the anatta Nature.**

10. **There is nothing in a “living being” that is not included in the five aggregates.** Since one does not have any real control over any of them, none of them can be called one’s *attā*.

- Therefore, there is NOTHING that can be called one’s own, and thus can be maintained to one’s liking. For example, one does not have any control over WHERE one will be reborn.
- That is dictated by *Paṭicca Samuppāda*, and most rebirths are the lower realms with much suffering. Thus one is truly helpless or *anattā*.

11. This can be expressed by saying one has “no real intrinsic essence”, “one is helpless in the long run”, “all struggles for a permanent happiness will go to naught”, etc. **Even if one lives a perfect and healthy life, one WILL become helpless at death, with the future totally uncertain.**

- This is why a living being is ALWAYS subjected to the *anatta* nature. Note that “*rūpaṃ anattā*” refers to the fact that one’s body cannot be one’s *attā*, and that *anatta* (without the long “a”) is a characteristic of the Nature.
- Realizing this particular aspect of *anatta* Nature, i.e., that **one’s five aggregates are not be taken as “one’s own”** is the **removal of *sakkāya diṭṭhi*.**

12. Now we can see how this concept of *anattā* is clearly opposite to the concept of a “soul” in Abrahamic religions or the concept of an “*ātma*” (pronounced “*āthma*”) in Hinduism. Thus, according to those religions, there is an *attā* which is the “soul” or the “*ātma*.”

- In the case of Abrahamic religions, one’s goal is to “purify” one’s soul and make it got to heaven where one will live forever.
- In the case of Hinduism, the goal is to merge one’s *ātma* with the *Mahā Brahma*, and again be in that *brahma* realm forever.
- However, the Buddha stated that there is no realm in this world that has a permanent existence like that.
- This concept of an “everlasting identity” or a “soul” or an “*ātma*” is referred to as the “*sassatavāda*” in the *Tipiṭaka*. [*sassatavāda* :[m.] eternalism.]

13. Those who do not believe in rebirth say that a “person” exists only as long as his/her body is alive. When one dies, that identity is terminated. Most scientists today seem to believe in this idea: **There is nothing that is “carried over” to a next life. This concept (or argument) is called the “*uccedavāda*” in the *Tipiṭaka*.** [*uccedavāda* :[m.] cutting off; perishing; annihilation.]

- But the Buddha explained that the real nature lies in between those two extreme views. Any “living being” exists as an ever-changing lifestream and that “lifestream” is carried over to a new life. But there is NOTHING that remains the SAME in that lifestream. The next life could be VERY DIFFERENT from the current life; see, “[What Reincarnates? – Concept of a Lifestream.](#)”
- The next life is determined by the root causes and conditions that exist at the moment of leaving the current existence (*cuti-paṭisandhi* moment) based on *Paṭicca Samuppāda*.
- A second key meaning of anatta is discussed at, “[Anatta – No Refuge in This World.](#)”

3.3.4.2 Anatta – No Refuge in This World

June 7, 2019

Recap of First Meaning of *Anatta* – No “Soul” or “Atma”

1. In the previous related post, we discussed one aspect of *anatta* — that there is no everlasting “essence” in a living being like a soul or an *ātma*; see, “[Anattā in Anattalakkhana Sutta – No Soul or an Ātma.](#)”

- However, life does not come to end at death. There is a continuation at death with birth in one of the realms “in this world of 31 realms”; see, “[What Reincarnates? – Concept of a Lifestream.](#)”
- When the life as human ends, one does not have any control over what the next existence would be. It happens according to the prevailing causes and conditions at that moment, i.e., via the *Paṭicca Samuppāda* process.

2. Therefore, there is no “unchanging essence” in a given “person”; he/she is just a collection of the five aggregates that keep evolving according to the principle of cause and effect (*Paṭicca Samuppāda*).

- *Vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* all arise due to conditions present at a given time, i.e., they arise based on *Paṭicca Samuppāda* (“*avijjā paccayā saṅkhāra*,” “*saṅkhāra paccayā viññāṇa*” lead to *saṅkhāra* and *viññāṇa*; “*phassa paccayā vedanā*” leads to *vedanā* (and *saññā* since *vedanā* and *saññā* arise together; see, “[Citta and Cetasika – How Viññāṇa \(Consciousness\) Arises](#)”). Furthermore, our bodies (*rūpa*) arise via “*bhava paccayā jātī*”).
- A “person” is no more than the five aggregates: *rūpakkhandha*, *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, *viññāṇakkhandha*.
- Those aggregates evolve moment-to-moment according to *Paṭicca Samuppāda* or the principle of cause and effect where conditions play a major role.
- There is no “*attā*” or a “soul” or an “*ātma*” **that on its own power** causes these entities to arise when a new *ārammaṇa* comes to any of the six senses; see, “[Complexity of the Mind – Viññāṇa and Saṅkhāra](#)” and “[Kamma are Done with Saṅkhāra – Types of Saṅkhāra.](#)”

3. Now we can see that the Buddha explained the deep concepts of *anicca*, *dukkha*, *anatta* in his first two *suttā* (*Dhammacakkappavattana Sutta* and *Anattalakkhana Sutta* that were delivered to the five ascetics just after attaining the *Buddhahood*.

- In the post, “[Anicca – Inability to Keep What We Like](#)” we discussed the first discourse of *Dhammacakkappavattana Sutta*, in which the Buddha described what *anicca* means, and how the inherent *anicca* nature leads to *dukkha* or suffering.
- As we discussed in that post, the key verse in that *sutta* is, “*yampiccam nalabhati tampi dukkham*” which is shortened version (that rhymes) of the full verse “*yam pi iccam na labhati tam pi dukkham*,” and that the word “*anicca*” is the opposite “*icca*” that is hidden in that key verse (then *dukkha* arises because of the inability to satisfy one’s expectations (*icca*)).
- In the same way, *Anattalakkhana Sutta* introduced the term *anatta* which highlights the fact that one is unable to maintain **even things one perceives to be “one’s own”** like one’s physical body or one’s mental faculties (*vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*); see, “[Anattā in Anattalakkhana Sutta – No Soul or an Ātma](#).”
- Of course, those two aspects are related: since one does not have complete control over ANYTHING, one will not be able to maintain things to one’s liking and will inevitably subjected to suffering in the rebirth process.

Anatta – Becoming Helpless in the Rebirth Process

4. In this post we will discuss another aspect of the *anatta* nature: **how one becomes helpless (*anatta*) in the long-term**. That is another meaning of *anatta*, sometimes written as *anattha*. (The *Tipiṭaka* was written down in Pāli, but with Sinhala script; see, “[Historical Background](#).” The word “*anatta*” was written as අනත්ත. Sometimes –especially to provide the meaning that we are discussing now — it is also written as අනත්ථ and that we write here as “*anattha*”).

- The Pāli word “*attha*” could mean “the truth” or “having refuge” or “meaningful” depending on the context. The opposites of “untruth” or “helpless” or “meaningless/unprofitable” is indicated by the word “*anattha*.”
- When one does not really comprehend the *anicca* nature (that it is not possible to get what one wants AND keep it that way), one would be tempted to try to get one wants by any means necessary. This is when one starts engaging in immoral deeds.
- This is when one sets up causes and conditions to bring so much suffering in the future that will lead to becoming truly helpless (*anattha*) via bad rebirths due to bad *kamma*.
- **Therefore, knowing the first meaning of *anatta* is not enough; one needs to comprehend the second, related meaning and work diligently to avoid *dasa akusala*.** This is discussed below.

5. In the “[WebLink: suttacentral: Pathama Adhamma Sutta \(AN 10.113\)](#),” the Buddha succinctly states what *dhamma/adhamma* and *attha/anattha* are:

“*Katamo ca, bhikkhave, adhammo ca anattho ca? Micchādiṭṭhi, micchāsaṅkappo, micchāvācā, micchākammanto, micchājīvo, micchāvāyāmo, micchāsati, micchāsamādhi, micchāñāṇaṃ, micchāvimutti—ayaṃ vuccati, bhikkhave, adhammo ca anattho ca,*” AND

“*Katamo ca, bhikkhave, dhammo ca attho ca? Sammādiṭṭhi, sammāsaṅkappo, sammāvācā, sammākammanto, sammājīvo, sammāvāyāmo, sammāsati, sammāsamādhi, sammāñāṇaṃ, sammāvimutti—ayaṃ vuccati, bhikkhave, dhammo ca attho ca.*”

- Basically, “*dhamma*” are those thoughts, speech, and actions that are for the benefit of oneself. One who engages in those are engaged in fruitful/meaningful things and will lead to one’s refuge (“*attha*”). As we can see this encompasses the Noble Eightfold Path followed by *sammā ñāṇa* and *sammā vimutti* (i.e., *Arahanthood*).

- The opposites or “*adhamma*” are those thoughts, speech, and actions that lead to much future suffering. One who engages in those are engaged in unfruitful/immoral things and those will lead to one becoming helpless in the rebirth process (“*anatta*”).

6. Another way to express the same idea is to say that one who is engaged in *dasa akusala* (*adhamma*) will become helpless in the rebirth process (*anatta*); see, “[Dasa Akusala and Anatta – The Critical Link.](#)”

One who is engaged in the opposites of *dasa kusala* (*dhamma*) will have refuge in the rebirth process (*attha*) and will become free of future suffering by becoming an *Arahant*.

- Many key *suttā* stating these “core facts” about Buddha Dhamma are listed in “[Aṅguttara Nikāya – Suttā on Key Concepts.](#)”

7. Therefore, we see that the first meaning of *anatta* is of “theoretical nature”: It states that one will never have full control over one’s affairs in the long run, and thus one is bound becomes helpless in the rebirth process.

- The second meaning provides a practical way out of this dangerous outcome: This special way to avoid future suffering and to find refuge can only be discovered by a Buddha and it is the Noble Eightfold Path.
- In other words, following *dhamma* to have refuge (*attha*) instead of following *adhamma* to become helpless (*anatta*).
- In the “[WebLink: suttacentral: Pathamanātha Sutta \(AN 10.17\)](#)” and “[WebLink: suttacentral: Dutiyānātha Sutta \(AN 10.18\)](#),” the Buddha advised *bhikkhus* to live a moral life in order to avoid becoming *anātha*: “*Sanāthā, bhikkhave, viharatha, mā anāthā.*”

Yadaniccam tam dukkham, tam dukkham tadanatta

8. With this second interpretation, It is easier to see how the *anicca* nature leads to suffering (*dukkha*) and eventually to helplessness (*anatta*).

- Any human who has not heard and comprehended to some extent what *anicca* nature is called an “*assutavā puthujjano.*” One who has is called a “*sutavā ariyasāvako.*” Here *sutavā* means “has heard about the true teachings of the Buddha (and comprehended)” and *assutavā* is of course one who has not heard/comprehended. [*sutavā* : 已聞, have heard; *assutavā* : Not learned, ignorant, 無聞的、無知的] [See [WebLink: suttacentral: AN 5.48 Alabbhanīyathānasutta](#)]
- If one does not realize that all struggles to achieve a “permanent happiness” is not possible, one would be doing one’s best to achieve such a state of happiness. This is done by working to merge one’s soul with a Creator God in heaven or one’s *ātma* with *Mahā Brahma* in a *brahma* realm. But the Buddha explained that those efforts would be in vain.

9. It is of course necessary to have goals for certain achievements while one is living in this world — even mundane achievements. For example, one needs to get a good education and a good employment (and make sure that one’s children will do the same). This is necessary to avoid suffering in this life.

- But then one would need to hear about the true nature of this world on a long-term basis: That life continues after the death of this physical body, and one needs to work towards attaining some spiritual goals. That will lead to stop suffering in the rebirth process.
- It is only when one contemplates this “long-term picture” that one can comprehend the *anicca* (and *dukkha* and *anatta*) nature of this world: No matter how many mundane achievements one may achieve, one would have to leave all that behind when one dies and then — if fortunate enough to be born human — re-start the whole process again.

10. Therefore, ignorance of the *anicca* nature leads to suffering (*dukkha*).

- If one tries to attain happiness by doing *dasa akusala* (which is very likely to happen when the temptations become high), one would be born in the lower four realms and the suffering will be much higher. That is when one really becomes helpless (*anatta*).

This fact is stated repeatedly in many *suttā* with the succinct statement: “*yadaniccā tam dukkham, tam dukkham tadanatta.*”

- That is a condensed version made to rhyme for easy oral transmission. The complete verse is: “*yadaniccā tam dukkham, tam dukkham tad anatta*”,
- “**if something cannot be maintained (or managed depending on the case) to one's satisfaction, suffering arises, therefore one is helpless in the end.**”
- For more details see, “[Anicca – Inability to Keep What We Like.](#)”

11. The above important verse appears in many *suttā* in the *Saṃyutta Nikāya* (*Anicca Vagga*), including [WebLink: suttacentral: Ajjhātanicca Sutta \(SN 35.1\)](#), [WebLink: suttacentral: Bahiranicca Sutta \(SN 35.4\)](#), and [WebLink: suttacentral: Yadanicca sutta \(SN 22.15\)](#), the Buddha stated that the three characteristics of “this world” (*anicca, dukkha, anatta*) are RELATED to each other:

- This statement is applicable in this life. No matter how many achievements/accomplishments/victories we make in this life, we will have to leave all that behind when we die.
- However, the key message of the Buddha was regarding the implications of this statement in the rebirth process. If one engages in *dasa akusala* (which is unavoidable if the temptation is high enough), one is bound to be subjected to much suffering via rebirths in the four lower realms. That is when one becomes really helpless (*anatta*).
- This is why one would need to remove the ten types of *micchā diṭṭhi* first (mundane Eightfold Path) in order to understand the fundamentals like the laws of *kamma* and the validity of the rebirth process. Only then one can start comprehending the *anicca, dukkha, anatta* nature and start on the Noble Eightfold Path; see, “[Buddha Dhamma – In a Chart](#)” and “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\).](#)”

All Meanings of *Anicca/Anatta* Self-Consistent

12. All meanings/interpretations of *anicca* and *anatta* are inter-related.

- The first meaning of *anatta* says that there is no “unchanging essence” in a living being, controlling its destiny. Everything happens due to causes and conditions even moment-by-moment *Idapaccayā Paṭicca Samuppāda*. Then the rebirth process takes place according to *Uppatti Paṭicca Samuppāda*; see, “[Paṭicca Samuppāda.](#)” Once the basic idea is grasped, one can follow the steps in “[Paṭicca Samuppāda – Overview](#)” to understand things better.
- This is related to the *anicca* nature of not being able to maintain anything to one's liking. One does not have that ability because one does not have control over anything that one perceives to be “one's own.”
- When one goes against the nature (i.e., do *adhamma*) and tries to maintain things to one's liking, one may do *dasa akusala* and then be subjected to their bad *kamma vipāka*. One critical aspect of this is to have births in the four lower realms where suffering is high. One can avoid much suffering by grasping this meaning of *anatta*.

13. There is something that is under our control, even though one has to be really disciplined to make it to work. This is one's own *gati*. One's destiny is controlled by one's own *gati*.

- Since one's *gati* can change any time, those are not fixed. Anyone can decide to change one's own *gati* and work towards a better outcome by rejecting *adhamma* and adhering to *dhamma*, i.e., by following the Noble Eightfold Path; see, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\).](#)”

- But first, one must fully grasp the fundamentals embedded in *anicca, dukkha, anatta* (and sometimes *asubha* is also added to the list).
- Even before that one must get rid of those 10 types of *micchā diṭṭhi*. For example, one can never grasp the *anicca/anatta* nature if one does not believe in rebirth. The whole point is to stop suffering in future rebirths. Current life has already arisen due to past causes/conditions and will inevitably lead to decay and death.

3.3.4.3 Dasa Akusala and Anatta – The Critical Link

April 2, 2017; revised November 10, 2017; August 30, 2018; September 1, 2018; June 6, 2019

1. This important post will help make the connection between **deeper teaching of the Buddha Dhamma** (*anicca, dukkha, anatta*) and **the practice**, i.e., cleansing one's mind via abstaining from *dasa akusala* and cultivating *dasa kusala*.

- **The *Tilakkhaṇa* represent the “theory side” or the “nature of this world” and *dasa akusala* are associated with the practice.** Thus the connection between the two is important.
- I have not seen this addressed directly, outside of the *Tipiṭaka*.

2. We discussed in the previous post, “[Anatta – the Opposite of Which Atta?](#),” why the Pāli words “*atta/anatta*” do not convey “self/no-self” but rather “with essence/no essence” or “truth/untruth” or “useful/not useful” or “protected/helpless.”

- We also discussed how “*atta/anatta*” are closely related to Sanskrit words “*artha/anartha*” (අර්ථ/අනර්ථ in Sinhala) also giving the meanings “truth/untruth” or “useful/not useful.”
- Finally, we touched on the fact that the *anatta* (and thus *dukkha* and *anicca*) nature is a manifestation of engaging in *dasa akusala*.

3. Recently I realized that many *suttā* in the *Aṅguttara Nikāya* (AN) express various concepts in brief. Many *suttā* are just a paragraph, providing the key idea; see, “[Aṅguttara Nikāya – Suttā on Key Concepts](#).”

- Here we will discuss three short *suttā* in the *Aṅguttara Nikāya* that can be used to clarify the connection between *dasa akusala* and *Tilakkhaṇa*.

4. First, the *Kusala Sutta* ([WebLink: AN 180; in the *Sadhuvagga*](#)) is just one paragraph providing the definition of ***dasa akusala***:

- “*..katamanca bhikkhave, akusalam? pānātipāto, adinnādānaṃ, kāmesumicchācāro, musāvādo, pisunā vācā, parusā vācā, samphappalāpo, abhijjhā, vyāpādo, micchādiṭṭhi akusalam..*”
- Conventionally translated: “killing, stealing, sexual misconduct, lying, slandering, harsh talk, empty talk, greed, hate, and wrong views.” These are discussed in “[Ten Immoral Actions \(Dasa Akusala\)](#).”
- In the next and last paragraph of the *sutta*, *dasa kusala* are defined as the opposites of *dasa akusala* (*veramani* means “abstain from”): “*..katamanca bhikkhave, kusalam? pānātipātā veramani, adinnādānā veramani, kāmesumicchācārā veramani, musāvādā veramani, pisunā vācā veramani, parusā vācā veramani, samphappalāpā veramani, abhijjhā veramani, vyāpāda veramani, sammādiṭṭhi kusalam ‘ti.*”
- Therefore, *kusala* and *akusala* are stated clearly and succinctly in that *sutta*.

5. Then in the very next *sutta*, *Attha Sutta* ([WebLink: AN 181; in the *Sadhuvagga*](#)) ***anatto*** is defined in terms of ***dasa akusala***:

- “*..katamo ca bhikkhave, anatto? pānātipāto, adinnādānaṃ, kāmesumicchācāro, musāvādo, pisunā vācā, parusā vācā, samphappalāpo, abhijjhā, vyāpādo, micchādiṭṭhi – ayam vuccati, bhikkhave, anatto..*”

- In the next and last paragraph of the *sutta*, *attho* defined as the opposite of that: *panatipatā veramani*, *adinnādānā veramani*, *kāmesumicchacārā veramani*, *musāvādā veramani*, *pisuṇā vācā veramani*, *parusā vacā veramani*, *samphappalāpā veramani*, *abhijjhā veramani*, *vyāpāda veramani*, *sammaādiṭṭhi* – *ayam vuccati, bhikkhave, attho*. ‘ti.
 - This means *dasa akusala* are “not the real nature.” When one goes against nature, one gets into trouble; see, “[Anatta – the Opposite of Which Atta?](#).”
 - Here are more short *suttā* that confirm this point: “[Aṅguttara Nikāya – Suttā on Key Concepts](#).”
6. Those two short *suttā* make it crystal clear the following important facts:
- **Anatta has nothing to do with a “self.”**
 - **Anatta is all about being helpless in the rebirth process due to one’s engagements with *dasa akusala*.**
 - **Therefore, getting to *Nibbāna* is all about avoiding *dasa akusala*, i.e., cleansing one’s mind.**
7. Now, there are several *suttā* in the *Aṅguttara Nikāya* that put it all together. The first verse in the *Patama Adhamma Sutta* ([WebLink: AN 10.113 in the Paccorohanivagga](#)) states it nicely:
- “*Adhammo ca, bhikkhave, veditabbo anatto ca; dhammo ca veditabbo attho ca.*”
 - I will write another post explaining other verses in that *sutta*, but we can easily translate that verse: “*Bhikkhus*, it is to be comprehended that *adhamma* leads to *|anattā|* (helplessness), and *dhamma* leads to *|attā|* (refuge in *Nibbāna*).”
 - **Furthermore, those who are still clinging to the incorrect interpretation of “*anatta*” as “no self,” should be able to clearly see that it leads to the foolish statement: “*Bhikkhus*, it is to be comprehended that *adhamma* leads to **no-self**, and *dhamma* leads to **self**.”**
 - The root cause of this misinterpretation is explained in, “[Misinterpretation of Anicca and Anatta by Early European Scholars](#).”
8. *Dhammā* is what one bears, i.e., what principles one lives by. But it is normally used in the sense of “good *dhamma*.”
- *Adhamma* (or *adhammā*) is the opposite: immoral living. If one engages in *dasa akusala*, then one is engaging in *adhamma*, i.e., one bears *adhammā*.
 - This can be compared to the following: We use the word “smell” normally to mean “bad smell.” We specifically say “good smell” to indicate an actual good smell.
 - In the same way, *dhammā* can be good or bad (“what one bears”). However, we normally use the word *dhammā* to indicate good *dhammā*. Bad *dhammā* are *adhammā*.
9. Normally the word *dhamma* is used to indicate a teaching or a principle, as in Buddha Dhamma. The word *dhammā* (with a long “a”) is used to indicate what one bears as a result of past *kamma*; see, “[What are rūpa? – Dhammā are rūpa too!](#).” *Dhammā* are the same as *kamma bīja*.
- We need to be able to figure out meaning depending on the context, how the word is used in a given verse.
10. When one examines carefully ANY *sutta* in the *Tipiṭaka* they will be consistent with the above explanation.
- It is clear that those three *suttā* make the key connection between the deeper *Tilakkhaṇa* (“theory”) and the practice (cleansing the mind via *sīla*, i.e., staying away from *dasa akusala*). We don’t need to analyze hundreds of *suttā* to see the connection.
 - When I go to online discussion boards, I get totally confused. People just quote *suttā* from different sites, and normally they have incorrect meanings of key Pāli words. It is a waste of time to read all those long

posts providing “evidence” from different places, and of course there are usually inconsistencies among them.

- This was a major reason that I decided to start this website, because I can show that everything is consistent if one uses the true meanings of key Pāli words.

11. It is also good to keep in mind that a major problem with many texts is that they take conventional meanings of key words and apply them in the wrong places.

- Unless one is clear about the true meanings of such key words, and know where to use a given meaning, it is easy to veer-off in a totally wrong direction; see, “[Pāli Dictionaries – Are They Reliable?](#).” Also see, “[Buddha Dhamma: Non-Perceivability and Self-Consistency.](#)”

12. In the previous post, “[Anatta – the Opposite of Which Atta?](#),” we briefly mentioned that *anatta* is closely related to *dasa akusala*. I hope the connection is much more clear now.

- Engaging in *dasa akusala* can only lead to suffering and thus helplessness in the long run. Therefore, engaging in actions, speech, thoughts associated with *dasa akusala* are not only pointless but also dangerous.
- This idea is quite clear in the Sinhala word for *|anattā|*: “*anārtha*” that we discussed in that previous post. It literally means “doing things that are totally useless and can only bring harm.”

13. Those who believe that doing *dasa akusala* can bring “bad *vipāka*” only in future lives are mistaken. Many people do not realize that even having immoral thoughts can bring us stress in this life itself.

This was discussed in detail in the beginning posts in the “[Living Dhamma](#)” section. That section is important in two aspects:

- a. When one starts abstaining from *dasa akusala*, one can experience a definite sense of relief — also called *nirāmisa sukha* — and that should be the initial focus.
- b. When one starts experiencing this *nirāmisa sukha*, one also starts comprehending deeper aspects of *Dhamma* like the *anicca* and *anatta* nature. Only with those insights that one can actually start to “see” the long-term *kamma vipāka* due to *dasa akusala* — like those leading to births in the *apāyā* (lowest four realms).

14. Finally, note that *atta* is sometimes spelled out as “*attha*” (with an “h”) in many texts and each may imply mundane or deeper meaning. For example, the old Sinhala commentaries are called “*atthakathā*.” It means “accounts about the truth” (“*kathā*” means “story”).

- Those are the reliable commentaries in the *Tipiṭaka: Patisambhidamagga*, *Petakopadesa*, and *Nettipakarana*. Out of many Sinhala *atthakathā*, those three are the only ones that survived.
- On the other hand, commentaries by Buddhaghosa and others are do not belong to *atthakathā*. *Visuddhimagga* is one such popular but erroneous commentary; see, “[Buddhaghosa’s Visuddhimagga – A Focused Analysis.](#)”

15. Finally, we can now see the truth in the verse, “*Dhammo ca yathā Dhammo, yathā atto*” that is also in the *Patama Adhamma Sutta* of #7 above.

- That means, “when one bears true (*yathā*) *Dhamma*, one comprehends the truth (and avoids being helpless in future).”
- If one bears *dhammā* and stays away from *adhammā*, that will help one grasp the *Tilakkhaṇa*. **Then one will not become *|anattā|* or helpless in this rebirth process. One will have “*|attā|*” or refuge.**
- This is an important post which provides a simple but critical link between “theory and practice.” It is good idea to read those relevant other posts and come back and re-read this post, until this connection is grasped.
- This basic idea can go a long way in comprehending *Tilakkhaṇa*.

3.3.4.4 Anatta – the Opposite of Which Atta?

March 17, 2017; revised November 4, 2017

We can see how the word “*anatta*” got translated incorrectly as “no-self” by carefully examining the different usages of the word “*atta*.”

- There is “*atta*” which is different from “|*attā*” (with a “long a” at the end). *Anatta* is the opposite of “*atta*” not of “|*attā*.” [*atta* : [m.] soul; oneself. |*attā* : Self, body, person, individuality; life, mind soul.]
- The Sanskrit word *anātma* has been misinterpreted as *anatta*. That Sanskrit word *anātma* does mean “no-soul” but it was NEVER used by the Buddha. Similarly, *anitya* (meaning “impermanence”) is a Sanskrit word, but that is not what is meant by the Pāli word *anicca*.
- We will discuss these in detail below.

1. In the previous post, “[Sakkāya Ditthi is Personality \(Me\) View?](#),” we discussed how the term *sakkāya ditthi* gets incorrectly translated when the word “*atta*” in a key verse in the *Culavedalla Sutta* is misinterpreted. ***Atta* has two meanings:**

- One meaning is mundane: “I” or “myself” as in the first verse of “|*attā*| *hi attano nātho*” (“only I can be of salvation to myself”), and that is the meaning implied in the above verse.
- The other deeper meaning of “*atta*” is “in control” or “has essence”, and the opposite of that (“*na*” + “*atta*”) is the *anatta* in *Tilakkhaṇa*: “one is helpless in this rebirth process.”
- Those two meanings are explained in “[|Attā| Hi Attano Nātho](#)” and in detail in, “[Pāli Dictionaries – Are They Reliable?](#).”

2. Comprehension of a concept is very different from memorization of the definition of a word. All one needs to do is to understand what is MEANT by a word; that is *saññā*; see, “[Saññā – What It Really Means](#).”

- *Atta/anatta* are key Pāli words in relation to the *Tilakkhaṇa*, so it is essential to get the correct *saññā* or the idea. In future posts, we will discuss several other critical usages of *atta/anatta*.

A. *Atta* as “a Person” versus “Essence” or “Truth”

3. Many of the misconceptions about “self” and “no-self” can be understood by taking a systematic look at how the Pāli word “*atta*” is used in the conventional sense and in the deeper sense (to give different meanings in different places).

- “|*attā*” (pronounced with a “long a at the end”) is used to denote a person: There is no word for the negation of that |*attā*|.
- In Sinhala, it is written as “අත්තා” That is how it appears in the Pāli *Tipiṭaka* that is written in Sinhala.
- Even though |*attā*| has this meaning as a “person”, *anatta* is never used as the opposite of **that** |*attā*|.
- Pronunciation:

[WebLink: Pronunciation - attā](#)

4. **The word “*atta*” (pronounced with a “short a at the end”) is “the essence” or “the truth that is timeless.” The negation is “*anatta*.”**

- In Sinhala they are written as “අත්ත” and “අනත්ත.” That is how they appear in the Pāli *Tipiṭaka* that is written in Sinhala.
- Pronunciation of the two words:

[WebLink: Pronunciation - atta and anatta](#)

- **There is a third meaning too** (especially when it is written as “*attha*,” with an emphasis at the end), which is closely related to the second meaning above:

- The Sinhala word for *attha* is “*artha*” which means “truth” or “that which makes sense.” The opposite word in Sinhala is “*anartha*,” which emphasizes that what is “*anartha*” is not worth doing.
- In Sinhala they are written as “අර්ථ” and “අනර්ථ.”
- Pronunciation of the two words:

[WebLink: Pronunciation - artha and anartha](#)

I hope you can catch the differences in the pronunciations.

- *Anatta* is the negation of the latter two meanings: “na” + *atta*” (which rhymes as “*anatta*”): there is no substance/ does not hold any ultimate truth.
5. One who is engaged in things that are “*anatta*” or “*anartha*” will become “*anātha*” (helpless), the opposite of “*nātha*.” As was mentioned in the post “[\[Attā\] Hi Attano Nātho](#),” “*nātha*” is another word for *Nibbāna*.
- One who is trying to find refuge in this world will become truly helpless in the long run. On the other hand, the only refuge (“*nātha*”) is *Nibbāna*, i.e., overcoming the rebirth process.
 - Therefore, *atta/anatta* in Pāli can be translated to Sinhala as *artha/anartha*, and both usages convey the deeper meaning that conveys the following ideas: “essence/no essence”, “truth/false”, “useful/useless”, etc.
6. On the other hand, the word “[*attā*]” (pronounced with a “long a at the end”) is used as “me” only in the conventional sense. In order to communicate with others, we have to say things like, “one needs to defend oneself.” Here “one” exists only in the conventional sense.
- **There is no single Pāli word to express the negation of that, i.e., “not [*attā*]”;** If there were to be such a word that would be “non-person.” It just cannot be used that way.
 - **As we see below in #11 and #12, other words to denote “me” or “self” are “*mama*,” “*asmi*” or “*me*.”**
7. Therefore, the critical mistake was made by trying to translate *anatta* as the opposite of “[*attā*]” with the conventional meaning of “a person” or “self.”
- The word *anatta* was ALWAYS used with the deep meaning of “no truth or no essence.” ***Anatta* is a fact** indicating there is no essence or truth to be had in this world of 31 realms.
 - [*Attā*] (in the conventional sense) is used to indicate “a person.” **There is no single Pāli word to give the opposite meaning to that.**
8. In relation to *anatta* in *Tilakkhaṇa*, “*atta*” can also be described as “ultimate truth” (“*sathya*” in Sinhala and Sanskrit). **That truth is *anicca* nature:** “this world cannot bring happiness anywhere in the 31 realms.”
- Therefore, this whole world is of *anatta* nature, having no “essence” and thus lacking anything is worthwhile pursuing. Therefore, if one tries to do that impossible task, one will only get exhausted, i.e., subjected to suffering.
 - Anyone who is struggling to achieve this impossible task is truly helpless.
 - All the above statements convey the meaning of the word, “*anatta*”; **that is the *saññā* that one needs to absorb.**
9. When one pursues “pleasurable things in this world” assuming that the nature is *nicca* (i.e., can lead to happiness), one will be subject to suffering or *dukkha* and thus one is *anatta* (becomes helpless). This is explained in the key post, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#).”
- When one pursues worldly things assuming that the world is of “*nicca*” and “*atta*” nature, one tends to do *dasa akusala*.

- When one realizes that the nature is *anicca* and *anatta*, one will try to stay away from *dasa akusala* even when pursuing worldly things. It is fairly easy to see potential problems with the three types of *akusala* done with the body and the four types done with speech. This is the first stage in the path (**mundane path**).
- When one follows the mundane path (i.e., live a moral life), one starts to cleanse one's mind and discard many *micchā diṭṭhi*, i.e., start cleansing the mind.
- At that stage, when one is exposed to the true meanings of *anicca*, *dukkha*, *anatta*, one is able to comprehend them and start on the **lokuttara (Noble) Path**.
- One seriously starts tackling the *akusala* done by the mind when one becomes a *Sotāpanna* and starts on the Noble Path. **All *dasa akusala* are removed only at the *Arahant* stage. That is the “*atta*” or the “*nātha*” state; one is no longer *anatta*.**

10. One will be subjected to much suffering (*dukkha*) until one realizes that it is fruitless to pursue “valuable things” by engaging in *dasa akusala*.

- The Noble truth of *dukkha sacca* (or *dukkha sathya*) is to see that relief from suffering comes only by rejecting *dasa akusala* and by engaging in “good and moral activities”, i.e., *dasa kusala*.
- When one reaches *Nibbāna*, that is the state of *nicca*, *sukha*, *atta*, the opposites of *anicca*, *dukkha*, *anatta* that are characteristics of this world of 31 realms.

B. Discussion of the Anatta Lakkhaṇa Sutta

11. There are several Pāli (and Sinhala) words (*mama*, *asmi*, and *me*) that are used to indicate “me”, “I”, “myself.” *Attā* is also used to indicate “self” in the conventional sense, and “having no essence” in the deeper sense. It is important to note the difference in all those usages.

- All these terms are in the *Anatta Lakkhaṇa Sutta* [SN 22.59], which is the key *sutta* that discussed the concepts of *atta* and the opposite, *anatta* in the deeper sense. Here are the key verses that are relevant to our discussion here:

“*Taṃ kiṃ maññatha, bhikkhave: rūpaṃ niccaṃ vā aniccaṃ vā ti? “Bhikkhus: is any rūpa (material entity) nicca or anicca?” or “Bhikkhus: can any rūpa be kept to one’s satisfaction or it cannot be kept to one’s satisfaction?” [maññati : (man + ya), imagines; is of opinion: deems.]*

– *Aniccaṃ*, *Bhante* “*It cannot be kept to one’s satisfaction, Venerable Sir.*”

Yaṃ panāniccaṃ dukhaṃ vā taṃ sukhaṃ vā ti? “Will such an entity lead to suffering or happiness?”

– *Dukhaṃ*, *Bhante*. “*Suffering, Venerable Sir.*”

Yaṃ panāniccaṃ dukhaṃ vipariṇāmadhammaṃ, kallaṃ nu taṃ samanupassitum: ‘etaṃ mama, eso hamasmi, eso me attā ‘ti? “Will such an entity that cannot be kept to one’s satisfaction, that leads to suffering, and is a vipariṇāma dhamma, should be considered as “myself or mine, or can taken as my attā?”

– *No hetam, Bhante.* “*No reason to think so, Venerable Sir.*”

12. Now, that last verse also clearly states what words were used by the Buddha to mean “me”, “I”, “myself.”

- This key verse with these words is, “*Etam mama, eso ’ham asmi, eso me attāti,*” which means, “That is mine, it is me, or my *attā* (my essence).”
- It is interesting to note that even today, the Sinhala word for “me” or “myself” is “*mama*,” and “*asmi*” is the sense of “me” or “mine” as in *asmi māna*, which is one of the last *saṃyojana* removed at the *Arahant* stage; see, “[Pāli Dictionaries – Are They Reliable?](#).”

13. The first type of “wrong *saññā*” or the idea that “I am my physical body” (and “I am my *vedanā*,” etc) are removed at the *Sotāpanna* stage by removing *Sakkāya Ditthi*. The much deeper-embedded *saññā* of “a me” is removed only at the *Arahant* stage; see, “[Sakkāya Ditthi is Personality \(Me\) View?](#).”

- *Anatta* — on the other hand — is the correct *saññā* that, (i) this world of 31 realms cannot offer any “essence” or “true happiness” and, (ii) therefore, one who is struggling to find such “ultimate truth in this world” is helpless.
- This is why a qualified person explaining Dhamma must have the *paṭisambhidā ñāṇa* to at least some extent, in order to figure out the correct meaning of key in the *suttā*. We discussed another important example in last week’s post: “[Sakkāya Ditthi is Personality \(Me\) View?](#).”
- One cannot just consult a Pāli dictionary and use the meaning given there; see, “[Sutta – Introduction](#)” and “[Pāli Dictionaries – Are They Reliable?](#).”
- Of course, that seems to be the origin of the incorrect translation of *anatta* as “no-self”, i.e., choosing the wrong (conventional) meaning of “*attā*” (with a long “a” at the end).

C. What About Athma/Anathma?

14. The final piece of this puzzle are the words *ātma/anātma*. These are Sanskrit words and NOT Pāli words. Pronunciation:

[WebLink: Pronunciation - athma and anathma](#)

- The confusion came when people started translating *atta/anatta* as *ātma/anātma* in both Sanskrit and Sinhala (many Sanskrit words have been adopted as Sinhala words, which is unfortunate because that makes things more confusing).
- In Sinhala they are written as “අත්ම” and “අනත්ම.”
- In Sanskrit *ātma* basically means “soul”, an indestructible entity that survives death and eventually merges with the “*Mahā Brahma*” equivalent of the “Creator God” in Abrahamic religions. **This is different from both Pāli words of *atta* and *attā* that we discussed above.**
- *Atta/anatta* are deep concepts with several underlying concepts. One meaning of *anatta* is that there is no unchanging soul/*ātma*. Therefore, *anatta* INCLUDES the concepts of *anātma* (the opposite of *ātma*); see, “[Anattā in Anattalakkahana Sutta – No Soul or an Ātma.](#)”

The connection between *dasa akusala* and *anatta* is discussed at, “[Dasa Akusala and Anatta – The Critical Link.](#)” That will complete this discussion, and will help to cultivating the “*anatta saññā*.”

3.3.4.5 Anattā (Mundane Interpretation) – No “Unchanging Self”

December 5, 2018

1. These days, most people translate the key Pāli word “*anatta*” simply as “no-self.” However, just by looking at a few occurrences of “*anatta*” in the *Tipiṭaka*, we can see that it needs to be interpreted in different ways, depending on the context.

- The words “*attha*,” “*atta*,” and “*attā*” can have many different meanings depending on the context.
- Even in English, there are cases like this: The word “right” means two different things in “you are right” and “turn right.” Even though it is pronounced the same way, “write” means something entirely different from both those meanings of “right.”

2. Even though this a bit deep *sutta*, [WebLink: suttacentral: Ānanda Sutta \(SN 44.10\)](#), provides an excellent basis to start a discussion on *anatta*. Just as now, many people in the days of the Buddha wondered whether a “self” or a “soul” (*attā*) exists. That is, of course, the ordinary meaning of *attā*.

- Vacchagotta comes to the Buddha asked “*kiṃ nu kho, bho gotama, atthattā*” ti?” OR “Master Gotama, is it correct to say that there is a “self”?”
- **Note that “*atthattā*” is “*atthi attā*” where “*atthi*” means “exists” and (as Vacchagotta meant in this case) “*attā*” to be “self.”** Thus, by saying “*atthattā*” Vacchagotta meant: “correct to say an *attā* exists.”

3. The Buddha remained silent, and Vacchagotta asked the question again in the negative form. The second time, he asked: “*Kiṃ pana, bho gotama, natthattā*” ti?” or, “Master Gotama, is it **not** correct to say that there is a “self”?” Seeing that the Buddha is refusing to answer his question, Vacchagotta got up and left.

- **Note that “*natthattā*” is made up of three words: “*na atthi attā*” which negates “*atthattā*.”**
- I have discussed some of these word combinations in Pāli: “[Kāmaccandha and Icca – Being Blinded by Cravings.](#)”

4. When Vacchagotta left, Ven. Ānanda asked why the Buddha did not answer the question.

- The Buddha explained that if he answered in positive (i.e., there is a “self”), then he would agree with those who had the wrong view that such a “self” exists. This view is called *sassatavāda* or the belief that there is an “everlasting entity” (these days also called “a soul”). [*sassatavāda* :[m.] eternalism.]
- If answered in the negative (i.e., there is “no-self”), then he would agree with those who had the wrong view that such a “self” does not exist. That is called *ucchedavāda* or the belief that the death of the body is the “end of a person,” i.e., no re-birth. [*ucchedavādī* :[m.] one who professes the doctrine of annihilation.]
- The Buddha rejected both views of “self” (*sassatavāda*) and “no-self” (*ucchedavāda*).

5. Just from that verse, it is clear that if one takes “*anatta*” as “no-self,” then one has the wrong view taken by one faction of *brahmins* in the days of the Buddha: that of *ucchedavāda*.

- I was surprised to that the Sutta Central English translation says precisely what I explained in the #4 above; see, “[WebLink: suttacentral: Ānanda Is There a Self? \(SN 44.10\).](#)” **Directly quoting from that translation:**
- “If, Ānanda, when I was asked by the wanderer Vacchagotta, ‘Is there a self?’ I had answered, ‘There is a self,’ this would have been siding with those ascetics and brahmins who are eternalists. And if, when I was asked by him, ‘Is there no self?’ I had answered, ‘There is no self,’ this would have been siding with those ascetics and brahmins who are annihilationists.”
- So, the translation of this verse is the same as mine. But the Sutta Central translation of the next verse uses the same meaning of “no-self” in ‘*sabbe dhammā anattā*’ and gets into a contradiction, as we discuss now.

6. Then the Buddha told Ven. Ānanda that any discussion on this topic would confuse Vacchagotta because he would then get mixed up with the deeper meaning of “*anatta*” in ‘*sabbe dhammā anattā*.’ That refers to “*anatta* nature”: “*Ahañcānanda, vacchagottassa paribbājakassa ‘atthattā’ ti puṭṭho samāno ‘atthattā’ ti byākareyyaṃ, api nu me taṃ, ānanda, anulomaṃ abhaviṣṣa nāṇassa uppādāya: ‘sabbe dhammā anattā’ ti?*” “*No hetam, bhante.*” [See [What are Dhamma? – A Deeper Analysis](#) and [What are rūpa? – Dhamma are rūpa too!](#)]

- That is the confusion most people have today. They equate “*anatta* nature” in “*sabbe dhammā anattā*” with the “no-self” meaning of “*anattā*.”
- “*Sabbe dhammā anattā*” needs to be translated as “all *dhammā* are of *anatta* nature,” i.e., of “without essence”, and that one would become “*anattā*” or “without refuge” if one does not comprehend the “*anatta* nature.”

7. In the Sutta Central translation, the same mundane meaning (“no self”) is used for *anatta* in “*sabbe dhammā anattā*.”

- The verse in #6 is translated in the Sutta Central translation is: “If, Ānanda, when I was asked by the wanderer Vacchagotta, ‘Is there a self?’ I had answered, ‘There is a self,’ would this have been consistent on my part with the arising of the knowledge that ‘all phenomena are nonself?’.”
- **First of all, the statement “all phenomena are non-self,” does not make any sense.** *Dhammā* cannot have a “self” anyway. Here, the correct translation is something like, “all phenomena are of no real essence.” We will discuss this in detail later.
- **Furthermore, that translation, “all phenomena are non-self,” is self-contradictory to the Sutta Central translation of previous verses in #5 above, where both “self” and “no-self” were shown to be rejected by the Buddha.**

8. That is the danger in translating *suttā* word-by-word, without grasping the real meanings of Pāli words and without understanding that meanings depend on the context.

- Therefore, it should be quite clear that Vacchagotta’s confusion is not different from the misunderstanding that many people have today.
- However, Vacchagotta was able to grasp that distinction later on and became a *bhikkhu*. Ven. Vacchagotta became an *Arahant*.
- I sincerely hope those who have the wrong understanding today will also be able to see the truth at some point.

9. The deeper meaning of “*anatta*” will become clear as we discuss this in detail in the future after the discussion of the essential material. Without understanding those more basic concepts, it is dangerous to just translate a given key Pāli word like *anatta* using a generic English word(s).

- For now, we will postpone the discussion on the deeper meaning of “*anatta*” and just focus on “*attā*” and “*anattā*” in the sense of “self” and “no-self.”

10. A given living being can be born in any of the 31 realms (actually a few realms are reserved for *Anāgāmis*); see, “[31 Realms of Existence](#)” and “[31 Realms Associated with the Earth](#).”

- **But the point is that a human could be born a *deva* or an animal in the next life. Would a dog have the same “self” as a human?**
- So, it is quite clear that there is no “unchanging self.”

11. On the other hand, a human **does not just become** a *deva* or a *brahma* or an animal or a *preta* in the next life **without underlying causes. It is not a random process.**

- There is a continuation of the “life-stream” from this life to the next. One’s *gati*, and one’s *kamma vipāka* play key roles. I have discussed the critical and forgotten key word *gati* (or *gathi*) in many posts.
- **That is why it is not correct to say that there is “no-self.” There are “personality attributes” that flow from this life to the next.**
- That is explained in *Paṭicca Samuppāda* (PS) or Dependent Origination. As we know, PS cycles start with “*avijjā paccayā saṅkhāra*” and go through “*bhava paccayā jāti*.” That explains how *avijjā* leads to future births (*jāti*).
- Roughly speaking, high levels of *avijjā* (or *moha*) leads to births in the *apāyā*.

12. Therefore, from #10 and #11, we can see why the Buddha rejected both views of “an unchanging self” and “no-self.”

- Instead, there is a next life (birth) according to the principle of *Paṭicca Samuppāda*, which is cause and effect, just like in modern science. We will discuss PS later. However, it is easy to see this with just an understanding of *kamma* and *kamma vipāka*.

- *Dasa akusala* (and *pāpa kamma* or immoral deeds) lead to bad births, and *dasa kusala* (and *puñña kamma* or moral deeds) lead to good births.
- This was discussed in: "[Kusala and Akusala Kamma, Puñña and Pāpa Kamma.](#)"

3.3.5 Anatta and Dukkha – True Meanings

What really matters in the end is one comprehends, not words. The way different people interpret “no-self” could be different, even though the concept of a “self” is very clear.

- If *anatta* means “no-self”, then there is nothing that can distinguish person A from person B. So, if A takes something belongs to B, he can say, “there is no “me” and there is no “you”; what is wrong in me using “your” stuff?.” If B believes in “no-self” can he argue with A?
- Similarly, there are many other contradictions: If there is “no-self”, (i) who attains Nibbāna?, (ii) who does moral or immoral acts?, etc.
- Instead one needs to comprehend that “one is really helpless in this rebirth process” or “one is not in control over the long run”; that is the concept of *anatta*, as we discuss below.

1. Let us look at the two words the Buddha used: “*āthma*” and “*anāthma*.” In the *Brahmajala sutta*, the Buddha definitely said both those are not correct. The best translation of those two terms to present day, I believe, are “soul” and “no-soul”:

- “Soul” in the sense of an unchanging entity; for example, most religions believe one’s soul goes to hell or heaven and then that “soul” is forever in that state.
- “No-soul” in the sense interpreted by a materialist, i.e., “a person” is just the body (with thoughts arising from the material brain), and when one dies that is end of story; nothing survives physical death.
- Those were the two extremes rejected by the Buddha as “*athma*” and “*anathma*.”

2. The real confusion arose when the Pāli word “*anatta*” was translated to Sanskrit as “*anathma*.” Subsequently, the Sanskrit word “*anathma*” was translated to English as “no-self.” This was done at the same time when “*athma*” was translated as “soul.”

3. The real question is when one says, “there is “no-self””, does one imply that there is no “soul”, i.e., no “*athma*”? There are two possibilities. Let us look at them carefully:

- If one means by “no-self” that when one dies that is the end of story, i.e., there is no rebirth process, then this is same as “no-soul.”
- Or, it is possible that some people may have the idea of a “changing personality” rather than the above materialistic view of nothing surviving the death, i.e., one believes that a human can be reborn an animal. Then one has the right concept of “no-self” or what I call a “ever-changing personality.”
- One needs to contemplate on this and clearly distinguish between the two possible interpretations.

4. But I have seen many people just use the phrase “no-self” in the wrong way.

- Some say, ‘The Buddha told us that there is “no-self.” So, what is the point of going through learning Dhamma etc., because there is no “me.”’
- Others say, ‘Even if I die and get reborn as an animal, it will be not “me”, because there is “no-self.”’
- They are both wrong by talking about a “no-soul.” What I ask them is, “If there is no “me”, would it be OK if someone hits you hard with a stick or worse?.” Then of course they realize that there is a “me.” **That is the “me” who learns Dhamma or who could be reborn an animal.**

5. We can take a simple simile to get an idea of these two extremes of “soul” and “no-soul.” We have all seen shapes and colors created by water fountains.

- We all know those structures created by water are not real. But we cannot say they do not exist.

- In the same way, since we cannot say that a person does not exist. However, there is nothing that exists permanently, it is just transitory. Thus both “self” and “no-self” are wrong perceptions.
- Just like we can create different shapes and figures using that water fountain, we all go through various lifeforms in the rebirth process.
- However, the suffering (or the intermittent happiness) is real.

6. This is a deep concept. We cannot deny that we have the inner perception (*saññā*) of a “me” (unless one is an *Arahant*). That is also THE reason that we go through this rebirth process. But that *saññā* CANNOT be gotten rid by forcing the mind to accept that there is no “me.” THAT DOES NOT WORK. When one starts learning the true nature of the world by understanding the real meanings of *anicca*, *dukkha*, *anatta*, the mind gradually realizes that there is no real “me”, but just an ever-changing “lifestream.”

- Thus one could meditate for thousand years muttering to oneself, “it is *anāthma*” or “there is no-self”, or anything equivalent with the meaning “there is no “me””, and would not get anywhere close to the *Sotāpanna* stage or even any *nirāmisa sukha*, because deep inside one does not really believe in that.
- Instead one needs to comprehend that “there is nothing fruitful to be had in this world in the long run”, or “one is really helpless in this rebirth process”; that is the concept of *anatta*.
- Another word for *anatta* is “*anātha*” (this is the Sinhala word), which means “utterly helpless.” That is the status of a human being who is unaware of the perils of the rebirth process. The opposite is “*nātha*,” which is actually also used in Pāli to refer to the Buddha (as in one becomes “*nātha*” when one embraces the message of the Buddha).

7. In other words, “there is a ‘me’ as long as one craves for things in this world.” Denying that perception is not the solution. One craves for things in this world because one believes there is happiness to be had by seeking “things” in this world. That tendency to seek things will not reduce until one understands that it is fruitless to strive for such things in the long term; even though one may not know it, one is truly helpless. And that is a real meaning of *anatta*.

- But that cannot be grasped just by reading about it. One needs to contemplate (meditate) using real examples from one’s life. One will know that one is starting to get the concept when one starts realizing that one’s cravings for things in this world is gradually waning.

Why Dukkha is not Merely Suffering?

1. There is confusion about what the Buddha said about suffering because most cannot distinguish between *dukha* and *dukkha*. But the Pāli word for suffering is *dukha*. *Dukkha* (*dukha+khya*) means there is hidden suffering AND that suffering can be eliminated (*khya* is removal); see, “[What is San? – Meaning of Samsāra \(or Samsāra\)](#).”

- And *dukkha sacca* (the first Noble Truth) is the knowledge on seeing that those things we value as “sense pleasures” are in fact the CAUSE of this “hidden suffering.”

2. *Dukha* is a *vedanā* (feeling). Anyone, and even animals feel *dukha*. No one has to convince anyone there is *dukha* in this world. If anyone can attain *Nibbāna* by realizing *dukha* in this world, then animals would attain *Nibbāna* first, because they know *dukha* very well.

- However, *dukkha* (or the *dukkha sacca*) is the First Noble Truth. It says there is “hidden suffering” behind all this apparent happiness or the illusion of a future happiness that can be achieved by “working hard.”
- *Dukkha Sacca* is comprehended not by contemplating on suffering, but contemplating on the causes for suffering, i.e., the immoral things we tend to do because of the lack of understanding of *anicca*, *dukkha*, *anatta*.
- In order to comprehend *dukkha*, one needs to understand the wider world view of the Buddha and see that most suffering will be in future rebirths unless one attains at least the *Sotāpanna* stage of *Nibbāna*.

- That is why it takes a lot of time and effort to gain wisdom (*paññā*) and truly start on the Path. Since our senses cannot sense other realms, including the suffering-filled lowest 4 realms (except the animal realm), it is not a trivial matter to understand and truly believe the message of the Buddha.
3. This wrong conception has also led to the popularity of “breath meditation” (the incorrect *ānāpāna* meditation) as a way to remove “suffering.”
- It is true that one could get “temporary relief” and even *jhānic* experiences using the breath meditation. But that does not solve the problem of “long-term *sansāric* suffering” emphasized by the Buddha.
 - When one cultivates the true “*ānāpāna* meditation” (see, “[7. What is Ānāpāna?](#)”), one can achieve temporary relief AND work towards “long-term happiness” of *Nibbāna*.
4. Most people have the perception that Buddha Dhamma is pessimistic, because it emphasizes suffering. Actually, it is quite the opposite.
- The Buddha was just the messenger of the bad news. He DISCOVERED the true nature of this world: No matter where we are reborn within the 31 realms, we will not find happiness and in the LONG RUN, suffering prevails; see, “[The Four Stages in Attaining Nibbāna.](#)”
 - A world which is based on constant change, or more correctly constant disorder, (impermanence) is inherently incapable of providing stability (thus *anicca* is not impermanence, but *anicca* arises out of impermanence); see, “[Second Law of Thermodynamics is Part of Anicca!](#).”
 - Yet, we have the PERCEPTION that we can somehow “beat the system” and find happiness. That is the wrong perception of *nicca*. Once we truly realize *dukkha*, we will see that anything in this world has the *anicca* nature; nothing in this world can provide long-lasting happiness in the long term.
5. The Buddha not only discovered that “this world” cannot provide us with stable and lasting happiness. He also found the way to get out of this inherently unstable, and thus unsatisfactory nature of existence. This is the Noble Eightfold Path.
6. **Thus it is important to realize that *dukkha* has embedded in it the only optimistic message anyone can deliver: That we can overcome this inevitable suffering.**
- **When one truly realizes the true nature of “this world”, one voluntarily gives up struggling in vain to achieve the impossible, and that automatically leads to a state of happiness in one’s mind even before the *Sotāpanna* stage.**
 - **This particular happiness, *nirāmisa sukha*, is different from the sense pleasures and one can experience it more and more as one follows the Path, and culminates in *Arahantship* or unconditioned happiness; see, “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#).” One can experience this *nirāmisa sukha* all the way up to its peak at *Nibbāna* during this very life.**
7. Another important thing to realize is that there are only two ways that anyone’s destiny works out:
- One waits until one gets really old to EXPERIENCE the suffering even in this life itself. It does not matter how much money one has: One will NOT be able to enjoy the sensual pleasures as one used to in the younger ages: all sense faculties degrade including culinary pleasures, visual, auditory, sex, etc. And if one gets a major illness it will be worse. The absolutely worse thing is that by that time it will be too late, because even the mind starts to degrade (it is actually the brain that degrades), and one will not be able to make any spiritual progress.
 - The other and the ONLY reasonable option is to develop insight NOW. The Buddha had revealed the true nature of “this world” of 31 realms. At least one should examine the big picture laid out by the Buddha to see whether that picture makes sense, and if it does to work towards getting out of “this world.”
 - People commit suicide thinking that it will end the suffering. It does not. The only way to stop suffering is to stop rebirth. There is nowhere to be found in the 31 realms that will end the suffering. One may find

relatively long periods of happiness in the higher realms, but in the *sansāric* time scale that will only be a blip; see, “[Sansāric Time Scale](#)” and “[Infinity – How Big Is It?](#)”

- And one can test the path prescribed by the Buddha. As one experiences the *nirāmisa sukha* by removing greed, hate, and ignorance, one can start feeling the “cooling down”, the early stages of *Nibbāna*; see, “[How to Taste Nibbāna](#).” This will accentuate one’s liking of Dhamma (*chanda*), enhance one’s determination (*citta*) and effort (*virīya*) to seek insight (*vīmaṃsā*); see, “[The Four Bases of Mental Power \(Satara Iddhipāda\)](#).”

Next, “[Anicca – Repeated Arising/Destruction](#)”,

3.3.6 Anicca, Dukkha, Anatta – According to Some Key Suttas

Revised: January 20, 2016; December 3, 2017; January 26, 2018; July 2, 2020

The key to understanding the First Noble Truth (*Dukkha Sacca*; pronounced “dukkha sachcha”) is to understand the Three Characteristics or *Tilakkhaṇa* of “this wider world of 31 realms”, i.e., *anicca*, *dukkha*, *anatta*. Let us discuss a few key *suttā*.

***Dhamma Cakka Pavattana Sutta* (SN 56.11)**

1. How suffering arises from *anicca* is explicitly described in the very first *sutta*, [WebLink: suttacentral: Dhamma Cakka Pavattana Sutta \(SN 56.11\)](#). Here is the text from the *sutta*:

Idam kho pana, bhikkhave, dukkham ariyasaccam:

jātipi dukkhā, jarāpi dukkhā, byādhipi dukkho, maraṇampi dukkhāṃ, appiyehi sampayogo dukkho, piyehi vippayogo dukkho, yampicchaṃ na labhati tampi dukkhāṃ—saṃkhittena pañcupādānakkhandhā dukkhā.

2. *Bhikkhus*, What is the Noble Truth of Suffering?

- “*jātipi dukkhā*” means “birth causes suffering” (all births end up in suffering and death.) “*Jarā pi dukkhā*” means, “decay of something that is liked causes suffering.” And “*marañam pi dukkhā*” means, “Death of a liked causes suffering.”
- Then comes, “*..appiyehi sampayogo dukkho, piyehi vippayogo dukkho*” meaning, “it brings sorrow when a loved one has to depart, and it also brings sorrow to be with a hated person.”

3. And then the summary of all that: “*yamp’icchaṃ (yam pi icchaṃ) na labhati tam’pi dukkham.*” Here we see, “*iccha*” that we encountered in both *anicca*, *dukkha*, *anatta* and also in *Paṭicca Samuppāda* (“*pati+iccha*” “*sama+uppada*”). And “*labhati*” means “get.”

- Thus, “**If one does not get what one likes, that leads to suffering.**” This phrase has everything condensed. That is *anicca*. It does not say suffering arises because of impermanence.
- For detail, see, “[Does the First Noble Truth Describe only Suffering?](#)”
- Note that *icca* and *iccha* (ඉච්ච and ඉච්ච in Sinhala) are used interchangeably in the *Tipiṭaka* under different *suttā*, as you can see below. The word “*iccha*” with the emphasis on the last syllable indicates “strong *icca*” or “strong attachment.”
- For correct pronunciations see, “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1.](#)”

Anatta Lakkhana Sutta

4. The Buddha delivered [WebLink: suttacentral: Anatta Lakkhana Sutta \(SN 22.59\)](#) to the five ascetics within a fortnight of the first *sutta*. The following are some questions that the Buddha asked the ascetics.

“*Taṃ kiṃ maññatha, bhikkhave, rūpaṃ niccaṃ vā aniccaṃ vā*”ti?

- “*Aniccaṃ, Bhante.*”

“*Yaṃ paṇāniccaṃ dukkhaṃ vā taṃ sukhaṃ vā*”ti?

- “*Dukkhaṃ, Bhante.*”

“*Yaṃ paṇāniccaṃ dukkhaṃ vipariṇāmadhammaṃ, kallaṃ nu taṃ samanupassitum: ‘etaṃ mama, esohamasmi, eso me attā*”ti?

- “*No hetam, Bhante.*”

5. The first question was, “*Bhikkhus: is any rūpa nicca or anicca?*” or “*Bhikkhus: can any rūpa (material entity) be kept to one’s satisfaction or it cannot be kept to one’s satisfaction?*”

And the *bhikkhus* answer: “It cannot be kept to one’s satisfaction, Venerable Sir.”

- Here it is to be noted that “*rūpa*” can be either internal or external. There are many *rūpa* in this world that are “permanent,” at least compared to our lifetimes. For example, an item made of gold or a diamond can last millions of years. But neither can be kept to “our satisfaction” since we will have to give them up when we die.

6. The second question is: “Will such an entity lead to suffering or happiness?” And the *bhikkhus* answer: “Suffering, Venerable Sir.”

- Here it is essential to see that if an entity is not permanent, whether that will lead to suffering: How many people suffered when Bin Laden got killed? Only those who liked him to live! Many people rejoiced in his demise. See details in “[Does the First Noble Truth Describe only Suffering?](#).”
- The third question is: “Will such an entity that cannot be kept to one’s satisfaction, that leads to suffering, and is a *vipariṇāma dhamma*, should be considered as “myself or mine, or has any **substance**?” And the *bhikkhus* answer: “No reason to think so, Venerable Sir.”

Then the Buddha explained that those characteristics of *anicca*, *dukkha*, *anatta* also hold for *vedanā*, *saññā*, *saṅkhārā*, *viññāṇa*.

Anicca, Dukkha, Anatta Are Related and Universal

7. Here we need to pay attention to the sequence of the three questions. The Buddha was pointing out that no “*rūpa*” can be kept to our satisfaction. **Forming attachment to such *rūpa* will lead to suffering.** Therefore, there is no reason to consider them having any substance. ***Anicca* leads to *dukkhā* and *anatta* because we have *nicca saññā* about such (*anicca*) *rūpa*.**

- Of course, the same holds for *vedanā*, *saññā*, *saṅkhārā*, *viññāṇa*.
- This relationship among *anicca*, *dukkha*, *anatta* was pointed out as “*Yad aniccaṃ taṃ dukkhaṃ, yaṃ dukkhaṃ tad anattā.*” in the [WebLink: suttacentral: Ajjhattānicca Sutta \(SN 35.1\)](#) in the *Samyutta Nikāya*. See, “*Anicca, dukkhā, Anattā – Wrong Interpretations*”.
- Therefore, *anicca*, *dukkha*, *anatta* are UNIVERSAL characteristics applicable to anything in this world.

Impermanence Does Not Always Lead to Suffering

8. It is essential to realize that the Buddha was not referring to just one’s body. *Anicca* applies to all *saṅkhāra* and *sankata*. Nothing in this world can be kept to our satisfaction: “*Sabbē saṅkhārā aniccā*”. By the way, it is superfluous to say, “all *saṅkhāra* are impermanent.” Of course, all *saṅkhāra* arise and fall. How can *saṅkhāra* be permanent anyway?

- Furthermore, “impermanence” does not ALWAYS lead to suffering. When Osama bin Laden died, most people were happy.
- However, bin Laden’s death caused suffering to his followers. In both cases, the statement, “if something cannot be maintained to one’s satisfaction, that causes suffering” holds. **The death of bin Laden caused suffering only to his followers.**
- If we have a headache/injury/disease, and if it became permanent, would we not suffer? It is a good thing that those conditions are impermanent so that we can get rid of them with medical treatment.

9. We strive to accumulate “good stuff,” but will have to leave them all behind at death. When we go through the rebirth process, we just repeat this process in each life.

- In most rebirths, the suffering is great, and in some, there is happiness (human, *Deva*, and *Brahma* realms.) But such “good rebirths” are encountered very rarely. The Buddha said that the lowest four realms are the “home base” for the living beings; they may visit other realms once-in-a-while, but always have to come back and spend the most time in the home base.
- That is why the Buddha said this never-ending process of the cycle of rebirths, where we suffer so much, is fruitless and one is truly helpless. That is *anattā*.
- It does not make sense to say because of *anicca* and *dukkha*, we have “no-self” or “no-soul.” Instead, as long as we have the wrong perception of *anicca* about anything in “this world”, we are subject to suffering, and thus we are truly helpless, *anattā*.

Girimananda Sutta

10. [WebLink: suttacentral: Girimananda Sutta \(AN 10.60\)](#) is another key *sutta* in the *Tipiṭaka* that describes *anicca* in the most profound sense. The Buddha delivered this *sutta* to Ven. Ānanda (for him to recite to Ven. Girimananda, an *Arahant*, who was in pain due to an ailment). Here is a key phrase (in the middle of the *sutta*):

*Katamā cānanda (ca Ānanda), sabbasaṅkhāresu **aniccha** saññā?*

*Idhānanda (Idha Ānanda) bhikkhu sabbasaṅkhāresu **aṭṭiyati harāyati jigucchati.***

*Ayaṃ vuccatānanda (vuccati Ānanda), sabbasaṅkhāresu **aniccha** saññā.*

Translated:

“Ānanda, What is the (correct) perception of all *saṅkhāra*?

Ānanda, all *saṅkhāra* are like meatless bones, without substance, to be rejected like urine and feces.

That is Ānanda, how one should perceive all *saṅkhāra*.”

11. Here the Buddha is describing the characteristics of all *saṅkhāra* (“*sabba*” is “all”).

- “*Aṭṭi*” is “bone.” A dog really enjoys chewing a bone. But a bone has no nutrition or taste. Most of the time, the dog’s gum starts bleeding and that is what it tastes. But the dog does not realize that and values a bone very highly.
- “*Hara*” is “substance”, and “*harāyati*” is without substance.
- Furthermore, “*Ji*” and “*gu*” (pronounced “jee” and “goo”) are the Pāli and Sinhala words for “urine” and “feces.” As we already know, “*icca*” (Pronounced “ichcha”) means “like.” Thus “*jigucchati*” (pronounced “jiguchchathi” means “it is no different than liking urine or feces.” Note that “*jigucchati*” is “*ji*” + “*gu*” + “*icchati*” means “a liking for urine and feces.”
- All (*abhi*)*saṅkhāra* should be avoided (but this applies only at the *Arahant* stage).

12. Another critical point here is to note that the Buddha was talking about the “*anicca saññā*,” where *saññā* or perception is one of the main mental factors or *cetasika*. *Anicca* is a **perception** in our minds as we pointed out in the discussion on the *Anatta Lakkhana Sutta* above.

- Impermanence is a physical reality of anything in the universe. Scientists know quite well that **nothing** in our universe, including the universe is permanent. But that does not provide them with the perception of *anicca*. No scientist can attain *Nibbāna* via comprehending impermanence.

***Anicca* Does Not Mean Impermanence**

13. Thus it is quite clear that *anicca* has nothing to do with “impermanence.” The Pāli words for impermanence are *aniyata* and *addhva*. Once one understands the true nature of the world, one will realize that any *saṅkhāra* (thought, speech, and action that is focused on attaining pleasurable things) is not to be valued. None can be maintained to one’s satisfaction and will only lead to suffering at the end.

- The fruitlessness of ALL *saṅkhāra* is perceived only at the *Arahant* stage. We cannot even beginning to comprehend that yet. That is why an *Arahant* is said to see the burden associated with even breathing (which is a *kaya saṅkhāra*). Anything we do to live in this world is a *saṅkhāra*.
- **Initially, we should try to comprehend the unsuitability of *apuññabhi abhisāṅkhāra*, those associated with immoral actions. Since we can grasp the consequences of such immoral actions, we CAN get our minds to reject them. This is enough to get to the *Sotāpanna* stage.**
- Once we do that, our cleansed minds can begin to see the fruitlessness of *puññabhi abhisāṅkhāra*, and then even the pleasures of *arūpāvacara jhānic* states (*āneñjābhi abhisāṅkhāra*).

Icca Sutta (Saṃyutta Nikāya)

14. The “[WebLink: Suttacentral: Icca Sutta \(SN 1.69\)](#)” clearly describes what “*icca*” (and thus what *anicca*) is:

“*Kenassu bajjhatī loko, kissa vinayāya muccati;
Kissassu vippahānena, sabbaṃ chindati bandhanan*”*ti.*

“*Ichhāya bajjhatī loko, icchā vinayāya muccati;
Ichhāya vippahānena, sabbaṃ chindati bandhanan*”*ti.*

Translated:

“What binds the world together? How does one get released? How can one gain release?”

The world is bound by *iccha*, one becomes free by losing *iccha*, one becomes free of all bonds by losing *iccha*“

The word “*icca*” means “liking” and is closely related to “*nicca*.” Of course “*nicca*” means the perception that one can maintain those things to one’s satisfaction (and “*anicca*” means the opposite: “*na + icca*”). The perception of *nicca* leads to *icca*, i.e., one believes that worldly things can provide everlasting happiness and thus one likes to hold on to them. Just like an octopus grabs things with all its eight legs and will not let go, humans (and other beings too) grab onto worldly things with the hope of enjoying them.

- Note that in this *sutta*, the word “*iccha*” is used instead of “*icca*” to emphasize that “**strong attachment**” as in the *Dhamma Cakka Pavattana Sutta* discussed above.

The Key Problem with *Sutta* Interpretations

15. There are many, many *suttā* in the *Tipiṭaka* that describe *anicca*, *dukkha*, *anatta*. But if one starts with the wrong interpretations, some of those *suttā* can be interpreted the wrong way. Many *suttā* do not describe the relevant concepts in detail. Instead, a *suttā* provides a brief description or the *niddesa* version.

The commentaries (Sinhala *Atthakathā*) were supposed to give the detailed (*patiniddēsa*) explanations; see, “[Sutta – Introduction](#)”.

- The root cause for the confusion has been the acceptance of the *Visuddhimagga* by Buddhaghosa as THE key commentary by *Theravada* tradition.
- Nowadays, most *bhikkhus* do not read the *Tiṭṭaka* or the remaining three original commentaries that are in the *Tiṭṭaka*. They just follow what is in the *Visuddhimagga*. That has been the single-most obstacle for people attaining *Nibbāna* for the past many hundreds of years.
- Luckily, we have three of the original commentaries (even earlier than the Sinhala *Atthakathā*) preserved in the *Tiṭṭaka*. See, “[Misinterpretations of Buddha Dhamma](#)” and “[Preservation of the Dhamma](#).”

Then there is the following *sutta* which clearly states that the Buddha rejected both “self” and “no-self”, even according to conventional translations.

***Channa Sutta* – Anatta Does Not Mean “No-Self”**

16. The “[WebLink: suttacentral: Channa Sutta \(SN 22.90\)](#)” clearly says *anatta* does not mean “no-self,” even in a “traditional” English translation: “[WebLink: accesstoinsight.org: Channa Sutta: To Channa \(SN 22.90\)](#)”:

“Everything exists”: That is one extreme. “Everything doesn’t exist”: That is a second extreme. Avoiding these two extremes, the *Tathagata* teaches the Dhamma via the middle: From ignorance as a requisite condition come fabrications. From fabrications, consciousness. Similarly, to name-&-form, the six sense faculties, contact, feeling, craving, clinging/sustenance, becoming (*bhava*), and birth. From birth as a requisite condition, then aging & death, sorrow, lamentation, pain, distress, & despair come into play. Such is the origination of this entire mass of stress & suffering.”

- “Everything doesn’t exist” in the above translates to “no-self” when applied to a “living being.” As far as a “person” is concerned, “self” is one extreme, and “no-self” is the other extreme. **Therefore, it wrong to say either “a person exists” or “a person does not exist.”**
- Most *Theravada* websites (including the above sites) and texts today translate “*anatta*” as “no-self.” But, it is clear from their translations (especially of the *Channa Sutta*) that the Buddha rejected this “no-self” view.
- **Whether it is a living being or the whole world, it is not correct to say they “exist” or “do not exist.” Things exist when suitable causes and conditions (per *Paṭicca Samuppāda*) are there.**
- Also, see, “[Atta – Two Very Different Meanings](#).”

Next, “[If Everything is Anicca Should We Just give up Everything?](#)”,

3.3.7 **Tilakkhaṇa – English Discourses**

February 3, 2018; revised February 11, 2020

Tilakkhaṇa or Three Marks of Existence or Three Characteristics of Nature (*anicca, dukkha, anatta*) are discussed in detail in a series of four discourses. These are based on the first two *suttā* (*Dhammacakka Pavattana Sutta* and the *Anatta Lakkhaṇa Sutta*) that the Buddha delivered to the five ascetics right after attaining Enlightenment.

- Only an essential outline is provided in these discourses. There will be five topics (for each discourse) in the the “[discussion forum](#)” under the forum **Three Marks of Existence Discourses**, where one can ask any questions/ express opinions.
- No question is too simple or too hard. We can find more details in other *suttā* or in *Abhidhamma*.

- However, these discourses are not recommended for those who are not familiar with basic concepts in Buddha Dhamma. They might get discouraged. They may want to first get familiar with the basic concepts in "[Moral Living and Fundamentals](#)," "[Working Towards Good Rebirths](#)," and "[Bhāvanā \(Meditation\)](#)" sections.
- In-Depth analysis at, "[Origin of Life](#)."

February 3, 2018

Discourse 1 – Nicca, Sukha, Atta (Before understanding *anicca*, *dukkha*, *anatta*, it is necessary to understand the opposites).

3.3.8.1 Sakkāya Diṭṭhi and Tilakkhaṇa

June 14, 2019; revised October 23, 2019

Sakkāya Diṭṭhi – Wrong Views of a “Self”

1. When one gets rid of *sakkāya diṭṭhi* (together with *vicikicca* and *silabbata parāmāsa*), one becomes a *Sotāpanna* and will never be reborn in the four lowest realms (*apāyā*).

- It is a change in one's world view (*dassanena pahātabbā*) that leads to this enormous change.
- It cannot be attained by just doing moral deeds. (In fact, *silabbata parāmāsa* is the wrong belief that living a righteous life by itself can liberate oneself).
- Getting rid of *sakkāya diṭṭhi* requires a deep understanding of how nature works. *Tilakkhaṇa* or the Three Characteristics of Nature encompasses those basic principles: *anicca, dukkha, anatta*.
- Here we will examine this relationship, which will help get rid of *sakkāya diṭṭhi*.

Definition of *Sakkāya Diṭṭhi*

2. *Sakkāya diṭṭhi* is defined in the *Dhammasaṅgaṇī* of the *Abhidhamma Piṭaka*: [WebLink: suttacentral: 2.3.2.13.1. Dassanapahātabbaduka.](#)

“*Katame dhammā dassanena pahātabbā? Tīṇi saññojanāni—sakkāyadiṭṭhi, vicikicchā, sīlabbataparāmāso.*”

- **Translation:** “What are those *dhamma* that need to be removed via correct vision? Three *saññojanā* (*saṃyojana* as commonly called today) – *sakkāyadiṭṭhi, vicikicchā, sīlabbataparāmāso.*”

Tattha katamā sakkāyadiṭṭhi? Idha assutavā puthujjano ariyānaṃ adassāvī ariyadhammassa akovido ariyadhamme avinīto sappurisānaṃ adassāvī sappurisdhammassa akovido sappurisdhamme avinīto rūpaṃ attato samanupassati, rūpavantaṃ vā attānaṃ, attani vā rūpaṃ, rūpasmim vā attānaṃ. Vedanaṃ ... pe ... saññaṃ ... pe ... saṅkhāre ... pe ... viññānaṃ attato samanupassati, viññānavantaṃ vā attānaṃ, attani vā viññānaṃ, viññānasmim vā attānaṃ. Yā evarūpā diṭṭhi diṭṭhigataṃ ... pe ... vipariyāsaggāho—ayaṃ vuccati sakkāyadiṭṭhi.”

- **Translation:** “What is *sakkāya diṭṭhi*? A person uninstructed in *Dhamma*, who has not associated with Noble ones, who is not well-versed or disciplined, has the following wrong views. ‘**I am my body, my body is me, my body is in me, I am in my body**’. He perceives *vedana...sañña,...saṅkhāra,...viññāna* in the same four ways (e.g., **I am my viññāna, my viññāna is me, my viññāna is in me, I am in my viññāna**) – that is *sakkāya diṭṭhi*.

That is exactly the same definition given in the “[WebLink: suttacentral: Cūlavedalla Sutta \(Majjima Nikāya 44\)](#)” that we discussed in the post, “[Sakkāya Diṭṭhi is Personality \(Me\) View?](#).” This definition of *sakkāya diṭṭhi* is in many more *suttā*, including “[WebLink: suttacentral: Dutiyasidatta Sutta \(SN 41.3\)](#).”

Twenty Types of *Sakkāya Diṭṭhi*

3. The key is to understand the meaning of “*rūpaṃ attato samanupassati, rūpavantaṃ vā attānaṃ, attani vā rūpaṃ, rūpasmim vā attānaṃ, vedanaṃ attato samanupassati.*” Similarly for *vedana, sañña, saṅkhāra*, and *viññāna*. Thus, when one has *sakkāya diṭṭhi*, one has four wrong perceptions each for the five aggregates.

- That is called the **20-types of *sakkāya diṭṭhi*** (*vīsativatthukā sakkāyadiṭṭhi*).
- The first four factors are regarding just one's own body. It turns out that those four wrong perceptions on one's body arise in those who have *uccheda diṭṭhi*, i.e., that one is not reborn after death.
- Then the same four factors are for the four “*nāma*” entities: *vedanā, saññā, saṅkhāra*, and *viññāna*. It turns out that those with wrong perceptions about these have the *sāssata diṭṭhi*, i.e., that one's *attā* (“self” or “soul”) is eternal or forever.

- In the *Brahmajāla Sutta* (DN 1), the Buddha discusses 60 more wrong views, but those are variations of the above two. **Therefore, getting rid of *sakkāya diṭṭhi* leads to the removal of all wrong beliefs about this world.**
- I will first provide the *Tipiṭaka* references for these two cases in the next post.

Sakkāya Is Pañcupādānakkhandhā

4. A definition of ***sakkāya*** is in the “[WebLink: suttacentral: Sakkāyapañhā Sutta \(SN 38.15\)](#)”: “*Sakkāyo, sakkāyo’ti, āvuso sārīputta, vuccati. Katamo nu kho, āvuso, sakkāyo’ti? “Pañcime, āvuso, upādānakkhandhā sakkāyo vutto bhagavatā, seyyathidaṃ—rūpupādānakkhandho, vedanupādānakkhandho, saññupādānakkhandho, sañkhārupādānakkhandho, viññānupādānakkhandho. Ime kho, āvuso, pañcupādānakkhandhā sakkāyo vutto bhagavatā”ti.*”

Translated: “***sakkāya is pañcupādānakkhandhā: rūpupādānakkhandha, vedanupādānakkhandha, saññupādānakkhandha, sañkhārupādānakkhandha, viññānupādānakkhandha.***”

- Therefore, we can deduce that ***sakkāya diṭṭhi*** is the wrong vision that the five aggregates (*pañcakkhandha*) are excellent and beneficial.
 - The word “*sakkāya*” comes from “*sath*” + “*kāya*,” which rhymes as “*sakkāya*.” “*Sath*” means “good” and “*kāya*” means “a collection” or “an aggregate” (it could also mean “physical body,” which is also a collection of parts). Thus “*sakkāya*” means those five aggregates (including one’s own body) are fruitful.
 - Our world consists of 12 types of *kāya* or “collections”: *cakkhu kāya/rūpa kāya, sota kāya/sadda kāya*, etc. for the six sense faculties.
 - That vision or mindset — *sakkāya diṭṭhi* — is what leads to craving for them (*upādāna*).
5. When one has the wrong view of *sakkāya diṭṭhi*, **some parts of *pañcakkhandha* become *pañcupādānakkhandhā* (*pañca upādāna khandha*). Those are the parts that one likes based on one’s *gati*,**

Therefore, one needs to comprehend that one gets attached to things based on one’s *gati* AT THAT TIME. One’s *gati* keep changing and can be very different, especially in one who is reborn. If one is reborn into a bad environment (conditions), one is likely to develop “bad *gati*.”

- Those bad *Kamma* were done with bad *gati* AT THAT TIME. They can bring bad *vipāka* much later, even in future lives, when one maybe living a moral life. The opposite is correct too. One’s good *kamma* in a previous life can bring good *vipāka* even while on lives an immoral life in this life.
- That is why we experience both good and bad *kamma vipāka*.
- This is also why we cannot speak about an “unchanging *attā/soul/ātma*.” A living being is a “lifestream” that just encounter good/bad *vipāka* based on what had been done in the past based on one’s *gati* at that time. Under suitable conditions, both kinds (good/bad *kamma*) bring *vipāka*.

There Are Only Causes and Effects

6. What is discussed in #5 is succinctly stated in the “[WebLink: suttacentral: Catutthaabhabbatthāna Sutta \(AN 6.95\)](#).”

Translation: “A *Sotāpanna* (or one with higher *magga phala*) accomplished in view (*diṭṭhisampanno puggalo*) is **unable (*abhabbo*)** to fall back on the idea that pleasure and pain are made by oneself (*sayaṃkataṃ*). Or that they are made by another (*paraṃkataṃ*). Or that they are made by both (*sayaṃkatañca paraṃkatañca*). Nor can they fall back on the idea that pleasure and pain arise by chance, not made by oneself, by another, or by both. (*Asayaṃkāraṃ adhiccasamuppannaṃ, aparāṅkāraṃ adhiccasamuppannaṃ, asayaṅkārañca aparāṅkārañca adhiccasamuppannaṃ*).

– Why is that? It is because a person accomplished in view has clearly seen that phenomena arise due to causes and conditions (according to *Paṭicca Samuppāda*). Those are the six things that a *Sotāpanna* (or one with higher *magga phala*) accomplished in view will not fall back to.”

- There is no “*attā*” or a “soul” or a “*ātma*” doing those things that will lead to pleasure or pain (sooner or later).
- Those *kamma vipāka* (pleasure or pain) materialize due to two factors. (i) Causes were created in the past based on the “*gati*” of the lifestream AT THAT TIME, and, (ii) Corresponding *vipāka* materialize when suitable CONDITIONS become available (at a later time).
- *Paṭicca Samuppāda* described that process.
- That is why understanding “*gati*” is so important. One may have had “bad *gati*” in the past, and those can bring “bad *vipāka*” now EVEN IF one has “good *gati*” now.
- That is why even the Buddha had to bear bad *kamma vipāka*. Even though he had “no *gati* left,” he had to endure the results of past *kamma* done when he had “bad *gati*.”

Deeper Aspects of *Sakkāya Diṭṭhi*

7. In the “[WebLink: suttacentral: Sakkāyaditthi Sutta \(SN 22.155\)](#)” it is stated how *sakkāya diṭṭhi* arises:

“*Kismiṃ nu kho, bhikkhave, sati, kiṃ upādāya, kiṃ abhinivissa sakkāyaditthi uppajjati*”*ti?* “*rūpe kho, bhikkhave, sati, rūpaṃ upādāya, rūpaṃ abhinivissa sakkāyaditthi uppajjati. Vedanāya sati ... saññāya sati ... saṅkhāresu sati ... viññāṇe sati, viññāṇaṃ upādāya, viññāṇaṃ abhinivissa sakkāyaditthi uppajjati.*”

Translated: “*Bhikkhus, because of focusing on what, attaching to what, and clinging to what leads to the arising of sakkāya diṭṭhi?* It arises due to focusing on *rūpa* (forms: things and people), attaching to forms, and clinging to forms. It arises similarly due to *vedanā, saññā, saṅkhāra, and viññāṇa.*”

Buddha explains: “*Taṃ kiṃ maññatha, bhikkhave, rūpaṃ niccaṃ vā aniccaṃ vā*” *ti?* “What do you think *Bhikkhus*, can *rūpa* be maintained to one’s satisfaction?”

“*Aniccaṃ, bhante.*” “They cannot be, *bhante.*”

“*Yaṃ paṇāniccaṃ ... pe ... api nu taṃ anupādāya sakkāyaditthi uppajjeyyā*”*ti?* “Understanding that if something cannot be maintained to ones’ satisfaction, if it undergoes unpredictable change and is destroyed, would one get attached to it and generate *sakkāya diṭṭhi*?”

“*No hetam, bhante.*” “No reason for that, *bhante.*”

and the same for the other four aggregates: “*Vedanā ... saññā ... saṅkhārā ... viññāṇaṃ niccaṃ vā aniccaṃ vā*”*ti?*

“*Aniccaṃ, bhante.*” “*Yaṃ paṇāniccaṃ ... pe ... api nu taṃ anupādāya sakkāyaditthi uppajjeyyā*”*ti?* “*No hetam, bhante.*” “*Evam passam ... pe ... nāparam itthattāyāti pajānātī*”*ti.*”

8. Thus, one gets attached to the five aggregates and considers them to be one’s own, only if one does not see the *anicca* (and *dukkha* and *anatta*) nature of those entities. When one understands that such attachments invariably (without exception) lead to suffering (because none of them can be maintained to one’s satisfaction), one loses the craving for them.

- That understanding by itself first leads to “loss of craving” to the extent that **one would NOT be able** (*abhabbo*) do immoral *kamma* that makes one suitable for rebirth in the *apāyā*. When one loses such *upādāna*, one would also not grasp such thoughts at the *cuti-paṭisandhi* moment.
- This word *abhabbo* is commonly mistranslated. It does not just mean “one would not do,” but one “is incapable of doing.” The enforcement is AUTOMATIC; one does not need to think about whether such

an action is immoral. When certain types of *gati* are removed PERMANENTLY (with *magga phala*), one's mind WOULD NOT be CAPABLE of doing such sinful actions.

- When one cultivates such “bad *gati*,” one would *upādāna* (and be born) to bad births; that is what is meant by “needing suitable conditions to bring *kamma vipāka*,” In the “[WebLink: suttacentral: Kukkuravatika Sutta \(MN 57\)](#)” (English translation there: “[WebLink: suttacentral: The Dog-Duty Ascetic \(MN 57\)](#)”), the Buddha explains how those “dog *gati*” that Seniya was cultivating would lead to him to be born a dog.
- On the reverse, when one gets rid of such “bad *gati*” permanently, one would NOT be born in such unfortunate realms. That is what is meant by the verse, “*Catūhapāyehi ca vipparamutto, Chaccābhiñhānāni abhabba kātuṇṇi*” (“(an *Ariya*) is free from the four *apāyā* because he/she is incapable of doing six highly immoral acts”) in the “[WebLink: suttacentral: Ratana Sutta \(Snp 2.1\)](#).”

What is *Attā*?

9. Now, it is important to figure out what is meant by “*attā*” in the description of *sakkāya diṭṭhi*.

The “[WebLink: suttacentral: Paṭipadā Sutta \(SN 22.44\)](#)” describes the way to get rid of *sakkāya diṭṭhi*: “*Katamā ca, bhikkhave, sakkāyanirodhagāminī paṭipadā? Idha, bhikkhave, sutavā ariyasāvako ariyānaṃ dassāvī ariyadhammassa kovido ariyadhamme suvinīto, sappurisānaṃ dassāvī sappurisdhammassa kovido sappurisdhamme suvinīto, na rūpaṃ attato samanupassati, na rūpavantaṃ vā attānaṃ; na attani vā rūpaṃ, na rūpasmim vā attānaṃ. Na vedanaṃ attato ... na saññānaṃ ... na sañkhāre ... na viññānaṃ attato samanupassati, na viññānaṃ vā attānaṃ; na attani vā viññānaṃ, na viññānasmim vā attānaṃ. ...*”

- **Translated:** “And what, *bhikkhus*, is the way leading to the cessation of identity with the five aggregates (*sakkāya diṭṭhi*)? Here, *bhikkhus*, the instructed noble disciple ... does not regard *rūpa* as *attā* ... nor *vedanā* as *attā* ... nor *saññā* as *attā* ... nor *sañkhāra* as *attā* ... nor *viññāna* as *attā* ... nor *attā* as in *viññāna*..”
- See #2 above for the full translation of the verse.

Anattalakkhaṇa Sutta (SN 22.59)

10. Let us compare the above definition to the following verse in the “[WebLink: suttacentral: Anattalakkhaṇa Sutta \(SN 22.59\)](#)”: “*Rūpaṃ, bhikkhave, anattā. Rūpañca hidaṃ, bhikkhave, attā abhavissa, nayidaṃ rūpaṃ ābādhāya saṃvatteyya, labbhettha ca rūpe: ‘evaṃ me rūpaṃ hotu, evaṃ me rūpaṃ mā ahoṣī’ti. Yasmā ca kho, bhikkhave, rūpaṃ anattā, tasmā rūpaṃ ābādhāya saṃvattati, na ca labbhati rūpe: ‘evaṃ me rūpaṃ hotu, evaṃ me rūpaṃ mā ahoṣī’ti.*”

- **Translated:** “*Bhikkhus*, form (physical body) is *anattā* (or not *attā*). For if, *bhikkhus*, if one's body is *attā*, one would have full control over it, and it would be possible to say: ‘Let my body be like this; let my body not be like this.’ But because the body is *anattā*, it is subjected to decay and disease. And it is not possible to have it the way one desires: ‘Let my body be this way; let my body not be this way.’”
- The recent post, “[Anattā in Anattalakkhaṇa Sutta – No Soul or an Ātma](#)” explained the reality. That there is no *attā* or a “soul” or a “*ātma*” that can be associated with either one's physical body or its four mental aggregates.

11. Again, from the “[WebLink: suttacentral: Anattalakkhaṇa Sutta \(SN 22.59\)](#)”: “*Taṃ kiṃ maññatha, bhikkhave, rūpaṃ niccaṃ vā aniccaṃ vā*” *ti?* “*Aniccaṃ, bhante.*” “*Yaṃ panāniccaṃ dukkhaṃ vā taṃ sukhaṃ vā*” *ti?* “*Dukkhaṃ, bhante.*” “*Yaṃ panāniccaṃ dukkhaṃ vipariṇāmadhammaṃ, kallaṃ nu taṃ samanupassituṃ: ‘etaṃ mama, esohamasmī, eso me attā’*” *ti?* “*No, hetam, bhante...*”

Translated: “What do you think, *bhikkhus*, can form be maintained to one’s satisfaction?”—“No, *bhante*”—“Would something of such nature lead to suffering or happiness?”—“Suffering, venerable sir.”—“Is it prudent to regard such a thing thus: ‘This is mine, this I am, this is my self?’”—“No, *bhante*.”

AND

“*Tasmātiha, bhikkhave, yaṃ kiñci rūpaṃ atītānāgatapaccuppannaṃ ajjhataṃ vā bahiddhā vā oḷārikaṃ vā sukhumaṃ vā hīnaṃ vā pañītaṃ vā yaṃ dūre santike vā, sabbam rūpaṃ: ‘netam mama, nesohamasmi, na meso attā’ ti evametam yathābhūtaṃ sammappaññāya daṭṭhabbam.*”

Translated: “Therefore, *bhikkhus*, any form (*rūpa*) whatsoever, whether past, future, or present, internal or external, gross or subtle, inferior or superior, far or near, all form (these are 11 types of *rūpa* in *rūpakkhandha*) should be seen as it really is, with correct wisdom. Thus: ‘This is not mine, this I am not, this is not my self.’

- The same argument would hold for the other four mental aggregates as well.

***Sakkāya Diṭṭhi* and *Anatta* Nature**

12. Therefore, *sakkāya diṭṭhi* is permanently disappears when one comprehends the real nature of this world. That is the *anicca* nature (inability to maintain *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* in the way one likes to). Because of the *anicca* nature, much suffering will result, including in the *apāyā* (*dukkha*). That is when one becomes helpless (*anatta*); see, “[Anicca – True Meaning](#).”

- Therefore, one is truly helpless in this rebirth process (*anatta*); see, “[Anatta – No Refuge in This World](#).” That is the same as not having full control (“*na*” + “*attā*” or *anattā*); see, “[Anattā in Anattalakkahana Sutta – No Soul or an Ātma](#).”
- The existence (*bhava*) in this world and corresponding births (*jāti*) filled with suffering arise because one tries to go against the true nature and generates *saṅkhāra* (due to *avijjā*). That is *Paṭicca Samuppāda*.
- When one comprehends that, one would stop generating *saṅkhāra*, starting with the worst kind: *apuñña abhisāṅkhāra* (leading to immoral deeds). That is how a *Sotāpanna* starts on the Noble Path.

3.3.8.2 **Sakkāya Diṭṭhi – Getting Rid of Deeper Wrong Views**

June 22, 2019; revised October 23, 2019

Introduction – Two Types of Wrong Views

1. In the “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#),” the Buddha explained that there are two eightfold paths; also see, “[Buddha Dhamma – In a Chart](#)” and the post referred to therein. Therefore, there are two types of *sammā diṭṭhi*, attained via the removal of two types of *micchā diṭṭhi*.

- **First, one needs to follow the mundane eightfold path and get rid of the ten types of *micchā diṭṭhi*.** That is the necessary foundation needed to comprehend the nature of a broader world of 31 realms. One must realize the truth of *kamma/kamma vipāka*, rebirth process, that there is a *paraloka* where *gandhabba* lives, etc.; see, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#).”
- **The more profound wrong views of *nicca*, *sukha*, *atta* can be removed, and one can then comprehend the real nature of this world of 31 realms (only after one gets rid of the ten types of *micchā diṭṭhi*); see, “[Three Marks of Existence – English Discourses](#).”**
- When that happens, one becomes a *Sotāpanna Anugāmi* and starts on the **Noble Eightfold Path**.

2. Removal of *sakkāya diṭṭhi* is the basis of one’s start on the Noble Eightfold Path. It is really about getting a “new vision” about the true nature of this world of 31 realms.

- That requires getting rid of the more in-depth wrong views (*nicca, sukha, atta*) about the nature of this world.
- In this post, we will discuss how “20 types of *sakkāya diṭṭhi*” is reached by getting rid of 5 types of wrong views on the five aggregates based on *uccheda diṭṭhi* and 15 types of wrong views on the five aggregates based on *sassata diṭṭhi*. [*uccheda* :[m.] cutting off; perishing; annihilation. *sassata* :[adj.] eternal.]

Sakkāya as “Sath” + “Kāya”

3. In the previous post, “[Sakkāya Diṭṭhi and Tilakkhana](#),” we discussed how *sakkāya diṭṭhi* is related to one’s cravings. Those cravings (*upādāna*) are for one’s own body and other material things of perceived value (*rūpakkhanda*). They also include one’s mental constituents that define those cravings (*khandha* or aggregates of *vedanā, saññā, saṅkhāra*, and *viññāṇa*).

- As we saw in that post, The word “*sakkāya*” comes from “*sath*” + “*kāya*,” which rhymes as “*sakkāya*.” “*Sath*” means “good” and “*kāya*” means “a collection” or “an aggregate” (it could also mean “physical body,” which is also a collection of parts). Thus “*sakkāya*” means those five aggregates (including one’s own body) are fruitful.
- These cravings for the five aggregates arise because of the wrong views of *uccheda diṭṭhi* or *sassata diṭṭhi* or views in between those two (with different combinations), as we discuss below.

Two Main Diṭṭhis (Deeper Wrong Views)

4. There are two main “*diṭṭhis*” or “wrong views” about the world that are discussed in the “[WebLink: suttacentral: Brahmajāla Sutta \(DN 1\)](#).” Note that I always provide the Pāli version of a *sutta*, because sometimes the commonly available English translations have errors. I usually give a link to the Pāli version at Sutta Central. One can get translations to English — and even a few more languages — there by clicking on the “hamburger icon” (represented by three short parallel lines) at the top left.

- One is the *uccheda diṭṭhi*, which says a “person” exists only until the death of the physical body; a “person” is nothing more than a collection of physical matter (molecules). When the “person” dies, that is the end of the story (*uccheda* means “cut off”).
- The second is *sassata diṭṭhi* — which is the exact opposite of the first (*sassata* means “eternal.”) It is the view that a “person” has a “mental body” that survives the death of the physical body: In Abrahamic religions (Christianity, Judaism, and Islam), it is called the “soul,” which goes to either heaven or hell at death and will stay there forever. In Hinduism, it is called “*ātma*,” which merges with *Mahā Brahma* at some point and remains there forever.
- **In the *Brahmajāla Sutta (DN 1)*, the Buddha discusses 60 more wrong views, but those are variations of the above two.** We can see that most scientists have the *uccheda diṭṭhi* (that one’s physical body with its brain is all that is there). Most religious people (in Abrahamic religions and in Hinduism) have the *sassata diṭṭhi* that one’s soul or *ātma* lives forever.

5. If *uccheda diṭṭhi* is the actual reality of the world, then suffering will end with the death of the physical body. Thus one may seek to “enjoy worldly pleasures” without paying attention to the harmful consequences of doing immoral deeds (when the temptation gets high enough).

- If *sassata diṭṭhi* is the actual reality of the world, then suffering will never end, because there is an “unchanging essence” that will survive the death of the body at any time. Even though the premise there is of a “suffering-less, joyful realm” (merge with the Creator), the Buddha said that there is no such existence. **All existences are subject to suffering, simply because matter (*rūpa*) is unstable. Any life with even a trace of tangible-matter is inherently unstable. Modern science has confirmed this fact; see, “[Second Law of Thermodynamics is Part of Anicca!](#).”**

- In Buddha Dhamma, there is an entity (*gandhabba*, mostly “mental” with just a few *suddhaṭṭhaka* or smallest units of matter) that survives the death of the physical body. Any existence in this world is associated with such “mental body.” The mental body of a human or an animal is a *gandhabba*.
- Buddha Dhamma says a living being comes into existence due to six root causes, but all six disappear with the removal of three root causes (*lobha, dosa, moha*). As long as those root causes are present there will be an associated life. And any being in this world has much more suffering than any short-lived happiness; see, “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#)” and “[The Grand Unified Theory of Dhamma.](#)”

6. Therefore, the concept in Buddha Dhamma is in between those two extremes of *uccheda diṭṭhi* and *sassata diṭṭhi*.

- There is a mental-body with a trace of matter (*gandhabba*) that survives the death of the physical body, but that mental body is ever-changing, according to *Paticca Samuppāda*.
- Therefore, there is no everlasting “self” or a “*ātma*” or an “*attā*.” The denial of an eternal “*attā*” is called “*anattā*” (“*na*” + “*attā*”). That is the meaning of *anatta*; see, “[Anattā in Anattalakkahana Sutta – No Soul or an Ātma.](#)”
- Since the death of the physical body is not the end of suffering, one will become helpless (*anatta*) in the rebirth process since births in the four lowest realms (*apāyā*) are unavoidable. That is another meaning of *anatta* (“*na*” + “*atta*”) or “without refuge or becoming helpless); see, “[Anatta – No Refuge in This World.](#)” Here, *atta* means “with refuge..”
- When one understands this world view of the Buddha, one removes *sakkāya diṭṭhi* (together with *vicikicca* and *silabbata parāmāsa*) and attains the *Sotāpanna* stage.

Two Main Types of Character (*Carita*)

7. A revealing analysis of *sakkāya diṭṭhi* in terms of one’s character qualities (*carita*, pronounced “charitha”) is the “[WebLink: suttacentral: Nayasamutthāna section](#)” of the *Nettipakarana* (a Commentary in the *Tipiṭaka*). It defines the Four Noble Truths in terms of “*sakkāya*”: “*Tattha diṭṭhacaritā rūpaṃ attato upagacchanti. Vedanaṃ ... pe ... saññaṃ ... saṅkhāre ... viññānaṃ attato upagacchanti. Tanhācaritā rūpavantaṃ attānaṃ upagacchanti. Attani vā rūpaṃ, rūpasmiṃ vā attānaṃ, vedanāvantaṃ ... pe ... saññāvantaṃ ... saṅkhāravantaṃ ... viññānavantaṃ attānaṃ upagacchanti, attani vā viññānaṃ, viññānasmim vā attānaṃ, ayaṃ vuccati vīsativatthukā sakkāyadiṭṭhi.*”

Translated: “A person with “characteristic wrong views” (*diṭṭhacaritā*) perceives “**I am my body,**” “**I am my vedanā,**” “**I am my saññā,**” “**I am my saṅkhāra,**” and “**I am my viññāna.**” A person with “characteristic cravings for sense pleasures” (*tanhācaritā*) perceives **my body is me; my body is in me, I am in my body.** He sees *vedanā..saññā..saṅkhāra..viññāna* in the same four ways (e.g., **I am my viññāna, my viññāna is me, my viññāna is in me, I am my viññāna**) – that is twenty types of *sakkāya diṭṭhi*.

- Thus, there are five types of *sakkāya diṭṭhi* due to *uccheda diṭṭhi* and 15 types of *sakkāya diṭṭhi* due to *sassata diṭṭhi*.

8. From the same section of [WebLink: suttacentral: Nayasamutthāna](#) of the *Nettipakarana*, we have two definitions for *uccheda diṭṭhi* and *sassata diṭṭhi*.

“*Tattha ye rūpaṃ attato upagacchanti. Vedanaṃ ... pe ... saññaṃ ... saṅkhāre ... viññānaṃ attato upagacchanti. Ime vuccanti “ucchedavādino”ti.*”

“*Ye rūpavantaṃ attānaṃ upagacchanti. Attani vā rūpaṃ, rūpasmiṃ vā attānaṃ. Ye vedanāvantaṃ ... pe ... ye saññāvantaṃ ... ye saṅkhāravantaṃ ... ye viññānavantaṃ attānaṃ upagacchanti, attani vā viññānaṃ, viññānasmim vā attānaṃ. Ime vuccanti “sassatavādino”ti, tattha ucchedasassatavādā ubho antā, ayaṃ saṃsārapavatti.*”

Translated: “One with *uccheda diṭṭhi* (*ucchedavādino*) perceives “I am my body,” “I am my vedanā,” “I am my saññā,” “I am my sankhāra,” and “I am my viññāṇa.”

“One with *sassata diṭṭhi* (*sassatavādino*) perceives **my body is me; my body is in me, I am in my body**’. He also perceives *vedanā..saññā.. saṅkhāra.. viññāṇa* in the same four ways (e.g., **I am my viññāṇa, my viññāṇa is me, my viññāṇa is in me, I am my viññāṇa**.)” Those with such extreme views are bound to the cycle of rebirths (*samsāra*).

9. This verse introduces dividing *anariyas* (*puthujjano*) into two categories: (1) *diṭṭhacarita* or those with personalities dominated by the wrong vision of *uccheda diṭṭhi*. (2) *taṇhācarita* or those with characters dominated by the wrong view of *sassata diṭṭhi*. If you look at the definitions in #7 above, you will see that a *diṭṭhacarita* is one with *uccheda diṭṭhi*, and a *taṇhācaritā* is one with *sassata diṭṭhi*.

- The last part says that the 20-types of *sakkāya diṭṭhi* is the combination of *uccheda* and *sassata diṭṭhis*. Since all other 60 *diṭṭhis* or wrong visions about the world are different combinations or variations of *uccheda* and *sassata diṭṭhis*, 20-types of *sakkāya diṭṭhi* includes all the wrong views about “this world.”

Sotāpanna Stage – A New World View

10. Now we look at the last of the verse in #8 above, which gives another clue: “..*tattha ucchedasassatavādā ubho antā, ayaṃ samsārapavatti*.”

- Here, “*ucchedasassatavādā*” results from the combination of *uccheda sassata vādā*, i.e., *uccheda vādā* and *sassata vādā*, where *vāda* means “argument or theory,” or in this case “view.” It says those two are the two extreme views. [*vāda* :[m.] theory; saying; creed controversy.]
- Then it says, “*ayaṃ samsārapavatti*.” That means those two extreme views lead to the continuation of the rebirth process! (*samsāra pavatti*, where “*pavatti*” means to “continue or sustain”).
- That makes perfect sense. One removes *sakkāya diṭṭhi* (and get to the correct world view) by getting rid of the two main wrong views about the world of 31 realms, i.e., *uccheda diṭṭhi* and *sassata diṭṭhi*, and any combination of them.

11. If a living being does not cease to exist at the death of the physical body (*uccheda diṭṭhi* does not hold) AND if there is no “permanent essence of a being” like a soul or a *ātma* (*sassata diṭṭhi* does not hold), then what is the explanation?

- Continuation of a lifestream NOT ONLY at the death of the physical body but at ANY MOMENT is explained via the principle of causes and conditions (*Paticca Samuppāda*).
- One who gets to be a *Sotāpanna* comprehends this fact and realizes that there is nothing to be called “mine” because, in reality, there is absolutely nothing that can be under control of “oneself”; see, “[Anattā in Anattalakkahana Sutta – No Soul or an Ātma](#).”
- As long as one does not comprehend that, one will become helpless in the future, especially when one is reborn in an *apāya*; see, “[Anatta – No Refuge in This World](#).”
- That is why getting rid of *Sakkāya diṭṭhi* REQUIRES one to get rid of any trace of *uccheda diṭṭhi* or *sassata diṭṭhi*.
- That is not possible until one first gets rid of the 10 types of *micchā diṭṭhi* and gets basic understanding of the broader world with 31 realms, laws of *kamma*, existence of a *paraloka* with *gandhabba*, and of course the validity of the rebirth process; also see, “[Buddhism without Rebirth and Nibbāna?](#).”

12. However, this is only a change of *diṭṭhi vipallāsa* (getting rid of muddled or distorted vision). There are two more *vipallāsa* (*saññā vipallāsa* and *citta vipallāsa* or “distorted perceptions and thoughts.”) Their removal happen at higher stages of *Nibbāna*; see, “Discourse 3 – Distorted Perceptions or Saññā Vipallāsa” in “[Three Marks of Existence – English Discourses](#).”

- Therefore, getting rid of ALL wrong views starts at the *Sotāpanna Anugāmi* stage, and established at the *Sotāpanna* stage.
- However, all types of *vipallāsa* wear out step-by-step and ultimately go away only at the *Arahant* stage; see the forum discussion "[Sakkāya Ditthi and Tilakkhana.](#)"

3.3.8.3 Associations (Sevana) – A Root Cause of Wrong Views

June 29, 2019; revised July 1, 2019 (comment added at the end)

1. Our world views are first formed by our families. Most people just keep those views during their whole lifetimes. A good example is one's religion.

- With the advent of the internet, this is changing. Now, people are exposed to many world views, and can learn about different world views and decide for themselves which one(s) make more sense.
- Still, the basic mindset instilled at a young age can have a long-lasting effect. This is why it is important to make sure that our children are not exposed to "bad influences", especially bad friends.

2. In the terminology of the Buddha, one's "*gati*" (habits/character qualities) are determined by one's world views and *vice versa*. **Furthermore, whether one acts with *avijjā* (ignorance) at any given time depends on one's *gati*.** In simple terms, "good *gati*" are associated with *Sammā Ditthi* (correct views) and "bad *gati*" are associated with *micchā ditthi* (wrong views).

- This is why *Sammā Ditthi* comes first in the both the mundane and Noble Eightfold Paths.
- The basic concepts are discussed in, "[Gathi \(Gati\), Anusaya, and Āsava](#)" and the posts referred to there.
- This is also true at the deeper level; see, #8 of "[Sakkāya Ditthi and Tilakkhana](#)" and "[Sammā Ditthi – Realization, Not Memorization.](#)" One's *gati* can lead to specific future births.

3. *Gati* are carried from from life-to-life. However, *gati* are FORMED mainly during human lives.

- If a human cultivates an "animal *gati*," that human is likely to be born as that animal in the next life (or a future life). This is explained clearly in the "[WebLink: suttacentral: Kukkuravatika Sutta \(MN 57\)](#)" (English translation there: "[WebLink: suttacentral: The Dog-Duty Ascetic \(MN 57\)](#)"). There the Buddha explains how those "dog *gati*" that Seniya was cultivating would lead to him to be born a dog.
- Similarly, a human who cultivates "*deva gati*" by cultivating *saṅkhāra* that are good and moral (*puññābhisāṅkhāra*) — and thus engages in such thoughts, speech, and actions — that human is likely to be born a *deva*.
- A human is born with a certain set of *gati* acquired in past lives as a human. But a human CAN change those *gati* by WILLFULLY cultivating different types of *saṅkhāra* (and thus one's actions). In particular, a human can cultivate "*Ariya gati*" by cultivating the Noble Eightfold Path (which means cultivating *puññābhisāṅkhāra* AND by comprehending *Tilakkhana*).

4. A human baby has similar *gati* to his/her parents. That is not an accident. Normally a *gandhabba* with *gati* similar to those of the parents can take possession of the zygote in mother's womb that was formed by the union of mother and father; see, "[Buddhist Explanations of Conception, Abortion, and Contraception.](#)"

- This is another reason that a child would likely to maintain the *gati* (and thus world views, religion, behavior patterns) of the parents.
- However, if the child comes under strong influence of a bad set of friends, those *gati* can change for the worse. We discussed an example of a teenager transforming to a drug addict/gang member in our discussion of *Paticca Samuppāda*; see, "[Phassa paccayā Vedanā...to Bhava.](#)"
- In the same way, that teenager could have been pointed in the right direction if, for example, the parents themselves started following the Noble Path, and encouraged the teenager to do the same.

- Therefore, one’s environment (whom one associates with) can have a major impact on one’s *gati*. This is true for adults too, but children can be easily influenced. This is why one MUST associate with people with “good and moral *gati*.”
5. In the “[WebLink: suttacentral: Mangala Sutta \(Snp 2.4\)](#),” a *deva* comes to the Buddha and asks, “what are the highest auspicious deeds to be cultivated (*“brūhi maṅgalamuttamaṃ”*); here, “*maṅgalamuttamaṃ*” is “*mangalam + uttamam*”, where “*mangala*” means “auspicious” and “*uttama*” means “highest”).
- The very first auspicious deed listed by the Buddha is: “*Asevanā ca bālānaṃ, paṇḍitānañca sevānā..*” OR, “not to associate with ignorant people (*bāla*) and to associate with the wise (*paṇḍita*).”
 - In the above I have translated “*sevana*” as “to associate” and “*asevana*” as “not to associate.” A better description would be, “to get advice from and to follow” and “not to get advice from or to follow.” Sometimes it is not possible to stop “associating” with a group of people, even if they have bad character qualities. For example, such people may be there at one’s workplace, and it is not possible to stop interacting with them. However, one does not have to follow their bad opinions/world views.
 - In the same way, just by “associating with an *Ariya*” does not necessarily qualify as “*paṇḍitānañca sevānā*.” For example, there were many people who associated closely with the Buddha himself (Devadatta and King of Kosala, for example), who did not profit from that association: Devadatta was born in the *apāyā*, and the King of Kosala failed to become a *Sotāpanna*.
6. Of course it is prudent to minimize interactions with those with *micchā diṭṭhi*. However, this again depends on the context.
- For example, many prominent scientists have “*uccheda diṭṭhi*,” that the physical body is all one has, and life ends at the death of the physical body. This is one of the two major wrong views associated with *sakkāya diṭṭhi* (that blocks the *Sotāpanna* stage); see, “[Sakkāya Diṭṭhi – Getting Rid of Deeper Wrong Views.](#)”
 - It is fine to listen to them and even learn from them about MUNDANE things like science. Most of them have never been exposed to true Buddha Dhamma, and all of them are “moral people.” I discussed a good example recently (June 27, 2019 at 9:48 am post) at the discussion forum, “[Sakkāya Diṭṭhi and Tilakkhana.](#)” As I explained there, Dr. James Tour is correct when he explains why there is more to life than just the physical body. Furthermore, he explains with clear evidence why life could not have evolved from “inert matter.”
 - However, since he apparently has not been exposed to true Buddha Dhamma, he cannot think of a good explanation other than to say that life must have been created by God, and that there is an everlasting “soul” (i.e., he has *sāssata diṭṭhi*). I do not blame him; as he firmly believes (and he is right), life is very complex and it is NOT possible to explain the origins of life by the theory of evolution.
 - What he has not been exposed to is Buddha’s explanation that life has ALWAYS existed (no traceable beginning to life) and evolves according to causes and conditions (*Paticca Samuppāda*); see, “[Buddhism and Evolution – Aggañña Sutta \(DN 27\).](#)”
7. Among the four conditions that must be fulfilled to attain the *Sotāpanna* stage of *Nibbāna*, “*Sappurisasamsevo*” or “Association with “*sappurisa (sath + purisa* or “Noble friend”, i.e., an *Ariya*)” is the first condition; see, “[Four Conditions for Attaining Sotāpanna Magga/Phala.](#)”
- Since Buddha’s teachings are unique, the true message has to come from a Buddha or someone “who can be traced back to the Buddha”, as explained in the above post. The teachings can be explained accurately only by an *Ariya* who has GRASPED those unique teachings that have never been known to the world: “*pubbe ananussutesu dhammesu..*” (see #8 of “[Dhammacakkappavattana Sutta – Introduction](#)”).

- But it is not necessary to “hang out” or “directly associate” with an *Ariya*. The key is to “to get advice from and to follow” such Noble Persons, as explained above. That can be done by listening to their *desanās* (discourses) and/or by reading their writings.
- One cannot attain the *Sotāpanna* stage while having *sakkāya diṭṭhi* (i.e., *uccheda diṭṭhi* or *sāssata diṭṭhi* or some combination of the two): see, “[Sakkāya Diṭṭhi – Getting Rid of Deeper Wrong Views.](#)”

8. Now we can look into the term “*sappurisa*” in more detail to get a better picture of the whole situation. There are many *suttā* that describe *sappurisa/asappurisa* in different ways (all related to each other).

- For our discussion here, the description given in the “[WebLink: suttacentral: Atthaṅgika Sutta \(AN 4.205\)](#)” is more relevant: “*Katamo ca, bhikkhave, asappuriso? Idha, bhikkhave, ekacco micchādiṭṭhiko hoti, micchāsankappo hoti, micchāvāco hoti, micchākammanto hoti, micchāājīvo hoti, micchāvāyāmo hoti, micchāsati hoti, micchāsamādhi hoti. Ayam vuccati, bhikkhave, asappuriso.*”
- **Translated:** “An *asappurisa* is one who follows *micchā diṭṭhi, micchā sankappa, micchā vācā, micchā kammanta, micchā ājīva, micchā vāyāma, micchā sati, and micchā samādhi.*”
- In other words, when one has wrong views (*micchā diṭṭhi*), one thinks in wrong ways, speaks in wrong ways, acts in wrong ways, follows a wrong livelihood, makes efforts in accomplishing wrong (or useless) goals, gets to the wrong mindset, and thus ends up with a perturbed state (and thus is prone to act unwisely).

9. Of course, a *sappurisa* is one who is on the correct path with *sammā diṭṭhi, sammā sankappa hoti, sammā vācā, sammāka mmanta, sammā ājīva, sammā vāyāma, sammā sati, and sammā samādhi.*

- Furthermore, the *sutta* explains that there is a **worse *asappurisa***, who in addition **encourages others** to follow the wrong path.
- Similarly, there is a **better *sappurisa***, who encourages others to follow the correct path.

10. Another definition of a *asappurisa* is given in the “[WebLink: suttacentral: Paṭipadā Sutta \(SN 22.44\)](#),” which is relevant to the present discussion: “*Sakkāyasamudayagāminiṅca vo, bhikkhave, paṭipadam desessāmi, sakkāyanirodhagāminiṅca paṭipadam.*”

Taṃ suṇātha. Katamā ca, bhikkhave, sakkāyasamudayagāminī paṭipadā? Idha, bhikkhave, assutavā puthujjano ariyānaṃ adassāvī ariyadhammassa akovido ariyadhamme avinīto, sappurisānaṃ adassāvī sappurisadhammassa akovido sappurisadhamme avinīto, rūpaṃ attato samanupassati, rūpavantaṃ vā attānaṃ; attani vā rūpaṃ, rūpasmiṃ vā attānaṃ. Vedanaṃ attato ... saññaṃ ... sañkhāre ... viññānaṃ attato samanupassati, viññānavantaṃ vā attānaṃ; attani vā viññānaṃ, viññānasmiṃ vā attānaṃ.”

Translated: ““*Bhikkhus*, I will teach you the way leading to the origination of *sakkāya (diṭṭhi)* and the way leading to the cessation of *sakkāya (diṭṭhi)*. The description in blue is exactly same as discussed in #2 of the post, “[Sakkāya Diṭṭhi and Tilakkhana.](#)”

- The next verse in the *sutta* states that a *sappurisa* is one who has removed *sakkāya diṭṭhi*.

11. Two more relevant terms are “*sutavā ariyasāvako*” (a Noble person who has comprehended Buddha Dhamma) and “*assutavā puthujjano*” (who has not heard/comprehended Buddha Dhamma).

- The “[WebLink: suttacentral: Ānandatthera Sutta \(SN 55.13\)](#)” describes a “*sutavā ariyasāvako*” as one who has “*buddhe aveccappasādena samannāgato,*” “*dhamme aveccappasādena samannāgato,*” “*sanghe aveccappasādena samannāgato,*” “*ariyakantehi sīlehi samannāgato.*” That means one who has “unbreakable faith in the Buddha, Dhamma, Saṅgha, and unbreakable moral mindset that would not do an *apāyagāmi* deed.”
- Those are actually the four qualities of a *Sotāpanna*; see, “[Sotapatti Anga – The Four Qualities of a Sotāpanna.](#)” The key term “*aveccappasādena*” and “*ariyakānta sīla*” are discussed in that post.

- Again, there are many *suttā* describe these terms in different (but related) ways. For example, “[WebLink: suttacentral: Dutiyariyasāvaka Sutta \(SN 12.50\)](#)” describes a “*sutavā ariyasāvaka*” as one who has comprehended *Paticca Samuppāda*.
- Therefore, a “*sutavā ariyasāvako*” is a Noble Person or an *Ariya*.
- On the other hand, “*assutavā puthujjano*” is one who who has not heard/grasped those.

12. Therefore, even a person who may be considered highly moral by mundane standards (like famous philanthropists, scientists, etc) is likely to be an “*asappurisa*” or an “*assutavā puthujjano*.” That is IF they have *micchā diṭṭhi* (10 types of *micchā diṭṭhi* which include *sakkāya diṭṭhi*). As we have discussed, *sakkāya diṭṭhi* is *uccheda diṭṭhi* or *sāssata diṭṭhi* or a combination of the two. Such persons would not be able to guide one on the Noble Eightfold Path.

- Again, that does not mean one cannot learn other useful (mundane) concepts from them.
- One really needs to avoid those who are engaged in immoral deeds: drug use, excessive alcohol use, sexual misconduct, etc.
- In order to make progress on the Noble Path, one should associate (follow and take advice from) a *pañḍita* (wise person) in the context of Buddha Dhamma, i.e., a *sappurisa/sutavā ariyasāvaka*. A *pañḍita* is not determined by age, educational degrees, or other metrics, but only based on whether one has removed *sakkāya diṭṭhi*.

July 1, 2019: Regarding #5 above, it is important to note that *āsevana* is different from *asevana*.

- *Sevana* is association. *Āsevana* (Ā + *sevana*) is “came to associate with”; see, “[Āsevana and Aññamañña Paccayā](#).”
- *Asevana* (A + *sevana*) is “not to associate with”, the negation as discussed in #5 above.

It is very important to see the difference, which illustrates how Pāli words combine (*sandhi*) to produce other words with very different meanings. Thanks to Tobias Große for bringing this distinction to our attention at the discussion forum today.

3.3.9 Why are Tilakkhana not Included in 37 Factors of Enlightenment?

April 1, 2016

1. It is possible that one may ask, “If *anicca*, *dukkha*, *anatta* are so important, why are they not included in the 37 Factors of Enlightenment?” After all, one attains *Nibbāna* via cultivating the 37 Factors of Enlightenment (also called 37 *Bodhipākkhiya Dhamma*, or the Dhamma concepts that takes one to *Bodhi* or “*bhava*” + “*uddha*,” i.e., to *Nibbāna*; “*pākkhiya*” means “on the side of”).

- The key to the answer is that there are two 37 Factors of Enlightenment, one is mundane (*lokiya*) and one is transcendental (*lokuttara*). We have previously discussed that there are two eightfold paths as well: one mundane and one transcendental; see, “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#).”
- The mundane versions are followed by those who do not comprehend the *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*). Thus *Tilakkhaṇa* are preconditions (prerequisites) in order to be able to follow the Noble Path.

2. This is related to the fact that the 37 Factors of Enlightenment were there when Prince Siddhartha was born. The existence of the mundane version of the 37 Factors of Enlightenment or eightfold paths is possible only if there has been a previous Buddha in the same *mahā kalpa*, where a *mahā kalpa* is the time span of an “Earth system” or more precisely a solar system with an Earth-like planet supporting human life (an eon).

- All Buddhas discover the *Tilakkhaṇa*, the Four Noble Truths, the Noble Eightfold Path, etc by their own efforts. But since these Dhamma concepts encompass Nature's laws, all Buddhas keep re-discovering the same Dhamma.
- However, like anything else in this world, a “Buddha *Sāsana*” or the “original Dhamma preached by a Buddha” lasts only for a certain time. For Buddha Gotama, his *Sāsana* is supposed to last only 5000 years (when the human lifespan is about 100 years), and we are half-way through.
- There have been four Buddhas on this Earth (which formed about 4.6 billion years ago), and Buddha Gotama was the fourth. The three Buddhas preceding him were: Kakusandha, Konagama, and Kassapa; one more Buddha, Buddha Maitreya, is supposed to appear long after the Gotama Buddha *Sāsana* disappears.

3. It is said that a Buddha comes to this world to reveal three words and eight letters (in Pāli): “*Attakkarā theenapadā Sambuddhena pakāsithā, na hi sīla vatan hotu uppajjatthi Tathāgatā,*” which means, “a Buddha (*Tathāgatā*) is born NOT just to show how to live a moral life, but to reveal three words to the world.”

- These three words are: *anicca, dukkha, anatta*.

4. When a given Buddha *Sāsana* fades away, it does not disappear abruptly. What happens is that the true meanings gradually get lost, and are replaced by easier to grasp, mundane meanings; **the first to lose the true meanings are *anicca, dukkha, anatta***. Without them, all other concepts remain there with mundane meanings.

- When the Kassapa Buddha *Sāsana* faded away, most of the concepts survived only with mundane meanings and that is why most terms like *kamma* and even *satta bojjhaṅga* survived up to the time of Prince Siddhartha's birth.
- In fact, even during a given Buddha *Sāsana*, the true meanings of *Tilakkhaṇa* get lost for periods of time, but are revived by *Jāti Sotāpannas* (when one attains the *Sotāpanna* stage, it is not lost in future lives; so, if one is reborn human, he/she will be a *Jāti Sotāpanna*). Thus during a given Buddha *Sāsana*, such *Jāti Sotāpannas* keep bringing back the true Dhamma until the end of that Buddha *Sāsana*.
- After that no more *Jāti Sotāpannas* are born and true Dhamma disappears from this world (or more correctly from this Earth). Again, the mundane versions may survive for long times.
- Then the world has to await the appearance of a new Buddha to reveal the true meanings of *anicca, dukkha, anatta*. But a *mahā kalpa* with five Buddhas (like ours) is a very rare event and it is called *Mahā Badda Kalpa*.
- More common is to have no Buddhas or just a single Buddha in a given *mahā kalpa*. **For example, there were 30 *mahā kalpas* before this *mahā kalpa* where there was not even a single Buddha present.**

5. This is why the Buddha emphasized that there is a very brief window of time to attain *Nibbāna* (at least to attain the *Sotāpanna* stage).

- Time span of each Buddha *Sasana* is different because the average lifetime of humans keep changing. Gotama Buddha *Sasana* is supposed to be 5000 years long, with the average lifetime of a human being about 100 years. The human lifetime during the Buddha *Sasana* of Buddha Kassapa was about 20, 000 years; thus we can guess that *Sasana* lasted about $20,000 \times 50 =$ about a million years.
- Therefore, even though there will be one more Buddha appearing in this *mahā kalpa*, the total time during which one could be potentially exposed to Buddha Dhamma would be only a few million years.
- Our Earth (i.e., the Solar system) may last a few more billion years, so we can say that the lifetime of this *mahā kalpa* is roughly 8-10 billion years or 8000 to 10,000 million years. Only a few million years, at most, is the “short window” that is available to work towards *Nibbāna*.

- Of course, one needs to be fortunate enough to be born human on this Earth during the Maitreya Buddha *Sāsana* to get the next opportunity to work towards *Nibbāna*. This is an extremely unlikely event for any given person.
 - Also see, [“How the Buddha Described the Chance of Rebirth in the Human Realm.”](#) Even when one is born human, most *mahā kalpas* (eons) will have no Buddhas present to teach the way to *Nibbāna*.
6. Going back to our main discussion, when Buddha Kakusandha appeared first in this world (i.e., on this Earth), there had not been a previous Buddha on this Earth. Therefore, concepts like eightfold path, *saptha bojjanga*, 37 Factors of Enlightenment (or terms like *kamma* and rebirth) **were not there even by name**.
- **Now it is clear why those concepts were there before Buddha Gotama (i.e., when Prince Siddhartha was born). After Buddha Kassapa’s *Sāsana* faded away, mundane interpretations of key concepts passed down through generations (initially through *vedic* traditions which then transitioned to the Hindu religion; of course most concepts survived only by the name).**
 - Therefore, not only concepts like *kamma*, rebirth, the five (and eight) precepts were there when Prince Siddhartha was born, but also *saptha bojjanga* and ways to attain *jhānā*. Of course, those meanings were mundane and the *jhānā* were *anāriya jhānā*. Without *Tilakkhaṇa*, it is not possible to attain *Ariya jhānā*.
7. The difference that the Buddha Gotama made was to bring back the true Dhamma that is based on the true nature of this world, i.e., *anicca*, *dukkha*, *anatta*. But even during a given Buddha *Sāsana*, the true Dhamma starts to fade away from time to time (**people have tendency to embrace the easy and mundane version**) and needs to be revived by a *jāti Sotāpanna*.
- And that is what is happening even at the present time. The true Dhamma of Buddha Gotama had again started to fade away, and a *jāti Sotāpanna* in Sri Lanka is bringing back the correct or *lokuttara* version now. Within the past 2500 years, it had happened at least one time before, and we will discuss that when the time is appropriate.
8. The difference between the two versions of the 37 Factors of Enlightenment or the eightfold paths is that the Noble versions are based on *Tilakkhaṇa: anicca, dukkha, anatta*. Their true meaning is that it is fruitless, tiring, and often dangerous, to keep struggling to attain happiness in this world; that is the real meaning of *dukkha* or suffering. And *Dukkha Sacca* (First Noble Truth) is that this *dukkha* (suffering) can be overcome; see the second part of the following post: [“Anatta and Dukkha – True Meanings.”](#)
- The mundane versions can be grasped by a normal human who is unaware of the true *Tilakkhaṇa* or the true nature of this world. The transcendental or *lokuttara* versions can be comprehended only with an understanding of *anicca, dukkha, anatta*.
 - Without an understanding of the *anicca* nature, we perceive that sense pleasures are good, and are worth striving for. But when one starts comprehending the *anicca* nature, one realizes that suffering is actually rooted in sense pleasures; see, [“Assāda, Ādīnava, Nissarana.”](#)
9. But the *Tilakkhaṇa* (starting with *anicca* nature) are hard to comprehend. It helps to understand and follow the mundane versions of Dhamma concepts first; see, [“Buddha Dhamma – In a Chart”](#) and the post [“What is Unique in Buddha Dhamma?”](#) referred to in that chart.
- Not everyone can grasp the deeper meanings of the *anicca, dukkha, anatta* right way. It takes a significant effort. After all, a *Sotāpanna* is better off than an Emperor or a King (see, [“Why a Sotāpanna is Better off than any King, Emperor, or a Billionaire”](#)), and one should not think it can be done easily (even though it may be easier for those who happen to have cultivated the Path in recent previous births).
10. To summarize, the critical difference between the two types of 37 Factors of Enlightenment is the following:
- The mundane (*lokiya*) 37 Factors of Enlightenment are cultivated with the goal of leading a “moral life” and to seek “good rebirths” in future lives.

- The transcendental (*lokuttara*) 37 Factors of Enlightenment are cultivated with the goal of attaining *Nibbāna*, AFTER one realizes that this world of 31 realms has nothing but suffering to offer in the long run.
- The 37 factors are named the same in both versions, but each term has a deeper meaning in the *lokuttara* version, since it has *Nibbāna* as the goal.
- **As one starts to grasp the meanings of *Tilakkhaṇa*, one will automatically transition over to the *lokuttara* version.** There is no need to worry about which version one is cultivating. **The difference is not in the terms, but in grasping the *anicca* (and thus *dukkha* and *anatta*) nature.**
- Furthermore, it is not necessary to cultivate (or even to memorize) all 37 factors. **When one cultivates even one factor, all 37 grow together; but it is good to know what those factors and how they work together.** The 37 factors are listed in “[37 Factors of Enlightenment](#).”

11. There are a lot of things to contemplate about in the above material, so I will continue this discussion on the 37 factors in a follow-up post. Some of the ideas discussed above may seem surprising (but also illuminating to those who may have been wondering about how terms like *kamma* and *satta bojjhaṅga* were in usage before Buddha Gotama). They will turn out to be supported by future evidence and also by the inter-consistency that I always try to emphasize.

- Even though we may not have all the evidence of historical facts (they keep emerging slowly), there is no need to wait for fool-proof archaeological evidence.
- One can analyze and examine the “bigger picture” of the Buddha, the soundness of Abhidhamma, and the solid inter-consistency of Buddha Dhamma to realize that the above explanation must be correct. Of course, we will discuss much more details in future posts.
- In many areas, I have been able to publish only a small fraction of material due to time limitations, and because I also keep learning things. I will not publish anything that I have doubts about. It is immensely satisfying to be able to figure out a “missing piece” and to be able to “see the bigger picture” with more clarity. It is also amazing how deep, consistent, and wonderful Buddha Dhamma is.

3.3.10 Two Versions of 37 Factors of Enlightenment

April 8, 2016

1. In the previous post, we discussed the fact that there are two versions of 37 Factors of Enlightenment (*Bodhipākkhiya Dhamma*) as well as two versions of eightfold paths. Here we continue that discussion.

2. Throughout the website, I have tried to make the case that there are three broad categories that people can be divided into :

- Those who have one or more of the ten types of *micchā diṭṭhi*; see, “[Three Kinds of Diṭṭhi, Eightfold Paths, and Samādhī](#).”
- Those who have been exposed to some form of Buddha Dhamma, have removed *micchā diṭṭhi* and thereby have the **mundane (*lokiya*) version of *sammā diṭṭhi***.
- Then there are those who have **transcendental (*lokuttara*) *Sammā Diṭṭhi***, i.e., they truly comprehend the true nature of this of 31 realms (*anicca, dukkha, anatta*), i.e., that there is hidden suffering in what we perceive to be enjoyment.

3. When one is exposed to Buddha Dhamma, one can understand the need for the wider world view with 31 realms, and that beings are born in all those realms due to their actions (*kamma*). This leads to getting rid of *micchā diṭṭhi*; see, “[Buddha Dhamma – In a Chart](#)” and “[What is Unique in Buddha Dhamma?](#).”

- When one gets rid of *micchā diṭṭhi*, one has the mundane *sammā diṭṭhi*: One knows that in order to avoid future births in the *apāyā* (four lowest realms) one needs to avoid immoral deeds (*akusala kamma*) and to cultivate moral deeds.

- With mundane *sammā diṭṭhi*, one also strives to accumulate *kusala* by doing *puñña kriya* or good deeds; **this leads to gaining *āyusa* (long life), *vanna* (healthiness), *sukha* (mundane happiness), *bala* (wealth) and , *paññā* (wisdom) in future lives. That enables one to grasp *Tilakkhaṇa* in future lives, if one fails to do so in this life.** Normally, those who are born with *tihetuka paṭisandhi* will have those qualities in this life. I will discuss this in the future post.

4. Now let us talk specifically about the **mundane 37 Factors of Enlightenment**, which is tied to the mundane *sammā diṭṭhi*. There is no specific order because they are all inter-related. But for convenience, we could use the following guide:

When one knows what is right (moral or *kusala*) and what is not (immoral or *akusala*), there are four obvious things to do. These are called **satara Sammappadhāna**, which is conventionally translated as **Four Supreme Efforts**. One exerts to:

- **00 prevent immoral qualities that have not yet arisen from arising**
- **01 abandon immoral qualities that have arisen**
- **10 initiate moral qualities that have not yet arisen to arise**
- **11 maintain and cultivate moral qualities that have arisen**

[compare [37 Factors of Enlightenment](#) item 4]

-
1. Not to let an unwholesome thought arise which has not yet arisen.
 2. Not to let an unwholesome thought continue which has already arisen.
 3. To make a wholesome thought arise which has not yet arisen.
 4. To make a wholesome thought continue which has already arisen.

They can briefly be expressed as "avoiding," "overcoming," "developing," and "maintaining," and are called the four supreme efforts.

By the way, these are intimately related to *virīya* in some other categories in the 37 factors: *Satara Iddhipada*, *Panca Indriya*, *Panca Bala*, *Satta Bojjhaṅga*, and the Noble Eightfold Path.

5. In a way, one could make a whole lot of progress (whether mundane or *lokuttara*) by focusing on the *Satara Sammappadhāna*. The word *sammappadhana* comes from “*san*” + “*ma*” + “*padhāna*.” We have previously discussed “*sammā*” or “*san*” + “*ma*” means getting rid of defilements; see, “[What is “San”?](#).” In Pāli or Sinhala, “*padhāna*” or “*pradhāna*” means dominant or leading. *Satara* is of course four.

- Therefore, ***Satara Sammappadhāna* means four key methods for getting rid of defilements**, i.e., for cleansing the mind.
 - If we can get to the habit of following the four guidelines listed in #4, then we will be cleansing our minds with time.
6. **Satara Satipatṭhāna (Four Foundations of Mindfulness)** helps one with the four tasks listed in #4 by being vigilant. These are discussed in detail in several posts in the “[Mahā Satipatṭhāna Sutta](#).”
- Basically, one keeps vigilant about committing immoral deeds with the body (*kayanupassana*), and becomes good at not reacting automatically to feelings (*vedananupassana*) or thoughts (*cittanupassana*), and when in doubt about the suitability of a given action one is about to do, compare with what is in the Dhamma (*dhammanupassana*).

- We have not discussed *dhammanupassana* in the *Mahā Satipaṭṭhāna Sutta* yet, and we can go to great depths. But we can get a simple idea from what “dhamma” means: **Dhamma is what one bears**. If one engages in activities that lead to great suffering to another (say, rape or murder), then one has accumulated a “bad Dhamma” that will yield to corresponding results (*paṭicca samuppāda*) in future lives in the four lowest realms. Similarly, if one acts with kindness one grows Dhamma suitable to be born in human or higher realms.
 - Thus one should think about the consequences of bad actions one is about to do and stop such an action; on the other hand one can be joyful about a good act that one is about to do or has done, and acquire much merits that will lead to *ayusa*, *vanna*, *sukha*, *bala* and *paññā* as discussed in #3 above.
7. Then there are **Satara Iddhipada** or the **Four Bases of Mental Power**; see, “[The Four Bases of Mental Power \(Satara Iddhipāda\)](#).” When someone has a firm goal, one develops *chanda* (liking for it), *citta* (think about it always), *virīya* (make efforts on it), and *vīmaṃsā* (finds out all relevant information).
- That completes the “three sets of fours” in the 37 Factors of Enlightenment. Next there are “two sets of fives.”
8. The **Panca Indriya (Five Mental Faculties)** are: *saddhā* (faith based on knowledge), *virīya* (effort), *sati* (mindfulness), *samādhi* (calming of the mind), and *paññā* (wisdom).
- These five factors helps one move forward on the Dhamma path. It is like a vehicle with two sets of wheels with a driver: *Sati* is in front and can be compared to the driver; *saddhā* and *paññā* are the two front wheels, and *virīya* and *samādhi* are like the back wheels.
 - All five needs to be cultivated together, in particular those sets need to be balanced: one cannot move forward with *saddhā* without *paññā*, or just by sheer effort (*virīya*) without feeling the benefits in *samādhi*.
9. When the *Pañca Indriya* are cultivated, they grow and become **Pañca Bala** or the **Five Powers**.
- These “two sets of five” are discussed in detail in “[Pañca Indriya and Pañca Bala – Five Faculties and Five Powers](#).”
10. Next, there is **Saptha Bojjanga** or the **Seven Factors of Enlightenment**.
- These seven factors are: *dhammavicaya* (which is closely related to *vīmaṃsā* and *paññā*), *virīya* (effort), *pīti* (joy), *passaddhi* (tranquility), *samādhi* (one-pointedness), and *upekkhā* (equanimity).
 - Here again, *sati* should be in front and the other six are better cultivated in two sets; see, “[11. Magga Phala and Ariya Jhānā via Cultivation of Satta Bojjhaṅga](#).” In that post, the *Satta Bojjhaṅga* are those for the *lokuttara* Path, but as I mentioned before, the procedures are the same with deeper meanings.
11. Finally, there is the **Ariya Attāṅgika Magga** or the **Noble Eightfold Path**.
- Of course it has been discussed in many posts throughout the site. One could enter “Noble Eightfold Path” in the Search box on top right and get a list of relevant posts.
 - A table in the post, “[37 Factors of Enlightenment](#)” shows how many of the factors in different categories overlap.
 - Therefore, there is no need to try to cultivate each factor. It is much better to concentrate on one category: *Cattāro Sammāppadhāna* or *Cattāro Satipaṭṭhāna* are common ones. When further along the Path, one could cultivate *Satta Bojjhaṅga*. Of course, the Noble Eightfold Path encompasses all.
12. The cultivation of the **mundane sammā diṭṭhi** together with contemplation of “[Anicca, Dukkha, Anatta](#)” gradually moves one to **transcendental (lokuttara) sammā diṭṭhi**.
- Then one will gradually switch over to the **lokuttara 37 Factors of Enlightenment**. **Like a train smoothly switching railway tracks at a railroad switch, one will move over to the lokuttara track at some point; it happens in one citta vīthi and one may not even realize it for a while.**

There is no need to worry about which one to be followed. As the meanings of *anicca*, *dukkha*, *anatta* sink in, one will start seeing the deeper aspects of the 37 Factors of Enlightenment.

13. In fact, one will truly comprehend the Four Noble Truths starting from that point. One truly start grasping the First Noble Truth (*Dukkha Sacca*), only when one comprehends *anicca*, *dukkha*, *anatta*.

- **Again, this is why the first three Noble Truths are also not listed under the 37 Factors of Enlightenment. In the previous post we discussed why the *Tilakkhaṇa* are not included; see, “[Why are Tilakkhaṇa not Included in 37 Factors of Enlightenment?](#).”**
- Comprehension of *anicca*, *dukkha*, *anatta*, at least to some extent, at the *Sotāpanna* stage helps one grasp the first Noble Truth, i.e., that this world is filled with suffering and that it can be overcome.
- The *lokuttara* version of the 37 Factors of Enlightenment — which describes ways to get to *Nibbāna* or Enlightenment — requires the comprehension of the *Tilakkhaṇa* and the first three Noble Truths first.
- Even before grasping *anicca*, *dukkha*, *anatta*, one can clearly see the dangers of a defiled mind, and be motivated to follow the mundane Path with mundane *sammā diṭṭhi*.

14. Therefore, it is better not to think much about which version of the 37 Factors of Enlightenment one is following. In fact, there is no need to think in terms of those factors.

- The key is to gradually purify one’s mind: “*ragakkhayo Nibbanan, dosakkhayo Nibbanan, Mohakkhayo Nibbanan*,” i.e., *Nibbāna* or *Niveema* or “cooling down” is achieved by getting rid of greed, hate, and ignorance in steps.
- It happens with even the mundane Path, but accelerates when switching over to the *lokuttara* Path.
- The “[Bhāvanā \(Meditation\)](#)” section could be useful in following a systematic path. But it is essential to read different posts on varying subjects, starting at the “[Moral Living and Fundamentals](#)” section. It could be harder to grasp advanced topics, say, on “[Anicca, Dukkha, Anatta](#),” without grasping the fundamentals.

3.3.11 Types of Bodies in 31 Realms – Connection to Jhāna

December 12, 2018

1. Even before the Buddha, people had three different basic ideas about “the essence” of a living being and specifically a human.

- Just like today, many people believed that the current physical body is all that is there. When one dies, that is the end of the story. One’s body would decompose and be absorbed into the Earth. **Nothing at all will be leftover, either physical or mental.** The physical body is called “*karaja kaya*” in Buddha Dhamma.
- However, there was another view that there is something that survives the physical death of the body. **This is the same as the concept of a “soul” in major religions today.** In Abrahamic religions today, it is believed that upon death, the soul will either go to heaven or hell and will forever remain there.
- So, those are the two main views about “the essence” of a human being today.

2. **However, at the time of the Buddha, those with the second view of a surviving “mental body” were split into two camps.** In order to understand that, we need to remember that there were *yogis* who were able to get into *jhānā* and also had some supernatural (*abhiññā*) powers.

- There are three kinds of “pleasures”, as we discussed in the post, “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#).” Two of these are “mundane pleasures”, associated with the 31 realms of this world.
- One is of course the “physical sense pleasures”: those associated with pictures, sounds, food, smells, and touches. That is what most humans experience. In fact, these are the pleasures associated with the 11 realms in the *kāma loka* (four lowest realms, human realm, and the 6 *deva* realms).

- The second are the *jhānic* pleasures, and those are of two varieties: *rūpāvacara jhāna* and *arūpāvacara jhāna*.

3. If one can cultivate *jhānā*, one can experience “*jhānic* pleasures.” Unlike the pleasures associated with the physical senses, *jhānic* pleasures are associated with less and less with the dense physical body as one gets to higher *jhāna*.

- Of course, *jhānic* pleasures have nothing to do with seeing nice objects, hearing nice music, eating tasty foods, smelling nice odors, or physical touching.
- In the first four *jhānā*, one just experiences fine bodily feelings (lightness in the body, etc.) as well as mental happiness. By the time one gets to the fourth *jhāna*, almost all “bodily sensations” fade out and only “*rūpa*” that is left is a “white soothing light.” So, by the fourth *jhāna*, one loses any awareness of one’s own physical body, i.e., the only “matter” one experiences is that of light.
- We must remember that light is a *rūpa* in Buddha Dhamma, even though it is a “very fine *rūpa*.” In fact, in quantum mechanics, photons (light) and electrons (matter) are treated on the same footing.

4. The four *rūpāvacara jhānā* correspond to mental states of the *rūpāvacara brahmā*, i.e., those *brahma* in the *rūpa loka* realms. Now we can see why those *rūpāvacara brahmā* do not have dense bodies.

- They do not need dense bodies! *Brhmas* do not eat, smell nice fragrances, or engage in sex.
- Those humans who can get to the fourth *jhāna* can cultivate the ability to separate the “*brhama*-like mental body” from the solid physical body. That means the “mental body” — called *manomaya kāya* — can come out of the physical body.
- This *manomaya kāya* essentially has the seat of the mind (*hadaya vatthu*) and the five *pasāda rūpa* for sensing vision, sounds, smells, taste, and touch.
- As we mentioned above, the physical body is called the *karaja kaya*.

5. The Buddha gave several analogies to describe this separation of the *manomaya kāya* from the *karaja kaya*. In the [WebLink: suttacentral: Sāmaññaphala Sutta \(DN 2\)](#):

“..Seyyathā vā pana, mahārāja, puriso asiṃ kosiyaṃ pavāheyya. Tassa evamassa: ‘ayaṃ asi, ayaṃ kosi, añño asi, aññā kosi, kosiyaṃ tveva asi pavāḷho’ti. Seyyathā vā pana, mahārāja, puriso ahiṃ karaṇḍā uddhareyya. Tassa evamassa: ‘ayaṃ ahi, ayaṃ karaṇḍo. Añño ahi, añño karaṇḍo, karaṇḍā tveva ahi ubbhato’ti.”

- **Translated:** “..suppose a man were to draw a sword out from its scabbard (sheath). He would think: “This is the sword; this is the scabbard. The sword is one thing, the scabbard another, but the sword has been drawn out from the scabbard.” Or suppose a man were to pull a snake out from its old outer skin. He would think: “This is the snake; this is the old skin. The snake is one thing, the old skin another, but the snake has been pulled out from the old skin.”
- Therefore, separating the *manomaya kāya* from the *karaja kaya* is just like pulling out a sword from its sheath: sword is the “active element” and the sheath is like the *karaja kaya*. In the analogy: “A snake shedding its old skin”, snake is like the *manomaya kāya* and old skin is like the *karaja kaya*.”
- ***Manomaya kaya* is the “active or important element.”**

6. The bodies of the *rūpāvacara brahmā* are very similar to the *manomaya kāya* of those *yogis* who can get to those *rūpāvacara jhāna*.

- The only difference is that the *manomaya kāya* of the *rūpāvacara brahmā* do not have the three *pasāda rūpa* for smelling, tasting, or touch.
- *Rūpāvacara brahma*’s fine bodies have just the *hadaya vatthu* (seat of the mind) and two *pasāda rūpa* for seeing and hearing.

- Of course, they do not need eyes. They see and hear using a different method. **Seeing by those *brahmā* is similar to how we see dreams with our eyes closed.**

7. This *manomaya kāya* is the same one that enters the womb at conception.

- We remember that a *gandhabba* has a *manomaya kāya* as well as fine, misty-like body due to inhaling aroma. When a *gandhabba* enters a womb, this “extra bit of matter” is shed and only the *manomaya kāya* (of the size of a few *suddhaṭṭhaka*) enters the womb.
- **We also remember that these five *pasāda rūpa* are the actual sensing elements.** When the *manomaya kāya* is inside a physical body, they get the signals THROUGH the five physical senses: eyes, ears, nose, tongue, and the body. Those signals are analyzed by the brain and transmitted to the *manomaya kāya* inside the physical body.
- That can be compared to a human sitting inside a totally enclosed military tank seeing the outside with aid of cameras mounted on the body of the tank. This is discussed in “[Our Mental Body – Gandhabba.](#)”

8. When a *yogi* cultivates the fourth *jhāna* and perfects it, he/she will be able to come out of the physical body or the *karaja kaya* at will.

- **Just like a *rūpāvacara brahma*, these *yogis* who come out of the physical body with just the *manomaya kāya* can “see” and “hear” over great distances.**
- Of course, we have a hard time imagining that. But it can be compared to what happens when we see a dream. There is no need for eyes or light to see dreams; we see dreams when it is pitch black at night with our eyes closed; we do not “see” dreams with our eyes.

9. In some stressful situations (like heart operations), the *manomaya kāya* can separate from the physical body, and that is what is called the “out-of-body experience (OBE).”

- It also happens to some who had almost died, but “manage to come back to life.” These are also called Near-Death Experiences (NDE).
- There are many books written on OBE and NDE. “Consciousness Beyond Life”, by Pim van Lommel (2010) gives detailed accounts of case studies of OBE experienced by people undergoing heart operations.

10. This *manomaya kāya* (with a *hadaya vatthu* and five *pasāda rūpa*) that can be separated from the *karaja kaya* was called “*rūpi manomaya kāya*” by those *yogis* at the time of the Buddha.

It is called “*rūpi manomaya kāya*” because it has all five *pasāda rūpa* and thus essentially has all five senses. Even though one cannot move solid objects with the fine body, one will be able to “touch.” Just like vision is not with physical eyes, all five “physical senses” are different than with physical body.

- There is a second type of *manomaya kāya* discussed by the Buddha in the [WebLink: suttacentral: Potthapāda Sutta \(DN 9\)](#). This was called “*arūpi saññāmaya kaya*.” We will discuss that in the next post. **These bodies or “*kaya*” are associated with *arūpāvacara brahmā* (and thus *arūpāvacara jhānā*).**
- It could be a good idea to get refresh the memory on what is meant by *saññā*: “[Saññā – What It Really Means.](#)”
- Basically, when one recognizes an object or understands a concept, then one has “an understanding” of what it is. That is what *saññā* is. So, an “*arūpi saññāmaya kaya*” basically means a “body (almost) devoid of matter but has the ability to recognize/understand.”

3.3.12 **Finest Manomaya Kāya of an Arūpāvacara Brahma**

December 19, 2018

1. As we discussed in the previous post, we can get some insights on “what survives the death of a physical body” by analyzing *jhānic* experiences; see, “[Types of Bodies in 31 Realms – Connection to Jhāna.](#)”
 - As discussed there, one can experience for oneself that life is possible without a heavy, solid physical body. This can be experienced for oneself by cultivating *jhāna*.
 - There are many people even today who can experience *jhāna*, especially up to the fourth *jhāna*.
2. When one gets to the first *jhāna*, one “transcends” (or go beyond) the *kāma loka* or “sense sphere.” Our human realm is one of 11 realms in the *kāma loka* as we discussed before.
 - There are 16 realms in “*rūpa loka*” where *rūpāvacara brahmā* live and there are 4 realms in “*arūpa loka*” where *arūpāvacara brahmā* live. Those are the 31 realms.
 - In the [WebLink: suttacentral: Anupubbanirodha Sutta \(AN 9.31\)](#): “*Paṭhamam jhānam samāpannassa kāmasaññā niruddhā hotī*” OR “**When one has attained the first *jhāna*, perceptions of sensuality (*kāma saññā*) stop from arising.**”
 - That means *kāma saṅkappa* (or sensual thoughts) would not arise in the *yogi*. However, the *yogi* still feels his/her physical body. Those “bodily sensations” decrease as the *yogi* attains from the first to the fourth *jhāna*.
 - Those *jhānic* levels one through four correspond to the 16 *rūpāvacara brahma realms*.
3. If the *yogi* can advance above the fourth *jhāna*, he/she next gets into the fifth *jhāna* which has a different mental experience. *Jhānās* fifth through eighth are called *arūpāvacara jhāna*.
 - The fifth *jhāna* or the first of the *arūpāvacara jhāna* is called the *ākāsānancāyatana*.
 - Even though those *arūpāvacara jhāna* are labelled as fifth through eighth *jhāna* these days, in *suttā* they are just called by their names: *ākāsānancāyatana*, *viññāṇañcāyatana*, *ākīñcaññāyatana*, *nevasaññānāsaññāyatana*.
 - **The experiences of yogis in *arūpāvacara jhāna* are similar to those of *arūpāvacara brahmā* in the highest 4 realms in the 31 realms.**
4. Those *arūpāvacara brahmā* cannot even see or hear, unlike the *rūpāvacara brahmā*.
 - Those *arūpāvacara brahmā* have just a trace of matter: a *hadaya vatthu*, which is the seat of the mind. However, unlike *rūpāvacara brahmā*, they do not have *pasāda rūpa* for seeing and hearing.
 - They only have an awareness (*saññā*) of existence. In the [WebLink: suttacentral: Potthapāda Sutta \(DN 9\)](#) (and other *suttā*) **this “third type of body” is called an “*arupi saññāmayā kaya*.”**
 - *Arupi* means “without *rūpa*” (it actually has a trace of *rūpa*, just the *hadaya vatthu*). *Saññāmayā* means “with *saññā*”, i.e., one can still experience that one is still alive, one has perception (*saññā*).
5. It may be a good idea to re-read the following posts in this series just to firmly grasp these key ideas. Then it would be easier to follow the upcoming discussions. The first was, “[Anattā \(Mundane Interpretation\) – No ‘Unchanging Self.’](#)”
 - We discussed in the second post that the *manomaya kāya* (with a *hadaya vatthu* and five *pasāda rūpa*) that can be separated from the *karaja kaya* was called “***rupi manomaya kāya*”** by those *yogis* at the time of the Buddha: “[Types of Bodies in 31 Realms – Connection to Jhāna.](#)”
 - With that extremely small *manomaya kāya*, a *rupavacara brahma* or a *yogi* who can come out of the physical body can hear and see. Since this *manomaya kāya* is much smaller than an atom, this is something that is hard for us to even imagine.
 - However, those who experience out-of-body experiences, that is exactly what happens. So, this effect has been experienced by many people; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\).](#)”

6. Now we can summarize what we have figured out so far: **Any living being is born with a basic *manomaya kāya* that comes in three basic varieties:**

- Those in *kāma loka* have a *manomaya kāya* with *hadaya vatthu* and five *pasāda rūpa* (i.e., all six “sensing elements.” **That *manomaya kāya* is “enclosed in” in a solid physical body (*karaja kaya*) that allows one to experience “sense pleasures.”**
- In the 16 *rūpāvacara brahma* realms, the *manomaya kāya* has two *pasāda rūpa* (for vision and hearing), in addition to the seat of the mind (*hadaya vatthu*).
- The finest *manomaya kāya* is in the *arūpa loka* (4 *arūpāvacara brahma* realms), which only has the *hadaya vatthu*. They can only think.

7. There are 11 realms in *kāma loka* (four *apāyā*, human realm, and 6 *deva* realms).

- The six *deva* realms belong to the *kāma loka*, and all those *devas* have “physical bodies” (*karaja kaya*) but they are finer than those of humans.
- Of course, a solid physical body (*karaja kaya*) is not there for either a *rūpāvacara* or an *arūpāvacara brahma*.

8. By the way, we can now see how suffering decreases as one starts at the lowest realms (*apāyā*) and move up to human, *deva*, and *brahma* realms. Human realm is where both suffering and happiness are present. Sense pleasures are optimum in *deva* realms.

- However, sense pleasures are not available in *brahma* realms. But the *jhānic* pleasures in those *brahma* realms are much better than sense pleasures.
- Thoughts of greed and hate/anger cannot arise in any *brahma*, including *rūpāvacara brahmā*. This is why their minds are at peace.

9. That is also true of those who can get into the corresponding *jhānā*. While in those *jhāna*, thoughts of greed or hate/anger do not arise.

- This is as close as one can get to *Nibbāna*, without even comprehending Buddha Dhamma. As we know, *yogis* were able to get to those *jhānā* even before the Buddha by using breath or *kasina* meditations.
- If those *yogis* do not lose the ability to get into *jhāna* until death, they will be born in the corresponding *brahma* realms. However, since they have only SUPPRESSED greed and hate, they will come back down to the human realm at the end of “*brahma bhava*.” Subsequently, they can eventually end up in the lowest four realms (*apāyā*).

10. So, now we can see that there are two types of *jhānic* pleasures, and that those two varieties give rise to **“two types of mental bodies or *manomaya kāya*” (in addition to the dense body or the *karaja kaya* that we are familiar with).**

- However, a human who cultivates *jhāna* and even get to the highest *arūpāvacara jhāna* (8th *jhāna*), will still have the human *manomaya kāya* that he/she was born with.
- If a *yogi* comes out of the physical body with that *manomaya kāya*, it would have five *pasāda rūpa* and a *hadaya vatthu*.

11. Therefore, that *manomaya kāya* that can be separated from the physical body of a human would have all five *pasāda rūpa* that are the actual “sensing elements” for seeing, hearing, tasting, smelling, and touching. Of course the “seat of the mind” — or the *hadaya vatthu* — would also come out with those five *pasāda rūpa*.

- This is because it is not possible to separate any *pasāda rūpa* from the *manomaya kāya* that is born at the beginning of the human *bhava*.

- In fact, it is that *manomaya kāya* that lives as a *gandhabba* in between two adjacent human births (*jāti*) until a suitable womb becomes available for it to enter.

12. In Buddha Dhamma, the closest equivalent of a “soul” is the “*manomaya kāya*” or the “mental body.” **However, it is not the same an unchanging soul.**

- As we saw, *manomaya kāya* will take fundamentally different forms in the three types of *loka* that encompasses the 31 realms: *kāma loka*, *rūpa loka*, and *arūpa loka*.
- Furthermore, even during the human *bhava*, the *manomaya kāya* can undergo drastic changes. When one attain *jhāna* or *magga phala*, it will undergo significant changes. In the case of *magga phala*, those changes are permanent.

13. In the next post, we will summarize the information that we have discussed so far with reference to key sections in the [WebLink: suttacentral: Potthapāda Sutta \(DN 9\)](#).

- In that *sutta*, the Buddha explained those three types of “*kaya*” to Potthapāda, **who was asking whether there exists an “absolute, unchanging, self” or an *attā* in the deeper sense (just like a “soul” that would have a “permanent existence” in heaven or hell in Abrahamic religions today).**
- It must be kept in mind that the above descriptions provide only the basic framework of the three types of *loka* (*kāma loka*, *rūpa loka*, and *arūpa loka*), that encompass the 31 realms.
- However, that is sufficient to get a good idea about the key differences among the 31 realms.
- Furthermore, it explains a deeper meaning of “*attā*.”

3.4 Gati, Bhava, and Jāti

- [Namagotta, Bhava, Kamma Bīja, and Mano Loka \(Mind Plane\)](#)
- [Gati and Bhava – Many Varieties](#)
- [Gati to Bhava to Jāti – Ours to Control](#)
- [Memory, Brain, Mind, Nama Loka, Kamma Bhava, Kamma Vipāka](#)
- [Bhava and Jāti – States of Existence and Births Therein](#)

- [Pāpa Kamma Versus Akusala Kamma](#)

3.4.1 Namagotta, Bhava, Kamma Bīja, and Mano Loka (Mind Plane)

Revised September 1, 2018; Mar2, 2020

1. A strong *kamma* can bring *vipaka* in the future. **The mind releases a bit of energy and that is a *kamma bīja* (or *kamma bhava*.)** Where are those *kamma bīja/bhava* are “located”? That is a bit hard to explain because we have no “feel” for mental phenomena. We have a hard time connecting with anything that is not discernible to our five physical senses. We need to see, hear, taste, smell, or touch to feel confident that “something is real”.

- Yet, if one makes an effort, it is quite possible to get a good idea of what these are. Modern science helps here too.
- If someone is serious about figuring this out, I would really recommend reading the posts, “[Difference between a Wish and a Determination \(Paramita\)](#)” and, mainly, “[Recent Evidence for Unbroken Memory Records \(HSAM\)](#)” first.

2. From the second post above, It is clear that complete records of ALL our past activities during even just this life will be impossible to be “stored” in the neurons in the brain. Some people can remember EVERYTHING that happened to them over many years, in minute detail.

- The Buddha said those memories are in the *mano loka* (“*nāma thalaya*” in Sinhala) which could be called the “mind plane”; those memories in the *mano loka* come to our mind via *mana indriya* in the brain: “[WebLink: suttacentral: Indriyakathā](#)” (no details given in this link).
- The “storage” is not in a physical device like a tape. *Mano loka* is devoid of any material things; it is all “*nāma*” and matter.
- The closest analogy we have to the mental plane is the “dream world.” When we dream, we can “hear”, “see” and “do” things but it is all “*nāma*.” When we “playback” memories, it is somewhat like seeing a dream.
- We can recall our memories (whatever we can remember) very quickly. If we have a strong memory of some event, even from many years ago, we can recall it in our mind instantaneously. We just think about it and we can “see” it playback with sounds and the background just like it happened. Our minds can connect to the “mind plane” and recall things without a delay; see, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”
- In this “recall process”, the brain acts as the intermediary; the brain (actually the *mana indriya* in the brain) acts like a “transmitter” and a “receiver” in communications with the mental plane. As we get old, the brain gets weaker and thus the “recall power” gets diminished. Meditation (especially *dhamma vicaya* or contemplation on dhamma concepts) helps keep the brain healthy.
- It is just that some (few) people are born with the ability to recall ANYTHING from this life, as that post on memory records (HSAM) described. This ability can be also cultivated by developing *abhiññā* powers as I discussed in another post.

3. When we “wish or hope for something” that thought will have a record of that in the *mano loka* too; later, we can recall that we made such a “wish.”

- While a “*nāmagotta*” (I have written this as *nāma gotta* too) is just a record, a wish has certain energy in it, but if not cultivated by further thinking and doing things relevant to that wish, that energy will soon fade away.
- When we make a “determination” that has more “*javana* power” than just a “wish” and such records are stronger, i.e., they do not fade away quickly.
- Our wishes, determinations, cravings for things, future plans, etc are all *saṅkhāra* (moral and immoral). Some of them are strong and become *abhisāṅkhāra*. They all lead to “*kamma bīja* (seeds)” or varying strengths. Some are strong enough to lead to rebirths; others bring *vipāka* during a lifetime. They can be good or bad.
- Thus “*Dhammo have rakkhati dhammacāriṃ*” or “dhamma will guide those who live according to dhamma” applies to both “good” and “bad” dhamma. Moral people will be guided upwards, and immoral people will be guided downward. **Mother nature is neutral; each one chooses which way to proceed. However, the results are ALWAYS according to *kamma* or actions; see, “[Paticca Samuppāda – “Pati+ichcha”+“Sama+uppāda”.](#)”**

4. Records of both past “*nāmagotta*” and our mental energies associated with “future plans” (“*kamma bīja*”) are in the mind plane. **The difference is that past “*nāmagotta*” are permanent and have no energy to do anything. On the other hand, the energies for “future plans” (“*kamma bīja*”) are in flux and can get stronger or fade away.**

- However, the record for even a determination (whether or not fulfilled yet) will be recorded in the mind plane, because just after passing away it is in the past and **that thought becomes a record in “*nāmagotta*.”** For example, if one makes a determination to kill another person, that thought will be recorded in the mental plane as a *nāmagotta*. In addition, there will be a tentative record of a “*kamma bīja*” associated with the future too. The more he thinks and plans, the stronger the “*kamma bīja*” gets. If, somehow he comes to his senses and discard that thought the “future” imprint (and associated energy) will fade away, and there will not be a “*kamma bīja*” associated with it anymore.
- When one is thinking about a good or a bad act, it has not acquired the “full *kammic* potential”, i.e., it is said that the “*kamma patha*” is not complete. If that person ended up killing the other person, then the “*kamma patha*” is complete and there will be a “*kamma bīja*” established that will be there up to 91 *mahā kalpas* (a *mahā kalpa* is the lifetime of a universe, roughly 30 billion years).
- If that strong “*kamma bīja*” brings about a bad rebirth thus depleting its energy, at that point that result (new birth) now becomes a “*nāmagotta*” or just a record.
- This is a simple overview of what happens; if one contemplates it, one should be able to get an idea of the concept.

5. Depending on the nature of the deed, a “*kamma bīja*” may be in different types of “bins”, called “*kamma bhava*.”

- For example, if someone cultivates *rūpa jhānā*, then the associated *kamma bīja* will be in the “*rūpa loka bhava*” or simply, “*rūpa bhava*.” If another cultivates *arūpa jhānā* (one of the highest four *jhānā*), then the associated *kamma bīja* will be in “*arūpa bhava*” and when that *kamma bīja* releases its energy, he/she will be born in the *arūpa loka*.
- **All other (abhi)saṅkhāra** will bring about *vipāka* in the *kāma loka* (*deva*, human realms and the four lowest realms). We will discuss this in more detail in the next post.
- **To summarize:** When we do a *kamma* (*abhisāṅkhāra*), we generate certain energy called a *kamma bīja*. Those energies will be “stored” in the appropriate “*bhava*” in the mind plane. When the *vipāka*

associated with a *kamma bīja* is experienced, that energy is spent. Only a record of that (*nāmagotta*) survives in the mind plane.

6. Here is a chart that summarizes the above:

We have been trapped perpetually in the cycles indicated by the pink arrows.

Mind Plane Drawing

Click to open and print the above chart: [WebLink: Mind Plane Drawing](#)

- As the chart shows, we make “*kamma bīja*” of varying strengths in various “*bhava*” during a lifetime that will lead to more rebirths as well as uncountable *kamma vipāka* during those rebirths.

6. Another important point is that there are two ways to “bypass” a strong “*kamma bīja*” associated with such a “*kamma patha*” of, say, killing of a human.

- He could realize the enormity of the deed, ask for forgiveness in his mind (genuinely), and start engaging in moral deeds, then he may be able to “wear out” some of the energy of that “*kamma bīja*.” **More importantly, if he can cultivate *Ariya metta bhāvanā*, he may be able to wear it out completely** (unless it is one of the *anantariya kamma*, like killing a parent); see, “[5. Ariya Metta Bhāvanā](#).”
- The other way is of course to attain the *Arahanthood*. Unless that particular “*kamma seed*” brings about the *vipāka* before that *Arahant* passes away, it will become null at the death of the *Arahant*.
- Furthermore, if that “*kamma seed*” is not that strong and does not bring *vipāka* within 91 *mahā kalpas*, then it will become null and void too. Only the “*nāmagotta*” are permanent, “*kamma bīja*” are waiting for appropriate conditions to bring *vipāka* and are changing with time. However, “*nāmagotta*” just records, but “*kamma bīja*” have the energy to bring about results (*vipāka*).

7. There are special cases where a “*kamma bīja*” (and associated “*kamma bhava*”) WILL NOT change. An *anantariya kamma* establishes a “*kamma bīja*” (and “*kamma bhava*”) that WILL bring about *vipāka* without exception.

On the immoral side, there are five *anantariya kamma* that WILL bring rebirth in the *apāyā* at the end of this life (i.e., when one dies). Those are, killing of mother, father, or an *Arahant*, injuring a Buddha, and causing a schism in *Saṅgha*. See, “[WebLink: suttacentral: Parikuppa Sutta \(AN 5.129\)](#).”

- On the “moral side”, all stages of *Nibbāna* can be thought of as “*anantariya kamma*.” For example, when one attains the *Sotāpanna* stage, he/she WILL be born only according to that “*Ariya bhava*” or that special *kammic* energy; thus a rebirth in the lowest four realms WILL NOT happen.
- Another interesting point is that when a *Bodhisattva* cultivates “*paramita*” to become a Buddha, what he is doing is to establish a very strong “*kamma bīja*” over innumerable lives. But at some point that “*kamma bīja*” gets fully established and at that point, the *Bodhisattva* gets “*niyata vivaraṇa*” (confirmation of attaining the Buddhahood or “*Buddha bhava*”) from a Buddha at that time.

The above concepts are looked at from a bit different perspective in, “[Memory, Brain, Mind, Nama Loka, Kamma Bhava, Kamma Vipāka](#).” Of course, they are consistent!

In the next post, we will discuss how different types of “*bhava*” are fueled by our actions: “[Gati and Bhava – Many Varieties](#)”,

3.4.2 Gati and Bhava – Many Varieties

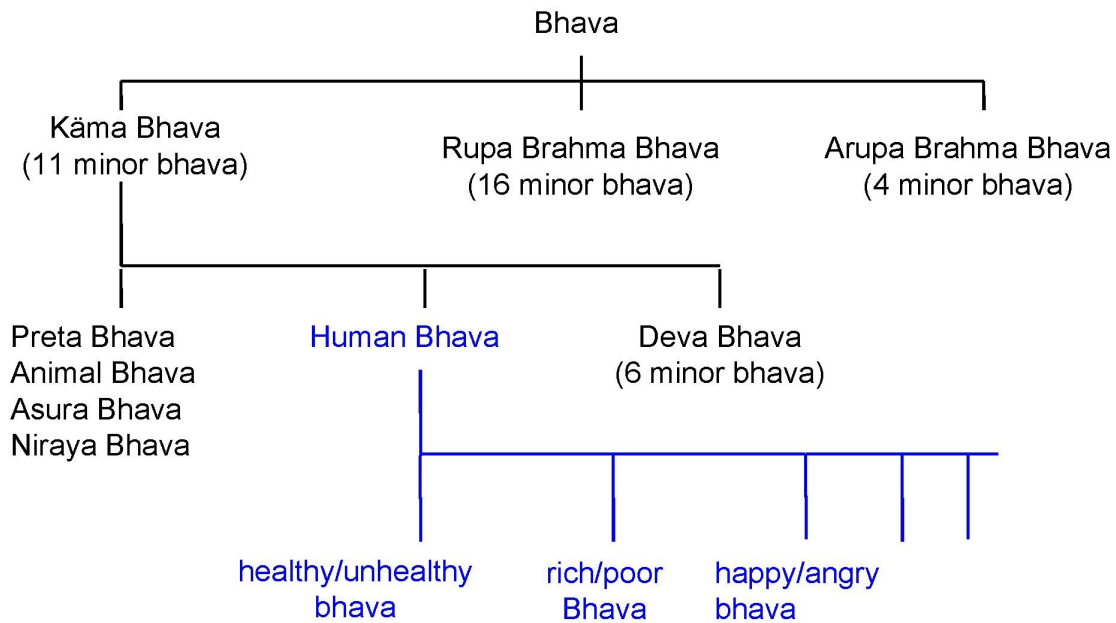

Revised February 27, 2019

Humans have many *gathi* (*gati*) or character qualities. These character qualities lead to one's future existences (*bhava*). It is that important.

1. We see that there are three major “*bhava*” or existence corresponding to the three major levels of existence that the 31 realms can be divided into: *kāma bhava*, *rūpa bhava*, and *arūpa bhava*.

- Each of those can be now subdivided into the 31 realms; see, “[31 Realms of Existence](#).”
- These living beings with *kāma bhava* live in *kāma loka*: 4 *apāyā*, 1 human, and 6 *deva* realms. Those with *rūpa bhava* live in *rūpa loka* made of 16 *rūpāvacara brahma* realms. Those with *arūpa bhava* live in the 4 *arūpāvacara brahma* realms in the *arūpa loka*.

2. The following chart shows the division of the 11 *kāma loka* realms into the 4 *apāyā*, the human realm and 6 *deva* realms.

1. Ultimately there are infinite number of “bhava” according to one’s “gathi”.
2. Within each bhava, there are numerous kamma beeja (seeds). Within “unhealthy bhava” there may be a kamma beeja for cancer, back pain, etc.
3. Same person may have different bhava (e.g., rich/poor) at different times.

Click to open and print the above chart: [“WebLink: PDF Download: Bhava and Gathi Chart.”](#)

- The human realm (or *bhava*) can now be subdivided into an infinite number of smaller subdivisions, corresponding to the vast number of varieties that “human *gathi*” can give rise to: healthy/unhealthy, rich/poor, happy/angry, etc as shown in the chart. Now we are getting into personal *gathi*. Most major ones (rich/poor, healthy/unhealthy, etc) we inherit from the kamma *bīja* that was responsible for this birth.
3. Most of the activities of humans are associated with the enjoyment of sensual pleasures in the *kāma loka*. Instead of enjoying *jhānic* pleasures like a few of us (see below), most of us normally enjoy sensual pleasures associated with the five physical senses.
- We like to see eye-pleasing views, hear ear-pleasing sounds, taste tongue-pleasing flavors, smell nose-pleasing odors, and touch body-pleasing objects.
 - All five sense faculties are there only in the *kāma loka*.
 - *Rūpa loka Brahmā* do not have noses or tongues, and in *arūpa loka* there is only the mind.
4. When we are unable to satisfy some sense desires, we as humans tend to do immoral things to fulfill such sense desires; these are the *apuññābhisankhāra* associated with strong “*kamma patha*” that will generate “bad *kamma bīja*” to bring about bad consequences or *vipāka* that could lead to rebirth in the lowest four realms of *kāma loka*; see the previous post, [“Namagotta, Bhava, Kamma Bīja, and Mano Loka \(Mind Plane\).”](#)
- For example, a married man, not satisfied with sex with the wife, may have sex with another woman or even worse, with a child. His tendency to do that may even come from previous lives or he may have slowly built up that “*gathi*” over time increasingly engaging in sexual activities outside the marriage. Either way, such acts are done by animals; they engage in sex without any discrimination. Thus such activities will generate *kamma bīja* (or *kamma bija*) in the *animal bhava*; see the above chart.

- Or, one may be engaging in fishing or hunting both for the pleasure of it or even to make a living. Either way, it is an “animal *gathi*”; animals kill for food. Thus one is building up *kamma* seeds in *animal bhava*.
5. If one is very greedy, one may build up *kamma bīja* appropriate for “hungry ghosts” in the *preta loka*. If one is lazy and depends on others for their livelihood one may build up *kamma* seeds in the *asura bhava*; see the chart. We can thus think about how the desire for sense pleasures can lead to the generation of “bad *kamma bīja*” in three of the four lowest realms.
- “Bad *kamma bīja*” in the lowest realm of *niraya* (hell) are generated by strong hate or *vyāpāda*. As we have discussed before, attachment to sense pleasures (greed) can turn to hate when someone else gets in the way. Most heinous crimes, including killing of other humans, are done with such strong hate.
 - As one follows the Path, one will gradually lose animal, *preta*, *asura*, and *niraya gathi*, and one day will attain the *Sotāpanna* stage.
 - Thus birth in the lowest realms of the *kāma loka* are not just due to *kāma rāga*, but strong versions of greed (*lobha*) and hate (*dosa*); see, “[Sorting out Some Key Pāli Terms \(Tanhā, Lobha, Dosa, Moha, etc\).](#)”
6. If you think about it for a minute you will realize that most of the *abhisankhāra* that we do, are done targeting one or more of those sense-pleasing activities (and they are normally not even immoral, i.e, but they are still *apuññābhisankhāra*, but with less *kammic* energy). But these do not lead to births in the *apāyā*.
- Since we crave those things, we are attached to those things, and according to “*pati+ichcha*” (or bonding with liking or desire) leading to “*sama + uppāda*” (births accordingly).
 - Thus the more we engage in these activities with zest (an *Arahant* does some of these too, but without any cravings), we make *kamma bīja* in the *kāma bhava*; we keep strengthening “*kāma gathi*.”
7. On the other hand, some people get dissatisfied with the sense pleasures, and cultivate *jhānā* to enjoy “mind pleasures” either in the *rūpa loka* or *arūpa loka*.
- Thus, those who have *kāma rāga* will generate *kāma bhava*;
 - *Rūpa rāga* and *arūpa rāga* (in #2 above) lead respectively to *rūpa bhava* and *arūpa bhava*.
 - Thus we can see that how “*bhava*” are prepared and strengthened by habitually doing things that one likes according to one’s *gathi*.
 - Doing things involve *kāya sankhāra*; speaking and thinking about them involve *vacī sankhāra*. This is why *sankhāra* lead to a “defiled mindset” or *viññāṇa*, which in turn lead to the corresponding *bhava* via those steps in *Paṭicca Samuppāda*.
8. Thus “*bhava*” is an energy that we build up ourselves through our actions. Even if someone does not like to be born a dog, if one keeps doing things that are normally done by dogs, then one is preparing *bhava* to be born in the “*dog bhava*.”
- One time I heard over the radio in the news that a person was arrested for engaging in sex with a female dog. Even though he was still in the human realm, for a while he got “born” in the “*dog bhava*.” Since that is what he is willingly doing, he is very likely be born a dog at death. This is a good example for both “*pavutti kamma bhava*” and “*uppatti kamma bhava*.”
 - This is also a good example of how one can become morally blind (*kāmacchanda nivarana*), when greed or lust rises to a high level.
9. One thing that should have become clear is that even if we do not do any immoral deeds, we are bound to be reborn in the *kāma loka* (sense realms of the four *apāyā* and the human and *Deva* realms) as long as we crave sense pleasures. But such sensual cravings, by themselves, do not lead to birth in the *apāyā*; birth in the *apāyā* is due to *apuññābhisankhāra* or immoral *sankhāra* (see #5 above).

- As long as we like sense pleasures (and do not realize the dangers in them), we will have “*kāma gathī*” and thus we will have “*kāma bhava*,” i.e., we will keep generating both good and bad *kamma bīja* that belong to the *kāma bhava*.
- So, what are the dangers in remaining in *kāma loka*? Even though we may not do any immoral deeds in this birth (because of our circumstances of being born in a good family, good country, etc), we are bound to be reborn in a bad environment where we may have to do immoral deeds to survive; and then we will make *kamma bīja* suitable for rebirth in the *apāyā*.
- In fact, it is very likely that we all already have such bad *kamma bīja*, because we have no idea what kind of deeds we have done in the past lives.

10. The mundane way to escape from the *kāma loka* is to cultivate *anāriya jhānā* (either *rūpa jhānā* or *arūpa jhānā*), and seek rebirth in *rūpa* or *arūpa loka*. But the problem is even then we will not be “really free” from rebirth in the *kāma loka* in the future. This is because after the *kammic* energy of that *rūpa bhava* or *arūpa bhava* is worn out, that *anāriya* person will be reborn in *kāma loka* again.

- This is why the Buddha admonished the *bhikkhus* to strive hard to attain at least the *Sotāpanna* stage of *Nibbāna*. He said if we really knew the dangers of rebirth in the *kāma loka*, we will make haste like a person who will try to find a way to put out a fire that is engulfing oneself.
- Some people think these are depressing thoughts. **But the facts cannot be avoided by not thinking about them.** In fact, when one realizes the true nature of this world and make some progress to be free from that predicament, one will start feeling relieved and happy; this is the *nirāmisā sukha* of *Nibbāna*.

11. In general, as we have referred to before, “*bhava*” means existence somewhere in “this world.” It is even better to say that “*bhava*” means the “potential for existence” somewhere “in this world of 31 realms.”

- When someone cultivates “*rūpa loka*” *jhānā*, one generates a *kammic* energy in a *kamma bīja* that can lead to “existence in the *rūpa loka*.” That means, even while in the human realm, he/she can get into a *jhāna* and “effectively live in the *rūpa loka*,” because that is what a being (a *Brahma*) in the *rūpa loka* experiences; **this is called “*pavutti kamma bhava*”** (NOT “*kāma bhava*,” which we will discuss below).
- Furthermore, the more one practices that *jhāna*, one makes that *kamma bīja* strong, and when one dies one will be born in that *rūpa loka* if died while in the *jhāna*, because that *kamma bīja* will be the one he/she will “*upādāna*” or grasp at the moment of death; **this is “*uppatti kamma bhava*.”**
- Thus, that *kamma bīja* is said to be in “*rūpa loka bhava*.”

12. Similarly, another person practising *arūpa jhānā* will be cultivating a *kamma bīja* in “*arūpa loka bhava*.” Furthermore, he/she is likely to display qualities or “*gathī*” of a “*arūpa Brahma*” even while leading a human life.

- **Therefore, when one has a certain *bhava*, one has the potential to be born in that *bhava* for a short time during the current life (called *pavutti kamma bhava*) or to be born in that realm at death (*uppatti kamma bhava*).**

13. The strength of a *kamma bīja* comes from the *javana* of the *citta* while one is engaging in the activity. The worst consequences and hence strong *kamma bīja* are generated with a mind that enjoys the evil act. This is why the “*somanassa sahaḡata diṭṭhi sampayutta citta*” or the “thought (act) done with pleasure and with wrong views that arises automatically” is the strongest immoral *citta*. **Such a thought arises automatically when one has “*gathī*” compatible with such acts.**

- For example, when one engages in unlawful and immoral sexual activities, the more one enjoys such acts, and “gets used to such activities” by building up that habit or “*gathī*”; then the likelihood of such a thought to arise automatically will be higher. Then one will have higher and higher levels of *kāmacchanda* (one of the five *nivarana* that covers the mind), and thus one will not think twice before committing such an act. **The only way to break out of that vicious cycle is to contemplate the consequences**

(possible rebirth in the animal or worse realms), and make a commitment to stop such activities.

- The real danger in building up bad habits (*gathi*) is that one could progressively get into worse habits. A teenager who starts drinking could then start using drugs; then it could lead to hanging out with even worse friends and get into drug dealing or even killings. As we saw in the previous post, “*Dhammo ha ve rakkati dhammacāri*” or “Dhamma will guide one in the direction of the type of *dhamma* one associates with”, can work both ways, moral or immoral.

14. To break away from bad *gathi*, one needs to make a determination not only to stop such bad activities but also to build up the opposite good *gathi*, and start heading in the right direction. We just have to follow the mundane Eightfold Path and then the Noble Eightfold Path; see, “[Buddha Dhamma – In a Chart.](#)”

- Once firmly on the mundane eightfold path, the next steps are to do the correct *Ānāpāna bhāvanā* (“[6. Ānāpānasati Bhāvanā \(Introduction\)](#)”) and the *Satipatṭhāna bhāvanā* (“[Mahā Satipatṭhāna Sutta](#)”).

15. Also, it is NOT possible to grasp all this with a mind that is not purified. As I emphasized many times, what matters in making progress is not the “book knowledge”, **but cleansing the mind and grasping the key Dhamma concepts.**

- Any person, no matter how intelligent or educated, cannot grasp the dangers of the rebirth process UNTIL the mind is cleansed of defilements to a certain extent by both staying away from highly immoral acts AND by learning Dhamma.

16. Some people worry about whether they can get rid of certain bad habits they have. They just try to suppress them quickly by sheer will power. That does not work most of the time. One has to be patient and just follow the Path, while learning and grasping the key Dhamma concepts.

- The Buddha gave the following example: When a farmer cultivates his plot, he just needs to make sure to provide enough water, get rid of weeds, fertilize etc. There is no point in worrying about “when am I going to get the harvest?.” The crop will grow in time and bring a good harvest IF the necessary work is done.
- In the same way, if one follows the Path by leading a moral life and learning Dhamma, one will be guided in the right direction. And just like the farmer could see that the crop is growing well, one will be able to experience the progress, but not the end result in a single step.

17. In the previous post, “[Namagotta, Bhava, Kamma Bīja, and Mano Loka \(Mind Plane\)](#),” we discussed how both *nāma gotta* and *kamma bīja* (and *bhava*) are “located” in the mind plane. *Nama gotta* are just records without any embedded energy; when one thinks, speaks, and bodily acts, a trace of those thoughts, speech, and actions are recorded (like a tape) in the mind plane.

- On the other hand, the *kammic* energies associated with those activities are also recorded in the mind plane as *kamma bīja*, and those have *kammic* energies associated with them. Those *kamma bīja* are in different “bins” or “categories” called *bhava*.

3.4.3 Gati to Bhava to Jāti – Ours to Control

Revised November 15, 2018

Introduction

One’s character (*gati*) determines one’s future births. The ability to figure that out is called the “*nāmarūpa pariceda ñāṇa*.”

1. We have discussed the background material in the previous two posts: “[Namagotta, Bhava, Kamma Bīja, and Mano Loka \(Mind Plane\)](#)” and “[Gathi and Bhava – Many Varieties](#).” Now I want to bring it all together

and show that “*bhava*” is actually something that we create AND maintain on our own with the way we think, speak, and act with our ingrained habits (*gati*).

- If you have not read the previous two posts, I highly encourage reading them. It is important to get the basic concepts right, and then to rehash them in different (and yet consistent!) ways, so that the ideas sink in.
- We will use those ideas and use the *paṭicca samuppāda* sequence to trace how we make “*bhava*” OURSELVES, which in turn give rise to *jāti* (births) not only in future lives but also during this life.
- There is no one else, or even a “super being”, that can either help or hurt you in the long run. One’s destiny is up to oneself. The Buddha said, “*attā hi attano nātho, ko hi nātho parosiyā*” or “One is indeed one’s own refuge; how can others be refuge to one?.” Even the Buddha could only teach the way.

What Are *Gati*?

2. “*Gati*” is a key word in Buddha Dhamma. There is no perfect English translation but habits, tendencies, and biases convey similar meaning. *Gati* has a deeper meaning because sometimes one’s *samsāric gati* (habits and tendencies from previous lives) may lie dormant.

- For example, a teenager may not have a “habit” of drinking, but after a few drinks may get “hooked” easier than others if he had a corresponding *gati* from past lives.
- Also, I get messages from people who never even paid attention to “Buddhism” getting to *samādhi* (state of calmness) just reading these posts; that is also a “*gati*” from past lives. They are likely to have been exposed to Buddha Dhamma in previous lives.
- Most of the time we do inappropriate things (immoral *abhisāṅkhāra*) because we have a *gati* or tendency to do so. This is what is embedded in the “*avijjā paccayā saṅkhāra*” step most of the time. Our *avijjā* in such a case is not knowing that we have such *gati* or knowing about it but does not know why or how to get rid of it.
- As I pointed out in “[Sutta – Introduction](#),” “*avijjā paccayā saṅkhāra*” is just a condensed or “*uddesa*” version. We need to analyze it (“*niddesa*” and “*patiniddesa*”) to get the idea, depending on the context.

3. When we (repeatedly) do such *abhisāṅkhāra* (thoughts, speech, actions), we build-up a *viññāṇa* for it. For example, if someone likes to watch porn, the more one does it, the more that “*viññāṇa* for watching porn” will grow. It will be in the subconscious ready to “pop up.” In other words, that “*gati*” gets more established.

- Then comes “*viññāṇa paccayā nāmarūpa*,” i.e., it becomes easier to think about clips from previous views or fantasize about them. Here *nāmarūpa* are the memories (mental pictures) of past activities or “blueprints” for future plans. It is important to realize that *nāmarūpa* for *paṭisandhi viññāṇa* will be somewhat different; see, “[Akusala-Mula Paticca Samuppada](#).”

4. Now the next step is hard to resist: “*nāmarūpa paccayā saḷāyatana*.” Here *saḷāyatana* means not all six senses, but the appropriate one(s) for the activity. Here they are *cakkayatana* (based on the eye) and *manayatana* (mind).

- It is important to realize that “*āyatana*” does not mean the sense faculty like the eye; it is rather “using the sense faculty for this purpose”, for doing *abhisāṅkhāra* (for watching porn and enjoying it, in this particular example). An *Arahant* has eyes and can see, but will not use them as “*āyatana*” to “acquire ‘*saṇ*’.”
- Then comes, “*saḷāyatana paccayā phassa*.” Here of course it is not just “*phassa*” but “*samphassa*,” i.e., generate “*saṇ*” (according to one’s *gati*) in the process; see, “[Difference between Phassa and Samphassa](#).”

- Because it is not just “*phassa*” but “*samphassa*,” then one generates feelings: “*phassa paccayā vedanā*.” For example, an *Arahant* watching a porn movie will not generate any joyful feelings, because that would only involve “*phassa*” and NOT “*samphassa*.”

5. Now comes the last few steps. Because of the *sukha vedanā* (in this particular example), one will get attached to it: “*vedanā paccayā taṇhā*”; see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”

- And then, “*taṇhā paccayā upādāna*,” i.e., one grasps whole-heartedly because one really enjoys it, and would like to do it again. “*Upādāna*” means one likes to keep it close.
- Thus one makes “*bhava*” for it; one has plans to do it again, and it is a “reality” or future existence at some point: “*upādāna paccayā bhava*.”

Connection Between *Gati*, *Bhava*, and *Jāti*

6. As we can see, all this is going in our minds. The bottom line is that we just keep thinking and doing things (also called cultivating *saṅkhāra*) that we have become “attached to” or we have formed “*gati*” for. Each time we go through this series of steps we just make that “*bhava*” grow stronger.

- Then it becomes easier to be “born in that *bhava*,” i.e. *jāti* (pronounced “*jāti*”). Most people think “*jāti*” means rebirth; but it is not restricted to rebirth.
- Just like one can be born in a certain realm (animal, human, etc) at death, one can be born in the “drunken state” when one has “*bhava* to get drunk.” If one makes a “*bhava*” to watch porn, then each time one does it, it becomes easier the next time to be “born in that *bhava*,” i.e., to watch again.
- And it is easy to extend this to any other misdeed. If one forms a habit to drink without control (i.e., “get drunk to the point that one cannot think clearly”), then each time one does it one makes that *bhava* stronger; if not controlled, one day one could be an alcoholic. And it does not stop in this life. If a strong *bhava* is formed it can affect future births. In a new birth, one is born to a mother (and to a lesser extent father) with similar *gati*. Thus an alcoholic in this life is LIKELY to be born to an alcoholic mother if the next birth is in the human realm.
- It must be pointed out that “hateful *bhava*” for certain things or even for a certain person, also can be carried from life-to-life. There are many mentions in the *Tipiṭaka* of how Devadatta clashed with the Buddha (or rather the *Bodhisattva*) in previous lives.
- One’s physical body will change (most of the time drastically) from life-to-life, but one’s *gati*, *āsava*, and *bhava* are carried from life-to-life; of course those keep changing all the time too, but significant changes happen when one is human with the most ability to change one’s destiny.

7. Thus “*bhava paccayā jāti*” applies both in this life and also for future rebirths. This is the difference between “[Idappaccayatā Paticca Samuppāda](#)” and that for *paṭisandhi* to a new life: “[Akusala-Mula Paticca Samuppāda](#).”

- As explained in #6 above, one’s future births are due to one’s *gati*. The realization that one’s future births are determined by one’s *gati* — and the ability to figure out the *bhava* and *jāti* (*jāthi*) according one’s *gati* — is called “*nāmarūpa paricceda ñāṇa*” or “*nāmarūpa paricceda ñāṇa*.” This basically means “*rūpa*” are according “*nama*” (literally, one’s body is according to one’s thinking).

What Are *Āsavās* (Cravings)?

8. To make the final connection to *Nibbāna*, we see that one’s *gati* are intimately connected to one’s *āsavās* (cravings). Just like *gati*, *āsavās* are deep-seated and ingrained in one’s lifestream and most can be traced back numerous lives in the past; see, “[Āsava, Anusaya, and Gati \(Gathi\)](#).”

- While there can be an infinite number of *gati*, there are four basic categories of *āsavās*: *diṭṭhāsava*, *kāmāsava*, *bhavāsava*, *avijjāsava*; see below.

- This logical connection is clearly shown in the *Sammā Diṭṭhi sutta*. It was Ven. Sariputta who delivered that *sutta* after being asked by the Buddha to explain “*Sammā Diṭṭhi*” to other *bhikkhus* on one occasion. He went through the steps of the *paṭicca samuppāda* backwards and eventually the *bhikkhus* asked, “Is there a cause for *avijjā*?” He explained that indeed *āsavās* contribute to *avijjā*, and vice versa.
- In fact, as we see in the *Abhidhamma* section, four of the eight “basic units of matter” in a *suddhaṭṭhaka* arise due to *avijjā* and the other four due to *taṇhā* (which arise due to *āsava*). *Avijjā* and *taṇhā* are called “*bhava-mūla*” for this reason.

9. One way to explain *Nibbāna* or “complete cooling down” is to say that it is attained by getting rid of all *āsavās*. When one follows the Noble Eightfold Path, “*āsavakkhaya*” is achieved in steps.

- At the *Sotāpanna* stage, the first component of *āsava* or *diṭṭhāsava* (craving for various *diṭṭhis* or wrong worldviews) is removed. This all important component of *diṭṭhāsava* is solely due to not knowing the true nature of this world of 31 realms: *anicca*, *dukkha*, *anatta*. Most people carry certain *diṭṭhis* all their lives, most even coming from previous lives. The most prevalent *diṭṭhi* is the belief that there is no rebirth process.
- When one truly comprehends that consequences of *immoral* acts can be much harsher than we normally believe (birth in the *apāyā*), that itself removes the causes for rebirth in the *apāyā*.

Connection to the Four Stages of *Nibbāna*

10. A *Sotāpanna* would still have the other three *āsavās*: *kāmāsava* (craving for sense pleasures), *bhavāsava* (craving for living somewhere in the 31 realms), and *avijjāsava* (cravings due to not knowing *anicca*, *dukkha*, *anatta* fully).

- *Kāmāsava* is reduced at the *Sakadāgāmi* stage and is removed at the *Anāgāmi* stage.
- *Bhavāsava* and *avijjāsava* are removed only at the *Arahanthood*.
- Of course, all four *āsavās* keep getting reduced at each stage of *Nibbāna*. Thus a *Sotāpanna*, for example, would have reduced the other three *āsavās* to some level.
- It is also clear that comprehension of *anicca*, *dukkha*, *anatta* gradually increases at each stage and is complete only at the *Arahant* stage.

11. It is nice to see the self-consistency, and the fact that one can analyze a given situation in different ways.

- One may have a Ph.D. or one may be able to recite the whole of the *Tipiṭaka*; yet one would not be even able to get to the *Sotāpanna magga* without comprehending *anicca*, *dukkha*, *anatta* to some level.
- *Diṭṭhāsava* cannot be removed until one is well on the way on the mundane eightfold path, because one’s mind needs to be cleared of the strongest defilements. As I keep saying, this is not about “book knowledge”; it is all about cleansing one’s mind.
- Of course, *diṭṭhāsava* gives rise to various *gati*, and thus removal of such *gati* is the key to attacking *diṭṭhāsava*. The foremost is the tendency to “cling to a certain belief” and not even willing to consider the counter arguments.
- If one has the *diṭṭhi* that there is no rebirth, one needs to carefully examine the evidence for and against.
- **Another is the refusal to believe anything “that cannot be proven” by a “scientific method.”** Thus, just over 400 years ago, people looked around and asked “where are those infinite number of universes and infinite number of living beings that the Buddha was talking about?.” Even now, science is only aware of a minute fraction of our physical universe, not to mention pretty much nothing about the mind; see, “[Dhamma and Science](#)” for details.

12. The bottom line is that whether one will be a human, a *deva* or an animal in the next life will depend on what kind of *gati* we develop, and NOT what we wish/pray for. Furthermore, one can become a *Sotāpanna* in this very life by cultivating the “*gati* of a *Sotāpanna*” or “*Ariya gati*.” The key is to develop *Sammā Ditṭhi* by learning and comprehending Dhamma (the correct world view).

Next, “[Memory, Brain, Mind, Nama Loka, Kamma Bhava, Kamma Vipāka](#)”,

3.4.4 Memory, Brain, Mind, Nama Loka, Kamma Bhava, Kamma Vipāka

There are many confusing terms like *citta* and *mano* which have been differently interpreted in different books. In order to clarify these concepts, I am writing a few posts in “Dhamma Concepts” section under “Mind and Consciousness” starting with: “[1. Thoughts \(Citta\), Consciousness \(Viññāna\), and Mind \(Hadaya Vatthu\) – Introduction.](#)”

1. Think about a past event that is still vividly there in your mind. You can visualize the whole “event” just like watching a movie; you can recall what those people looked like, what they said, etc.

- Suppose a 40-year old recalls an event where she was a 10-year old playing with her mother. She will recall the event just as it happened 30 years ago: she was young and her mother was 30 years old; it took place in her parents’ house which does not even exist now. But in the “playback” that exact same time sequence is played back with the 10-year old playing with her 30-year old mother in the same house that they lived in. It is not just a “summary” of what happened, rather an exact playback showing her young mother’s features at that time, what she said, etc.
- Recently, it has been reported that some individuals have an astounding capability to instantly recall past events (during this life) in vivid detail; see, “[Recent Evidence for Unbroken Memory Records \(HSAM\).](#)”

2. Most scientists and philosophers believe that the memories are kept in the brain. Is this a realistic picture? They do not have any evidence to back this claim.

- How can all those details be “stored” in a biological membrane, ready to be retrieved at a moment’s notice? No one has explained a plausible mechanism yet.

3. Whatever we do with body, speech, and mind, a “record” (*nāma gotta*) gets established (“*bihiwelā pihitanava*” in Sinhala) in the *kamma bhava*: In the word “*bhava*”, “*bha*” means “appear and gets established”; thus the act we did, i.e., *kamma*, gets recorded in the *kamma bhava* exactly the same way it happened. **We cannot “see” *bhava* but we can see the results of *bhava* as “*jāti*.”**

- **Not only potent *kamma*, but ALL memories are stored intact in the *nāma loka*.** Basically, the thought stream is recorded continuously like a movie recording and thus can be “played back”; see, “[What Reincarnates? – Concept of a Lifestream.](#)”
- **Thus while the “fruits of *kamma*” are embedded in *kamma bīja* (seeds) in the *nāma loka* as *kamma bhava*, the movie like sequence is recorded in the *nāma loka* as *nāma gotta*.**
- Therefore, while *kamma* seeds in the *kamma bhava* can bring their results in the future, the *nāma gotta* are just records without substance: see, “[Difference Between Dhamma and Saṅkhāra \(Sankhata\).](#)” Thus unlike anything else in this world (*saṅkhāra* or *saṅkhata* (*sankata* in Sinhala)), *nāma gotta* are PERMANENT.
- This is why the Buddha Gotama could recall the exact scene that happened billions of years ago, when he received the first confirmation (“*niyata vivarana*”) of his future Buddhahood by the Buddha Deepankara. At that time he was an ascetic by the name of Sumedha and the Buddha Gotama described the whole event that took place in detail; see, [WebLink: WIKI: Dīpankara Buddha.](#)
- In the same way, the *kamma bīja* stored in the *nāma loka* are instantly activated when proper conditions are realized; see, “[Anantara and Samanantara Paccaya.](#)” However, unlike *nāma gotta*, *kamma* seeds fade away with time unless brought to bear fruit under right conditions.

4. Thus, memories (whatever the portion that is remembered) are played back in a “movie-like” manner, like in a dream. It is like a segment of a “movie recording.” It is not just a “gist” or a summary; we can recall the whole “sequence of events” like in a movie.

- This is why when someone describes an event by memory he/she always tends to tell the story sequentially: The person listening may not want to hear the whole story and could become impatient waiting for the narrator to “get to the point”, but for the narrator recalling the event, it is easier to go sequentially as the event is “played back” in his/her mind.

5. We cannot say where that memory is “located”, because they are not stored in the “physical space” or the “material world”; they are in the “*nāma loka*” or “mental world.” In contrast what we experience through our five senses is the “*rūpa loka*” or the “material world” that consists of 31 realms.

- This is also why scientists will not be able to describe the mind in terms of matter; see, “[The Double Slit Experiment – Correlation between Mind and Matter?](#).” **Mind and matter belong to two distinct domains.**
- As I will clarify in detail in the future, this is related to the fact that there are six fundamental entities (six *dhātus*): *pathavi* (hardness), *āpo* (cohesiveness), *tejo* (vitality), *vāyo* (motion), *ākāsa* (space), and *viññāna* (consciousness). The *viññāna* dhātu is associated with the “*nāma loka*” and the other five *dhātus* are associated with the “*rūpa loka*” or the “material world.” But we don’t need to worry about that right now. You will see other pieces falling into place in a “big jigsaw puzzle” as all these seemingly unrelated aspects come together to form a cohesive, complete picture of the “wider world.”
- This could be related to the possibility of higher “curled up” dimensions that is being discussed in String Theory in physics; see, “[What Happens in Other Dimensions?](#).”

6. We can normally access our own “information” from this life but some people, especially some young children, have the ability to recall *nāma gotta* from past lives. Those who have *abhiññā* powers can access such “information” or “*nāma gotta*” of other people as well; **however, even they cannot read another’s “thoughts” or “*kamma bīja*” or “*kamma bhava*.”**

- We can retrieve this memory by thinking about it. There is a mechanism for that memory to be retrieved; the mind initiates the process, but the brain acts as the “receiver” for the incoming information.
- When we think about something that happened in the past, the mind sends mind rays out and they bounce off that specific target in the “*nāma loka*” and the memory is reflected back. That retrieval process does not change the memory record, and the record stays intact. Thus one can go back and recall it again.
- When the retrieved information comes back, that signal is processed by the brain. Our whole body is prepared by the *kamma* seed that led to this human existence to limit/facilitate certain capabilities; thus what we can actually remember depends on the status of our brain. Our human bodies are generally setup (by *kamma vipāka*) to be able to retrieve only the strong memories from the early days of this life and cannot access memories of previous lives. But few people can, and so can some children. Furthermore, if the relevant parts of the brain gets damaged, then the retrieval capability may be lost.
- **Some beings in *preta loka* can remember past lives to impart more suffering on them.** They can remember the bad deeds done by them that led to the birth in the *preta* world, and how long they will have to suffer to “pay back the debt.”

7. How much of that memory one actually recalls depends on two things: the health of the brain and the purity of the mind.

- If the brain is not functioning well, only bits and pieces of the memory will be actually experienced. When people get old, the brain’s efficiency goes down and thus memory will not work well. The brain is like a playback device and if it is defective, the display will be blurry or at worst no display will result.

8. Secondly, even a person with a healthy brain, may not be able to recall memories if the mind is “covered” by the five hindrances (*panca nivarana*); see, “[Key to Calming the Mind – The Five Hindrances.](#)”

- When there is *kāmachanda* or *vyāpāda*, the mind is too much focused on those objects of thought (*ārammaṇa*). When there is *thina middha*, the mind is now “stuck” lazily at something (sleepy or just distracted), and will not retrieve the memory. With *uddhacca kukkucca*, the mind is normally “intoxicated” with power, money, beauty etc is stuck at a “low level.” With *vicikicchā* (which is due to *micchā diṭṭhi* or not knowing the true characteristics *anicca, dukkha, anatta*), one engages in inappropriate acts and thus the mind is not “sharp.”
- Thus, any, some, or all of these five factors can affect the memory of even a person with a healthy brain. When we purify our minds of the *pañca nīvaraṇa*, its ability to pinpoint a given “memory location” is improved.
- Furthermore, **when the mind is purified, that can make one's brain to function better** by changing the conditions for better *kamma vipāka* to come to fruition; see, “[Anantara and Samanantara Paccaya](#).” This “mind effect” on the brain and the body in general is being re-discovered by scientists; see, for example, “The Biology of Belief” by Bruce H. Lipton.

9. Most scientists and philosophers believe that our memories are stored in our brains. There are key problems with that assumption:

- If that is the case, then the “state of the mind” should not be a factor in recalling a memory, because then it is like retrieving a sound track from a disc; the playback should be good as long as the “playing device” (i.e., the brain) is in good condition.
- It is astounding how much one can recall from the memory. And it comes out like a video clip; we can visualize and even recall the conversations that took place a long time ago in case of poignant memories. Can all those details be “stored” in a biological membrane?
- Even if it is possible to encode all that information (exact features of the 10-year old child and her 30-year old mother, what they spoke at that time in the same tone, etc. in the hypothetical example of #1 above), how can it be recalled instantaneously?

10. Here is an article which discusses these unresolved scientific issues: [WebLink: VIEWZONE: Are your memories really in your brain?](#)

- Here is a good site if you need to dig in deeper: [WebLink: HUMAN-MEMORY: MEMORY STORAGE](#)

3.4.5 Bhava and Jāti – States of Existence and Births Therein

Revised September 7, 2016; Revised May 7, 2017; October 25, 2018; January 18, 2020

Bhava and Jāti – Two Different Things

There is much confusion about the terms “*bhava*” and “*jāti*.” But that does not need to be the case. Here we will clarify these two important terms in the *paṭicca samuppāda* (PS) cycles.

- By the way, *jāti* is pronounced “*jāthi*” with “th” sound as in “three.”

1. In both Pāli and Sinhala, *jāti* means birth; *bhava* means “නිබන්ධන බව” in Sinhala, or “existence.”

- When one gets a “human existence” or a human *bhava*, that can last thousand of years. Within that time, one can be born (*jāti*) with a physical human body many times.
- When one gets a human existence at a *cuti-paṭisandhi* moment, what is formed first is a “mental body” with a mind-base (*hadaya vatthu*), and a set of *pasāda rūpa*. That “mental body” is called a *gandhabba*.
- When the *gandhabba* comes out either at the death of the physical body or in an “out-of-body experience” (OBE), the physical body becomes inert; see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”

- Details are available in two subsections: “[Mental Body – Gandhabba](#)” and “[Gandhabba \(Manomaya Kāya\)](#).”

Human *Bhava* Is Rare

2. Human *bhava* is hard to get, see, “[How the Buddha Described the Chance of Rebirth in the Human Realm](#).”

- However, a human *bhava* or a human existence can last thousands of years. On the other hand, a human birth (*jāti*) with a human body lasts only about 100 years. Therefore, within a human *bhava*, there can be MANY births with a human body or *jāti*.
- In between human births, the human lives as a *gandhabba* (with just the mental body) in the nether world or *para loka*. This *para loka* co-exists with our human *loka*, but we cannot see those *gandhabbas* without physical bodies. For details, see, “[Gandhabba Sensing the World – With and Without a Physical Body](#),” “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” and “[Cloning and Gandhabba](#).”
- A good visualization of *gandhabba* is at, “[Ghost 1990 Movie – Good Depiction of Gandhabba Concept](#).”

3. In rebirth stories, there is always a “time gap” between successive human births (*jāti*). They separate by many years or at least few years. In between those successive lives, that life-stream lives as a *gandhabba*, without a physical body.

- In most rebirth stories, the previous human life was terminated unexpectedly, like in an accident or a killing. Therefore, the *kammic* energy for the human *bhava* may not be exhausted. In that case, the *gandhabba* just came out of the dead body and waited for another womb to enter.
- Furthermore, the Buddha has described how difficult it is to get a human existence; see, “[How the Buddha Described the Chance of Rebirth in the Human Realm](#).” If “*bhava*” means “birth,” then all those rebirth stories cannot be true.

A *Sotāpanna* May Have Many *jāti*, But Only Seven *Bhava*

4. From the [WebLink: suttacentral: Ratana Sutta](#); “..*Na te bhavaṃ aṭṭhamamādiyanti*,” means, “(A *Sotāpanna*) will not be born in an **eighth *bhava***.” But there could be many rebirths within those seven *bhava*.

- For example, King Bimbisāra, who was a *Sotāpanna* died and was to have 14 rebirths; see, “[WebLink: suttacentral: Janavasabha Sutta \(DN 18\)](#).”

What Does *Bhava* Mean?

5. Also, “*bha*” means “establish.” When we have strong feelings about something, say we like something and thoughts “wheel around” in our mind about how to get it, that is very potent *abhisankhāra*; this mental power gets established in the “*kamma bhava*” as a *kamma bīja* (seed).

- That is also why it is easy to make *kamma bīja* or *kamma bhava* based on our *gati* (habits/character). Each person likes certain kinds of things. So, we keep strengthening existing *kamma bīja/kamma bhava*, which, if strong enough, can lead to a rebirth with such “*gati*” or “*bhava*,” **because that is what is “gets attached to” or “likely to grasp” or “upādāna.**”

Bhava and *Gati* – Examples

6. Let us take some examples.

- An alcoholic drinks habitually, and thus people refer to him as a drunkard. He has a drinking habit (*gati*) and a craving (*āsava*) for it.
- But he is not in a state of intoxication all the time, only when he is drunk, i.e., only when he is born in that “*jāti*.” The mindset of liking for a state of intoxication is the “*bhava*” corresponding to his “*gati*” (habit); he has that *gati* or *bhava*, and thus, he can be “born” (*jāti*) in that state easily.
- **That is the “*bhava paccayā jāti*” step in *paṭicca samuppāda* (PS) cycles that operate during this life, leading him to get drunk many, many times.**

7. On the other hand, someone who does not like to drink may even have an aversion to drinking alcohol. That person does not have “*gati*” or “*bhava*” for intoxication, and thus it is unlikely that he will be “born” in that state. Therefore, it is doubtful that he will get drunk or “be born” in that condition. The “*bhava paccayā jāti*” step in the PS cycle does not happen here, because the condition (*bhava*) is not there.

- A person who has a really nasty temper has a “*gati*” or “*bhava*” for that, and thus may be born in that, i.e., may flare up with the slightest provocation. Another may have a less strong “angry *bhava*,” and a third person who is very calm may have only a trace of that “angry *bhava*.” The stronger the “*bhava*,” the easier it is to be born (*jāti*) in that “*bhava*.”
- Similarly, a person who may have excess greed will have a “*gati*” or “*bhava*” for that. And such a “greedy *bhava*” may have focused areas: some are greedy for food, some for power, some for fame, money, etc.

Bhava and Gati – Related

8. ***Bhava* is intimately related to *gati* (habits/character).** One “builds up” a given *bhava* by engaging activities that cultivate that *bhava*; this happens via repeated *paṭicca samuppāda* cycles during a given life.

- An alcoholic does this by associating with friends who are alcoholics, frequenting places where they all hang out, etc. See the discussion in “[Idappaccayatā Paticca Samuppāda.](#)”
- People with similar habits (“*gati*”) tend to “hang together” (see, “[The Law of Attraction, Habits \(Gati\), and Cravings \(Āsavas\).](#)”) which accelerates that whole process.

Habits Build *Gati*

9. **The above examples describe how “*pavutti kamma bhava*” are made,** i.e., how one prepares a particular *bhava* in this life via engaging in relevant *saṅkhāra* or *kamma* repeatedly.

- An alcoholic does this via *mano*, *vacī*, and *kāya saṅkhāra*: such thoughts (*mano saṅkhāra*) come to his mind often. Then he consciously thinks about such activities and speaks about them (*vacī saṅkhāra*), i.e., engages in *vitakka* and *vicāra* focused on drinking activities). Of course, he will also physically engage in such activities with *kāya saṅkhāra*.
- The more he does those, the stronger the “drinking *bhava*” or “drinking habit” becomes.
- Someone who has cultivated such a *kamma bhava* for drinking can be appropriately born in that state (getting drunk) many times, DURING a lifetime.

10. Let us take another example. A child may enjoy torturing a cat or a dog. If this habit is not stopped, he may start gaining pleasure by torturing humans too.

- The “*pati+ichcha sama+uppāda*” cycle will take him to an extreme if not disrupted early enough. He will build a habit for doing it (i.e. born in that state) many times during the same lifetime.
- Those two are examples of the *pavutti bhava* described in the “Akusala-Mūla Pavutti (or Pravutti) *Paṭicca Samuppāda*.”

Kamma Bhava Becomes Uppatti Bhava

11. **Such *kamma bhava* can get strong enough to become “*uppatti bhava*,” leading to rebirth in a “good existence” (*Deva, Brahma*) or a “bad existence” (animal, *petā*, etc.).**

- That is the real danger. At the dying moment, one will be drawn (“*upādāna*”) to an environment that is compatible with one’s prominent habits (*gati*) or *bhava*.
- Because one got attached willingly (i.e., *upādāna*), a similar *bhava* will result: i.e., *pati+ichcha* leading to *sama+uppada* or *paṭicca samuppāda*. That is the “*upādāna paccayā bhava*” step.
- An alcoholic is likely to be born to family where the father or mother (or both) are alcoholics. That is the most suitable environment for his *upādāna* and *bhava*.
- One who enjoys torturing animals/humans may be born in *niraya* (hell) where there is constant torture. Depending on the nature of the *bhava*, one could be born there to impart torture on others or to be subjected to torture.

12. On the other hand, one who has benevolent qualities of a *deva* (i.e., *deva bhava*) could acquire “*deva bhava*” and be born a *deva*. One who has cultivated compassion for other beings (i.e., *Brahma bhava*) may acquire “*Brahma bhava*” and be born a *Brahma*.

- Similarly, one who has developed disgraceful qualities of a dog may be acquire a “dog *bhava*,” and be born repeatedly a dog until that *kammic* energy is wears out.
- It is the universal principle of “*pati+ichcha sama+uppāda*” working to yield an existence that is similar to the actions that one willingly engaged in; see, “[Akusala-Mūla Paticca Samuppāda](#)” and “[Kusala-Mūla Paticca Samuppāda](#).”

Kamma Bija, Bhava, and Gati

13. **A *kamma bīja* (seed) is also related to *bhava***; when one develops a habit (*gati*) by keep doing things related to it, that *bhava* or the *kamma bīja* gets stronger. It leads to “*bhava paccayā jāti*” under suitable conditions many times during this life itself.

- In the case of the person who developed a *bhava* for torturing other living beings may have that *kamma* seed being the one selected for next *bhava* upon death from a *bhava* that had exhausted all its *kammic* energy.
- In that case, he may be born in the *niraya* repeatedly (many *jāti*) until the *kammic* energy for that *kamma bhava* is wear out. That is an example of an *uppatti kamma bhava*.

14. Thus it becomes clear that one needs to look at the root cause for having certain habits or behavior patterns.

- We can go backward in the PS to find the causes. To be born in a drunken state, one needs to have a *bhava* of an alcoholic.
- That *bhava* was conditioned via *upādāna* (willing and forceful embracing.) *Upādāna*, in turn was due to *taṇhā* (getting attached to drinking). That was due to feeling (i.e., he got to like the “drunk” feeling, the state of intoxication). Feelings arose due to (*san*)*phassa* or contact, *saḷāyatana* (use of the six senses inappropriately.) Then *saḷāyatana* arose due to *nāmarūpa* (associated visuals of names and activities), which in turn were due to *saṅkhāra* (*kaya, vacī, and mano saṅkhāra* for that activity.) Of course, the starting point of *avijjā* (ignorance of the consequences).

Connection to *Avijjā* and *Taṇhā*

15. By examining these steps, we can see that the whole cycle can be stopped primarily at two places.

- By contemplating on the adverse consequences of drinking, he could remove ignorance (*avijjā*), and make a firm decision to stop.

- If he is mindful, whenever a thought about drinking comes to the mind, he can stop “wheeling around” (stopping *mano/vacī saṅkhāra*) and thus stopping multiple PS cycles. See, “[Difference Between Taṇhā and Upādāna](#)” and “[Taṇhā Paccayā Upādāna – Critical Step in Paticca Samuppāda.](#)”

16. If one can get rid of that drinking habit (*gati*), one would have removed that *bhava*. Then it is unlikely that one will be born (*jāti*) in that intoxicated state.

- The “trigger level” needed to generate a birth will be higher if the *bhava* (or habit) is not strong. Someone who has not had an alcoholic drink may be reluctant to have one.
- When one has an ingrained habit of drinking (strong *bhava*), all that is needed could be the sight of a bottle of alcohol.

Good Habits Lead to Good *Bhava*

17. All the above is valid for “good *bhava*” or “good habits,” too. To cultivate that *bhava*, one needs to be engaged in as many PS cycles as possible. The more the cycle gets repeated, the stronger each step becomes (the neural connections in the brain for that habit will strengthen, in term of modern science; see, “[How Habits are Formed and Broken – A Scientific View](#)”).

- It is easy to see from the above discussion why it is essential to instill good habits in children and also to break any bad habits that they start developing. It is much easier to stop forming a *bhava* or habit (*gati*) at early stages; once the habit takes hold, it becomes harder to remove. And that is true for adults too.

Also, see, “[How Character \(Gati\) Leads to Bhava and Jāti,](#)”

3.4.6 Difference Between Taṇhā and Upādāna

October 25, 2018; revised November 4, 2019; December 5, 2019

Introduction

1. The difference between *taṇhā* and *upādāna* is subtle, and it is critical to understand that difference. It is the key to understanding how one can get rid of bad *gati* and also cultivate good *gati*. That is the way to *Nibbāna*.

- That understanding is also critically important to get the basic idea behind the *Satipaṭṭhāna* (and *Ānāpāna*) *bhāvanā*.

2. *Satipaṭṭhāna* (and *Ānāpāna*) *bhāvanā* are about being mindful and catching new BAD thoughts that arise in one's mind. One should stop such thoughts immediately. If the thought is a good one (say about a Dhamma concept), then one should stay on it.

- The English word “thought” is too simplified. It includes *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*, each of which is complex; see, “[Mental Aggregates](#)” and “[Viññāṇa – What It Really Means.](#)”
- *Saṅkhāra* is especially crucial since *kammic* energy for future *vipāka* is created by the three types of *saṅkhāra*: *mano saṅkhāra*, *vacī saṅkhāra*, and *kāya saṅkhāra*; see, “[Saṅkhāra – What It Really Means.](#)”
- Therefore, we will stay with those Pāli words.

Mano saṅkhāra Arise Automatically Due to *Gati*

3. If we get interested in sight, sound, etc., *mano saṅkhāra* automatically arise in a mind due to a sensory input, based on our *gati*.

- We don't experience those initial *mano saṅkhāra*, and we only experience when it comes to the next stage called *vacī saṅkhāra* (“talking to oneself”).

- That is an important point. Even if a single word is not spoken, *vacī saṅkhāra* accumulate if one is “thinking to oneself,” about that object. If one gets more interested, one may speak out, and that is still a *vacī saṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra](#).” Both types of *vacī saṅkhāra* involve *vitakka* and *vicāra cetasika*.
- If the interest builds up, one may take bodily action. Such bodily actions are initiated by *kāya saṅkhāra*.
- All three types of *saṅkhāra* arise in mind.
- The strength of *kammic* energy created increases in the following order: *mano*, *vacī*, *kāya saṅkhāra*.

4. As we discussed many times, we get “attached” to something AUTOMATICALLY based on our *gati*. Then *mano saṅkhāra* arise automatically according to *gati*. That will happen as long as we have *taṇhā* (either via *kāma rāga* or *paṭigha*; *avijjā* is present in both cases). We automatically get attracted; see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance](#).”

- As pointed out in that post, the term “*taṇhā*” means getting fused or attached (“*thán*” meaning “place” + “*hā*” meaning getting welded or attached (භාග්ගී in Sinhala).
- That initial attachment arises AUTOMATIC based on our *gati*. We don’t have direct control over it.
- **In order to change *mano saṅkhāra*, we need to change our *gati* over time.**

Importance of *Vacī Saṅkhāra*

5. If the attachment is strong enough, the mind will now start thinking about it consciously, i.e., *vacī saṅkhāra* arise, and we become aware of these *vacī saṅkhāra*.

- As soon as we become aware of this “attachment” to something, we CAN BE mindful, think about its consequences, and move away from it. Therefore, we can stop such thoughts at the *vacī saṅkhāra* stage; see, “[Correct Meaning of Vacī Saṅkhāra](#).”
- However, our minds like to enjoy such *vacī saṅkhāra*. It is easy to do and is very tempting. Many people get their sexual satisfaction from just “daydreaming” about either an event in the past or sexual encounters that might take place in the future.

6. In the “[WebLink: suttacentral: Na Santi Sutta \(SN 1.34\)](#),” the Buddha defined “*kāma*” to be this “daydreaming” or “generating more and more thoughts about it”: “*Na te kāmā yāni citrāni loke, Saṅkapparāgo purisassa kāmo...*”

Translated: “World’s pretty things are not *kāma*, **a person creates his/her *kāma* by thinking about those pretty things (*rāga saṅkappa*)...**”

- That is a critical point.
- Furthermore, we “daydream” about not just sex, but in other sense pleasures too. See, “[What is “Kāma”? It is not Just Sex.](#)”
- Even if one did not physically do anything, one could accumulate a lot of bad *kamma* just by generating such *vacī saṅkhāra*.
- The world is full of beautiful things, tasteful foods, sweet smells, etc., but seeing, tasting, smelling them is not NECESSARILY *kāma*. For example, the Buddha accepted delicious foods, but never generated *mano/vacī saṅkhāra* about them. He had removed all *gati*.

Vacī Saṅkhāra Responsible for *Upādāna*

7. Anyone who is not yet an *Ānāgāmi* is likely to automatically generate such *mano saṅkhāra*. Then that leads to generating *vacī saṅkhāra* or “*kāma saṅkappa*” at some level.

- **If we “go with the flow” and go along enjoying this “daydreaming” or generating *vacī saṅkhāra*, that is what is called “*upādāna*.”**

- *Upādāna* means “pulling it closer (in one’s mind)” (“*upa*” + “*ādāna*,” where “*upa*” means “close” and “*ādāna*” means “pull”). [*ādāna* : (nt.) , taking up; grasping.]

8. So, we do not have control over the “*taṇhā*” or “initial attachment” step. It happens with *mano saṅkhāra* that arise due to our *gati*.

- And those *gati* cannot be removed just by abstaining from experiencing such sensory events.
- First, we need to reduce our *gati* to attach to that kind of sensory inputs. Stopping those *vacī saṅkhāra* as soon as we becomes aware of them is the way to reduce bad *gati*. Those *vacī saṅkhāra* are really “nutrients” or “food/water” for cultivating of those *gati*.
- If we keep the bad habit of generating *vacī saṅkhāra*, then that *gati* will only get stronger with time. It is essential to stop giving such “mental food” for those bad *gati*.

Killing Bad Habits by Stopping *Vacī Saṅkhāra*

9. The Buddha explained it this way: Human cannot live more than seven days without food AND water. We will die.

- But if we stop taking solid food, but takes in just water, we can live for several weeks.
- However, during that time, one may be tempted to take in some food. That will break the process and the clock re-starts.

10. That is the analogy for killing a habit. One can kill the habit (or the addiction) in a relatively short time by doing the following. Stops *kāya saṅkhāra* (actual act, which is like solid food) and *vacī saṅkhāra* (thinking/talking about it, which is like water).

- But if we stop doing the activities (*kāya saṅkhāra*), but keep generating *vacī saṅkhāra*, then it may NEVER be removed entirely.
- So, the analogy is not that good. ***Vacī saṅkhāra* are almost as bad as *kāya saṅkhāra***, i.e., *vacī saṅkhāra* are like “snacks” (more than just water in that analogy).
- The more times we break that discipline, the longer it takes to break that habit or *gati*. That is why we need to be mindful of our thoughts, speech, and actions all the time. That is the key to *Ānāpāna* and *Satipaṭṭhāna bhāvanā*.

11. For example, one can break the addiction to drugs in a shorter time (say a month) if he has the discipline to stop taking it AND also stop thinking about it.

- If he stops taking the drug but goes on enjoying thinking about it (*vacī saṅkhāra*), it will not work. He may go on without using drugs for months and months, but one day, he may lose the resolve and go back to drugs.
- That happens to a lot of people addicted to different things like alcohol, smoking, or even over-eating. They may temporarily stop those activities, but months later they break it. **That is because they had not stopped generating *vacī saṅkhāra* or engaging in *upādāna* for that actively.**

Breaking the *Taṇhā* to *Upādāna* Step

12. The following chart illustrates the processes involved.

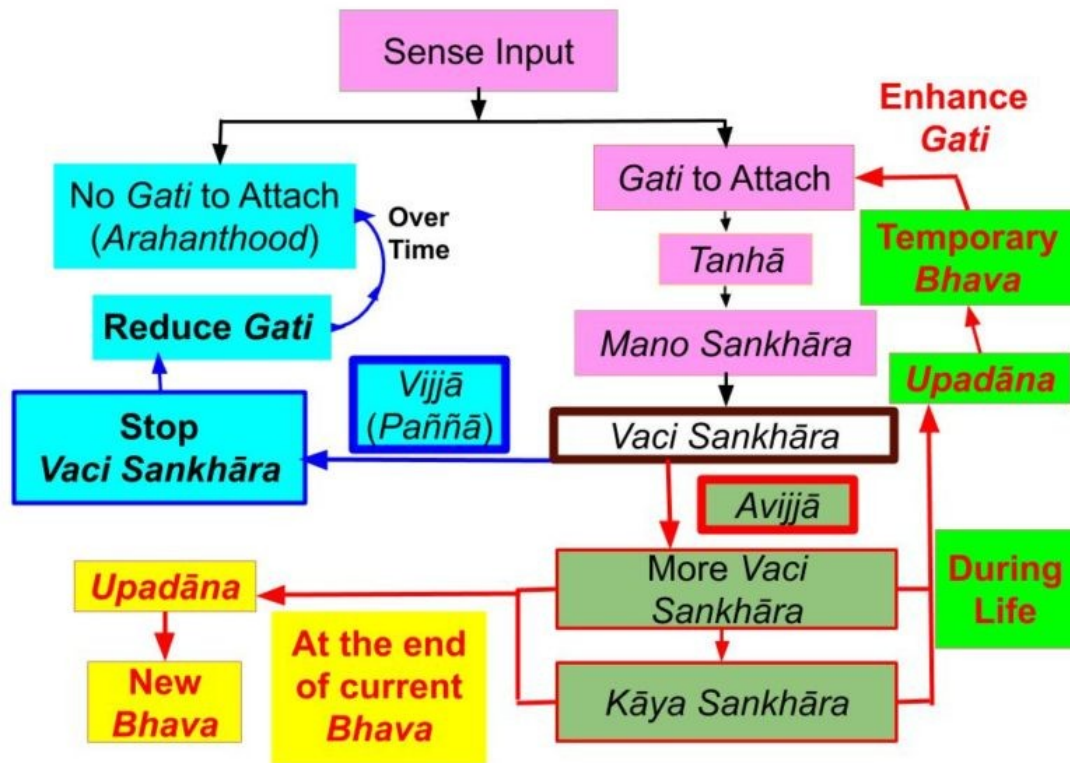

Chart of Taṇhā and Upādāna

For a pdf file for printing: [“WebLink: PDF File: Taṇhā and Upādāna.”](#)

- As we can see, the key is to stop generating *vacī saṅkhāra*. As soon as we become aware of “bad thoughts” we need to stop them. Then, over time, that “bad *gati*” will reduce in strength and eventually disappear.
- Therefore, by being mindful and acting with *paññā* (wisdom, which is *vijjā* or the opposite of *avijjā*), one can reduce *upādāna* and gradually get rid of bad *gati*.
- We can also see that, in addition to contributing to bad *gati*, it is those *vacī saṅkhāra* that make one grasp a new “bad *bhava*” at the *cuti-paṭisandhi* moment.

Basis of *Satipaṭṭhāna* and *Ānāpāna Bhāvanā*

13. That is the basis of the *Satipaṭṭhāna* (and *Ānāpāna*) *bhāvanā*; see, “[7. What is Ānāpāna?](#)” and “[Maha Satipaṭṭhāna Sutta.](#)”

- If we are mindful, we can immediately become aware of a “bad thought” at the *vacī saṅkhāra* stage. Thereby, we CAN stop the *upādāna* step, i.e., we can decide not to “pull it closer.”
- For example, if we see an attractive person, we may automatically start looking at him/her. But once we become aware of it, we can look away, and start thinking about something else.
- In another extreme example, we may get angry with someone and may start saying something harsh. But as soon as we realize that we are going back to our “bad old habit”, we can even stop in the mid-sentence. If we realize our mistake even after saying something bad, we NEED TO apologize for our harsh speech. That may be difficult to do in the beginning, but that is the only way to get rid of such bad habits.

14. When we start controlling the CRITICAL *upādāna* step, our *gati* will slowly change. Then, with time, the first step of “*taṇhā*” will reduce, and eventually go away.

- That is the basis of *Ānāpāna* and *Satipaṭṭhāna* meditations.

Taṇhā to Upādāna to Bad Gati

15. As we have discussed before, a poison bottle sitting on a table will not do us any harm. It can kill someone only if he/she takes it and drinks.

- It is the same with *upādāna*. There could be many “pleasing thing” out there in the world. But if we understand the *anicca* nature (that those things will only lead to suffering at the end), then our minds will not crave for them. That will not *upādāna*.
- In an example, we know that some flies who attracted to light get burned. They don't know that even if the shiny light looks attractive, it can kill them. In the same way, a fish sees only the bait. It does not see the hook.
- We don't touch a hot stove that is glowing red, because we know that it can burn us.
- But most of us don't realize that sense pleasures will eventually lead only to suffering. Of course, one needs to take care of the extreme sense-pleasures first. As I always say, it is a step-by-step process; see, “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#).”

16. Gradually controlling *upādāna* is the way to reduce bad *gati*, cultivate good *gati*, and eventually get rid *taṇhā*.

- Removal of *taṇhā* is the same as removing *anusaya*.
- To be more effective in this, one must also reduce *avijjā* by learning Dhamma, and specifically by comprehending *Tilakkhaṇa* (*anicca, dukkha, anatta* nature).

Cultivating Good *Gati* via *Vacī Saṅkhāra*

17. Of course, it works in the reverse too. We can cultivate “good *gati*” by constantly thinking about related things.

- For example, if a Dhamma concept comes to the mind, we should continue with it. **Then it will become a habit to think about Dhamma concepts.**
- Nowadays, when I get up, the first thing that comes to my mind is a Dhamma concept or a problem that I had been thinking about the previous day.

Summary

18. Finally, there are two things one must do to make progress on the Path.

- One is to **reduce *avijjā* by learning Dhamma.**
- The other is to **reduce *upādāna* by controlling *vacī saṅkhāra*** as we discussed above.
- If we do both, the progress will be much faster.

3.4.7 **Pāpa Kamma Versus Akusala Kamma**

November 14, 2018; revised November 16, 2018 (#3 and #6)

Difference Between *Akusala* and *Pāpa Kamma*

1. While *akusala kamma* are “immoral deeds”, *pāpa kamma* are “**highly** immoral deeds.” **However, there is a huge difference.**

- In some English translations that I have seen, both *pāpa kamma* and *akusala kamma* are translated as, “bad deeds.”

- It is critical to understand that if one has not removed the 10 types of *micchā diṭṭhi*, it is POSSIBLE for one to commit *pāpa kamma*.
2. As we have discussed before, *moha* is the stronger version of *avijjā*. If one has *moha*, then one also has *lobha* and *dosa*, which are stronger versions of *rāga* (*kāma rāga*, *rūpa rāga*, *arūpa rāga*) and *paṭigha*; see, “[Lobha, Rāga and Kāmaccandha, Kāmarāga](#)” and “[Lobha, Dosa, Moha versus Rāga, Paṭigha, Avijjā](#).”
- We know that *akusal-mūla Paṭicca Samuppāda* cycles start with “*avijjā paccayā saṅkhāra*,” and NOT “*moha paccayā saṅkhāra*.”
 - Before one starts focusing on understanding *Paṭicca Samuppāda* cycles, one must have reduced *moha* to *avijjā* level.
3. *Paṭicca Samuppāda* (starting with *avijjā*) describes processes that lead to births in the *sugati* or “good realms” (human realm and above), as well as births in *dugati* or “bad realms” or *apāyā* (the four lowest realms).
- One does need to apply *Paṭicca Samuppāda* to determine births done with *pāpa kamma*, but it is not even necessary: they INVARIABLY lead to births in the *apāyā*.
 - Put it in another way, *pāpa kamma* done with those **highly potent *apuñña abhisāṅkhāra*** ALWAYS lead to births in the *apāyā*.
 - The bottom line is that one is **capable** of doing *pāpa kamma* (does not mean one will always do) as long as one has one or more the 10 types of *micchā diṭṭhi*. When one gets rid of all those *micchā diṭṭhi*, one does not have *moha* anymore; it is reduced to *avijjā*.

Sutta Descriptions – What Are *Pāpa Kamma*?

4. *Pāpa kamma* are described in several *suttā*, but let us focus on the [WebLink: suttacentral: Pathama Pāpadhamma Sutta \(AN 4.207\)](#). I will just provide the translation to save space.

“*Bhikkhus*, who is a **highly immoral person (*pāpo*)? One who is engaged in the **destruction of life or initiates, encourages, praises, helps destruction of life (in a habitual way)** is a highly immoral person destined to be born in the *apāyā*...”**

- The rest of the *sutta* lists six MORE deeds in the same way: **Taking what is not given, sexual misconduct, immoral speech, Intoxication (drinking, taking drugs, etc), and *micchā diṭṭhi***.
- For example, the full description of the last one is: **One who has *micchā diṭṭhi* or initiates, encourages, praises, encourages others to have such views (in a habitual way)**.
- It is important to note that just one action does not make one a “*pāpo*” or a “highly immoral person.” There is a second related *sutta*: “[WebLink: suttacentral: Dutiya Pāpadhamma Sutta \(AN 4.208\)](#).”

(By the way, I just realized that I have been writing *micchā diṭṭhi* as *micchā diṭṭhi* in many posts. I will try to make the correction in existing posts. It is not a big error, but it is always good to follow the *Tipiṭaka* words as they are written).

5. The “[WebLink: suttacentral: Duccarita Vipāka Sutta \(AN 8.40\)](#)” is another *sutta* that state eight immoral actions that could make one born in the *apāyā*. “*Duccarita*” means “highly immoral character” so a “*duccarita puggala*” means the same as “*pāpo*” or “a highly immoral person.”

Here is the translation of that *sutta*.

(1) “*Bhikkhus*, the **destruction of life, repeatedly pursued, developed, and cultivated**, is conducive to rebirths in hell, to the animal realm, and to the sphere of hungry ghosts; when one is born as a human after paying off most of the *vipāka*, one will also have a short life span.

(2) “**Taking what is not given, repeatedly pursued, developed, and cultivated**, is conducive to rebirths in hell, to the animal realm, and to the sphere of hungry ghosts; when one is born as a human after paying off most of the *vipāka*, one is likely to face loss of wealth.

(3) “**Sexual misconduct, repeatedly pursued, developed, and cultivated**, is conducive to rebirths in hell, to the animal realm, and to the sphere of hungry ghosts; when one is born as a human after paying off most of the *vipāka*, one will also be exposed to enmity and rivalry.

(4) “**False speech (per Dhamma, not strictly lying), repeatedly pursued, developed, and cultivated**, is conducive to rebirths in hell, to the animal realm, and to the sphere of hungry ghosts; when one is born as a human after paying off most of the *vipāka*, one will also be exposed to false accusations.

(5) “**Divisive speech, repeatedly pursued, developed, and cultivated**, is conducive to rebirths in hell, to the animal realm, and to the sphere of hungry ghosts; when one is born as a human after paying off most of the *vipāka*, one will also be exposed to being separated from one's loved ones.

(6) “**Harsh speech, repeatedly pursued, developed, and cultivated**, is conducive to rebirths in hell, to the animal realm, and to the sphere of hungry ghosts; when one is born as a human after paying off most of the *vipāka*, one will also be exposed to disagreeable sounds.

(7) “**Idle chatter, repeatedly pursued, developed, and cultivated**, is conducive to rebirths in hell, to the animal realm, and to the sphere of hungry ghosts; when one is born as a human after paying off most of the *vipāka*, one will also be exposed to others distrusting one's words.

(8) “**Intoxication (drinking, taking drugs, etc), repeatedly pursued, developed, and cultivated**, is conducive to rebirths in hell, to the animal realm, and to the sphere of hungry ghosts; when one is born as a human after paying off most of the *vipāka*, one will also be exposed mental problems.”

- There are many more *suttā* that discuss *pāpa kamma* and their consequences being rebirth in the *apāyā*, for example, AN 10.211 through AN 10. 220.

6. There is also a set of *suttā* (AN 10.211 through AN 10. 220) that state that *dasa akusala* (taking a life, stealing, abusing sense pleasures, speaking untruth, slandering, harsh speech, gossiping, greed, ill-will, wrong views or *micchā diṭṭhi*) lead to rebirth in the *apāyā*.

- Therefore, *pāpa kamma* are the same as *dasa akusala* done with *micchā diṭṭhi*. That means having *micchā diṭṭhi* makes one's mind “covered”, i.e., one has *moha*.
- It is important to note that some of *dasa akusala* can be done without *micchā diṭṭhi*, and those are done with just *avijjā*.

Description of *Pāpa Kamma*

7. Those immoral actions in #4 through #6 above are basically all *pāpa kamma*.

- It is important to note the emphasize on the phrase, ” **repeatedly pursued, developed, and cultivated.**”
- For example, those who habitually go fishing and hunting would belong to this category. Also see #14 below.
- Another way to say that is to say “cultivating (*abhi*)*saṅkhāra*.” One does such an action because it becomes one's *gati*, i.e., it becomes a habit and it contributes to one's character.
- These are essentially the same as the descriptions in #4 above.

8. I want to emphasize that all of the following four actions contribute in each of the above listed immoral actions in #4 through #6 above (If done on a regular basis):

- Doing it.

- Assisting another person to do it.
- Ordering (or instructing) another person to do it.
- Praising someone who is doing it.

9. When one has *moha*, one is capable of doing *pāpa kamma* without any remorse. That means one is not even close to being released from the *apāyā*.

- **This is a very simple fact that can save a lot of wasted time for many people.** It is absolutely a waste of time to even try to understand *Paṭicca Samuppāda* if one still has any of the ten types of *micchā diṭṭhi*, some of which are commonly held; see, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage.](#)”
- I know I am going to make many people unhappy by making these statements. But it is better to learn the truth as soon as possible. **We all have been trapped in this suffering-filled rebirth process for an unimaginable time, simply because we have not been able to understand this key point.**

Nature’s Laws, Not Buddha’s Rules

10. These are not rules made up by the Buddha. Reducing *moha* to *avijjā* level means one is not totally ignorant of the wider world of 31 realms. That REQUIRES an understanding of the laws of *kamma*, which in turn REQUIRES an understanding of the wider view of the Buddha (existence of 31 realms) AND a belief in the rebirth process.

- That is because without that wider world view, it is not possible for laws of *kamma* to be effective: If there is no rebirth process, there are many things that cannot be explained; see, “[Complexity of Life and the Way to Seek “Good Rebirths.”](#)”
- Nothing happens without causes and conditions. Explanation of what happens around us REQUIRES the wider world view. Only a Buddha with a perfectly purified mind can discover these hidden laws of Nature.
- Many people, especially in the Western world, have a hard time believing the above. They think Buddha is just “a better philosopher” who just came up with his own “world view.” However, if one can spend time examining Buddha Dhamma — including *Abhidhamma* — it will become clear.

11. Buddha Dhamma is self-consistent. The ten types of *micchā diṭṭhi* are not made up by the Buddha. They really go against the nature of this world: *kamma* (actions) have consequences (*vipāka*); there is a rebirth process; there is a *para loka* where *gandhabbas* live; there are instantaneous births in realms that we do not see, etc.

- Just because those are not amenable to our crude senses, that does not mean they are not true. In fact, as science makes progress, more and more teachings of the Buddha are being confirmed; see, “[Buddha Dhamma: Non-Perceivability and Self-Consistency.](#)”

Sorting Out the Priorities

12. As I have discussed before, making progress is a step-by-step process. Before one can start on the Noble Eightfold Path, one must complete the mundane eightfold path where one gets rid of the ten types of *micchā diṭṭhi*; see, “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?.](#)”

- A critical aspect of attaining the *Sotāpanna* stage is the comprehension of *Paṭicca Samuppāda*, how root causes lead to their effects where conditions (*paccayā*) play a key role.

13. These days, many people just start by trying to understand deep *suttā* that REQUIRE an understanding of *Paṭicca Samuppāda* and *Tilakkhaṇa*.

- However, many of them (including many *bhikkhus*) do not believe in rebirth, or that the concepts of *para loka* and *gandhabba* are valid. They erroneously believe that *gandhabba* is a *Mahayāna* concept,

but neither them or *Mahāyānists* understand what is meant by *antarabhava*; see, "[Mental Body – Gandhabba.](#)"

- Getting to the *Sotāpanna* stage CANNOT be done by just reading a few posts. One has to make a real effort to understand the key concepts involved, and live a moral life.

14. Making progress on the Path requires working on two fronts:

- One needs to understand the key basic concepts in Buddha Dhamma like *dasa akusala* and *micchā diṭṭhi*, before tackling *Tilakkhaṇa* and *Paṭicca Samuppāda*.
- One needs to live a moral life and “the level of morality” will automatically increase as one’s understanding gets deeper and deeper.
- Therefore, those two aspects go hand-in-hand. One cannot just focus on one aspect. Both are necessary.

15. It is also a good idea to understand some key details of how laws of *kamma* work.

- Just because one kills some insects when doing yard work does not contribute significantly at all. The intention plays a key role as discussed in: "[What is Intention in Kamma?](#)"
- Furthermore, killing a human is much more significant than killing many, many animals because a human life is much more difficult to get; see, "[How to Evaluate Weights of Different Kamma.](#)"

3.5.1 Kama Taṇhā, Bhava Taṇhā, Vibhava Taṇhā

Revised November 9, 2019

Kāma taṇhā, bhava taṇhā, vibhava taṇhā are three incorrectly translated key Pāli words.

Taṇhā is Not Craving

1. *Taṇhā* is “getting attached to things in this world” via greed, hate, and ignorance. Most times, it is incorrectly translated as “craving.”

- The word *taṇhā* comes from “*thān*” + “*hā*,” where “*thān*” rhymes like in “thatch” and means “a place;” “*hā*” means getting attached or fused; see, “[Taṇhā – How we Attach via Greed, Hate, and Ignorance.](#)” Note that “*tan*” in *taṇhā* is pronounced like in “thunder.”

2. We attach to things because of the ignorance that they can provide lasting happiness; this attachment first manifests in greed. But when someone or something gets in the way, we generate hate; then we attach via hate.

- For example, a teenager wants a car, and his desire builds up with time. He is firmly attached to that idea of getting a car. If a parent refuses, then he may generate anger and even hate towards the parent. Now he is attached to two places (to the vehicle via desire and the the parent via anger.)

Kāma Taṇhā

3. In *kāma loka*, all five physical sense faculties are present. Getting attach to anything via the five senses is *kāma taṇhā*.

- Furthermore, attachment arising from the desire to enjoy taste, smell, and body touch are exclusively restricted to the *kāma loka*. Those three require a “solid body” as we can imagine.
- In the *rūpa lokas*, living beings do not have “solid bodies.” Yet, they can see and hear without having physical eyes or ears.

- Therefore, in the *rūpa lokas*, *taṇhā* arise only due to sight and sound. Thus an *Anāgāmī*, who will be born in a *rūpa loka* has some *rūpa taṇhā* and *sadda taṇhā* because he/she may like to see a Buddha statue or listen to a discourse.

Bhava Taṇhā

4. ***Bhava taṇhā*** arises from attachment to “any existence.” Thus *bhava taṇhā* is present in *kāma loka*, *rūpa loka*, and *arūpa loka*, i.e., all 31 realms.

- Even in the *kāma loka*, there may be people who do not enjoy the “*kāma*” or sense pleasures; but they still want to live a quiet, peaceful life. They mostly have *bhava taṇhā*. They may like to be in a secluded place, cultivating *jhāna*; that is their desired “*bhava*.” If they develop *jhānā*, they will be born in *rūpa loka* or *arūpa loka* due to their new “*gati*.”
- There are other subtle forms of “*bhava*” too. Some like to become famous, earn a title, to get a high-profile job or a responsibility, etc. These are not associated with sensual pleasures and are also due to *bhava taṇhā*.

Vibhava Taṇhā

5. ***Vibhava taṇhā*** arises from the wrong view of materialism (*ucceda diṭṭhi* in the time of the Buddha; *ucceda* pronounced “*uchchêda*”). **One believes that one ceases to exist at death. One believes that the mind is a byproduct of the body (brain). And thus, when the body dies, that is the end of story.** Thus one believes that one needs to just enjoy the pleasures of this life before dying.

- Therefore one believes that one needs to enjoy the pleasures of this life before dying. Such a person would normally have as *kāma taṇhā* well.
- It is easy to have *vibhava taṇhā* in modern society. That is especially true if one has not heard about the Buddha's message about a more complex world with 31 realms and a rebirth process. Our human sensory faculties cannot access such “hidden” aspects of this world. One believes only what one sees.
- It takes an effort to verify that indeed the more comprehensive world view is needed to EXPLAIN all that we can experience; see, “[Complexity of Life and the Way to Seek “Good Rebirths”](#).”
- Many immoral acts are done with *ucceda diṭṭhi* (or materialism or nihilism) because one believes that everything in this world is for one's enjoyment.
- Even though it is evident that animals cry with pain when being killed, that is not of any consequences in their minds. The logic is that If this birth is the one and the last, there is no possibility that one could face the same fate in the future.

6. The connection of *ucceda* (or *uccheda*) *diṭṭhi* to *vibhava taṇhā* is made in Section 3.2.4 *Ucchedavada* in the [WebLink: Suttacentral: Brahmajala Sutta](#).

- It is an excellent idea to contemplate the fact that there is a difference between cutting vegetables and killing animals for food. An animal is a living being and feels pain.
- Then how is an animal different from us? The difference is only at the intellectual level. We have higher intelligence only because we have been fortunate to get this temporary human life because of a previous good deed.
- In the next birth, we could be born an animal; it depends on the types of *kamma* that we have accumulated. It takes time to go through such an analysis, and to convince oneself of the ability of the Buddha Dhamma to provide “good explanations.” Many people do not take the needed time to do such an investigation.

Connection to Magga Phala

7. Let us see how each type of *taṇhā* decreases as one progresses on the Path.

- When one starts on the Path and makes an effort to understand the message of the Buddha, one starts losing all three types of *taṇhā* gradually. With time one can feel that change and the resulting *nirāmisā sukha* that comes from it. It may take a few days, months, or even a year to see a significant difference depending on the individual.
- *Vibhava taṇhā* is removed at *Sotāpanna* stage. It is essential to realize that one is bound to have *vibhava taṇhā* if one does not believe in the rebirth process.
- *Kāma taṇhā* leads to various levels of attachment that are removed step-by-step in the four stages of Nibbāna. *Kāmaccandha* removed at the *Sotāpanna* stage. *Kāma rāga* reduced at the *Sakadāgāmi* stage and removed at the *Anāgāmi* stage. See the next post, “[Lobha, Rāga and Kāmaccandha, Kāmarāga.](#)”
- As long as one is reborn anywhere in the 31 realms, one has *bhava taṇhā*. Thus, *bhava taṇhā* is eliminated only at the *Arahant* stage.

Connection to *Āsava/Anusaya*

8. Finally, two relevant points:

- It is important to note that these three “tendencies to bind” (*kāma taṇhā*, *bhava taṇhā*, *vibhava taṇhā*) arise due to *kāmasava*, *bhavāsava*, and *vibhavāsava*. *Taṇhā* occurs due to *āsava*: One gets “attached” because one has deeply- embedded cravings for worldly things.
- Sometimes *vibhavasava* is split into two: *ditṭhasava* (*ditṭhi āsava*) and *avijjāsava* (*avijjā āsava*). That is because *vibhavāsava* arises due to wrong views and ignorance.
- *Āsava/Anusaya* discussed in detail at, “[Āsava, Anusaya, and Gati \(Gathi\).](#)”

Next, “[Lobha, Rāga and Kāmaccandha, Kāmarāga](#)”,

3.5.2 **Taṇhā – How We Attach Via Greed, Hate, and Ignorance**

Revised October 31, 2015; October 7, 2017; August 24, 2019

In the previous post, “[Vedanā \(Feelings\) Arise in Two Ways](#),” we discussed how feelings arise in two ways, and one type of feelings occur due to our own volition, i.e., due to *taṇhā*.

What is *Taṇhā*?

1. In the post, “[Paṭicca Samuppāda – Introduction](#),” we discussed the origin of the term “*taṇhā*.” It means getting fused or strongly attached. The word *taṇhā* comes from “*thán*” meaning “place” + “*hā*” meaning getting fused/welded or attached (නැවැත්වීම in Sinhala). Note that “*tan*” in *taṇhā* pronounced like in “thunder.”

- Here we will see how that happens according to the natural process of *Paṭicca Samuppāda*.

What Is in the World?

2. *Cha Chakka Sutta* describes how we experience the world. But in standard translations, the real meaning does not come out; see, for example: “[WebLink: suttacentral: Cha Chakka Sutta \(MN 148\)](#)”, where one can also find translations in several languages.

We get to know ANYTHING about the external world via ONLY six ways:

- We see *vaṇṇa rūpa* (visual things) with our eyes.
- *Sadda rūpa* (sounds) heard with our ears.

- We smell *gandha rūpa* (odors) with our nose.
- *Rasa rūpa* (food) tasted with our tongue.
- We touch *phoṭṭhabba rūpa* (touchable things) with our bodies.
- Finally, we contemplate or think about *dhammā* (memories, concepts) with our minds.

That is what the Buddha called “*sabba*” or ALL. **Our whole world is what we experience with our six senses.** Take a moment and contemplate this. Is there anything else “in this world” other than those six listed above?

3. It is essential to realize that these INITIAL sense inputs come to us via *kamma vipāka*. **Then based on whether we have *āsava/anusaya* (or corresponding *gati* or habits), WE MAY act with *avijjā* to pursue that sensory input.**

- Our greedy, hateful, or ignorant thoughts arise when we make contact with the outside world with one or more of these six senses. *Kamma vipāka* lead to sensory inputs. But not all sense inputs lead to acting with *avijjā*. **(Please take time to think and contemplate on these ideas as you go along. It is critical to get these ideas to proceed further).**
- That critical fact becomes apparent when we do not think along the lines of an “established self” or “no-self.” There is no “person” who has *avijjā* all the time. *Avijjā* arises due to *āsava/anusaya* depending on the sense input; see, “[‘Self’ and ‘no-self’: A Simple Analysis.](#)”

How Do We Get Attached?

4. How we get “bonded” to something that we experience? Let us take, for example, someone listening to a new song. In this case, the sound (*sadda*) impinging on the ear (*sota*) leads to sound consciousness. Several things happen in a fraction of a second. This VERY FAST sequence is:

(i). “*Sotañca paṭicca sadde ca uppajjati sotaviññāṇaṃ,*” where, *sota* is ear; *sadde* is sound (song), *uppajjati* means gives rise to, *sota viññāṇa* is hearing consciousness, and *paṭicca* here means just the fact that sound makes contact with the ears, and NOT “*pati + icca*” or “willingly getting bonded.” Thus,

- “Due to the sound of the song received by the ear, gives rise to sound consciousness.”
- The mind does not generate any *saṅkhāra* in assessing that sound. It just RECEIVES the sound signal.

We need to have a liking for something to be interested in it. Every day, we see a million pictures, sounds, etc., but we remember only a selected number, and these are the ones that lead to *taṇhā*. “Getting interested” step is next:

(ii). “*Tiṇṇaṃ san gati phasso*”;

Here, we need to spend a bit of time explaining the terms: “*san*” means defilements or fuel for *sansāric* journey (see, “[What is “San”?](#)”), and “*gati*” (pronounced “gathi”) are *sansāric* habits (see, “[Sansāric Habits and Āsavas](#)”); thus “*san gati*” means *sansāric* habits; “*phassa*” means contact, and “*tiṇṇaṃ*” (pronounced “thinnan”) means three. Please go back and read those two links if you do not remember those terms.

- In summary: Those three things (sound, ear, and sound consciousness) lead the mind to make contact with one’s *sansāric* habits. **If the sensory input matches with his “*gati*” or “likings,” he will instantly be attached.** Within a split second of hearing a few lines of the song, the teenager is “hooked”; his mind becomes absorbed in it.
- It is really at this step that the teenager becomes interested in the song. Then he gets attached to it (via “*pati + icca*”) BECAUSE it matches his *gati*.

Then comes the next line:

(iii). “*Samphassa jā vedanā*” (this comes from “*san phassa jā vedanā*”; it rhymes as “*samphassa*”) means this “contact with *san gati*” leads to feelings.

- As long as one has matching “*gati*,” the corresponding feelings arise automatically. We cannot stop it, at least in the initial *cittā* or thoughts. But we can certainly stop progressing further and uttering bad speech or doing immoral acts.
- That is why it is essential to get rid of bad “*gati*.” *Satipaṭṭhāna sutta* describes how one becomes a “*sampajanno*” by figuring out how to get rid of bad “*gati*”; see, “[Kayanupassana – The Section on Habits \(Sampajanapabba\)](#).”
- The way to getting rid of such “bad *gati*” is to be fully aware of our speech and actions and stop such unsuitable speech or actions. That is what *Kāyānupassanā* is.

That is a VERY IMPORTANT step. The resulting feeling depends on whether someone will get attached to the subject matter via greed or hate. If it is greed (or liking) as in the case of the teenager listening to a song he likes, he gets a *sukha vedanā* (happy feeling). On the other hand, if it was a heavy metal song, and if his grandfather hears it, the grandfather may instantly form a *dukha vedanā* (unhappy feeling). That is if he has a dislike for heavy metal songs (different *gati* than the teenager). That is the reason that different people feel differently about the same “event” (a picture, sound, smell, taste, touch, or a thought about something).

Attachment (*Taṇhā*) Leads to Existences (*Bhava*)

Let us further analyze the above example:

The teenage could be walking a noisy street, but if he likes the song, he may not even hear any other sound. He will get “attached” to the song and be absorbed in it. Even after the song, he thinks about it in many ways. He may want to find the identity of the singer, may wish to see whether the singer has more albums, how he is going to tell his friends about this, etc. That is the “*sansāric* wheeling” process, see, “[Nibbana – Stopping of the sansāric Vehicle](#),” where we discussed how one becomes an *Ariya* by taking the wheels off of the *sansāric* vehicle (*riya*).

Now the teenager is attached (i.e., forms *taṇhā*):

(iv). “*vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna paccayā bhava, ...*”

The song became his existence or “*bhava*” (i.e., total awareness, existence) while he was listening. He does not just listen, enjoy it while it lasts and moves onto something else. RATHER, he wants to hear it again, maybe hear more songs like that too. That is *taṇhā*. Because of that, he starts craving for it again and again, and also craves songs similar to that. Maybe he would form a liking for anything associated with the song: its composer, singer, and may join the singer’s fan club. His mind spends a lot of time “wheeling around” or “thinking about” things associated with the song; temporarily, his existence or “*bhava*” becomes that song.

(v). Now let us go back to (i) of the sequence:

“*Sotaṅca paṭicca sadde ca uppajjati sota viññāṇaṃ,*” or “Due to the sound of the song received by the ear, gives rise to sound consciousness.”

- That is just the ear receiving the sound. The teenage may hear many other sounds on the road. The next step is a critical one for him. Would he get interested in that song?
- “*Tiṇṇaṃ san gati phasso.*” Out of all the sounds that come in through the ears, he will be attached only to the one that matches his “*gati*.”

Thus we get attracted to something due to our “old habits” (see, “[Habits and Goals](#)”), which are even likely to be habits formed over many lives (see, “[Sansāric Habits and Āsavas](#)”).

(vi). Now at the step #iv above, the sequence ends with further strengthening “his tendency (*gati*)” to listen to this type of music; that is *taṇhā*. **That is a crucial point.** If we have an ingrained liking for something, we

will get attached it. Furthermore, repeated attachments will strengthen such an affection or habit or “*gati*.” That is the law of attraction (see, “[The Law of Attraction, Habits \(gati\), and Cravings \(Āsavas\)](#)”). Thus it becomes a vicious circle. That is why it is hard to break habits (good or bad).

Summary

5. Please spend some time contemplating the above material. It is best if you can analyze your situations and see how *taṇhā* arises via greed (likes) and hate (dislikes). I will discuss more cases before moving on to discuss *Paṭicca Samuppāda* in detail. It is VERY IMPORTANT to understand these fundamental ideas.

- In the earlier post, “[Paṭicca Samuppāda – Overview](#),” we pointed out that *Arahant* experiences suffering only due to *kamma vipāka*. An *Arahant* does not generate sorrow or happiness via the mechanism discussed in this post; he/she will not have any “immoral or sense craving” *gati*. In this case, “*samphassa jā vedanā*” does not lead to *sukha* or *dukha vedanā*.
- We, on the other hand, generate “self-induced” suffering and happiness via this mechanism. Any happiness generated will not be long-lasting. This mechanism is, for example, the leading cause for many “sleepless nights” or even depression. Let us discuss this next.

Next, “[What is “Kāma”? It is not Sex](#)”,

3.5.3 Lobha, Rāga and Kāmacandha, Kāmarāga

Revised April 28, 2018; November 9, 2019

There are various names for greed in Pāli. Each has a different meaning and the differences are significant. Let us look at the two terms “*lobha*” and “*rāga*” first.

What is *Lobha*?

1. *Lobha* is the stronger term of the two. The word *lobha* comes from “*lo*” + “*bha*” where “*lo*” implies “strong attraction” (like that of an ant to honey) “*bha*” is for “*bhava*” (existence). One is firmly attached to this world with *lobha*.

- *Lobha* is the extreme form of greed. One can do highly-immoral deeds or “*pāpa kamma*” with *lobha*. Such *pāpa kamma* could make one destined to the *apāyā*. See, “[Kusala and Akusala Kamma, Puñña and Pāpa Kamma](#).”
- When someone has *lobha*, it is exhibited in two ways:
 - i. One wishes that all the “riches” should come to oneself and not to others (one may be already “rich”, but wants more for oneself).
 - ii. One is not willing to donate even a little bit to the needy and does not share with even the family. It is said that no matter how much one has, some people want more. However, even poor people can have *lobha*, especially for the things others have.

2. It is hard to quantify these, but the idea is that “*lobha*” is the manifestation of the overbearing attachment one has to worldly things.

- *Lobha* is one of 52 *cetasika* (mental factors).
- *Abhijjā* (extreme greed) is the same as *lobha*.

Rāga is a Weaker Form of *Lobha*

3. *Rāga* arises also because one believes there are pleasures to be had in staying in *samsāra* (rebirth process). But one would NOT do highly-immoral things with just *rāga*. Here “*rā*” means “giving priority” or

“enjoying” a sensory experience. And “ga” means to touch or bind. One would like to keep enjoying that pleasure.

- When one is born rich (or acquires wealth), and enjoys life with sense pleasures, that is not *lobha*, that is just *rāga*. Such a person is not doing harm to the others. However, that *rāga* COULD have *lobha* too.
- With *lobha*, one could do things highly immoral deeds (even if one is rich). If one is willing to kill, steal, lie, etc. to gain something one desires, then those are “*apāyagāmī*” *kamma*. One does not necessarily have to carry out these actions or speech. Just thinking about it and making *abhisāṅkhāra* (planning or even enjoying such thoughts) itself is *lobha*. Thus even the poorest person can have *lobha*.

What is *Kāma* and *Kāma Rāga*?

4. Pleasing things in this world are NOT *kāma*. Attaching to such things and generating conscious thoughts about them (*sāṅkappa*) is *kāma*. In other words, *kāma* means attachment to the sense pleasure available in the *kāma loka*, i.e., those available for the gratification of the five senses.

- Then giving priority to *kāma* is *kāma rāga*.
- When one has *kāma rāga*, one likes to enjoy sense pleasures, but not at the expense of others. Thus when husband and wife engage in sexual activity, that is due to *kāma rāga*.
- Even the *devas* in *deva loka* have *kāma rāga*. They like to enjoy sensory pleasures, but they don’t crave for what others have. Thus, they do not have *lobha*.
- Also, see, “[Kāma Guna, Kāma, Kāma Rāga, Kāmaccandha](#)” for more details.

Blinded by *Kāma* Is *Kāmaccandha*

5. Then there is *kāmacchanda* which is stronger than *kāma rāga*. It is like *lobha* but focused on *kāma*.

- *Kāmaccandha* is the highest level of that attachment. Here one is willing to do abhorrent acts (killing, raping, etc) to satisfy one’s desires.
- When one has developed *kāma* to the *kāmacchanda* level, one becomes unaware of the bad consequences of one’s actions. ***Kāmaccandha* comes from *kāma* + *icca* + *andha*, or “being blinded by sense attractions.”** Here, “*icca*” is liking and “*andha*” is blind. [*andha* :[adj.] 1. blind; 2. foolish.]
- It is said that “one loses one’s mind” when blinded by attachment to sense pleasures, i.e., one cannot think rationally when one has *kāmacchanda*.
- Thus, one needs to be mindful not to let one’s *kāma rāga* develop into *kāmacchanda*, which is one of the five hindrances that “cover the mind.”
- Inappropriate sexual activity (affairs outside marriage and rape) are done with *kāmacchanda*, i.e. when one becomes blind with *kāma*.
- *Kāmaccandha* is pronounced “*kāmachchanda*.”

Connection to Stages of *Magga Phala*

6. It is also helpful to see how these different levels of greed are removed at various stages of *Nibbāna*. This will give a better sense of differentiation.

- A *Sotāpanna* has permanently removed *kāmacchanda* and also does not have the worst level of *lobha*. Thus he/she will not engage in “*apāyagāmī*” acts to gain sense pleasures. A *Sotāpanna* has not given up *kāma rāga*.
- A *Sakadāgāmī* also has *kāma rāga* to a lesser extent; this is why he could be reborn in the *kāma loka* for one more time.

- An *Anāgāmi* has removed *kāma rāga*; he will not return to any of the 11 eleven *kāma loka* realms, including the human and *deva* realms, and will be reborn in the *suddhāvāsa* in the *rūpa loka*, and will attain *Nibbāna* there.
- However, an *Anāgāmi* may still enjoy (but not attach to) sense pleasures, i.e., still has *kāma*; see #3 of “[Akusala Citta and Akusala Vipāka Citta](#)”. This is a subtle point, but the point is that an *Anāgāmi* would still have the “four greed-based *citta* without wrong views”, and that is *kāma*. Those four *akusala citta* are prevented from arising only for an *Arahant*.

7. Finally, some given up the desire to enjoy pleasures in *kāma loka*, but like the *jhānic* pleasures. They are born in *rūpa loka* and *arūpa loka* and have *rūpa rāga* and *arūpa rāga*.

- *Rūpa rāga* and *arūpa rāga* are removed only at the *Arahant* stage, as discussed in “[Akusala Citta and Akusala Vipāka Citta](#).”

Next, “[Lobha, Dosa, Moha Versus Rāga, Paṭigha, Avijjā](#)”,

3.5.4 Lobha, Dosa, Moha Versus Rāga, Paṭigha, Avijjā

Revised January 2, 2019; revised November 8, 2019

Lobha, Dosa, and Moha

1. *Lobha* is extreme greed; see, “[Lobha, Rāga and Kāmacchandha, Kāmarāga](#).” One is willing to do any immoral act to get what one wants. One can become blind by greed, i.e. *kāmachandha* can arise.

- *Dosa* (or *dvesha*) is the ANGER that arises that arises based on initial *lobha*. Here, *dvesha* comes from “*devana*” + “*vesha*” — දෙවන වශය — or second manifestation of *lobha*. We get angry when someone else is in the way of getting what one wants.

2. One acts with *lobha* or *dosa* because one has *moha*. *Moha* comes from “*muva*” + “*hā*” which symbolizes a vessel with its mouth closed. Thus one cannot see what is inside. In the same way, one acts with *moha* because one is unaware that such immoral acts will have horrible consequences. One’s mind is blocked dark (cannot “see” clearly).

- When one has not removed the ten types of *micchā diṭṭhi*, one could act with *moha*. The 10 types of *micchā diṭṭhi* are discussed in “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#).”
- In the *pañcanīvaraṇa*, *lobha* and *dosa* are listed as *abhijjā* [*abhijjhā*] and *vyāpāda* represent *lobha* and *dosa*. Those are synonymous terms for *lobha* and *dosa*; see, “[Key to Calming the Mind – The Five Hindrances](#).”

Pāpa Kamma Done With Lobha, Dosa, and Moha

3. **Actions carried out with *lobha*, *dosa*, and *moha* are called *pāpa kamma*.** They are strong versions of *akusala kamma*. Such *pāpa kamma* make one eligible to be born in the lower four worlds.

- Actions done with *dosa* are the worst with *niraya* (hell) as the possible destination, and *lobha* is cause for rebirth in the *preta* (*peta*) *loka* of hungry ghosts. Acts done with both *lobha* and *dosa* have all three “*san*” (since *moha* is always there), and thus lead to rebirth in the animal or “*tirisan*” (“*tiri*”+“*san*” or all three “*san*”) realm.
- As one engages in moral actions and gets rid of one’s tendency (“*gathi*”) to do immoral actions, one starts “cooling down” and one’s likelihood of being born in the lower four realms to diminish.

Rāga, Paṭigha, Avijjā

4. However, *Lobha, dosa, moha* reduce to *rāga, paṭigha, avijjā* levels when one attains the *Sotāpanna* stage. All *pañcanīvaraṇa* permanently removed at the *Sotāpanna* stage.

- Of course, one is now able to “see” the real nature of the world (*anicca, dukkha, anatta*) to some extent (one is not blind), and thus *moha* is reduced to *avijjā* level.
- As explained in the previous post, *rāga* is the craving for sense pleasures. Of course, there are different levels here too, but in general, this level of greed makes one eligible only for birth in the human and *deva* worlds. *Paṭigha* is a lower level of hate, more like “friction.” One may get annoyed when someone and even say something in return, but will never do anything “horrible” that makes one eligible to be born in the lower four realms.

Kāma Rāga* is One Type of *Rāga

5. At the next level of *Nibbāna* of the *Sakadāgāmi* level, *kāma rāga* and *paṭigha* are both reduced to the extent that one will not be reborn in the human level, but only *deva* or higher realms.

- *Kāma rāga* is the *rāga* or craving for sense pleasures in the *kāma loka*. There are two levels of *kāma rāga*: *vatthu kāma* (craving for OWNING objects that provide sense pleasures) and *keles* or *klesha kāma* (craving for sense pleasures is there, but not necessary to “OWN THEM”). A *Sakadāgāmi* has lost the *vatthu kāma*, but still has *keles* (or *klesha*) *kāma*, i.e., he/she still craves for sense pleasures, but has no desire to “own them.” For example, a *Sakadāgāmi* may still like to live in a beautiful house with comforts, but the desire to “own the house” is not there.
- Above the human realm, (in *deva* and *brahma* realms), beings have very subtle bodies. They are not “solid” bodies like ours that are subjected to decay or diseases. Thus they never get sick or visibly old (but of course death is inevitable to anyone anywhere in the 31 realms). That is why a *Sakadāgāmi* is said to be healthy forever (after human life).

***Kāma Rāga* is Removed at the *Anāgāmi* stage**

6. When one attains the *Anāgāmi* stage, both *kāma rāga* and *paṭigha* will no longer be present. Thus one will not even be offended by harsh words/acts and will not retaliate. An *Anāgāmi* will never be born anywhere in the *kāma loka* including the *deva* worlds; they are reborn only in *brahma* realms.

- While a *Sotāpanna* may still have some tendency to give priority to sense pleasures at certain times, all such habits are reduced at the *Sakadāgāmi* stage and removed at the *Anāgāmi* stage.

7. For an *Anāgāmi*, only *rūpa rāga* and *arūpa rāga* will be present. That means a desire for *jhānic* pleasures in the *rūpa* and *arūpa loka* (the four *rūpa jhānā* and four *arūpa jhānā*). And he/she still has *avijjā* left to a certain extent together with ***māna* (some level of pride) and *uddhacca* (some degree of sense of superiority)**.

- All these disappear at the *Arahant* stage. An *Arahant* is free from even a trace of defilement. Therefore, an *Arahant* will never be reborn in “this world” of *kāma loka, rūpa loka, or arūpa loka* (anywhere in the 31 realms).
- That is why it is not productive to meditate trying to get rid of the sense of “self” before the *Sotāpanna* stage. Many people incorrectly interpret *anatta* as “no self.” But the feeling of “me” is removed only at the *Arahant* stage, after the *Anāgāmi* stage. As long as *māna* and *uddhacca* are there, the sense of “me” is still there.

Key to Getting to the *Sotāpanna* stage

8. To get to the *Sotāpanna* stage, one needs to realize the “three characteristics of nature.” One is the true meaning of *anicca* (that there is no point in hurting others to achieve temporary sense pleasures.) The second is that one will be subjected to much suffering (*dukkha*) without realizing the *anicca* nature. The third is that

until one has that mindset, one is truly helpless in this round of rebirths (*anatta*). Until one comprehends them, it is POSSIBLE for any of the following to happen in the rebirth process:

- One could act with extreme greed (*lobha*) to the extent of a hungry ghost (*peta*). Thus, one could get such a birth.
- Act with extreme hate (*dosa*) in the heat of the moment, and could even kill a human. That can lead to a rebirth in the *niraya* (hell).
- One may not realize the unfruitfulness of depending on others. That includes cheating/stealing (without trying to make an honest living for oneself.) Thus, a birth in the *asura* realm is possible.
- It is even possible to cultivate “animal *gati*.” Those include having sex with young children or being able to kill/hurt others for one’s pleasure, etc. In this case, both *lobha* and *dosa* could be present. Thus one is not released from the animal realm.
- Those are the four lower realms. Thus one will be truly helpless (*anatta*) unless one removes such bad habits (“*gati*”). Until then *dukkha* (suffering) is going to be there in the long-term, if not in this lifetime. Those are the true meanings of *anicca*, *dukkha*, *anatta*.

3.5.5 What is Avijjā (Ignorance)?

1. People engage in immoral actions because they highly value the sense pleasures, and are unaware of a better type of happiness called *nirāmisā sukha*; see, [“Three Kinds of Happiness – What is Nirāmisā Sikha?”](#)

Therefore, they are willing to do even immoral things in order to gain sense pleasures. They do not realize two drawbacks associated with such actions:

- If they hurt others in trying to get what they want, they will have to pay for the consequences with very high interest (law of kamma); these are the immoral acts that could lead to rebirth in the *apāyā* (lowest four realms)
- Whatever enjoyment one gets from such sense pleasures are temporary.

These facts come out naturally from the true nature of the world that include the non-stop rebirth process that involves 31 realms and the law of kamma and the causal principle of *paṭicca samuppāda*. It is not possible for anyone to realize these facts by oneself. One has to learn those from a Buddha or a true disciple of a Buddha.

2. What is *avijjā*? It is basically the ignorance of those two facts, even though there is a whole framework of a “world view” behind them. The key ingredients of this “wider world view” are:

- “This world” is much more complex than what is readily observed with our five physical senses, i.e., there are 31 realms instead of the just the two (human realm and the animal realm) that are apparent to us; see, [“The Grand Unified Theory of Dhamma.”](#)
- That the true nature of existence in any of the 31 realms is *anicca*, *dukkha*, *anatta*; see, [“Anicca, Dukkha, Anatta - Wrong Interpretations.”](#)
- That most suffering is encountered in the lowest four realms (*apāyā*).
- And this perpetual birth/rebirth process has no beginning (see, [“Infinity – How Big Is It?”](#)) and the only way to stop it is to attain the Arahant stage of Nibbāna.
- But by reaching the Sotāpanna stage of Nibbāna, one can be assured that rebirth in the *apāyā* (lowest four realms) is permanently stopped; see, [“Why a Sotāpanna is Better off than Any King, Emperor, or Billionaire.”](#)

3. The definition of *avijjā* is not understanding the Four Noble Truths. But to understand the Four Noble Truths one needs to see the “true nature of the world”, the three characteristics of this world: *anicca*, *dukkha*, *anatta*.

4. In brief, *anicca*, *dukkha*, *anatta* mean:

- There is NOTHING in this world that can be maintained to our satisfaction in the long run (*anicca*); thus, after much struggle we only end up with suffering (*dukkha*); thus, all these struggles are in vain and one is helpless (*anatta*).
- The above three characteristics are not just for the human realm: One cannot find any panacea by seeking a better rebirth (even though the realms at and above human realm have less suffering), i.e., none of the 31 realms can provide any lasting happiness, and we are truly helpless (*anatta*).
- In particular, if one does IMMORAL things (killing, stealing, etc) in seeking this illusory happiness, the more one gets trapped in lower realms filled with suffering.
- Unfortunately, the true meanings of *anicca* and *anatta* have been wrongly interpreted as “impermanence” and “no-self”; see, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#),” and the follow up posts on the correct interpretations.

5. For anyone willing to dig deeper: *anicca*, *dikkha*, *anatta*, are manifestations of the impermanence nature “of this world” as described in many ways:

- In *Abhidhamma*, it is explained how this world is “mind based”, and how both the mind and the material phenomena CHANGE with incredible speed.
- This “change” is not random, but is dictated by “cause and effect” or *paṭicca samuppāda*.
- These and others relevant material is discussed at different sections on the site.
- However, it is NOT necessary to learn all those details to achieve some “cooling down” or ‘niveema” or even various stages of *Nibbāna*. One can grasp the concepts of *anicca*, *dukkha*, *anatta* via meditation or contemplation on one’s own life experiences.

6. When one does not comprehend this “big picture”, one makes bad decisions.

- For example, a fish does not see the string or the hook, only sees the worm, and gets into trouble. If it saw the whole picture, with the string and the hook, it may realize that there is something wrong and would not try to grab the worm.
- Just like the fish in the above example, we only see the pleasures to be had in this human life, but do not realize that because of this “apparent pleasures” we are grabbing hold of a world that also include unbearable suffering in the lowest four realms, not to mention the hidden suffering in this life.
- Only a Buddha can see this “bigger picture” and he has shown us not only that bigger picture, but also the reasons why we should believe in that bigger picture. In this website, I hope to provide this evidence in a systematic way.

7. That complex world view (**everything changing moment-to-moment everywhere in those 31 realms**) can be grasped only by a Buddha with a highly-purified mind. Other than a Buddha, a normal human being (no matter how intelligent) is incapable of seeing that whole world view; see, “[Godel’s Incompleteness Theorem](#).”

- Thus *avijjā* cannot be dispelled by “book knowledge.” One needs to comprehend the “true nature of this complex world.”
- Even when we are told about it, it is not easy to grasp it, because our minds have been covered with defilements that have been accumulating from an untraceable beginning; see, “[Key to Calming the Mind](#).”

8. Another important factor that keeps many people “in the dark” or “in ignorance” is the wrong impression that Buddha Dhamma is a pessimistic world view. With the pure Dhamma hidden for over a thousand years, several important facts about the Four Noble Truths got distorted:

- When the Buddha said “this world” is filled with suffering he meant the wider world of 31 realms. Also, he did not say, there is suffering ALL THE TIME or in all the realms of existence. In higher realms (realms 6-31), there is actually much more happiness than suffering. Even in the human realm (the 5th realm), there is more happiness than suffering for many people. That is why it is hard for many people to get motivated to examine the message of the Buddha.
- Yet most beings spend most of the time in the lowest four realms (*apāyā*). This is why, ON AVERAGE, the suffering in the *samsāra* (cycle of rebirths; see, “[Evidence for Rebirth](#)”) is much higher compared to any kind of happiness that can be experienced in any realm.
- Together with the wider “world view”, the concept of an unimaginably long rebirth process got lost; see, “[Sansāric Time Scale](#).” The fact that it is not possible to trace a beginning to this rebirth process is not widely known. In the scale of the *sansāric* time scale, this lifetime of a hundred or so years is negligible. Thus whatever “accomplishment” one achieves, it has a very short duration in the *sansāric* time scale.
- Also, Buddha was just the messenger who conveyed these dismaying FACTS about nature. He discovered the nature’s laws, which clearly illustrate that it is not possible to find any LONG-LASTING happiness ANYWHERE in these 31 realms. But he also pointed out how to find a better and permanent kind of happiness.

9. The most important fact that has been lost for hundreds of years is that there is a happiness of a better quality that also is PERMANENT. This is the Nibbānic bliss or the *nirāmisa sukha*; see, “[Three Kinds of Happiness](#),” “[How to Taste Nibbāna](#),” and “[Nibbāna – Is it Difficult to Understand?](#)” And one can start experiencing this *nirāmisa sukha* even before attaining the Sotāpanna stage of Nibbāna; see, “[Key to Calming the Mind](#).” For more details, see, “[Nirāmisa Sukha](#).”

- **Not knowing any of those (and related facts) is *avijjā* (ignorance). If one does not know about those facts, then how can one find a solution to the problem of suffering?** Also, since only a Buddha can discover these laws, without hearing the message from another person (or a website!), there is no way anyone can learn all this by oneself, no matter how intelligent one is.

10. The Buddha compared *avijjā* to darkness. One cannot remove darkness forcefully. The ONLY WAY to get rid of darkness is to bring in a light. In the same way, the Buddha explained, ignorance can be removed only via cultivating wisdom.

- **No matter what else one does, one will not get rid of ignorance; one has to cultivate wisdom by learning Dhamma. First, one cultivates wisdom to distinguish moral from immoral, and then comprehend the true nature of the world, i.e., *anicca, dukkha, anatta*;** see, “[Buddha Dhamma – In a Chart](#),” and “[What is Unique in Buddha Dhamma](#).”

Next, “[Vedanā \(Feelings\) Arise in Two Ways](#)”,

3.5.6 Vedanā (Feelings) Arise in Two Ways

Revised September 4, 2016; Revised February 9, 2017; October 17, 2017; November 5, 2018; May 5, 2020 (Same at [Vedanā \(Feelings\) Arise in Two Ways @ Assāda, Ādīnava, Nissarana](#))

Introduction

1. The word *vedanā* comes from (“*vē*” + “*danā*”) which means “වෙදනා” in Sinhala. That means to “become aware.” When an *ārammaṇa* comes to the mind (via any of the six senses,) we become aware of it.

***Vedanā* can arise in two ways:**

1. One type of *vedanā* is a consequence of a previous *kamma* or previous defiled action, i.e., a ***kamma vipāka***. That *kamma* could have been done many lives ago.
2. For example, when one gets a “pleasant feeling” while eating a piece of cake offered by the friend, that is a *vipāka vedanā*. Then, if we start thinking about how to eat that cake in the future, with such thinking, we generate “pleasant feelings” about such future experiences. Those are “mind-made” or *samphassa-jā-vedanā* associated with greedy thoughts.

Further details on the two types of *vedanā* can be found at, [“*Vipāka Vedanā* and “*Samphassa-jā-Vedanā*” in a Sensory Event.”](#) But let us discuss them briefly below.

Vedanā* Arising from *Kamma Vipāka

2. *Vedanā* (feelings) due to *kamma vipāka* are **three kinds** : *Sukha vedanā* (pleasant or joyful feeling), *dukha vedanā* (unpleasant or painful feeling), and *adhukkhamasukha* (without being painful or joyful, just neutral. The word *adukkhamasukha* is a combination of *adukkhamā* and *asukha*.)

- **Those three types of *vedanā* are felt only by the body (*kāya*). All *vedanā* initially coming through other five sense faculties are neutral.**
- *Kamma vipāka* leading to *sukha vedanā* and *dukha vedanā* happen to everyone, including *Arahants*. While everyone can live mindfully (taking necessary precautions) to avoid some of such *dukha vedanā*, others are too strong to be able to avoid.
- For example, the Buddha himself had physical ailments later in his life as *kamma vipāka*. Moggallāna *Thero* was beaten to death because of a bad *kamma* that he did many lives before.

3. However, *kamma vipāka* are not certain to happen. Some can be reduced in power (see, [“*Kamma, Debt, and Meditation*.”](#)) Many *vipāka* can be reduced in strength with time if one starts acting with mindfulness.

- Many can be avoided by preventing conditions for them to arise. That means acting with *yoniso manasikāra* or just common sense. For example, going out at night in a bad neighborhood is providing fertile ground for past bad *kamma vipāka* to appear. Many *kamma vipāka* CANNOT take place unless the conditions are right. See, [“*Anantara and Samanantara Paccayā*.”](#)
- We all have done innumerable *kamma* (both good and bad) in past lives. If we act with common sense, we can suppress bad *kamma vipāka* and make conditions for good *vipāka* to arise.
- Also see the discussion on *kamma bīja* in, [“*Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka*.”](#)
- Now let us look at the second type of *vedanā*.

***Vedanā* Arising from *saṅkhāra* (“*Samphassa-jā-vedanā*”)**

4. These are the *vedanā* (feelings) that we generate on our own. These are the *vedanā* that do not arise in an *Arahant*.

- Based on *vipāka vedanā*, we may generate more types of “mind-made” *vedanā* called *somanassa* and *domanassa vedanā* as we discuss below.
- In #2 above, we saw that *vipāka vedanā* are felt only by the body (*kāya*.)
- Some of the *vedanā* coming through the other senses feel as “pleasant” or “unpleasant” NOT because of *kamma vipāka*, but due to another reason. Those are associated with each realm and are “*kāma guṇa*.” See, [“*Kāma Guṇa – Origin of Attachment \(Taṇhā\)*.”](#) For example, all humans taste sugar to be sweet. But some people get addicted to eating sweets full of sugar. That second category is “mind-made.”

- We may generate “*samphassa-jā-vedanā*” starting with initial *vedanā* due to both mentioned above. But most *samphassa-jā-vedanā* have *kāma guṇa* as the cause.

Some Examples of *Samphassa-jā-Vēdanā*

5. These *samphassa-jā-vedanā* arise due to attachment via greed or hate, at that moment (i.e., due to one's *gati*); see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance.](#)”

These are the *vedanā* (feelings) that *Arahants* do not feel. Since they do not have any “bad *gati*,” they do not commit any (*abhi*)*saṅkhāra*, an *Arahant* avoids any kind of feeling arising from *saṅkhāra*. The easiest way to explain this kind of *vedanā* is to give some examples:

- Three people are walking down the street. One has an ultra-right political bias (A), the second has an ultra-left preference (B), and the third is an *Arahant* who does not have special feelings for anyone (C). They all see a famous politician hated by the political right coming their way. **It is a given that the sight of the politician causes A to have displeasure and B to have a pleasurable feeling.** On the other hand, sight does not cause the *Arahant* to generate any pleasure or displeasure. **Even though all three see and identify the person,** they produce different types of feelings. *It is essential to realize that the feelings were created in A and B by themselves.*
- Two friends go looking for treasure and find a gem. Both are overjoyed. It seems quite valuable and one person kills the other so that he can get all the money. Yet when he tries to sell the “gem,” he finds out that it was not that valuable. His joy turns to sorrow in an instant. *Nothing had changed in the object. It was the same piece of colored rock. What has changed was the perception of it.*
- What could happen if an *Arahant* found the same gem lying on the road? (He would not have gone looking for one.) He might think of donating it to a worthy cause.

Another Example of *Samphassa-jā-Vedanā*

6. A loving couple had lived for many years without any problems and were happy to be together. However, the husband slaps his wife during an argument (this is a *kamma vipāka*). The physical pain from the slap itself did not last more than a few minutes. But for how long the wife would suffer mentally? Those feelings arise due to *saṅkhāra*, i.e., sadness and hate. Even the husband, who did not feel any physical pain, would suffer for days if he really loved his wife. *In both cases, the real mental pain was associated with the attachment to each other.* The wife could have dropped something on her foot and would have suffered about the same amount of physical pain. But she would not have had any lingering mental pain associated with that.

- In all the above cases, the initial sense contact was due to a *kamma vipāka*. **No *kamma* energy was generated at that instant.** However, based on that initial contact, we tend to pursue it with our mind and thus may start generating *kamma* automatically. See, “[Avyākata Paṭicca Samuppāda for Vipāka Viññāna.](#)”

Samphassa-jā-Vedanā Arise Due to *Taṇhā*

7. Thus it is clear that in all the above examples, the “extra” happiness or suffering (other than due to *kamma vipāka*) arose from **within one's own mind.** And *taṇhā* (attachment via greed or hate) was the cause of it. See, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance.](#)”

- When we generate such “mind-made *vedanā*,” we also do *kamma* (via *abhisāṅkhāra*) that will bring more suffering in the future.
- The Buddha pointed out that when he described *dukkha* in the *Dhammacakka Pavattana Sutta*. See, “[Essence of Buddhism – In the First Sutta.](#)”

8. Thus all these feelings arise due to *taṅhā*, some form of attachment: greed (craving, liking) or hate (dislike); all these are due to *mano/vacī/kāya saṅkhāra*. The feelings (or rather, the perceptions that give rise to feelings) reside INSIDE oneself. It does not come from outside. We use external things to CAUSE happiness or suffering by our own volition.

- There is no inherent suffering or happiness in ANYTHING external; the sense contact with an external thing CAUSES pain or happiness depending on our *gati* and *āsavā*. An *Arahant*, who has removed all *āsavā*, will be free of such emotional responses.

Connection to *Paṭicca Samuppāda*

9. It is also clear how the accumulation of *saṅkhāra* via *Paṭicca Samuppāda* leads to such varied feelings: If we attach to something with a “like” or a “dislike,” we generate a mindset accordingly. That is *Paṭicca Samuppāda* (*pāti + icca* leading to *sama + uppāda*; see, “[Paṭicca Samuppāda – Introduction](#)”).

- If we attached to something with “greed”, we act with that “greedy mindset.” We will be happy if we get what we wanted. If we got “attached” to something with anger, we would have an “angry mindset” and would be happy if we remove whatever caused that anger.
- In either case, the strength of the feeling is also proportional to the strength of the “like” or “dislike”: ***Sama uppāda or Samuppāda means both in quality and quantity***; the higher the strength of “*pāti + iccha*”, the higher the strength in “*sama + uppāda*”.
- This is how we form habits (“*gati*”) too. A teenager drinking alcohol with a bunch of friends gets attached to that setting and looks forward to having the same experience again. The more he repeats that activity, the more he gets “bonded”, and thus forms a drinking habit. See, “[Habits and Goals](#)” and “[Samsāric Habits and Āsavā](#).”

The sequel to this post is at, “[Feelings: Sukha, Dukha, Somanassa, and Domanassa](#).”

A deeper discussion on *vedanā* at: “[Does Bodily Pain Arise Only Due to Kamma Vipāka?](#),” “[How Are Paṭicca Samuppāda Cycles Initiated?](#),” and “[Avyākata Paṭicca Samuppāda for Vipāka Viññāna](#).”

3.5.7 Indriya and Āyatana – Big Difference

May 7, 2016; revised December 4, 2017

1. We have lived in this world of 31 realms forever, because we like to enjoy sense contacts. By understanding how we actually experience these sense contacts, we will be able to see their true nature.

- In English language, we speak about the five physical senses of eyes, ears, nose, tongue, body. We also talk about the mind that is supposed to “reside” in the physical brain, which is supposed to process signals from the five senses and generate “consciousness” or awareness of the external world.
- Above is the conventionally and scientifically accepted theory, especially in the Western World, but mostly in the Eastern World as well.
- **In Buddha Dhamma, it is important to realize that our sense faculties have two aspects: physical and mental.**

2. Thus there are two versions of sense faculties in Buddha Dhamma: “*indriya*” and “*āyatana*.”

- The physical sense faculties are referred to as *indriya*.
- But those *indriya* CAN BE used as *āyatana* depending on the situation. We will discuss the difference.
- Furthermore, we will also discuss **how we literally “create our own future” by using our sense faculties as not merely as *indriya* but as *āyatana*.**

3. The five physical senses or the “*indriya*” are simply “physical instruments” mounted on our physical bodies to extract information (vision, sounds, smells, tastes, and touches) from the external physical world.

- In addition, per Buddha Dhamma, there is another *indriya* (*manindriya*) to receive *dhamma* (concepts, *gathi*, and *bhava* are synonyms) from the external world. This “*mana indriya*” or *manindriya* is located inside the brain, and has not yet been identified by science.
- This has been discussed in detail in, “[What are Dhamma? – A Deeper Analysis.](#)”

4. Now let us see how these *indriya* can become *āyatana*. In simplest terms, *indriya* become *āyatana* when we deliberately use the *indriya* to accumulate *abhisāṅkhāra*.

- Another way to state the difference is to say that when *kamma vipāka* brings us sense inputs, the sense faculties act as *indriya*. Following that we MAY deliberately use sense faculties to generate new *kamma*; then they work as *āyatana*.
- Let us consider some examples to illustrate the difference.

5. When we just happen to see a nice house (say, while walking), our eyes were used as *cakkhu indriya*. But if we like that house and stop and keep looking at it (while making an attachment for it), then we are using our eyes as *cakkhayatana*.

- If we eat something to quench the hunger, and experience the taste of it, then we are using the tongue as *jivha indriya*. **But if we form an attachment to it** (and thinking about making some more to enjoy the taste again later), then the tongue is used as *jivhayatana*.
- When we walk to the bathroom to take a shower (which is something we need to do to stay clean) that involves using the body as *kāya indriya*. But hitting (or walking to hit) another person involves using the body as an *āyatana* (*kayatana*).
- A teacher speaking to students is using the body as *kāya indriya* (does not involve *abhisāṅkhāra*), but telling a lie or a gossip involves *kayatana* (does involve *abhisāṅkhāra*).
- When we are using the mind to remember a forgotten address, we are using the *mana indriya* (or *manindriya*). But when fantasizing about a sexual encounter, that involves *mana āyatana* (or *manayatana*).

6. Another simple way to look at this distinction is to consider the *cakkhu indriya* as a totally mechanical device (just like a camera) that just helps to get the image to the brain.

- *Cakkhayatana* could come into play when that information is sent by the brain to the *cakkhu pasāda rūpa* and is processed by the *hadaya vatthu* (mind). Based on the personal character (*gati*) of the person, that person **may** generate greed or hate towards that visual. Then *cakkhayatana* (and possibly more other *āyatana*) may be used to take further actions.
- The *cakkhayatana* never arises in an *Arahant*, because there is no *anusaya* or *āsava* (defilements) remaining that can trigger greed or hate, i.e., there are no *kāma gati*, *rāga gati*, *dosa gati*, *moha gati*, etc left.
- The same kind of analysis can be done on any other sense faculty.

7. Now we can also look at this from a different angle and see that **while *indriya* can be considered as PHYSICAL devices that help “extract sense signals” from the outside world, *āyatana* are MENTAL.**

- The six *āyatana* (the six are collectively called “*salāyatana*”) may be created at a given moment depending on the situation and also depending on the *gathi* of the particular person.
- In the “[Idappaccayatā Paticca Samuppāda](#),” *salāyatana* arise via, “*nāmarūpa paccayā salāyatana*.” When we trace steps backwards, we see that *nāma rūpa* arise via “*viññāṇa paccayā nāmarūpa*.” Going further back, “*saṅkhāra paccayā viññāṇa*”, “*avijjā paccayā saṅkhāra*.” Thus *salāyatana* arise as a series of mental actions starting with *avijjā*.

- When one of the six *indriya* brings in a sense input, that sense input MAY induce greed or hate due to *avijjā* and through the above series of *paṭicca samuppāda* steps to CREATE one or more of the *saḷāyatana* to arise.
8. Thus our *indriya* do not change from moment-to-moment, but *āyatana* do.
- For example, our eyes (*cakkhu indriya*) may not change significantly for years; of course an accident can instantly change them or they can degrade with old age.
 - But *cakkayatana* change from moment-to-moment. We can be instantly attracted to an eye-pleasing object.
9. In another example, suppose an alcoholic is walking around inside an airport waiting for a flight. If he sees a bar, he may decide to stop and take a good look at it, think about for a minute and just go in to have a drink.
- The initial sense input (seeing the bar with *cakkhu indriya*), triggered his deeply-ingrained craving (*āsava, anusaya*) for a drink to come to the mind. Then acting with *avijjā*, at least two of the six *āyatana* arose in his mind: thinking about having a drink (*manayatana*), walking inside and ordering a drink (*kāyātana*).
 - Many other people saw the same bar, totally disregarded it and kept walking. The sense input from the *cakkhu indriya* did not lead to the arising of any of the *saḷāyatana* for them.
 - This is why even in a normal human, the sense faculties do not work as *āyatana* all the time.
10. If we live in this world, we have to use the sense faculties in order to live; here we use them as *indriya*.
- But when we use them as *āyatana*, we are in a sense making future *bhava* (especially if those actions are strong).
11. Now we can also figure out what is really meant by the “*indriya bhāvanā*.” It simply means making sure that the *indriya* do not become *āyatana*.
- Of course, we need to focus on the most egregious acts first. For example, when one sees an eye-catching object in a shop, stopping there and thinking about how nice it would be to be able to take it home is making *āyatana*. But that is hard to avoid for a normal human who has not yet attained a *magga phala*.
 - However, if the attraction to the object becomes strong, that could lead to *āyatana* other than the *cakkayatana* come into play: one may decide to steal it. This is of course far too dangerous. As soon as that mindset comes to play, one has to think about the consequences and forcefully stop it.
 - Thus “*indriya bhāvanā*” is nothing but special application of the *Satipaṭṭhāna bhāvanā*. In fact, “*indriya bhāvanā*” is to be practiced not in a “sitting down” meditation session, but while one is doing normal day-to-day activities.
12. Thus only *Arahants* use their sense faculties as *indriya* ALL THE TIME. They do not form attachments to body touches, tastes, odors, sounds (music), pictures, or any type of concepts (thoughts).
- Even a normal human does not use eyes as *āyatana* all the time. We may see numerous things even during a short walk. Most of the things we see we just ignore, because they don’t interest us. This is another way of saying that those things don’t trigger any *anusaya* or *āsava* in us or we don’t have the *gati* to form a liking for them.
13. Finally, it must be noted that there are other types of *indriya* that come into play in different contexts.
- For example, “*pañca indriya*” in 37 Factors of Enlightenment refer to very different types of *indriya*: *sati, samādhi, paññā, viriya* and *saddhā*; see, “[37 Factors of Enlightenment](#)” and “[Two Versions of 37 Factors of Enlightenment](#).”
 - There are five *indriya* in “*pañca indriya*,” whereas there are six *indriya* in reference to sense faculties.

These mind-made pleasures experienced with *āyatana* are called *assāda* (or *āsvāda* in Sinhala). For an in-depth analysis, see, "[Assāda, Ādīnava, Nissarana.](#)"

3.5.8 Hetu-Phala, Paccuppanna, and Paṭicca Samuppāda

July 2, 2016; Revised July 5, 2016

The existence of anything in this world (i.e., a *saṅkhata* (*sankata* in Sinhala)) can be explained in a step-wise process with three "steps": (i) there must be root causes, (ii) there must be suitable conditions, and (iii) whatever that arises due to those two steps will have characteristics (*gathi*) that can be traced back to those causes and conditions.

- The title is pronounced as :

[Weblink: Listen to the Title being pronounced](#)

1. Nothing happens without causes in Buddha Dhamma. This is why there CANNOT be a beginning to the rebirth process. That is a logical impossibility, and is THE main argument against creation by a "Super Being" or a Creator.

- **CAUSE AND EFFECT** is the backbone of science. In order for a scientific theory to be accepted, that theory HAS TO have explanatory power to describe HOW a given effect takes place.

2. It may be hard to fathom initially, but there are only 6 primary causes (roots) that cause anything and everything in this world to arise: *lobha*, *dosa*, *moha* (three immoral roots or *hetu*), and *alobha*, *adosa*, *amoha* (three moral roots).

- The word "*hetu*" comes from the Sinhala words, "*hayen ethu*" which means "wrapped with six." Thus all causes are ultimately due to one more of the six roots mentioned above.
- Also, "*phala*" in Pāli and Sinhala ("*pala*") means "harvest" or the "result."
- Thus anything and everything in this world arises due to those six root causes.

3. The three immoral roots mainly give rise to the four lowest realms (*apāyā*) and the three moral roots mainly give rise to the other 27 realms.

- When one cultivates the three moral roots, one stays away from the *apāyā* and is able to be born in the higher 24 realms. Furthermore, one also cleanses one's mind so that one can begin to comprehend *anicca*, *dukkha*, *anatta* (the true nature of the world); see, "[Buddha Dhamma – In a Chart.](#)"
- However, in most cases, we can see only the "immediate causes." For example, a wet floor is the immediate cause for someone to slip and fall. But if one was mindful (aware) of the wet floor, the fall could have been avoided.

4. Such immediate causes (that derive from those six) are easier to see or to deduce. The causes for a tree to come to life are embedded in a seed. When the seed is planted that causes a tree (or a plant) to grow.

- What causes an explosion from a bomb is in the explosive material in the bomb. There will not be an explosion unless the bomb has potent explosive material in it.
- How those are connected to the six root causes is a bit more involved, and needs a good knowledge of *Abhidhamma* to fully explain.

5. Now, let us analyze how causes lead to corresponding effects. Just because there are causes, corresponding effects do not necessarily appear. There must be appropriate **CONDITIONS** present to bring out the effects.

- A seed has embedded in it the causes to bring about a full-grown tree. But if that seed is in a cool, dry place, no tree will come to life because of it.

- But if the seed is planted in a good soil with exposure to sunlight, it can germinate and grow to be a healthy tree.
 - The bomb will not explode unless it is triggered but a spark. If it is laying somewhere for many, many years, the explosives may degrade and lose their explosive power.
6. This is called “*paccuppanna*” or “*pacca*” + “*uppanna*,” where “*pacca*” is for “*paccaya*” or conditions. “*Uppanna*” means to come to life or birth.
- **Anything in this world (i.e., a *saṅkhata* (*sankata* in Sinhala)) is a *paccuppanna*,** i.e, is born when suitable conditions become available. But, of course, the root causes MUST also be there.
 - Thus even if there is a field out there with good soil and sunlight, nothing will grow unless some seeds are planted.
 - Thus *paccuppanna* means “conditional arising.” This term “conditional arising” is used today **INCORRECTLY** as the translation of *paṭicca samuppāda*. As we will see below, *paṭicca samuppāda* also describe the nature of things that arise due to *paccuppanna*.
7. You can put this “theory” to test by considering anything in this world.
- Any given living being is born due to a *kammic* energy that was created in the past. And that *kammic* energy was created by a good act with moral roots or a bad act with immoral roots.
 - Even non-living things (vegetation, mountains, rivers, etc) are also there due to causes and conditions. The analyses are a bit deeper and we will discuss some in the future.
8. The last step (in the three-step process that we started off with) says, whatever that arises due to those two preceding steps will have corresponding **characteristics (*gathi*)**. This is nothing but *paṭicca samuppāda*; see, “[Paṭicca Samuppāda – “Pati+ichcha”+“Sama+uppāda”](#).”
- In the example that we discussed above, a given seed will not give rise to any tree or a plant. A rice seed will give rise to a rice plant. An apple seed will not give rise to a rice plant but an apple tree, etc.
 - The same is true for living beings. A chicken will be born of a chicken egg, not a turtle. Note that the other two conditions are satisfied here too: there was a being with “chicken *saṅkhāra*” who came into that egg as a *gandhabba*, and that egg needs to be incubated correctly to be hatched and for that hatchling to come out.
9. Actually, the steps *paccuppanna* and *paṭicca samuppāda* are not in a time sequence, but related. The necessary conditions (*paccaya*) in *paccuppanna* are analyzed in detail in the *paṭicca samuppāda* steps.
- When an animal (say a dog) is born, the conditions that led to that birth can be traced in the “[Akusala-Mūla Paṭicca Samuppāda](#)” cycle.
 - First, “*bhava paccayā jathī*” step says, that dog was born due to a “dog *bhava*.” The step, “*upādāna paccayā bhava*” says that “dog *bhava*” arose due to a human grasping it at the dying (*cuti-paṭisandhī*) moment; the step, “*taṇhā paccayā upādāna*” says that grasping was done due to craving for it, and so on.
 - Note above that the human did not really crave to be a dog. Rather he/she enjoyed acts that are normally done by dog. And that process started off with “*avijjā paccayā saṅkhāra*,” where due to ignorance of their consequences, he was cultivating “dog *saṅkhāra*”: For example, thinking, speaking, and doing things that are done by dogs, for example, having indiscriminate sex (sometimes with even family members).
10. We will discuss this more depth in future posts, but I hope the main ideas can be grasped from the above description.

3.5.9 **Diṭṭhi (Wrong Views), Sammā Diṭṭhi (Good/Correct Views)**

Revised April 2, 2016 and August 3, 2016; February 6, 2020

Wrong Views About the World

1. *Diṭṭhi* means dogmatic belief in something(s) in the sense of “this alone is true, and everything else is false regardless of the facts.” **Even though *micchā diṭṭhi* (pronounced micchā diṭṭhi) is the correct term (“*diṭṭhi*” means “views” and “*micchā*” is “wrong”), in Pāli literature “*diṭṭhi*” is used frequently instead of “*micchā diṭṭhi*”; the immoral *cetasika* is *diṭṭhi*.**

- In the Buddha's time, 62 such dogmatic views that were the topics of frequent discussions. They are in the *Brahmajala Sutta* DN 1.
- The *diṭṭhāsava* (*āsava* for the 62 wrong views) is eliminated by *diṭṭhi vissuddhi*, i.e., cleansing of the wrong views at the *Sotāpanna* stage.

2. **Some of these dogmatic views that the Buddha had to deal with frequently were the following. There is a self, there is no-self, reincarnation, no reincarnation, things exist, things do not exist, there are no laws of *kamma*, there are laws of *kamma*, AND they are deterministic.**

- The Buddha refuted those all. Unfortunately, some of those wrong views are back in most versions of “Buddhism” today, most importantly the “no-self” (*anātma* in sanskrit) concept.
- We have discussed some (the first four items were presented in several posts, for example, “[What Reincarnates? – Concept of a Lifestream](#),” and “[Anicca, Dukkha, Anatta](#)”), and we will discuss others in detail in the future.

Having Wrong Views Is an *Akusala Kamma*

3. *Diṭṭhi* (or *micchā diṭṭhi*) is also one of the ten immoral actions or *dasa akusala*. *Micchā diṭṭhi* arises in mind, i.e., it is an *akusala* done by the mind. It also leads to corrupt speech and deeds. See, “[Ten Immoral Actions \(Dasa Akusala\)](#).”

- You can see that such thoughts arise due to dogmatic beliefs, i.e., when one is not willing to even consider the possibility that one could be wrong and to critically examine the evidence. For example, some people refuse to even examine the existing evidence for rebirth with an open mind and that is *diṭṭhi*.
- And one needs to know the “big picture of the 31 realms”, concepts of *kamma*, *anicca*, *dukkha*, *anatta*, etc., to make a decision on rebirth; it is not enough to just to look at the accounts or evidence for rebirth as presented in, “[Evidence for Rebirth](#).”

Three Levels of *Micchā Diṭṭhi*

4. **There are three layers in which *micchā diṭṭhi* is established and accumulates bad *kamma*:**

- Suppose one kills one's parents with the *diṭṭhi* that a parent is not a unique person, and that such *kamma* does not have consequences. That is the coarse level. It can be compared to a fire that burns down a house.
- The second level is when one vehemently defends such a wrong view in a debate and do not even consider the facts presented by the other side. One may genuinely believe in that position, BUT that is because one is not aware of the “bigger picture” on existence. The problem is that “not knowing the facts” is not an excuse. One could jump off of a building, not knowing how gravity operates but will suffer injury/death. This middle level is analogous to a fire that ignites when the match stick strikes a hard surface.

- The third level is the *anusaya* level, where these views lay dormant as *āsavā* (*diṭṭhi āsava*). This subtler level is analogous to a box of matches that has the potential to start a fire.

Two Levels of *Sammā Diṭṭhi*

5. Someone is said to have *micchā diṭṭhi* when one has wrong views at any of the three levels in #4 above. On the other hand, *Sammā Diṭṭhi*, can be two kinds:

- One knows that bad *kamma* (actions) have adverse consequences and can lead to bad rebirths. One wants to live a moral life and strive for a “good rebirth.” That is “**mundane or conventional *Sammā Diṭṭhi***.” Thus these are still defiled views (have “*kilesa*” in them) since they lead to extending *saṃsāra*, and one has not yet eliminated the possibility of a future rebirth in the *apāyā* (four lower realms).
- But when one comprehends to “true nature of this world,” one realizes that there can be no lasting happiness anywhere in the 31 realms of existence. This *Sammā Diṭṭhi* is realized when one truly comprehends *anicca*; see, “[Why is Correct Interpretation of Anicca, Dukkha, Anatta is so Important?](#)”
- That is the “**transcendental or lokuttara *Sammā Diṭṭhi***” that leads to *Nibbāna*; it is free of defilements or “*kilesa*” (or “*keles*” in Sinhala). This view becomes complete at the *Arahant* Stage. *Kilesa* are discussed in, “[What Are Kilesa \(Mental Impurities\)? – Connection to Cetasika.](#)”

Mundane or Conventional *Sammā Diṭṭhi*

6. Thus **conventional *Sammā Diṭṭhi*** means the view to “do good things.” One understands *kamma* and knows the consequences of evil deeds; see, “[Buddha Dhamma – In a Chart.](#)”

- As we discussed in “[Foundation of Dhamma](#),” “doing good things” is better. Still, most of those things are done with the wrong intention of achieving something in return (good rebirth, winning a lottery, pass an examination, etc.). This kind of *Sammā Diṭṭhi* will perpetuate the *saṃsāric* journey, **but is a required first stage to comprehend *anicca***.
- The danger in stopping at the conventional *sammā diṭṭhi* is that we do not know what one will do in a future life (say another human birth.) One could be born under circumstances where one is not exposed to Buddha Dhamma, may associate with wrong people, and may commit *kamma* that will lead to rebirth in the *apāyā* (lowest four realms). The other danger is that we do not know what kind of *kamma* we have done in previous lives, and we may already have some bad *kamma* seeds that could lead to a birth in the *apāyā*.

Transcendental or *Lokuttara Sammā Diṭṭhi*

7. By ***lokuttara Sammā Diṭṭhi*** is meant the true understanding of the nature of “this world” of 31 realms and the round of rebirths.

- For example, that “there is a self” and “there is no-self” are both incorrect, and things (both animate and inanimate) exist if the conditions for their existence are present (*Paṭicca Samuppāda*).
- Even though one partially comprehends *Sammā Diṭṭhi* at the *Sotāpanna* stage, the understanding becomes complete only at the *Arahant* stage.

8. If one cultivates the “*lokuttara*” *Sammā Diṭṭhi* and becomes a *Sotāpanna*, then one will be free from rebirths in the *apāyā*.

- The four greed-based immoral thoughts that arise due to wrong views (“*diṭṭhi sahaḡatha lobha citta*”) do not arise in a *Sotāpanna*, do not occur. See, “[Akusala Citta – How a Sotāpanna Avoids Apāyagāmi Citta.](#)”

Next, “[How do we Decide which View is Diṭṭhi \(Wrong View\)?](#)”

3.5.10 Correct Meaning of Vacī Saṅkhāra

November 8, 2016; revised September 25, 2018

Pronunciation of Pāli words like *vacī*, *vitakka*, and *vicara* can be found in “[Pāli Glossary – \(L-Z\)](#).”

1. Many people believe that *vacī saṅkhāra* are involved only in speech, i.e., when one speaks out. However, *vacī saṅkhāra* are defined as “*vitakka vicara vacī saṅkhāra*,” which means “*vacī saṅkhāra are vitakka and vicara*.” This is in, for example, “[WebLink: suttacentral: Cūlavēdalla Sutta \(MN 44\)](#).”

- In the following we will see that *vacī saṅkhāra* are our conscious, deliberate thoughts in addition to speech.
- Furthermore, this post explains how our minds initiate all our actions and speech via *javana citta*.

2. *Vitakka* is the *cetasika* that points the mind to a given thought object (*arammana*). *Vicara cetasika* keeps the mind engaged on that thought object, i.e., generating new thoughts about it. In *Abhidhamma*, this has been compared to a bee flying to a certain flower (*vitakka*) and then buzzing around that flower (*vicara*) while drinking nectar.

- In the same way, when we focus the mind on a certain object, and then keep the mind there, we generate many thoughts about that object; **these are conscious, deliberate thoughts, and not *mano saṅkhāra* that arise automatically.**
- For example, if we start thinking about an enemy, we could be spending a many minutes or even hours thinking bad thoughts (*vacī saṅkhāra*) about that person. **We do most of that in our minds, just talking to ourselves. But we may also get some of those thoughts out as actual words.**

3. However, *vitakka* and *vicāra* involve defiled thoughts or at least thoughts about getting things done to live this life.

- When one generates thoughts that specifically do not involve *kāma rāga* or other *akusala* — but the opposites (*nekkhamma/kusala*) — those are called *savitakka* and *savicāra*.
- That is how one gets into *jhāna*: By eliminating (or suppressing) *vitakka/vicāra* and cultivating *savitakka/savicāra*.
- This is clearly seen in any *sutta* that describe *jhāna*. For example, in “[WebLink: suttacentral: Tapussa Sutta \(AN 9.41\)](#)”: “..So kho ahaṃ, ānanda, *viviceva kāmehi vivicca akusalehi dhammehi savitakkaṃ savicāraṃ vivekaṃ pītisukhaṃ paṭhamam jhānam upasampajja viharāmi*.” When one is a *jhāna*, *vitakka/vicāra* with *kāma rāga/akusala* are absent and only *savitakka/savicāra* will be present.
- In the above verse, “*viviceva kāmehi vivicca akusalehi dhammehi*” means *kāma rāga/akusala* are absent in the mind while in *jhāna*.

4. In contrast, when we first thought about that person in the example of #2 above, **only *mano saṅkhāra* were AUTOMATICALLY generated according to our *gati***. We don't have any control over *mano saṅkhāra* other than by changing our *gati* over time.

- This is a key point to grasp, and is discussed in detail in the posts, “[How Are Gathi and Kilesa Incorporated into Thoughts?](#)” and “[Suffering in This Life and Paṭicca Samuppāda](#)” as well as other posts in the “[Living Dhamma](#)” section.
- My goal in this post is to point out this critical difference between *mano* and *vacī saṅkhāra*, and to clarify why both our non-automatic, conscious thoughts — as well as speech — are included in *vacī saṅkhāra*.

5. *Kāya saṅkhāra* involves *kamma* done with bodily actions. So, it is possible for one to come to the wrong conclusion that speech also is *kāya saṅkhāra*, since body parts (tongue, lips and associated facial muscles) are moved during speech.

- I automatically came to that wrong conclusion when I first analyzed these terms, without contemplating deeply on them. The key is that speech originates via types of *rūpa* that are different from those *rūpa* that lead to other bodily movements (like walking or moving arms).
- In order to understand this, one needs to have some idea of how our body parts move according to our thoughts.

6. Our physical body parts are really mechanical parts. There is no “life” in them unless a *gandhabba* controls that body. *Gandhabba* is an important concept in Buddha Dhamma, but has been neglected simply because it is not discussed in the infamous Visuddhimagga and other literature by Buddhaghosa, who single-handedly distorted Buddha Dhamma; see, “[Incorrect Theravāda Interpretations – Historical Timeline](#).”

- The concept of *Gandhabba* is an essential element in Buddha Dhamma; see, “[Gandhabba State – Evidence from Tipitaka](#).”
- Without the concept of *Gandhabba*, it is not possible to explain the difference between *bhava* and *jāti*: “[Bhava and Jāti – States of Existence and Births Therein](#),” and not believing it a *micchā ditṭhi*: “[Micchā Ditṭhi, Gandhabba, and Sotāpanna Stage](#).”
- *Tirokudda sutta* is a famous *sutta* that describes the *gandhabba* as “*tirokudda*”; see, “[Antarabhava and Gandhabba](#)” and posts referred to there.

7. Let us briefly discuss how the mind of the *gandhabba* controls a physical body. The physical body is composed of 32 body parts just like a robot is made out of its various parts. What gives life to this physical body is the *gandhabba*, a very fine body smaller than an atom in modern science.

- Even though the *gandhabba* is negligibly small in “weight”, it has this fine body that spreads over the physical body like a fine mesh; it is more like an energy field. There is a fine nervous system associated with the *gandhabba* that overlaps the physical nervous system consisting of billions of nerve cells.
- *Gandhabba* also has the seat of mind (*hadaya vatthu*) and five *pasāda rūpa* (that receive signals from the five physical senses via the brain) located close to the physical heart; see, “[Brain – Interface between Mind and Body](#)” for details.

8. How can such a negligibly small *gandhabba* move a heavy physical body? *Gandhabba* is more like a signal source that gives appropriate commands. It is the brain (which is a very sophisticated computer) that translates those commands into actual signals given to the physical nervous system.

- **The energy to move those body parts comes from the food that we eat.**
- In the post, “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#),” and other related posts this is discussed in more detail. But let us discuss the concept using an example, without getting into those details.

9. When someone decides to move his arm, it is actually the mind that resides in the *gandhabba* that makes that decision that makes that decision (and generates corresponding *vacī saṅkhāra*). Then that signal is sent to the brain and the brain converts that “mental signal” into chemical signals that are transmitted through the nervous system to the muscles in the arm, which in turn move the arm.

- The energy produced by the digestion of our food goes into energize the brain, as well as to move body parts.
- So, the energy spent by the *gandhabba* is a negligible fraction of the energy that is needed to move body parts and to keep the brain functioning. This can be compared to the tiny amount of energy spent by a computer in controlling a fighter jet. The fighter jet gets its energy from the fuel burned, just like our physical body gets its energy from the food digested.
- We generate that small energy in our thoughts — via *javana citta* — as we discuss below.

10. The commands from the *gandhabba* are signals or tiny amounts of energy, and these come in two varieties: *kāya viññatti rūpa* and *vacī viññatti rūpa*. These are two of the 28 types of *rūpa* in *Abhidhamma*.

- The *kāya viññatti rūpa* control bodily movements, and *vacī viññatti rūpa* control speech.
- These “*rūpa*” or “energy signals” are created in *javana citta* that arise in our thought streams or *citta vīthi*. Again, more information can be found in the *Abhidhamma* section.

11. Speech — done with *vacī viññatti rūpa* — is different from moving body parts. Speech involves complex muscle movements that are not yet understood by science. Moving body parts — done with *kāya viññatti rūpa* — is simpler.

- What is behind *vacī viññatti rūpa* are *vitakka* and *vicara cetasika* that are in those *javana citta* responsible for speech. However, when we just “talk to ourselves”, the *javana citta* responsible are weaker than those responsible for actual speech. But those two *cetasika* are in both types of *javana citta*.
- Those *javana citta* that are responsible for physical action (like raising an arm or walking) involve *kāya viññatti rūpa*, and the *javana citta* that generate those are even stronger.
- Therefore, both *vacī saṅkhāra* (whether talking to oneself or actually speaking) and *kāya saṅkhāra* (bodily actions) involve *javana citta*. All *kamma* that can be controlled directly by us are done via *javana citta*; see, “[Javana of a Citta – The Root of Mental Power.](#)”

12. The initial decision to generate *vacī* or *kāya saṅkhāra* actually happens at the *vottapana citta*, which comes just before the 7 *javana citta* in a *citta vīthi*, which has 17 *citta* in total; see, “[Citta Vīthi – Processing of Sense Inputs.](#)” and other related posts in the *Abhidhamma* section.

- That “initial reaction” to a sense input comes AUTOMATICALLY in the *vottapana citta*, and the nature of that reaction depends on one’s *gati*. Thus, the AUTOMATIC *mano saṅkhāra* are generated in that *vottapana citta*.

13. **If you are not familiar with *Abhidhamma*, don’t be discouraged by these details.** I wrote this post to provide undeniable evidence that *vacī saṅkhāra* are generated not only during speech but also while “talking to oneself.”

- But for those who are familiar with *Abhidhamma*, the relationship between terminology and concepts could become much more clear with this discussion.

14. **Now let us take a couple of examples to illustrate this without *Abhidhamma*.** When one is doing a *kammattana* (i.e., meditation recital), one could either say the phrase(s) out loud or one could recite in one’s head. **Both involve *vacī saṅkhāra*.**

- A *kammattana* can be done in either of those two ways, and both involve *vacī saṅkhāra*.
- **Furthermore, the more one understands the concepts behind the meditation phrase, the more powerful those *javana citta* will be, and thus more effective the meditation session becomes.**
- By the way, when one is starting on meditation, it is better to say the phrases out loud because it is easier to keep the mind on that topic. When one gets better at it, one could just recite it internally, without getting the words out.
- This is an example of a *puññabhi saṅkhāra* (meritorious deed) that involves *vacī saṅkhāra*.

15. Now let us consider an *apuññabhi saṅkhāra* (immoral deed) that involves *vacī saṅkhāra*, where one starts generating bad thoughts about an enemy or a person that one dislikes. **One could be generating a lot of such *vacī saṅkhāra* internally, without saying a single word.** However, when the feelings get strong, the words may just come out because the *javana* power of those *javana citta* could become uncontrollable.

- Even though the *javana* power involved in “silent *vacī saṅkhāra*” are less than those involved in speech, one could be generating much more of those “silent *vacī saṅkhāra*” and thus could be generating more *kamma vipāka*.
- Just like in the earlier example, the “power” behind those *javana citta* with *vacī saṅkhāra* will be higher when the degree of hate associated with that person is higher. That is why it is harder to control oneself, when one is dealing with a person that one really hates.

16. In the Noble Eightfold Path, *Sammā Saṅkappa* deals with only one component of *vacī saṅkhāra*, those conscious thoughts without speech. Getting rid of all *vacī saṅkhāra* involve both *Sammā Saṅkappa* and *Sammā Vaca*.

- “*Sankappa*” in Pāli or “*sankalpana*” in Sinhala means conscious thoughts that involve “*san*” or things that contribute to the *sansāric* journey (rebirth process). Here “*sankalpanā*” comes from “*san*” + “*kalpana*,” where “*kalpanā*” means conscious thoughts. When one keeps thinking about something, those thoughts are called “*sankalpanā*.”
- Of course “*san*” is a key Pāli term in Buddha Dhamma; see the posts in the subsection, “[San](#).” *Sammā* means to get rid of, as discussed in the same section.
- Therefore, *Sammā Saṅkappa* or *Sammā sankalpanā* means removing bad conscious and deliberate thoughts, and cultivating moral thoughts.
- *Sammā vaca* involves stopping immoral speech and generating moral speech.

17. The main point to be extracted from this discussion is that one needs to be very careful about generating hateful (or greedy) conscious thoughts for long times. When one becomes aware of such thoughts, one CAN stop them. This is the basis of both *Ānāpāna* and *Satipaṭṭhāna bhāvanā*.

- **We always think conscious thoughts (*vacī saṅkhāra* of the first kind) before acting on them, either via speech (*vacī saṅkhāra* of the second kind) or via bodily actions (*kāya saṅkhāra*)!**
- This is discussed in detail in, “[How Are Gathi and Kilesa Incorporated into Thoughts?](#),” “[Suffering in This Life and Paṭicca Samuppāda](#),” “[Satipaṭṭhāna Sutta – Relevance to Suffering in This Life](#),” as well as other posts in the “[Living Dhamma](#)” section.
- Experiencing pleasing sense objects (called *kāma guna*) is not *kāma*. Generating *vacī saṅkhāra* (or *kāma sankalpanā*) about them is *kāma*; see, “[Kāma Guna, Kāma, Kāma Rāga, Kāmaccandha](#).”

3.5.11 **Kāmaccandha and Iccha – Being Blinded by Cravings**

November 29, 2018

1. *Kāmaccandha* is a Pāli word which has roots in the key word “*iccha*” (pronounced “*ichcha*”),

- There is no need to look for Sanskrit roots to find meanings hidden in Pāli words, and this is a good example.
- *Kāmaccandha* is one of the five hindrances (*pañca nīvaraṇa*); see, “[Key to Calming the Mind – The Five Hindrances](#).”

2. *Kāmaccandha* (“*kāma*”+“*iccha*”+ “*andha*”) means the POSSIBILITY to be blinded by sense desires. We will analyze it below. First let me explain the pronunciation of the key words “*iccha*” and “*anicca*.”

- The Pāli word that is spelled in English as “*iccha*” is pronounced as “*ichcha*”, and has the meaning of liking/craving.
- “*Na*” + “*iccha*” is “*anicca*,” which basically means “(in the long term) it is not possible to get what one craves, likes, or wants.”
- “*Na*” + “*iccha*” is “*anicca*,” just like “*na*” + “*āgāmī*” is “*Anāgāmī*.” [*āgāmī* : (adj.) , coming; one who comes.]

Such “combined words” are very common in Pāli. I will just show two examples from the *Dhammacakkappavattana Sutta*:

- “*yampicchaṃ na labhati tampi dukkhaṃ*” is “*yam pi iccham na labhati tam pi dukkham.*” Here “strong craving” is expressed by adding an extra “h” to go from *icca* to *iccha*.

In the present case, “*Kāma*”+“*icca*”+ “*andha*” becomes *Kāmaccandha*.

- That is similar to “*ayamantimā jāti*” in the *Dhammacakkappavattana Sutta* coming from “*ayam antima jāti.*”

Here is an audio recording on how these words are pronounced:

[WebLink: audio pronunciation of kāmacchanda Download](#)

3. Now let us look at the meaning of the other components of the word *kāmacchanda*.

- Here “*kāma*” conventionally means indulging in sense pleasures that belong to the *kāma loka*: eye, ear, nose, tongue, and the body; “*andha*” means blind.
- If the attraction for something becomes so strong that one’s mind may become “blind to rational thought.” Mind can lose any control over what is sensible and what is not sensible (or immoral). *Kāmaccandha* means “blinded by cravings for sense pleasures.”
- Anyone who has not comprehending *Tilakkhaṇa* (for which removal of the 10 types of *micchā diṭṭhi* is a pre-condition), would have *kāmacchanda*.
- However, one with *kāmacchanda* MAY not commit any immoral action, unless the temptation becomes “high.”

4. When a strong sense input comes, one could be blinded about the possible consequences and may do something immoral.

- For example, if one gets an opportunity to rob or even kill someone without getting caught, that could become very tempting.
- We have heard about situations where well-know people who are considered to be “highly moral” are charged with rape or taking large bribes.

5. This possibility of generating *kāmacchanda* is removed when one attains the *Sotāpanna* stage of *Nibbāna*. *Kāmaccandha* will be reduced to *kāma rāga* for a *Sotāpanna*.

- Having *kāma rāga* means one still has cravings for sense pleasures, but WILL NOT do anything immoral to get such sense pleasures.
- For example, a *Sotāpanna* could a happily married person taking care of a family and engaging in sexual activities with the spouse. He/she may like to enjoy other sense pleasures too.
- *Kāma rāga* is removed only at the *Anāgāmi* stage of *Nibbāna*.

6. Now, let us analyze the word “*kāma*” in a bit more detail. The true meaning of “*kāma*” comes from the [WebLink: suttacentral: Nibbedhika Sutta \(AN 6.63\)](#):

“*Saṅkapparāgo purisassa kāmo,*
Netekāmā yāni citrāni loke;
Saṅkapparāgo purisassa kāmo,
Tiṭṭhanti citrāni tatheva loke;
Athettha dhīrā vinayanti chandanti.”

- *Kāma* is defined as “*saṅkappa rāga* about sense pleasing material things (*citrāni loke*).” And “*saṅkappa*” means “generating conscious thoughts.”

- For example, *Sammā Saṅkappa* in the Noble Eightfold Path is about “contemplating on fruitful Dhamma concepts with the *Nibbāna* as the goal.”
- ***Vacī saṅkhāra* include BOTH *saṅkappa* (conscious thoughts) and *vācā* (speech)**; they both depend on the *cetasika* (mental factors) of *vitakka* and *vicāra* that arise in the mind based on one’s mindset, see, “[Correct Meaning of Vacī Saṅkhāra.](#)”

7. The above explanation provides us with a way to start reducing *kāmacchanda* even before one gets rid of the 10 types of *micchā diṭṭhi*.

- It is important to note that “*kāma*” is not just engaging in activities to fulfill sense pleasures; “*kāma*” **includes indulging in conscious thoughts** about the five sense faculties that belong to the *kāma loka*: eye, ear, nose, tongue, and the body.
- **Most times, people enjoy just thinking about sense pleasures, for example, sex or food.**
- Every time one engages in generating conscious thoughts about sense pleasures, one’s *kāmacchanda* will increase. By cutting down on such “day dreaming”, one could reduce one’s *kāmacchanda*.
- However, it will be permanently reduced to the *kāma rāga* level only at the *Sotāpanna* stage.

8. Even when one has *kāmacchanda*, one may be able to SUPPRESS it temporarily by focusing the mind on a neutral object, for example, on breath or a *kasina* object.

- That is how ancient yogis, and even some people today are able to get cultivate *jhānā* by engaging in breath or *kasina* meditations.
- Furthermore, one would need to be abstaining from *akusala kamma*.

9. This is why in any *sutta* that describes *jhāna* has the following verse: “..*bhikkhu vivicceva kāmehi vivicca akusalehi dhammehi savitakkaṃ savicāraṃ vivekajaṃ pītisukhaṃ paṭhamaṃ jhānaṃ upasampajja viharati.*”

- That means even to get to the first *jhāna*, one would need to be **abstaining from *akusala kamma* (*vivicca akusalehi dhammehi*) and *kāma saṅkappa* (*vivicceva kāmehi*)**.
- Therefore, it is clear from the above discussion that even a *Sotāpanna* is not guaranteed to be able to attain *jhānā*.
- *Jhānā* are different from *magga phala*. We all have cultivated *jhānā* in our deep past. It is easier to get to *jhānā* for those who have practiced *jhānā* in recent lives.
- However, one needs to attain a *magga phala* just once.

10. One can get an idea about that by considering the fact that such “sense pleasing things” are not there in *brahma loka*.

- A *rūpa loka brahma* (i.e., a *rūpāvacara brahma*) has a very fine body and does not have a nose to smell, a tongue to taste, or a solid enough body to feel touch. It can only see and hear.
- Since a *brahma* cannot taste, smell or touch, a *brahma* does not engage in those sense pleasures that are available in the *kāma loka* like tasting food, smelling nice aroma, or engage in sex sex. *Brahmā* are unisex. However, even a human female who cultivated *jhānā* and is born as a *brahma* is said to be have “*purisa gati*” as a brahma: [WebLink: suttacentral: Bahdhātuka Sutta \(MN 115\)](#). That term “*purisa*” is not used in the sense of “male” (*Atthapurisa puggalā* include women who have comprehended the Four Noble Truths, i.e., belong to the *Saṅgha*).
- ***Kāmacchanda* involves only those sense pleasures that are available only in *kāma loka*.**

11. *Jhānic* pleasures are cultivated by at least suppressing *kāma rāga*; see, “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#).”

- That involves subsiding the “heating of the mind” due to *kāma rāga*.

- We don't realize it, but our minds are heated and agitated by the desire for sense pleasures. However, the desire for sense pleasures cannot be removed by sheer will power, and becomes possible normally after the *Sotāpanna* stage; see, "[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)."

12. "*Tāpa*" (pronounced "thāpa") means heat; when we get really stressful we feel a "fire" in the heart. When it gets really bad, people say, "I could feel my heart burn" when they hear an extremely poignant news.

- In the case of getting angry, we can definitely feel this "fire" within; see, "[How to Taste Nibbāna.](#)"
- Even though we do not realize it, even engaging in *kāma saṅkappa* ("day dreaming about sense pleasures") — let alone engaging in them — leads to a "highly perturbed state of mind."
- And "*ātāpī*" is to remove that "fire" from the heart and the stress from the mind, and calm the mind. This is the "cooling down", "*niveema*," "*nivana*" or early stages of *Nibbāna*.

13. This is actually what is meant by the verse, "*ātāpī sampajāno, satimā vineyya loke abhijjhā domanassam*" in the *Mahā Satipaṭṭhāna Sutta*.

- It basically means: "get rid of the fire or heat in the mind by being aware of *kilesa* or defilements and by removing **extreme greed (*abhijjhā*)** that leads to a **depressed mind (*domanassa*)** through discipline (*vineyya*)."
- We will discuss this in detail later, but here is the summary: When one gets angry, that is *domanassa*. When one has strong sense desires that is *abhijjhā*.
- When one can at least suppress *abhijjhā* and *domanassa*, one's mind automatically gets to *samādhi*.

14. These are just basic principles. Furthermore, one cannot get rid of *abhijjhā domanassa* quickly just by sheer will power.

- One needs to learn pure Dhamma and understand the basic principles of WHY a mind gets heated, excited, and becomes vulnerable to doing more *akusala kamma*.
- First thing to realize is that one's actions (*kamma*) are going to have consequences (*vipāka*), if not in this life in future lives.
- And that is not possible without rebirth. This is why rebirth is a built-in foundation of Buddha Dhamma.

3.6.1 Five Aggregates – Introduction

Re-written April 17, 2020; revised April 19, 2020

Introduction

1. Five aggregates (*pañcakkhandha*) represent ANY given living-being. In a series of posts, I will try to explain this concept by addressing the following points.

- Most people today, including many scientists, believe that a “person” exists as long as the physical body exists. We are born (due to no apparent reason,) then we live our lives, and when we die, that is the end of the story. Enjoy life while it lasts! **That is the “materialist view.”**
- Then there are people belonging to various religions who believe the following. At the end of this life, one will either go to hell or merge with the Creator (in heaven) for an eternity. For them, there is something in us in addition to the physical body. That is the “soul” that either goes to hell or heaven. **We can call this the “soul theory” for simplicity.** In Hinduism, it is a little bit different, but primarily the same result. They believe that the “mental body” or the “*ātman*” goes through many “re-incarnations,” but the ultimate destiny is to merge with “*Mahā Brahma*” and to exist there forever.
- Those are straightforward concepts to grasp. But they do not have a solid “scientific” or logical foundation. Neither “theory” explains how each of us came to existence. **The Buddha’s explanation is very different and based on the Principle of Causality, which is *Paṭicca Samuppāda*.** However, it takes a real effort to understand fully.
- This is going to be another way that I will try to explain Buddha Dhamma. It could be simpler than my previous approaches. Of course, they are all self-consistent. The most recent series of posts based on a bit deeper analysis is at “[Origin of Life](#).”

Mind and Matter – Where Is the Connection?

2. How consciousness arises is THE critical issue that no one else but a Buddha can provide a logical and self-consistent answer. Materialists are focusing on the brain as the origin of thoughts or consciousness. However, that is a futile effort since inert matter (atoms and molecules) can NEVER give rise to “mental phenomena” like pain, joy, jealousy, greed. That should be self-evident!

- The proponents of an “unchanging soul” BELIEVE (without any evidence or a proof-of-principle) that consciousness (and thoughts) arise in a “mental body” and that mental body (soul or *ātman*) detaches from the physical body at death and goes to hell or heaven.
- The Buddha said that there is a “mental body” (*gandhabba*) that detaches from the physical body, but that mental body is not an unchanging entity like a “soul” or an “*ātman*.” Furthermore, that mental body can take many different forms based on the existence in one of the 31 realms of existence. For example, the mental-body of a human is very different from that of an animal, a *Deva*, or a *Brahma*. There is no unchanging “soul” or an “*ātman*.” **That should be very clear since, at *Parinibbāna* of an *Arahant*, no trace of that *Arahant* left in “this world of 31 realms.”** There was NOTHING of the essence, to begin with!

The Irrelevant Issue of a “No-Self” in Buddha Dhamma

3. So, it should be quite clear that the idea of a permanent “self” is absent in Buddha’s teachings. **However, the Buddha taught that it is also not correct to say a “self” does not exist for an average human.** In other words, a “self” exists until one fully comprehends that the root cause of *samsāric* suffering is the perception (*saññā*) of a “self” or “me.” See, “[An Apparent “Self” Is Involved in Kamma Generation](#).”

- An average human has both the wrong *ditṭhi* of a “me” and also the *saññā* (perception) of a “me.” It is better to use the word “me” than “self” because that is precisely how the Buddha explained it.
- The wrong *ditṭhi* of a “me” goes away at the *Sotāpanna* stage. The false perception of a “me” (or the sense of “me”) goes away only at the *Arahant* stage. More information on *ditṭhi* and *saññā* at, “[Ditṭhi \(Wrong Views\), Sammā Ditṭhi \(Good/Correct Views\)](#),” “[Saññā – What It Really Means](#),” and “[Vipallāsa \(Ditṭhi, Saññā, Citta\) Affect Saṅkhāra](#).” Of course, more relevant posts can be found by using the “Search” box on the top right.

- At the end of the “[Origin of Life](#)” series, it was shown that, “[Origin of Life – One Creates One’s Own Future Lives](#).” Any person creates his/her own future lives! In the present series of posts, I will try to show the same with this simpler analysis.

A Living-Being – Body and Mind

4. Each living-being (whether we see them or not) has a body and a mind. Some of the “bodies” in other realms are so subtle that we cannot see them. Nevertheless, a living-being has at least a “trace of matter.”

- Furthermore, our mind is not working at all times. While we are in a deep sleep, we are “totally out of this world.” It is as if we did not exist during that time. That is especially true if one becomes unconscious. That is a critical point to understand.
- We need to realize is that we do not have either an “unchanging body” or “an unchanging mind.” Even during a lifetime, both those change moment-to-moment. The physical body (part of *rūpa*) is different from *rūpakkhandha* and we will discuss that in the next post.

Rūpa Versus Rūpakkhandha

5. The Buddha included all types of matter that one has encountered at any time in one huge “collection” or “aggregate.” **That is the “*rūpa* aggregate” or “*rūpa khandha*” or “*rūpakkhandha*.”**

- That means what is in the *rūpakkhandha* are not real (physical) *rūpa*. **Whatever observed becomes just a mental imprint or a memory**, moments after observed. I will discuss this in detail in the next post.
- The Buddha divided the mind or “mental aspects” into four categories: *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*. These entities arise and fade away, but a record of them exists (going back to an untraceable beginning.) **Those “collections” or “aggregates” are *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha*.**

The Five Aggregates Describe any “Living-Being”

6. As we will see, a living-being together with his/her all experiences can be described entirely in terms of those five aggregates. The Buddha showed that those five entities arise and fade away in a manner fully explained in terms of causes and their effect. There is no hidden “soul” or an “*ātman*.”

- **However, at any given time, there is a “person” with a set of *gati* (habits/character) responsible for the actions done at that time. It is not an automated process. That is why we cannot say that there is no ‘self’ up to the *Arahant* stage. There is a “self” doing things on his/her own. Of course, only until seeing the futility of such “doings” or “(abhi)saṅkhāra.”**
- That last bullet point is what we need to understand. We will discuss that systematically, this time with a little bit different approach.

One Type of Consciousness (*Vipāka Viññāṇa*) Arises With an *Ārammaṇa*

7. We tend to think of the mind as our own. **But in reality, our consciousness arises based on two conditions.**

- **First**, we must be awake, and a sensory event must trigger one of the six senses. If someone is unconscious, no matter how loud we talk, he will not hear. No matter how hard we shake him, he will not feel, etc.

- **Second**, one of our six senses must be stimulated by an external sight, sound, smell, taste, touch, or a memory. The first five come through our five physical senses, and the sixth are the thoughts that come to our mind directly.
- An “external trigger” that initiates a new consciousness is called an *ārammaṇa*. Such an *ārammaṇa* comes to the mind via one of the five physical sensory-inputs or directly to the mind. Then one of the six consciousness (*viññāṇa*) arise. These are *vipāka viññāṇa*. They just come in due to prior *kamma*, as *kamma vipāka*.
- These types of *vipāka viññāṇa* arise via, for example, “*Cakkhuñca paṭicca rūpe ca uppajjāti cakkhu viññāṇaṃ.*” See, “[Contact Between Āyatana Leads to Vipāka Viññāṇa.](#)”

Second Type of Consciousness (*Kamma Viññāṇa*) May Arise Based on an *Ārammaṇa*

8. If that external “thought object” or “*ārammaṇa*” is of interest, then we start generating CONSCIOUS THOUGHTS about that *ārammaṇa*.

- At this point, **our consciousness switches to a new type called a *kamma viññāṇa***. That is because this new consciousness is more than just “consciousness” or “awareness.” Now we are interested in pursuing what we have seen, heard, etc. and to “accomplish something more.”
- For example, a friend may offer a piece of cake, and the taste of that cake is a *vipāka viññāṇa*. But if we generate a craving for that cake, we may want to taste it again in the future. We may start thinking about how to either buy it or make it, and ask the friend about those two possibilities. That future expectation is in the new type of *kamma viññāṇa* generated via “*avijjā paccayā saṅkhāra.*”
- In other words, now we have gone beyond “just experiencing the taste of the cake” or the “*vipāka viññāṇa.*” Now we have a future expectation to taste it again with a “*kamma viññāṇa*” generated via our conscious thoughts (*vacī saṅkhāra.*)
- Stated in another way, **we have initiated a *Paṭicca Samuppāda* process with “*avijjā paccayā saṅkhāra*” and “*saṅkhāra paccayā viññāṇa.*” That *viññāṇa* is a *kamma viññāṇa*.**

A Living-Being – Body With a Mind Interacting With the External World

9. What we discussed above in summary form is what our lives are all about. We have a physical body with a mind. The physical body gets sensory inputs from the external world. Then we think about them and pursue some sensory inputs that we like and try to avoid those we do not like.

- In that process, we create new *kamma* that leads to the arising of a new body when the current body dies.
- Of course, the types of bodies that arise in future lives depend on the types of *kamma* that we do, based on those sensory experiences. If one kills another person to acquire that person’s wealth, then one will be reborn in a bad realm (*apāyā.*) If one generates compassionate thoughts about hungry people and offer them food, one may be reborn in a good realm.
- That is how the rebirth process continues.

Summary

10. We have laid the framework to look at the conscious life and the rebirth process from a viewpoint based on the five aggregates or *pañcakkhandha*.

- In this analysis, the whole world is divided into just five categories. One is the *rūpa* aggregate, the “collection of MEMORIES of all *rūpa*” or the *rūpakhandha*. That includes memories of all “material

objects,” including our physical bodies and all external objects that one has seen in all previous lives. We will discuss that in the next post.

- The other four aggregates or “heaps” or “collections” of four types of mental entities: *vedanā* (feelings), *saññā* (perception), *saṅkhāra* (thoughts), and *viññāṇa* (*vipāka viññāṇa* or *kamma viññāṇa*.)
- We will discuss each category in detail in future posts.
- I am re-writing the sub-section on the “Five Aggregates” and will be replacing the old posts there. Of course, now I have many recent related posts to provide more information.

3.6.2 Difference Between *Rūpa* and *Rūpakkhandha*

Revised October 20, 2018; September 18, 2019; re-written April 24, 2020

Introduction

1. Difference Between *rūpa* and *rūpakkhandha* is necessary to understand. **Translation of *rūpakkhandha* as “form aggregate,” gives the wrong impression that it is a collection of “solid objects.”**

- Instead of memorizing Pāli words, **we need to understand what is meant by such Pāli words and use the Pāli words when there is ambiguity.** Many key Pāli words do not have equivalent English words.

What Is a *Rūpa*?

2. Before we understand the difference between a “*rūpa*” and “*rūpakkhandha*,” we need to understand what the Buddha meant by a “*rūpa*.” The Pāli word “*rūpa*” customarily translated as “form.”

- The definition of a *rūpa* is in many places in the *Tipiṭaka*, for example, SN 22.56 and SN 22.57. In simple terms, ” A *rūpa* consists of the four great elements, or is derived from the four great elements.”
- A *rūpa* made of the four great elements is not necessarily a solid object like a tree (those are *vaṇṇa rūpa*.) Types of energy are included in the *rūpa* category. **All sensory inputs to the five physical senses are *rūpa*.**

3. Therefore, we can see that light, sound, odors, taste, and touch are all associated with *rūpa*. It is only within the past 100 years or so that scientists admitted that matter and energy are the same.

- In modern-day terms, *rūpa* are either “solid matter” (human bodies, trees, houses, etc.) OR “energy” (light, sound, heat, etc.). With Einstein’s formula of $E = mc^2$, modern science acknowledged that matter and energy are intrinsically the same.
- In terms of Buddha Dhamma, all those *rūpa* are **collections** of *suddhātṭhaka*, the “smallest unit of *rūpa*.” We usually call visible objects “matter.” And invisible energy forms (like heat, sound) “energy.” Both types consist of *suddhātṭhaka*. A *suddhātṭhaka* is the smallest unit of energy/matter in Buddha Dhamma. It is unimaginably tiny, billions of times smaller than an atom, or even an electron, in modern science.
- The 28 types of *rūpa* are listed in “[Rūpa \(Material Form\) – Table](#).” As we can see, especially the ten types of *rūpa* on the right-hand side of the Table are not what we usually think of as “matter.”

Khandha Means a “Collection” or an “Aggregate”

4. Before we discuss *rūpakkhandha*, it also helps to understand what is meant by a “*khandha*.” In Pāli (and Sinhala), it means a “heap” or a “pile.” In Sinhala, a hill or a “pile of things” is called a “*kanda*” (කන්ද). So, aggregate is not a bad translation for *khandha* (කන්ධ in Sinhala for the Pāli word).

- A heap or an aggregate of *rūpa* is a *rūpa khandha*. It rhymes as “*rūpakkhandha*.” We have seen this in kind of combination of words (*sandhi*) in Pāli terms like *Dhammacakkappavattana Sutta*, which is *Dhamma Cakka Pavattana Sutta*.
- Another example is *dhammassavana*. “*Dhamma savana*” rhymes as *dhammassavana*. “*Dhamma savana*” is listening to *dhamma* (discourse).”

***Rūpakkhandha* is all Mental**

5. **It is essential to realize that *rūpakkhandha* is all mental.** It is NOT a “collection of material things” as the term “form aggregate” may imply. Towards the end of the “[WebLink: suttacentral: Mahāhatthipadopama Sutta \(MN 28\)](#),” Ven. Sāriputta explains *rūpakkhandha*.

- Just the presence of an object, a sound, odor, taste, or touch is not enough to be included in *rūpakkhandha*. For example, if X is sitting in a pitch dark room, X will not see anything there, even though there may be many objects in the room. If X shines a flashlight on a chair, then X will be able to see the chair. **If the image of the chair registers in the mind of X, then it becomes a part of the *rūpakkhandha* for X.**
- Let us take another example. Two people, X and Y, are in a room reading books, and X is fully absorbed in reading, but Y has not much interest in his book. Y hears a dog barking and that sound registers in his mind, i.e., the “dog bark” becomes a part of his *rūpakkhandha*. However, even though that sound would have reached X’s ears too, his attention was entirely focused on the book, and he did not hear the “dog bark.” Thus, the “dog bark” is NOT a part of X’s *rūpakkhandha*.
- Now it should be quite clear that each person has his/her *rūpakkhandha*.

***Rūpakkhandha* is Unimaginably Huge!**

6. **Let us look in a bit more detail to see that these *rūpakkhandha* are “mental impressions” of *rūpa* and NOT the *rūpa* that are out there.**

- Another critical point is that when we experience a *rūpa*, that present moment is quickly gone. Most of *rūpakkhandha* is what one has already experienced. **In fact, everything that we have experienced in all our past rebirths are in the *rūpakkhandha*!**
- Those *rūpā* that one has seen in the past are one’s *atīta rūpā*, including anything that one ever saw (including in previous births). Obviously, these cannot be physical *rūpā*. They are just memories of a *rūpa* that existed in the past. For example, one may remember a tree in the backyard when one was a child. That tree is no longer there, but one can still “see” that tree in one’s mind. Same for one’s dead parents or grandparents who may be no longer alive.
- Any *rūpa* about the future or an *anāgata rūpa* (for example, a sketch of the type of house one is thinking about building) can change with time. **That does not even involve a real *rūpa*.**
- Any *rūpa* that one sees at present (*paccuppanna rūpa*) goes to the category of *atīta rūpa* in a split second. Even if we never see that object again, that memory will be there.

More Types of *Rūpa* in *Rūpakkhandha*

7. Internal (*ajjhatta*) *rūpa* are those that are part of oneself: all body parts, including the ones inside the body. External (*bahiddha*) *rūpa* are, of course, anything outside of one’s body. Coarse (*oḷārika*) *rūpa* are what we call “solid matter,” and fine (*sukuma*) *rūpa* are “energy” (heat, sound, etc.).

- There are *rūpa* that one dislikes (*hīna*), and there are others that one likes (*paṇīta*).
- Some *rūpa* are located far (*dūre*), and some are located near (*santike*).
- Therefore, we see that there could be some overlaps between these categories.

- Many of these in the *rūpakkkhandha* we have not even seen. For example, we have a mental impression of our hearts, but we have not seen our hearts. We may not have seen some landmarks like the Chinese Great Wall, but only pictures of them. Yet, we do have mental impressions of those.
- Altogether there are 11 types included in *rūpakkkhandha*. The [WebLink: suttacentral: Khandha sutta \(SN 22.48\)](#) (among many other *suttā*) summarizes what is included in *rūpakkkhandha*. “*Yaṃ kiñci, bhikkhave, rūpaṃ atītānāgatapaccuppannaṃ (atita, anāgata, paccuppanna) ajjhattaṃ vā bahiddhā vā oḷārikaṃ vā sukhumaṃ vā hīnaṃ vā paṇītaṃ vā yaṃ dūre santike vā, ayaṃ vuccati rūpakkkhandho.*”

Difference Between *Rūpa* and *Rūpakkkhandha*

8. Now we can see the main difference between *rūpa* and *rūpakkkhandha*.

- A *rūpa* is either of the following two kinds. A solid object that one sees with one’s eyes or touches with one’s body (a person, a person’s body or a body part, a tree, a planet, star, etc.) Those are what we usually call “solid objects.” Then there are other sensory inputs coming through the other three sense doors (smells, tastes, or sounds).
- *Rūpakkkhandha* are MENTAL IMPRESSIONS of all external *rūpā* that one has EXPERIENCED. They are NOT tangible or have any energy in them. One’s *rūpakkkhandha* is INFINITE. It has **records of ALL one has seen in ALL past lives going back and back in time without “an actual beginning.”**
- That is why those with *iddhi* (supernormal) powers can recall events that took place billions of years ago. The Buddha, of course, recalled how he received first “*niyata vivarana*” or confirmation that he will become a Buddha trillions of years ago, from Buddha Deepankara. We will discuss that in upcoming posts.

9. Let us take another example to visualize this difference between actual *rūpa* and *rūpakkkhandha*.

- The twin towers in New York destroyed in the 2001 terrorist attack.
- If one had seen those twin towers in New York, one could still recall them in one’s mind. Those physical structures are not there anymore, but they are in one’s *rūpakkkhandha*!
- But the actual *rūpa* that were there in New York are no longer there.

Rūpakkkhandha Is Personal

10. Since we have seen very different things in our lives (and in past lives), our *rūpakkkhandha* are very different. Each has his/her *rūpakkkhandha*.

- We can also see that each has his/her *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, and *viññāṇakkhandha*.
- All of them can be analyzed in the same way.
- We will discuss the other four “*khandhā*” or “aggregates” in the next post.

3.6.3 *Rūpakkkhandha* and *Rūpa Upādānakkhandha*

May 1, 2020

Introduction – What Is *Rūpupādānakkhandha*?

1. In the previous post, “[Difference Between *Rūpa* and *Rūpakkkhandha*](#),” we discussed the difference between *rūpa* and *rūpakkkhandha*.

- In simple terms, ***rūpa* are the “visuals, sounds, odors, tastes, and touches due to solid bodies.”** Note that *rūpa* is a generic term. It indicates any such *rūpa* existing anywhere and does not pertain to any given person.
- On the other hand, ***Rūpakkhandha* has one's “mental impressions” of ALL such *rūpa* that we have experienced (including in previous lives), experiencing now, and hope to experience in the future.** Thus, *rūpakkhandha* is specific to a given person. Each person has his/her *rūpakkhandha*.
- The word *rūpa upādānakkhandha* or *rūpupādānakkhandha* comes from a combination of three words: *rūpa*, *upādāna*, and *khandha*. **Therefore, *rūpa upādānakkhandha* is part of *rūpakkhandha* that we crave (i.e., would like to experience again.)**
- By the way, *rūpakkhandha* and *rūpupādānakkhandha* are conventionally translated as, “form aggregate” and “clinging form aggregate.”

Meanings of *Upādāna* and *Taṇhā*

2. *Taṇhā* means “attaching to things in this world” with greed, hate, and ignorance. Most times, *taṇhā* is incorrectly translated as “craving.”

- The word *taṇhā* comes from “*thán*” + “*hā*,” where “*thán*” rhymes like in “thatch” and means “a place and “*hā*” means getting attached or fused. **That can happen not only with greed but also with anger and ignorance.** see, “[Tanhā – How we Attach via Greed, Hate, and Ignorance.](#)” Note that “*tan*” in *taṇhā* pronounced like in “thunder.” **There are three types of *taṇhā*.** *Vibhava taṇhā* is removed at the *Sotāpanna* stage and *kāma taṇhā* removed at the *Anāgāmi* stage. *Bhava taṇhā* is eliminated only at the *Arahant* stage. See, “[Kāma Taṇhā, Bhava Taṇhā, Vibhava Taṇhā.](#)”
- *Upādāna* (“*upa*” + “*ādāna*” where “*upa*” means “close” and “*ādāna*” means “pull”) means “pull and keep close.” One tries to pull and keep close only things that one desires. See, “[Difference Between Taṇhā and Upādāna.](#)” This post will take some time to digest. But it will help one clearly understand both those terms and the difference between them.
- **There are four types of *upādāna*.** Those are *diṭṭhupādāna* (wrong views,) *sīlabbatupādāna* (rituals,) *kāmupādāna* (for sensual pleasures,) and *attavādupādāna* (sense of “me” or “mine.”) The first two removed at the *Sotāpanna* stage, third at the *Anāgāmi*, and the fourth at the *Arahant* stage of *Nibbāna*. Note the combination of words. For example, *diṭṭhupādāna* is a combination of *diṭṭhi* and *upādāna*.

Upādāna – To “Keep Close”

3. Therefore, *upādāna* means things or memories that we tend to “keep close” (in mind.) Our way of thinking, speaking, and doing things is dictated by different types of *upādāna*.

- **Therefore, *rūpupādānakkhandha* means those mental impressions of “visuals, sounds, odors, tastes, and touches due to solid bodies” that we like and would like to experience again.** In other words, those are the experiences we desire or crave for. That is a small fraction of one's *rūpakkhandha*. A given person has no interest in most of the *rūpakkhandha*.
- The Pāli word that describes “desire” is *icca*. Sometimes the word “*iccha*” with the emphasis on the last “*cha*” sound is used to mean a “strong desire.” As we will see in a few posts, this connection will help us clarify the First Noble Truth on suffering in another way.
- As an aside, you may want to refresh the memory on the fact that Pāli words are written/pronounced differently compared to “standard English.” See, “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1.](#)”

Upādāna Is Different from *Taṇhā*

4. When an *ārammaṇa* (thought object) comes to our mind, we may FIRST instinctively “attach” to it. Then it is at the *upādāna* stage that we keep on thinking, speaking, and doing things with the expectations. Those future expectations are either to enjoy something or to avoid things that one does not like. **It is at that second stage that we accumulate new kamma**, as explained in “[Difference Between Tanhā and Upādāna](#).” That leads to “*bhava*” formation, which in turn, will lead to future rebirth (*jāti*.)

- What I mentioned above are four steps in *Paṭicca Samuppāda*: “*vedanā paccayā taṇhā*,” “*taṇhā paccayā upādāna*,” “*upādāna paccayā bhava*,” and “*bhava paccayā jāti*.” See details at “[Paṭicca Samuppāda](#).”
- It is critical to realize that those things that we do to acquire new *kamma* are done with *saṅkhāra*. Furthermore, we do *saṅkhāra* both at “*avijjā paccayā saṅkhāra*” AND “*taṇhā paccayā upādāna*.” That is discussed in detail with the help of a graphic in the post, “[Difference Between Tanhā and Upādāna](#).”
- Most *Paṭicca Samuppāda* cycles start NOT with “*avijjā paccayā saṅkhāra*,” but with “*taṇhā paccayā upādāna*,” as explained in that post.

What We Normally Call “Form” Is Also in *Rūpakkhanda*

5. We normally assign the word “form” or “*rūpa*” to things we see, including our bodies as well as all external objects and living beings. As I explained above, sounds, odors, tastes, and body touches also arise due to “*rūpa*.” As we discussed in #7 of the previous post, “[Difference Between Rūpa and Rūpakkhanda](#),” the 11 types of *rūpa* included in the *rūpakkhanda* include *paccuppanna rūpa* or any *rūpa* that is being experienced at any given moment.

- One important *rūpa* that one experiences most of the day is one’s own body (*ajjhata rūpa*.)
- Therefore, one’s physical body (more correctly mental impression of it) is part of *rūpakkhanda*.
- Even though we perceive that these are existing “things,” they have momentary existence in a deeper sense. I will give a quick example. A fly lives only a few days (let us say six days.) That fly would age and die in six days. If we see that fly in three days, it would have aged, and its body would be different from that we saw six days ago. When we keep reducing the “time interval,” we realize that even a moment later, it is not the same fly.
- The same argument holds for our bodies too. It changes over our lifetime, and that is the cumulative effect of momentary changes. That is why the Buddha said that you could not touch the same person twice! (If anyone remembers the *sutta*, please let me know: lal@pureddhamma.net.)
- As we will see in future posts, “*dhammā*” experienced by the mind is also a form of *rūpa* in Buddha Dhamma. That last category is “*anidassanaṃ, appaṭighaṃ*” or “cannot be seen or touched.”

We Do Not Attach to “Physical Objects” but to Our “Mental Impressions” or “*Rūpakkhanda*”

6. A given object, whether it is inert or living, is NOT the CAUSE for attachment (*taṇhā* and *upādāna*.) Rather, it is the “way that we perceive that object” based on our *gati*, that we attach.

- Think about a person that you don’t like. As you know, there are many other people, including his/her spouse, children, friends, etc. who may like that person. The reason that you don’t like that person is based on your *gati*. By the way, both you and that person may be considered “good citizens” by most other neutral observers.
- Suppose a guest coming to dinner brings a bottle of alcohol (say, whiskey.) The husband may be happy to see it, but the wife (who may be trying to discourage the husband from having too many drinks) could be irritated. Now, if the guest brought a video game for their child, the child would be delighted. But

both parents may become somewhat unhappy thinking that the child may spend too much time playing video games.

- These are the things that we need to contemplate while doing insight meditation (*Vipassanā*.) That is the best way to understand key concepts in Buddha Dhamma, like *Paṭicca Samuppāda*. We need to apply what we learn in practical situations.
- Therefore, it is not an external *rūpa* that makes us attach (*taṇhā*.) It is our *gati* (which are related to our *anusaya*) that make us attach to CERTAIN TYPES of *rūpa*. The following example illustrates how the same *rūpa* may or may not lead to *taṇhā* even in a given person.

Rūpakkhandha to Rūpa Upādānakkhandha – Instant Change

7. The following is said to have happened many years ago in Sri Lanka. A mother had to go overseas when her son was less than a year old. She had been overseas for many years and came back. She had not even seen any pictures of the boy, who was now a teenager.

- When she came home, she learned that the boy was visiting a neighbor, and she started walking there. On the way, a teenager playing with some friends on the road bumped into her. She became irritated and admonished the boy.
- But then another person on the street said, “Don’t you recognize your son? Well. How can you? You have been away all this time”. Hearing that, she asked, “Oh, is that my son?” and immediately ran back to hug him.
- He was “just another teenager” until she came to know that he was her son. But the moment she realized that it was her son, the whole situation changed. His figure was not another “*rūpa*” in her “*rūpakkhandha*.” Now, he became a part of her *rūpa upādānakkhandha* or *rūpupādānakkhandha*.

Summary

8. I hope you can get further clarification on the difference between “*rūpa*,” “*rūpakkhandha*,” and “*rūpupādānakkhandha*” from the above discussion. You may want to review the previous two posts as well: “[Five Aggregates – Introduction](#)” and “[Difference Between Rūpa and Rūpakkhandha](#),”

- Just like the concept of *anicca*, this again is a fundamental concept to understand, so please try to read through slowly at a quiet time and grasp the concepts. As the Buddha said, “at the end, what matters is understanding a concept, not memorizing words.”
- When I first grasped this concept, it was like turning the lights on in a previously dark area that I did not even know existed! That is a good example of what the Buddha meant by “*aloko udapādi*. “
- We need to realize that *rūpakkhandha* does not arise by itself. All five *khandha* or aggregates rise together.
- Each person has his/her *rūpakkhandha* or the way he/she perceives the material *rūpa* in the world. That *rūpakkhandha* has associated with it the other four *khandhā* (*vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*) and thus comprise the *pañcakkhandha*. And *pañca upādānakkhandha*, or what one has cravings for, is a small part of that.
- We will discuss that in the next post.

3.6.4 **Arising of Five Aggregates Based on an Ārammaṇa**

May 7, 2020; revised May 8, 2020

Introduction

1. Five aggregates (*pañcakkhandha*) is a critical concept to understand. In the previous three posts, we discussed how the mind makes a “mental imprint” of a *rūpa*, whether it is due to sight, sound, smell, taste,

touch, or a *dhammā*. See, “[Five Aggregates – Introduction](#),” “[Difference Between Rūpa and Rūpakkhanda](#),” and “[Rūpakkhanda and Rūpa Upādānakkhanda](#).”

- Therefore, it is critical to understand that what is registered in the mind is not a *rūpa* but the “mental imprint” of it. That single imprint is part of *rūpakkhanda*. **However, the mind sees not just a single “snapshot,” but the whole *rūpakkhanda*.** We will clarify that point in #9 below.
- Furthermore, based on that *rūpakkhanda*, the mind generates *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*. **Those also involve “aggregates” or “collections,” as we will discuss below.**
- We NEVER experience a single imprint of a *rūpa* or a single *citta* with *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*. The mind ALWAYS deals with all five AGGREGATES. That is a critical issue to understand. Please ask questions if not clear.

The Role of an *Ārammaṇa*

2. The mind becomes active only after getting an *ārammaṇa*. An *ārammaṇa* is an external *rūpa* (sight, sound, taste, smell, touch, *dhammā*) that comes to one of the six senses (eyes, ears, nose, tongue, body, and mind.)

- A signal representing that external *rūpa* is “captured” by the sense door (say the eyes) and sent to the brain. The brain processes it and passes it to the mind. That is discussed a bit more in #5 below. **The critical point is that the mind receives a “mental imprint” of that external *rūpa*.** That “mental imprint” or the “signal” or the “image” registers in the MIND.
- The four mental parameters arise with the “image” or the “imprint” of the external *rūpa*. Therefore, the “mental imprint” is also in the “*vipāka viññāṇa*.” That is what we “see,” “hear,” etc. (*cakkhu viññāṇa*, *sota viññāṇa*, etc.) We will discuss a second type of “*kamma viññāṇa*” below.
- From the above discussion, it is clear that it is not possible to separate such “mental parameters.” It is not possible to separate awareness (*vedanā*) from recognition (*saññā*), or both those from the overall cognition (*viññāṇa*) and many kinds of “plans” or “possible actions” (*saṅkhāra*) that arise in mind.
- The word *ārammaṇa* is explained in detail in “[Chachakka Sutta – No “Self” in Initial Sensory Experience](#).”

Mental Components of *Pañcakkhandha* (Five Aggregates)

3. Before we start discussing the four mental “aggregates,” it is a good idea to review the core entities: *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*. They arise in a MIND when an external “thought-object” or an *ārammaṇa* comes to one of the six senses.

- When an external *rūpa* (sight, sound, etc.) comes to a “sense door” (eyes, ears, etc.), **we become aware of it. That is *vedanā*.** A pleasant, unpleasant, or neutral feeling accompanies *vedanā*.
- At the same time, we recognize what it is. Whether it is one’s mother or a tree, a dog bark or voice of the mother, etc., that **recognition of the “thought-object” is *saññā*.**
- Based on the recognition of the “thought-object” to the *ārammaṇa*, we generate our response or reaction to that *ārammaṇa*. **Those responses/reactions are *saṅkhāra*.** The initial “reaction” is automatic and generates *vedanā* and *saññā* (*citta/mano saṅkhāra*.) That means we immediately feel and recognize that *rūpa*. But if we start consciously creating more thoughts, those arise with two more *cetasika* called *vitakka* and *vicāra*. Such thoughts involve *vacī saṅkhāra*. If we then take bodily actions, those require *kāya saṅkhāra*. Therefore, we think, speak, and act with the three types of *saṅkhāra*.
- **The overall “state-of-the-mind” is *viññāṇa*.** It is much more than just “consciousness.” *Viññāṇa* is complicated but falls into two broad categories. *Vipāka viññāṇa* is the overall sensory experience due to an *ārammaṇa* (that *viññāṇa* may be called consciousness.) If we start generating plans on what we saw,

heard, etc., then that becomes a *kamma viññāṇa* with future expectations. **That *kamma viññāṇa* is much more than “consciousness.”**

What We Experience Is the Cumulative Effect of Many *Citta*

4. Therefore, those four entities arise together within a split-second, in the first *citta*.

- But the contents of *citta* keep changing as they arise in rapidly. *Cittā* (plural) always occur in packets (*citta vīthi*), and many of those arise in rapid succession.
- By the time we become aware of the *ārammaṇa*, the initial *citta* has evolved, and millions of *citta* may have run through the mind. That is how those parameters get “bundled up” and experienced as “aggregates” or “*khandha*.”
- Let us briefly go through that process step-by-step.

Creation of a “Mental Imprint” in the Mind

5. The mind must first re-create an image or an imprint of the *rūpa* that triggers the whole process. Let us first clarify how the mind first re-creates an image or an imprint of the *rūpa* that triggers the entire process of generating *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.

- When an *ārammaṇa* comes to one of the five physical sense faculties, the brain prepares an imprint of the corresponding *rūpa*. For example, when looking at a tree, the eyes capture an image of that tree. That image then goes to the brain, where it is processed. At that point, there is not even an “image” like a photograph. It is just a “signal” created by the brain. Even scientists do not know what kind of “signal” or “information” the brain generates or exactly how we “see” a tree.
- Similar processes happen with the other sensory inputs. A sound comes to the ear as a “pressure wave” in air. The eardrum vibrates accordingly, and that vibration is somehow “converted” to a sound. That “sound” is heard only by the mind!
- Yes. Eyes cannot see, and ears cannot hear, etc. The brain cannot see, hear either. It is the MIND that experiences all six sensory inputs. Sense faculties and the brain work together to convert those external signals to a form that can be “felt” by the mind. ***Kammic energy controls all that.***

The Critical Role of the *Hadaya Vatthu*

6. If you start thinking about it, you will realize how complicated that process is where an external *rūpa* can lead to “thoughts” with “feelings.” That is the “hard problem of consciousness” that scientists and philosophers are trying to solve. See, “[WebLink: wiki: Hard Problem of Consciousness.](#)”

- The bottom line is that it happens only in a *hadaya vatthu* (seat of the mind.) Only *kammic* energy can create a *hadaya vatthu* and the associated *pasāda rūpa*. Details at “[Body Types in 31 Realms – Importance of Manomaya Kāya.](#)”
- **When those signals generated by the brain are transmitted to the *hadaya vatthu* (seat of the mind,), it can interpret those signals as visuals, sounds, etc.**
- That is the solution to the “hard problem of consciousness.” *Abhidhamma* describes the solution in great detail.
- Think about that for a while. When we see a tree, there is no trace of a “picture of a tree” inside the brain! The mind creates that picture, and it goes into *rūpakkhandha*. That is another way to see the difference between *rūpa* (a tree in the front yard) and *rūpakkhandha* (the mental imprint of that tree in mind.)

All Five “Mental Impressions” Arise Together!

7. The registration of that “mental imprint of a *rūpa*” in mind automatically leads to the arising of four mental parameters (*nāma dhamma*) in mind. Those are *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.

- **Therefore all five parameters (“mental imprint of a *rūpa*” and *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*) arise together!**
- Now let us discuss how the evolution of these into “collections” or “aggregates” or “*khandha*” within a split-second.

Those Five “Mental Impressions” Quickly Evolve into Five Aggregates

8. The *citta* arises and evolves in nine stages during its lifetime of less than a billionth of a second. See, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).” It is not necessary to know the details. I am trying to provide the “baseline picture.” Those who are interested can look into the details in that post.

- First, only *mano saṅkhāra* arises. The Buddha defined *mano saṅkhāra* as “*vedanā* and *saññā*,” so *saṅkhāra* in this first *citta* has only *vedanā* and *saññā* and no other *cetasika* (mental factors.)
- However, if the *ārammaṇa* is of interest (depending on one’s *gati*), the mind starts adding more “*cetasika*.” Among the first are *vitakka* and *vicāra*. That starts the “deliberation process” in mind about various aspects of that *ārammaṇa*. Now, we are at the *vacī saṅkhāra* stage, and based on one’s *gati* (and the specific *ārammaṇa*) more *cetasika* (good or bad) may be added in.
- Therefore, by the time we become aware of the *ārammaṇa*, the mind is at the initial stages of *vacī saṅkhāra*. We may speak out at this stage if we become interested in the *ārammaṇa*. By the way, by this time, *viññāṇa* has changed to a *kamma viññāṇa*, because, now one is doing “*vacī kamma*.”
- If we become even more interested in the *ārammaṇa*, we may start doing things physically with *kāya saṅkhāra*.
- As an example, think about what happens when someone is mugged while walking on the street. In an instant, he would recognize what is happening, who is attacking and may try to fight back. It is always a good idea to analyze a real-life situation to clarify.

All Five Entities Instantly Become Five Aggregates

9. We started this post to consider what happens when a “mental imprint” registers in the mind due to an *ārammaṇa* (i.e., external *rūpa*.) However, not only that “snapshot” but the whole *rūpakkhandha* contributed to the arising of a *citta* with *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*. Let us clarify that now.

- Let us consider the first *citta* that arises due to the sight of a tree. As we discussed above, the brain generates a “mental imprint” of that tree and sends it to the *hadaya vatthu* (seat of the mind.) As we discussed in #2 above, the mind recognized what kind of a tree it is (to generate *saññā*) in the very first *citta* that received that “mental imprint” of the tree. For that recognition to happen, it must have compared that image with old “memories” of various types of trees and recognized it as an apple tree, for example.
- **That means mind was not only dealing with that single “picture” sent by the brain but all of the *rūpakkhandha*!** We remember that *rūpakkhandha* includes all past *rūpa* that one has experienced. For an average human, the mind will be able to recollect only those *rūpa* that one has experienced in this life.
- Thus, if one has not seen an apple tree (at least a picture of beforehand), then one would NOT be able to recognize it as an apple tree. That is just a simple example.
- While this much detail is not necessary, it is good to realize how complicated this process of generating a *citta* is. And that happens in a billionth of a second! That is why the Buddha said that the mind is the fastest entity in the world. See, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”

Let us briefly review the four mental entities that arise in mind together with the “mental impression” of an external *rūpa*. That means the arising of the five aggregates or *pañcakkhandha*!

***Vedanā* – Registration of the Experience as “Good,” “Bad,” or “Neutral”**

10. *Vedanā* comes from (“*ve*” + “*danā*”) which means “ච්ඡා දැනීම” in Sinhala. That means to “become aware of something” when an *ārammaṇa* (thought object) comes to one of the six sense doors.

- When we sense something, first, we become aware of it. That is *vedanā*.
- If the *ārammaṇa* comes through the **physical body**, that could be a *sukha vedanā*, *dukkha vedanā*, or *adukkhamasukha vedanā* (meaning pleasant feeling, painful feeling, and neither-painful-nor-pleasant feeling.) **These are the *vipāka vedanā*.**
- An *ārammaṇa* coming through any of the **other five senses** is initially felt as “neutral.” However, the mind MAY generate “*samphassa-jā-vedanā*” (incorporating “*san*”) following that. See #11 below.
- We also need to be aware of “*kāma guṇa*.” For example, humans like certain types of food. Each animal species has its own “favorite foods.” Lions and tigers like to eat meat. Cows don’t eat meat, and they eat grass. They are a type of *vipāka vedanā* (plural) that come through all six senses and “feel like” *sukha vedanā*. In fact, most “*samphassa-jā-vedanā*” have their origins in that type of *vipāka vedanā*. That is discussed in, “[Kāma Guṇa – Origin of Attachment \(Tanhā\)](#).”

Two Types of *Vedanā*

11. Based on *vipāka vedanā*, we MAY generate “mind-made *vedanā*” or “*samphassa-jā-vedanā*.” This is where DEFILEMENTS (or “*san*”) are incorporated.

- For example, a *sukha vedanā* COULD awaken our *kāma anusaya*. Then we may generate *kāma saṅkappa* (or sensual thoughts.) These are *somanassa vedanā* (pleasant feelings) created by the mind.
- On the other hand, a *dukkha vedanā* COULD trigger *paṭigha anusaya*, leading to *domanassa vedanā* (angry thoughts) generated by the mind. That could happen, for example, if one accidentally cuts his finger while chopping an onion.
- Based on an *adukkhamasukha vedanā* (coming through any of the six senses,) one MAY generate either *somanassa* or *domanassa vedanā* out of ignorance (triggered by *avijjā anusaya*.) For example, one sees his enemy trip and fall, and a *somanassa vedanā* may arise. In the above two cases also *avijjā anusaya* is there.
- Such a “***samphassa-jā-vedanā*” arises due to *saṅkhāra* generated via *avijjā***, i.e., “*avijjā paccayā saṅkhāra*.” **They do not occur in an *Arahant*.** In all others, they may arise depending on one’s *gati* (or types of *anusaya* left.)
- For details, see, “[Vipāka Vedanā and “Samphassa-jā-Vedanā” in a Sensory Event](#).”

***Saññā* - Perception/Recognition**

12. *Saññā* is, at the very fundamental level, the recognition of an external stimulus. But it is more than that. We not only recognize that a given object is, say, a dog. But some people may be able to categorize it to be a bulldog. Thus *saññā* about a particular object depends on the person and his/her prior experiences.

- The same is true for the other four senses. When we hear a sound, we recognize what it is, say a bird singing. Some may be able to say what type of bird it is; some may not be. Any smell, taste, or touch works the same way. Without *saññā*, we cannot identify things around us, and also cannot communicate with each other meaningfully.
- One of the 31 realms of existence is the “*Asañña* realm.” There, beings have no *saññā* or perception. Thus in principle, those beings are without any awareness. Nothing registers in mind. If anyone has

attained the 7th *jhāna*, the “*Neva saññā Na’saññā*, “then that person knows what it is like to born in the *Asañña* realm.

- *Saññā* is described in more detail in, “[Saññā – What It Really Means](#)” and “[How to Cultivate the Anicca Saññā](#). “

***Saṅkhāra* – Our Response/Reaction to the External Stimulus**

13. *Saṅkhāra* are our reaction to a given *ārammaṇa*. Three types of *saṅkhāra* are defined and discussed in the “[WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#).” Let us summarize them now.

- *Citta/mano saṅkhāra* are *saññā* and *vedanā*. Therefore, *citta/mano saṅkhāra* arise with ALL *citta*.
- *Vitakka* and *vicāra* are *vacī saṅkhāra* because *vitakka* and *vicāra* arise before speaking can occur.
- Breathing is *kāya saṅkhāra* since ALL bodily activities (**whether they have kammic consequences or not**) depend on breathing (*assāsa passāsā kāyikā ete dhammā kāyappaṭibaddhā*).
- However, in both *vacī* and *kāya saṅkhāra* what counts for *kamma* generation is what kind of *cetasika* (good or bad) arise during those activities. For example, the act of stealing involves “bad” *kāya saṅkhāra*. Here, the greed *cetasika* is in *kāya saṅkhāra*.

Further details at, “[Saṅkhāra – What It Really Means](#)” “[Vacī Saṅkhāra – Saṅkappa \(Conscious Thoughts\) and Vācā \(Speech\)](#),” and “[Kamma, Saṅkhāra, and Abhisāṅkhāra – What Is “Intention”?](#)”

***Viññāṇa* – Vipāka Viññāṇa and Kamma Viññāṇa**

14. At the beginning of experiencing an *ārammaṇa* (external *rūpa*), there is the only *vipāka viññāṇa*. Since the *ārammaṇa* may come through any of the six sensory inputs, they can be of six types: *cakkhu*, *sota*, *ghāna*, *jivhā*, and *kāya viññāṇa*. They arise via, for example, “*Cakkhuñca paṭicca rūpe ca uppajjāti cakkhuvīññāṇam*” for “eye-consciousness” when seeing a *rūpa rūpa*. See, “[Contact Between Āyatana Leads to Vipāka Viññāṇa](#).”

- But if we then start generating *vacī or kāya saṅkhāra*, that means we have become interested in that *ārammaṇa*. Then we will be making NEW *kamma* with *kamma viññāṇa*. That takes place in the *Paṭicca Samuppāda* steps, “*avijjā paccayā saṅkhāra; saṅkhāra paccayā viññāṇa*.” See, “[Paticca Samuppāda](#).”
- Therefore, both those type are in the *viññāṇakkhandha*.

Importance of Comprehending Key Pāli Words

15. Even though this post is a bit long, I hope it includes a lot of critical information that will help clarify the concept of the five aggregates (*pañcakkhandha*.)

- The above descriptions on *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* are just summaries.
- But I hope one can see that it is idiotic/dangerous to use English translations for *saṅkhāra* and *viññāṇa* as “mental formations” and “consciousness.” One will never be able to understand Buddha Dhamma with such interpretations.
- **If one does not understand *saṅkhāra* (especially *vacī* and *kāya saṅkhāra*), one would NOT be *sandiṭṭhika*. (or be able to “see” how one accumulates defilements or “*san*.”) See, “[WebLink: suttacentral: Pathamasandiṭṭhika Sutta \(AN 6.47\)](#)” The English translations are not too bad, and one can get a good idea. However, the meaning of “*sandiṭṭhika*” is in the words itself: “*san*” + “*diṭṭhi*” or the “ability to see “*san*.”**
- There is a subsection on “[San](#)” which I highly recommend.

- Furthermore, the terms “form aggregate” and “five aggregates” should be used with an understanding of what is meant by them.

3.6.5 Memory Records – Critical Part of Five Aggregates

May 13, 2020

The Critical Role of Memories

1. Memory records (*nāmagotta*) are a critical component of the Five Aggregates (*pañcakkhandhā*.) Most people would not think of memories as a part of *pañcakkhandhā*. But as we will see below, we cannot live without our memories!

- As we discussed in the previous posts on [“The Five Aggregates \(Pañcakkhandha\)”](#), **each of the past rūpā that we have ever experienced is in the Five Aggregates.** *Vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* — that arose with EACH of those rūpā in the past — are also in the Five Aggregates. **All of them cumulatively play a critical role in the present moment.**
 - Let us take some simple examples to illustrate this. Suppose someone gives you a plate with a couple of pieces of pizza. How do you know that it is food and you can eat it? That it is “pizza”?
 - You may think that this is a silly question. It is not. Unless you had prior experience with eating pizza, you would NOT know what it is.
2. Think about leaving for work in the morning. Unless you REMEMBER where you work and how to get there, you will not be able to “go to work.”
- You wake up in the morning and need to go to the bathroom. But if you don’t remember where the bathroom is, or even what a “bathroom” is, what would you do?
 - By the way, this is why babies need diapers. They have no perception (*saññā*) of “going to the bathroom” until their brains develop. They do not have the ability to recall their memory records.
 - Our lives will be IMPOSSIBLE to live without our memories!
 - You see someone coming toward you. How do you recognize that figure as a “man” or a “woman,” let alone that it is your mother?
 - More examples in [“Amazingly Fast Time Evolution of a Thought \(Citta\)”](#).

How Our Memory Works Is a “Miracle”

3. We discussed this process to some extent in the previous post, [“Arising of Five Aggregates Based on an Ārammana”](#). You may want to read that post as needed, especially #2 through #9. I am not going to discuss some of that here. It is critical to understand those initial posts to get a good idea before we get to the next post. It is a good idea to print all four posts in this series so far, and have them ready to review.

- **Now we are going to look at exactly where these memories reside and how a mind recalls them so quickly.** As we know, any situation that we considered in #1 and #2 above “is not a big deal.”
- When we see a pizza, we know exactly what it is, without having to think. When we leave for work, we do not stop and plan the trip. We just get in the car and drive or walk to the right bus stop/subway, etc. We “know” what a bathroom is and where it is in the house.

Difference Between a Human and a Robot

4. However, a robot CANNOT do any of the above, UNLESS it is pre-programmed in detail. For any robot to do any specific task, a HUMAN needs to think about all possible scenarios and write a “computer code.” That is why “artificial intelligence” WILL NEVER materialize. Scientists will be able to make fancy

robots to do REPETITIVE and COMPLEX tasks. But robots will NEVER be able to THINK. They will not be able to recognize anything that has not been pre-programmed to its computer memory.

- A human can recognize an object INSTANTLY. For example, it can “scan” memories of eating pizza and identify what type of pizza it is, how it would typically taste. And it does that within a split second!
- I highly recommend re-reading the post, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”

Mind – *Hadaya Vatthu* and a Set of *Pasāda Rūpa*

5. That fantastic accomplishment of “instant recognition of things” happens in our minds. The mind is NOT in the brain, even though the brain plays a crucial role in mental phenomena. The mind is associated with the mental body, which is referred to as *manomaya kāya* or *gandhabba* in the *Tipiṭaka*. In essence, that mental body consists of a *hadaya vatthu* (seat of the mind) and a set of *pasāda rūpa*.

- That mental body cannot be seen even with the most sophisticated microscope scientists have today. As we know, they can “see” individual atoms. **But a *gandhabba* is a million times smaller (in weight) than an atom.**
- Yet, that mental body is the essence of a human (or any living-being.) The physical body is just a shell that allows us to taste, smell, and touch.
- That mental body (*gandhabba*) can come out of the physical body in some situations. See, “[Out-of-Body Experience \(OBE\) and Manomaya Kāya](#).” It can see and hear better outside the physical body, but of course, cannot taste, smell, and touch.
- Furthermore, those who cultivate *jhāna* to the fourth *jhānic* state can then develop *iddhi* powers and bring their *gandhabba* out of the physical body at will. Then they can travel anywhere (including far away *Deva/Brahma* realms) as well, or go through walls and mountains as described in some *suttā*. See “[Mystical Phenomena in Buddhism?](#)”
- That mental body or the *gandhabba* has the truly ESSENTIAL parts of a human: *hadaya vatthu* and a set of *pasāda rūpa*.

Only Kammic Energy Can Create a *Gandhabba*

6. Kammic energy controls the creation and function of a *hadaya vatthu* and a set of *pasāda rūpa*. WE create them in our *javana cittā*! Each new *bhava* is associated with a *hadaya vatthu* and a set of *pasāda rūpa*. The number of *pasāda rūpa* vary from five for *kāma loka*, two in *rūpa loka*, to none in *arūpa loka*.

- That is why scientists will NEVER be able to CREATE life. It can only manipulate the conditions for an existing *gandhabba* to build a physical body. See, “[Buddhist Explanations of Conception, Abortion, and Contraception](#)” and “[Cloning and Gandhabba](#).”
- To be more precise, when we do strong *kamma*, we create energies that are released and will reside in the *kamma bhava*. Good strong *kamma* create energies that can lead to the creation of “mental bodies” for “good realms.” Similarly, strong bad *kamma* make conditions for rebirths in “bad realms.”
- Our memories are also in the *kamma bhava*. All energies decay with time. **When “kammic energies” in the *kamma bhava* decay, they become just “memory records.”** The Pāli word for such memory records is “*nāmagotta*.”

Rūpa Loka and “*Nāma Loka*”

7. There are six “*dhātu*” that make up our world of 31 realms: *pathavī dhātu*, *āpo dhātu*, *tejo dhātu*, *vāyo dhātu*, *ākāsa dhātu*, *viññāna dhātu*. See, “[WebLink: suttacentral: Dhātuvibhaṅga Sutta \(MN 140\)](#).”

- All internal (in one's body) and external *rūpa* (not *rūpakkhandha*) are made of *pathavī dhātu*, *āpo dhātu*, *tejo dhātu*, *vāyo dhātu* and they exist in *ākāsa dhātu* (space). Therefore, the physical world (*rūpa loka*) is associated with the first five types of *dhātu*.
- We experience all *rūpa* with the help of our five physical sense faculties (eyes, ears, nose, tongue, body) and the five *pasāda rūpa*. Experience (arising of thoughts) happens in the *hadaya vatthu* (seat of mind), as mentioned in #6. Of course, the *hadaya vatthu*, and the five *pasāda rūpa* are the essence of the *gandhabba*, our “mental body.”

8. *Nāma dhammā* (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*) arise in *cittā* (loosely called “thoughts”) at the *hadaya vatthu*. See #6, #7 of “[Arising of Five Aggregates Based on an Ārammana](#).”

- An imprint of a *rūpa* (that is in the physical world) arises with *viññāṇa* as we discussed in the previous four posts in “[The Five Aggregates \(Pañcakkhandha\)](#).” Furthermore, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa* are experienced as “aggregates” or “collections” or “*khandha*” and NOT as individual entities.
- As soon as that thought passes through a mind, a RECORD of it goes to the *viññāṇa dhātu*. That *viññāṇa dhātu* is also called the “*nāma loka*.” Let us discuss that now.
- **It is essential to note that both the *rūpa loka* and the *nāma loka* exist in “our world of 31 realms.”**

Rūpa and “Nāma”

9. The mental attributes (*nāma*) and physical attributes (*rūpa*) are DEFINED, for example, in [WebLink: suttacentral: 2.3.3. Suttantikadukanikkhepa](#) of *Dhammasaṅgaṇī* of the *Tipiṭaka*:

Tattha katamaṃ nāmaṃ? Vedanākkhandho, saññākkhandho, saṅkhārakkhandho, viññāṇakkhandho, asaṅkhatā ca dhātu—idaṃ vuccati nāmaṃ.

Tattha katamaṃ rūpaṃ? Cattāro ca mahābhūtā, catunnañca mahābhūtānaṃ upādāya rūpaṃ—idaṃ vuccati rūpaṃ.

- That means, “*Vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, *viññāṇakkhandha* are “*nāma dhamma*.”
- “The four great elements (*pathavī*, *āpo*, *tejo*, *vāyo*) together with *upādāya rūpa* (those that arise due to *upādāna* for worldly things made of the great elements) belong to *rūpa*.
- **Such *upādāya rūpa* arise in our *javana citta* (or in *kamma viññāṇa*.)** Those are the “subtle *rūpa*” that are seeds for future existences (*bhava*.) They make up the “*kamma bhava*.” **They have energies BELOW the *suddhātṭhaka* level.** See, “[The Origin of Matter – Suddhatṭhaka](#).”
- As we have discussed, *hadaya vatthu* and each *pasāda rūpa* is ” an energized *suddhātṭhaka*. Therefore, *kammic* energies are unbelievably small, yet they have amazing power.

Kamma Bhava in Nāma Loka

10. **A record of ANY experience is captured in the four aggregates of *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*.** Those are *Vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, *viññāṇakkhandha*. **That memory record in the “*nāma loka*” is “*nāmagotta*.”** However, if that experience involved *kamma* generation, then there will be a *kammic* energy (*kamma bhava*) associated with it.

- Section 1 of the “[WebLink: suttacentral: Paticcasamuppāda Vibhaṅga 6 \(1. Suttantabhājanīya\)](#)” defines *kamma bhava*: “*Tattha katamo kamma bhavo? Puññābhisaṅkhāro, apuññābhisaṅkhāro, āneñjābhisaṅkhāro—ayaṃ vuccati “kamma bhavo”. Sabbampi bhavagāmi kammaṃ kamma bhavo.*
- That says all *kamma* done with *abhisaṅkhāra* will be in the *kamma bhava*. They can bring *kamma vipāka* until that energy decays naturally, which could take billions of years.

- Those “*bhavagāmi kammaṃ*” (meaning strong *kamma* that can sustain the rebirth process) will be there in the *kamma bhava*.

While *Rūpā* Will Decay Over Time, *Nāma* Record (*Nāmagotta*) Does Not Decay

11. While *rūpā* in the *rūpa loka* last only finite times, a record of one’s experiences permanently remains in the *nāma loka*. **That PERMANENT memory record is “*nāmagotta*.”**

- That is stated clearly in the “[WebLink: suttacentral: Najīrati Sutta \(SN 1.76\)](#)” as, “*Rūpaṃ jīrati maccānaṃ, nāmagottaṃ na jīrati*” or “**Physical form (bodies of living beings and inert matter) decay and die, memory records (*nāmagotta*) do not decay.**”
- Of course, we have a limited ability to RECALL past memories, especially memories from past lives. However, some children can recall their previous life. Those who have cultivated *abhīññā* powers can recall many past lives.

12. Don’t be discouraged if you cannot grasp everything in this post. I will expand on some of them in upcoming posts. But it is necessary to read the recommended posts.

- I have spent the past ten years studying Buddha Dhamma. Even these days, I learn new things that make the “big picture” a bit more clear. Once getting some traction, the process will become easier and enjoyable.
- It has been an amazing experience and I hope I can share that with as many people as possible.

3.6.6 Pañca Upādānakkhandhā – Introduction

May 19, 2020

Pañca Upādānakkhandhā – Key Role of Upādāna

Pañca Upādānakkhandhā is normally translated as “five grasping aggregates.” That does not explain much.

1. The concept of *Pañca Upādānakkhandhā* plays a critical role in Buddha’s teachings. In his first sermon, “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#),” the Buddha summarized *dukkha* (or suffering) in a single verse. That is, “*Samkhittena pañcupādānakkhandhā dukkhā*.” The translation appears in most English texts as, “in brief, the **five grasping aggregates are suffering**”.

- That translation does not convey the meaning of the verse until we understand what is meant by “*pañcupādānakkhandhā*.”
- It is easy to see that the word “*pañcupādānakkhandhā*” comes from the combination of the three words: *pañca*, *upādāna*, and *khandhā*. Here, “*pañca khandhā*” means “five aggregates” and “*upādāna*” means “the tendency to keep close.” **As you will see, “keeping close” is a better translation than “grasping” used in most translations.**
- Therefore, that verse indicates that suffering in this world arises due to our tendency to “keep close” certain parts of those five “aggregates.”
- We have already discussed some features of those “five aggregates.” See, “[The Five Aggregates \(Pañcakkhandha\)](#).”

Upādāna – Keeping Close “in the Mind”

2. *Upādāna* means “pulling something closer” (“*upa*” + “*ādāna*,” where “*upa*” means “close” and “*ādāna*” means “pull”).

- It is critical to realize that *upādāna* happens ONLY in the mind.

- *Paṭicca Samuppāda* describes phenomena that take place in the MIND. We can summarize *Paṭicca Samuppāda* simply as follows. Attaching to an *ārammaṇa* is *taṇhā* (gets “bonded” to it.) That leads to *upādāna* (keep it close in one’s mind.) That is the step, “*taṇhā paccayā upādāna.*” Also, see, “[Difference Between Tanhā and Upādāna.](#)”
- **Furthermore, we saw that even the *rūpakkhanda* is in the mind.** Many people have the perception that *rūpakkhanda* is “collection of *rūpa.*” But we clarified *rūpakkhanda* in the post “[Difference Between Rūpa and Rūpakkhanda.](#)”

3. In that post, we also discussed how some parts of *rūpakkhanda* become parts of *rūpa upādānakkhandha* or *rūpupādānakkhandha*.

- Therefore, “*pañcupādānakkhandhā*” means “keeping those five aggregates (*rūpakkhanda*, *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, *viññāṇakkhandha*) “close to one’s mind.” Then, one will be thinking, speaking, and taking actions based on particularly appealing parts of the five aggregates.
- Again, all of *rūpakkhanda*, as well as other four *khandhā* in *pañca khandhā*, are associated with the mind.
- Thus, ALL of *pañcupādānakkhandhā* is associated with the mind. Those are what one thinks about and plan accordingly. A good example is to re-create a past sexual experience and to enjoy that. Another is to create a future expected experience in mind and to enjoy that. Both those activities involve *pañcupādānakkhandhā*.
- As we can see, *pañcakkhandhā* is enormous, infinite. It has all our experiences from a beginning that cannot be discerned. But *pañca upādānakkhandhā* is a very small part of that.

Diṭṭhi* and *Taṇhā* – Root Causes of *Upādāna

4. We tend to keep something close to us if we believe it will be beneficial for us to do so. On the other hand, if we think something will be bad for us and can bring suffering, we would try to avoid it and try to keep it far away.

- For example, if we know there is a bomb inside a beautiful object, we would try to get far away from it, even though it looks appealing.
- Sometimes, we do not see dangers hidden in “things that appear to be appealing.”
- An example that I often give is a fish biting a worm on a hook. The fish cannot see the hidden hook or the fisherman holding the pole that is attached to the hook with a string. But we can see all that and we know what will happen to the fish if it bites that tasty bait.
- However, we are unable to see the hidden dangers in sensual pleasures. Only a Buddha can figure out WHY attaching to sensual pleasures is dangerous, even if no immoral actions are involved. The question is, why sense pleasures are bad even if immoral actions (*dasa akusala*) are NOT involved. There are “hidden dangers” in sense pleasures. See, “[Kāma Assāda – A Root Cause of Suffering.](#)”
- Have you seen ants getting stuck in spilled honey? They start drinking it and get stuck. They don’t see the “hidden danger” in a pool of tasty honey either.

Monkey Not Letting Go Even When the Life is in Danger

5. In the above example of the fish biting a “tasty bait” or the ants attracted to honey at least cannot see the “hidden danger.” However, look at what happens to the monkey in the following video:

[WebLink: youtube: How to Catch a monkey](#)

- The monkey could have let go of the grains in its fist, take its hand out, and run away when it saw the hunter coming. (**Note;** I have set the video to stop early to show only the relevant portion for our

discussion. If you play it again, you can see the whole video. The hunter wanted to find where the monkey's water source was. So, he fed the monkey with salty food and let it go, and followed it.)

- But it would not let go of the grains in its fist. It does not want to let go of its “tasty grains” even while seeing the danger. It is HOPING that it would be able to get the hand out WITH the grains.
- That is why even a *Sotāpanna* has a hard time getting rid of the desire for sensual pleasures, even though he/she can SEE the dangers in them.
- However, a large part of *upādāna* has been removed for a *Sotāpanna*. He/she would NOT engage in any immoral deeds to fulfill sensual desires. For example, he/she would not engage in sexual **misconduct** at any time. The desire for sensual pleasures will keep one bound to the *kāma loka*. But it is only IMMORAL DEEDS (*dasa akusala*) done to gain sensual pleasures that will make one eligible for rebirth in an *apāya*.
- In other words, a *Sotāpanna* has not removed “*kāma upādāna*.”
- An *Anāgāmi* has removed “*kāma upādāna*,” but the last one of “*attavāda upādāna*” (perception of a “me”) goes away only at the *Arahant* stage. **Thus, the four types of *upādāna* need to be removed in stages.**

Five Aggregates (*Pañcakkhandhā*) Fall into Two Main Categories

6. From our previous posts in “[The Five Aggregates \(Pañcakkhandha\)](#),” we know that the five aggregates can be separated out into two MAIN categories: past and present.

- There are 11 types of entities in each aggregate. See, “[Difference Between Rūpa and Rūpakkhanda](#).” However, all of them belong to three time-frames: past, present moment, and future. The “present moment” is gone in a split second. The other categories (like internal and external or near and far) belong to each time-frame. Thus, effectively we have two MAIN categories in each aggregate.
- Those two are the “past aggregates” and “future aggregates.” Put in another way, **the five aggregates encompass our “memories” and our “future expectations/hopes.”**

Pañca Upādānakkhandhā – Reliving Memories and Making Future Plans

7. *Pañcupādānakkhandhā* can be thought of as mainly the following. Significant “events” that happened in the past and also a set of events that we would like to see happen in the future. Put in simple terms, *pañcupādānakkhandhā* or “*upādāna* of *pañcakkhandhā*” means the following two cases.

- **Our tendency to constantly think, speak, and act to re-create past experiences.**
- **In addition, we also do the same to fulfill future plans/hopes.**

Those activities are done via *mano*, *vacī*, and *kāya* (*abhi*)*saṅkhāra*. We will discuss that in the next post.

Upādāna – Why Is It Easier to Recall Somethings Than Others?

8. From our discussion so far in this series of posts, it is clear that records of ALL our past actions (and speech and thoughts) are “stored permanently” in “*nāma loka*.” You may want to refresh memory by reading “[Memory Records – Critical Part of Five Aggregates](#).”

- However, we know that it is easier to recall some of the past events than most others. In fact, we cannot recall even some things that happened just yesterday!
- That is because there are events that we tend to “keep close” in our minds. That can happen out of greed, anger, or ignorance. If we eat tasty food, we would like to taste it again. If someone did something “bad,” we would like to remember that out of anger. We also tend to remember “funny things” of no significance (dirty jokes, for example) out of ignorance.

- In addition to just “a record” or “*nāmagotta*,” such “memorable” events leave energy in the “*nāma loka*.” Those are *kammic* energies and are in “*kamma bhava*.” They originate in *kamma viññāṇa* in *javana citta*. Such events involve *abhisankhāra*.

The Difference Between “*Nāmagotta*” and “*Kamma Bīja*”

9. A record of any and all events go into “*nāmagotta*” as soon as that event is done. But some events involve “good” or “bad” strong *kamma* generated via *abhisankhāra*. As we have noted, there are three types of *abhisankhāra*: *apuñña abhisankhāra*, *puñña abhisankhāra*, and *āneñja abhisankhāra*.

- Those are the types of ***abhisankhāra*** in the “*avijjā paccayā sankhārā*” step in *Paṭicca Samuppāda*. See, “[Kamma, Sankhāra, and Abhisankhāra – What Is “Intention”?](#).”
- We can put it in another way by saying that such actions lead to the formation of *kamma bīja*. They have the potential to bring *kamma vipāka*. Especially strong *kamma vipāka* can lead to rebirth.
- However, if such *kamma bīja* do not get a chance to bring their *vipāka*, their energies run out over long times. At that point, they become just “*nāmagotta*” without any associated energy.
- A *kamma bīja*, on its own, can bring us an *ārammaṇa* to the mind (i.e., bring back the memory of the event) even if we are not trying to recall it.
- **While a *kamma bīja* can bring an *ārammaṇa* to the mind on its own (due to its energy,) a “*nāmagotta*” NEEDS TO BE recalled.** We will discuss that later.
- Furthermore, it is easier to recall those events associated with strong *kamma bīja*. Such events are of importance to us, and thus, it is easy to recall them. *Nāmagotta*, on the other hand, are more difficult to recall. However, there are a handful of people who can do that in amazing detail (see below.)

Proof That All *Nāmagotta* Remain Intact

10. Strong evidence is beginning to emerge that there is indeed a “complete record” of one’s past just like a videotape. These studies started with Jill Price, who contacted a team of scientists in the early 2000’s about her ability to recall anything from 1974 onward. Here is a video of her with Diane Sawyer on an ABC News program:

[WebLink: youtube: The woman that never forgets - Jill Price First Interview!](#)

- Note that she says she can “see” in her mind what happened on any day from 1974. It is not like she is recalling a “summary” or the gist of what happened. She can actually recall the whole episode in detail. Even the day and date come out effortlessly.
- Note that she can remember ONLY those things SHE had EXPERIENCED. That means just the portion of HER *pañcakkhandhā* from 1974. For example, if she had not watched the TV series “Dallas,” she would not be able to say on which day “JR was shot.”
- Since then more people have provided similar accounts. See, “[Recent Evidence for Unbroken Memory Records \(HSAM\)](#).”
- This is why some children can recall their previous life. The ability to recall a previous life means that the memories could NOT have been in the brain, and were “stored” outside the physical body. See, “[Evidence for Rebirth](#)” and “[Boy Who Remembered Pāli Suttas for 1500 Years](#).”
- Ancient *yogis* who could get to the *eighth jhāna* could see all past lives in the present eon or *kappa*. But the Buddha could see numerous eons within a short time.

3.6.7 Five Aggregates – Connection to Tilakkhaṇa

In this section, we will look at the relationship between the five aggregates and suffering. Within this discussion, we will be able to clarify the three key Pāli words *anicca*, *dukkha*, *anatta*. Those terms describe the Three Characteristics of Nature or *Tilakkhaṇa*.

[Five Aggregates and Tilakkhaṇa – Introduction](#)

[Icca, Nicca, Anicca – Important Connections](#)

[“Me” and “Mine” – The Root Cause of Suffering](#)

[Difference Between “Me and Mine” and Sakkāya Ditthi](#)

[Sakkāya Ditthi – “Me and Mine” View](#)

[Atta – Two Very Different Meanings](#)

3.6.7.1 Five Aggregates and Tilakkhaṇa – Introduction

May 27, 2020

We start a series of posts on the five aggregates and *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*.)

The Five Aggregates describe any Living Being’s “World”

1. The five aggregates (*pañcakkhandhā*) represent any living being together with its “external world.” It is not correct to say that the five aggregates are in one’s own “physical body.” Everything about a living being, including ALL past experiences and future expectations, is embedded in *pañcakkhandhā*. Furthermore, one’s *gati*, *anusaya*, etc., are all in *pañcakkhandhā*. Please read the previous posts in “[The Five Aggregates \(Pañcakkhandha\)](#).”

- What I summarized in those few posts is the material in many *suttā* in the [WebLink: suttacentral: Khandha Samyutta \(SN 22.1 ~ 22.159\)](#) in the *Samyutta Nikāya*. There are also *suttā* in other parts of the *Tipiṭaka*.
- In those *suttā*, the Buddha describes any given living being in terms of *pañcakkhandhā*: *rūpakkhanda*, *vedanākkhandha*, *saññākkhandha*, *saṅkhārakkhandha*, *viññāṇakkhandha*.
- Those are the five aggregates loosely translated as form, feelings, perceptions, mental formations, and consciousness. As we have discussed, such translations are misleading. It is better to use the Pāli terms and learn their true BROADER meanings. For example, *viññāṇa* can be of two different types of *kamma viññāṇa* and *vipāka viññāṇa*.

Pañca Upādāna Khandhā (Five Clinging Aggregates) Is There Until Becoming an *Arahant*

2. We also discussed what is meant by *pañca upādāna khandhā* (loosely translated as “five clinging-aggregates”) in the section “[The Five Aggregates \(Pañcakkhandha\)](#).”

- Until attaining the *Arahant* stage, all living beings have *pañca upādāna khandhā*. A living *Arahant* has *pañca khandhā* but not *pañca upādāna khandhā*.
- An *Arahant*’s *pañca khandhā* will also cease to exist at the death of the physical body. That means an *Arahant* will not be reborn anywhere in the 31 realms.

The Definition of an “Ignorant Living Being” or “*Satta*”

3. The Buddha explained what is meant by a “*satta*” or a “living being” to Rādhā in the “[WebLink: suttacentral: Satta Sutta \(SN 23.2\)](#).” “*Rūpe kho, Rādhā, yo chando yo rāgo yā nandī yā taṇhā, tatra satto, tatra visatto, tasmā sattoti vuccati. Vedanāya ... saññāya ... saṅkhāresu ... viññāṇe yo chando yo rāgo yā nandī yā taṇhā, tatra satto, tatra visatto, tasmā sattoti vuccati*”

Translated (just the meaning): “Rādhā, when there is desire (*chanda*), *rāga*, and a perception of high value (*nandī*) of material form (*rūpa*), there is clinging (*satto*), strong clinging (*visatto*) for form, and **then an ignorant living-being (*satto*) is spoken of**. Similarly, when there is desire (*chanda*), *rāga*, and a perception of high value (*nandī*) of *vedanā ... saññā ... saṅkhāra ... viññāṇa*, then a living-being is spoken of.”

- Other translations at “[WebLink: suttacentral: Sentient Beings \(SN 23.2\)](#).”
- Note that the Pāli word “*satta*” means “clinging” or “attach.” A strong version of clinging is “*visatta*.”
- **In other words, as long as there is *upādāna* for *pañcakkhandhā* (i.e., as long as there is *pañcupādānakkhandhā*) there is an “ignorant living being” or a “*satta*.”** That living being has not comprehended the “real nature of this world” or “*yathābhūta ñāṇa*.”

Difference Between a “*Satta*” and “*Puthujjano*”

4. We also need to see the difference between the terms “*satta*” and “*puthujjano*.” The name “*puthujjano*” applies to a **human being** who has not heard and comprehended *yathābhūta ñāṇa*. The term “*satta*” applies to any living being (includes *Devā* and *Brahmā* who have not attained any *magga phala*.)

- I use the term “ignorant person” to differentiate an *Ariya puggala* (Noble Person) who is also a “person,” but has started cultivating *yathābhūta ñāṇa*.
- [WebLink: suttacentral: Assāda Sutta \(SN 22.129\)](#) defines the word “*puthujjano*” as, “an **ignorant person** (“*puthujjano*”) does not truly understand the pleasures, the drawbacks/dangers, and the liberation when it comes to the five aggregates.”
- An *Ariya puggala* overcomes the “*satta*” status at eight levels (*Sotāpanna Anugāmi*, *Sotāpanna*, *Sakadāgāmi Anugāmi*, *Sakadāgāmi*, etc.)
- Also, a *Bodhisatta* is still a “*satta*,” but proceeding towards “*Bodhi*” or the “*Buddhahood*.” We remember that a *Bodhisatta* can be born even in some higher animal species, but not in the other three *apāyā*.
- Note that “*satta*” pronounced “saththa.”) See, “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)” and the second part referred to in there.

Overcoming the “*Satta*” Status With the Comprehension of *Tilakkhaṇa*

5. Using the analyses of the five aggregates and the “five clinging-aggregates,” we can get some insights into Buddha’s explanation of “suffering inherent in this world of 31 realms.” That explanation comes via the understanding of the *Tilakkhaṇa* or *anicca, dukkha, anatta*. We now look at the connection between the five aggregates and *Tilakkhaṇa*.

- The fourth characteristic of *asubha* appears in some *suttā*.
- However, in most *suttā*, only the three characteristics of *anicca, dukkha, anatta* are discussed.
- The essence of those characteristics is that craving for worldly things (*rūpa*) with the perception of a “me” will only perpetuate the rebirth process leading to more suffering. We will discuss that in detail in upcoming posts.

- However, we can get an idea by just looking at the key concepts that we have learned. Let us briefly discuss *anatta* and *anicca*.

Does “*Anatta*” Mean “No-Self”?

6. The representation of any living being with the five aggregates makes it clear that a permanent “soul” or a “*ātma*” cannot exist.

- As we have discussed, none of those five aggregates has any “essence.” They all keep changing, even momentarily. In particular, they all undergo drastic changes when a living being moves from one realm to another. Such transitions have taken place an uncountable times in our deep past. We all have been born in the 26 realms (out of 31 realms, only *Anāgāmi* can be born in the five realms reserved for them.)
- All of us have been born in the highest *nevasaññānāsaññāyatana Brahma* realm as well as in the lowest *niraya* realm.
- If there were an unchanging “core” or “essence” as a soul was there, an *Arahant* would not be able to attain *Parinibbāna*. As we know, there is no trace of an *Arahant* in any of the 31 realms after *Parinibbāna*.
- However, until one reaches the *Arahant* stage, it is also NOT correct to say that a “self” or a “me” does not exist. There is an ever-changing “life-stream” thinking, speaking, and doing things based on the view and perception of a “me” or “self” with a set of ever-changing “*gati*.”
- Starting at the *Sotāpanna Anugāmi* stage, one can begin to “see” that all those actions are based on *Paṭicca Samuppāda*. There is still a “self” with “*gati*” generating “*abhisankhāra*” via “*avijjā*.” But that “*avijjā*” will decrease with higher *magga phala*. “*Sammā Diṭṭhi*” becomes complete, and the perception of a “me” goes away only at the *Arahant* stage.

Does “*Anicca*” Mean “Impermanence”?

7. It is quite common these days to see the Pāli word “*anicca*” translated as “impermanence.” We can see the error in such a translation by looking at a simple *sutta*.

- For example, the “[WebLink: suttacentral: Nandikkhaya Sutta \(SN 22.51\)](#),” among others, state: “*Aniccaññeva, bhikkhave, bhikkhu rūpaṃ aniccanti passati. Sāssa hoti sammādiṭṭhi.*” or “A *bhikkhu who sees rūpa (form) as anicca has seen the anicca nature*. He has *Sammā Diṭṭhi*.”
- Most English translations INCORRECTLY translate that verse as “A *bhikkhu who sees form as impermanent has seen the anicca nature*. He has *Sammā Diṭṭhi*.”
- Any reputable scientist knows that NO MATERIAL OBJECT in this world has permanent existence. See the following Scientific American article: “[WebLink: The Only Thing That Remains Constant Is Change](#).” Does that mean those scientists all have “*Sammā Diṭṭhi*” and have attained *Nibbāna*? Of course not. **Therefore, it must be clear that “*anicca*” CANNOT mean just “impermanence.”**
- We will discuss the real meanings of *anatta* and *anicca* in detail in this series in future posts.

The Need to examine the *Tipiṭaka* Without Biases

8. We need to be able to resolve such issues by using common sense rather than mechanically repeating such incorrect translations as “the truth.” Just because such statements are in “reputable books” or are “the opinions of reputable *bhikkhus*/scholars” does not mean they are compatible with the *Tipiṭaka*. We need to remind ourselves that Devadatta was a *bhikkhu* with *abhiññā* powers. Nagarjuna and Buddhaghosa are considered “scholars” by those who do not even believe in rebirth (and thus have *micchā diṭṭhi*.)

- Their intentions may be good, but one needs to be able to accept errors in one’s thinking when clarified with substantial evidence.

- It is dangerous to teach “wrong Dhamma” which will have corresponding consequences. Ignorance of mundane laws is not an excuse in a court of law. In the same way, ignorance of “the true teachings” is not an excuse, especially when the correct teachings are clear with evidence from the *Tipiṭaka*.
- “Impermanence” is only a small part of the broad meaning of *anicca*. A single English word CANNOT convey the meaning of the word “*anicca*.” One needs to understand the meaning of the Pāli word and use that word.

Why Do Living Beings Crave Sensory Pleasures?

9. To “enjoy” sensory pleasures, the following two conditions must be met.

- There must be a “me” or a “self” to “enjoy any pleasure.”
- There must be contacts with five types of external *rūpa* via the five physical senses. They are *rūpa rūpa* or “*vaṇṇa rūpa*” (material objects), *sadda rūpa* (sounds), *gandha rūpa* (odors), *rasa rūpa* (tastes), and *phoṭṭhabba* (body touches.) **Furthermore, those *rūpa* must be stable to provide long-lasting pleasures.**

So, the average human makes the very best effort (and undergoes suffering) in seeking out such pleasures.

- **Those struggles only lead to more suffering, since both of the above assumptions are wrong in ultimate reality.**

Both Those Assumptions Are Wrong Per Buddha

10. The Buddha pointed out the following regarding those two features.

- **There is no “me” or an “unchanging self” in ultimate reality. Any living being has a limited lifetime** and subject to unexpected changes during its existence. There is no “core” or “substance” to any existence (like a “soul” or a “*ātma*.”) A given life-stream can be a *Brahma*, a *Deva*, or a human in some existences and an animal, a hungry ghost, or a “hell being” in other existences. Where is the “core”?
- **Any type of external *rūpa* in this world also has a limited lifetime.** It will also undergo unexpected changes during its existence. Thus, all those material “things” that we acquire with great effort do not last long. Furthermore, they become a burden since one needs to continually struggle to maintain them in good condition (think of houses, cars, one’s own physical body, etc.)

Therefore, both requirements for perceived happiness (an “unchanging self” and “stable external *rūpa*”) are illusory.

- **That is one way to state the “previously-unheard Dhamma” (“*pubbe ananussutesu dhammesu*”) that the Buddha taught.**

“Self” and “External *Rūpa*” Have a Common Name – *Saṅkhata*

11. *Saṅkhata* is a key Pāli word. It comes from “*san*” + “*kata*.” As with many critically important Pāli words, the root “*san*” is there. A *saṅkhata* is prepared via “*san*” or our tendency to “accumulate” things that only have a transient existence. **A living being and what it enjoys are both *saṅkhata*.**

- Both arise (the Pāli word for “arise” is “*samudaya*”) due to our fruitless actions based on those **two wrong views about nature per #9 and #10 above**. The key Pāli word “*samudaya*” comes from “*san*” + “*udaya*” or “arising due to “*san*.” You may want to refresh memory with [“What is “San”? Meaning of Sansāra \(or Samsāra\)”](#) and [“List of “San” Words and Other Pāli Roots.”](#)
- Both types of *saṅkhata* arise (*samudaya*) via the universal process of *Paṭicca Samuppāda*, which starts with “*avijjā paccayā saṅkhāra*.”
- As we have discussed in many posts, the root cause of all suffering is *abhi(saṅkhāra)* that arise in our minds due to *avijjā*. **Therefore, one way to explain the origin of suffering is ignorance (*avijjā*) of**

real nature or *Tilakkhaṇa*. That is the connection between the five aggregates and *Tilakkhaṇa* (and suffering.)

A Buddha Does Not Speculate on Anything

12. A *Sammasambuddha*, like Buddha Gotama, does not teach anything that he had not experienced/verified firsthand.

- Several *suttā* in the *Tipiṭaka* discuss that. See, for example, the [WebLink: suttacentral: Vīmamsaka Sutta \(MN 47\)](#).
- There are many *suttā* in the *Tipiṭaka* that describe visits by the Buddha and some of his disciples to *Brahma* and *Deva* realms. I have discussed one of those, the “[WebLink: suttacentral: Brahmanimantanika Sutta \(MN 49\)](#),” in the post, “[Anidassana Viññāna – What It Really Means](#).”
- There are many aspects in the teachings of the Buddha that are not discernible to an average human (*puṭhujjano*). Many of these phenomena can be verified by those who make progress on the path. They are also consistent with new findings by modern science. I have discussed some of them in “[Mystical Phenomena in Buddhism?](#)”
- Many people do not see the uniqueness of a Buddha. For them, he is just another philosopher. That assumption is wrong. A Buddha does not speculate on anything. But of course, each person needs to verify that. That is why I make an effort at [puredhamma.net](#) to show the self-consistency within the *Tipiṭaka* and with many new findings in science.

In upcoming posts, we will continue the discussion on the connection between the five aggregates and *Tilakkhaṇa* (and suffering.)

3.6.7.2 **Icca, Nicca, Anicca – Important Connections**

June 2, 2020

Icca, Nicca, Anicca

1. We will discuss the critical relationships among *icca*, *nicca*, and *anicca*. That will help us understand the true meaning of *anicca*.

- The pronunciations of those in that order:
[WebLink: mp3: Icca, Nicca, and Anicca](#)
- It is important to note that the Pāli words in the *Tipiṭaka* are NOT written the way they are pronounced. See, “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)” and “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 2](#).”
- Very briefly, the meanings are as follows. ***Icca means desire***. If we believe that it is possible to fulfill that desire and totally content, that is the perception of *nicca*. The opposite of *nicca* is *anicca*.
- Buddha taught us that our world is of *anicca* nature. That means we will never be content with “any existence in this world.” We may be able to fulfill some expectations in this life, but all that will have to be given up at death. Then we start all-over in new birth.
- We note that the word “*icca*” plays a key role in *Paṭicca Samuppāda*. The word “*Paṭicca*” comes from “*paṭi*” + “*icca*.” Future existences in the rebirths process have origins in “attaching to worldly pleasures with desire (*icca*).” See, “[Paṭicca Samuppāda – ‘Paṭi+ichcha’ + ‘Sama+uppāda’](#).”

Icca and Anicca Sometimes Written as Iccha and Aniccha

2. The word “*iccha*” with the emphasis on the last syllable indicates “strong *icca*” or “strong desire.” In the same way, “*aniccha*” with the emphasis on the last syllable puts emphasis on the “*anicca* nature.”

- In the Sinhala language, the words *icca*, *anicca*, and *iccha*, *aniccha* are written as ඉච්ච, අනිච්ච, and ඉච්ච, අනිච්ච.
- In the *Tiṭṭaka*, mostly *iccha*, *nicca*, *anicca* appear. **Note that *iccha* is normally used in Pāli as “*icchā*.”** Thus, the “strong version” is used only with *iccha*. But there are a few exceptions. We saw one such exception in “*icca*” in #1; another for “*aniccha*” in #14 below.
- The five words *icca*, *anicca*, *iccha*, *icchā*, and *aniccha* are pronounced:

[WebLink: mp3: Icca, Anicca, Iccha, Iccā, Aniccha](#)

Iccā and *Taṇhā* Closely Related

3. The “[WebLink: suttacentral: Kalahavivādasuttaniddesa](#)” of the *mahāniddesa* of the *Tiṭṭaka* states, “*Iccā vuccati taṇhā*” (see section SC88) or “*Iccā* means *taṇhā*.” That is because *icchā* leads to *taṇhā*.

- When we attach (*taṇhā*) to something due to our liking for it (*icchā*), we tend to keep it close in our minds (*upādāna*.) *Paṭicca Samuppāda* describes how that leads to future suffering. See, “[Iccā \(Cravings\) Lead to Upādāna and to Eventual Suffering.](#)”
- The use of many Pāli terms could be confusing to some. It may be helpful to print the relevant posts mentioned and refer to them as needed.

What Do We Desires (*Iccā*)?

4. Our desires belong to two categories. First, we would like to have a healthy and robust body (stay young forever!.) We would also like to have anything that we own or related to us to be similarly long-lasting and not subject to unexpected calamities.

- We have that perception that such desires (*icchā*) for “stability of long-lasting happiness” can be achieved. **That perception is *nicca*.**
- With that perception of a “*nicca* nature,” we work hard to acquire “things” that we perceive to provide sensory pleasures.
- While doing our best to achieve such pleasures, knowingly or unknowingly, we engage in activities that lead to future births filled with suffering.

Iccā – A Root Cause of Suffering

5. The Buddha’s described the Noble Truth on Suffering in his first discourse, “[WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\).](#)”

- The complete verse in that *sutta* is as follows. “*Idaṃ kho pana, bhikkhave, dukkhaṃ ariya saccaṃ—jātipi dukkhā, jarāpi dukkhā, byādhipi dukkho, maraṇampi dukkhaṃ, appiyehi sampayogo dukkho, piyehi vippayogo dukkho, yampicchaṃ na labhati tampi dukkhaṃ—saṃkhittena pañcupādānakkhandhā dukkhā.*”
- I have discussed the description in plain bold in the post, “[Essence of Buddhism – In the First Sutta.](#)”
- We discussed the verse, “*Samkhittena pañcupādānakkhandhā dukkhā*” in recent posts in “[The Five Aggregates \(Pañcakkhandha\).](#)” As explained there, the Buddha succinctly attributed future suffering to “*upādāna*” for the five aggregates (*pañcakkhandhā*.) We learned that “*upādāna*” means “keeping close in one’s mind.”
- Here, we will discuss how that “*upādāna*” relates to “*icchā*”, simply translated as “desire.” Then we will discuss the connection to *anicca*, which is often INCORRECTLY translated as “impermanence.” That connection is in, “*appiyehi sampayogo dukkho, piyehi vippayogo dukkho, yampicchaṃ na labhati tampi dukkhaṃ.*”

- Let us discuss that verse in two steps.

Appiyehi sampayogo dukkho, piyehi vippayogo dukkho

6. That means: “having to associate with things that one does not like is suffering, and, having to separate from those things one likes is suffering.”

- One WOULD LIKE to keep the body of a young person (say, 15 to 25 years of age), without getting old or sick, and never die. But we will NEVER get it.
- Even with human birth, **we have to suffer when we get old, when getting sick, and finally when dying.** There is no way to dissociate from those things that we do not like.
- **We have no choice but to associate with those three things that we do not like highlighted above.**
- Worst of all, **we will have rebirths in realms we do not like. That will happen until we comprehend anicca nature.**

Yampicchaṃ na labhati tampi dukkhaṃ – Most Important Verse

7. “*Yampiccam nalabhati tampi dukkhaṃ*” captures the essence of *anicca* nature how it leads to suffering. It provides the key to understanding the Buddha’s message and led to the attaining the *Sotāpanna* stage by the five ascetics.

- “*Yampicchaṃ na labhati tampi dukkhaṃ*” is a shortened version of the verse is “*Yam pi icchāṃ na labhati tam pi dukkhaṃ.*”
- “*Yam pi icchāṃ*” means “whatever is **liked or craved** for.” “*Na labhati*” means “not getting.” “*tam pi dukkhaṃ*” means “that leads to suffering.”
- Therefore, that verse simply says: “**If one does not get what one craves or likes, that leads to suffering.**”

8. That is a more general statement and applies in any situation. What we discussed in #6 above is summarized in the short verse, “*yampicchaṃ na labhati tampi dukkhaṃ.*”

- We can see that in our daily lives. We like to hang out with people we love, and it is a stress to be with people that we do not like.
- **The more one craves something, and the more suffering one will endure at the end.** That is because we tend to do immoral deeds to “get what we crave.” **But kammic energies that we generate in such wicked deeds lead to rebirths that we do not like.**
- **Thus, we end up with two types of suffering.** Our expectations are not fulfilled (whatever happiness gained is temporary.) Furthermore, we end up getting unfortunate rebirths.

Icchā Keeps One Bound to “This World”

9. There are many *suttā* in the *Tipiṭaka* that discuss *icchā*. The “[WebLink: suttacentral: Icchā Sutta \(SN 1.69\)](#)” summarizes the importance of *icchā*. One time, a *deva* came to the Buddha and asked:

| | |
|---------------------------------------|--------------------------------------|
| <i>“Nassau bajjhatī loko,</i> | “By what is the world bound? |
| <i>kissa vinayāya muccati;</i> | By the removal of what one is freed? |
| <i>Kissassu vippahānena,</i> | What is it that one must abandon |
| <i>sabbaṃ chindati bandhanan” ti.</i> | To cut off all bondage?” |

The Buddha replied:

- The Pāli words for permanence and impermanence are *dhuva* and *addhuva*. For example, the “[WebLink: suttacentral: Vepullapabbata Sutta \(SN 15.20\)](#)” says, “*Evaṃ aniccā, bhikkhave, saṅkhārā; evaṃ addhuvā, bhikkhave, saṅkhārā; evaṃ anassāsikā, bhikkhave, saṅkhārā*” meaning, “*saṅkhārā* are *anicca* and **impermanent**, they should not be taken in (“na”+ “assāsikā.”) By the way, this also shows that “*assāsa*” does NOT mean “breathing in.” For details, see, “[Is Ānāpānasati Breath Meditation?](#)”

Gimānanda Sutta – Anicca Nature of Saṅkhāra

13. In the “[WebLink: suttacentral: Girimānanda Sutta \(AN 10.60\)](#)” the Buddha described the perception of *anicca* nature to Ven. Ānanda as follows. ” *Katamā ca Ānanda, anicca saññā? Idha Ānanda, bhikkhu araṇṇagato vā rukkhamūlagato vā suñṇāgāragato vā iti paṭisaṅcikkhati: ‘rūpaṃ aniccaṃ, vedanā aniccā, saññā aniccā, saṅkhārā aniccā, viññāṇaṃ aniccaṃ’ti. Iti imesu pañcasu upādānakkhandhesu aniccānupassī viharati. Ayaṃ vuccatānanda, aniccasaññā.*

- The parts highlighted in bold say that all five entities “*rūpa, vedanā, saññā, saṅkhārā, viññāṇa* are all *aniccā*” and that “**one lives contemplating the anicca nature of the ‘five clinging-aggregates’ (pañca upādānakkhandha.)**”
- The first part is the same that we discussed above. The second part is even more clear. As we know, *pañca upādānakkhandha* is all mental. See, “[Pañca Upādānakkhandhā – Introduction.](#)”
- There is nothing “permanent” there anyway. What the Buddha meant was to contemplate the “fruitlessness of clinging to one’s memories or to future expectations.”

14. In a subsequent verse in the *sutta*, the Buddha clarifies that “unfruitfulness” in vivid detail: “*Katamā ca Ānanda, sabbasaṅkhāresu anicchā saññā? Idhānanda, bhikkhu sabba saṅkhāresu aṭṭiyati harāyati jigucchati. Ayaṃ vuccati ca Ānanda, sabba saṅkhāresu anicchā saññā.*

- The first highlighted part in bold says, “all *saṅkhāra* make one tired at the end, just like a dog does not get any nutrition by chewing on a bone but only gets tired (*aṭṭiyati.*) One should be ashamed (*harāyati*) of engaging in such fruitless endeavors. One should reject them like feces and urine (*jigucchati.*) Note that the word “*iccha*” is in “*jigucchati*” which comes from “*ji*” + “*gu*” + “*iccha*” or “liking urine and feces.”
- I have discussed that verse in detail in “[Anicca – The Incessant Distress \(“Pīlana”\).](#)” Other meanings of *anicca* are discussed at, “[Anicca, Dukkha, Anatta.](#)”
- Therefore, the word *anicca* has a much deeper and expansive meaning than just “impermanence.” The cause of *anicca* is related to impermanence, but *anicca* means a perception that needs to be cultivated. The above verse provides further aspects associated with the key idea of “inability to maintain anything to one’s satisfaction.”
- Impermanence is not directly connected to any of the three meanings of *anicca* in that verse.
- At the end of the verse, we see the word *anicchā* used to emphasize *anicca* nature.

Grasping of Anicca Removes Micchā Diṭṭhi

15. Grasping of *anicca* characteristic of nature requires getting rid of ALL of one’s wrong views.

That is clearly stated in the “[WebLink: suttacentral: Micchaditthipahana Sutta \(SN 35.165\)](#)”: “*Cakkhum kho, bhikkhu, aniccato jānato passato micchā diṭṭhi pahīyati. Rūpe aniccato jānato passato micchā diṭṭhi pahīyati. Cakkhuvīññāṇaṃ aniccato jānato passato micchā diṭṭhi pahīyati. Cakkhusamphassaṃ aniccato jānato passato micchā diṭṭhi pahīyati ... pe ... yampidaṃ manosamphassapaccayā uppajjati vedayitaṃ sukhaṃ vā dukkhaṃ vā adukkhamasukhaṃ vā tampi aniccato jānato passato micchādiṭṭhi pahīyati. Evaṃ kho, bhikkhu, jānato evaṃ passato micchā diṭṭhi pahīyati*”ti.

We can make two critical deductions from this verse.

- First is that whereas only five entities are listed in # 12, this verse enumerates many more related entities, and they all have the *anicca* nature. **Anything and everything in this world have the *anicca* nature.**

16. Then the second part of the verse says the following. **If one comprehends the *anicca* nature of all those entities, then one has removed *micchā diṭṭhi*.** The first level of *micchā diṭṭhi* to be removed is the ten types of *micchā diṭṭhi*.

- Ten types of *micchā diṭṭhi* include not believing in the rebirth process. See, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage.](#)” Therefore, **IF *anicca* means impermanence, THEN** one would have removed all wrong views IF one has understood that everything in this world is impermanent.
- As we discussed in the previous post, any scientist knows that nothing in this world is permanent. See, “[Five Aggregates and Tilakkhana – Introduction.](#)”
- By that definition of *anicca*, those scientists SHOULD NOT have any of the ten types of *micchā diṭṭhi*. **That is a contradiction since most scientists do not believe in rebirth.**

Summary

17. Future suffering cannot be stopped until one's cravings for worldly things (*icchā, taṇhā, upādāna*) are lost.

- Those cravings cannot be removed from one's mind until one realizes the futility and danger (future suffering) associated with such cravings.
- Those cravings may be TEMPORARILY suppressed by engaging in the mundane “breath meditation.”
- However, via understanding the true *anicca* nature, one can realize the futility and danger (future suffering) associated with such cravings. A deeper analysis at, “[Icchā \(Cravings\) Lead to Upādāna and to Eventual Suffering.](#)”
- That is why comprehending the *anicca* nature is a REQUIREMENT for attaining *Nibbāna*. Furthermore, *anicca* is closely related to *dukkha* and *anatta*, as we will see in future posts.
- As always, anyone is welcome to correct me (with evidence from the *Tipiṭaka*.)

3.6.7.3 “Me” and “Mine” – The Root Cause of Suffering

June 9, 2020

Brief Summary of *Pañcakkhandhā*

1. The five aggregates (*pañcakkhandhā*) is unique to each person. Yours is different from anyone else's.
 - *Pañcakkhandhā* includes one's past experiences with *rūpa* in this world and anticipated future experiences with *rūpa* (*rūpakhandhā*.)
 - Those, of course, include mental qualities (*vedanā, saññā, saṅkhāra, viññāṇa*.) They are in the four “mental aggregates” or *vedanākkhandha, saññākkhandha, saṅkhārakkhandha, viññāṇakkhandha*.
 - Thus all five components of *pañcakkhandhā* are, in effect, our past experiences and future expectations. They are unique to each person.

Brief Summary of *Pañcupādānakkhandhā*

2. We have *upādāna* for only a tiny fraction of *pañcakkhandhā*. That part is *pañcupādānakkhandhā*.
 - *Pañcupādānakkhandhā* are based on past experiences that we liked. For example, if X saw an attractive person last week, X would remember that person and would have formed a certain set of

feelings, perceptions, and *saṅkhāra* about that person. Those then lead to possible expectations (asking for a date, for example) and that is part of *viññāṇa upādānakkhandha*.

- It is critical to realize that all these are “mental.” They are BASED ON the external world, but they are one’s own mental experiences/expectations.
- If another person (Y) saw the same person at the same time, Y’s mental impressions would be different from X’s. Furthermore, Y may not even remember that person. If so, that event is not even a part of Y’s *upādānakkhandha*.
- *Pañcupādānakkhandhā* arise based on the perception of “me” and “mine.”
- It is a good idea to read the posts in “[The Five Aggregates \(Pañcakkhandha\)](#)” until the above facts are understood.

Major Components of the Five “Clinging” Aggregates (*Pañcupādānakkhandhā*)

3. First, we need to see which parts of the five aggregates that we “cling to” (or “keep close” or *upādāna*.) Then we will be able to see how that *upādāna* for the five aggregates CAN LEAD TO suffering.

- Something that we experience during every waking moment is our body and mind. Therefore, the physical body and all mental entities that arise contribute to the feeling of “me” or “mine.”
- Then there are parents, a spouse, children. They are precious parts of “me.” Then there are relatives, friends, etc.
- Of course, one may own a house, cars, other real estate, businesses, etc.
- Then the list expands to include the neighborhood, city, country, and different things in the world.
- Each person may have his/her order a bit differently, but you get the idea.

Major Components of *Pañcupādānakkhandhā* Are Centered Around “Me” or “Mine”

4. Think about what you are mostly thinking, speaking, and working on. They all are related to what we mentioned in #3 above. They all involve “me” and “mine.”

- Of course, anger towards someone has origins in the view/perception of that person. He/she must have done something opposing “me” or something related to “mine.”
- An average human spends a significant portion of time watching useless movies, playing video games, getting drunk, etc. One would say those things are done to “keep me entertained.” However, in a deeper sense, it is not that much different from a fish biting into a tasty bait on a hook. One is unable to “see” the bad consequences of such apparently “harmless” actions.
- That last one is a more profound point that cannot be seen until one starts comprehending *Tilakkhaṇa*.
- That way of “seeing” (*ditṭhi*) and perception (*saññā*) arises because one is unaware of the true nature of this world or *yathābhūta ñāṇa*. We can express that in several different ways. Being unaware of the Four Noble Truths, not comprehending *Tilakkhaṇa*, not comprehending *Paṭicca Samuppāda*, etc.

Yathābhūta Ñāṇa – Understanding of the Reality About the World

5. All our actions based on greed, anger, and ignorance are based on not having “*yathābhūta ñāṇa*.” In other terms, it means not knowing how and why “good and bad things” happen to us.

- “Good and bad things” happen due to corresponding actions (*kamma*.) And *kammā* are done based on *saṅkhāra* (the way we think.) Strong *kamma* (that can bring good and bad outcomes and also future rebirth) happen due to (*abhi*)*saṅkhāra*.
- *Paṭicca Samuppāda* describes the principle of cause-and-effect in Buddha Dhamma.
- However, the results of most *kamma* appear only later, sometimes in future lives. That is why it is hard for many to believe in *kamma/kamma vipāka*. Also, **that is why it is not possible to make progress on the path until one can see the truth of the rebirth process.**
- Until that true nature (*yathābhūta nāṇa*) is comprehended, **there is a “satta” or a “living being” generating *saṅkhāra* based on *avijjā*.**
- Note that “satta” is pronounced “saththa.”

The Definition of a “Living Being” or “Satta”

6. The Buddha explained what is meant by a “satta” or a “living being” to Rādhā in the “[WebLink: suttacentral: Satta Sutta \(SN 23.2\)](#).” “*Rūpe kho, Rādhā, yo chando yo rāgo yā nandī yā taṇhā, tatra satto, tatra visatto, tasmā sattoti vuccati. Vedanāya ... saññāya ... saṅkhāresu ... viññāṇe yo chando yo rāgo yā nandī yā taṇhā, tatra satto, tatra visatto, tasmā sattoti vuccati*”

Translated (just the meaning): “Rādhā, when there is desire (*chanda*), *rāga*, and a perception of high value (*nandī*) of material form (*rūpa*), there is clinging (*satto*), strong clinging (*visatto*) for form, and **then a living-being (satto) is spoken of.** Similarly, when there is desire (*chanda*), *rāga*, and a perception of high value (*nandī*) of *vedanā ... saññā ... saṅkhāra ... viññāṇa*, then a living-being is spoken of.”

- Other translations at, “[WebLink: suttacentral: Sentient Beings \(SN 23.2\)](#).”
- Note that the Pāli word “satta” means “clinging” or “attach.” A strong version of clinging is “visatta.”
- Therefore, any living-being (whether a *Deva*, *Brahma*, or a human) is a “satta” as long as the futility of craving for sense pleasures is not understood. A “satta” has the perception of “me” and “mine.”

7. **In other words, as long as there is *upādāna* for *pañcakkhandhā* (i.e., as long as there is *pañcupādānakkhandhā*) there is a “living being” or a “satta.”**

- Also, note that one transcends the “satta” status when one becomes an *Ariya puggala*.” A *puggala* has overcome the “satta” status at eight levels (*Sotāpanna Anugāmi*, *Sotāpanna*, *Sakadāgāmi Anugāmi*, *Sakadāgāmi*, etc.)
- Also, a *Bodhisatta* is still a “satta,” but proceeding towards “*Bodhi*” or the “*Buddhahood*.”
- Note that “satta” is pronounced “saththa.”) See, “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1](#)” and the second part referred to in there.
- Now, let us see how what we discussed above ties up with *Paṭicca Samuppāda*.

Paṭicca Samuppāda Process Only Depends on *Avijjā*

8. *Paṭicca Samuppāda* process does not care WHO is doing (*abhi*) *saṅkhāra*. The results are determined by WHAT KIND of *saṅkhāra* are involved. **That *saṅkhāra* generation is associated with *pañcupādānakkhandhā*** or ones’ cravings/desires/expectations (related to *anusaya*, *āsava*, *gati*, etc.) Results are according to actions. Doing a particular type of action (*kamma* via *saṅkhāra*) will lead to the fruits (*kamma vipāka*.)

- There is no need to invoke a “me” or a “self” in *Paṭicca Samuppāda*. But, of course, such (*abhi*) *saṅkhāra* are generated BECAUSE there is a sense of “me” or “self.” **The critical step is to realize the fruitlessness of acting with a sense of “me.”**

- Another way to say that is, actions are based on one's *gati* (habits/character.) See, "[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Āsavā\)](#)."
- Instead, these days, people spend countless hours debating whether there is a "self" or not. **That time would be better spent if one tried to understand WHY acting with the view and perception of a "me" will lead to suffering.**
- There is a perception of a "me" and "mine" until one's defiled *gati* are removed.

9. The ultimate truth is that there is no "self." **That can be seen easily from the fact that an *Arahant* is not reborn after death.** If there was an "unchanging self," that *Arahant* would still have to exist in one of the 31 realms after death.

- However, until one FULLY comprehends that fact (at the *Arahant* stage,) one does not FULLY realize that there is no "self" involved in this whole process. Until then there is the perception of a "me" and "mine."
- **Therefore, there will be a "self" generating (*abhi*)*saṅkhāra* and making conditions for future suffering until the *Arahant* stage.**
- Another way to say that is there will be a *pañcupādānakkhandhā* associated with any living-being (*satta*.) An *Arahant* will have *pañcakkhandhā* until death but would have no *upādāna* left for it. Thus, there is no *pañcupādānakkhandhā* for a living *Arahant*.

***Saṅkhāra* Lead to *Pañca Upādāna Khandhā* (*Pañcupādānakkhandhā*)**

10. There is nothing wrong with recalling past events. The problem arises when we attach to them and start re-creating those events in our minds to generate *abhisāṅkhāra*.

- *Kammā* (which lead to *kamma vipāka*) generated in three ways: *mano kamma*, *vacī kamma*, and *kāya kamma*. **They are done via *mano saṅkhāra*, *vacī saṅkhāra*, and *kāya saṅkhāra*.** See, "[Saṅkhāra – What It Really Means](#)."
- *Mano kamma* (our spontaneous thoughts) arise automatically according to our *gati*.
- *Vacī kamma* ("talking to ourselves" and speech) arise due to conscious thoughts (done with *vitakka/vicāra*.)
- *Kāya kamma* also arise due to conscious thoughts and have the highest *javana* power because they involve moving bodily actions; see, "[Javana of a Citta – The Root of Mental Power](#)."
- Many people think "talking to ourselves," or "daydreaming" is not bad because we don't physically do anything. Even though they are less potent than *kāya kamma*, *vacī kamma* can add up and lead to strong *kamma vipāka*, as we discuss next.

"Thinking to Oneself" Is *Vacī Saṅkhāra*

11. When we "talk to ourselves" (i.e., consciously think about something,) we mostly recall a significant past event. Then we analyze that event with *vitakka/vicāra* and either "re-live" that experience or "make future plans" based on that previous event. *Vitakka/vicāra* means analyzing it in detail and incorporating our desires. That leads to generating more and more *vacī saṅkhāra* on that event; see, "[Correct Meaning of Vacī Saṅkhāra](#)." Of course, if we "really get into it," we may do *kāya saṅkhāra* too.

- Also, one could make up a "future event" that one would LIKE TO experience and that also becomes a part of *pañcakkhandha* (this is the "*anāgata*" or "future" component of the 11 components of any of the five aggregates).
- All the above involve "*pañcupādānakkhandha*" (*pañca upādāna khandha*). In other words, one is now "pulling that event back, close to one's mind" and consciously generating more *vacī* (and possibly *kāya*) *saṅkhāra*.

- That is why “*upādāna*” is such a critical step in a *Paṭicca Samuppāda* cycle. The two stages of “*taṇhā paccayā upādāna*” and “*upādāna paccayā bhava*” really involves many, many *Paṭicca Samuppāda* cycles running inside them. See, “[Tanhā Paccayā Upādāna – Critical Step in Paṭicca Samuppāda.](#)”

Status of an *Arahant* – Wrong Point to Start

12. Many people are afraid of *Nibbāna*, thinking that it leads to the “extinguishment” of oneself. See, “[Yamaka Sutta \(SN 22.85\) – Arahant hood Is Not Annihilation but End of Suffering.](#)”

- But the deeper point is that we go through so much suffering in the rebirth process BECAUSE of our wrong view and perception of a “me” and “mine”. Inevitable temptations lead to highly-immoral actions (*pāpa kamma*) that will trap us in the four lower realms (*apāyā*) with unimaginable suffering.
- Such *pāpa kamma* are stronger versions of *akusala kamma*. See, “[Kusala and Akusala Kamma, Puñña and Pāpa Kamma.](#)”
- The first step is to see “*anicca* nature.” Accumulating things perceived to be “valuables” makes no sense in two ways. We have to struggle to maintain those and will have to abandon them at least when we die. See, “[Icca, Nicca, Anicca – Important Connections.](#)”
- The second point is that if we do immoral deeds to get them, those deeds will lead to bad rebirths and suffering.
- We can see only one part of the *apāyā*, the animal realm. Even then we mostly see our own pets, and not the unimaginable suffering that animals (in forests, jungles, and especially in the oceans) go through. There are no “old animals” there. Any old animal is eaten alive as soon as it becomes old and a bit slow.

Buddha Did Not Teach Anything That He Did Not Verify by Himself

13. Some of the above discussion may not be clear to everyone. It is a “previously unheard worldview” that only a Buddha can discover. However, learning Dhamma and living a moral life will gradually make those things clear.

- There are several *suttā* where the Buddha stated that he did not declare attaining the *Buddhahood* until he verified for himself the “real nature” of this world. For example, he verified the existence of the 31 realms and how a given being dies in one realm, and the rebirth takes place in another. Furthermore, he saw how that happens via the natural *Paṭicca Samuppāda* process.
- As we learn Dhamma, more and more will become clear. At some point, one would have developed “unbreakable faith” in Buddha Dhamma. That is when one has “*saddhā*.” That will become solidified when one starts understanding that all suffering has roots in the perception of a “me” and “mine.”
- Also see, “[Mystical Phenomena in Buddhism?](#)”

3.6.7.4 Difference Between “Me and Mine” and Sakkāya Diṭṭhi

June 16, 2020

Getting Rid of “Me and Mine” Is a Step-by-Step Process

1. In the previous post, we discussed that the perception of “me” and “mine” is the root cause of suffering. See, “[Me” and “Mine” – The Root Cause of Suffering.](#)”

- We discussed that one would not be able to remove that perception of “me” until attaining the *Arahant hood*.
- Therefore, that should not be the focus at the beginning of one’s practice.
- **First**, one needs to get rid of the **ten types of wrong views (*micchā diṭṭhi*.)** Until one comprehends the truth of *kamma/vipāka*, the existence of the rebirth process, the creation of a “mental body” (a

gandhabba in the case of a human *bhava*) at the *cuti-paṭisandhi* moment, etc. one cannot get on the path to *Nibbāna*. See, “[Micchā Ditthi, Gandhabba, and Sotāpanna Stage.](#)”

- The second step is to remove *sakkāya ditthi*. We will discuss that in this post.

Ditthi, Saññā, and Citta Vipallāsa – Three Obstacles in Getting Rid of Any Bad Habit

2. *Vipallāsa* means “distortions” in mind. If we do not have a clear understanding of the relevant concepts, we may take unwise actions based on our wrong views. Let us take an example to clarify.

- Consider an alcoholic, a person addicted to drinking. The addiction comes from the perception that it is good to have a drink to forget about any problems one may have, or just to enjoy that “drunken state of mind.”
- Urged on by a good friend, that person starts to learn about the consequences of drinking. It can affect one’s health adversely. Furthermore, it can make one do immoral deeds while drunk, and that can bring bad rebirth. Now he fully understands that he had wrong views about drinking, i.e., he had *ditthi vipallāsa* about drinking. Now *ditthi vipallāsa* about drinking are absent in his mind.
- Yet, he finds that the temptation to “have a drink” is still there. While he would not get drunk as before, the desire to “have a drink” can popup once-in-a-while. For example, if a friend is having a drink, he may join in. Thus, *saññā vipallāsa* is still there. To get rid of that, he needs to keep contemplating the adverse consequences of drinking and also keep resisting the urge to have another drink.

3. Then, if that person keeps up with that practice, he will lose that *saññā vipallāsa* too. But a trace of the desire may be left as *citta vipallāsa*. Under extreme temptation, he may think about “having a drink.” That is *citta vipallāsa*. Now, another effect of “continued practice” will take care of that too in a bit different way.

- With time, his body would not even tolerate a single drink. Instead of getting satisfaction from that drink, he might get a headache. That is when he would voluntarily give up even a single drink.
- That is because our bodily functions can be affected by the “state of mind”. That starts happening from the very beginning, even while one is trying to comprehend *Tilakkhaṇa* (*anicca* nature.) But the effects become clear after one has made significant progress.
- That is a simple explanation. More details at “[Vipallāsa \(Ditthi, Saññā, Citta\) Affect Saikhāra.](#)”

Only *Ditthi Vipallāsa* Removed at the *Sotāpanna* Stage

4. At the *Sotāpanna* stage, one would only “see with wisdom” that it is unfruitful to consider anything as “me” or “mine”. As we saw in the previous post mentioned above, it is one’s body that one considers being “one’s own.”

- The Buddha dissected what we consider to be “me” into five parts. One physical and four mental entities. That comes from our perception of “me” as “my body” and “my mind.” Mind phenomena separate into four parts: we feel things happening (*vedanā*) and recognize them (*saññā*.) Based on that, we think about how to respond (*sañkhāra*) and act with certain expectations (*viññāṇa*.)
- We have discussed those five entities or aggregates in detail. See, “[The Five Aggregates \(Pañcakkhandha\).](#)”
- Our craving for those five aggregates (*pañca khandhā*) is *pañcupādānakkhandhā*.
- We crave those because we have the wrong view that those five aggregates are fruitful and provide long-lasting happiness. That wrong view is *sakkāya ditthi*.

Sakkāya Means Pañcupādānakkhandhā

5. As stated in the [WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#), *sakkāya* means *pañcupādānakkhandhā* (or *pañca upādāna khandhā*.)

- We can see that by looking at the meaning of *sakkāya*, which comes from “*sath*” + “*kāya*.” Here “*sath*” means “good” and “*kāya*” means “collection.”
- In the five aggregates, we have five aggregates or ‘collections’ or ‘piles.’ For example, as we remember, the *rūpa* aggregate includes one’s internal *rūpa* and external *rūpa*. Those include the present *rūpa*, past *rūpa*, and our visualizations of “future *rūpa*.”
- Out of them, the most important is our own body or “internal *rūpa*” (its present status, our memory of its past, and our expectations of its future status.) Invariably, those “internal *rūpa*” are in the *rūpa upādāna khandhā*.
- That *rūpa upādāna khandhā* will also include external *rūpa* that we like or crave for. That may include one’s family, friends, possessions, etc.
- Then the other four aggregates would include our mental attributes involving *rūpa*.
- Since we assume all five *upādāna khandhā* to be **good for us or fruitful**, i.e., they are *sath kāya* (which rhymes as *sakkāya*.)
- More details at “[Tanhā Paccayā Upādāna – Critical Step in Paticca Samuppāda.](#)”

***Sakkāya Diṭṭhi* Means the View That *Pañcupādānakkhandhā* Are Fruitful**

6. Now we have a good idea of what is meant by *sakkāya diṭṭhi*. It just means we like/crave those parts of the five aggregates because we have the **view** that they are fruitful and will bring long-lasting happiness.

- We become happy when all those that we crave provide us pleasure. That means they stay exactly as we want them to be.
- If things do not proceed the way we want, then we worry and suffer.
- The *Sakkāyadiṭṭhi Sutta* (SN 22.155) summarizes what we discussed in #5 and #6.

7. “[WebLink: suttacentral: Sakkāyadiṭṭhi Sutta \(SN 22.155\)](#)” states, “*rūpe kho, bhikkhave, sati, rūpaṃ upādāya, rūpaṃ abhinivissa sakkāyadiṭṭhi uppajjati. Vedanāya sati ... saññāya sati ... saṅkhāresu sati ... viññāṇe sati, viññāṇaṃ upādāya, viññāṇaṃ abhinivissa sakkāya diṭṭhi uppajjati.*”

Translated: “When one is attached to various *rūpa* (especially one’s body), places a high value on them, ***sakkāya diṭṭhi* (identity view) arises**. When one attaches to *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* associated with such *rūpa*, and places a high value on them, the **identity view arises.**”

- In other words, one has *sakkāya diṭṭhi* if one sees this world as fruitful and can lead to long-lasting happiness.
- With that wrong view, one is under the impression that it is possible to have total control of one’s future by making sure to accumulate “enough stuff” thereby ensuring long-lasting happiness.
- That perception of “having full control” is also expressed by “*atta*.” Note that the mundane meaning of “a person” is usually expressed by “*attā*” with a “long a.”
- Therefore, there are two meanings of the Pāli word “*atta*.” The ultimate or absolute (*paramattha*) meaning of “having full control” is expressed by “*atta*.” The ordinary or relative meaning (*vohāra*) is “*attā*” with a “long a” that refers to a “person.”
- Let us discuss this further.

***Atta* Can Have a Mundane (*vohāra*) or an Absolute (*Paramattha*) Meaning**

8. Even though a “person” does not exist in the *paramattha* sense, any living person has to use “me” and “mine” in interactions with others. Even the Buddha talked about “HIS” previous lives. He often started a discourse by saying, “let ME explain this concept.”

- Furthermore, the Buddha emphasized that one should abide by the accepted standard rules of society. It is unwise to try to enforce the fact that in ultimate reality, there is no “me” or a “self.”
- There were many wealthy people, and even kings, who had attained *magga phala* and still engaged in their mundane “householder” activities. Of course, at the *Arahant* stage, one has to become a *bhikkhu*.
- Throughout the *Tipiṭaka*, the word “*atta*” appears with several different meanings. It is important to be able to use the appropriate meaning in a given context.
- **That is no different from using the word “right” in the following two contexts with entirely different meanings:** “turn right” and “you are right.” In the first, it refers to the direction, and in the second, it means “correct.”

***Atta* Meaning “Me” in Mundane Usage**

9. There are many *Tipiṭaka* verses, where “*attā*” means a “person.” The following are several examples.

- “*Attānaṃ damayanti paṇḍitā*” in *Dhammapada* verse 6.80 means “The wise persons control themselves”.
- “*Attano sukhamicchati*” in *Dhammapada* verse 21.291 means “one seeks one’s own happiness.” Also, note the word *iccha* (desire) in “*sukhamicchati*” is “*sukham*” + “*icchati*.”
- In the *Attadīpa Sutta* (SN 22.43), “*attadīpā viharatha*” means “make an island of yourself,” meaning “one has to seek one’s own refuge.”
- We will discuss the absolute or *paramattha* meaning of “*attā*” in the next post.

What is in “Me” (*Attā*)?

10. From ancient times, people have wondered about how to define “me” (or “*attā*” in Pāli.) Of course, one’s body is the priority. But one’s identity is also related to one’s mental activities. Thoughts, feelings, perceptions are unique to each person.

- Anything that one can think of as a part of “me” or “self” or “*attā*” is included in the five entities of *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.
- **It is only a Buddha that can do a thorough analysis and describes a person with those five “parameters.”** That analysis is taught by all Buddhas.
- Of course, each Buddha figures that out each time, on his own.
- Normally there is at most one Buddha in a given eon. But our current eon is a special one with five Buddhas. Remnants of the teachings of the previous Buddha (Buddha Kassapa) prevailed through *Vedic* teachings and were there when Buddha Gotama was born.

That Terminology Was There Even Before Buddha Gotama – How Is That Possible?

11. Many people have the perception that Buddha Gotama “adopted” that five-fold analysis from the *Vedas* because those terms appeared in *Vedic* literature before Buddha Gotama.

- There was Buddha Kassapa on this Earth before Buddha Gotama. Buddha Kassapa's teachings (especially the true meanings of key concepts) were lost with time. But many terms, including the concepts of *kamma*, *kamma vipāka*, five aggregates, and many others, were incorporated into *Vedic* teachings and transmitted through many generations. Of course, the *Vedic* teachings used the Sanskrit language, which was derived from Pāli or Magadha language. Sanskrit means “derived from” (“*san*” + “*krutha*” or සනී ක්‍රූත or සංස්කූත in Sinhala.)
- The Pāli words like *kamma*, *Nibbāna*, *Paṭicca Samuppāda* were made “more impressive-sounding” by mostly adding the “r” sound. Those three Pāli words became *karma*, *nirvāna*, and *Pratītyasamutpāda*, respectively, in Sanskrit.
- The same is true for the concept of five aggregates or *pañca khandha*. The *Vedic* teachings adopted them as five *skandhas*.

Whose Concepts are *Kamma*, *Nibbāna*, *Paṭicca Samuppāda*, etc.?

12. A full account requires possibly a whole book. But there are several instances in the *Tipiṭaka* where Buddha Gotama explained to various *Brahmins* that many of their teachings originated with Buddha Kassapa.

- For example, in the [WebLink: suttacentral: Māgandhiya Sutta \(MN 75\)](#), Buddha Gotama has a conversation with a *Brahmin* who quoted a verse from the *Vedas*. Buddha Gotama then says that verse was initially uttered by Buddha Kassapa and that it come down through generations in the *Vedas* without the true meaning. I have discussed that in the post, “[Arogyā Paramā Lābhā.](#)”
- When Prince Siddhartha was born, such *Vedic* teachings were there. We have a somewhat similar situation right now, with many vital concepts misinterpreted.
- I mentioned the above because I see in online forums many people wonder whether Buddha Gotama “adopted” *Vedic* concepts. Those concepts originally came from Buddha Kassapa. But any Buddha discovers them by his own efforts.
- Then the question comes up as to the “evolution of humans.” There was no evolution of humans. Humans existed on Earth (with *Brahma*-like bodies) at the beginning of the Earth. This is why it would take a book to discuss all these things. I have given a brief account of the “beginnings” in “[Buddhism and Evolution – Aggañña Sutta \(DN 27\)](#).”

We will discuss the concept of *sakkāya diṭṭhi* further in the next post.

3.6.7.5 Sakkāya Diṭṭhi – “Me and Mine” View

June 23, 2020

The View of “Me and Mine”- Only For About a Hundred Years

1. An average human has the wrong view that it is beneficial to consider mind-pleasing things in this world as “me” or “mine”. As we discussed in the previous few posts, the most valuable *rūpa* in the world is one's physical body. Then there are parents, spouses, children, friends, etc that are considered to be “mine.” See, “[Five Aggregates – Connection to Tilakkhana](#).”

- It is critical to realize that all those things last only about 100 years.
- **Upon death, even if one is reborn human, it will be a different body and a different set of humans that will become “me” and “mine.”** We would not even know who we were in our previous life. We would not know what happened to all those “loved ones” we had in the previous life.
- That is the “big picture” that we need to focus on. That big picture can be discovered only by a Buddha.

- It would be impossible for any other human to discover the “real nature of the wider world of 31 realms” where a given living-being goes through the birth/death process.
- But once explained by a Buddha or a true disciple of the Buddha, one can see the truth in his teachings.

“Me and Mine” View Can Lead to Immoral Actions

2. Based on that wrong view of “me” and “mine” we are sometimes forced to do immoral actions. Think about it carefully. **If we lie, steal, or hurt others, such actions can always be traced back to “taking care of me or mine.”**

- It is critical to understand that this **wrong view of “me and mine” (*sakkāya diṭṭhi*) is different from the perception of “me and mine.”** *Diṭṭhi* means “view.”
- Even after getting rid of the wrong view of “me and mine” that wrong-perception will still be there. That perception of “me” or the innate feeling of “me” will go away only at the *Arahant* stage.
- However, just “seeing” that it is not fruitful to act on the basis of “me and mine” is enough for the mind to stay away from doing highly-immoral deeds. That “seeing” happens when one becomes a *Sotāpanna*.
- Of course, it may not be easy to comprehend. That is why the Buddha said, “this Dhamma has not been known to the world.”

“Me and Mine” View Cannot Be Removed by Will Power – It Is Lost via Understanding the “True Nature”

3. The logic of Buddha Dhamma cannot be understood without the underlying principles. Those underlying principles are the rebirth process, laws of *kamma*, how *Paṭicca Samuppāda* to give rise to new births, etc. For that, one first needs to get rid of the ten wrong views and learn basic concepts like *gati*, *anusaya*, etc. See, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage.](#)”

- It is not easy to put all that together and see the truth of the “wider world-view.” Yet, without that foundation, it is not possible to see that big picture and realize the truth of it.
- It may be hard to believe, but just that “understanding of the big picture” will lead to the removal of 99% of the “gunk” that has been accumulated in our minds in a rebirth process that has no discernible beginning.
- I recommend reading the recently compiled English text of discourse on this subject by the late Waharaka Thero: [WebLink: PDF file: How to Attain Nibbāna as a Buddhist Layman – Part 1](#)

That “Big Picture” Must be Learnt From a Buddha

4. If one has not heard the above from a Buddha or a true disciple of the Buddha, that person — no matter how intelligent — would not be able to figure that out by him/herself.

- The Buddha called such a person “*assutavā puthujjano*.” That means “an ignorant person who had not heard this Dhamma.”
- Of course, many people cannot and will not agree with that “new Dhamma”. They do not have the capability to grasp it. They may not be willing to discard the wrong views that they have. There is nothing we can do about that.
- I have come this far in the rebirth process because I also had been incapable of grasping that in my previous lives.
- So, all we can do is try our best to understand. Even if one cannot understand, one needs to live a moral life and engage in meritorious deeds, so that the understanding can come in future life.

Who Is an *Assutavā Puthujjano*?

5. There are many *suttā* where the Buddha described an “*assutavā puthujjano*.”

For example, the “[WebLink: suttacentral: Paṭipadā Sutta \(SN 22.44\)](#)” states, “*Katamā ca, bhikkhave, sakkāya samudayagāminī paṭipadā? Idha, bhikkhave, assutavā puthujjano ariyānaṃ adassāvī ariyadhammassa akovido ariyadhamme avinīto, sappurisānaṃ adassāvī sappurisadhammassa akovido sappurisadhamme avinīto, rūpaṃ attato samanupassati, rūpavantaṃ vā attānaṃ; attani vā rūpaṃ, rūpasmiṃ vā attānaṃ. Vedanaṃ ...*

saññāṃ ...sañkhāre ...viññāṇaṃ attato samanupassati”

Translated: “And what, *bhikkhus*, is the path leading to the origination of identity view? Here, *bhikkhus*, an ignorant person who has not heard Dhamma ... regards form as self ... *vedanā* as self ... *saññā* as self ... *sañkhāra* as self ... *viññāṇa* as self”

- “*Rūpaṃ attato samanupassati*” means, “regards form (meaning one’s body) as “me” in one of four ways. In the same way, that person may consider each of the other four aggregates as “me” in one of four ways.
- Thus, considering each of the five aggregates in four ways “to be mine”, leads to the “self-view” or ‘identity view’. That is “twenty-types of *sakkāya diṭṭhi*” or “*vīsativatthukā sakkāya diṭṭhi*.” See, “[WebLink: suttacentral: Nayasamutthāna \(Ne 36 / Netti 5\)](#)” of *Nettipakaraṇa*.
- Anyone who has not heard the correct explanation of *sakkāya diṭṭhi* is an “uninformed/ignorant” human or *assutavā puthujjano*. That is why most people today belong to this category. Even when explained, some people have a hard time grasping this “previously unheard Dhamma.”

Sutavā Ariyasāvako – One Who Has Heard and Comprehended Dhamma

6. The opposite of an *assutavā puthujjano* is a *sutavā ariyasāvako*, who has heard and comprehended the correct teachings of the Buddha. Such a person knows the dangers in attaching to worldly things.

- There are many *suttā* in SN 35 (especially SN 35. 1 through SN 35. 12) that discuss a *sutavā ariyasāvako*. For example, “[WebLink: suttacentral: Ajjhattāniccātītānāgata Sutta \(SN 35.7\)](#)” says: “*Cakkhum, bhikkhave, aniccaṃ atītānāgataṃ; ko pana vādo paccuppannassa. Evaṃ passaṃ, bhikkhave, sutavā ariyasāvako atītasmiṃ cakkhusmiṃ anapekkho hoti; anāgataṃ cakkhum nābhinandati; paccuppannassa cakkhussa nibbidāya virāgāya nirodhāya paṭipanno hoti. Sotaṃ aniccaṃ ... ghānaṃ aniccaṃ ...*”

Translated: “*Bhikkhus*, the eye of the past and future (let alone the present) is of *anicca* nature, . Seeing this, a learned noble disciple doesn’t attach to the eye of the past, he doesn’t look forward to enjoying the eye in the future, and he practices for non-attachment, dispassion, and cessation regarding the eye of the present. The ear ... nose ...”

- Note that translating “*anicca*” as “impermanent” does not make any sense. The “eye of the past” has already been destroyed. There is no need to talk about the impermanence of it. What the verse says is that it is not beneficial to recall one’s past and think fondly about it, hoping to enjoy such an eye in the future.

An *Assutavā Puthujjano* Has *Sakkāya Diṭṭhi*

7. Thus *sakkāya diṭṭhi* (identity or self-view) arises because one takes one’s body as “me.” Of course, one may take one’s *vedanā*, *saññā*, *sañkhāra*, and *viññāṇa* as self too. In other words, anyone who views one or more of the five aggregates as “mine” has *sakkāya diṭṭhi*.

“[WebLink: suttacentral: Sakkāyaditthi Sutta \(SN 22.155\)](#)” the Buddha says, “*rūpe kho, bhikkhave, sati, rūpaṃ upādāya, rūpaṃ abhinivissa sakkāya diṭṭhi uppajjati. Vedanāya sati ... saññāya sati ... saṅkhāresu sati ... viññāṇe sati, viññāṇaṃ upādāya, viññāṇaṃ abhinivissa sakkāya diṭṭhi uppajjati.*”

- OR, “When one focuses on *rūpa* when one is “immersed” in *rūpa* and keep them close (in one’s mind), **identity view** arises. The same can happen with *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.

Then the Buddha asks, “*Taṃ kiṃ maññatha, bhikkhave, rūpaṃ niccaṃ vā aniccaṃ vā*”ti?

- OR, “*bhikkhus*, are those *rūpā* of *nicca* or *anicca* nature?”
- *Anicca* and *nicca* are complex Pāli words with multiple (but related) meanings. See, See, “[Anicca – True Meaning](#).”
- Those two words are related to “*icca*” or “*icchā*” meaning liking or desire. See, “[Icca, Nicca, Anicca – Important Connections](#).”
- We will discuss the correct meaning of “*Taṃ kiṃ maññatha, bhikkhave, rūpaṃ niccaṃ vā aniccaṃ vā*”ti? in #9 below. First, let us look at the common INCORRECT meaning of it.

Critical Error in Equating “*Nicca* and *Anicca*” in Pāli as “*Nitya* and *Anitya*” in Sanskrit

8. The INCORRECT translation of “*Taṃ kiṃ maññatha, bhikkhave, rūpaṃ niccaṃ vā aniccaṃ vā*”ti? is, “*bhikkhus*, are those *rūpā* **permanent** or **impermanent**?”

- That is the English translation that appears in most current English texts. It is WRONG!
- The Pāli word “*nicca*” DOES NOT mean “permanent” and “*anicca*” DOES NOT mean “impermanent”.
- However, the Sanskrit words “*nitya*” and “*anitya*” DO MEAN “permanent” and “impermanent”.
- **That grave mistake of confusing Pāli words with wrong Sanskrit words has kept so many people from grasping the correct Buddha Dhamma.**
- Pāli words for “permanent” is *niyata* AND *dhuva*. Impermanence expressed as “*aniyata*” or “*addhuva*”.
- For the life of me, I do not understand why all these “learned *bhikkhus* and scholars” refuse to take a bit of time to go through the *Tipiṭaka* and figure this out. **They should keep in mind that teaching wrong Dhamma is an offense.** The Buddha admonished that dealing with Dhamma is like handling a snake. If you get hold of the wrong end, you will be in danger.

Correct Translation of “*Taṃ kiṃ maññatha, bhikkhave, rūpaṃ niccaṃ vā aniccaṃ vā*”ti?

9. In fact, there are more *suttā* in this series that probe deeper into how the root causes of suffering are tied up to the view of “me” and “mine” based on the high-value for world objects.

For example, [WebLink: suttacentral: Ānanda Sutta \(SN 22.159\)](#) further clarifies what we discussed in #6 above. In that *sutta*, the Buddha explains to Ven. Ānanda how attachment to *rūpa* with VIEW of “me and mine” leads to suffering and, thus, is the wrong view. The conversation goes as follows.

- “*Taṃ kiṃ maññasi, ānanda, rūpaṃ niccaṃ vā aniccaṃ vā*”ti?
- “*Aniccaṃ, bhante*”.
- “*Yaṃ paṇāniccaṃ dukkhaṃ vā taṃ sukhaṃ vā*”ti?
- “*Dukkhaṃ, bhante*”.

- “*Yaṃ paṇāniccaṃ dukkhaṃ vipariṇāmadhammaṃ, kallaṃ nu taṃ samanupassitum: ‘etaṃ mama, esohamasmī, eso me attā’*”ti? [*kalla* : [adj.] 1. clever; able; 2. healthy; sound; 3. ready; 4. proper.]
- “*No hetam, bhante*”.

Translation:

- “What do you think, Ānanda? Can anyone maintain *rūpa* to one’s liking?”
- “One cannot (*aniccaṃ*), *Bhante*.”
- “If one cannot maintain something to one’s liking, does the lead to suffering or happiness?”
- “Suffering, *Bhante*.”
- “If something cannot be maintained to one’s liking, leads to suffering, and is subject to unexpected changes, **is it wise** to regard that as: ‘**This is mine, I am this, this is my self or identity**’?”
- “No, *Bhante*.”

Then the Buddha asks about the other four aggregates (the mental aggregates) of *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.

- Venerable Ānanda agrees that those are also unfit to be “taken as mine or my identity.”

Is It Wise to Take the Five Aggregates As “Me and Mine”?

10. The key point is that these *suttā* only talk about **whether it is SUITABLE or WISE** to take any of the five aggregates as me or mine.

- That pertains only to one’s **view of a “me.”** Getting rid of that VIEW is getting rid of *sakkāya diṭṭhi*.
- One may still have the **feeling/perception of a “me.”** That goes away only at the *Arahant* stage.
- Yet many people today try to start with “I do not exist” (with the incorrect translation of *anatta* as “no-self”). It is ridiculous to say, “I do not exist.” It is obvious that we all exist.
- We will discuss **the concept of *anatta*** in the next post. That basically says one will be helpless in the rebirth process with the wrong view and wrong perception of a “me.” That “me” will go through uncountable “bad births” with that wrong view/perception of a “me.”

One Could Be Reborn a Human, Deva, Brahma, Animal, Hell-Being – Which One Is “Me”?

11. Think about that. Is “me” a human, animal, a *Brahma*, (or any of the many births possible)? This is why one cannot comprehend Buddha Dhamma without understanding the “big picture” of the Buddha about this world.

- That “big picture” is the non-stop rebirth process within the 31 realms of this world.
- It also includes the laws of *kamma* and *Paṭicca Samuppāda*. Here, *Paṭicca Samuppāda* explains how different existences (*bhava*) arise due to *abhisāṅkhāra* (strong *kamma*.)
- It is those *abhisāṅkhāra* (done with *avijjā*) that lead to different existences as a human, *Deva*, *Brahma*, animal, hell-being, etc.
- Any living-being will be “preparing one’s own future births” via generating corresponding *abhisāṅkhāra* (or good bad *kamma*) due to ignorance (*avijjā*.) That was the conclusion of the series of posts on “[Origin of Life](#).” See, “[Origin of Life – One Creates One’s Own Future Lives](#).”
- That *avijjā* will reduce by a huge fraction when one gets rid of *sakkāya diṭṭhi*. It will completely go away at the *Arahant* stage with the removal of “*asmī māna*.”

3.6.7.6 Atta – Two Very Different Meanings

July 1, 2020

First, “*atta (attā)*” is pronounced with the “th” sound, as in “*metta (mettā)*”. See, #12 of “[“Tipitaka English” Convention Adopted by Early European Scholars – Part 1.](#)”

Words With Double Meanings in English

1. A number of English words are spelled the same way and pronounced the same way, but have different meanings. For example, let us consider the word, “mine.”

- The word **mine** is a possessive adjective. For example, “That house is **mine**” means the house belongs to me.
- **Mine** is also a noun. It can refer to a place where minerals (coal, gold, etc) are dug out of the earth.
- A **mine** (or **landmine**) also refers to a bomb that is buried underground. It can explode when someone steps on it or drives over it. They are used in war.
- There are many other words like that. We need to know which meaning to use based on the context (how it is used). Another simple word is right. It means a **direction** in “turn **right** at the traffic light”. But it means something entirely different in, “you are **right**” meaning “you are **correct**.”

Atta (and Attā) – Two Very Different Meanings

2. Many Pāli words have double meanings. In addition, **many Pāli words have a mundane meaning and a deeper meaning**. We need to know which one to use depending on the situation.

- One becomes good at figuring out which meaning is relevant in a given context, only after having a good understanding of Buddha Dhamma. A good understanding comes especially with practice, not merely by reading about Buddha Dhamma.
- That is why it is not a good idea to resort to Pāli dictionaries alone. See, “[Pāli Dictionaries – Are They Reliable?](#)”
- Pāli word “*atta*” has two frequently used meanings. One is the mundane meaning of “person” or “self.” Let us discuss that first.

Atta Meaning “Person” or “Self” in Mundane Usage

3. There are many *Tipitaka* verses, where “*atta*” means a “person.” The following are several examples.

- “*Attānaṃ damayanti paṇḍitā*” in *Dhammapada* verse 6.80 means “The wise **persons** control themselves.”
- “*Attano sukhamicchatī*” in *Dhammapada* verse 21.291 means “one seeks one’s **own** happiness.” Also, note the word *iccha* (desire) in “*sukhamicchatī*” is “*sukhaṃ*” + “*icchatī*.”
- In the *Attadīpa Sutta* (SN 22.43), “*attadīpā viharatha*” means “make an island of **yourself**,” meaning “**one** has to seek one’s own refuge.”

Various Wrong Views based on “Person” or “Self”

4. Humans always wondered what it is that feels like “me”. What defines a “me” or a “self” or “*attā*?” Based on such thinking, they come to various wrong conclusions or wrong views about a “self.”

- In the [WebLink: suttacentral: Brahmajāla Sutta \(DN 1\)](#) the Buddha described 62 types of wrong views that people have.

- All these wrong views can be divided into primarily two categories (the other views are variations of these two.) In the terminology used today, we can list those two categories as follows.

Permanent Soul (*Sassata Vāda*): A given person has a permanent soul in *Abrahamic* religions (or *ātma* or *ātman* in Hinduism.) When the physical body dies, “the soul” or “*ātma*” gets hold of another existence. In *Abrahamic* religions, that next existence is forever in either heaven or hell. In Hinduism, one may go through many “incarnations” and would finally merge with *Mahā Brahma* to attain a permanent existence.

Materialistic View (*Uccheda Vāda*): When the present life ends, no more future lives or existences. The material body is solely responsible for generating our thoughts (in the brain.) Many scientists today belong to this category.

5. The verse describing *sassata vāda*: “*Tatra, bhikkhave, ye te samaṇabrāhmaṇā sassatavādā sassataṃ attānañca lokañca paññapenti ..*”

means, “when those ascetics and *brahmins* assert that the **self** and the cosmos are **eternal** ..”

- *Sassata* means “eternal.”

The verse describing *uccheda vāda*: “*Tatra, bhikkhave, ye te samaṇabrāhmaṇā ucchedavādā sato sattassa ucchedaṃ vināsaṃ vibhavaṃ paññapenti ..*” meaning, “they assert the **annihilation of an existing being**..”

- *Uccheda* means to “break off” or “cut off.” Materialists believe that we just live this life.

With the Mundane Meaning of *Atta*, *Anatta* is Not Used as Its Opposite

6. Therefore, in ALL of the above cases, the word “*atta*” refers to what we traditionally call a “self.”

- In simple terms, materialists have the wrong view that a “self” has only this life.
- People in the other camp have the wrong view that a “soul” is forever.
- The Buddha pointed out that both views are wrong. A “self” would come to existence as long as appropriate causes and conditions are there. But there is no “permanent self” like a soul. An *Arahant* would not be reborn. He/she would have removed those causes and conditions for rebirth.
- In both cases, the word “*anatta* (or *anattā*)” is NEVER used to indicate the opposite of *attā*. The word “*anatta*” is NEVER used to indicate that a “self is absent.” For example, in the [WebLink: suttacentral: Ānanda Sutta \(SN 44.10\)](#) Vacchagotta comes to the Buddha asked “Master Gotama, is it correct to say that there is a “self?”” He used the phrase, “*atthi attā*” to ask whether there is a “self.” Then he phrased it the opposite way and asked, “is it not correct to say that there is a “self?”” There he used the phrase, “*na atthi attā*” to ask whether a “self” does not exist. See, “[Anattā \(Mundane Interpretation\) – No “Unchanging Self.”](#)”

Now, let us discuss the absolute or *paramattha* meaning of “*attā*.” Here, the opposite of *attā* (or “*anatta*”) indicates two facts: (i) Any worldly thing does not have an essence. (ii) One would become helpless at the end if one attaches to those worldly things. These meanings need to be used in the context of the three characteristics of nature or *Tilakkhaṇa*.

Anatta As a Characteristic of Nature – No Essence in Worldly Things

7. This usage of the word “*anatta*” indicates “no refuge” or “no essence” to refer to THINGS IN THIS WORLD. It could also mean one would become “helpless” at the end if one pursues worldly things with greed or cravings. **This involves the deeper meaning of “*atta*” being “with refuge” or “with essence.”**

- One would be safe and protected by overcoming the *anatta* nature. That is *Nibbāna*. Only *Nibbāna* has the “*atta*” nature.

- **In this context, the three words *anicca*, *dukkha*, and *anatta* describe CHARACTERISTICS of this world. They have NOTHING TO DO with the context of a “self” directly.**
- In brief, *anicca* means that “worldly things” cannot be maintained to anyone’s satisfaction in the long-run. Those “worldly things” include not only material things but also mental attributes, among them *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*.
- **IF someone craves them and attaches to them, then that person will be subjected to future suffering.** That comes in two parts. First, one would become distressed because those desires will not be fulfilled at the end. Secondly, if one does immoral actions to get them, then one will have to face bad consequences of such actions (including rebirths in bad existences.)
- **Thus, in the end, attachment to worldly things will be of “no essence.”** Those struggles would be in vain and are fruitless. **One would become helpless by pursuing such efforts.**

Anattha* and *Attha* Are Strong Versions of *Anatta* and *Atta

8. I have explained in a previous post that the words “*iccha*” and “*aniccha*” have the same meanings as “*icca*” and “*anicca*” but with stronger emphasis. See, [“*Icca*, *Nicca*, *Anicca* – Important Connections.](#)”

- In the same way, “*atta*” and “*anatta*” in the present context have stronger versions indicated by “*attha*” and “*anatta*.”
- In the [WebLink: suttacentral: *Dhammacakkappavattana Sutta* \(SN 56.11\)](#), the Buddha described a person engaged in *kāmasukhallikānuyoga* or *attakilamathānuyoga* as “*anattasamphito*.”
- The verse at the beginning of the *sutta* is, “*Yo cāyaṃ kāmesu kāmasukhallikānuyogo hīno gammo pothujjaniko anariyo anattasamphito, yo cāyaṃ attakilamathānuyogo dukkho anariyo anattasamphito.*”
- Here, the word “*anattasamphito*” (*anatta* + *san* + *hito*) means an *anariya* or an ignorance average person is helpless because of the wrong views.

9. Furthermore, “*attha*” also indicates “truth” (“*artha*” in Sinhala) and “*anatta*” indicates “untruth or useless” (“*anartha*” in Sinhala) depending on the context. None of these words are used in the context of a “self.”

- The above verse could also be explained as an *anariya* engaging in useless activities (either indulging in sense pleasures or going to the other extreme of self-mortification.) Either activity does not have any meaning or essence.

***Anicca*, *Dukkha*, *Anatta* – Closely Related Characteristics of This World**

10. *Anicca*, *dukkha*, *anatta* are CHARACTERISTICS of this world. The word “*anatta*” in that context DOES NOT mean “no-self” or anything like that. However, a given person can BECOME *anatta* (helpless) by attaching to things of *anicca* nature that lead to suffering (*dukkha*.) But a person with *magga phala* has overcome that state of “helplessness” and has become an *Ariya* with refuge (*atta*.)

- The opposites of *anicca*, *dukkha*, *anatta* (ie., *nicca*, *sukha*, *atta*) are characteristics of *Nibbāna*. See, [“*Tilakkhana* – English Discourses.](#)”
- One gets to *Nibbāna* by renouncing “this world of 31 realms.”
- One attains *Nibbāna* by first realizing the *anicca*, *dukkha*, *anatta* NATURE of this world. Only then that one would have understood the Four Noble Truths.
- Only then it is possible to grasp that the Fourth Noble Truth of “the path to *Nibbāna*” is the Noble Eightfold Path. That Noble Path starts with *Samma Ditthi*, which is the “clear vision” that this world is of *anicca*, *dukkha*, *anatta* NATURE of the world with 31 realms.

“Previously Unheard Dhamma” of the Buddha

11. That is a very succinct description of Buddha Dhamma, the “previously unheard teachings that can only come from a Buddha.”

- The common perception is that one can find long-lasting happiness in this world. That there are so many “mind-pleasing things” in this world worth pursuing. If one makes a determined effort, one can “succeed in life” and “be happy.”
- The Buddha agreed that there are many “mind-pleasing things” in this world.
- But the Buddha taught that there is suffering hidden in those apparent ‘mind-pleasing’ things. That hidden suffering is hard to see, and that is why not everyone can understand Buddha Dhamma. Without making a determined effort, it may not be possible.

An Analogy – *Assutavā Puthujjano* Is Not Different From a Fish Biting Into a Tasty Bait

12. The Buddha gave the following analogy. A fish bites into a tasty bait, because it cannot see the hook hidden in it. The fish only see the “tasty bait” and cannot see the hook, string, fishing pole, and the person holding that pole. If it could see the “whole picture” it would not even go close to that bait.

- In the same way, it is only a Buddha who can “see” the “bigger picture” with the 31 realms with the four suffering-filled realms and the rebirth process. Due to the ignorance of that “wider worldview,” living-beings spend most of the time in those four lowest realms.
- An “*assutavā puthujjano*” or an “ignorant average human” is unable to see that hidden suffering. That is why most living-beings spend most of their *samsaric* journey within the four lowest realms. They get trapped there and become helpless. They become “*anatta*” or “without refuge” at the end. See, [“Sakkāya Ditthi – ‘Me and Mine’ View.”](#)
- I have discussed those three words in many posts in the section “[Anicca, Dukkha, Anatta](#)” and also in the recently revised section on “[The Five Aggregates \(Pañcakkhandha\)](#).” It was also discussed with another approach in the “[Origin of Life](#)” section. Each person is different and one of those could be appropriate for a given person. In the end, they all converge to the same point and one would be able to see that they are all self-consistent.

Evidence That *Anatta* Does Not Mean “No-Self”

13. There are many *suttā* in the *Smayutta Nikāya* that discuss *anicca*, *dukkha*, *anatta*, and the relationships among them. Specifically SN 22, SN 23, and SN 35.

- For example, [WebLink: suttacentral: Kotthikaanatta Sutta \(SN 35.164\)](#) states, “*Cakkhu kho, koṭṭhika, anattā; tatra te chando pahātabbo. Rūpā anattā; tatra te chando pahātabbo. Cakkhuviññāṇaṃ anattā; tatra te chando pahātabbo. Cakkhusamphasso anattā; tatra te chando pahātabbo. Yampidaṃ cakkhusamphassapaccayā uppajjati vedayitaṃ sukhaṃ vā dukkhaṃ vā adukkhamasukhaṃ vā tampi anattā; tatra te chando pahātabbo ...*”

Translated: “The eye, sights, eye-consciousness, and eye “san-contact” (*samphassa*) are without essence: you should give up the desire/cravings for them. The pleasant, painful, or neutral feeling that arises conditioned by eye “san-contact” (*samphassa*) is also without essence. You should give up the desire for it.”

- That statement is then repeated for the ear, tongue, nose, body, and mind. **It applies anything and everything in this world!**

Can Eye-Consciousness Have a “Self”?

14. Most other translations state all those entities that I highlighted above are “**not-self.**” See, “[WebLink: suttacentral: With Kotthita on Not-Self](#)” which states, “The eye, sights, **eye-consciousness**, and **eye contact** are **not-self.**”

- How can **eye-consciousness** possibly have a “self”? How can **eye contact** have a “self”? What does it mean to say they have “no-self”? Even a child should be able to see that statement does not make any sense!

Anything In This World Has *Anatta* Nature

15. In fact, as stated in the *sutta* in #13 above (and MANY other *suttā*) ANYTHING that exists in this world is of *anatta* nature. **They are all without any essence.**

- It starts with the *anicca* nature of ALL worldly things. That means no one can maintain anything in this world to one’s satisfaction over the long run.
- But people try to do that impossible task because they crave many things in this world. But in the end, they would only suffer. That is partly because they do immoral deeds to acquire those “things” and end up having to face bad *kamma vipāka*. The verse “*yad **aniccam** tam dukkham*” or the verse, “*Yam pi **iccham** na labhati tam pi dukkham*” expresses that fact.
- That process will gradually move anyone to more and more suffering. One will eventually end up in the *apayā* with much suffering, and at that point, one would be truly helpless (*anatta*.) That is what is meant by, “*yam dukkham tad **anattā***.”
- That verse, “*yad **aniccam** tam dukkham, yam dukkham tad **anattā***” appears in numerous *suttā* in the *Tipiṭaka*. That is how living-beings become helpless in the rebirth process (by engaging in immoral deeds) in their quest of seeking “sensory pleasures.”
- **That is the “previously unheard Dhamma” of the Buddha.**

3.6.8 Saññā (Perception)

Saññā is, at the very fundamental level, the recognition of an external stimulus. But it is more than that. We not only recognize that a given object is, say, a dog. But some people may be able to categorize it as a bull dog. Thus *saññā* about a particular object depends on the person.

Same is true for other four senses. When we hear a sound, we recognize what it is, say a bird singing a song. Some may be able to say which bird it is, some may not be. Any smell, taste, or touch works the same way. Without *saññā* we cannot identify things around us, and also cannot communicate with each other meaningfully.

One of the 31 realms of existence is the “*Asanna* realm.” There, the beings have no *saññā* or perception. Thus in principle, those beings are without any awareness. Nothing registers in the mind. If anyone has attained the 7th *jhāna*, the “*Nevasanna Na’sanna*,” then that person knows what it is like to born in the *Asanna* realm.

Saññā is described in more detail in, “[Saññā – What It Really Means](#)” and “[How to Cultivate the Anicca Saññā](#).”

Next, “[Vedanā \(Feelings\)](#)”,

3.6.9 Vedanā (Feelings)

Revised November 6, 2018; August 31, 2019

In this and follow-up posts, we will discuss six types of *vedanā* (feelings) and how they arise. There are other types of *vedanā*, but these are the important ones to understand for the *Sotāpanna* stage. Three of these occur due to *kamma vipāka*, and the other three arise due to *saṅkhāra* (defiled thoughts).

- *Vedanā* comes from (“ve” + “danā”) which means “වෙ දන වීම” in Sinhala. That means to “become aware of something.” **When we sense something via our six senses, we become aware of it; that is *vedanā*.**

Two Ways *Vedanā* (Feelings) Can Arise

Vedanā (feelings) can arise in two ways:

1. First, as a consequence of a previous *kamma* (i.e., a *kamma vipāka*), possibly done many lives ago. Those usually are not avoidable.
 - Unavoidable *vedanā* (feelings) are three kinds : *Sukha vedanā* (pleasant or joyful feeling), *dukha vedanā* (unpleasant or painful feeling), and *adukkhamā asukha* (without being painful or joyful, just neutral), where we are just aware of it. This *adukkhamā asukha vedanā* is also called *upekkhā vedanā*.
2. Second, as a direct consequence of a *saṅkhāra* (one could say an ongoing action or a way of thinking). These are absent in *Arahants*.
 - Three types of other *vedanā* are avoidable: *somanassa* (pleasant), *domanassa* (unpleasant), and *upekkhā* (neutral) *vedanā*. They are solely mind-made and are due to defiled thoughts (*saṅkhāra*). The details discussed below.

Vedanā Arising from *Kamma Vipāka*

Kamma vipāka can happen to everyone, including *Arahants*. While everyone can avoid some *kamma vipāka*, others are too strong to be able to be avoided.

- For example, the Buddha himself had physical ailments later in his life as *kamma vipāka*. Because of a bad *kamma* that he committed many lives before, Moggallāna Thero was beaten to death.
- However, *kamma vipāka* are not sure to happen. Some can be reduced in power by *Mettā Bhāvanā*; see, “[Karaniya Metta Sutta – Mettā Bhāvanā](#).”
- All *kamma vipāka* reduce in power with time and some eventually die out if they did not get a chance to come to fruition within 91 *Mahā kalpas*. Many can be avoided by not providing conditions for them to arise (see, the discussion on *kamma bīja* in, “[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#)”).
- One could also feel *sukha vedanā* (pleasant feelings) due to good *kamma vipāka*. These are also bodily feelings that arise due to “pleasant bodily contacts” like a getting a good massage or lying on a luxurious bed.
- These types of *vedanā* are not DIRECTLY relevant in *Paṭicca Samuppāda*. For example, when Devadatta injured the Buddha, the Buddha did not generate “*vedanā paccayā tanhā*” in *Paṭicca Samuppāda*.

Vedanā Arising from *Saṅkhāra*

These are the *vedanā* that *Arahants* do not feel. Since they do not commit any *abhisāṅkhāra* (those strong *saṅkhāra* done with greed, hate, and ignorance), an *Arahant* avoids any feeling arising from *abhisāṅkhāra*. The easiest way to explain this kind of *vedanā* is to give some examples:

1. Three people are walking down the street. One has an ultra-right political bias (A), the second has an ultra-left preference (B), and the third is an *Arahant* who does not have special feelings for anyone (C).

They all see a famous politician hated by the political right coming their way. It is a given that the sight of the politician causes A to have displeasure and B to have a pleasurable feeling.

2. On the other hand, the sight does not cause the *Arahant* to generate any pleasure or displeasure. Even though all three see the same person, they generate different types of feelings. *It is critical to realize that A and B created the feelings by themselves.*
2. Two friends go looking for treasure and find a gem. They are both overjoyed. It seems quite valuable, and one person kills the other so that he can get all the money. When he tries to sell the “gem”, he finds out that it was not that valuable. His joy turns to sorrow in an instant. *Nothing had changed in the object, the piece of stone. It was the same piece of colored rock. What has changed was the perception of it (saññā).*
3. A loving couple had lived for many years without any problems and were happy to be together. However, the husband slaps his wife during an argument. The physical pain from the slap itself did not last more than a few minutes. But for how long the wife would suffer mentally? Even the husband, who did not feel any physical pain, would suffer for days if he really loved his wife. *In both cases, the attachment to each other led to real suffering. The wife could have dropped something on her foot and would have suffered about the same amount of physical pain. But she would not have had any lingering mental pain associated with that.*

Thus all these second kind of feelings arise due to greed, hate, or ignorance. They are due to (*abhi*) *sañkhāra*. The feelings come from INSIDE oneself. They do not come from a *kamma vipāka*. We use external things to CAUSE happiness or suffering by our own volition.

- These types of *vedanā* (also called *samphassa jā vedanā*” or “*vedanā* generated via *samphassa*“) are the ones relevant in *Paṭicca Samuppāda*.

Deeper analyses can be found at [Vedanā \(Feelings\) Arise in Two Ways](#)

Next, “[Viññāna \(Consciousness\)](#)”,

3.6.10 Viññāṇa (Defiled Consciousness)

Originally written in 2014; re-written September 8, 2018; revised December 25, 2018

Viññāṇa is normally translated as consciousness or awareness. But it is much deeper and can be many different types. An overview is given below, and there are several posts on different types of *viññāṇa* in different sections on the website.

- *Viññāṇa* is very complex and is the key to *Nibbāna*. One should read the posts referred below; more posts can be found by using the “Search box” on the top right.
- First, it is very important to get a basic understanding of Pāli terms like *citta*, *viññāṇa*, and *nāma gotta*: “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#)” and “[The Amazing Mind – Critical Role of Nāmagotta \(Memories\)](#).”

Six Types of Viññāṇa

1. There are six types of *viññāṇa* corresponding to the six sense inputs (vision, hearing, taste, smell, touch, mind): *cakkhu*, *sota*, *jīvhā*, *gandha*, *kāya*, and *mano viññāṇa*.

- When we experience a sense input (say, see an object), we get a happy, unhappy, or neutral feeling (*vedanā*), recognize it (*saññā*), and automatically generate *mano sañkhāra*.
- *Viññāṇa* provides the overall sensory experience that includes *vedanā*, *saññā*, and *sañkhāra*. Those latter three combined is called “*nāma*.”
- However, in addition to just providing a “sense experience” (which is all “*nāma*“), *viññāṇa* can also act as the bridge between “*nāma*” and “*rūpa*” to “*nāmarūpa*.” These *nāmarūpa* are the seeds for the

creation of matter (*rūpa*). That is a separate type of *viññāṇa* — called *kamma viññāṇa* — as we discuss now.

Two Types of *Viññāṇa* – *Vipāka Viññāṇa* and *Kamma Viññāṇa*

2. *Vipāka viññāṇa* is awareness or consciousness. The five types *viññāṇa* of associated with the five physical senses are ALWAYS *vipāka viññāṇa*. *Mano viññāṇa* also could be a *vipāka viññāṇa*. When one “sees” something that is *cakkhu viññāṇa*; when one smells something that is a *ghāṇa viññāṇa*, etc; there are 6 types of *vipāka viññāṇa* that arise when sense inputs come through the 6 sense doors (eyes, ears, nose, tongue, touch, and the mind). These are the six types listed above in #1.

- **The second major type is *kamma viññāṇa* or defiled *viññāṇa*.** *Kamma viññāṇa* are those that arise via “*avijjā paccayā saṅkhāra*” in *Paṭicca Samuppāda*.
- It is to be noted that *kamma viññāṇa* are always *mano viññāṇa*, i.e., *kamma viññāṇa* arise in the mind without going through the five physical sense doors.
- **Therefore, *mano viññāṇa* can be *vipāka viññāṇa* or *kamma viññāṇa*.**

3. *Kamma viññāṇa* are created via our defiled thoughts (*saṅkhāra*) which are three types: *mano*, *vacī*, and *kāya saṅkhāra*.

- When we automatically generate thoughts due to a sense input those are *mano saṅkhāra*; then we consciously think about it and may even talk out loud about it (with *vacī saṅkhāra*); if we really get engaged, we may physical do things (with *kāya saṅkhāra*); see, “[Saṅkhāra – What It Really Means](#).”
- It is also important to realize that “talking/thinking to oneself silently” without speaking is included in *vacī saṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra](#).”

4. We can see that what is called the “awareness” or “consciousness” is really *vipāka viññāṇa*; it is one’s experience at a given moment.

- **On the other hand, *kamma viññāṇa* is what is called the “subconscious.”** It is a hope or desire that lies hidden and comes to the surface from time to time. For example, if we are planning to buy a car, that idea (hope/desire) remains in our subconscious. When we see a car like the one that we want to buy, that *viññāṇa* is “awakened” and we start thinking about it. But once we buy the car, that *viññāṇa* will be gone, i.e., we will not think about it anymore.
- We are reborn mainly because we have the desire to live and enjoy life. But we do not get our exact wish most of the time; if we do *dasa akusala* to get what we want in this life, we are likely to be born in the *apāyā*, regardless of what we wish for.

Mechanisms for Generating *Vipāka Viññāṇa* and *Kamma Viññāṇa*

5. *Kamma Viññāṇa* are generated in *paṭicca samuppāda* cycles; see, “[Paṭicca Samuppāda](#).” As we saw above, *kamma viññāṇa* arise due to *saṅkhāra*: “*avijjā paccayā saṅkhāra*” and “*saṅkhāra paccayā viññāṇa*.”

- Therefore, we accumulate such *kamma viññāṇa* by doing (*abhi*) *saṅkhāra* due to our ignorance (that striving to get sense pleasures can lead to a long-lasting happiness), i.e., we do not comprehend the *anicca* nature.

6. *Vipāka viññāṇa* arise via six ways due to sense inputs via the six sense faculties: “*cakkhuṅca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*,” “*sotaṅca paṭicca sadde ca uppajjati sotaviññāṇaṃ*,”...”*manaṅca paṭicca dhamme ca uppajjati manovīññāṇaṃ*.”

- In English, that means we see an object when our eyes capture light coming from that object; we hear a sound that comes to our ears, ...we get a thought in our mind.

- An example of a *mano viññāṇa* is, for example, something that happened in a previous day just popping into the mind.
- This process of the arising of the six types of *viññāṇa* is discussed in, [“Do I Have ‘A Mind’ That Is Fixed and ‘Mine’?”](#)

Based on *Vipāka Viññāṇa*, We Initiate *Kamma Viññāṇa*

7. Everything that we INITIALLY EXPERIENCE is due to a *kammā vipāka*, i.e., it comes to us as a *vipāka viññāṇa*. They make us see, hear, smell, taste, experience bodily sensations, and bring in new thoughts to the mind.

- Based on those sense inputs, we MAY initiate new *kamma viññāṇa* if those sense inputs are either attractive (leading to greed) or repulsive (leading to hate/anger). This happens via “*saṅkhāra paccayā viññāṇa*” as mentioned above.

8. If we start doing *saṅkhāra* consciously, then we start generating NEW *kamma* via the process, “*saṅkhāra paccayā viññāṇa*.” Then we would give rise to new *kamma viññāṇa*. If those *abhisāṅkhāra* are strong enough, those *kamma viññāṇa* can give rise to a special type of *vipāka viññāṇa* called *paṭisandhi viññāṇa* (responsible for rebirth).

- A *paṭisandhi viññāṇa*, which is the state of mind at the moment of grasping a new *bhava* (new existence) is a *vipāka viññāṇa*; we cannot control it.
- *Paṭisandhi viññāṇa* is A RESULT of a past *kamma* that we did with a *kamma viññāṇa* at the time of doing that *kamma*. For example, someone kills a human being with a *kamma viññāṇa*, and that gives rise to a *kamma bīja* (*kammic* energy). That *kamma bīja* can bring in a *vipāka viññāṇa* in the form of a *paṭisandhi viññāṇa* in the future.

9. This vicious cycle of “*vipāka*” leading to “*kammā*” leading to more “*vipāka*” is the process that binds us to the *samsāra* of endless rebirths, with (mostly) suffering.

- The Buddha describes this as, “*kammā vipākā vaddanti, vipāko kamma sambhavo, tasmā punabbhavo hoti, evan loko pavattati.*”
- That means, “*kammā* lead to *vipāka*, *vipāka*, in turn, lead to *kammā* and thus to rebirth (*punabbhavo*), and that is how the world (existence) is maintained.”
- There, “*sambhava*” is “*san*” + “*bhava*,” or “adding more existences.” Also, “*loka*” is the world, and “*pavatta*” means “maintain.”

10. Breaking this vicious cycle is the key to *Nibbāna*, as we point out next.

“*Yam kiñci dukkham sambhoti, Sabbam viññāṇapaccayā*” (“Whatever suffering that arises, It arises due to *viññāṇa*”)

11. There are many *suttā* that clearly state that *Nibbāna* is attained by stopping the arising of *viññāṇa* (defiled consciousness), i.e., via “*viññāṇa nirodha*.” A clear statement can be found in the [“*Dvayatānupassanāsutta \(Sutta Nipata 3.12\)*”](#):

*“Yaṃ kiñci dukkhaṃ sambhoti,
Sabbam viññāṇapaccayā;
Viññāṇassa nirodhena,
Natthi dukkhassa sambhavo.”*

Translated: “Whatever suffering that arises, all that arises due to *viññāṇa*; **With cessation (not arising) of *viññāṇa*, there is no existence with suffering.**”

- **The *viññāṇa* referred to here is *kamma viññāṇa*.** For a discussion, see, [“*Viññāṇa – What It Really Means.*”](#)

12. Of course, the way to stop *kamma viññāna* from arising is to stop doing *abhisāṅkhāra*, i.e., stop *kamma viññāna* in the step, “*saṅkhāra paccayā viññāṇa*.” That involves two steps:

- First, one needs to cultivate *paññā* and get rid of *avijjā*, so that “*avijjā paccayā saṅkhāra*” step can be avoided. One needs to comprehend the *anicca, dukkha, anatta, asubha* nature of this world.
- Secondly, one also needs to be mindful and stop such *abhisāṅkhāra* from arising to stop the rebirth process or even to stop bad *kamma vipāka* in the future.
- Both those two steps are essential; they feed on each other. The more one understands the *anicca* nature, it is easier to stop such *abhisāṅkhāra* AND the more *abhisāṅkhāra* one stops, it becomes easier to comprehend *anicca nature*.

Key Points to Remember

13. *Kamma viññāṇa* are *saṅkhata* (*sankata* in Sinhala) that we create ourselves; they are also called “*kamma bīja*.” We create them by doing *mano, vacī*, and *kāya saṅkhāra* due to our ignorance. That process is described by *paṭicca samuppāda*.

- We can stop generating *kamma viññāṇa* by being mindful and not doing *abhisāṅkhāra*, especially *apuñña abhisāṅkhāra* or immoral deeds.

14. The type of rebirth (or other *kamma vipāka*) that arise due to those *abhisāṅkhāra* are described by *paṭicca samuppāda*: they are according to the type of *abhisāṅkhāra* done: “*pati icca* leading to *sama uppāda*”; see, “[Paticca Samuppāda – “Pati+ichcha” + “Sama+uppāda”](#).”

- Then they bring *vipāka* or results in the future via *vipāka viññāṇa*. As long as one lives, one will experience those *vipāka viññāṇa*, even if one is an *Arahant*.
- However, an *Arahant* will not grasp a new *bhava* at the moment of death (at the *cuti-paṭisandhi* moment), because the “*upādāna paccayā bhava*” step will not work for an *Arahant*: He/she will not grasp any *bhava*, i.e., no *upādāna*.

15. This is a highly condensed overview. Don't be discouraged if you cannot understand some things. One needs to spend some time reading relevant posts and contemplating them. Any questions can be discussed at the discussion forum: “[Forums](#).”

3.6.11 Rūpa (Material Form)

Revised February 3, 2018

Please see, “[What are Rūpa? Relation to Nibbāna](#)” for an introduction.

Most people have many misconceptions about *rūpa*. So, we will systematically look at different kinds of *rūpa*. *Rūpa* are basically everything that the five physical senses sense: we see *vaṇṇa rūpa* (physical objects that bounce light off; also called “*rūpa rūpa*”), we hear *sadda rūpa* (sounds), we smell *gandha rūpa* (odors), we taste *rasa rūpa* (food), and we touch *pottabba rūpa* (physical objects). Our internal senses that sense those external *rūpa* are also fine *rūpa* that are controlled by the mind. Those that are sensed by the mind are *dhamma* (concepts), and mind is not a *rūpa*.

- Here is a simple way to figure out the five types of *rūpa*: If we take a toasted slice of bread that is *rūpa rūpa* or a *vaṇṇa rūpa*; if it is freshly toasted, when we break it, it will make a sound, which is a *sadda rūpa*; the smell of that bread is a *gandha rūpa*; when we taste it, we taste the *rasa rūpa* in the bread; when we touch it, we touch the *pottabba rūpa* in the bread.

There are many ways that *rūpa* can be analyzed. The basic “building blocks” of all *rūpa* are the four great elements (*mahā bhūta*): *pathavi* (element of extension with the characteristic of hardness), *āpo* (The element of cohesion with the characteristics of cohesiveness and fluidity), *tejo* (the element of heat or heat

energy with the characteristics of hotness and coldness), and *vāyo* (the element of motion or kinetic energy with the characteristics of pushing and supporting).

- It must be noted that in many cases, the Buddha took existing terms and redefined them to be consistent with Buddha Dhamma. The terms *pathavi* (earth), *āpo* (water), *tejo* (fire), and *vāyo* (wind) were thought to be the basic building blocks for matter in the pre-Buddha era, including the Greeks.
- But those names have deeper meanings too; for an in-depth discussion see, “[The Origin of Matter – Suddhatthaka](#).”

There are 28 types of basic *rūpa*, and the other 24 are derivatives (*upadaya rūpa*) of the four *mahā bhūta*.

1. *Rūpa* can be put into two categories regarding whether they are internal (*ajjhattika*) and external (*bāhira*). **The internal *rūpa* are the five *pasāda rūpa* associated with the physical body: eye (*cakkhu*), ear (*sota*), nose (*ghāṇa*), tongue (*jivhā*), and body (*kāya*).** Internal *rūpa* also include our physical body (including the physical eyes, ears, etc). Here are a few things to note: [*bāhira* : [adj.] external; outer; foreign. (nt.), outside.]

- These five internal or *pasāda rūpa* are essential for experiencing the outside world. Without them, people will not be different from inanimate logs. Those internal *rūpa* associated with the physical body become inert (and external) when the *gandhabba* leaves the body.
- It must be emphasized that *pasāda rūpa* are NOT the physical organs that we see. These are fine *rūpa* (matter) that stop being regenerated at death. Thus *cakkhu* is NOT the physical eye.
- From the moment of death of the physical body, *cakkhu* is not there anymore; it is gone with the *gandhabba*. However, the physical eye is there and can be even used in another person’s body within 24 hours or so.
- Therefore, those physical senses are internal only as long as the *gandhabba* is associated with the physical body. As soon as *gandhabba* leaves at the death of the physical body, they become external *rūpa*.

2. Out of all the external (*bāhira* or *bahiddhā*) *rūpa*, seven are called *gocara rūpa* or objective *rūpa* because those are the ones that can be sensed by the five internal (*pasāda*) *rūpa*.

- These are: visible (*vaṇṇa*) *rūpa*, sound (*sadda*) *rūpa*, smell (*gandha*) *rūpa*, taste (*rasa*) *rūpa*, and tangible *rūpa* (*phoṭṭhabba*). There are no separate *rūpā* called *phoṭṭhabba rūpa*; they are *pathavi*, *tejo*, and *vāyo*, three of the four great elements (*mahā bhūta*). Thus things we see with our eyes are the visible (*vaṇṇa*) *rūpā*; they are only part of the class of *rūpa*.
- It is important to note that the *gocara rūpa* or objective *rūpa* are the only *rūpa* that we EXPERIENCE with our five physical senses. For example the remaining great essential, *āpo*, is not experienced by our senses.
- The five *pasāda rūpa* and the seven *gocara rūpa* that are sensed by them are collectively called the *olarika* (gross or coarse) *rūpas* because they can touch (strike) each other. The other 16 *rūpas* are subtle or fine (*sukhuma*) *rūpa*.

3. There are several fine *rūpā* that are associated with our body.

- *Hadaya vatthu* (heart base) – together with the five *pasāda rūpa* — are located close to the heart.
- *Jivitindriya rūpa* (vital force of *kammaja rūpa*) is spread throughout the body.
- There are two *bhava rūpā* that determine whether it is a male or a female: *itthi bhava* (femininity) and *purisa bhava* (masculinity). One kind is spread throughout a body.
- *Āhāra rūpa* (*oja*) are nutritive essence that sustains the body. It is extracted from the food we eat.

4. So far we have discussed five *pasāda rūpā*, seven *rūpā* that constitute the external *rūpa* (*vaṇṇa*, *sadda*, *rasa*, *gandha*, *pathavi*, *tejo*, *vāyo*) that are sensed by the *pasāda rūpa*, and the five other *rūpa* (*hadaya*, *jivīndriya*, two *bhava rūpa*, and *oja*) in #3.

5. The remaining *mahā bhūta* or the great element is *āpo*. It is the *rūpa* that holds any structure together, but it is not sensed by the body (*kaya*) *rūpa*. With the *āpo rūpa*, up to this point we have discussed 18 types of *rūpa*. **These 18 types of *rūpa* are called *nippanna rūpa* (concretely produced *rūpa*) because they are caused and conditioned by one or more of four things: *kamma*, *citta*, *utu* (*tejo*) and *āhāra* (food);** thus they are suitable for contemplation by insight.

- The five *pasāda rūpa*, two *bhava rūpa*, *hadaya vatthu* and *jivīndriya rūpa* (9 in all) are produced by *kamma* and *kamma* alone.
- *Sadda* (sound) *rūpa* are produced by *citta* and *utu* (*tejo*). Vocal sounds such as speech, laughter, whistling, etc are produced by *citta*. Non-vocal sounds, such as thunder and music from instruments are produced by *utu*.
- The different ways that *kamma*, *citta*, *utu*, and *āhāra* produce the 24 types of *rūpa* is summarized in the Tables and Summaries Section; see, "[Rūpa – Generation Mechanisms](#)."

6. **The remaining 10 *rūpa* are more abstract in nature. They are called *anippana rūpa* (non-concretely produced *rūpa*).**

- *Akasa dhātu* (space element) is not so much "space", but more like the inter-atomic space or intra-atomic space. It occupies whatever is not occupied by any other *rūpa*. Thus it is everywhere, even in the deep inter-galactic space where there is no "detectable matter." Scientists are beginning to suspect that there is much more energy in the vacuum (zero point energy) than the energy that we experience. It is like the deep ocean and what we see are only the ripples.
- We communicate using two fine *rūpā*: *vinnatti rūpa* or material qualities of communication. We use both the mouth and the body to communicate with each other. *Kāya vinnatti* (bodily intimation) is gestures by hand, head, physical eye, leg, etc, to indicate one's intentions to another. *Vacī vinnatti* (vocal intimation) is the movement of the mouth to produce vocal speech.
- There are three *vikāra* (mutable) *rūpa* that helps with the movements of the body. The *lahuta* (lightness or buoyancy) *rūpa* suppresses the heaviness of a body. This make it possible for up jump, for example. Imagine trying to toss up an equivalent weight! *Muduta* (elasticity) removes the stiffness in the body. *Kammannata* (weildiness) gives strength to hold up body parts. All these make possible our body movements.
- Finally, there are four *lakkhana* (material qualities) *rūpa* that are common characteristics of all *rūpas*: *Upacaya* and *santati rūpa* are associated with the arising of a *rūpa*, *jarata rūpa* is associated with the decay, and *aniccata rūpa* is the dissolving stage. See the lifetime discussed below.

7. The four great elements (*mahā bhūta*) are the primary *rūpa*. Each of the four has its own character: *pathavi* element of hardness; the *āpo* element of fluidity and cohesion; *tejo* of heat; *vāyo* of motion and pressure.

8. The *mahā bhūta* can never be detected separately. The eight *rūpa* of *pathavi*, *āpo*, *tejo*, *vāyo*, are always found together with *vaṇṇa*, *gandha*, *rasa*, *oja* in inseparable units called **pure octads or *suddhatthaka***, which are the fundamental units of matter. These eight *rūpā* are inseparable and indivisible, and thus are known as *avinibbhoga rūpa*; for an in-depth discussion see, "[The Origin of Matter – Suddhatthaka](#)"

9. It is not necessary to memorize all these details about different *rūpa*. But it is good to have a reference base to look up if needed. Abhidhamma goes to much more detail and shows how the mental energy can form different kinds of *rūpa*.

If you have not read about *saṅkhāra* (the remaining one of the five aggregates):

“[Saṅkhāra, Kamma, Kamma Vipāka, Kamma Bīja](#)”,

3.6.12 Pañcakkhandha or Five Aggregates – A Misinterpreted Concept

December 25, 2015; revised September 29, 2018

First of all, many people have the impression that *rūpakkkhandha* is one’s own body OR that *pañcakkhandha* are “in one’s own body.” The problem with this critical mistake can be seen with the description of *rūpakkkhandha* (and other four *khandha* as 11 types).

Eleven Types of *Rūpa* in the *Rūpakkkhandha* (Same for Other *Khandhas*)

1. This is clearly described in many *suttā*, even though the true meaning has been hidden all these years. In particular, the [WedLink: suttacentral: Khandha sutta \(SN 22.48\)](#) summarizes what is included in each aggregate.

- Eleven types of *rūpa* (mental impressions) are in the *rūpakkkhandha*: past, present, future, near, far, fine (*sukuma*), coarse (*olarika*), likes (*panita*), dislikes (*appanita*), internal (*ajjhatta*), and external (*bahiddha*). Here internal *rūpa* means (mental impressions) of one’s own body parts, and external *rūpa* are (mental impressions) of external objects.
- Thus, it is quite clear that *rūpakkkhandha* encompasses anything that we ever saw (including previous births), we are seeing now, and hope to see in the future. The record of what belongs to the past is permanent and is called *namagotta*. Any *rūpa* about the future (for example, a sketch of the type of house one is thinking about building) can change with time.
- Other four *khandhas* have the same 11 types.
- An acceptable English translation of the *Khandha sutta* is available online: [WedLink: suttacentral: Khandha Sutta: Aggregates](#)
- Even though it does not explain the concept as discussed above, one can see the 11 components of each *khandha* are clearly there. Also, note that it is NOT *Skandha sutta*; it is *Khandha sutta*. This is why I say that *skandha* is a WRONG TERM.

2. Now we can see yet again that Buddha Dhamma has become so contaminated over the past thousands of years. Fortunately, we still have the *Tipiṭaka* in close to original form. The Buddha stated that his *Buddha Sasana* will last for 5000 years, and the way he made sure that will happen, was to compose the *suttā* as I described in the post, “[Sutta – Introduction](#).”

- Furthermore, *abhidhamma* and *vinaya* sections, as well as three original commentaries, are still intact in the *Tipiṭaka*; see, “[Preservation of the Dhamma](#)” and other posts in “[Historical Background](#).”
- The main problem even with the *Theravada* version of “Buddhism” is that instead of using the *Tipiṭaka* as the basis, the tendency is to use the *Visuddhimagga* written by Buddhaghosa, who had not attained any *magga phala* and stated that his “wish” was to become a *deva* in the next life from the merits he gained by writing *Visuddhimagga*!
- Even when using the *Tipiṭaka*, most people use the wrong interpretations of key words such as *anicca*, *dukkha*, *anatta*, as well as *khandha*, and *paṭicca samuppāda*. This problem is apparent in the Sinhala translation of the *Tipiṭaka*, that was done with the sponsorship of the Sri Lankan government several years ago.

Rūpa and *Rūpakkkhandha* – The Difference

1. **Contrary to popular belief, *pañcakkhandha* or *panca khandha* (five aggregates) is all mental, and realizing this fact can help get rid of the “*ghana saññā*,” the perception that the world around us is “solid and permanent”‘ I will write more on this later.**

- It is sometimes erroneously called *pancaskhandha*, and I will explain why that is not correct.

2. For example, there is a huge difference between *rūpa* (material form) and *rūpa khandha*, the aggregate of material form. *Rūpa khandha* is commonly written as *rūpakkkhandha* by connecting the two terms to one word, by adding an extra “k” (a common way of connecting words or “*sandhi*” in Pāli). **The same is true for other four aggregates. The correct interpretation makes many other concepts easier to understand.**

- *Rūpa* is matter (and energy) and is made of the *satara mahā bhūta* (*pathavi, āpo, tejo, vāyo*) and their derivatives.
- *Rūpa khandha* is all MENTAL.
- Similarly, there is a difference between *vedanā* (feelings) and *vedanakkhandha* (the aggregate of feelings), even though here both kinds are mental; we will discuss the difference below. The other three *khandha* of *saññā, saṅkhāra,* and *viññāṇa* are similar to that of *vedanā*.
- **This is very important to understand, and I will proceed slowly to make the concepts clear.**

3. The key in clarifying what *rūpakkkhandha* is to examine why the Buddha added “*khandha*” to *rūpa*. He could have labelled past *rūpa*, future *rūpa*, *sukuma rūpa*, *olarika rūpa*, etc. to describe the 11 types of them as discussed above. What was the need to add “*khandha*”? **That is because *rūpakkkhandha* is all MENTAL**, and to see how it comes about we need to examine how each of us experience “the world.” Each of us does it differently.

- Each person has his/her own *rūpakkkhandha* or the way he/she perceives the material *rūpa* in the world. That *rūpakkkhandha* has associated with it other four *khandhas* and thus comprise the *pañcakkhandha*. And *panca upadanakkhandha*, or what one has cravings for, is a small part of that.
- Just like the concept of *anicca*, this again is a very important concept to understand, so please try to read through slowly at a quiet time and grasp the concepts. As the Buddha said, “at the end what matters is understanding a concept, not memorizing words.”
- When I first grasped this concept, it was like turning the lights on in a previously dark area that I did not even know existed! This is a good example of what the Buddha meant by “*aloko udapādi*.”

What is a *Khandha*?

1. One of the main problems we have today is that many key terms in use are in Sanskrit rather than original Pāli. The meanings get distorted. A good example is *paṭicca samuppāda*, for which the Sanskrit term is *pratityasamutpada*, which does not convey the meaning; see, “[Paticca Samuppāda – “Pati+ichcha”+“Sama+uppāda.](#)”

2. Similarly, the Sanskrit term “*skandha*” is commonly used in the place of *khandha*, the original Pāli term. *Khandha* is a heap and the Sinhala term is *kanda*, which is even used today to denote a heap or a pile.

- When we experience the world, we do that with our six senses, and that experience is registered as thoughts (*citta*). But a single *citta* is born and gone in a small fraction of a second. What we EXPERIENCE are the **aggregates of numerous *citta*** that go through our minds even in a fraction of a second.
- We experience a *rūpa* (sight, sound, smell, taste, touch, *dhamma*) with a *citta* AND based on that generate mental qualities of *vedanā, saññā, saṅkhāra,* and *viññāṇa*. In each *citta*, the mind analyzes all these, and that *citta* is gone in a fraction of a second.

- The *manasikara cetasika* that is in each *citta* puts together the contents in all these “packets” — including our past impressions — and provides us with an overall experience that includes a “sketch of what we see, hear, ..”, and those feelings, perceptions etc that arise due to that sense impression.
- This can be compared to the process of connecting individual links in a metal chain. In the old days, blacksmiths used to make chains by manually connecting one link to the next by hand. He can only see himself linking two of them at a time, but if he looked back he could see the whole chain that is being made. **In the same way, the five aggregates or heaps keep building up with each passing second.**

3. In another example, it is like a movie recording that keeps recording non-stop from our birth to death. And when we die it does not stop, it just start recording the new life. And these five heaps or aggregates that have accumulated over ALL previous lives are in the *namagotta*, a permanent record; see, “[The Amazing Mind – Critical Role of Nāmagotta \(Memories\)](#).”

- Of course, we remember only a fraction of it, even for the present life. But some people remember more things than others; see, “[Recent Evidence for Unbroken Memory Records \(HSAM\)](#).”
- But we also make plans about the future. And those heaps about the future are also in the *pañcakkhandha*, but not in the *namagotta*, which only has records of what has already happened. As soon as the present moment goes by, more of the five heaps are added to the *namagotta*.
- Thus *pañcakkhandha* includes past, present, and future, whereas *namagotta* includes only that portion of the *pañcakkhandha* that has gone to the past.
- Even though I have discussed these concepts in the introductory posts in the *Abhidhamma* section, here I will go through a simpler version to get the ideas across. Those who are interested, can then review the posts in *Abhidhamma* section as well; see, “[Essential Abhidhamma – The Basics](#).”

What We Experience Comes in “Packets” or “Heaps” or “Khandha”

1. A simple view of how we sense the outside world is as follows: The five physical senses receive images, sounds, smells, tastes, and touches from the outside. Those sense inputs are sent to the brain via the nervous system. The brain analyzes such “signals” and helps the mind (*hadaya vatthu*) to extract the “meanings” conveyed by those images, sounds, smells, tastes, and touches.

- Let us take an example of looking at a cake. The eye is like a camera; it captures an image of the cake just like a camera does. That image is sent to the brain and the brain analyzes that picture, and sends to the mind (*hadaya vatthu*), which matches it with previous experiences (*manasikara cetasika* does this) and identifies it as a chocolate cake made by grandma. The brain and mind working together this way can analyze many such pictures in a fraction of a second.
- This is basically what scientists believe what happens too; but the difference is that scientists believe that the brain compares the current image of the cake with zillions of images “stored in the brain”, which I say is an impossibility. The brain needs to scan through “its depository of images” and not only identify that it is not a loaf of bread or a piece of wood, but also what kind of a cake it is, and whether it is made by grandma or bought from a store. And this is done within a fraction of a second. Think about it! This is real *vipassana* meditation! What we are trying to do is to understand how nature works.

2. In Buddha Dhamma, the brain is in constant communication with the “*hadaya vatthu*” which is the seat of the mind. All our past experiences are “stored” in the mental plane (*manothalaya*) and *hadaya vatthu* can access that information; these are what we called “*namagotta*.” See, “[Our Two Worlds: Material and Immaterial](#).”

How the brain is in constant communication with the *hadaya vatthu* and other details are discussed in the *Abhidhamma* section. Those details are not important as long as one can picture this process in one’s mind.

- This image sent by the eyes (and the brain) to the *hadaya vatthu* generates an imprint of **that image** and it goes into memory. **That image is the *rūpakkhandha* generated by that object**, the cake in our example; **it is not material, it is a record.**
- If it was a smell that was analyzed, then a record of that smell is made. Thus the *rūpakkhandha* here is a **record** of that particular smell. **In this way, *rūpakkhandha* are just records or imprints.** All five physical senses help generate *rūpakkhandha*; **remember that sight, sound, smell, taste, touch are all *rūpa*.**
- What the mind receives is a set of static frames in a given second. Many such records for various sense inputs go through our minds in a second. The mind is able to make this appear to us as a continuous movie, with pictures, sounds, tastes, etc flowing smoothly.

Animation Video

1. Just to give the flavor of what happens, we can look at what happens when we watch a movie. The movie is a series of static pictures or frames. When making a movie, what is actually done is to take many static pictures and then play them back at fast enough speed. If the playback speed is too slow, we can see individual pictures, but above a certain “projection rate”, it looks like real motion. Here is a video that illustrates this well:

[WebLink: YOUTUBE: Animation basics: The optical illusion of motion](#)

2. When we experience (see, hear,...) the outside world, what happens is very similar to the above. At the end of the video it is stated that the “movie” we see is an illusion, **and as the Buddha explained, that holds for real life as well.** In real life when we see someone coming towards us, what we actually see is a series of “static pictures” or *citta* projected at a very fast rate in our minds, giving us the illusion of a “movie like experience.”

- Even though in the above video it is suggested that all the information from the “previous static frames” were put together by the brain, that is true only to a certain extent.
- The brain does put together the individual frames, but without actual “memories” it is not possible to get the deep details about what is seen.
- **We not only “see” the video, but we also RECOGNIZE what is seen (we identify a given actor, we can even remember previous movies with that actor, we KNOW all about the scenes in the background, etc); to have all that information instantly available to the brain is not possible. This is a point that needs a lot of thought.**
- What happens according to *Abhidhamma*, is that the brain periodically sends packets of acquired data put together by the cortex in the brain to the *hadaya vatthu*, which is basically the seat of the mind. There *citta vīthi* arise in accepting that information from the brain, and it is the mind that does all the compiling (with the help of the *manasikara* and *cetana cetasika*) and that is how we EXPERIENCE any sense input.
- For those who are interested in more details, see, “[Citta and Cetasika – How Viññāna \(Consciousness\) Arises.](#)”

3. When the mind analyzes those packets of information sent by the brain with *cittā*, it generates feelings (*vedanā*), perception (*saññā*), and follow-up thoughts (*viññāṇa*); if the mind likes/dislikes that sense input it may decide to act on it by generating *saṅkhāra*.

- Thus we can see that depending on the nature of the sense input, the mind will generate a “packet” of *vedanā* (i.e., *vadanakkhandha*), a “packet” of *saññā* (*sannakkhandha*), a “packet” of *saṅkhāra* (*sankharakkhandha*), a “packet” of *viññāṇa* (*vinnanakkhandha*), in addition to the *rūpakkhandha* that was involved in the sense input. Actually all these five *khandhas* are generated within the same series of *citta*.

Our Experience is Stored in Those Khandhas

1. Thus our experiences are stored in five type of “heaps” (*rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*) in the mental plane (*manothalaya*). Some of these “clips” or “packets” from those five heaps or aggregates can be recalled and played back in our minds just like a movie is played back on a screen. When we do that we can recall that particular experience with sights, sounds, etc.

- It is the sum of all such packets of a given kind that is called a *khandha*, for example, a *rūpakkkhandha*. All these are our **memory records** of what we see, hear, smell, taste, touch, and also think.
- The ability to recall past experiences, we call memory. Some have better memories than others. There are some people who can “playback” basically one’s life day-by-day for many years into the past; see, “[Recent Evidence for Unbroken Memory Records \(HSAM\)](#).” It is amazing to see how much they can recall.
- Yet, one can recall not only memories from this life, but also from past lives by developing *abhiññā* powers. Thus the Buddha Gotama was able to describe in vivid detail the scene, eons ago, when the Buddha Deepankara stated that he was to become a Buddha in the future.
- But let us get back to the main discussion.

2. The brain analyzes multiple sense inputs of different kinds in a second. When we watch a movie, we see the picture, hear the sounds, and if we are eating popcorn we can smell and taste popcorn too; see, “[What is a Thought?](#).” Even if you are not familiar with *Abhidhamma*, you can get a good idea of what happens by reading that post. Just try to get the overall picture of what happens instead of trying to analyze in detail.

- Thus our perception of an object is due to the sum of many thoughts (*cittā*) that arise per second. And **each *citta*** has “embedded in it”, our feelings (*vedanā*), perceptions (*saññā*), our decisions on how to act (*saṅkhāra*), and our overall sense experience (*viññāṇa*). In the case of a visual, auditory, ... event, we also have the corresponding “imprints of them” in our mind.
- **In other words, all our sense experiences can be described by five heaps or *khandhas*. The totality of our experience or “our world” is *panca khandha* (*pañcakkhandha*). And it has nothing to do with our physical bodies.**
- Thus it is important to understand that “*rūpa*” can used in the sense of “matter” and also in the sense of “records of those material *rūpa*.”

3. **These mental components are what the Buddha called *khandhas*.** *Rūpakkkhandha* does not include actual material objects, sounds, smells, tastes, or touches. **Rather *rūpa khandha* includes only the mental records or imprints of those sense inputs.**

- During our life, we continuously accumulate such *khandhas* or bundles of heaps of sense imprints. Thus a *rūpa khandha* or *rūpakkkhandha* (note how the two words were connected by inserting an additional “k”) is not actual *rūpa*, but our mental images of such *rūpa*.
- Similarly, we keep accumulating bundles of *vedanā* (*vedanakkhandha*), *saññā* (*sannakkhandha*), *saṅkhāra* (*sankharakkhandha*), and *viññāṇa* (*vinnanakkhandha*).

4. **In fact, these *khandhas* are all that we have ever experienced, and would like to experience in the future.** The five *khandhas* encompass our (changing) identity, and our sense of the whole world out there. They have embedded in them all our past experiences and also future hopes.

- This is what was meant by saying that *pancakkhadha* (the five aggregates) is our whole world.
- And these records can go back to beginningless time! Some people can recall more past records than others, but by gradually developing *abhiññā* powers, one can recall more and more past lives.

Eleven Types of Rūpa in the Rūpakkhanda (Same for Other Khandhas)

1. This is clearly described in many *suttā*, even though the true meaning has been hidden all these years. In particular, the *Khandha sutta* summarizes what is included in each aggregate.

- Eleven types of *rūpa* (mental impressions) are in the *rūpakkhanda*: past, present, future, near, far, fine (*sukuma*), coarse (*olarika*), likes (*paneeta*), dislikes (*appaneeta*), internal (*ajjatta*), and external (*bahidda*). Here internal *rūpa* means (impressions) of one's own body parts, and external *rūpa* are (impressions) of external objects.
- Thus, it is quite clear that *rūpakkhanda* encompasses anything that we ever saw (including previous births), we are seeing now, and hope to see in the future. The record of what belongs to the past is permanent and is called *namagotta*. Any *rūpa* about the future (for example, a sketch of the type of house one is thinking about building) can change with time.
- Other four *khandhas* have the same 11 types.
- A short version of the *Khandha sutta* is available online: [WebLink: accesstoinight.org: Khandha Sutta: Aggregates](http://www.accesstoinight.org/Khandha_Sutta_Aggregates)
- Even though it does not explain the concept as discussed above, one can see the 11 components of each *khandha* are clearly there. **Also, note that it is NOT *Skandha sutta*; it is *Khandha sutta*. This is why I say that *skandha* is a WRONG TERM.**

2. Now we can see yet again that Buddha Dhamma has become so contaminated over the past thousands of years. Fortunately, we still have the *Tipiṭaka* in close to original form. The Buddha stated that his *Buddha Sāsana* will last for 5000 years, and the way he made sure that will happen, was to compose the *suttā* as I described in the post, "[Sutta – Introduction](#)."

- Furthermore, *abhidhamma* and *vinaya* sections, as well as three original commentaries, are still intact in the *Tipiṭaka*; see, "[Preservation of the Dhamma](#)" and other posts in "[Historical Background](#)."
- The main problem even with the *Theravāda* version of "Buddhism" is that instead of using the *Tipiṭaka* as the basis, the tendency is to use the *Visuddhimagga* written by Buddhaghosa, who had not attained any *magga phala* and stated that his "wish" was to become a *deva* in the next life from the merits he gained by writing *Visuddhimagga*!
- Even when using the *Tipiṭaka*, most people use the wrong interpretations of key words such as *anicca*, *dukkha*, *anatta*, as well as *khandha*, and *paṭicca samuppāda*. This problem is apparent in the Sinhala translation of the *Tipiṭaka*, that was done with the sponsorship of the Sri Lankan government several years ago.

Part 2: [Pancupādānakkhandha – It is All Mental](#)

3.6.13 Pañcaupādānakkhandha – It is All Mental

January 1, 2016; revised November 2, 2017, June 28, 2019

Rūpa and *Rūpakkhanda* are two different things. There are *rūpa* made up of "physical matter" (*suddhaṭṭhaka*) in the *rūpa loka*. ***Rūpakkhanda* consists of each person's memories, hopes, and desires for some of the *rūpa* in the *rūpa loka*.** Since the other four *khandha* (*vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*) are all mental anyway, all five are MENTAL.

1. In the previous post, "[Pañcakkhandha or Five Aggregates – A Misinterpreted Concept](#)," we discussed a deeper meaning of the *pañca khandha* or the five heaps or the five aggregates that define a given living being. Each person's *pañca khandha* or the "world" is different from another's.

- **Of course, in the 31 realms of existence there are *rūpa*, or material (and energy).** But our experiences are all mental (which also has energy). Please read the previous post again if you think

rūpakkkhandha is material. ***Rūpakkkhandha* consists of our thoughts, memories, perceptions, desires, etc. on *rūpa* that we have experienced, are experiencing now, and hope to experience in the future. We have those “imprints of *rūpa*” in our minds even if we cannot recall all of them.**

- We experience the “material world” only at the “present time” (in a *citta vūthi*), then it is gone. We actually experience not a single *citta* — or even a single *citta vūthi* — but the overall effect of many *citta vūthi* that run in the blink of an eye.
2. This “overall experience of seeing” within a short time is what we actually call seeing (*ditta*). Same for hearing (*suta*). For the other three physical senses (*muta*), it can be there as long as we are actually experiencing them.
- For example, when we are eating a meal, the sense contact is there until we finish eating. When we have a headache (an actual *dukha vedanā*) or while getting a massage (an actual *sukha vedanā*), the sense experience is there for a while.
 - But thinking about them (*vinnāta*) — via the sixth sense, the mind — can be experienced at any time; we can recall a past experience or conjure up an enticing future experience.
 - *Ditta*, *suta*, *muta*, *vinnata* include everything that we experience. They are re-categorized as *rūpa*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* or the five heaps.
 - It is not necessary to memorize terms like *ditta*, *suta*, *muta*, *vinnata*. I am merely naming them to avoid any confusion, since those terms are in the *suttā*. With time, one will remember.
3. *Upādāna* (“*upa*” + “*ādāna*” where “*upa*” means “close” and “*ādāna*” means “pull”) means “pull and keep close.” **One tries to pull and keep close only things that one really desires: *pañca upādāna khandha* or *pañcaupādānakkhandha*.** We can translate the term, *pañcaupādānakkhandha*, as “five clinging aggregates.”
- Thus out of an infinite variety of “things (material and mental)” one has experienced (not only in this life, but in all of existence countless rebirths) — *pañcakkhandha* —, those that one really have bonding with, and have the desire to “keep close” are *pañca upādāna khandha* or *pañcaupādānakkhandha*. **It is important to realize that “*rūpakkkhandha*” is mental too;** see, “[Difference Between *Rūpa* and *Rūpakkkhandha*](#).” Same for the other four *khandhas*.
 - Thus *pañcaupādānakkhandha* is what we desire, and is ALL MENTAL too. It is a small fraction of *pañcakkhandha*.
4. First, let us dig a bit deeper into the concept of *pañca khandha* (five heaps) or *pañcakkhandha*. Then one can see connections to other concepts at a deeper level.
- As we recall, the five heaps include everything that one has experienced (*rūpa*, *vedanā*, *saññā*, *saṅkhāra*, *viññāṇa*) in the past, one is experiencing right now, and one hopes to experience in the future and in each of these three categories, they can be subdivided into other categories like *paneeta* (likes) and *appaneeta* (dislikes); see the previous post.
 - Since each person’s experience is unique, one’s *pañcakkhandha* is unique, and is different from that of another living being. That is because even if the **external *rūpa* are the same**, the mental impressions are different.
5. A new born baby, does not have much of an experience in this life (other than some while in the womb). But he/she still have an infinite things from the past in those five heaps or aggregates.
- As the baby grows, its *pañcakkhandha* grows each day, adding to the five heaps not only with what is experienced, but also expectations and desires about the future.
 - We, of course, remember only a fraction of what is in our *pañcakkhandha* even from our present life. Each day, we experience many things and forget most of it by the next day.

6. However, some of deeper desires and habits and character remain, sometimes even unknown to us, beneath the surface as our *gathi* and *āsavas* (by the way, those will be reflected in the *cetasika* that automatically arise with our *citta*). As that baby grows, depending on its parents, friends, and other environmental factors, some of those (good and bad) *gathi* resurface and even grow.

- This is why each person is good at some things. If one has musical talent from the past lives, that child can flourish in an environment that provides suitable conditions. If that baby grows in a family that does not provide “a musical environment”, then that *gathi* is kept hidden.
- Similarly, one who had the tendency to like alcohol, may be kept out of that habit in a family environment that looks down upon drinking. We can think about zillion other character features that can be suppressed or brought to surface to flourish depending on the environment.
- This is why some people, who have not shown any talent for anything for many years, suddenly “take off and thrive” in a new venture. Stated in another way, one may not realize that “one has *upādāna*” for certain things, unless exposed to it.
- We all have good and bad things that we have “*upādāna*” for. We should stay away from bad ones (forcibly if needed to) and find and cultivate good ones. This is why parent and teachers can play a big role in a child’s future.
- Eventually, we need to lose “*upādāna*” for everything, but that comes much later in the Path when one has attained the *Anāgāmī* stage, or at least the *Sakadāgāmī* stage of *Nibbāna*. First we need to lose “*upādāna*” for the highly immoral activities. At the *Sotāpanna* stage, one realizes the perils of “*upādāna*” for only the worst habits that makes one eligible to be born in the *apāyā*. It is a gradual process.

7. The tendency to recreate past experiences and future desires need to be clearly distinguished from the ABILITY TO RECALL past experiences. The Buddha was able to recall things that happened trillions of years ago, but did not either enjoy them or had a revulsion to them.

- As we discussed in the section, “[Assāda, Ādīnava, Nissarana](#),” *kāma* (or more precisely *kāma rāga*) is the tendency to enjoy such mind-made pleasures from the past or future.
- Each person’s set of *pañca upādāna khandha* has embedded in them the certain types of things and events they give priority to, i.e., one’s *gathi* and *anusaya*. They **automatically** come out as particular set of *cetasika* (hate and fearlessness of doing immoral things, for example) in our *citta* or thoughts.
- Those *kāma rāga* that correspond to *gathi* in the *apāyā* can lead to rebirth in the *apāyā*.
- *Rūpa rāga* and *arūpa rāga* are the tendencies to enjoy *jhānic* pleasures corresponding to *rūpa* and *arūpa* realms.

8. Thus now we can see *Nibbāna* in terms of *pañcaupādānakkhandha*. As one sheds “*upādāna*” for *gathi* corresponding to the *apāyā*, higher *kāma loka*, and *rūpa* or *arūpa loka* successively, one attains the *Sotāpanna*, *Anāgāmī* (via *Sakadāgāmī* stage), and the *Arahant* stage respectively.

- As one keeps shedding layers of *pañcaupādānakkhandha*, one proceeds to higher stages of *Nibbāna*, and upon attaining the *Arahant* stage loses all “*upādāna*” and thus *pañcaupādānakkhandha*. However, the *pañcakkhandha* remains, and upon the death all of it will stay in the *nāma loka* as *nāma gotta*.
- Thus anyone with sufficient *abhiññā* powers can examine those *nāma gotta*. That is how the Buddha Gotama described the lives of many previous Buddhas, and we learn about them today.

9. Unless one has attained the *Sotāpanna* stage, it is possible for “*apāya gathi*” to come to the surface (as *cetasika* like greed, shamelessness in doing immoral things, etc in our *citta* or thoughts), especially under extreme conditions. We all have been in the *apāyā* uncountable times, so it is not something to be speculated; we have had those *gathi*, and it is possible that they can resurface. This is the danger that we need to realize.

- Even if we manage to avoid such “extreme conditions” in this life because we have been fortunate to be born under good conditions, we have no idea where we will be born in the future. This is why the Buddha said, “..*appamadena sampadeta*” or “make haste and sort out ‘*san*’ or what to do and what not to do.”

10. As we mentioned in the beginning, each one’s *pañcakkhandha* is unique. Each has his/her own feelings, perceptions, mental attributes (good and bad), and *viññāṇa* regarding any sense event. We make our decisions accordingly. **Our character (*gathi*) is in *pañcakkhandha* (the way we see and comprehend the world) and even more so in our *pañcaupādānakkhandha* (our desires for the worldly things).**

- And *diṭṭhi* (our world views) is a critical part of both *pañcakkhandha* and *pañcaupādānakkhandha*. Our decisions depend critically on our *diṭṭhi*. There are many posts at the site on the importance of *diṭṭhi*. The first step to *Nibbāna* (the *Sotāpanna* stage) is *sammā diṭṭhi*.
- Unless one comprehends the true nature of this world of 31 realms (*anicca, dukkha, anatta*), one cannot attain *sammā diṭṭhi* at least to some extent.

11. When one acts with *avijjā* (due to not comprehending the true nature of the world), one does (*abhi*) *saṅkhāra*, and keeps adding to the *pañcaupādānakkhandha*.

- When we start with the “*avijjā paccayā saṅkhāra*” step, it leads to “*upādāna paccayā bhava*.” Thus according the types of (*abhi*) *saṅkhāra* one does, one makes “bonding” or “attaches to” certain types of “*bhava*” or existence.
- *Paṭicca samuppāda* explains how we make *bhava* according to the level of *avijjā* (as indicated by our *gathi, anusaya*, etc) that is embedded in our *pañcaupādānakkhandha*.
- Thus, one’s *pañcaupādānakkhandha* has embedded in it the “cravings and desires” of oneself, and where one is destined to have rebirths.

12. Therefore, we can see that no matter how we analyze things, they all converge to the same fundamentals. Before we embark on the journey to safety (*Nibbāna*, or at least the *Sotāpanna* stage), we need to figure out the “lay of the land.” That is *anicca, dukkha, anatta*, the nature of this world.

- Only then that our minds will willingly give up the *diṭṭhis* or wrong views.
- Only then that our minds will see the dangers of sense pleasures, starting at the excess levels of *kāma chanda* and *vyāpāda*, which could lead to rebirth in the *apāyā*.
- If you could not grasp everything, that is fine. Come back and read the post again later, especially after reading other relevant posts. Each time you read, you may be able to grasp something that was not unclear. It happens to me all the time. When the minds starts grasping at least partly, it will become much easier.

13. It is very important to see the difference between the “physical world” which is made of “*satara mahā bhūta*” and the *pañcakkhandha* which is all mental.

- **The physical world out there is the same for all of us. But our mental impressions of it (*pañcakkhandha*) are different for each of us.** It is easy to see that our feelings, perceptions, and *saṅkhāra* that we create upon seeing the same person are different.
- Our *pañcaupādānakkhandha*, or the fraction of the *pañcakkhandha* that we have attachment for, is even more personal, unique for each person.

IV Living Dhamma

August 26, 2016

An experience-based process of practicing Buddha Dhamma (Buddhism) is discussed with English discourses. Belief in rebirth process is not needed at beginning.

4.1.1 Four Noble Truths – Suffering and Its Elimination

January 6, 2019

Introduction

1. The First Noble Truth is about the suffering that can be eliminated from arising.

- The second describes how suffering arises, due to our own cravings (**which we manifest via our own *saṅkhāra* that we generate willingly, as we have discussed**; see, “[Saṅkhāra – What It Really Means](#)”). I will write a simpler version in the next post.
- The Third Noble Truth says that future suffering can be stopped by eliminating those cravings. That REQUIRES and understanding of the wider world view of the Buddha with the rebirth process within the 31 realms.
- The Forth Noble Truth is the way to acquire that understanding by “learning and living” that *Dhammā* (by following the Noble Eightfold Path).

2. The Buddha said, “my *Dhammā* has not been known in this world. This *Dhammā* has never been heard of previously.”

- What is new about knowing that there is suffering around us? Everybody knows that there is suffering with old age, diseases, poverty, etc. One does not have to be a Buddhist to see that.
- **So, we need to figure out “what is new” about suffering that is explained in the First Noble Truth.**

The First Noble Truth – What is Suffering

3. I have discussed the First Noble Truth in the post, “[Essence of Buddhism – In the First Sutta](#).” Summary:

“Birth is suffering, getting old is suffering, getting sick is suffering, dying is suffering. Having to associate with things that one does not like is suffering and having to separate from those things one likes is suffering. **If one**

does not get what one likes (*iccha*), that is suffering – Doing worldly activities (*saṃkhittena*) to get all those things one craves for (*pañcupādānakkhandha*) is suffering.

- There is a deeper meaning in the part, “**If one does not get what one likes (*iccha*), that is suffering,**” that is connected to the *anicca* nature.
- That deeper meaning is expressed in terms of *taṇhā* (craving) is expressed in the final part, “**Doing worldly activities (*saṃkhittena*) to get all those things one craves for (*pañcupādānakkhandha*) is suffering.**”

4. Just as in science, something comes about due to causes. Our present life as a human has come about due to causes (*kamma*) done in the past. Some of those were “good *kamma*” and that is why we can enjoy some pleasures. Bad *kamma* have led to instances of suffering.

- But there are lower realms, including the animal realm, where suffering is much higher. Bad *kamma* lead to such births.
- **Suffering in the four lowest realms is the real suffering.** That is what we first need to focus on.
- **And all that suffering arises because we crave for things in this world because of our *avijjā* (not comprehending the Four Noble Truths).**

5. **Seeing this hidden suffering is indeed difficult.** When the Buddha attained the Buddhahood, it said that he was worried whether he could convey this deep ideas to most people.

- We seek pleasures that are highly visible. But if we gain such pleasures with immoral acts, the consequences of such immoral acts are not apparent. We can see a stone thrown up coming down, but we cannot see any bad consequences to the drug dealer who seems to be enjoying life.

The Second Noble Truth – Causes for Future Suffering

6. the cause of future suffering is indicated in the First Noble Truth: It is the craving for sense pleasures. The worst outcomes (rebirths in the *apāyā*) will result if we do immoral things to get such sense pleasures.

- For example, person X may kill another person to get his money or to marry his wife. Even though X may accomplish that goal and “enjoy life” for even 100 years, that is nothing compared millions of years of future suffering X will go through due to his immoral action.

7. When a fish bites the bait, it does not see the suffering hidden in that action. Looking from the ground we can see the whole picture and we know what is going to happen to the fish if it bites the bait. But the fish is unable to see that whole picture, and thus does not see the hidden suffering. It only sees a delicious bit of food.

- In the same way, if we do not know about the wider world of 31 realms (with the suffering-filled four lowest realms), we only focus on what is easily accessible to our six senses.
- In order to really comprehend suffering through repeated rebirths, one needs to comprehend that most suffering is encountered in the 4 lowest realms (*apāyā*); see, “[The Grand Unified Theory of Dhamma](#)” at [puredhamma.net](#).
- Thus, stopping suffering requires one to be mindful of one’s actions and stop doing bad *vacī* and *kāya saṅkhāra* (i.e., immoral thinking, speech, and deeds).

8. Therefore, the “never heard truth about suffering” that the Buddha revealed is the suffering that is hidden in sense pleasures. The level of suffering depends on what we do (*vacī* and *kāya saṅkhāra*) to get those pleasures. **If they are immoral then worst suffering in the *apāyā* will result.**

- We believe that those sense pleasures are to be valued and to be enjoyed. That is because we do not see right away the consequences of any bad actions that we do to get those sense pleasures.

- For example, if one rapes a woman to get enjoyment for a short time, one could be spending millions of years as an animal in the future because of that immoral action.
- However, it may not be easy to grasp this point. One needs to advance step-by-step; see, “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#).”
- The first step to reduce suffering in the future is to avoid doing bad deeds (*kamma*) via thoughts, speech, and bodily actions (again, these are associated with *mano*, *vacī*, and *kāya saṅkhāra*).
- **Therefore, we create our own future happiness via *puñña abhisāṅkhāra* (good *saṅkhāra*) or future suffering via *apuñña abhisāṅkhāra* (immoral *saṅkhāra*).**

The Third Noble Truth – How to Stop Future Suffering

9. As we discussed above, such suffering can arise in this life due to our own (*apuññābhi*) *saṅkhāra* (which we generate in order to satisfy our cravings).

- In the same way, ALL FUTURE SUFFERING can also be stopped by controlling our own *saṅkhāra*.
- We attach to things with greed and hate via *saṅkhāra*, because of our ignorance of the Four Noble Truths (*avijjā*). As we have discussed, this is the first step in *Paṭicca Samuppāda* leading to “the whole mass of suffering”: “*avijjā paccayā saṅkhāra*.”

10. The Third Noble Truth is about what can be achieved by systematically removing those causes.

- *Nirāmisa sukha* increases from the point of embarking on the Path, and has four levels of PERMANENT increases starting at the *Sotāpanna* stage and culminating at the Arahant stage; there are several posts starting with, “[Three Kinds of Happiness – What is Nirāmisa Sukha?](#).”

11. In order to stop the arising of “bad *saṅkhāra*” we need to do two things: (1) remove *avijjā* by learning true Dhamma, and (2) making use of our free will to get control of our *saṅkhāra* (this is the basis of *Ānāpānasati/Satipaṭṭhāna*).

- A systematic way to achieve this is stated in the Fourth Noble Truth.

The Fourth Noble Truth – The Way to Stop Future Suffering

12. The second Noble Truth is describes those CAUSES that we need to work on. The root causes are greed, hate, and ignorance, but they need to be removed mainly via understanding the Three Characteristics (*Tilakkhaṇa*) and also via removing our bad *sansāric* habits; see a series of posts starting with, “[Habits, Goals, Character \(Gathi\)](#)” to “[The Way to Nibbāna – Removal of Āsavas](#).”

- The way to achieve this is to follow the Noble Eightfold Path: *Sammā Diṭṭhi* (understanding what is embedded in the Four Noble Truths), and then thinking (*saṅkappa*), speaking (*vācā*), acting (*kammanta*), living one’s whole life that way (*ājīva*), striving harder (*vāyāma*), getting to the right mindset (*sati*), and finally to *samādhi*.

13. When we follow the Noble Eightfold Path, *nirāmisa sukha* arises first and then various stages of *Nibbāna*.

- *Nirāmisa sukha* starts when one lives a moral life (see, “[Ten Immoral Actions \(Dasa Akusala\)](#)” and follow-up posts).
- The root causes of immoral behavior are greed, hate, and ignorance. Ignorance can be reduced to the extent of attaining the *Sotāpanna* stage just via comprehending the Three Characteristics of “this world of 31 realms,” i.e., *anicca*, *dukkha*, *anatta*; see, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#),” and the follow-up posts. It is that powerful.

Why Is It Hard to See the “Hidden Suffering”? – Time Lag

14. The main problem in clearly seeing the “cause and effect of mind actions” is that the results of those actions have a time delay and that time delay itself is not predictable.

- In contrast, it is easy to predict what is going to happen with material things (moving an object, a vehicle, a rocket, etc). The success of physical sciences is due to this reason. Once the underlying laws are found (laws of gravity, laws of motion, electromagnetism, nuclear forces, quantum mechanics, etc), one has complete control.

15. But the mind is very different. To begin with, no two minds work the same way. Under a given set of conditions, each mind will chose to act differently. With physical objects, that is not so; under a given set of conditions, what will happen can be predicted accurately.

- Effects of some actions (*kamma*) may not materialize in this life and sometimes it may come to fruition only in many lives down the road (but with accumulated interest).
- Even in this life, mind phenomena are complex: This is why economics is not a “real science.” It involves how people act sometimes “irrationally” for perceived gains. No economic theory can precisely predict how a given stock market will perform.

16. **This “cause and effect” that involves the mind is the principle of *kamma* and *kamma vipāka* in Buddha Dhamma.**

- But unlike in Hinduism, *Kamma* is not deterministic, i.e., not all *kamma vipāka* have to come to fruition; see, [“What is Kamma? Is Everything Determined by Kamma?”](#)
- Suitable CONDITIONS must be there to bring good or bad *kamma vipāka* to fruition. That is why *kamma* is not deterministic and we can stop ALL future suffering.
- We just need to get rid of *avijjā* and *taṇhā*, two key steps in *Paṭicca Samuppāda*. That is how *Aṅgulimāla* overcame all that bad *kamma* of killing almost 1000 people.

Only a Part of Suffering in This Life Can Be Eliminated

Finally, we can look into what **can** of suffering can be stopped from arising in this itself, so that we can gain confidence in Buddha Dhamma. One does not need to blindly believe and follow Buddha's teachings.

17. There are two types of *vedanā* (feelings); see, [“Vedanā \(Feelings\) Arise in Two Ways.”](#)

- First is due to *kamma vipāka*.
- The second is mental suffering due to *saṅkhāra* (via attachment to sensual pleasures and friction (*paṭigha*) due to things we don't like). This could lead to depression.

18. This life is the RESULT of past *kamma*. Once a life starts, it cannot be stopped until “its *kammic* energy” is exhausted. This life WILL end up in old age, decay, and eventual death.

- Therefore, if someone has aches and pains due to old age, it is not possible to get rid of them other than to use medications or therapy to lessen the pain and manage it.
- Even the Buddha had back pain due to old age, and had a severe stomach ache at the end.
- One may get injured, come down with a disease, etc.
- All these are due to *kamma vipāka*.

19. On the other hand, it is possible to stop the second type (“mental suffering”) that arises due to our own way of thinking (again, our own *vacī saṅkhāra*).

- Therefore, we can EXPERIENCE the relief from suffering (called *nirāmisā sukha*) in this life itself.
- The suffering (or *vedanā*) that a living *Arahant* has eliminated is called “*samphassa ja vedanā*.” **This is what leads to depression in some people.**

- Here, “*samphassa*” is “*san*” + “*phassa*,” or “contact with one’s own defilements (*san*)”; see, “[What is “San”? Meaning of Sansāra \(or Samsāra\).](#)”

Humans Have Free Will to Eliminate Future Suffering

20. The life we have as a human is a RESULT of a past good deed. The life of a dog or an ant is the result of a past deed by that sentient being.

- And what happens to us in this life is a COMBINATION of what we have done in the past (*kamma vipāka*) AND what we do in this life.
- What happens to an animal is MOSTLY due to *kamma vipāka* from the past.
- The difference between a human and an animal is that the animal does not have much control over what is going to happen to it. But human birth is a special one: We have a higher level mind that CAN change the future to some extent, and with possible enormous consequences.
- **We have free will and animals (or those beings in other lower realms) do not. We can control our *saṅkhāra*, and they cannot. It is very difficult to get a human birth. We should not waste this opportunity.**

4.1.2 Introduction to Citta, Vedanā, Saññā, Saṅkhāra, and Viññāṇa

December 25, 2018; revised August 23, 2019; April 9, 2020

Pāli to English Translations – Introduction

1. The Pāli words *citta*, *vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa* are mistranslated in most current literature as thought, feeling, perception, mental formations, and consciousness, respectively.

- The last four (*vedanā*, *saññā*, *saṅkhāra*, and *viññāṇa*) are critical concepts in Buddha Dhamma. They represent the four mental aggregates.

2. The word *saṅkhāra* is translated as “mental formations.” It does not convey the meaning at all. *Viññāṇa* is translated as just “consciousness” and that is simply wrong.

- *Saṅkhāra* is associated with “emotions”, so we need to make the connection to emotions. In particular, we get attached to somethings and get repulsed by others. In both cases, we generate a wide variety of emotions that lead to three types of *saṅkhāra* in our minds.
- They are *puññābhisaṅkhāra* (*puñña abhisaṅkhāra*), *apuññābhisaṅkhāra* (*apuñña abhisaṅkhāra*), and *āneñjābhisaṅkhāra* (*āneñja abhisaṅkhāra*.) In simple terms, that means moral thoughts/deeds, immoral thoughts/deeds, and the cultivation of *arupāvacara jhāna*. For details, see, “[Kamma, Saṅkhāra, and Abhisaṅkhāra – What Is “Intention”?](#)”

Conventional Meanings

3. The following are the descriptions or definitions that I found online, which seem to be closest to the Pāli words.

Thought (for *citta*): “an idea or opinion produced by thinking or occurring suddenly in the mind.”

Feelings (for *vedanā*): Normally used together with emotion. For example, a “feeling of joy.”

Perception (for *saññā*): recognition.

Emotions (for *saṅkhāra*): Some define emotions as: “joy-sadness, anger-compassion, greed-benevolence, etc. etc..”

Consciousness (for *viññāṇa*): “the state of being awake and aware of one’s surroundings.”

4. That is all modern psychology says, and there are many overlaps there too. There are no universally accepted definitions for those words yet.

- On the other hand, the Buddha has provided a very detailed analysis of the Pāli words *citta*, *saññā*, *vedanā*, *saṅkhāra*, *viññāṇa*.
- *Saṅkhāra* arises due to emotions. These emotions are called *cetasika* which is normally translated as “mental factors.”
- Therefore, *citta*, *saññā*, *vedanā*, *saṅkhāra*, *viññāṇa* SEEM TO correspond to the English words thought, perception, feeling, actions based on emotions, and consciousness. But that can lead to many misinterpretations, as we will discuss below.

We Need to Use Pāli Words Like *Citta*, *Saññā*, *Vedanā*, *Saṅkhāra*, *Viññāṇa*

5. That is why it is almost impossible to translate those Pāli words into a single English word. The closest is probably “perception” for *saññā*, even though *saññā* also means something more profound.

- It is much better to learn the meaning of each Pāli word and use that word itself.
- I will briefly discuss some key features to get a basic idea. Other aspects are discussed at: [“Pāli Dictionaries – Are They Reliable?”](#)

Citta and Thought – Not Even Close

6. *Cittas* arise as a series; a single *citta* never arises by itself.

- In a sensing event that involves the five physical senses (eyes, ears, nose, tongue, body), a *citta vīthi* (or a series of *citta*) arise with 17 *citta*.
- In the case of *citta* arising directly in mind, the basic *citta vīthi* has 12-14 *citta*. But in some exceptional cases, there is no limit to the number *citta* that can occur (like in *jhāna samāpatti*).
- There can be billions of *citta vīthi* running within “the blink of eye” according to *Abhidhamma*. **The Buddha said that there is nothing in this universe faster than a *citta*.**
- After reading this post, you may want to read the previous post, [“Amazingly Fast Time Evolution of a Thought \(Citta\).”](#) That could make things more clear.

Citta and *Cetasika*

7. So you can see that what we call a “thought” is NOT a single *citta*. **What we experience as a “thought” is the overall effect of a large number of *citta vīthi*.**

- Each *citta* arises with at least seven *cetasika* (mental factors). *Vedanā* and *saññā* are two of those psychological factors. Once a “good *citta*” occurs, many of those arise without changing to “bad *citta*” in the middle. That is why a “given sense experience” is just called a *citta*, even though it may have billions of individual *citta*.
- There are 52 mental factors (*cetasika*) that could arise in a *citta* (“thought”). Thus, a simple “thought” can be quite complex.
- If it is a “moral *citta*,” then it would have some combination of “good mental factors” such as compassion or “fear of wrongdoing” (*hiri*). There are 25 of them, and only several of them arise at a given time.
- If it is an “immoral *citta*,” it would have “bad mental factors” such as greed and hate. There are 14 of them.

- Those good and bad mental factors (*cetasika*) never arise together.

Vedanā and *Saññā* – In Every *Citta*

8. *Vedanā* and *saññā* are two special types of *cetasika*. That is why they are treated separately from other *cetasika*.

- Both of those arise with every *citta*.
- *Vedanā* basically “feels” that a sense event is happening. There is a *sukha vedanā*, *dukkha vedanā*, or a neutral *vedanā* (more accurately *adhukkhamasukha vedanā*) associated with EACH sense event. Therefore, joy is not a *vedanā*; see #2 above. There are only three types of *vedanā*.
- ***Saññā* is responsible for recognizing what the sense object is**, based on one’s prior experience with that object. So, one perceives a rose and that it has color of red, for example.
- Those are, of course, fundamental descriptions.

9. There are 52 *cetasika*, including *vedanā* and *saññā*. Out of the other 50 *cetasika*, some included in “*saṅkhāra*”; which particular *cetasika* will be involved will depend on the specific situation. They basically define whether a *citta* is good or bad.

- As we mentioned before, *vedanā* and *saññā* arise with all *citta*, good and bad.
- When one does an immoral deed, some of those “bad *cetasika*” (called *asobhana cetasika*) arise with *citta*.
- When one does a moral deed, some of “good *cetasika*” (called *sobhana cetasika*) arise.

Saṅkhāra Are Our Actions Done With Emotions

10. *Cetasika* represents the English word “emotions.”

- When we experience those emotions, they are called “*mano saṅkhāra*.”
- When we start thinking consciously about them, they become *vacī saṅkhāra*; we also speak with *vacī saṅkhāra*. Here, *vacī* is pronounced “vachee.”
- If we do bodily actions with such emotions, then those are done with *kāya saṅkhāra*.
- So, we can see that “*saṅkhāra*” are more than emotions. ***Saṅkhāra* are what we think and do with such sentiments.**
- **It is essential to realize that we have control over *vacī saṅkhāra* and *kāya saṅkhāra*, but *mano saṅkhāra* arise automatically based on our *gati*.**

11. To summarize what we have discussed so far:

- What we experience (and call a thought), is actually the overall effect of millions of *citta vīthi*.
- Current scientific research says a human can only register sense events lasting at least a hundredth of a second (about ten milliseconds). During that time, millions of *citta vīthi* would have arisen.
- The sense object is recognized with the *saññā cetasika*, and accordingly, a *sukha*, *dukkha* or neutral *vedanā* arise.
- Based on that recognition (but simultaneously) a set of good, bad *cetasika* arise.
- Based on those good or bad set of *cetasika*, the mind generates good bad *saṅkhāra* with which we think, speak, and do things.

Emotions Arise Based on One’s *Gati* and the Sense Input

12. Thus *mano saṅkhāra* arise automatically based on our *gati* (or *gathi*) and the particular sense input. If one likes a particular sense input (based on one's *gati*), then one will start thinking about it.

- So, we consciously think and speak with *vacī saṅkhāra* based on those emotions (*mano saṅkhāra*) that initially arise. If our emotions get high enough, we may take bodily actions based on *kāya saṅkhāra*.
- All three types of *saṅkhāra* arise in mind.

13. I need to emphasize the fact that occurring of a set of good or bad *cetasika* DOES NOT happen arbitrarily. Nothing happens without a cause.

- Basically, two key factors determine what kind of *cetasika* arise for a given sense event: **(1) One's *gati* (pronounced "gathi"), roughly meaning character/habits, and, (2) the particular sense object.**
- Pali words are written differently than normal English words. See, "["Tipitaka English" Convention Adopted by Early European Scholars – Part 1](#)" and "["Tipitaka English" Convention Adopted by Early European Scholars – Part 2.](#)"
- *Gati* has been explained in many posts: "[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Asavas\)](#)," "[How Habits are Formed and Broken – A Scientific View](#)," "[Gati to Bhava to Jāti – Ours to Control](#)," are just a few.

***Viññāṇa* Is the Overall Experience – Plus Future Expectations**

14. Finally, *viññāṇa* represents one's overall sense experience (including *vedanā*, *saññā*, *saṅkhāra*).

- *Viññāṇa* has something in addition to those. One may form a future expectation based on that sensory input.
- **If one gets attracted to a given sense experience, one may keep thinking about it and initiate an expectation to enjoy it further.** *Viññāṇa* is that expectation. This is an energy generated in what is called a *javana citta*. **That creates a *kamma bīja* that can bring *vipāka* in the future.**
- More information at: "[Viññāṇa – What It Really Means](#)" and "[Viññāṇa \(Defiled Consciousness\)](#)."

15. So, we see that *viññāṇa* is much more than just consciousness. It is wrong to translate *viññāṇa* as just consciousness (or awareness).

- That is only an basic description of *viññāṇa*. Deeper aspects of *viññāṇa* can be found in the subsection: "[Viññāṇa Aggregate](#)."

Expectations Are Only in *Mano Viññāṇa* (Normally Called *Viññāṇa*)

16. There are six types of *viññāṇa*.

- We become aware of something in our physical world via *cakkhu viññāṇa* (seeing), *sota viññāṇa* (hearing), *ghāṇa viññāṇa* (smelling), *jivhā viññāṇa* (tasting), and *kāya viññāṇa* (touching).
- Then *mano viññāṇa* takes over, and will decide to act on it — and if needed — to make "future expectations" or "plans." (Three *manodvāra citta vīthi* follow each *pañcadvāra citta vīthi* per *Abhidhamma*.)
- **Therefore, it is the *mano viññāṇa* that builds expectations for the future.**
- To emphasize: *Kamma bīja* that can bring future *vipāka* are generated only in *mano viññāṇa*. The other five types of *viññāṇa* only bring in the external sensory input.
- **Therefore, when *suttā* refer to *viññāṇa* without a distinction, the reference is to *mano viññāṇa*.**
- The other five types of *viññāṇa* just "bring the sense signal to mind."

***Viññāṇa* and *Saṅkhāra* Feed on Each Other**

17. For example, *cakkhu viññāṇa* is like a camera taking a picture. It is the *mano viññāṇa* that takes actions (generates *saṅkhāra*) based on that sensory input.

- If the sense input is attractive, it will try to get “more of such sense inputs,” i.e., it will initiate a *viññāṇa* to “achieve that expectation” via “*saṅkhāra paccayā viññāṇa*.” For example, let us assume that person X sees a new car and “falls in love with it” and makes a *viññāṇa* (an expectation, which is a mental energy) for it.
- That *viññāṇa* to “buy that car Y” will be in the subconscious of X. It will be in his subconscious until either he buys it or it turns out that there is absolutely no way for him to afford it.

18. Days later, he is driving to work and sees a similar car on the road (that is, of course a *cakkhu viññāṇa*).

- Now that *viññāṇa* to “buy that car Y” will come back to his mind (triggered by that *cakkhu viññāṇa*. Then of course his *mano viññāṇa* will take over and his interest in the car will come to his mind. the car
- Then we will start generating *vacī saṅkhāra* (conscious thoughts) about buying that car and how nice it would be drive to work in it, etc). That is the backward step of “*viññāṇa paccayā saṅkhāra*.” The *Paṭicca Samuppāda* step “*saṅkhāra paccayā viññāṇa*” runs backward too; see, “[Āsevana and Aññamañña Paccayā](#).”
- That in turn will provide “more food” for that *viññāṇa* via “*saṅkhāra paccayā viññāṇa*.”
- Therefore, *saṅkhāra* and *viññāṇa* “feed on each other.”

One should contemplate on these ideas and apply them to other “real life situations.” That is real “insight meditation” or “*vipassanā bhāvanā*.”

Resources

19. A reasonably good idea of the structure in *Abhidhamma* can be gained by reading *Bhikkhu Bodhi*’s book, “[WebLink: PDF download: A Comprehensive Manual of Abhidhamma](#).”

- “[WebLink: PDF download: Buddha Abhidhamma – Ultimate Science](#),” by Dr. Mehm Tin Mon is also a good FREE publication.
- But both of those authors also translate *viññāṇa* as consciousness. Furthermore, they have translate *citta* also as consciousness. There are other translation problems too.
- However, by reviewing those two resources one can see how in-depth and detailed the mind processes are analyzed in *Abhidhamma*.
- The “[Abhidhamma](#)” section, together with the “[Tables and Summaries](#)” section also provides more information on *Abhidhamma*.

4.1.3 Viññāṇa – Consciousness Together With Future Expectations

January 1, 2019; revised May 9, 2019

1. *Viññāṇa* means “without *ñāṇa*” or without wisdom, i.e., with ignorance. *Viññāṇa* could also mean “defiled *viññāṇa*”, i.e., not knowing the consequences of doing *dasa akusala*.

- When one attains the *Arahanthood*, when one’s *paññā* (wisdom) will be optimized and one will have “undefiled or clear *viññāṇa*.”
- There are many *suttā* that clearly state “*viññāṇa nirodha*,” or stopping the arising of *viññāṇa* (defiled *viññāṇa*) leads to *Nibbāna*.

A succinct statement can be found in the “[WebLink: suttacentral: Dvayatānupassanāsutta \(Sutta Nipata 3.12\)](#)“:

“*Yaṃ kiñci dukkhaṃ sambhōti,
Sabbhaṃ viññāṇapaccayā;
Viññāṇassa nirodhena,
Natthi dukkhassa sambhavo.*”

- **Translated:** “Whatever suffering that arises, all that arises due to *viññāṇa*; **With not arising of *viññāṇa*, there is no existence with suffering.**”
- A detailed explanation is at, “[Anidassana Viññāṇa – What It Really Means.](#)”
- I will introduce the concept of *viññāṇa* in a simple way. In the simplest form, *viññāṇa* is any type of expectation even without moral/immoral implications.

2. *Viññāṇa* includes or encompasses the following: our feelings (*vedanā*), perceptions (*saññā*), and a set individual mental factors (*cetasika*). They all arise together, and the set of *cetasika* that arise is dependent on each person's *gati* (habits/character). **If you are not familiar with *Abhidhamma*, don't worry about it.** I will take a simple example to illustrate *viññāṇa* below.

- Five of the six types of *viññāṇa* are strictly *vipāka viññāṇa*. These are the five types of *viññāṇa* associated with the five physical senses.
- We become aware of something in our physical world via *cakkhu viññāṇa* (seeing), *sota viññāṇa* (hearing), *ghāṇa viññāṇa* (smelling), *jivhā viññāṇa* (tasting), and *kāya viññāṇa* (touching); these are due to past *kamma vipāka*.
- **When one of our five physical senses detects something in our physical world, one of those five types of *viññāṇa* arise. If we get interested in them, we start generating *mano viññāṇa* and doing *kamma*.**
- Let us take a simple example to clarify those basic ideas.

3. When a man X sees a young woman (Y), that is called a “seeing event” or *cakkhu viññāṇa*. Suppose the woman has just come to X's workplace as a new employee.

- With that *cakkhu viññāṇa*, X recognizes Y as an attractive female and that is called *saññā*; X may generate “happy feelings” when seeing Y and that is *vedanā*; X may also generate lust in his mind and that is a mental factor (*cetasika*).
- If X gets interested in Y, then X may also generate lust in his mind with subsequent *mano viññāṇa*, and start generating *mano, vacī,* and *kāya saṅkhāra*; see the previous post.

4. With the establishment of this new *viññāṇa*, there is now an expectation in X's mind of getting a date to go out with Y, and may be getting to marry Y someday.

- That is a *mano viññāṇa* that stays hidden in X's mind. It has the expectation of getting an opportunity to have a close relationship with Y.
- That idea will remain hidden in X's mind and can re-surface at appropriate times, especially when seeing Y again, or when someone mentions Y's name for example. This is “*viññāṇa paccayā saṅkhāra*” in *Paṭicca Samuppāda*.
- The more X will engaging in generating such *saṅkhāra*, that *viññāṇa* will also strengthen; that is the “*saṅkhāra paccayā viññāṇa*” in *Paṭicca Samuppāda*.

5. Thus both “*saṅkhāra paccayā viññāṇa*” and “*viññāṇa paccayā saṅkhāra*” will be operating back and forth, and will keep strengthening that *viññāṇa*.

This is what is meant in many *suttā* by saying that “*viññāṇa* will grow” as one keeps doing *saṅkhāra*.

For example, in the “[WebLink: suttacentral: Cetanā Sutta \(SN 12.38\)](#)“:” *Yañca, bhikkhave, ceteti yañca pakappeti yañca anuseti, ārammaṇametam hoti viññāṇassa ṭhitiyā. Ārammaṇe sati patiṭṭhā viññāṇassa hoti. Tasmim̐ patiṭṭhite viññāṇe virūḷhe āyatim̐ punabbhavābhiniḅbatti hoti. Āyatim̐*

punabbhavābhinihattiyā sati āyatiṃ jāti jarāmaṇaṃ sokaparidevadukkhadomanassupāyāsā sambhavanti. Evametassa kevalassa dukkhakkhandhassa samudayo hoti.”

Translated: “‘*Bhikkhus*, what one intends, and what one plans, and whatever one has a tendency towards: this focus (*ārammaṇa*) a basis for the maintenance of *viññāṇa*. When there is an *ārammaṇa* there is a support for the establishing of *viññāṇa*. **When *viññāṇa* is established and has come to growth, there is the arising of future renewed existence (*punabbhavā*).** When there is the future renewed existence, future birth, aging-and-death, sorrow, lamentation, pain, displeasure, and despair come to be. **Such is the origin of this whole mass of suffering.**”

6. So, let us assume that X has been seeing Y for a few days and may be even got to talk to her a few times (*vacī* and *kāya saṅkhāra* are associated those activities). Each time X interacts with Y, that “*viññāṇa* for having a close relationship with Y” will grow in X’s mind.

- Furthermore, X will be thinking about Y often (which is generating *vacī saṅkhāra*), that will also help make that “*viññāṇa* for having a close relationship with Y” to grow.
- That happens via “*saṅkhāra paccayā viññāṇa*” step in *Paṭicca Samuppāda*.

7. Several days later, X finds out that Y is married, when her husband comes to meet her at work.

- He could clearly see that she is happily married and there is no point in even thinking about having a relationship with her.
- **In an instant, X’s “*viññāṇa* for having a close relationship with Y” will be eliminated (for most people).**
- When the reality of the situation is comprehended by the mind, corresponding *viññāṇa* will be stopped. **This is what is meant by “*viññāṇa nirodha*.”**

8. **Therefore, it is important to see that a *viññāṇa* (or an expectation) will be eliminated as soon as one realizes the futility (or the dangers) of that expectation.**

- At a deeper level, all of one’s highly immoral types of *viññāṇa* will be permanently removed when one will be able to see the futility/dangers in engaging in immoral deeds. That is when one attains the *Sotāpanna* stage via comprehending *Tilakkhaṇa*.
- Next, one’s expectation for seeking pleasures in this world will be totally removed when one realizes the futility — and dangers — in seeking such sense pleasures. That is when one attains the *Anāgāmi* stage of *Nibbāna*.
- Once one becomes an *Anāgāmi*, one is at a stage where one can start seeing the futility of *jhānic* pleasures and start getting rid of *rūpa rāga* and *arūpa rāga* (or the futility of born in the *rūpāvacara* and *arūpāvacara* realms. That is when one becomes an *Arahant*.
- Therefore, the way to *Nibbāna* is a step-by-step process; see, “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#).”

9. There are many types of *viññāṇa* that we can have. The minor ones are just expectations of getting something done or buying something or getting new job, etc.

- *Saṅkhāra* or “thinking of that expectation and making plans to get it done also by speaking and doing things (that includes *vacī saṅkhāra* and *kāya saṅkhāra*)” will make that *viññāṇa* to grow. This comes via the “*saṅkhāra paccayā viññāṇa*” step.
- In another example, suppose X is thinking about buying a certain type of car. That idea or expectation will be “at the back of his mind” all the time. If he sees a car like that on the road, then that *viññāṇa* will be awakened, and he will start thinking about it again. Now, one day X buys that car. Then that *viññāṇa* will also disappear since he will no longer interested in buying a car. That expectation has been fulfilled.
- Therefore, a *viññāṇa* will “take hold in the and grow” only as long as one has a desire AND one believes that it can be fulfilled.

10. I gave those two examples to illustrate the basic concept. But more complex types of *viññāṇa* can grow based on certain types of activities that X engages in, and those can become *paṭisandhi viññāṇa* that can lead to rebirths.

- For example, if X constantly engages in helping others, donating time and money to charities, etc, he would be cultivating the mindset of a *deva* (even without knowing). Then that “moral *viññāṇa*” would grow with time and may lead to a rebirth in a *deva* realm.
- If one is constantly thinking and planning to make money by exploiting/deceiving others, he/she is doing *vacī/kāya saṅkhāra* that will be feeding a “bad *viññāṇa*” that can lead to a birth in the *apāyā*.
- Therefore, *viññāṇa* can be various types.
- However, there are six basic types of *viññāṇa*. The above examples all belong to “*mano viññāṇa*,” except the *cakkhu viññāṇa* that was involved when X saw Y.

11. As we discussed in #2, there are five basic types of *viññāṇa* just bring external sense objects (pictures, sounds, tastes, smells, and touches) to our mind.

- Then *mano viññāṇa* takes over, and will decide to act on it — and if needed — makes “future expectations” or “future plans.” **Therefore, it is the *mano viññāṇa* that has expectations for the future.**
- We ignore most of the things we see, hear, etc. But if we get attracted to something, then we will be going back to see, hear, etc and may be making other related plans too. That is all done with *mano viññāṇa*.

12. Obviously, *paṭisandhi viññāṇa* is a very important *mano viññāṇa*. It can determine future births.

- This is a complex subject, but when one engages in highly immoral deeds, the *paṭisandhi viññāṇa* that grows may not be what one desires.
- For example, suppose X is a serial rapist. He gets a temporary sense satisfaction by raping women. What he does not know is that he is cultivating a *viññāṇa* that is appropriate for an animal. So, he could get an animal birth because of that immoral *viññāṇa* he is cultivating.
- So, hopefully you can see the connection between *viññāṇa* and *gati* (pronounced “gathi”) too. *Gati* (character qualities/habits) is an important concept that has been hidden in recent years.

13. When one attains the *Sotāpanna* stage of *Nibbāna*, one would see the futility of such immoral and briefly-lived sense pleasures. Then such types of “immoral *viññāṇa*” would not be cultivated in his mind.

- In other words, one’s “hidden immoral *gati*” will be permanently removed at the *Sotāpanna* stage.
- That is comparable to X losing the “*viññāṇa* for having a close relationship with Y” in #3 to #7 above. In that case, X clearly saw the uselessness of having that *viññāṇa*, and it died.
- It would be a good idea to read and understand posts on *gati*: [“How Habits are Formed and Broken – A Scientific View”](#); [“Bhava and Jāti – States of Existence and Births Therein”](#); [“Gati to Bhava to Jāti – Ours to Control.”](#)

14. I made this discussion simple in order to get two main ideas across, which are:

- *Viññāṇa* is a complex concept. This is why it not appropriate to translate *viññāṇa* as just “consciousness.”
- *Mano viññāṇa* arise due to *saṅkhāra* (“*san*” + “*khāra*”). We cultivate those via “*saṅkhāra paccayā viññāṇa*” in the *Paṭicca Samuppāda* cycles.
- This is why “*san*” is a key root word in Pāli; see, [“What is “San”? Meaning of Sansāra \(or Samsāra\).”](#)

15. I hope that those who translate deep *suttā* word-by-word will at least read these series of posts and make amendments to their ways of translating key *suttā* that discuss deep meanings. They are no different

from the Sati *bhikkhu* who could not understand what is meant by *viññāṇa* in the [WebLink: suttacentral: Maha Tanhasankhaya Sutta \(MN 38\)](#).

- One should not be translating such deep *suttā* (also there is no point in reading them either) until one understands what is meant by *viññāṇa*.

16. The [WebLink: suttacentral: Kevatta Sutta \(DN 11\)](#) is another such a *sutta* (among many others).

- The key verse there is at the end of the *sutta*: “*Viññāṇaṃ anidassanaṃ, anantaṃ sabbatopabhaṃ Ettha āpo ca pathavī, tejo vāyo na gādhati. Ettha dīghañca rassañca, aṇuṃ thūlaṃ subhāsubhaṃ; Ettha nāmañca rūpañca, asesam uparujjhati; Viññāṇassa nirodhena, etthetaṃ uparujjhatī*”^{ti}.
- This is explained in detail at, [“Pabhassara Citta, Radiant Mind, and Bhavaṅga.”](#)

17. As I have said many times, Buddha Dhamma is deep. It takes an effort to learn. Just translating deep *suttā* word-by-word or just reading those translations will not be of much benefit in the long run.

- Of course some *suttā* can be translated word-by-word, like the [WebLink: suttacentral: Kalama Sutta \(AN 3.65\)](#). Those are basic *suttā* that provide guidelines to live a moral life. But deep *suttā* that discuss *anicca*, *anatta*, or *Nibbāna* require a more deeper knowledge of the basics like what is meant by *saññā*, *viññāṇa*, *saṅkhāra*, etc.
- **It is best to learn the meanings of these key words and just use them, instead of translating them as a single English word. I hope you can see why, with the above discussion on *viññāṇa*.**

Also see, [“Connection Between Saṅkhāra and Viññāṇa”](#) and [“Viññāṇa and Saṅkhāra – Connection to Paticca Samuppāda.”](#) These three posts are essential to be understood if one really wants to understand Buddha Dhamma.

4.1.4 Connection Between Saṅkhāra and Viññāṇa

January 11, 2018

1. In a recent post, [“Viññāṇa – Consciousness Together With Future Expectations,”](#) I discussed how *viññāṇa* or “future expectations” are established when one gets attached to something and starts doing *saṅkhāra* (conscious thinking, speech, and actions) about it.

- In this post, I will elaborate more on the importance of *saṅkhāra* and the connection to *viññāṇa*. In a few posts, I will try to explain how we create our own future suffering by engaging in *abhisāṅkhāra* or “strong *saṅkhāra*.”
- These *abhisāṅkhāra* are nothing but how we think about, speak about, and take actions on moral/immoral issues. If we do any of the *dasa akusala*, then we are generating “bad *abhisāṅkhāra*” or “*apuñña abhisāṅkhāra*” (abbreviated as “*apuññābhisāṅkhāra*”).
- Those *apuññābhisāṅkhāra* lead to suffering. Therefore, key to stop future suffering is to gradually reduce *apuññābhisāṅkhāra* and eventually to stop them.

2. In addition to what we discussed in that previous post, another key point is to realize that all our speech and bodily actions are started by the mind.

- Can you do anything, if you (or your mind) does not want to do?
- You may be in the middle of doing something (say walking to the kitchen), but you can decide you don’t really want to go the kitchen and instead walk to the living room. If you start saying something, you can stop in mid-sentence if you want to.
- Some people have strange ideas about humans not having free will. They should try what I just suggested above. It is not that hard to verify.

3. All the progress that science has made is based on the “mind power” of the humans (scientists coming up with breakthrough innovations in their minds). Mind comes first and this is what is expressed in the very first *Dhammapada gāthā*: “*manopubbangamā dhammā..*” or “mind is at the forefront.”

- A child's future depends on how well he learns. If the mind of the child goes in the wrong direction, he/she could become a drug addict or even a murderer.
- In the same way, we determine our own LONG TERM future in the rebirth process by the ways in which we think, speak, and act. That is what is really explained in *Paṭicca Samuppāda* (normally translated as “Dependent Origination”; again, it is much better to use the Pāli term and understand what is really meant by it).

4. From the moment we wake up in the morning, we do nothing but generate *saṅkhāra*.

- When we just experience a sense input (seeing, hearing, etc) , “*mano saṅkhāra*“ are automatically generated.
- **The Buddha said, “*vedanā, saññā* are *mano saṅkhāra*“:** we just experience the sense input by recognizing it and generating a “*sukha, dukkha*, or neutral feeling about it.”

5. When we start thinking consciously about a particular sense input (what we saw, heard, tasted, etc), we start generating *vacī saṅkhāra*; we may also speak with *vacī saṅkhāra*. Here, *vacī* is pronounced “*vachee*.”

- For example, if we see a nice car and start thinking about how nice it would be to own such a car, how we can impress our friends with it, etc, we are fully aware of such thoughts.
- Such conscious generation of thoughts about “what to do about a given sense input and how to go about it”, for example, are *vacī saṅkhāra*. Actual speech is also *vacī saṅkhāra*.
- **The Buddha said, “*vitakka, vicāra* are *vacī saṅkhāra*“:** stay on the given sense input and generating thoughts about it or related things.
- Furthermore, we can keep going with such “day dreaming” or we can stop them. If it is something we like, it may be hard to stop thinking about it, i.e., it may take will power.
- That is what is involved in *Ānāpānasati/Satipaṭṭhāna*: **stopping bad *vacī saṅkhāra***.

6. If we just proceed with those *vacī saṅkhāra*, our emotions may get strong and we may start speaking out (stronger *vacī saṅkhāra*). If we get “really worked up” we may do bodily actions with such emotions, then those are done with *kāya saṅkhāra*.

- For example, let us say two people get into an argument and start shouting at each other. Each person is speaking harsh words (generated via *vacī saṅkhāra*).
- Then one of them (person X) gets “really worked up”, loses all restraint, and hits the other person. That “hitting action” was done with *kāya saṅkhāra* (generating thoughts to raise the hand and hit that person).

7. It is important to realize that both speech and bodily actions are initiated by the mind.

- In the above example, both people were engaged in generating “bad *vacī saṅkhāra*,” which are nothing but “bad speech”, the opposite of “*Sammā Vācā*” or “correct speech.”
- Then person X took did an even worse thing by hitting the other person. That was a “bad action”, opposite of “*Sammā Kammanta*.”
- Therefore, they were both acting with “*avijjā*” or ignorance of the consequences of their actions. That is “*avijjā paccayā saṅkhāra*,” the first step in *Paṭicca Samuppāda*.

8. Now, we can see what is meant by “*saṅkhāra*” (and “*abhisāṅkhāra*”).

- In the above example, both *vacī saṅkhāra* and *kāya saṅkhāra* generated by person X were “*abhisāṅkhāra*” or “strong *saṅkhāra*.”

- If those two people were just taking about something *kammically* neutral, say about the weather, then that would involve just “*saṅkhāra*.”
- **If they were talking about weather, while walking**, then that would involve both *vacī* and *kāya saṅkhāra* that are NOT of “*abhisaṅkhāra*” type. That speech and action did not involve generation of “*kammic* energy.”

9. Therefore, it is important to understand the difference between just *saṅkhāra* and *abhisaṅkhāra*. In the *suttā*, or in *Paṭicca Samuppāda*, the word “*saṅkhāra*” is used often without specifically saying whether it is just “*saṅkhāra*” or “*abhisaṅkhāra*.”

- Depending on the context, we should be able to determine whether it is just “*saṅkhāra*” or “*abhisaṅkhāra*.”
- Not only that, but *abhisaṅkhāra* are also two types: *puññābhisaṅkhāra* (*puñña abhisaṅkhāra* or “good deeds”) and *apuññābhisaṅkhāra* (*apuñña abhisaṅkhāra* or “bad deeds”).
- Here by “deeds” we include all three types of *saṅkhāra*: *mano*, *vacī*, and *kāya*. We should AVOID all three types of *apuññābhisaṅkhāra* or immoral thoughts, speech, and actions.

10. It is again important to emphasize that *mano saṅkhāra* arise AUTOMATICALLY based on two things: (1) the sense input, and (2) one’s own *gati* or *gathi* (character/habits), as we discussed in the post: “[Introduction to Citta, Vedanā, Saññā, Saṅkhāra, and Viññāna](#).”

- For example, if someone has a bad temper (that is a bad *gati*), then that person can be made angry by the slightest provocation.
- On the other hand, there are people who are calm and measured and are not easy to become angry. It will take much stronger provocation to make them angry.
- In the same way, some people are greedy and are easily attached to tasty foods. Some people are kind and quick to come to help for others in need, etc.

11. The key to making progress in the Path of the Buddha is to cultivate “good *gati*” and gradually reduce “bad *gati*.”

- If one is “quick to anger”, that is a bad *gati*. One important way to reduce that bad *gati* is to stop generating *vacī* and *kāya saṅkhāra* by will power when they start arising.
- For example, some people get angry even when they hear the name of a person they do not like. Then they start thinking about all the bad things that person has done in the past. That is generating “bad *vacī saṅkhāra*.”
- Even though one may not be saying a single bad word, just consciously think about bad thoughts about another person will feed that bad habit. So, it is important to realize that generating such “silent bad thoughts” is as bad as saying harsh words.
- Of course actually speaking out (also *vacī saṅkhāra*) and doing bad things to person (hitting for example), are also bad *abhisaṅkhāra*.

12. This “feeding bad habits” via (*apuññābhi*)*saṅkhāra* generation is explained via the step, “*saṅkhāra paccayā viññāṇa*” in *Paṭicca Samuppāda*.

- **When person X has a “grudge against person Y”, person X has a “*viññāṇa*” or an expectation in his mind to “get back to Y or hurt Y” whenever an opportunity arises.**
- That *viññāṇa* “gets food to grow” each time X starts generating bad thoughts about Y, speak against Y, or do something to hurt Y. Those all belong to *vacī* and *kāya saṅkhāra*.
- On the other hand, *mano saṅkhāra* about Y arise automatically in X’s mind when X sees Y or even when Y’s name is mentioned by someone else. Then X is likely to start generating *vacī saṅkhāra* or “conscious thoughts about Y.”

- The key to progress is to STOP such *vacī saṅkhāra* AS SOON AS one becomes aware of them.

13. Just like a person, an animal, or even a tree would grow when given food on a regular basis, one's *viññāṇa* would grow when "it is fed on a regular basis" by generating *vacī* and *kāya saṅkhāra*.

- It works backwards too. If food is reduced, a tree will not grow well. If food and water are totally stopped, the tree will die.
- **In the same way, if one stops feeding a given "viññāṇa" (or a "future expectation") by stopping *vacī* and *kāya saṅkhāra*, that *viññāṇa* will die with time.**
- In the same way, we want to "feed a good *viññāṇa*," say to act kindly towards other people and animals. So, we should INCREASE *vacī* and *saṅkhāra* generation: generate more compassionate thoughts and engage in compassionate activities like giving.

14. So, hopefully, we now have a good idea about what *saṅkhāra* (and *abhisāṅkhāra*) are and how they lead to good or bad *viññāṇa*.

- We will discuss more on *viññāṇa* in the next post. In the mean time, please do not hesitate to ask questions. It is important to understand these basic concepts.

4.1.5 Viññāṇa and Saṅkhāra – Connection to Paṭicca Samuppāda

February 25, 2019

1. To review briefly what we have covered in the last few posts in "[Essential Buddhism](#)":

- A defiled consciousness or *viññāṇa* has an "expectation" for the future. That is the "kammic energy" that is responsible for "sustaining the rebirth process." We are just getting the basic idea established in these posts.
- We do that willingly by generating (*abhi*)*saṅkhāra*, or very simply, by the way of we think, speak, and act.
- One who has not understood the First Noble Truth is willingly generating (*abhi*) *saṅkhāra* via, "*avijjā paccayā saṅkhāra*" that leads then to the cultivation of different types of *viññāṇa* via "*saṅkhāra paccayā viññāṇa*" step. That is how *Paṭicca Samuppāda* cycles start. They end up in "*jāti paccayā jara, maraṇa, soka, parideva, dukkha,..*", the whole mass of suffering!
- **Therefore, "*avijjā paccayā saṅkhāra*" and "*saṅkhāra paccayā viññāṇa*" lead to all future suffering.** We will proceed step-by-step.

2. There are five types of *viññāṇa* that can be called "just consciousness", i.e., without "future expectations." These are *cakkhu viññāṇa* (a "seeing event"), *sota viññāṇa* (a "hearing event"), etc for the five physical sense inputs. One more special case with *mano viññāṇa* is discussed in #4 below.

- A "defiled *viññāṇa*" or "an expectation for the future" is associated only with the *mano viññāṇa*, which is what normally referred to in a *Paṭicca Samuppāda* cycle if a specific type is not mentioned.
- **Therefore, in *Paṭicca Samuppāda* or in any *sutta*, if a reference is made to *viññāṇa*, that is referring to "*mano viññāṇa*" or "mind consciousness."**
- The mind generates the "kammic power" to create "kammic energy" or "*kamma bīja*" ("*bīja*" is pronounced "beeja", so I prefer to write it as "*bīja*"); see, "[Saṅkhāra, Kamma, Kamma Bīja, Kamma Vipāka](#)." [*bīja* :[nt.] seed; germ; generating element.]

3. Other five types of *viññāṇa* (e.g. *cakkhu viññāṇa*, etc) are only registered in the mind, when we see, hear, taste, etc.

- This is stated as “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*” in suttā or in *Abhidhamma*. This is normally translated as “eye consciousness arises when a picture is seen or received by the eyes.” That gives the basic idea, but it has a deeper meaning that we will discuss later.
- Similarly, hearing happens with “*sotañca paṭicca sadde ca uppajjati sotavīññāṇaṃ*” (“hearing consciousness arises when a sound is heard or received by the ears”), etc.

4. In addition to the sense inputs via the five physical senses, we also get sense inputs DIRECTLY to the mind. These are “past memories and future hopes” that just come to the mind, and are *mano viññāṇa*. Even though they seem to come to the mind due to no reason, it also happens due to the mind DIRECTLY receiving a past memory (called *dhammā*; this *dhammā* is different from *dhamma* in Buddha Dhamma).

- This process is stated as “*manañca paṭicca dhamme ca uppajjati manovīññāṇaṃ*,” or “mind consciousness arises when a *dhammā* (or a past memory) is received by the *mana indriya* or the mind.”
- This event is also “just consciousness”, remembering a past event or a future expectation; for a deeper discussion, see, “[What are Dhammā? – A Deeper Analysis.](#)”

5. Therefore, the mind can “receive” six types of “sense inputs”, i.e., the mind becomes “aware of” or “becomes conscious about” those six types of sense events.

- **Based on those, the mind may “take actions” (to think further, to speak, or to act using the body). Those are called *vacī* and *kāya saṅkhāra*.**
- Those *saṅkhāra* then lead to a defiled mindset or a “defiled *viññāṇa*” via the *Paṭicca Samuppāda* (PS) process. **Therefore, such “defiled *viññāṇa*” can arise only via PS processes.**
- **And that happens ONLY IF the mind gets attached to that sense input (an attractive figure, a pleasing sound, tasty food, nice smell, soothing touch, or an important past event (or planned future event)).**

6. **Please read the above points in #5 very carefully again and again, until the concept is understood.** This is the key to understanding the key Pāli words *saṅkhāra* and *viññāṇa* and also the concept of *Paṭicca Samuppāda*.

- Whenever we willingly grasp something (or whenever we get attached to something), whatever results from that action has corresponding nature. Because one got attached willingly, a similar *bhava* (existence) will result: i.e., *pati+icca* leading to *sama+uppāda* or *Paṭicca Samuppāda* (PS).
- Here, “*pati+icca*” means “getting attached willingly” and “*sama+uppāda*” means “giving rise to a corresponding (similar) existence.” [*uppāda* :[m.] rising; **coming into existence**; birth.]

7. The “existence” one gets is according one’s own *saṅkhāra* that are generated according to one’s mindset. As we have discussed before, first *mano saṅkhāra* arise automatically based on one’s *gathi* (or *gati*) , when one gets attached to a sense event.

- **Then if one does not act with mindfulness (i.e., does not see the bad consequences of generating such thoughts), one will start generating *vacī saṅkhāra*.** If one’s emotions get strong enough, one could start speaking (more *vacī saṅkhāra*), and even taking bodily actions (*kāya saṅkhāra*). A deeper discussion at, “[Correct Meaning of Vacī Saṅkhāra.](#)”
- We will first consider a PS process that happens many times during a given lifetime. This PS process is not discussed in the *Visuddhimagga* or any current English texts on Buddha Dhamma.

8. **In *pavutti* PS, *bhava* or existence refers to a “temporary existence” during a given lifetime.** *Pavutti* basically means “current.” [*pavatti* : [aor. of *pavattati*] moved on; proceeded; existed. (f.) **happening**; incident; news.]

- In the most fundamental sense, a “greedy state of mind” will result when we get attach with greed, i.e., one develops a habit or *gathi* or *bhava* corresponding to that state of mind; a “hateful

state” (habit/*gathi/bhava*) results via hateful attachment; acts of greed and/or hate are always done with ignorance.

- The *pavutti* PS, which describes how we develop certain habits or *bhava* or *gati* during a given lifetime. It is often easier to use an example to illustrate these PS cycles.
- *Pavutti* PS is important because the habits (*gati*) that we cultivate during this lifetime can feed the *uppatti* PS process leading to future rebirths. [*uppatti* :[f.] rebirth; coming forth; origin.]

9. Let us examine how a teenager becomes an alcoholic, using the *pavutti* PS. The teenager become friendly with a group of other teenagers who are into drinking. Initially, he may be reluctant to join in, but due to ignorance (*avijjā*) he joins them and starts drinking.

- If a good friend or a family member came to know about the situation they could have prevented the teenager from associating with such bad company, i.e., ignorance could have been dispelled by explaining to him the adverse effects of not only drinking, but also of associating with such a group.
- Now we will examine in detail how this happens.

10. The PS cycle thus starts with “*avijjā paccayā saṅkhāra*”; due to ignorance of the adverse results, the teenager starts drinking with that group (*saṅkhāra* = “*san* + *khāra*” or actions of accumulating, in this case bad *kamma*).

- The more he is involved with such drinking activities, the more he thinks about it and develops a “defiled mindset” or a “defiled *viññāṇa*” for that activity. This is “*saṅkhāra paccayā viññāṇa*.”
- This is explained in detail in the previous post: “[Connection Between Saṅkhāra and Viññāṇa](#).”

11. When he really begins to like drinking, he starts thinking about it even while doing other things. **This is “*viññāṇa paccayā nāmarūpa*” step.**

- In this case, *nāmarūpa* are the mental images associated with that *viññāṇa*, i.e., the names and shape of particular alcohol bottles, the places where he normally drinks, the friends who drink with him, etc.
- He also thinks about the next “event” and visualizes the scene, all these are associated *nāmarūpa*. Thus, here *nāmarūpa* are the mental images of “things” and “concepts” that one would like to enjoy.
- “*Nāma*” means “name” assigned to a person/object, “*rūpa*” means “spatial profile” associated with that *nāma*.
- “*Nāmarūpa*” are the “mental images” together with the associated feelings (*vedanā*), perceptions (*saññā*), *saṅkhāra*, and *viññāṇa*, the COMBINED effect of “*nāma*” and “*rūpa*.”

12. Now his six senses become “involved” to provide a reality to those *nāmarūpa*; to provide the desired sense pleasures. In Pāli terms, the six *indriya* (senses) become “*āyatana*.” For a lack of a single English word, I will call an “*āyatana*” an “import/export facility”, and really get involved in the actions associated with drinking events.

- Eyes are used as *indriya* when they are used just to identify things out there. When eyes are used to repeatedly look at an object TO ENJOY IT, then the eyes are used as “*āyatana*.”
- His mind is often thinking about the next “event” (where, when, with whom, etc), he makes necessary preparations for the “event” using all six senses (now *āyatana*s), that are in accordance with the *nāmarūpa*.
- **Therefore, this is the “*nāmarūpa paccayā saḷāyatana*” step**, where *saḷāyatana* means the six *āyatana*: the eye is now not merely for seeing, it has become an assistant in the lookout for a “good drink” or a “good friend to chat with”, etc.

13. **Then we have “*saḷāyatana paccayā phassa*,” i.e., all six *āyatana* become actively engaged making contact with relevant sense objects.**

- His eyes are on the lookout for a favorite drink or a favorite person to chat with, etc. Here instead of *phassa*, it is (more appropriately) called “*samphassa*” (= “*san*” + “*phassa*”), where “*san*” implies it not just contact, but a “*san*” contact.
 - This may be a good time to review the term “*san*,” if you have not already done so: [“What is ‘San’? Meaning of Sansāra \(or Samsāra\).”](#)
14. Such “*samphassa*” lead to *vedanā* (feelings), i.e., “(*san*)*phassa paccayā vedanā*.” He experiences “good (but immoral) feelings” with all those sense contacts.
- Because of such “good feelings”, he gets further attached: “*vedanā paccayā taṇhā*”; see, [“Tanhā – How We Attach via Greed, Hate, and Ignorance.”](#)
15. Now comes, “*taṇhā paccayā upādāna*.” *Upādāna* means “grabbing or getting hold of something automatically” like an octopus grabbing its prey with all its eight legs.
- In the present case, the teenager wants very much to re-live this experience, and he gets immersed in it; when he is experiencing the event his mind is totally absorbed in it; he does not think, and does not have the mindset to think about, any adverse consequences. This is the critical “habit forming” or “*bhava* forming” step.
16. So, the next inevitable step is, “*upādāna paccayā bhavo*”; this particular state of getting drunk becomes more and more ingrained in his mind. It becomes “a *bhava*” or “existence” or habit that is of importance to him. He very much wants to re-live that experience.
- And that is exactly what he gets: “*bhava paccayā jāti*.” This “*bhava*” or the *kamma* seed is now well established, and he can be born in that state quite easily. All he needs is an invitation from a friend, or even a sight of a bar while travelling, for example.
 - It is natural to get into that state, or be “born” in that state. So, he gets drunk at every opportunity. See, [“Bhava and Jāti – States of Existence and \(Repeated\) Births Therein”](#) for more details.
17. However, like everything else, any birth is subjected to decay and suffering: “*jāti paccayā jarā, maraṇa...*, *eva me tassa dukkhandha samudhaya hoti*,” i.e., “the whole mass of suffering.”
- But in the case of a single drinking event, that state of intoxication comes to an end, possibly with a big headache and a huge hangover. That episode ends with nothing to show for it, but a hangover.
 - Even worse, now he is “hooked”; he has formed a bad habit, which only strengthens even more if he does it again and again. Because each time, the PS runs, the *viññāṇa* for that habit gets more fuel, and the *bhava* gets stronger.
18. The more the teenager gets trapped in that *bhava*, the more *jāti* that occurs, i.e., more frequently he will be drunk.
- And it is not even necessary to participate in a “drinking event” to run another PS cycle. He may be sitting at a desk trying to study, and may start going through the PS cycle MENTALLY.
 - He can start right at “*avijjā paccayā saṅkhāra*” and be generating *vacī saṅkhāra* (*vitakka/vicāra* or planning), thus generating (and strengthening) the *viññāṇa* for drinking, generating *nāmarūpa* (visuals of places, friends, alcohol bottles, etc), and thus going through the rest of the cycle: *saḷāyatana*, *samphassa*, *vedanā*, *taṇhā*, *upādāna*, *bhava*, *jāti* (“living it”), repeatedly.
 - Thus numerous such PS cycles can run at any time, probably increasing its frequency as the *bhava* or the habit builds up. The stronger the *bhava* or habit is, it will be harder to break it.
 - This is why meditation together with another good habit to work on should be undertaken to replace a bad habit. While in meditation, one can contemplate the adverse consequences of the bad habit.
19. It is important to realize that the above PS cycle does not run to its conclusion when the drinking “event” is over. Rather the cycle can run repeatedly unless it is stopped willfully, deliberately.

- **And the way to do that is to act with “mindfulness” and stop those bad first conscious thoughts (*vacī saṅkhāra*) that start arising.** This is the key to “real *Ānāpāna* and *Satipaṭṭhāna* meditations” in Buddha Dhamma.
- Then one would be stopping the “*avijjā paccayā saṅkhāra*” step. That will stop “bad *viññāṇa*” from arising or being cultivated by the elimination of “*saṅkhāra paccayā viññāṇa*” step. That will of course stop the end result of suffering.

20. If those *abhisāṅkhāra* cultivated get strong enough, they can lead to future births as well. The rebirth process proceeds via the *uppatti* PS process, which is very similar; see, “[Paticca Samuppāda](#).”

- Therefore, it is the same principle that will eventually stop “long-term suffering” in the rebirth process via the *uppatti* PS process.

4.1.6 **Breath Meditation Is Addictive and Harmful in the Long Run**

January 15, 2019; revised January 21, 2020

I receive many questions from people who insist that breath meditation “works.” Breath meditation can indeed provide a relief that can be exhilarating for those who have not experienced a “permanent cooling down.” The latter is harder to get and require a determined effort, but will be a permanent solution to the “problem of existential suffering.”

Introduction

1. Doing breath meditation to achieve a “temporary relief” from the “suffering in this world” is like taking an aspirin or a tylenol or a sleeping pill to get relief from a headache. If that headache has a root cause in the onset of cancer in the body, then taking aspirins will only allow the tumor to grow. In the same way, breath meditation does absolutely nothing to remove the root causes (greed, anger, ignorance.)

- One needs to get long-term medical treatment to get rid of cancer. Then the headaches will also go away.
- In the same way, to stop future suffering from arising, one needs to remove defilements (greed, hate, and ignorance) from one’s mind. Then all the mental stresses will also go away permanently.
- It makes sense to get a temporary relief using a pill, but one **MUST** start working on a long-term solution for the root cause of cancer.
- In the same way, it is OK to do a bit of breath meditation to deviate the mind from a stressful situation, but it is unwise to use it as a long-term solution.

2. The problem here is that many people get “addicted” to breath meditation, just as a drug addict starts an addiction by getting used to “taking a pill” to get to an “ecstatic state of mind” for a few hours.

- The problem is that the drug addict will have to keep increasing the dose with time to get the “same kick.”
- Even though breath meditation is not directly harmful like drug addiction, it is dangerous in the sense that it will shift the focus from the primary goal of a permanent solution to the “problem of suffering.”
- Furthermore, breath meditation can lead to *anāriya jhāna*, and that is a trap. Once people start enjoying *jhāna*, they even equate that to *Nibbāna*. I will discuss this later on.
- The Buddha always analyzed a given problem in detail so that one could get a clear picture of the whole situation. So, let us analyze possible causes for the agitation of the mind.

Heating of the Mind Due to Too Many Sense Inputs

3. The mind can focus on only one thing at a time. However, it **SEEMS** that we can see, hear, smell, taste, touch, and also think about concepts all at the same time.

- For example, when watching a movie, we see and hear the film, and also be thinking about the movie plot. If we are eating popcorn, we can touch, smell, and taste popcorn too. So it SEEMS that we are using all six sense faculties “at the same time.”
- But we have that perception of a mind engaged in all at once only because the mind is VERY FAST. It can go back and forth among the six sense inputs at an incredibly fast rate.
- The Buddha said that the mind is the fastest entity in the world.

4. But in the above example, the mind (or more accurately the brain) gets overworked. All those sensory inputs need to be processed by the brain, which is like a computer. You may have seen that a computer can get “overheated” when it is running too many applications at the same time.

- That is why we cannot watch movies all day long. If we watch even two movies without a break, we are likely to get a massive headache. The brain gets overloaded.
- So, this is one kind of stress that we feel. It is simply due to the mind (and the brain) trying to process too many sensory inputs.
- There is another, more important, way that a mind can get stressed. That may not be obvious to many. Let us discuss that now.

Heating of the Mind Due to Greed, Hate, and Ignorance

5. Do you remember the last time when you got outraged? How did that feel? You get hot. The whole body becomes hot and agitated; blood pressure goes up; face becomes dark because the blood becomes dark (By the way, this is clear evidence that the mind can affect the body).

- This “burning up” is called “*tāpa*” in Pāli (pronounced “thāpa”; තෘප්‍ය in Sinhala), and is due to greed, hate, and ignorance. “*Ātāpi*” means the opposite, “cooling down via getting rid of those defilements.”
- That is the “fire” discussed in detail in the [WebLink: suttacentral: Ādittapariyaya Sutta \(SN 35.28\)](#).
- Therefore, “*ātāpi sampajāno*” means “remove the fire or heat” from one’s mind by being aware of the ‘*san*’ or “immoral tendencies.”
- When someone can get to the “*ātāpi sampajāno*” state, one feels calm and “cooled down”; see, “[Kāyānupassanā – The Section on Habits \(Sampajānapabba\)](#)” and other sections in “[Mahā Satipatthāna Sutta](#).”

6. When one acts with greed, “heating up” still happens, may be to a lesser extent than when one is angry. As a kid, when I was stealing something, I felt heated and uncomfortable.

- The same is true when one acts with ignorance too. One is not confident whether that is the right thing to do; the mind goes back and forth: is this right or wrong? Should I do it or not? That is called “*vicikicchā*” in Pāli. Because one does know, one is not confident, one becomes anxious, and the body gets heated up.
- On the other hand, do you remember how you felt when you made someone happy, either via a good deed or word? You cooled down; it felt good. Didn’t you feel the opposite of when you got mad?

7. Thus, when one gives up acting with hate, greed, or ignorance, one becomes less agitated, at ease, with a sense of peacefulness. One can enhance this calmness by also engaging in moral deeds – this is *sīla* or ethical conduct.

- Giving up an immoral lifestyle and engaging in moral activities is the basis for getting to *Nibbāna*, the ultimate “cooling down.”
- As one can see the benefits of cooling down, one will avoid actions done with hate, greed, and ignorance. And one will be looking forward to doing act of goodwill, generosity, and with mindfulness.
- Avoiding greed, hate, and ignorance is the same as preventing *dasa akusala*.

Mind Can Handle Only One Sense Input at a Time

8. In #3, #4 above, I mentioned that the mind could focus on only one sensory input at a time. Let us take an analogy to see why that is so.

- We all have seen a “ring of fire” at some circuses. The performer rotates a long stick with burning torch, and it looks like a “ring.” Yet, we know that it is not really a “ring,” but it is just the fast rotation that “fools our eyes” to be seen as a continuous ring.
- The light is coming from only one point on the circle at a given time. But we see it as a continuous ring; see #13 of [“Do I Have “A Mind” That Is Fixed and “Mine”?”](#)

9. In the same way, at a given instant, only one sensory input is processed by the mind: seeing, hearing, smelling, tasting, touching, or contemplating. They come in packets of about a few milliseconds (a millisecond is a thousandth of a second).

- Yes. Scientists have done systematic studies in recent years to confirm this picture that the Buddha explained in *Abhidhamma* 2500 years ago!

10. For example, we may see a snapshot of the movie at a given instant. A few milliseconds later, we hear a word, followed by the brief smelling of popcorn, and so on. They go through the mind very fast, and we FEEL LIKE we are experiencing all those at the same time.

- The mind can sort all those different sensory inputs and present a cohesive continuous picture. That is the magic of the mind.
- Even just the movie itself is a series of static pictures projected on the screen at a fast rate, above 20 frames per second. If we slow down the projector, we will be able to see individual frames very similar to a picture taken by a camera.
- A movie camera takes 24 frames a second. When projected on the screen, it appears to be continuous.

11. That is why the Buddha said that the mind is like a magician. The fast mind can give us the impression of experiencing many things at the same time. But it is a series of discrete events happening VERY FAST.

- **All those sensory inputs need to be processed by the brain for the mind to experience them.**
- If there are too many, that leads to stress in the mind and in the brain. That is why one could get a headache by watching too many movies or television programs.
- Even if it is just one sense input (say, looking at an attractive person and generating lustful thoughts), that itself can lead to stress (even though most people do not feel it that way). Here the real stress is masked by one's anticipation of sense pleasures.

Why Breath Meditation “Works” on Temporary Basis

12. Now we have discussed three things that come in to play.

- A mind (with the help of the brain) can process only one sensory input at a time. But it handles a large number of such inputs in a second so that we have the illusion that we are experiencing many things at the same time.
- If the mind is experiencing many sense inputs (called *ārammaṇa* in Pāli) — like watching a movie and eating popcorn — both the brain and mind get stressed out or get “overheated.”
- Another type of “heating” happens with greedy, hateful, and ignorant thoughts. Even if one focuses on one thing (say anger on someone), the mind gets heated internally, and that is called “*tāpa*” in Buddha Dhamma.

13. When we focus the mind on the breath, we are forcing the mind to “stay focused on just feeling the breath.” The mind is staying on one “thought object” and not running back and forth among many. Also, the brain virtually has no “load” to process.

- That also avoids the more subtle yet essential “heating up” is due to greedy, hateful, or ignorant thoughts from coming to the mind.

14. Now we can see why “breath meditation works” temporarily.

- **It disengages the mind from too many sensory inputs** and forces them to stay on one task. That is really the easiest to see.
- **Furthermore, it also removes the possibility of sensual, hateful, or even ignorant thoughts arising in the mind.** The mind is OCCUPIED with one harmless sense input: monitoring the breath or something like that.
- You can prove this for yourself by focusing the mind on the up and down movement of your belly. In mundane *kasina* meditation, yogis focus the mind on a *kasina* object. Since most of you are used to breath-meditation, it may appear to be better. But if you spend time doing any other type, like *kasina* meditation, you will get used to it.

Breath Meditation: Addictive and No Long-Term Benefits

15. As you can see, “breath meditation” can be useful in solving the first problem: It can keep the mind on a single focus.

- While it can find a temporary solution to the problem of “internal heat generation” (*tāpa*) by SUPPRESSING the root causes (greed, hate, and ignorance), it is not able to permanently remove them.
- Then they can be “triggered” (or made to come to the surface) when a strong sense input (like seeing an attractive figure). The the “agitation” will be back.
- There is a second problem: **When we have those lurking in our minds, we tend to do *dasa akusala* too, which will also lead to more suffering in the future.**
- Therefore, REMOVING (instead of just suppressing) greed, hate, and ignorance will benefit in the short term as well as in the long run.
- That permanent solution is in the real *Ānāpānasati bhāvanā* in Buddha Dhamma.

16. As we discussed earlier, someone in pain feels the need to keep taking pain relievers to avoid the pain. A drug addict feels the need to keep taking drugs to maintain the “high.”

- In the same a way, a person engaged in breath meditation feels the need to do it on a regularly to “maintain the calmness.”
- If one does this all day long for several days (while at a retreat), one really starts feeling a “sense of great relief.”
- But when one leaves the retreat and gets back to the “rat race,” all those agitations come back.
- I know several people who go to retreats to get “refueled” regularly. Getting addicted to breath meditation can be harmful in that way. One is wasting precious time in doing something that will only provide a short-term solution AND is preventing one from undertaking a long-term PERMANENT solution.

The Better Solution – Real *Ānāpānasati/Satipaṭṭhāna*

17. The better way is to systematically get rid of the tendencies for such greedy, hateful, and ignorant thoughts to come to mind and stay there.

- One cannot accomplish that in a few days. It needs an effort in two ways: First, one needs to understand why greed, hate, and ignorance (*dasa akusala*) give rise to “heating of the mind” or *tāpa*.
- At the same time, one needs to live a moral life with minimum burdens. We will live only for about 100 years at most. Is there a point in amassing a huge sums of money or luxurious things, only to leave all that behind at death?
- The more things one “owns,” the more stressful it will be one’s mind. One’s mind will be burdened all the time.
- Of course, that does not mean one should endure poverty and suffering. We should ALWAYS minimize suffering. That is the “middle way” prescribed by the Buddha.

18. That seems to be simple enough, and it is. But there are many more details on how one can increase this “relief” or “cooling down” or “*ātāpa*.” But it is a step-by-step process.

- The relief from this “heat” or “burning” does happen, especially after one gets on the Noble Path, by comprehending the root causes for this stress.

19. Many people tell me that they cannot focus their minds and do a meditation session without concentrating on the breath. If they try to meditate on a Dhamma concept, the mind tries to fly off in different directions.

- The solution is simple. It is not essential to do “formal meditation sessions” in the beginning.
- If you read the [WebLink: suttacentral: Sabbāsava Sutta \(MN 2\)](#) carefully, you will see that *bhāvanā* is **essential** only after the *Sotāpanna* stage (“*āsavā dassanā pahātābbā*”), to get to the *Sakadāgāmi* stage and beyond (“*āsavā bhāvanā pahātābbā*”).
- What is really needed is “contemplation” and “examination,” which is *vīmaṃsā* (also related to *dhammavicaya sabbojjhaṅga*), though that could be also called “*bhāvanā*.”

20. In any case, it is good to understand and practice the real *Ānāpānasati/Satipaṭṭhāna bhāvanā*. **That means what to take into the mind and what to be rejected from the mind**). That can be done even before getting to the *Sotāpanna* stage.

- The most important first thing is to learn true Buddha Dhamma and live a moral life (*sīla*) while engaging in meritorious deeds like giving and helping out others in need.
- This will help maintain one’s focus on learning Dhamma concepts first. Then one would be able to do formal meditation sessions without the help of breath meditation.

4.1.7 **Ānāpānasati Eliminates Mental Stress Permanently**

January 21, 2019

Introduction

1. In the last post we discussed how focusing the mind on breath CAN calm a mind. But we also saw that any relief one gets is temporary. Here we discuss the *Ānāpānasati* that is in the [WebLink: suttacentral: Ānāpānasati Sutta \(MN 118\)](#).

- We also briefly discussed in the previous post the idea that in order to permanently REDUCE and eventually REMOVE the “mental stress” we need to purify our minds. .”
- Here we will discuss some details, and show the connection to *dasa akusala* and *Paṭicca Samuppāda*, key concepts in Buddha Dhamma.
- You may want to read the earlier post: [“Breath Meditation Is Addictive and Harmful in the Long Run.”](#)

2. From the sutta (MN 118): “*Ānāpānassati, bhikkhave, bhāvitā bahulikatā mahapphalā hoti mahānisamsā. Ānāpānassati, bhikkhave, bhāvitā bahulikatā cattāro satipaṭṭhāne paripūreti.*”

Cattāro satipaṭṭhānā bhāvitā bahulīkatā satta bojjhaṅge paripūrenti. Satta bojjhaṅgā bhāvitā bahulīkatā vijjāvimuttiṃ paripūrenti.“

Translated:

“*Bhikkhus*, when *Ānāpānassati* is developed and cultivated, it is of great benefit leading to ultimate release. **When *Ānāpānassati* is developed and cultivated, it fulfils *cattāro satipaṭṭhāna* (the four foundations of mindfulness)**. When the four foundations of mindfulness are developed and cultivated, they fulfil the seven enlightenment factors (*satta bojjhaṅga*). When the seven enlightenment factors are developed and cultivated, **they fulfill ultimate knowledge and release (*vijjāvimuttiṃ paripūrenti*)**.”

- So, *Ānāpānassati* and *Satipaṭṭhāna* are the same and both lead to *Nibbāna* (*Arahanthood*). *Satipaṭṭhāna* describes the steps in more detail, but the key is to first understand what is meant by *Ānāpāna*.
- **Here we discuss the basic ideas of *Ānāpānassati bhāvanā***. Details at: [“*Bhāvanā* \(Meditation\).”](#)

An Example of Getting Angry

3. We start with a simple case of getting angry. Being angry makes one turns into a totally different person as we briefly mentioned in the last post.

- Not only one will have an agitated (and uncomfortable) state of mind, but one’s body complexion will change too. One’s face becomes “very unpleasant” even to look at.
- With that agitated mindset, one may do something really bad (even hit or kill someone if things get out-of-control).
- Now, let us see WHY we get angry.

4. The root cause of anger is greed. We get mad when someone or something gets in our way to prevent us from getting something that we really crave. Therefore, *vyāpāda* (anger) arises out of *abhijjhā* (greed).

- Note that *abhijjhā* and *vyāpāda* are the first two of *pañcanīvaraṇa* (five “hindrances”): **they are a “hindrance” to a calm state of mind!**
- Furthermore, *vyāpāda* can bring rebirths in the *niraya* (hell), while greed can bring rebirths as hungry ghosts (in *preta* or *peta* realms). **Thus *vyāpāda* is worse than *abhijjhā***.

Why Some People Get Angry Than Others?

5. As the Buddha always pointed out, in order to eliminate a problem, we must first find the causes that give rise to that problem. Then when we eliminate those causes, the problem will NOT ARISE anymore. That is the meaning of the word, “*nirodha*” (“*nir*” + “*udā*”). *Dukkha nirodha* is “eliminating future suffering.”

- When one understands *dukkha samudaya* (“*san*” + *udaya*” or how “*san*” give rise to suffering), then one can understand *dukkha nirodha* or how to stop suffering from arising; see, [“What is “San”? Meaning of Sansāra \(or Samsāra\).”](#)
- The tendency to get angry is a *gati* (pronounced “*gathi*”), which can be loosely translated as a “character quality”, which gets established firmly if one has made it to be a habit.
- The more angry one gets (this is what is really meant by “*āna*” in *Ānāpānasati*), more will the “tendency to get angry” becomes. This is important to understand.

6. This has been established in neuroscience in recent years. Our brains (or more accurately neural circuits in the brain) get “wired” for certain habitual activities. **The more we do something, the easier it becomes to do it again.**

- That holds not only for “defiled activities” like getting angry, to “getting addicted to do something on a regular basis like smoking and drinking, to eating too much, or even harmless (and useful) habits like driving.
- For example, after one learns to drive, it becomes a habit. When we drive, we are mostly on “auto pilot”, especially if it is a regular drive like driving to work every day. Here is an article that is an easy read: [“WebLink: healthtransformer.co: The Neuroscience of Behavior Change.”](http://WebLink:healthtransformer.co:The%20Neuroscience%20of%20Behavior%20Change)

7. Therefore, the trick to stop getting angry is to “try to stop that anger when one becomes aware that one is angry” (this is what is really meant by “*āpāna*” or put out or get rid of, in *Ānapāna*, which comes from “*āna*” + “*āpāna*”). Many Pāli words are shortened to rhyme.

- The long-term solution is to think about the CONSEQUENCES of such an angry mindset, and focus one’s attention deliberately on a neutral or a “pleasing thought object”, say visualizing a calm Buddha image in one’s mind.
- If such an angry mindset comes to one’s mind while in a formal meditation session, then one COULD do “breath meditation” for a few minutes to get the mind off of that mindset.
- The easiest is to just to count to 10 in order to quickly stop the incoming thought and then to think about the bad consequences of such an angry mindset.
- **The key point is that “stopping these angry thoughts from arising” MUST BE DONE any time and all the time, whether one is in formal meditation or just engaged in regular activities.**

8. Thus a critical aspect of being able to stop such bad thoughts is to really understand the bad CONSEQUENCES of having such thoughts (which would feed that bad *viññāṇa* and could even lead to bad bodily actions).

- Therefore, an understanding of the bad consequences of immoral deeds and thoughts (*kamma vipāka* resulting from bad *kamma*) will be valuable.
- See, for example: [“Kanha \(Dark\) and Sukka \(Bright\) Kamma and Kammakkhaya”](#) and [“How the Buddha Described the Chance of Rebirth in the Human Realm.”](#)

How That Bad *Viññāṇa* Was Created in the First Place

9. Now we need to see how this “*viññāṇa* of enemy Y” is created and where it exists. This is what is explained in *Paṭicca Samuppāda*. Don’t worry. It is easy to see this process.

- Let us take an example. Persons X and Y were competing for something that they crave: a girl friend, a job, an elected position, we can think about many possible scenarios. But suppose X starts hating Y because Y is competing to win the heart of a girl.
- Now, every day X is thinking about how to block Y from “getting the girl.” He may try to get Y kicked out of his job or to physically hurt or even kill Y.
- These conscious angry thoughts about Y are *vacī saṅkhāra* generated by X.

10. That is how a *Paṭicca Samuppāda* process starts with “*saṅkhāra paccayā viññāṇa*.”

- The more one does any type of *saṅkhāra* (*mano*, *vacī*, and *kāya*), the more strong that “*viññāṇa* of enemy Y” will become in X’s mind.
- In simple terms, that means thinking about harming Y, speaking against Y, or doing something to hurt Y. All those activities will help that “*viññāṇa* of enemy Y” to grow.

11. When X is consciously generating such “bad thoughts” about Y, then X will be **imagining (creating) scenarios in one’s mind** of hurting Y in some way. This could be telling a lie about Y’s character to the girl in question or his boss, for example. Or it could even be creating in his mind how he will ambush Y and carry out a physical attack.

- This is called creating “*nāmarūpa*” (creating various scenarios) in one’s mind: “*viññāṇa paccayā nāmarūpa.*”
12. That will initiate the next step: “*nāmarūpa paccayā saḷāyatana.*”
- The more bad thoughts (*vacī saṅkhāra*) that X generates, his all six sense faculties (*saḷāyatana* or six *āyatana*) will start getting involved. He will be looking to see (using *cakkhāyatana*) whether Y is talking to that girl, and he may write a nasty email about Y to his boss (using *kāyāyatana*), etc.
 - Of course, some of these steps occur simultaneously, and go back and forth too. For example, “*nāmarūpa paccayā viññāṇa*” happens as well as “*viññāṇa paccayā nāmarūpa.*” In other words, more “*nāmarūpa*” X makes in his mind, his bad *viññāṇa* will grow too.
13. Each of such activities will lead to contact with “*san*” (his greed towards the girl and hate towards Y), via “*saḷāyatana paccayā (san)phassa*” or “*saḷāyatana paccayā samphassa.*”
- That invariably leads to the next step: “*samphassa paccayā vedanā,*” which is also known as “*samphassa ja vedanā,*” i.e., X is now generating a lot of “**angry feelings that arise due to hate,**” which leads to “*vedanā paccayā taṇhā.*”
14. It is important to note that “*taṇhā*” is not just greed. *Taṇhā* really means “getting bonded to a situation via greed or hate.”
- Now X cannot let go of it, and now he pulls it even closer: “*taṇhā paccayā upādāna*”: *upādāna* (“*upa*” + “*ādāna*”) means ‘pulling closer’ (in the mind).
 - This leads to the next critical step of “*upādāna paccayā bhava.*” This is where that “*kammic energy*” that was initially created via the “*viññāṇa* of enemy Y” gets really established in the *kamma bhava*. It is easier to just think of “*kamma bhava*” as a form of energy that stays out there in the universe (just like visible *rūpa* are out there).
 - This energy is also called *dhammā* (with a long ā) that can come back to one’s mind at times. That is how the “subconscious” works, and we will discuss that at a later time.

Paṭicca Samuppāda processes are described in detail at: “[Paṭicca Samuppāda.](#)”

Viññāṇa, Kamma Bhava, Kamma Bija – Related to Each Other

15. **We can see that both *viññāṇa* and *bhava* are associated with *kammic energy*.** The easiest way to remember is that *kamma bhava* is where *kammic energy* is, and **those various types of *kammic energies* (good and bad) are *kamma bija* (seeds, pronounced “beeja”) in the *kamma bhava*. They are waiting to bring *kamma vipāka* or the results of those *kamma*.**

- When we do good *kamma* (say donating food to needy), we also create good *kamma bija* in the *kamma bhava* that can bring future “good *vipāka*” or “good results.”
 - Therefore, there are good and bad *kamma bija* (seeds) waiting in the *kamma bhava*, to bring in *kamma vipāka*, so to speak.
 - **Just like a seed can give rise to a plant, a *kamma bija* can give rise to a *kamma vipāka*. A good seed will give rise to a good plant (something useful, say apples or grains), and a bad seed will give rise to a bad plant (weeds).**
16. When a *kamma bija* brings a *kamma vipāka* to the mind, it leads to a mindset that is compatible with the *kamma vipāka*; that is *viññāṇa*.
- **Therefore, a *viññāṇa* can be good too (in a mundane sense), for example, when engaging in a meritorious deed. We first need to get rid of “bad *viññāṇa*.” All *viññāṇa* are reduced to “pure consciousness” at the *Arahant* stage. It may take some time to grasp this point.**

- Earlier we saw (#8-#13) that *viññāṇa* is the “initiator” of a *kamma bija* that is “deposited” in the *kamma bhava*. Then that *kamma bija* will be waiting for right “conditions” to bring that mindset back to the mind.
- Then that mindset (*viññāṇa*) can lead to doing more *saṅkhāra* (and *kamma*) that will in turn make that *viññāṇa* to grow; that will in turn lead to strengthening the corresponding *kamma bija* in the *kamma bhava*.
- Then a corresponding *gati* (or *gathi*) is established. It is important to understand what is meant by *gati*. **Then it will be easier to show different *gathi* (including the “angry *gathi*” of X that we discussed above) are established.**

See, [“The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Asavas\),”](#) [“How Habits are Formed and Broken – A Scientific View,”](#) [“Gati to Bhava to Jāti – Ours to Control.”](#)

Putting It All Together – These Fundamentals Are Essential

17. So, now we are starting to see the connections among these different terms: *saṅkhāra*, *viññāṇa*, *bhava*, *kamma bija*, *gati*, *Ānāpānasati*, etc.

- Whenever you have time, you may want to go back and read relevant previous posts. With repeated readings, things will become much more clear.
- In the *suttā*, the Buddha used this pattern of repeating stuff over and over. That makes it easier for these concepts to sink in.
- Please don't hesitate to ask questions if something is not clear.

18. **Understanding Buddha Dhamma is all about understanding the steps in *Paṭicca Samuppāda*:**

“*Yo paticcasamuppādam passati,
so Dhammam passati.
Yo Dhammam passati,
so paticcasamuppādam passati*”

“One who sees *paticcasamuppāda*
sees the Dhamma.
One who sees the Dhamma
sees *paticcasamuppāda*.”

([WebLink: suttacentral: Mahāhatthipadopama Sutta \(MN 28\)](#)); at the end)

- If one to understands *Paṭicca Samuppāda*, one needs to understand all these key terms like *saṅkhāra*, *viññāṇa*, *bhava*, *kamma bija*, *gati*, *Ānāpānasati*, etc.
- Other relevant posts are listed below. **The more one reads and contemplates on, the more one will be able to understand:**

“[“Viññāṇa – Consciousness Together With Future Expectations,”](#) [“Introduction to Citta, Vedanā, Saññā, Saṅkhāra, and Viññāṇa,”](#) [“Four Noble Truths – Suffering and Its Elimination,”](#) [“Connection Between Saṅkhāra and Viññāṇa.”](#)”

4.1.8 Ānāpāna and Satipaṭṭhāna – Fundamentals

January 30, 2019

1. *Mahā Satipaṭṭhāna Sutta* (DN 22) just describes in more detail the *Ānāpānasati bhāvanā* that is in the *Ānāpānasati Sutta* (MN 118).

- This post discusses the fundamentals related to both *suttā*. More details at: [“Mahā Satipaṭṭhāna Sutta.”](#)

2. One synonym for *Nibbāna* is “cooled state”, which means the mind is “permanently cooled down.” There can be no anger, greed, or ignorance can arise such a mind.

- However, we start at a more basic state. When we start doing real *Ānāpāna/Satipaṭṭhāna*, we will start feeling a PERMANENT relief from our stressed minds.
- On the other hand, “breath meditation” provides only a temporary relief.

3. We discussed how our thoughts can affect our minds in the previous post, “[Breath Meditation Is Addictive and Harmful in the Long Run.](#)”

- When angry thoughts arise, one’s whole body becomes hot and agitated; blood pressure goes up; face becomes dark, because the blood becomes dark.
- On the other hand, when one has compassionate thoughts in one’s mind, one’s mind feels joyful and it shows up in the face too.

4. Some people are more prone to generating angry thoughts; others are more like to generate compassionate thoughts. In other words, some people have “angry *gati*” while other have “compassionate *gati*.” Previously we discussed that there are a wide variation of *gati* ranging from very bad to very good.

- Of course, these *gati* do not show up all the time. Even a person with “angry *gati*” must be provoked for such angry thoughts to arise.
- In Buddha Dhamma’s language, a person with “angry *gati*” has “anger hiding in the mind” waiting for a trigger to come to the surface. These are called “*anusaya*” or “*kilesa*” (hidden defilements).
- The key word *gati* (pronounced “gath”) is related to one’s habits and character; see “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Asavas\).](#)”

5. We can take an analogy to clarify this. *Anusaya* can be compared to dirt at the bottom of a glass of water. If the glass is not disturbed, the dirt will settle at the bottom, and the water may look clean at the top.

- If there is a lot of dirt at the bottom of the glass, only a slight disturbance can make the dirt come up and make the water dirty. But if it is only a little bit, most minor disturbances may not make the water dirty.
- Just like that, the more *anusaya* (or corresponding defilements) one has, it will be easier for them to come to the surface. If one has “very angry *gati*,” that person would be easy to be angered.

6. On the other hand, if there is no dirt at the bottom of the glass, no matter what kind of disturbance it is, the water will remain pure.

- The mind of an *Arahant* is like that. He/she can live totally unaffected surrounded by the world’s most tempting sense objects.
- We have a long way to get to the *Arahant* stage. But we can start getting rid of these “bad *gati*” or “*anusaya*” or “defilements” by cultivating the correct *Ānāpāna/Satipaṭṭhāna*.
- When one’s mind becomes purified, it will be hard to make that person agitated or depressed. One will have a relatively calm mindset even under normally stressful conditions.

7. Even though a glass of water has dirt in it, if the water is left undisturbed for a while, the dirt gets settled at the bottom and the water becomes relatively clear.

- That is what happens with “breath meditation.” One focuses one’s mind on a neutral thought object for a while and all “agitations” subside. **But they do not go away.**
- **Breath meditation appears to provide relief.** In particular, if one goes to a retreat and spends several days with one’s mind removed from “enticing” AND “angry” thoughts, one feels a high sense calmness.
- However, when one comes back and gets into the usual “rat race”, with all kinds of enticing and aggravating inputs from the environment, all those *anusaya*” come back to the surface!

8. In real *Ānāpāna/Satipaṭṭhāna*, those *anusaya* or “hidden defilements” will be REMOVED gradually. The procedure involves the following:
- Get rid of bad thoughts (such as anger) that may arise due to whatever reasons.
 - Let any “good thoughts” that may arise (such as compassion or just thoughts about *dhamma* concepts) to continue.
 - Deliberately contemplate on *Dhamma* concepts like *dasa akusala*, *gati*, *anusaya*, *kilesa*, *kamma*, *kamma vipāka*, Noble Truths, Noble Eightfold Path, Paṭicca Samuppāda, etc.
 - We will see in upcoming posts, how those “three components” are taken into account in the four types of *Satipaṭṭhāna*: *kāyānupassanā*, *vedanānupassanā*, *cittānupassanā*, and *dhammānupassanā*.
9. If a bad thought comes to the mind, one must think about the bad consequences of keeping such thoughts in one's mind and forcefully remove them. For example, if someone says something to make one angry, one could count to ten in one's mind (or just walk away) and not retaliate.
- This is hard to do first. But with practice, one can see the benefits and one will be motivated to continue.
 - The nice thing is that the more one trains, the easier it becomes to control one's impulsive reactions.
10. In order to get rid of any bad habit (which are related to *gati*), it will be VERY HELPFUL to see the bad consequences of such bad habits.
- A smoker needs to convince himself that smoking can lead to various health problems, including cancer. That will be an incentive to get rid of smoking.
 - Taking drugs is even worse, one could die with many health problems if one becomes addicted to drugs.
 - Even eating too much is a bad habit. One should look at the statistics that clearly show the bad health consequences of over-eating.
11. Learning *Dhamma* is like learning the bad consequences of bad habits. When one is engaged in immoral activities, one will have bad consequences of those actions, speech, and thoughts in two ways:
- Even if one is making a lot of money doing immoral things, one WILL have a stressed mind even in this life.
 - The more important consequences may realize in future lives. Highly immoral activities lead to births in the four bad realms (animal realm is one).
 - Therefore, it is essential to learn true Buddha Dhamma, where one can begin to understand *kamma* and *kamma vipāka*.
12. Another way to say this is that one needs to see the difference between “*dhamma*” and “*adhamma*.” ***Dhamma* are the “good, moral deeds” and *adhamma* are the “bad immoral deeds.”**
- Note that *dhamma* here is different from the Buddha Dhamma, even though they are related. *Adhamma* are opposite of *dhamma*.
 - As we have discussed before, *adhamma* lead to a stressed mind and *dhamma* lead to a calm mind at the very basic level.
 - At the next level, strong *adhamma* or “highly immoral deeds” have very bad consequences in the future, especially in future lives (rebirths in the lowest 4 realms). On the other hand, strong *dhamma* or “highly moral deeds” lead to good rebirths in the higher realms.
 - I have discussed them previously. It would be beneficial to review them.

4.1.9 Sati in Ānāpānasati/Satipaṭṭhāna – Two Meanings of Sati

February 4, 2019; revised August 2, 2019

This post is critical. Before one can do *Ānāpānasatisati* or *Satipaṭṭhāna* meditations, one needs to understand what is meant by “*sati*.”

Double Meanings of Words – Unique In Pāli with Deeper “Dhamma Meanings”

- Many Pāli words have “double meanings.” As we will see below, that happens in other languages too.
 - However, the situation is unique in Pāli in the context of Buddha Dhamma, because some Pāli words have deeper meanings that are just to do with Buddha Dhamma.
 - An example that we have already discussed is *viññāṇa*. The ordinary meanings is “consciousness”, but the more profound meaning is “defiled consciousness.” In order to see the context in a given situation, one must know both meanings; see, “[Connection Between Saṅkhāra and Viññāṇa](#).”
 - Therefore, unlike in other languages, one must have a more in-depth knowledge of Buddha Dhamma to see the deeper meanings of words like *viññāṇa* and *sati*.
- One fundamental problem with English translations that we have today arises because most translators try to use dictionary translations. Many times, a dictionary, a dictionary may not list all possible meanings, especially the deeper meanings.
 - For example, in most Pāli dictionaries, “*sati*” is given the following two meanings: **mindfulness** and **attention**.
 - However, there is another more profound meaning that is only approximated by “mindfulness” as we discuss below. **The key is to figure out “mindful of what?”**
 - But let us first see why this is not a big problem in English (or any other language).

Double Meanings in English versus Pāli

- In English novels or any other “mundane text”, two different meanings are commonly used even in the same paragraph of a document.
 - For example, the word **right** conveys two different meanings in the following sentence: These are the **right** directions; make a **right** turn at the first traffic light.
 - Following are more examples:
Rose: My favorite flower is a **rose**. He quickly **rose** from his seat.
Type: He can **type** over 100 words per minute. That dress is really not her **type**.

(Read more at “[WebLink: grammar.yourdictionary.com: Words with Multiple Meanings](#)”).

- The unique situation in Pāli is that words like “*sati*” have unique meanings that can be understood ONLY in terms of fundamental concepts and the context.**
 - To comprehend the deeper meaning of some keywords, one must learn and understand that meaning.
 - It has nothing to do with one’s intelligence. **If one has not heard that meaning from a Buddha or a true disciple of a Buddha, one can NEVER figure that out by oneself.**

- Since “*sati*” is a critical Pāli word that appears in the context of *Ānāpānasati/Satipaṭṭhāna*, we should spend some time on it.

Mundane Meaning of *Sati* – Attention Can Lead to *Bhava* and *Jāti*

5. **From the “mundane meanings” in #2 above, perhaps “attention” is the best.** When we are engaged in a specific task, we need to keep our attention on that task.

- For example, one needs to keep one’s attention to traffic while driving or paying one’s attention to a teacher who is teaching a new concept.
- Another example is keeping one’s attention on a particular “thought object,” whether it is something one is looking at, listening to, studying, etc.

6. When one focuses one’s attention to get possession of a worldly thing, that is actually the “seed” for future *bhava*. **That is a crucial point for those who would like to look into it.**

- It is discussed in the post, [“Imasmim Sati Idam Hoti – What Does It Really Mean?”](#)
- One may not be able to grasp it until one understands *Paṭicca Samuppāda* to some extent.

Why the Mundane Meaning Is Not Enough for *Ānāpānasati/Satipaṭṭhāna*

7. Now let us take some examples to see why “attention” and even “mindful” will not give the deeper meaning in the context of *Ānāpānasati/Satipaṭṭhāna*.

- Suppose a suicide bomber is assembling a bomb that he intends to use to kill many people. He must be paying careful **attention** to what he is doing, and that is the **ordinary meaning of *sati*** there.
- Even the term “**mindful**” can be used to describe the mindset of a suicide bomber while assembling the bomb. He must be mindful of his task. If he makes even a slight mistake, he may trigger the bomb right there.
- Therefore, that bomb maker must have attention and be mindful of his task. Obviously, he is not engaged in *Satipaṭṭhāna*.

8. We can see this in many other “mundane” examples too.

- A surgeon doing a complicated operation must pay total attention to the task; he must be mindful of what he doing.
- The same applies to anyone doing any critical mundane task. Driving, studying, a nuclear scientist designing an atomic bomb that can kill millions of people, an engineer designing a crucial component for a spaceship, etc.
- **That is not the essential “*sati*” that one must have in order to cultivate *Ānāpānasati/Satipaṭṭhāna*, even though one must ALSO pay attention and be mindful.**

9. However, **breath meditation only requires the ordinary meanings: one must be paying total attention to the breath and one must be mindful of that task.**

- I have explained in the post, [“Breath Meditation Is Addictive and Harmful in the Long Run,”](#) how “breath meditation” can provide a temporary relief, AND why that can be addictive and bad in the long run.
- For one to engage in true *Ānāpānasati/Satipaṭṭhāna*, **one must have a particular “mindset” IN ADDITION to paying attention. That is being aware of the moral/immoral implications of one’s thoughts, speech, and actions.**
- **As we will see below, that true *Ānāpānasati/Satipaṭṭhāna* also involves also speech and bodily actions.** The *Iriyāpatapabba* section in *Satipaṭṭhāna* is ALL ABOUT physical actions. That cannot be done by sitting down and focusing on the breath. We will discuss that later in detail.

- In order to understand “*sati*,” we need to look at the ultimate goal of a Buddhist.

One Needs to be Mindful of the Goal in Buddha Dhamma

10. The ultimate goal is the *Arahanthood*, or *Nibbāna*, **which is, “*rāgakkhayo Nibbānam, dosakkhayo Nibbānam, mohakkhayo Nibbānam,*” or “completely removing greed, anger, and ignorance from one’s mind.”**

- We don’t need to start there. But one embarks on the Path by gradually removing those three defilement from one’s mind.
- One definition of *Nibbāna* is “cooling down (of the mind).” That “cooling down” can be experienced even at the beginning to some extent.

11. When one is attracted to a sense input (that is enticing OR repulsive), that WILL lead to a burdened mind. Thoughts associated with greed or anger are unavoidable..

- Therefore, one needs to be aware of such DEFILED thoughts, speech, and actions and stop them as they arise. That is the key to true *Ānāpānasati/Satipaṭṭhāna*.
- **That particular mindset is “*sati*.”**

Deeper Meaning of *Sati* Involves a Unique Mindset

12. Therefore, the meaning of “*sati*” in the context of *Ānāpānasati/Satipaṭṭhāna* has a more specialized meaning. A suicide bomber making a bomb, or even a student intensely concentrating on learning a subject, will not have that *sati*.

- This “deeper *sati*” is a “good mental factor” (a *sobhana cetasika*). The *sati cetasika* is cultivated by learning *Dhamma* and eventually comprehending *Tilakkhaṇa*.
- **This “*sati*” is VERY DIFFERENT from the ordinary meanings. In the very basic version it means “having a mindset to stay away from *dasa akusala*,” which is what one does when one follows the Eightfold Path.**
- In short, one’s attention would be focused **NOT on an immoral or even a mundane task**, but on getting rid of “immoral thoughts, speech, and actions” AND on cultivating “moral thoughts, speech, and actions.”

13. **However, we can see that the ordinary meanings of “maintaining attention” or “being mindful” must ALSO be there during *Ānāpānasati/Satipaṭṭhāna*.**

- One must keep the attention (*sati*) on “good things” and remove attention away (*asati*) from “bad things” too while keeping the “*sati* mindset.”
- By the way, there is no “*asati*” *cetasika* or a “bad mental factor”; it has only the ordinary meaning. *Asati* means **keeping the mind away from any *ārammaṇa* or any “thought object.”**
- *Asati* means “not being focused on a given thought object.” **There is ONLY one meaning for *asati*.**

14. I hope one can clearly see why just paying attention or being mindful is not enough to cultivate *Ānāpānasati/Satipaṭṭhāna*.

- One must understand that “cooling down of the mind” has its origins in staying away from *dasa akusala* AND also actively engaged in moral deeds, speech, and thoughts.
- In particular, it is essential to understand the importance of cultivating moral *vacī saṅkhāra* (conscious thoughts and speech); see, “[Connection Between Saṅkhāra and Viññāna](#).”

15. When that is done consistently (keeping the mind on good things and off of bad things), over time it leads to *Sammā Sati*. That, in turn, leads to *Sammā Samādhi*., completing the Noble Eightfold Path.

- But one needs to know what is good and what is bad to be focused on. What is bad is *dasa akusala* and what is good is *dasa kusala*, i.e., staying away from *dasa akusala*.
- When one makes progress on the Path and starts comprehending *Tilakkhaṇa* (*anicca, dukkha, anatta*), one's *sati* will grow. That will lead to better *samādhi*.

The Goal Is Not To Remove All Thoughts From the Mind

16. I also need to mention a common mistake some people make. They think they need to get rid of ALL thoughts that come to the mind.

- When one is engaged in *Ānāpānasati/Satipaṭṭhāna*, one's goals are two fold: get rid of evil thoughts that come to the mind AND cultivate good thoughts.
- *Ānāpānasati/Satipaṭṭhāna* involves both “*āna*” or “*assāsa*” (taking in good things) and “*āpāna*” or “*passāsa*” (discarding bad things).

17. Another way to say this is that one needs to see the difference between “*dhamma*” and “*adhamma*.” *Dhamma* are the “good, moral deeds” and *adhamma* are the “bad, immoral deeds.”

- As we have discussed before, *adhamma* leads to a stressed mind and *dhamma* leads to a calm mind at a fundamental level.
- At the next level, strong *adhamma* or “highly immoral deeds” have very terrible consequences in the future, especially in future lives (rebirths in the lowest four realms). On the other hand, strong *dhamma* or “highly moral deeds” lead to good rebirths in the higher realms.
- We discussed *dhamma/adhamma* in the previous post. I want to mention another aspect of it now.

What are *Dhamma* and *Adhamma*?

18. In many *suttā*, the Buddha has clearly stated that *dasa akusala* are *adhamma*, and that staying away from those are *dhamma*. For example, in the [WebLink: suttacentral: Dhamma Sutta \(AN 10.182\)](#): “*katamo ca, bhikkhave, adhammo? Pāṇātipāto ... pe ... micchādittḥi,*” i.e., basically *dasa akusala*.

- There are many *suttā* where the Buddha describe *adhamma* as *dasa akusala* or opposites of the eight factors in the Noble Eightfold Path.
- On the other hand, *dhamma* are *dasa kusala* and the eight factors in the Noble Eightfold Path.

19. This act of keeping the mind (*sati*) on “good things” and keeping it away (*asati*) from “bad things” is the key to Buddhist meditation: *Satipaṭṭhāna, Anāpānasati*.

- Both require keeping the mind focused on “good things” and stopping it from focusing on “bad things.”
- When that is done consistently, over time it leads to *Sammā Sati* (or always keeping the mind on good things), and then to *Sammā Samādhi*, completing the Noble Eightfold Path.
- But one needs to know what is right and what is bad. What is bad is *dasa akusala* and what is right is *dasa kusala*, i.e., staying away from *dasa akusala*.

Dhamma Are the Things to “Bear” and *Adhamma* Are the Things One Should Not “Bear”

20. What is meant by “*dhamma*” here is “what one bears in the mind” or “the mindset.” One thinks, speaks, and acts according to that mindset.

- But as we have seen, what one thinks, speaks, and acts are called *saṅkhāra*. And “*saṅkhāra paccayā viññāṇa*” means one's *viññāṇa* are based on one's *saṅkhāra*; see, [Connection Between Saṅkhāra and Viññāṇa.](#)”

- Then *Paṭicca Samuppāda* leads to “*bhava paccayā jāti.*” Therefore, when one generates “*bad saṅkhāra*” one ends up creating “*bad jāti*” for oneself (both during this life and in future lives).

21. Now, “*bad saṅkhāra*” are generated when one bears “*bad dhamma.*” “*Good saṅkhāra*” are created when one takes “*good dhamma.*”

- That is really the basis of *Paṭicca Samuppāda*, and its connection to “*sati.*”
- **When one gradually gets rid of “*bad dhamma*” by staying away from *dasa akusala*, and cultivates “*good dhamma*” by engaging in moral deeds, one cultivates “*sati*” via *Satipaṭṭhāna/Ānāpānasati.***

***Sati* Included in Five of the 37 Factors of Enlightenment**

22. There are “37 Factors of Enlightenment” that the Buddha said are critical to attaining *Nibbāna*, and thus must be cultivated.

- The importance of the word “*sati*” is apparent since it appears as 5 of the 37 factors in different forms.
- *Sati* is in the Five Faculties (*Pañca Indriya*), Five Powers (*Pañca Bala*), Four Factors of Mindfulness (*Cattāro Satipaṭṭhāna*), Seven Factors of Enlightenment (*Satta Bojjhaṅga*), and the Eightfold Noble Path (*Ariya Atthangika Magga*); see, “[37 Factors of Enlightenment.](#)”

23. When *Ānāpānasati/Satipaṭṭhāna* is cultivated, all 37 factors are cultivated automatically, and one attains *Nibbāna*.

- For example, according to the [WebLink: suttacentral: Ānāpānassati Sutta \(MN 118\)](#): “*..Ānāpānassati, bhikkhave, bhāvitā bahulikatā cattāro satipaṭṭhāne paripūreti. Cattāro satipaṭṭhānā bhāvitā bahulikatā satta bojjhaṅge paripūrenti. Satta bojjhaṅgā bhāvitā bahulikatā vijjāvimuttiṃ paripūrenti.*”
- **Translated:** “*..Ānāpānassati, when used (bhāvitā) and used frequently (bahulikatā), completes (paripūreti) four types of Satipaṭṭhāna. Cattāro satipaṭṭhāna, when used and used frequently, completes Satta Bojjhaṅga. Satta Bojjhaṅga when used and used frequently, completes the full release (Nibbāna or Arahant hood).*”

4.2 Living Dhamma – Overview

October 27, 2016

- [Living Dhamma – Introduction](#)
- [Peace of Mind to Nibbāna – The Key Step](#)
- [Starting on the Path Even without Belief in Rebirth \(with first *Desana* “The Hidden Suffering that We All Can Understand”\); *desanā* title different from post title\)](#)

4.2.1 Living Dhamma – Introduction

August 5, 2016; Revised August 26, 2016 (This replaces the deleted post, “Introduction to a New Approach to Meditation”).

1. This series started as a subsection in the “*Bhāvanā* (Meditation)” section. But I think it can be the “step-by-step” by process of “learning and living” Dhamma starting from a very fundamental level. One does not need to be bothered about too many Pāli words or deeper concepts at the beginning.

- From many comments that I get, it is clear that many people have “road blocks” at concepts like “*kamma vipāka*” and “rebirth.” When we start at a fundamental level, one does not need to worry about them. **One’s own change in experience** — as we proceed — will hopefully help clarify those concepts as we proceed.
- All other sections at the website can be used to investigate and learn different aspects from different angles. Buddha Dhamma is a self-consistent theory of nature. There are no contradictions.

2. About a month ago, I started thinking about this approach based on emails from a few people about their experiences. Many people feel the positive effect of meditation, but seem to be “stuck” without being able to go past a certain point.

- I must hasten to add that this “new approach” is fully consistent with Buddha Dhamma and not an invention of mine. It is just another way and — hopefully a refreshing way — to look at how to practice Buddha Dhamma (Buddhism) with a clear understanding.

3. What got me started thinking was the following email from a person (X) who has been doing mostly *anāriya* meditation, including conventional *metta bhāvanā* (I am withholding the name for obvious reasons); highlights are mine. *Anariya* meditation basically means doing meditation without comprehending *anicca* nature, so most people start that way:

“..The other issue I wanted to ask you about was that I sometimes start wondering if meditation is just dulling my mind, making me less sensitive to what others are doing around me, like a sedative almost. Am I getting addicted to meditation that I need a constant dose, and when I stop I feel I am missing something. for example when I was meditating regularly I no longer felt like reading books or listening to music which I loved earlier so I felt like it was changing my core personality.

To experiment I stopped my formal meditation for a few weeks and I found that I began to get agitated and anxious as before. I was also able to enjoy songs as before. I know that is consistent with what you say about *anāriya* meditations – that the effects are temporary.

So I am curious to ask you, have you experimented with stopping your meditation practice for a few weeks? I am asking because I understand that you are doing the *Ariya* meditation and that those effects should be more permanent. **Or are you so used to your meditation practice that it would be a torture to ask you to stop even for a few days let alone a few weeks. But the trouble is – if you never stop how will you know if the effects are permanent or not...**”

4. I am grateful to X for sharing this beautifully written description. I believe many people have experienced such thoughts at various times. Our tendency to always go back to sense pleasures is very strong, because that is what we have been doing through uncountable rebirths in the *kāma loka* in the past.

- Whether it is *Ariya* or *anāriya* meditation (including even breath meditation), the tranquility of mind (peace of mind) that comes during a meditation session is due to the suppression of the five hindrances (*pancanivarana*); see, “[Key to Calming the Mind – The Five Hindrances.](#)”
- In simple terms, the five hindrances are: sense cravings, tendency to be angry, sleepy or dull mind, scattered mind, and the inability to decide the right action. They are always in the background, “covering the mind” and constantly making the mind “agitated and anxious” as X described above.
- What happens during a meditation session (or even if one a fully focused on some task that does not involve sense pleasures), is that the mind is taken off of all such hindrances temporarily. This is actually the first stage where one could experience the “cooling down” or “*nivana*” or “*niveema*.” It can be called a mundane version of *Nibbāna*. This is also called “*nirāmisā sukha*”; see, “[Three Kinds of Happiness – What is Nirāmisā Sukha?](#).”
- When one is on a regular meditation program (or in a meditation retreat), that “cooling down” can last during that whole time — days or weeks — outside the meditation sessions.

5. Another person (Y) asked the following related question: “*Nirāmisā sukha* is felt by which *citta*?”

- *Nirāmisā sukha* is not experienced by a specific *citta*. Rather, *nirāmisā sukha* APPEARS when *cittā* BECOME free of defilements, i.e., when the mind becomes (at least temporarily) free of hindrances; see, “[Key to Calming the Mind – The Five Hindrances.](#)” We will go into details in upcoming posts, but this is a CRITICAL point.
- More examples: Water becomes clear and pleasant when all the dirt is removed. One feels good when a headache goes away; that relief was not gained by adding something, but by removing the headache.
- Similarly, *nirāmisā sukha* is felt when hindrances and defilements are SUPPRESSED temporarily. When those are removed PERMANENTLY in four stages, one feels more permanent happiness of *Nibbāna*. At the *Sotāpanna* stage, a big junk of stresses associated with defilements are PERMANENTLY removed. At the *Arahant* stage, ALL defilements are PERMANENTLY removed, and the “cooling down” is complete.
- Thus it is going to be a gradual process. It is a mistake to try to go all the way all at once. Don’t even think about the *Arahant* stage (let alone the *Anāgāmi* stage where one has removed *kāma rāga* or attachment to sense pleasures), but concentrate on attaining the *Sotāpanna* stage.
- For many, even before that one needs to experience the *nirāmisā sukha*. That is what we focus on initially.
- It is when *kamachanda* and other *nivarana* are suppressed that one is able to experience the *nirāmisā sukha*, grasp the *anicca* nature, and become a *Sotāpanna*. This is easier when one abstain from *dasa akusala* too.
- Thus, in order to grasp the *anicca* nature (i.e., to suppress the *nivarana*), the mind needs to be purified to some extent. Person X above is almost there, but you can see how hard for X to be not be tempted by sense pleasures.

6. I will go into details in the upcoming posts in this section, but through countless rebirths we have cultivated a craving for sense pleasures that inevitably lead to the five hindrances, that cover our minds and not letting us see the real nature of this world. **Sense pleasures have the following key characteristics:**

- They are definitely “pleasurable”, i.e., the sense experience is palpable and enjoyable. The Buddha himself said that beings will not be trapped in this suffering-filled rebirth process unless they are seduced by these pleasurable sense contacts.

- The price we pay for that “happy feeling” is that the mind gets excited and restless. Furthermore, that pleasurable feeling cannot be maintained for long times; we get tired of it no matter what it is. Think about anything (food, sex, watching movies, etc), and you will realize that soon we would have had enough of it and we just move onto some other pleasurable activity or “just take a rest.”
- But that experience is addictive. The urge to do it again comes back very strong at later times. If we cannot experience it at that time, we at least tend to recall the past experience and try to enjoy that. **This is due to the fact that we have a reservoir of mental impurities (*kilesa*) in our minds, as we discuss in an upcoming post.**
- Until one can realize the dangers in at least excessive sense pleasures (*anicca, dukkha, anatta* nature), one's mind is easily tempted by those sense pleasures; **one is afraid that one will “miss out” on the sense pleasures. This is what X was trying to convey above.**

7. The meditation experience is the totally opposite of sense pleasures. *Nirāmisā sukha* can be maintained as long as one stays in the “meditation mindset.” **But it is not an “enjoyment” in the sense of a sense pleasure. It is really a “peace of mind” (one could actually feel a bodily *sukha* sensation in a *jhāna*, but we will discuss that later).** This is why X is tempted by them, even though they lead to general agitation of the mind (see the first highlighted sentences in #3 above).

- *Nirāmisā sukha* BECOMES addictive (i.e., preferable over sense pleasures) only AFTER getting to the *Sotāpanna* stage (at which time it can be called beginning of the “*Nibbāna sukha*” or “*nivāna suva*”). At that time, even though one may still be tempted by sense pleasures until the *Anāgāmi* stage, one will ALWAYS go back to meditation for relief. Until then it is always a battle that is so eloquently expressed by X in #3 above.
- Furthermore, at that stage one will have voluntarily given up some of more excessive sense pleasures. This is something that just happens. **One needs to forcefully give up only those things that are directly harmful to oneself or to others.** For example, sexual MISCONDUCT needs to be forcefully given up, but not sex (We recall that one of the main *upāsikā* of the Buddha, lady Visaka, attained the *Sotāpanna* stage at age 7, but got married and had 22 children). The urge for sexual pleasure will AUTOMATICALLY go away only at the *Anāgāmi* stage.
- Of course, one could start discarding some “conventionally pleasurable” but not directly harmful things like watching TV or going to concerts etc. (as X stated in #3 above). I also experienced the same kind of things in early practice. I would rather learn Dhamma than watch TV even in the early days. “pleasure of Dhamma” is different.
- However, I still get pulled into a limited number of sense pleasures occasionally, so I know how hard it is to resist especially those activities that one has gotten used to. Getting rid of all *kāma rāga* (i.e., reaching the *Anāgāmi* stage) is the hardest. But once the *anicca* nature is comprehended to some extent, it becomes easy to discard most things as a waste of time.

8. Therefore, in the beginning it could be a “tug of war” between those addictive sense pleasures that we are used to enjoy and the long-lasting but not so addictive *nirāmisā sukha* of meditation. Here, meditation also includes listening, reading, and contemplation of Dhamma.

- As one's mind gets more and more cleansed, the “joy of Dhamma” WILL increase. One WILL BE able to grasp deeper and deeper meanings even from the same discourse or a post.
- The time to contemplate on *anicca* (and *Tilakkhaṇa* in general) is when one starts “liking Dhamma”, with the *pancanivarana* temporarily lifted. If one starts forcing the mind to accept the *anicca* nature, that may not be successful, and one may get discouraged. Of course, each person is different and some may be able to do it.

9. Finally, in X's last (highlighted) statement in #3 above, the question was: If I stopped meditating for two weeks, would I be able to “switch back to enjoying sense pleasures” as X did?

- I am quite sure I could abstain from meditating for two weeks if I really wanted to. But, such an abstinence would not change “my core.” It just cannot. Sometimes when I go on a trip with my family, I do not get to meditate for several days. For example, last month there was a break of about 7-8 days during such a trip. But when I get back, I automatically get back to my normal schedule of meditation.
- In addition, most of my “meditation” is not formal. I think about Dhamma concepts whenever there is time, sitting in a car, just before falling asleep, first thing when I wake up, etc.
- Furthermore, I don’t feel “missed out” on those cravings that I have lost, even though I can still experience that “sense pleasure.” For example, while I was working I used to have an alcoholic beverage daily for over 30 years, even though I did not really get “drunk”; it was just a habit. Nowadays, that habit has automatically disappeared. Still, If I am out with an old friend (who does not know that I have changed) and he has a drink, I may have one just to keep him company. But the “urge” to have a drink at the end of the day is never coming back. A big chunk of “mental impurities” (or *kilesa*) have permanently been removed from my mind.

10. What we are going to do is to look closely at what these defilements are that needs to be removed in order to purify the mind, so that those *pancanivarana* will be permanently lifted and the mind can grasp deeper and deeper concepts easily.

- It is easier to solve a problem when one figures out what the problem is, and the root causes that lead to the problem.
- Our problem here is the defiled mind. The root causes are the mental impurities (or *kilesa*, *keles*, or *klesha* in Pāli, Sinhala, and Sanskrit respectively) that have accumulated in our minds over the beginning-less rebirth process. These are ultimately responsible for the five hindrances (*pancanivarana*) that cover our minds.
- We will discuss these *kilesa* in future posts. They provide a simple way to identify and quantify mental impurities, and how they are to be discarded step-by-step.

Next in the series, [“Peace of Mind to Nibbāna – The Key Step.”](#)

4.2.2 Peace of Mind to Nibbāna – The Key Step

August 12, 2016; Revised December 21, 2016

I have changed the title of this post from “Nirāmisā Sukha to Nibbāna Suva – The Key Step.”

One needs to experience a “peace of mind” or “cooling down” (*Nirāmisā sukha*) before starting on the Noble Path to *Nibbāna*; the transition to the *Sotāpanna* stage happens when one comprehends the *anicca* nature while experiencing *nirāmisā sukha*.

- After that transition, *nirāmisā sukha* becomes permanent with the removal of the *pancanivarana*. The full explanation will take more posts, but we start here.
- Many people start meditating without understanding what to meditate on. One needs to learn basics of pure Buddha Dhamma first. One can start with conventional meditation techniques that are out there, but in order to grasp deeper Dhamma, one needs to seriously start staying away from the ten defilements (*dasa akusala*) as much as possible.

1. In the previous post [“Living Dhamma – Introduction,”](#) we discussed the experience of X. Please read it before reading this post.

- X had experienced *nirāmisā sukha* by engaging in a regular *anāriya metta bhāvanā*. Even though it led to a relaxed and calm state of mind, X realized that at the same time the desire to engage in some types of sensual pleasures (reading books or listening to music) went away.
- Then X stopped meditating for two weeks and the ability of enjoy books or music came back. However, the *nirāmisā sukha* also went away and X’s mind was again burdened and agitated.

- Some people may not even have had experienced such a temporary “cooling down” or *nirāmisā sukha*, so I thought of discussing this a bit more before discussing the technical term “*kilesa*.” It is important to figure out one’s current status before trying to get to the next stage. It is a step-by-step process.
 - One needs to get to that stage (where X was) to at least to experience difference between the *nirāmisā sukha* and sense pleasures in order to start comprehending *anicca* nature. It is at that stage that *pancanivarana* are temporarily lifted and the mind becomes calm enough to comprehend *anicca* nature. **However, that can happen momentarily during listening to a discourse too.**
2. When one is fully immersed in sense pleasures, the mental burden that inevitably comes with it is not apparent to that person. We have gotten used to the “mental agitation in the background” and don’t feel it most of the time. **Only when one somehow gets into a “calmed state of mind” by some way, that one can begin to appreciate the burden of this “constant agitation or incessant distress” that is in the background.**
- Through the meditation program, X has begun to appreciate the relief from this “incessant distress” effect due to *pancanivarana*, and the relief is called *nirāmisā sukha*.
 - However, the conundrum is that there is a price to pay (if one does not comprehend the *anicca* nature)! To the dismay of X, the ability to enjoy some favorite sense pleasures went away.
3. In very simple terms, this problem arises because X has not comprehended the *anicca* nature (what we will be doing in this new section is to discuss a step-by-step process that could help comprehend the *anicca* nature).
- In X’s mind, those sense pleasures are worth hanging on to. And that feeling is VERY POWERFUL. Even though I have lost the craving for SOME sense pleasures, I still have more left. So, I know how hard it is to get rid of that “nagging feeling” of needing to go back to old ways.
 - The only difference is that those desires that I lost are not coming back. There is no “nagging feeling” or an urge of needing to go back to those “lost cravings.”
4. This is why comprehending the *anicca* nature nature is so important at X’s stage. When one comprehends the *anicca* nature to SOME EXTENT, one loses the “nagging feeling” to go back to SOME OF THE sense pleasures.
- Only when one truly realizes the dangers (or at least the worthlessness) of a given sense pleasure, that one automatically gave up that sense pleasure. **For example, if one likes to go hunting, one will not give it up voluntarily until one starts seeing the bad consequences of that activity. Same for fishing, being an alcoholic or a drug user, etc.**
 - Comprehension of the *anicca* nature comes gradually. **One first sees the dangers in immoral sense pleasures. Then one sees the worthlessness in extreme sense pleasures that are not harmful to others, but to oneself. One sees the worthlessness of any sense pleasure in the *kāma loka* only at the *Anāgāmi* stage.** This why it is a step-by-step process.
5. It is like holding onto a gold necklace that was thought to be very valuable. But if it was proven without any doubt that the necklace was an imitation, then one would lose the attachment to it INSTANTLY.
- Attaining the *Sotāpanna* stage via comprehending the *anicca* nature to some extent is like that, i.e., realizing the dangers (and/or worthlessness) of SOME extreme sense pleasures. Even though one may not realize that one has lost the craving for SOME sense attractions, one will realize that within weeks or months.
 - Then, the more one meditates on the *anicca* nature, the more one starts seeing the perils of other (less harmful) sense pleasures too. That is why one HAS TO proceed step-by-step. Getting rid of ALL *kāma rāga* (attachment to sense inputs via the body touches, smells, and tastes) happens only at the *Anāgāmi* stage.
6. However, I must say that X is a bit unusual in the sense of losing the desire to read books and listen to music. Those are not really “extreme sense pleasures.” **Before that one will lose the desire to go fishing,**

mistreating animals, etc. and also getting a pleasure from lying, gossiping, slandering, stealing, sexual misconduct, etc. I am quite sure X never had a tendency for those anyway.

- I also do not want people to get the idea that one needs to lose sense pleasures such as reading books or listening to music in order to become a *Sotāpanna*, or to experience *nirāmisā sukha*. That is not the case. One could even be a *Sotāpanna* and still have those two tendencies. I have mentioned a person in the time of the Buddha who became a *Sotāpanna* but could not get rid of the urge to have a drink (however, he did not live that long after attaining the *Sotāpanna* stage). This is why no one can say whether another person has attained the *Sotāpanna* stage.
- A *Sotāpanna* absolutely would not do only those deeds that could make him/her suitable for rebirth in the *apāyā*. That means, he/she has removed high levels of greed, hate, and ignorance to the levels of *kāma rāga, paṭigha, and avijjā*; see, “[Lobha, Dosa, Moha versus Raga, Patigha, Avijjā.](#)”
- My belief is that X had cultivated *anāriya jhānā* in previous but recent rebirths, and is carrying that “*gathi*” to this life. X has described some bodily sensations that are associated with *jhānā*. This is why it is easy for X to at least temporarily lose attachment to even fairly harmless things like reading books or listening to music.

7. Each person loses a set of individual characteristics (*gathi*) upon attaining the *Sotāpanna* stage. One should be able to look back and see what those are, just like X did. And, of course, whether those changes are permanent.

- As I mentioned I have lost the urge to have a drink at the end of the day, which I had been doing for over 30 years. I did not force that, even though I contemplated the bad possible consequences of keeping that habit.
- When one follows the Path, one does not forcefully give up sense pleasures, only immoral actions that can hurt other living beings; even X did not forcefully give up books or music, it just happened. Losing the desire for sense pleasures happens gradually, starting with extremes.
- I have only lost interest in reading fiction books. I used to read all types of books, but now I am not interested in reading fiction, because to me it is a waste of time just like watching TV. On the other hand, I am now reading more non-fiction books.
- I have also been more productive in my science interests over the past two years too. I have learned the subtleties of quantum mechanics that were not apparent to me even two years ago. Mind becomes much more clear as one gets rid of *kilesa*.
- So, it is important to realize that one is not supposed to lose all interests. **One loses interest in only those activities related to greed, hate, and ignorance. That is a must, and that should be fairly obvious when one looks back. One loses interest in all worldly affairs only upon attaining the Arahant hood.**

8. My point is that it is desirable for one to first get into this stage of X, where X can see the difference between sensual pleasures (*amisa sukha*) and the *nirāmisā sukha* that arise by at least temporarily suppressing the desire for sensual pleasures via a meditation program.

- **Even more critical than a meditation program is living a moral life, staying away from *dasa akusala* as much as possible.**

9. Many people try to attain “*Nibbānic* pleasure” just because they tend to think in terms of sensual pleasures, i.e., that *Nibbānic* pleasure is like the pleasure of music, good food, etc. This is why the account of X is so a good an example in pointing out the difference between the two.

- Actually, this is good place to discuss the differences in *amisa, nirāmisā, and jhāna sukha* and the *Nibbānic suva*.

- I reserved the name “*suva*” for *Nibbāna* because it is even different from the *nirāmisā sukha*. It is an overall state of “well-being.” I have no idea what that is like at higher stages, but right now it is an ever-present calming effect on the body and mind.
- **Sense pleasures lead to *āmisā* (or *sāmisā*) *sukha*.** So, we are all familiar with *amisā sukha*.

10. ***Nirāmisā sukha* can arise due to a few different causes.** They are all beneficial for the Path and to comprehend the *anicca* nature.

- Those *citta* that bring us *amisā sukha* are burdened with *kilesa* or *akusala cetasika* (which we will discuss in the next post). **These give rise to an agitated mind that is under incessant distress; see, “[The Incessant Distress \(“Pilana”\) – Key to Dukkha Sacca](#).”** This is what X described in the previous post as, “.. **I stopped my formal meditation for a few weeks and I found that I began to get agitated and anxious as before.**” When one gets rid of this incessant distress, one feels the *nirāmisā sukha*.
- One can also feel the *nirāmisā sukha* for short times when engaged in moral activities, for example, helping others or giving food to hungry people or animals. Again, this feeling comes because those *kilesa* are not present in *citta* (thoughts) that arise during such activities.
- Another is engaging in *Ariya* or *anāriya* meditations. Here also one’s mind is mostly devoid of *kilesa* (depending on the strength of the *samādhi*).

11. There is also a higher *nirāmisā sukha* that was recommended by the Buddha. That is the *sukha* arising due to *jhānā*. When one is in a *jhāna*, one has *citta* running through one’s mind that belong to *rūpa* or *arūpa loka*.

- By definition, those *citta* are also devoid of *kilesa* or mental impurities.
- *Jhānā* arise when *samādhi* is intensified (cultivated) to a certain level.

12. **“*Nivāna suva*” or “*Nibbānic suva*” or “*Nibbānic bliss*” is due to *citta* that are even more pure.** There is not a trace of incessant agitation or stress left in those *citta*.

- These *citta* are also called *pabhasvara* (bright) *citta*; see, “[Nibbāna – Is it Difficult to Understand?](#).”
- Also, *Sotāpanna* will not be able to experience the *Nivāna suva* for that stage, unless he/she can get into *Sotāpanna phala samāpatti* via cultivating *jhānā*. Still, he/she will not have the *nirāmisā sukha* going away. Whatever relief gained from the “incessant distress” is permanent.

13. We will discuss the *kilesa* (*akusala cetasika*) that give rise not only to incessant agitation and stress — but eventually to all *sansāric* suffering — soon in this series.

- The incessant distress can be considered as “immediate *kamma vipāka*” due to *citta* burdened with *kilesa* or *akusala cetasika*. The “delayed effects” of such *citta* will bring more *kamma vipāka* at later times, and the more potent ones can bring rebirth in the *apāyā*.
- Thus the key step to the *Sotāpanna* stage is in experiencing *nirāmisā sukha* by cleansing the mind via moral behavior (*sīla*) and a good meditation program. Then the mind is open to grasping the *anicca* nature, i.e., *pancanivāra* could be suppressed for days.
- However, when one is living a moral life and is engaged in contemplating pure Dhamma, that transition may happen quickly and may be even followed by the *Sotāpanna phala* moment even without one noticing it at that time. Different people get there in different ways.
- But there is much to discuss before discussing the *Sotāpanna* stage.

Next in the series, “[Starting on the Path Even without Belief in Rebirth](#)”,

4.2.3 Starting on the Path Even without Belief in Rebirth

August 19, 2016

1. After publishing two posts in a subsection entitled “New Approach to Meditation”, I started realizing more aspects of the importance of this approach. So, I have started a whole new section, “[Living Dhamma](#)” which lays out a step-by-step Path from fundamentals. Please read the first two posts there before reading this post.

- There are many people, including some Buddhists, who have difficulty in connecting with the idea of rebirth.
- Rather than making the idea of rebirth as a prerequisite to start the practice, one can start practicing by comprehending another type of suffering that the Buddha revealed to the world.

2. The Buddha revealed at least two types of suffering that are unknown to the world (and taught how to get rid of both PERMANENTLY).

- Even though the future suffering associated with the rebirth process is the one that is mostly highlighted in the literature, there is a suffering that we all experience in this life, without even knowing about it.
- That first type of suffering that we all experience is the incessant distress that we all feel (but may not be even aware of). One starts feeling the *nirāmisā sukha* when one temporarily suppresses this incessant distress.
- In a way, it is necessary to first to realize the existence of this **first type of suffering**, at least suppress it, and experience the *nirāmisā sukha* that results from it (as X did).
- That will provide the initial faith in Buddha Dhamma, and also enable the mind to get to *samādhi*, and help comprehend the *anicca* nature. That will lead to the next step of comprehending the **second type of suffering** associated with the rebirth process.

3. Rather than writing a few more posts on this, I decided to present this idea in the audio format. I have never delivered a “*desanā*” previously, but hopefully, you will be able to grasp the concept. You need to adjust the volume control on your computer:

“The Hidden Suffering that We All Can Understand”

[WebLink: Audio Desana: Episode 1 - The Hidden Suffering That We All Can Understand](#)

[WebLink: Audio Desana: Episode 1 - The Hidden Suffering That We All Can Understand](#) (Original - Larger file size)

4. Here are the links to the posts mentioned in the above *desanā*:

4.3 Dhamma with Less Pāli

November 14, 2017

This new subsection is now the second subsection in the “[Living Dhamma](#)” section.

- Initially, I had “[Living Dhamma – Fundamentals](#)” as the second subsection after the “[Living Dhamma – Overview](#)” subsection.
- Now I realize that it was too much of a jump, even for many who have had exposure to Buddha Dhamma, but are not familiar with *cetasika* and other key Pāli words. So, in this new subsection, I plan to close that gap.

Posts:

- [Buddha Dhamma for an Inquiring Mind – Part I](#)

4.3.1 Buddha Dhamma for an Inquiring Mind – Part I

April 12, 2018

This is going to be a series of posts that looks at Buddha Dhamma from a “bottoms up” approach. Today, Dhamma is hidden under a lot of incomprehensible Pāli words. I can see that many people just use Pāli words without knowing their true meanings. If one has a good understanding of the “basics” or the “framework”, it is easier to understand and remember the meanings of key Pāli words.

- This will be in summary form, since it is not possible to describe even the outline in several posts. One can find relevant posts by using the “Search” box at top right. Furthermore, one can ask questions at the discussion forum (“[Forum](#)”) where opinions of others can be seen too. I encourage any opposing to views, as long as one is providing evidence from the *Tipiṭaka*.
- This website is based solely on the *Tipiṭaka* and only the three Commentaries included with it. The reasons for that are discussed in the section “[Historical Background](#).”

Buddhism (Buddha Dhamma) – What Happens After Death?

1. The majority of people in the world today belong to one of the following two camps:

- The next life is going to be forever, in the heaven or hell.
- This life is all one has. When one dies, it is over. No rebirth or hell or heaven.

2. The first theory has been handed down from generation to generation for many, and there are obviously many “holes” in that theory. It seems illogical in many ways (it is one thing to create the Earth, but to create billions of galaxies with billions of planets like Earth? And how did the Creator come about?), but just think about this:

- If a baby dies within a few months will it go to heaven or hell (it has not done anything good or bad)?

- Furthermore, how come some people are born wealthy and thus have a better chance to go to heaven than one who is born poor and thus may be tempted to do immoral things to survive (and thus go to hell)?
3. The second theory appears more logical to many “scientifically-oriented” people with a “materialistic” view.
- But even if just one of the rebirth stories is believable or proven to the satisfaction of someone, then that person has to throw away that theory.
 - More importantly, there is no explanation available for how consciousness arises from inert matter. Our bodies are made of the “same stuff” that a tree or a house is made of.
4. In contrast, Buddha Dhamma says that there will be future lives as long as there are causes for future lives to arise.
- We can learn a lot about Buddha Dhamma by looking at what those causes are. **Those causes arise in one's mind.**
 - One's Creator is oneself. And, as long as one perceives that ultimate happiness can be found in this world, **one will be** reborn in this world.

The Four Noble Truths

1. In simple terms, Buddha Dhamma is based on the following four truths about this world, called the Four Noble Truths:

- The Noble Truth about suffering.
 - The causes for such suffering.
 - Those causes can be eliminated and thus it is possible to stop future suffering from arising.
 - The way to eliminate those causes and to attain ultimate happiness (*Nibbāna*).
2. The Buddha said that when one understands the First Truth, one will automatically understand the other three as well. Therefore, let us discuss the First Noble Truth.
- The key and critical issue here is to understand what is meant by “suffering” in Buddha Dhamma.
 - It is important to realize that “suffering” and “the Truth about suffering” are two different things.
3. **Suffering as a feeling** everyone knows very well. One does not have to be a Noble Person or even a Buddhist to know what suffering is. Actually, even animals know what suffering is, and they don't like that either. We all have seen dogs cry with pain when hit.
- So, what is the Noble Truth about suffering? **The Buddha said that this Truth is unknown and is hidden from the humans until a Buddha teaches what it is.**
4. Understanding the truth about suffering requires an understanding of the wider world of 31 realms, and that **most of that future suffering** would be in the four realms or the *apāyā* (of which animal realm is one). But suffering is associated with all realms.
- There are causes for that suffering, i.e., causes for leading to rebirth in the *apāyā* or in any realm in general. The worst suffering can be stopped from arising by eliminating the causes for births in the *apāyā*, and that is where one should first focus on.
 - There is a Noble Eightfold Path that one can follow to achieve that goal (a procedure to remove those causes). So, now we can beginning to see why one will know all four Truths, when one understands the First Truth.

Mind – Where Root Causes for Suffering Arise

1. We know that we are conscious because we can think. We think via thoughts. We can think about many types of things.
 - When we are very sleepy, we are just aware that we are alive.
 - On the other hand, if one is about to be run over by a car, one will generate enough power to jump a long distance away from that car or, if being chased by a lion, can probably beat a world record for sprinting.
2. One's actions and speech are also controlled by one's mind via thoughts or *citta* that arise in the mind.
 - We cannot even lift a finger without a *citta* or a thought arising in the mind. We may not even think about lifting that finger, but we do. It is easy to figure out this way: We can fold that finger any time we want to.
 - You may not realize that speech comes via thinking or *citta*. Again, it is easy to see that we can stop that speech any time we want to.
3. One's actions, speech, and thoughts have consequences. In fact, one's conscious thoughts determine the level of future suffering.
 - **Future suffering arises due to our conscious thoughts or *citta*, and they are also called *saṅkhāra* in some contexts.**
4. There is a difference between *citta* and *saṅkhāra* (the English word “thought” does not translate exactly as either).
 - Normally, the word *citta* is used in *Abhidhamma* to denote the smallest mental activity that lasts only a fraction of a billionth of a second.
 - The word *saṅkhāra* is used to represent the overall effect of billions of *citta*.
 - In that sense the word thought is more closer to *saṅkhāra*.
5. Those thoughts that are used to move the body (lifting that finger) are called *kāya saṅkhāra*, because those *saṅkhāra* control the body or *kaya*.
 - Those that lead to speech are called *vacī saṅkhāra*, which are two types: We can speak out loudly or just “talk to ourselves” (thinking consciously); both are *vacī saṅkhāra*.
 - However, the word “*vācā*” is used only for speaking out loud.
 - Other thoughts that arise are called *mano saṅkhāra*, which are those thoughts that arise without us even thinking about it consciously.
 - So, I hope it is clear what those three types of *saṅkhāra* are. It is important to be able see the differences. But they all arise in the mind.
6. Those *mano saṅkhāra* arise automatically even without us being aware of it until they arise. They arise based on our *gati* (or character or habits).
 - Immediately after *mano saṅkhāra* arise, we become aware of them and if we are not paying attention we may just keep generating *vacī saṅkhāra* along the same lines.
 - For example, when an alcoholic sees a bottle of alcohol at a party, his/her first reaction is to have a drink. But if that person has will power, he/she can think about the bad consequences and forcefully move the mind to some other matter.
 - Both *Satipaṭṭhāna* and *Ānāpāna bhāvanā* are based on understanding how *vacī saṅkhāra* arise based on *mano saṅkhāra* that arise according to one's *gati* (and that we have control over *vacī saṅkhāra*).

7. Another important observation from the above discussion is that our physical bodies are “inert shells.” It is controlled by a mental body (called “*gandhabba*”) where all thoughts (and thus *saṅkhāra*) arise.

- This is why in many confirmed Out of Body Experiences (OBE), the body becomes lifeless when the *gandhabba* comes out of the body.
- These are all key concepts that we have discussed in detail at the website. One can use the “Search” box to find details as needed.

Importance of Javana Citta

Not all thoughts are the same. In order to get a better idea about thoughts or *saṅkhāra*, it is good to know some basic facts about *citta*.

1. *Citta* can be of 89 types and that analysis is very complex. We don't need to know all those. **We just need to know that some of those 89 types is called a “*javana citta*” and those are very powerful *citta*.**

- The word “*javana*” comes from the root “*ja*” meaning “birth.” Thus *javana citta* are the root for all births. *Javana* can also mean “running”, or “spear” that can penetrate, to indicate the power.
- The opposite of *javana citta* would be “*ati parittārammana citta*” that we don't really even feel. Those *citta* arise when we are asleep and are responsible for breathing.
- Breathing involves movement of body parts (lungs), and is thus a “*kāya saṅkhāra*.” This is an excellent example of a *saṅkhāra* that is not defiled. It is an essential action to maintain life.

2. **On the other side of the spectrum, we have powerful *javana citta*, which CAN lead to strong *saṅkhāra* called *abhisāṅkhāra*.**

- *Javana citta* generate energies that is the root cause of future *vipāka* (results) that can give rise to various types of *vipāka* during a lifetime. Strong ones can lead to future rebirths. **Thus, the key to future suffering is hidden in *javana citta*.**
- However, not all *javana citta* lead to *abhisāṅkhāra*. For example, *kusala kamma* (wholesome deeds) done by *Arahants* are not called *abhisāṅkhāra*. They are called *kriya*. They don't have *kammic* energy to fuel rebirths or bring *pavutti vipāka*.

3. A very strong *kāya saṅkhāra* would be to kill a human, say by stabbing. That requires a very strong impulse, a high *javana* power. One can do that only when one's mind is very agitated and is full of hate. These are called *apuññabhi saṅkhāra* (*apuñña abhi saṅkhāra*, meaning “bad strong *saṅkhāra*”).

- However, high *javana* power does not necessarily mean a bad action. When someone does good deeds (*kusala kamma*), they are done with *puññabhi saṅkhāra* (*puñña abhi saṅkhāra*, meaning “good strong *saṅkhāra*”).
- High *javana* power may involve neutral actions too. For example, lifting a heavy object requires high *javana* power. But if that is done while cleaning house, for example, that is a neutral action (no *kammically* good or bad intention), therefore is not called good or bad (*puñña* or *apuñña*). Such *javana citta* are not included in *Abhidhamma* because they do not have *kammic* consequences.

4. There are 12 types of *javana citta* corresponding to the 12 types of *akusala citta* and 8 types of *javana citta* corresponding to the 8 types of *kusala citta*.

- These are the *javana citta* of importance to us.
- The 12 types of *akusala citta* with *akusala javana* can bring bad *vipāka* during a lifetime or rebirth in “bad realms.”

- The 8 types of *kusala citta* with *kusala javana* can bring good *vipāka* during a lifetime or rebirth in “good realms.” We need to do *kusala kamma* in order to avoid rebirth in the *apāyā* and to attain *Nibbāna*.
- However, “good” and “bad” in the above are relative. It is just that “bad realms” have obviously harsh suffering. But no realm out of the possible 31 realms is free of suffering.

5. Now we are beginning to see why *dasa akusala kamma* or the ten immoral deeds (that are done with those 12 types of *akusala citta*) are at the heart of Buddha Dhamma.

- When one is engaged in such immoral deeds, they generate “energies” called “*bhava shakti*” to fuel future *kamma vipāka* (bad results), including rebirths in the *apāyā*.
- Thus it is unfruitful and dangerous to engage in *dasa akusala*; this is why such activities are of *anicca* nature (do not lead to what one expects and only lead to more stress and suffering), one of the three characteristics of this world (*Tilakkhaṇa*).
- Obviously, such activities leads to suffering or *dukkha*, the second of the *Tilakkhaṇa*.
- Once one gets a rebirth in the *apāyā*, it is very hard to get out and thus one becomes “helpless.” Furthermore, clearly such actions are fruitless in the long run even if born in “good realms.” This is the key to understand “*anatta*,” the third characteristic of this world.

So, that is the first part of a highly-condensed outline of Buddha Dhamma. We will continue this outline in the next post.

Ongoing discussion on this topic at the discussion forum: “[Buddha Dhamma for an Inquiring Mind](#).”

4.3.2 Root of All Suffering – Ten Immoral Actions

November 14, 2017

1. This new subsection of “[Dhamma with Less Pāli](#)” is now the second subsection in the “[Living Dhamma](#)” section.

- In the first *desanā* of the “[Living Dhamma – Overview](#)” subsection, we talked about how one’s mind get agitated when one is engaged in *dasa akusala* or the ten immoral actions.

2. After that “[Living Dhamma – Overview](#)” subsection, I had “[Living Dhamma – Fundamentals](#)” as the next subsection, where I started discussing the connection between those *dasa akusala* and *cetasika* or mental factors in our thoughts.

- Now I realize that it was to much of a jump, even for many who have had exposure to Buddha Dhamma but are not familiar with *cetasika*.
- So, in this new subsection — “[Dhamma with Less Pāli](#)” — I plan to close that gap. This subsection will have much less Pāli words, and I will try to introduce only the essential Pāli words as I proceed.

3. Here is the first *desanā*: “**Ten Immoral Actions (Dasa Akusala).**” Here we discuss the ten immoral actions (*dasa akusala*) and how avoiding them helps calm the mind; in fact, this is the key to avoid depression.

[WebLink: Download “Ten Immoral Actions \(Dasa Akusala\)”](#)

[WebLink: Download “Ten Immoral Actions \(Dasa Akusala\)”](#) (Original - Larger file size)

- In the first *desanā* of the “[Living Dhamma – Overview](#)” subsection, I talked about how one’s mind get agitated when one is engaged in *dasa akusala* or the ten immoral actions. Here is that *desanā*:

“**The Hidden Suffering that We All Can Understand**“

[WebLink: Download “The Hidden Suffering that We All Can Understand”](#)

I recommend reading the three posts in that “[Living Dhamma – Overview](#)” subsection.

4.3.3 **Is Suffering the Same as the First Noble Truth on Suffering?**

The main goal of meditation before the *Sotāpanna* stage is to understand the message of the Buddha. Before following the Path, one needs to comprehend what it is about. It is better to get into *satipattāna bhāvanā* after one fully understands what is going to be done in *satipattāna bhāvanā*. Many people waste a lot of time doing what they perceive to be *satipattāna bhāvanā*, and do not get much benefit.

I will have several posts here that one could use for contemplation in meditation. When the mind calms down some, one should think about validity of what is discussed; understanding itself lead to getting rid of defilements. One can even reach the *Sotāpanna* stage just via “*dassanena pahatabba*” or “removal via clear vision.”

1. Many people have misconceptions about the First Noble Truth on Suffering or *Dukkha Sacca* (pronounced “sachhā”). In one of the internet forums, I was asked two questions that embody many of such misconceptions about Buddha’s message.

- “I understand what the Buddha meant by suffering because I came down with this ailment. How do other people understand Buddha’s message and how do they find out about his message?”
- Then there was this question from apparently by a young person, “With so many pleasurable things around us with the innovations from science and technology, why do people need to think about suffering? Isn’t Buddha’s message kind of outdated?”

2. Before discussing them, it is clear that they both have good and bad implications.

- People at least search the internet and find out about Buddha Dhamma because of the first, and those who are “enjoying life to the fullest” may not even hear about Buddha Dhamma at all because of the second.
- On the other hand, the assertion is wrong in the first question, and is correct in the second at least on the surface.

3. **The Buddha never said** that “there are no sense pleasures to be had in this world.” On the contrary, he said people are unable to SEE the hidden suffering BECAUSE of the apparent sense pleasures they are enjoying OR those that are within reach even if not available to one right away.

- Even a poor person can see all the sense-fulfilling offers all around; even if he cannot access them at the moment, his thinking is “if I work hard, I can access all these pleasures at some point.” Thus whether rich or poor, all are “under the illusion of a sea of apparent pleasures” to be had.

4. Buddha Dhamma needs to be understood with wisdom. Wisdom (*paññā*) is a mental factor (*cetasika*) that needs to be cultivated mostly by reading (or listening) about the Buddha’s world view first.

- Most people just PERCEIVE suffering through the mental factor (*cetasika*) of feeling (*vedanā*), like the person who asked the first question above. One can experience suffering, but that is NOT the Noble Truth ON suffering.
- The second questioner had not EXPERIENCED much of suffering, and does not think he needs to pay any attention.
- **Both need to look at world with wisdom within the worldview of the Buddha to see the HIDDEN suffering.** This CANNOT be done without understanding what the Buddha was saying about a more expansive and more complex world than what we experience with our six senses (of course one will not BELIEVE it unless one is convinced; the real conviction will come only if one gets familiar with the whole message).

5. In his first sermon, *Dhamma Cakka Pavatta Sutta*, the Buddha said this about his new message to the world: “*pubbe ananussutesu dhammesu*” or “a Dhamma that has never been known to the world.”

6. Everyone can and will experience suffering during this life; there is nothing NEW in that.

What is new in the message of the Buddha can be briefly stated as:

- There is a wider world out there with many more beings living in 29 more realms than the human and animal realms that we experience, AND the real suffering is in the lower four realms.
- This life is only a brief stop in our long journey through the cycle of rebirths called *samsāra*.
- Even in this life, there is hidden suffering even when one seems to be enjoying life, AND there is real suffering at old age and death that is inevitable for everyone. This last part of course is apparent to anyone, but is not thought about much at all. As one gets old, when the real suffering starts the mind could be too weak to learn Dhamma.
- MOST IMPORTANT part of the Buddha’s message is the one that is least heard about; That there is permanent happiness to be had, and that CAN be attained during this very life.

7. I have several posts on the “bigger worldview of the Buddha” and also on rebirth, nature of *kamma*, etc. Also, there are several posts on the *nirāmisa sukha* which is a happiness of permanent nature to be had during this very life by following the Path advised by the Buddha.

- Let us take a brief look at the third point on the ‘hidden suffering’ with a couple of examples next.

8. **Example 1:** When a fish bites the bait, it does not see the suffering hidden in that action. Looking from the ground we can see the whole picture and we know what is going to happen to the fish if it bites the bait. But the fish is unable to see that whole picture, and thus does not see the hidden suffering. It only sees a delicious bit of food.

- In the same way, if we do not know about the wider world of 31 realms (with the suffering-laden four lowest realms), and that we have gone through unimaginable suffering in those realms in the past, we only focus on what is easily accessible to our six senses.

9. **Example 2:** Suppose someone makes you an offer. He says, “I will put you in one of the best resorts with all amenities paid for a month. But there is a catch. The food will taste great but will have traces of poison that will become effective in a few months and will lead to death within the year.”

Will anyone take the offer, knowing that it will lead to suffering and death? Of course not.

- But if the host did not tell them, they would not know, and will have a good time, but will have the same consequences.
- In the same way, we are enjoying the sense pleasures without knowing the consequences of them, especially if we did immoral things to get those pleasures.

10. Here is another thing to contemplate: We all have seen how a parent, a grandparent, or even an unrelated celebrity from past years transforms from a dynamic, self-confident, and sometimes imposing character to a feeble, helpless person in the latter years. Sometimes they die under pathetic conditions that would have been unimaginable for them when they were young. **But this change is gradual, and even they do not realize it until it is too late.**

- When one becomes too old, it may be too late to start thinking about these facts; one needs to spend even a little time contemplating on these “facts of life” now. Not to get depressed about this inevitability, but to DO SOMETHING ABOUT IT; this will enable one to enjoy the latter days of life with *nirāmisasukha*, even if no stage of Nibbāna is attained.

11. Now, this DOES NOT MEAN one should get away from all sense pleasures even if one becomes convinced of the core message of the Buddha. Abandoning everything may have even worse consequences if it is not done with true understanding. And it takes time to digest the whole message. It has taken me several years to come to the stage where I am now. I have not given up anything with remorse; I do not “miss” anything that I have given up. The only things one may want to “forcefully give up” are things that directly hurt other beings like killing, stealing, etc which most people don’t do anyway.

- Giving up sense pleasures comes gradually with understanding, when one sees the benefits of giving up.
- There is no need to rush into taking drastic actions. The urgent task is to GET STARTED. Allocate a little time each each day to learn Dhamma, preferably when the mind is a bit calmer so that one can focus and contemplate. As the Buddha said, this Dhamma is really different from what we are used to.

12. As one begins to understand the message of the Buddha, the learning process will become easier. What I hope to do with this site is to basically present all the background material that I have gone through, so others do not have to repeat it all. Of course you may want to do additional research; each one may be looking at things a bit differently. I will be happy to address any issues that are not discussed on the site yet.

13. In summary, the First Noble Truth on suffering is NOT to be EXPERIENCED as a feeling (*vedanā*), but needs to be UNDERSTOOD with wisdom (*paññā*). Actually, when one is experiencing any form of suffering that makes it HARDER to grasp the meaning of the First Noble Truth. One needs a clear, calm, and healthy mind to grasp it.

A not-so-deep analysis of Dukkha Sacca is given in the post, [“Does the First Noble Truth Describe only Suffering?”](#)

A deeper analysis of the Dukkha Sacca is given in the next post, [The Incessant Distress \(“Pilana”\) – Key to Dukkha Sacca.](#)

4.3.4 Dhamma, Saṅkhāra, Sankata, Rūpa, Viññāṇa, Gati, Āsava, Anusaya

July 22, 2018

1. I recently realized that it would be a good idea to explain what is meant by key Pāli words like the above in one place.

- This information could be there spread over hundreds of posts on the website, but not many people have read even a fraction of what is at the web site.
- Since it is critical to understand these key terms, I will try to provide another condensed “big picture” in terms of these key words. In the last post we analyzed the big picture in terms of root causes; see, [“Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\).”](#)

2. One way to look at this is to start with how the Buddha described “everything in this world.” We have two worlds to begin with: physical world (*bhautika loka*) and the mind world (*mano loka*).

- Everything that is in the physical world is detected by the five physical senses of eyes, ears, nose, tongue, and the body: *vaṇṇa rūpa* (visible objects), *sadda rūpa* (sounds), *gandha rūpa* (smells), *rasa rūpa* (tastes), and *pottabba rūpa* (touchable objects).
- **Therefore, everything that is in our physical world are called *rūpa*, and are included in the five types mentioned above.** Those *rūpa* are all above the *suddhaṭṭhaka* stage.
- For example, we can see *vaṇṇa rūpa* with eyes: “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ.*” Similarly for other four.
- Some objects in the physical world can be detected with more than one sense faculty, and the more information we get the more knowledgeable we become of the object: we can see and touch an apple; if we can also smell it, the apple is probably ripe; if we taste it, we can confirm that it is ripe.

3. **We have a sixth sense faculty: *mana indriya*, which basically detects everything else in our world, and they are called *dhammā*:** “*manañca paṭicca dhamme ca uppajjati manovīññāṇaṃ.*” These *dhammā* are in our *mano loka* (mental world).

- These *dhammā* include everything that is not detected with the five physical senses. They include, for example, *kamma bīja*, *nāma gotta* (memory records or memories), mathematics, philosophy, Buddha Dhamma, etc.
- Those are also called *rūpa*, but those *rūpa* are different from the *rūpa* in the physical world: Some have energies that lie below the *suddhashtaka* stage (*kamma bīja*), and the rest of them are either just memories (*nāma gotta*) or concepts.
- These fine *rūpa* are described as, “*anidassanaṃ, appaṭighaṃ, dhammāyatana pariyāpanna rūpaṃ*” or “*rūpa* that cannot be seen, touched, and only detected via *dhammāyatana (mana indriya)*.”

4. **When one of our senses detects something in our physical world or the mental world, one of the six types of *viññāṇa* arise**, and we become aware of that “thing”, whether it is a *vaṇṇa rūpa*, *sadda rūpa*, or a *dhammā*.

- *Viññāṇa* is a very complex entity: it includes or encompasses the following: our feelings (*vedanā*), perceptions (*saññā*), and a set individual mental factors (*cetasika*). They all arise together, and the set of *cetasika* that arise is dependent on each person’s *gati*.
- For example, totally different sets of *vedanā*, *saññā*, *saṅkhāra* (i.e., *cetasika*) arise when a famous politician is seen by one of his supporters and a person from the opposition party.
- But in addition, ***viññāṇa* also includes one’s hopes for the future. That is important.**

5. The initial response in one’s mind upon subjected to an external sense input (whether it is seeing, hearing or just a memory coming to the mind), is called a ***mano saṅkhāra***. Of course, that is part of *viññāṇa*.

- Now, we can see why different people generate different types of *viññāṇa* when exposed to the same sense input. Those *mano saṅkhāra* — that is generated instantaneously — depends on one’s *gati* or set of *kilesa* (*lobha, dosa, moha*).
- Each person has a set of *kilesa* called *āsava*, and one’s *gati* (and therefore those *mano saṅkhāra*) closely follow those *āsava*; we will discuss that below.

6. If that sense input is an interesting one (a like or a dislike), then immediately one starts thinking about it. This is called “generating ***vacī saṅkhāra***” or basically “talking to oneself.” Now one is fully aware that one is thinking about that sense input, whether it is a picture, sound, a memory, or anything else.

- Furthermore, if one gets really animated about that object, one may speak about (still with *vacī saṅkhāra*), and may even take a bodily action which will involve ***kāya saṅkhāra***.

- In contrast to *mano saṅkhāra* that arise AUTOMATICALLY, both *vacī* and *kāya saṅkhāra* are generated consciously. This is key to *Ānāpāna* and *Satipaṭṭhāna* meditation since we have the ability to stop or to continue with those *vacī* and *kāya saṅkhāra*.
- Those three types are collectively called ***saṅkhāra***.
- So, I hope you now have a better understanding of what is meant by *viññāṇa* and *saṅkhāra* and also how they are related. From #4 above, we can also see that *saṅkhāra* are part of *dhammā*.

7. By the way, *kāya kamma* are those actions done with the body, but we see that *kāya saṅkhāra* are responsible for such *kāya kamma*.

- In the same way, *vacī saṅkhāra* are responsible for *vacī kamma*, and *mano saṅkhāra* are responsible for *mano kamma*.
- All ***kamma*** (actions) are done with *saṅkhāra*. They all have origins in the mind.

8. Now, such *saṅkhāra* can be “harmless” or “dangerous” or “beneficial.” Our actions, speech, and thoughts are all based on such *saṅkhāra*.

- When one gets hungry, one may generate *vacī* and *kāya saṅkhāra* to ask for food or to go walk to the kitchen and get something to eat. Such *saṅkhāra* are *kammically* neutral, in the sense that they don't lead to “good or bad *kamma vipāka*” in the future other than getting what one wanted to satisfy the hunger.
- Of course, if one gets attached to that food while eating, one may generate strong *saṅkhāra* or *abhisāṅkhāra* that will have significant *kammic* consequences. That is an *apuñña abhisāṅkhāra* since that involves the *lobha cetasika*.

9. If one is planning to kill another human, then one would be generating very strong “*apuñña abhisāṅkhāra*” that involves *vacī saṅkhāra* and may lead to *kāya saṅkhāra* if one actually goes through the killing. Then one would have generated a strong *kamma bīja* that can bring a future birth in the *apāyā*.

- On the other hand, if one is studying Buddha Dhamma, one will be generating all three types of *puñña abhisāṅkhāra* (thinking, contemplating and doing things like downloading material from the internet). They will create good *kamma bīja* that will lead to good *vipāka*: either leading to *magga phala* or at least births in good realms so that one could continue on the Path.

10. Now we can begin to see how *saṅkhāra* can lead to the formation (or arising) of ***saṅkhata (sankata in Sinhala)***. A potent *kamma bīja* generated via a strong *apuñña abhisāṅkhāra* can lead to say, animal *bhava*, and to the birth as an animal.

- Therefore, that *saṅkhata (sankata in Sinhala)* (animal) came to being because of that *kamma bīja*, and many *abhisāṅkhāra* could have contributed to that *kamma bīja*.
- In the same way, a strong “good *kamma bīja*” generated via *puñña abhisāṅkhāra (puñña kamma)* can lead to a human or a *deva* birth. That human or *deva* is a *saṅkhata (sankata in Sinhala)* too.

11. It is much more complex, but ALL material things arise in this world are due to *saṅkhāra*. I will take a simple example to show the basic idea.

- A house (a *saṅkhata (sankata in Sinhala)*) comes into being as a result of many types of *saṅkhāra*. First, one needs to get the idea to build a house. Then he/she may consult an architect and after much discussion (lot of *mano* and *vacī saṅkhāra* and also *kāya saṅkhāra*), they will come up with a blueprint (plan) for the house.
- Then many people will work to build the house. Innumerable *mano*, *vacī*, *kāya saṅkhāra* are involved in bringing the house to completion (of course, most of those are not *puñña* or *apuñña abhisāṅkhāra*; they are just mostly neutral *saṅkhāra*).

- The explanation of how a tree arises is a more complex one, but also has origins in the mind. We may get to that at a future time, but it is not necessary to attain *Nibbāna*. As the Buddha said: “mind is the precursor to everything in this world.”

12. **Any *saṅkhata* (*sankata* in Sinhala) has the following universal properties:** it comes into being and eventually is destroyed, and also it undergoes unexpected change while in existence. Think about anything in this world. Those three characteristics are associated with any of them.

- **This is why ANY *saṅkhata* (*sankata* in Sinhala) HAS the *anicca* nature.** It is said that “*uppāda vayattena aniccā*,” emphasizing those main properties: any *saṅkhata* (*sankata* in Sinhala) arises and eventually is subjected to decay and death, whether it is living or inert.

13. However, it is important to realize that a *saṅkhata* (*sankata* in Sinhala) WILL NOT bring suffering to anyone unless one gets attached to it. A *saṅkhata* (*sankata* in Sinhala) has the *anicca* nature (i.e., the potential to bring suffering), but it does not automatically lead to suffering.

- A bottle of poison sitting on a table has the potential to kill someone. But unless someone takes the bottle and drinks from it, he/she will not be affected.
- In the same way, we will be subjected to suffering ONLY IF we get attached to worldly things (*saṅkhata* (*sankata* in Sinhala), whether it is a person, house, car, etc). Then why do we get attached to such things all the time? That is because we have not comprehended the real *anicca* nature of *saṅkhata* (*sankata* in Sinhala). It is not easy to see the *anicca* nature.

14. Therefore, a key point is that any type of *rūpa* (or any *saṅkhata* (*sankata* in Sinhala) in general) WILL NOT bring us *dukkha* unless we get attached to (or repulsed by it), i.e., it leads to *taṇhā* in the mind.

- This is why the Buddha said, “*.pañca upādānakkhandhā dukkhā*,” and NOT “*pañcakkhandha dukkhā*.”
- There could be all kinds of attractive/hateful things around us, but if we don’t generate *upādāna* for them via craving (*lobha*) or hate (*dosa*), we will not be subjected to suffering.
- However, that is hard to do until one cultivates *paññā* (wisdom) by learning Buddha Dhamma and eventually grasping the *Tilakkhaṇa* (*anicca, dukkha, anatta*).

15. Until then, when we experience a sense input via any of the six senses (see above), we may automatically generate bad *mano saṅkhāra* and then willingly generate *vacī* and *kāya saṅkhāra* along the same lines, if we are not being mindful.

- As we discussed above, those *mano saṅkhāra* arise AUTOMATICALLY according to our *gati*. Those *gati* are closely associated with *āsava* (mental fermentations) that cannot be removed until one comprehends *Tilakkhaṇa*.
- Based on the sense input, those *āsava* may come to the surface and that is called *anusaya*; see, “[Gathi \(Gati\), Anusaya, and Āsava](#).”
- The only way to change those *gati* (i.e., to remove *āsava* from one’s mind permanently) is to cultivate *Ānāpāna* and *Satipaṭṭhāna*, by being mindful of what kind of *saṅkhāra* arise in our minds as we are exposed to such external sense inputs.
- So, it is VERY IMPORTANT to both learn Buddha Dhamma (in particular *Tilakkhaṇa*) and ALSO to practice real *Ānāpāna/Satipaṭṭhāna bhāvanā*.

16. **It must be clear now that the main cause of suffering is not *saṅkhata* (*sankata* in Sinhala), but *saṅkhāra*, specifically *apuñña abhisāṅkhāra*.** This is why it is said that “*sabbe saṅkhāra aniccā*” and NOT “*sabbe saṅkhata* (*sankata* in Sinhala) *aniccā*” or “*sabbe dhamma aniccā*”

- Another word for *apuñña abhisāṅkhāra* is *dasa akusala*. Abstaining from *dasa akusala* is the same as stopping BAD *mano, vacī, and kāya saṅkhāra*.

- Some of that can be done via pure determination. However, that discipline becomes hard when one gets strong sense inputs. For example, one may not take a bribe, but if the offer is a million dollars one may be tempted to take the bribe.

17. That is the difference a real comprehension of *Tilakkhaṇa* will accomplish; one's tendency to do immoral things will naturally reduce as one's comprehension of *Tilakkhaṇa* increases. An *Arahant* will not be tempted by absolutely anything.

- An *Anāgāmi* will not be tempted by any "kāma" input, for example, seeing the most attractive person. But he/she will have a liking (craving) for Buddha Dhamma and possibly for *jhānic* pleasures.
- A *Sotāpanna* WILL NOT do any *apāyagāmi akusala* (i.e., will not generate such *apuñña abhisankhāra*).
- Those controls take place automatically. The mind will automatically do that by not generating even spontaneous *mano sankhāra* belonging to those categories. **That is done via permanently changing one's *gati* for the better via *paññā*.**

18. Finally, another thing to remember is that most of what we experience are *dhammā*, via the *mana indriya*.

- Those five physical senses are active ONLY in bringing that sensory input, which means that sense experience is very brief.
- Let us take an example of watching a person walking towards you. When the person is 100 meters away, you see a snapshot of him. Then that mental imprint immediately goes to the past. By the time he is close to you, all those visual events of him walking towards you will have gone to the past; they can now be recalled only as *dhammā*.
- The same is true for all five physical senses. We experience them only DURING the sense event, only momentarily. After that we can only RECALL those events with the *mana indriya*. Those past sense events come back to as *nāma gotta* or memories. A day after meeting that person, you can visualize the whole event with the *mana indriya*.

19. Therefore, *pacakkhandha* (except for those arising at any given moment) are really *dhammā*, that are experienced by the mind via the *mana indriya*. This is a subtle point that may not be obvious immediately; also, see "[Pañcakkhandha or Five Aggregates – A Misinterpreted Concept.](#)"

- We get attached to only a small fraction of *pañcakkhandha*, and that is called *panca upādānakkhandha*; see, "[Pancupādānakkhandha – It is All Mental.](#)"

20. If you think deep enough you will realize the world that one experiences, is made up by one's mind to some extent (it is easy to see that our *vedanā*, *saññā*, *sankhāra*, and *viññāṇa* are all highly personal, and are based on one's *gati*).

- The physical world around us exists for sure and is real, but what we perceive is highly personal. What we really see and experience is our own "mental picture" of the world: our own *vedanā*, *saññā*, *sankhāra*, and *viññāṇa*.

21. This post became longer than I expected. However, it is not possible to even provide a basic outline in a short post. Still one would need to read other relevant posts to really understand this basic layout, and thereby understand those keywords better. But it is important to do if one is really interested in grasping the true teachings of the Buddha.

- As the Buddha said, "this *Dhamma* has never been known to the world, and it is not easy to comprehend." It requires a real effort. On the other hand, getting released from the *apāyā* should not be expected to be done easily. Otherwise, none of us would still be here.

Any questions can be discussed at the discussion forum at: "[Difference Between Dhammā and Sankhāra.](#)"

4.3.5 Complexity of the Mind – Viññāṇa and Saṅkhāra

April 28, 2019; revised November 8, 2019

Vipāka Viññāṇa and Kamma Viññāṇa

1. Even though science has made significant progress in the understanding of the material world, science has advanced very little on the subject of mental phenomena.

- The words *viññāṇa* and *saṅkhāra* have no corresponding words in English. It is absurd to translate *viññāṇa* as “consciousness.” There are two types of *viññāṇa*. *Vipāka viññāṇa* are only consciousness. However, *kamma viññāṇa* that arise via “*saṅkhāra paccayā viññāṇa*” are much more than just consciousness.
- I looked up the definition of consciousness. It is usually defined as “the state of being awake and aware of one’s surroundings” or “the awareness or perception of something by a person.” That is not what is meant by *viññāṇa*.

2. ***Kamma viññāṇa* arises only when one acts with *avijjā***: “*avijjā paccayā saṅkhāra*” and “*saṅkhāra paccayā viññāṇa*.” Thus, *kamma viññāṇa* can occur only if one acts with *avijjā* or ignorance.

- The Buddha did not act with *viññāṇa* (i.e., did not generate *kamma viññāṇa*) after attaining the Buddhahood. But he had perfectly good consciousness.
- *Viññāṇa* is a very complicated word. Even though I have simplified *viññāṇa* as “defiled consciousness,” that is also not adequate; see, “[Viññāṇa – Consciousness Together With Future Expectations.](#)”

Different Categorizations of *Saṅkhāra*

3. In [WebLink: suttacentral: Paṭiccasamuppāda Vibhaṅga](#), the term “*avijjā paccayā saṅkhārā*” in *akusala-mūla Paticca Samuppāda (that leads to suffering)* is explained as follows: “*Tattha katame avijjā paccayā saṅkhārā? Puññābhisaṅkhāro, apuññābhisaṅkhāro, āneñjābhisaṅkhāro, kāyasaṅkhāro, vacīsaṅkhāro, cittāsaṅkhāro.*”

Translated: “What is *avijjā paccayā saṅkhārā*? *Puññābhisaṅkhāra, apuññābhisaṅkhāra, āneñjābhisaṅkhāra, kāyasaṅkhāra, vacīsaṅkhāra, cittāsaṅkhāra.*” (here, *cittāsaṅkhāra* is the same as *manosaṅkhāra*).

- They are all *abhisaṅkhāra*, even though the verse has simplified as “*avijjā paccayā saṅkhārāey*.”
- There are two types of *abhisaṅkhāra* mentioned there: **one kind refers to types of *kamma* accrued. The second categorization says whether it involves the body, speech, or just mind.**
- Therefore, *saṅkhāra* has a much deeper meaning than just “mental formations,” even though that is better than the translation for *viññāṇa* as consciousness.
- Let us discuss those two types next.

Mano, vacī, and kāya Saṅkhāra

4. First, let us consider *mano saṅkhāra*, *vacī saṅkhāra*, and *kāya saṅkhāra*.

- They all arise in the mind, but have differences: thoughts that appear automatically in the mind are called *mano saṅkhāra*.
- When we consciously think about something, those are *vacī saṅkhāra* (speaking out is also included).
- When we move the body with our thoughts, those thoughts are *kāya saṅkhāra*.
- Of course, those *saṅkhāra* become *abhisaṅkhāra* when immoral or moral intentions play a role. Such *abhisaṅkhāra* lead to rebirth and future suffering (see #5 below).

4. In other words, *saṅkhāra* in “*avijjā paccayā saṅkhāra*” in *akusala-mūla Paṭicca Samuppāda* are ***abhisaṅkhāra*** that can lead to rebirth.

- Even an *Arahant* will generate *saṅkhāra* (all three types of *mano saṅkhāra*, *vacī saṅkhāra*, and *kāya saṅkhāra*) to live in this world the physical body dies.
- However, an *Arahant* will NOT generate any *abhisaṅkhāra*.

Apuñña, Puñña, and Āneñja abhisaṅkhāra

5. *Abhisaṅkhāra* falls into three categories of *apuçña abhisaṅkhāra*, *puñña abhisaṅkhāra*, and *āneñja abhisaṅkhāra*.

- *Apuñña abhisaṅkhāra* are immoral actions leading to births in the *apāyā*.
- *Puñña abhisaṅkhāra* are moral actions leading births in the “good” realms of human, *deva*, and *rūpāvacara brahma* realms (via cultivation of *rūpāvacara jhāna*).
- *Āneñja abhisaṅkhāra* are involved in the cultivation of *arūpāvacara jhāna* leading to rebirth in *arūpāvacara brahma* realms.
- Therefore, just translating *saṅkhāra* as “mental formations” is not very useful in describing what they are; see, “[Saṅkhāra – What It Really Means.](#)”

Current Scientific Knowledge of Consciousness

6. Modern science is far behind the Buddha in the understanding of mental phenomena. To understand the severity of this problem, let us examine a presentation by the philosopher John Searle, “Our Shared Condition – Consciousness.”

[WebLink: youtube: John Searle: Our shared condition -- consciousness](#)

7. In my opinion, John Searle is one of few philosophers who comes even close to understanding mind phenomena. Some philosophers/scientists do not even believe that consciousness is real. They say: “..Science is objective, consciousness is subjective. Therefore there cannot be a science of consciousness.” Whether there can be a “science of consciousness” or not, consciousness is real, as Searle points out.

- Some others object, “..Maybe consciousness exists, but it can’t make any difference to the world. How could spirituality move anything?..” In response, Searle points out: “..I decide consciously to raise my arm, and the damn thing goes up.”

Consciousness Is Real

8. John Searle is also quite correct that consciousness is not an illusion. As he points out, only a conscious living being can decide to move a body part, say raise a hand.

- But to be perfectly correct, consciousness is not what moves an arm. One needs to make a “conscious effort” to move the arm, i.e., one must decide to raise the hand. Those thoughts are *kāya saṅkhāra*: conscious thoughts that lead to moving body parts.
- However, it is essential to realize that the energy to raise the hand does not come from the mind. The mind initiates the process, and the brain sends the necessary commands to the muscles to raise the hand; energy for such muscle movements comes from the food we eat.
- Just like an on-board computer carries out the commands of the pilot flying a plane, the brain acts like a computer and carries out the commands given by the mind.

Breathing Involves Basic *Kāya Saṅkhāra*

9. The definition of *kāya saṅkhāra* is “*assāsa passāsā kāya saṅkhāra*” or “breathing in and out is *kāya saṅkhāra*.” We all do such *kāya saṅkhāra* through our lives, and that is the most basic *kāya saṅkhāra*.

- Even though we do not realize it, breathing in and out involves “thinking at the lowest level” or with “*atiparittārammana citta vīthi*.” Those *citta vīthi* do not have *javana citta*, and thus, we do not “feel them.”
- In the fourth *jhāna samāpatti*, *kāya saṅkhāra* involved in breathing stop, i.e., breathing stops.
- *Kāya saṅkhāra* lead to any bodily movement. Unless those bodily movements lead to *kammic* effects (good or bad), they do not become *abhisāṅkhāra*, which could lead to rebirth.

***Vacī Abhisāṅkhāra* and *Kāya Abhisāṅkhāra* Can Lead to Rebirth**

10. *Vacī saṅkhāra* also can be just *saṅkhāra* (thinking to oneself/speaking about normal activities) or *abhisāṅkhāra* with *kammic* consequences. See, “[Correct Meaning of Vacī Saṅkhāra.](#)”

- Both *vacī* and *kāya abhisāṅkhāra* can lead to rebirth.
- *Mano saṅkhāra* — which arise automatically — do not lead to rebirths.

Some Pāli Words Should Not be Translated

11. Modern science cannot explain *saṅkhāra* (more correctly how a person moves body parts or speaks on his/her volition). The English language does not have an equivalent word for “*saṅkhāra*.” Furthermore, as explained above, “consciousness” should not be used as the English translation for “*viññāṇa*.”

- **We need to learn the Pāli words (*saṅkhāra* and *viññāṇa*) and then just use those words.**
- That is what has been the practice in the Sinhala language. **The same words *viññāṇa* and *saṅkhāra* appear in the Sinhala translations of the *Tipiṭaka*.** Just like in English, there are no Sinhala words assigned for *viññāṇa* and *saṅkhāra*.

4.3.6 Citta, Manō, Viññāṇa – Nine Stages of a Thought

January 24, 2018; revised January 6, 2019; July 26, 2020

***Citta, mano, viññāṇa* – All Different**

1. *Citta, mano, viññāṇa* are common words used indiscriminately in many texts on Buddhism (Buddha Dhamma). **They are all related, yet different.**

- A *citta* becomes “contaminated” in eight steps to become *viññāṇa* (and in another step to become part of the *viññākkhanda*.) That transformation happens in an unbelievable short. The level of “contamination” depends on one’s *gati* (character/habits.)
- I hope this post will clarify some fundamental concepts, and that will be invaluable in understanding other concepts.
- I cringe when I see some online comments even say *viññāṇa* is *Nibbāna*. It is exactly the opposite. **One attains *Nibbāna* when one gets rid of *viññāṇa***, or more precisely when one purifies one’s mind to the extent that a thought does not contaminate to the *viññāṇa* stage.
- *Viññāṇa* is discussed at “[Viññāṇa Aggregate.](#)”

Fundamentals of a *Citta*

2. The generic term in English “thought,” cannot even begin to explain the complex process that happens within a fraction of a billionth of a second when a *citta* arises. A *citta* goes through three stages (*uppāda*, *ṭīhi*, *bhaṅga*) before terminated within a billionth of a second.

- When we see, hear, smell, taste, or touch, seventeen *cittā* flow uninterrupted. Such a series of *citta* is called a *pañcadvāra citta vīhi*. For example, it happens in “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*.”
- If the thought object comes through the *māna indriya* (“*manañca paṭicca dhamme ca uppajjati manovīññāṇaṃ*”), that *citta vīhi* is called a *manodvara citta vīhi*, and it has 10-12 *citta*. Again, many such *citta vīhi* flow even before we consciously become aware of that “thought.”

A “Thought” May Have Billions of *Citta*

3. Another essential point to remember is that the word “*citta*” is used loosely, even in Buddha Dhamma. Most times, it gives the same impression as the word “thought.” We just say, “a *citta* comes to the mind.”

- The word “*citta*” has that “conventional” meaning, but the initial stage of a “thought” is also called a *citta*. That *citta* has only the seven UNIVERSAL *cetasika*. That means those seven *cetasika* are in ANY *citta*, including a that of a Buddha or an Arahant. That mean, it is a “pure *citta*” (pabhassara *citta* in Pāli.)
- See, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#).”

A Pure *Citta* Has Only Seven Universal *Cetasika*

4. A pure *citta* is analogous to a glass of purified water without any contaminant.

- If we add a bit of sugar to that glass water, the water becomes sweet. That is like adding “good” (*sobhana*) *cetasika* like compassion to a *citta*.
- But if we add a bit of dirt to that pure water, it becomes dirty. That is like adding “bad” (*asobhana*) *cetasika* like anger to a *citta*.
- Yet, we may still call either glass of water a “glass of water.”
- In the same way, we commonly refer to any thought as a *citta*. However, technically, only the first stage can be called a *citta*. Thus, “any thought” is a *viññāṇa* (a contaminated *citta*.)

The Nine Stages of the Evolution of a *Citta*

5. The initial, pure stage of a *citta* becomes contaminated within an unbelievable short time. It evolves through nine stages in the following sequence: *citta*, *mano*, *mānasaṃ*, *hadayaṃ*, *pañḍaraṃ*, *mano manāyatanaṃ*, *māna indriyaṃ*, *viññāṇa*, *viññākkhandho*. [*Yaṃ cittaṃ mano mānasaṃ hadayaṃ pañḍaraṃ mano manāyatanaṃ manindriyaṃ viññāṇaṃ viññākkhandho...*]

- By the time it gets to the *viññāṇa* stage, it is a totally contaminated *citta*. **How contaminated it gets, depends on the thought object and one's *gathi***, as we will discuss below.
- What we experience or what are aware is that last stage.

6. Before we proceed with the discussion, let me provide a reference to the above verse, which is in the “[WebLink: suttacentral: Paticcasamuppāda Vibhaṅga](#),” in Section [WebLink: suttacentral: 2.5.1. Akusalacitta](#) : “*Tattha katamaṃ saṅkhāra paccayā viññāṇaṃ? Yaṃ cittaṃ mano mānasaṃ hadayaṃ pañḍaraṃ mano manāyatanaṃ manindriyaṃ viññāṇaṃ viññākkhandho tājāmanovīññādhātu—idaṃ vuccati “saṅkhārapaccayā viññāṇaṃ.”*”

- Note that “*saṅkhāra paccayā viññāṇaṃ*” happens in different ways depending on whether it is a “good thought” or “bad thought.”

The “Nine-Stages of Evolution” Can Only be Seen by a Buddha

7. That fast process can be seen only by a Buddha. It is perceptible and discernible (*gocara*) only to the highest purified mind.

- The Buddha explained that first to Ven. Sāriputta, when he first explained the key ideas of *Abhidhamma* to Ven. Sāriputta and it took several hundred years of effort by “the *bhikkhus* of the Sāriputta lineage” to do a systematic compilation of all mental phenomena.
- That is why the *Abhidhamma Piṭaka* was finalized only at the third *Sangāyanā* (Buddhist Council.) See, “[Abhidhamma – Introduction.](#)”

8. It is best to describe the actual process to understand these steps. Let us go back to the evolution of a single *citta* in nine steps.

- It starts with the *citta* stage, which is the purest stage (it has only the seven universal *cetasika*, or mental factors). One is aware that one one is alive.
- These deeper aspects are discussed in “[Pabhassara Citta, Radiant Mind, and Bhavaṅga.](#)”

9. Now that we have stated that technical point (which is not critical for this discussion), we can proceed to the next stages.

- At the first stage of *citta*, the mind just knows that the world exists. That there is a sense impression coming through either of the five physical senses (*cakkhu*, *sota*, *jivhā*, *ghāṇa*, or *kāya indriya*) or the *māna indriya*.

The Nine Stages of Evolution

10. Let us take a specific event: Suppose it is seeing one’s mother.

As we said above, at the first *citta* stage, one is just aware that a thought object came to the mind via the eyes (*cakkhu indriya*).

- Then in the *mano* stage, the mind “measures” or “compares” (that is why it is called the “*mano*” stage) with past experiences to decide whether the object is a tree, a car, a man, a woman, etc. In this case it determines that it is a woman.
- The next “*mānasaṃ*” stage is to decide a specific connection to him/herself. In this case, it turns out that it is one’s mother.

11. Now, those steps occur for any human, including an *Arahant* or even the Buddha. One cannot live without getting to this stage. The Buddha was able to differentiate between Ven. Ānanda, Ven. Sāriputta, Visaka, or King Kosala, and addressed them accordingly.

- In fact, in the *Karaniyamatta Sutta*, what is emphasized by “*mānasambhāva ye aparimānaṃ..*”, means to cultivate “*mānasaṃ*” to the optimum level. That way, one can quickly figure out how to deal with a given situation.

12. At the next step, a average human will generate the “*saññā* of one’s mother” and gets attached. See, “[Saññā – What It Really Means.](#)” That is called the “*hadayaṃ*” stage. Remember that all nine steps happen in a very short time, and do not involve conscious thinking.

- However, in the case of an *Arahant*, the process stop at the *manasaṃ* stage and thus not evolve further. The mind makes decisions are made by the mind just based on recognizing a given person, regardless of the connection between oneself and that person. Even if it is someone who is trying to kill oneself, feelings towards that person will be no different from feelings towards one’s own mother. That is why I say that we cannot even imagine the mind of an *Arahant*.

13. Proceeding to the next stage of “*paṇḍaram*”, that feeling established at the “*hadayaṃ*” stage strengthens in the case of an especially close person like one’s mother. It is like allocating more “energy” for a closer person. If it was a distant relative, for example, it might do little at the “*paṇḍaram*” stage.

- It is also important to note that it may go the totally opposite way for an arch-enemy. Here, one will make very strong bad feelings about such a person.

14. Now comes the next stage of “*mano manāyatanaṃ*.” Here one’s mind becomes an “*āyatana*” or “be receptive” (or hateful) to that person depending on the level of attachment (revulsion) formed at the *hadayaṃ* and *paṇḍaram* stages.

- That is strengthened (to a level based on the feelings generated in the previous steps) at the “*mana indriyaṃ*” stage.
- Note that this “*mana indriyaṃ*” stage is different from the *mana indriya* involved in “*manañca paṭicca dhamme ca uppajjati manovīññāṇaṃ*.”

15. At the *viññāṇa* stage, one’s mind is totally removed from “*ñāṇa*” or wisdom or “the reality of nature.” As long as one has worldly desires (i.e., cravings), one has not stopped the *viññāṇa* stage (i.e., until one becomes an *Arahant*).

- Then at the last stage of *viññānakkhandha*, the mind strengthens attachments cultivated in the past, evaluates the current situation, and makes new hopes and plans for the future. That is the last stage.
- That last stage is what we actually experience. In fact, we do not experience one such “*citta*” or “*viññāṇa*.” Thousands of *citta vīthi* may flow within a fraction of second before we become aware of it.

The Initial *Citta* Stage is a *Pabhassara Citta*

16. **Āṅguttara Nikāya 1; Accharāsaṅghātavagga; Sutta #51** is a very short *sutta*. Here is the complete *sutta*: “*Pabhassaramidaṃ, bhikkhave, cittaṃ. Tañca kho āgantukehi upakkilesehi upakkiliṭṭhaṃ. Taṃ assutavā puthujjano yathābhūtaṃ nappajānāti. Tasmā ‘assutavato puthujjanassa cittabhāvanā natthī’ti vadāmi’ti.*”

Translated: “*Bhikkhus, a (pure) citta has pabhassara nature. That citta is contaminated by defilements (keles or kielesa). A normal human who has not heard my Dhamma (assutavā puthujjano) is not aware of this true nature. I do not recommend citta bhāvanā to them.*”

- This *sutta* clearly states the importance of knowing that a pure *citta* becomes contaminated to the level of *viññāṇa*.

17. Once we have those basics, now we can build on that and try to make the picture even more clear.

- For example, when seeing an attractive object, the mind may become greedy by incorporating *lobha*, *issa*, etc. (*asobhana cetasika*) that bends the mind in an immoral way.
- Upon seeing a helpless person, one may generate compassionate thoughts by incorporating *metta*, *karuna*, etc. (some *sobhana cetasika*).

Contamination of a Thought Depends on *Gati* and *Ārammaṇa*

18. Therefore, we can now see why two factors are play important roles in which way the thought process would evolve. One is one’s *gati*, and the other is how strong the thought object (*ārammaṇa*) is.

- Someone with “*lobha gati*” can be easily influenced even by a slightly attractive object. One with much less ‘*lobha gati*’ may not be perturbed by such an object or *ārammaṇa*. On the other hand, someone with less ‘*lobha gati*’ may not be perturbed it. Possible situations are endless, depending on the sense-object and one’s *gati*. That is a good *vipassanā* subject to contemplate.

Saṅkhāra Paccayā Viññāṇa

19. Another important thing is that when one repeatedly think about a given thought object, then one's *viññāṇa* for such objects will be cultivated. That, in turn will cultivate one's *gati* in that direction, and thus it becomes a self-feeding cyclic process in that direction. A good example is how an innocent teenager who gets addicted to alcohol or drugs.

- If we thought a bit more on the above case, we could see the involvement of “*saṅkhāra paccayā viññāṇa*.” When one starts thinking consciously (generating *vacī saṅkhāra*) about drinking and then also do it frequently (*kāya saṅkhāra*), then one's “drinking *viññāṇa*” will grow in strength.
- That is why we need to be careful about letting our thoughts “go wild” or about “day-dreaming.” See, [“Correct Meaning of Vacī Saṅkhāra.”](#)
- One should really think about one's own bad habits, or “bad *viññāṇa*” that keep popping up to the mind regularly. By being mindful, we can suppress such thoughts (by thinking about their adverse consequences or *ādīnava*), we can reduce such bad *gathi*. Similarly, one can strengthen one's “good *gati*” by engaging more in similar activities.
- That is the basis of *Ānāpāna* and *Satipaṭṭhāna*.

4.4 Living Dhamma – Fundamentals

4.4.1 What Are Kilesa (Mental Impurities)? – Connection to Cetasika

August 26, 2016; revised June 7, 2020

Why is It Necessary to Use Pāli Words?

1. First, on a different issue, I hope everyone will understand my reasons for emphasizing Pāli words. In many cases, it is difficult or even impossible to find a single English word to convey the meaning of a Pāli word (e.g., *anicca*); **these are powerful words that pack a lot of content**. Here, there is no equivalent word in English for *kilesa*.

- It is best to use Pāli words (and some Sinhala words like “*niveema*” or “*suva*”), but with an understanding of what they mean. See, “[Why is it Necessary to Learn Key Pāli Words?](#)” So, don’t be discouraged by these Pāli terms; keep reading to the end, and you will see it start making sense. You can “fill-in-the-gaps” by reading relevant posts afterward.
- Furthermore, this post is mainly on introducing some fundamental concepts involving many Pāli words. In the upcoming weeks, I will be discussing them and simplifying these concepts in the new “[Living Dhamma](#)” section, which used to be called “New Approach to Meditation.” This post is going to be our reference.

Kilesā Make a Mind Corrupt

2. *Kilesa* in Pāli or *Keles* in Sinhala (where “*kelesanava*” means “make something impure”) are related to *gati* and *āsava* (in both Pāli and Sinhala.) They are the main reasons why we do things (*saṅkhāra*) to perpetuate the *sansaric* journey. The closest English translation for *kilesa* is “accumulated impurities in mind.”

- *Kilesā* give rise to immoral thoughts or *akusala citta* via *asobhana cetasika*, as we discuss below. *Asobhana cetasika* listed in “[Cetasika \(Mental Factors\)](#).”
- *Sobhana* or *asobhana cetasika* (moral or immoral mental factors) are what makes a given *citta* a moral (*kusala*) or corrupt (*akusala*); for details, see, “[Citta and Cetasika](#).”
- As you can guess, *sobhana* and *asobhana* mean “beautiful” and “non-beautiful,” respectively, in Pāli and Sinhala.

Kilesā Are Related to “*San*”

3. There are several posts on related critical concepts of *san*, *saṅkhāra*, *saṃsāra*, etc. See, “[What is “San”? Meaning of Sansāra \(or Samsāra\)](#).”

- Also, repeated bad habits cultivate *gati* and *āsava* (cravings.) All these are related to *kilesa* and lead to a set of unique *kilesa* for each living being. Of course, they keep changing.
- When one removes all these mental impurities or *kilesa* (or *keles*), one attains *kilesa parinibbāna* or *saupadisesa Nibbāna*. That person is still “in this world of 31 realms”. That is the state of a living *Arahant*; he/she has removed all mental impurities from the mind.
- When that *Arahant* dies, there is no rebirth, and *Nibbāna* is “complete.” That is *anupadisesa Nibbāna*.

Kilesā And Upakilesā

4. *Kilesa* are of different types:

- *Lobha* (excess greed), *dosa* (ill will), and *moha* (delusion) are of course, the main mental impurities or *kilesa* or *asobhana cetasika*.
- **The others arise because of the primary three and are called *upakilesa*** (“*upa*” means “close to”). The *Upakkilesa Sutta* lists them as the remaining *asobhana cetasika*. Also, in *Vibhanghapakarana-II* of the *Tipiṭaka*, *kilesa* are listed as the *asobhana cetasika*.
- Thus *kilesa* and *upakilesa* are included in the 14 immoral mental factors (*asobhana cetasika*). This important observation that will help us “quantify” these *kilesa* or mental impurities.
- The other 11 *asobhana cetasika* are the following. *Diṭṭhi* (wrong views), *vicikicchā* (inability to sort out moral from immoral), *thīna* (dullness of mind), *middha* (trapping of the mind somewhere and losing focus), *issā* (jealousy), *maccariya* (tendency to hide wealth), *kukkucca* (do lowly acts), *ahirika* (shamelessness in doing immoral), *anatoppa* (fearlessness in doing immoral), *uddacca* (tendency to become offended), *mana* (self-importance).

Kilesā And Upakilesā Are Asobhana Cetasika

5. **With the identification of *kilesa* as *asobhana cetasika*, it becomes easier to see how *kilesa* (mental impurities) are systematically reduced and removed at each stage of *Nibbāna*.**

- The *Abhidhamma Piṭaka* of the *Tipiṭaka* was not formalized during the time of the Buddha. So, in the *Sutta Piṭaka*, mostly, the term *kilesa* was used.
- The Buddha succinctly described *Abhidhamma* to Ven. Sāriputta, and it took several generations of *Bhikkhus* of “Sāriputta lineage” to fully assemble the *Abhidhamma* structure. It was finalized only at the third Buddhist Council; see, “[Abhidhamma – Introduction.](#)”

Four Universal *Asobhana Cetasika*

6. **There are four universal *asobhana cetasika* that are in ALL *akusala citta*. They are *moha* (delusion), *uddhacca* (restlessness), *ahirika* (shameless of wrongdoings), and *anottappa* (fearlessness of wrongdoings).** It is easy to see that these four *asobhana cetasikā* or mental impurities are completely removed only at the *Arahant* stage. However, all *akusala cetasikā* reduce in strength at each stage of *Nibbāna*.

- The following *asobhana cetasika* removed at the *Sotāpanna* stage: *diṭṭhi*, *vicikicchā*, *thīna*, *middha*, *issā*, *maccariya*, *kukkucca*. Furthermore, *lobha*, *dosa*, *moha* reduce in strength to *rāga*, *paṭigha*, *avijjā*.
- The above clarification could help one decide whether one has attained the *Sotāpanna* stage. (See the meanings of those Pāli terms in #4 above): for example, one should have lost jealousy, tendency to hide wealth from others, etc.). What this means is that one has realized the worthlessness of material things to a significant extent; that comes with comprehending the *anicca* nature to some extent.
- At the *Sakadāgāmi* stage, *kāma rāga* (which is a part of *rāga*) and *paṭigha* reduce in strength (they still keep the same names). At the *Anāgāmi* stage, both *kāma rāga* and *paṭigha* are entirely removed.

- The remaining *asobhana cetasika* (*avijjā*, *ahirika*, *anatoppa*, *uddacca*, *mana*) are entirely removed at the *Arahant* stage.

Many Mental Impurities Removed at *Sotāpanna* Stage

7. Thus, we can see that many “mental impurities” or *kilesa* or *asobhana cetasika* are removed at the *Sotāpanna* stage. Still, a *Sotāpanna* abstains entirely from only one *akusala kamma* as discussed in “[What is the only Akusala Removed by a Sotāpanna?](#).”

- The Buddha said that the *kilesa* leftover for a *Sotāpanna* is equivalent to a thumb-full of sand, compared to sand on Earth for an average human. **Now we can see why. Many *asobhana cetasika* are removed, and others are reduced in strength at the *Sotāpanna* stage.**
- Note that *akusala kamma* (immoral deeds) are different from *akusala citta* (immoral thoughts). There are ten *akusala kamma* and 12 *akusala citta*. See, “[Akusala Citta – How a Sotāpanna Avoids Apayagami Citta.](#)” The mind is a very complex entity, and all these different parameters are needed to describe what happens in mind entirely. But they are all inter-consistent. With time, one will be able to grasp various aspects of the mind with these parameters.
- All different types of defilements removed or reduced at each stage of *Nibbāna* are listed in “[Conditions for the Four Stages of Nibbāna.](#)” That table provides a complete summary in one place.

Abhidhamma Analysis

8. Now that we have taken care of the technicalities let us discuss some practical things that are of use when figuring out how different types of *cetasika* influence our thoughts.

- As we can see from #6, *moha* (or the reduced form of *avijjā*) is in all *akusala citta*. There are only 12 types of *akusala citta*, and 8 of them have *lobha* (or a reduced form of *kāma rāga*, *rūpa rāga*, or *arūpa rāga*). **When one is attracted to a sense object, one of these eight *akusala citta* arises.**
- *Lobha* and *dosa* do not arise together. There are only two *akusala citta* with the *dosa cetasika*. **When repulsed by a sense object, one of these two *akusala citta* arise.**
- The other two *akusala citta* do not have either *lobha* or *dosa*, but only the *moha* as a root. **These two *citta* arise not due to greed or hate, but purely due to *moha* (or the reduced form of *avijjā*).**
- I hope this helps in getting a sense of the types of *akusala citta* that we generate each day. More details can be found in the post, “[Akusala Citta and Akusala Vipāka Citta.](#)”

Kilesā, *Asobhana Cetasika*, and Immoral *Gati*

9. Each person's *kilesa* are thus some combination of the 14 *asobhana cetasika*, but keep changing. The goal is to remove them gradually. **In practice, this is done by changing one's *gati* (habits) and *āsava* (cravings);** see, “[9. Key to Ānāpānasati – How to Change Habits and Character \(Gati\).](#)”

- Up until the *Sotāpanna* stage, none of the *asobhana cetasika* is removed in the *citta* (thoughts) that arise in a person. **They may be temporarily subdued or even lessened in strength temporarily, but never removed.**
- Of course, these *kilesā* (or *asobhana cetasika*) do not show up all the time. **When they are triggered by an external stimulus** (like when seeing an attractive person or an enemy), **they can come to the surface.** This “bubbling up to the surface” is called *anusaya*.
- When one is in a comprehensive *anāriya* meditation program (like a meditation retreat), these *kilesā* (or *asobhana cetasika*) do not get a chance to come to the surface. The environment at a retreat is such that “temptations” would be minimal. Thus one could be enjoying *nirāmisā sukha* at such a retreat.
- However, when one comes back from the retreat, one is exposed to all kinds of sensory inputs. That WILL re-awaken same old *akusala citta* burdened with *asobhana cetasika*.

Once Removed at a *Magga Phala*, *Kilesa* Cannot Return

10. However, when one removes a set of *kilesa* (*asobhana cetasika*) at each stage of *Nibbāna*, they are **PERMANENTLY removed or reduced per #6 above**. At that point, no external stimulus can trigger those *asobhana cetasika* that have been permanently removed.

- This is the difference between the temporary relief many have experienced at meditation retreats and the permanent relief upon becoming a *Sotāpanna*, i.e., between the *anāriya* and *Ariya* Paths.

An Analogy

11. Since all these Pāli words could make you somewhat confused at the first read, let us take an analogy to clear up what *kilesa* (*asobhana cetasika*) do to our thoughts. Here we compare *citta* (or thoughts) to a glass of pure water. Most of our thoughts are like clear water. They are not immoral or moral, just neutral. We see, hear, etc. millions of things a day, but generate moral or immoral thoughts only in relatively few cases.

- In this analogy, immoral thoughts are like dirty water. Just like added dirt makes the water dirty, *asobhana cetasikā* make a *citta* contaminated. But how do these *asobhana cetasikā* get incorporated into a *citta*?
- Since a *citta* arises in a billionth of a second, there is no way for us to control what kinds of *cetasikā* get into a *citta*. It happens automatically!
- We can get an idea of how that happens by looking at glass water with some dirt in it.

Anusaya Can Be Compared to Mud at the Bottom of the Glass

12. Even though the glass of water has dirt, that dirt gets settled at the bottom, if the water is left undisturbed for a while. Then the water becomes relatively clear. Our minds are like that too. Most of the dirt (mental impurities, *kilesa*, or *asobhana cetasika*) remain hidden most of the time. They remain as *anusaya*; see, “[Āsava, Anusaya, and Gati \(Gathi\)](#).” Thus *anusaya* can be thought of as “the dirt accumulated” at the bottom of the glass of water.

- However, if the water is stirred with a straw, the dirt comes up and makes the water dirty.
- In the case of the mind, the stirrer is a desired (attractive) or an undesired (repulsive) sense event. Mainly the *asobhana cetasika* of greed and hate come to the surface (always accompanied by the four universal *cetasika* mentioned in #6, but could be accompanied by a few more of the other 11 *asobhana cetasika*, depending on the situation.
- The other two related parameters of *gati* and *āsavā* contribute in setting up the exact *asobhana cetasika* that will arise based on a given sensory input. For example, an alcoholic only has to see a bottle of whiskey to get the urge to have a drink. Only a person with ingrained habits of a thief will be tempted to steal an item from a shop just on impulse.

Connection to *Pañcanīvaraṇa*

13. Another related point is that glass with dirt in it ALWAYS has some dirt in the water, even though most of the “heavy stuff” goes to the bottom. This “ever-present” muddy color can be compared to the *pañcanīvaraṇa* (five hindrances), that makes our minds “covered” almost at all times.

- Just like the dirty water prevents us from seeing what is in the water, a mind covered with *pañcanīvaraṇa* is unable “see-through.”
- These “ever-present” *pañcanīvaraṇa* are responsible for the “sense of agitation” or “sense of unfulfillment” that is there with us most of the time. This is what X experienced when she got into a regular meditation schedule: “Introduction to a New Approach to Meditation.”

- It was like getting rid of the dark color of the water (while the dirt still remains at the bottom). The mind can become relatively purer for a considerable amount of time when engaged in a meditation program. This is called *vikkhambhana pahāna* (or *prahāna*.) That is in contrast to *tadaṅga pahāna* (suppressing only for a short time) and *ucceda pahāna* (permanent removal). See, "[Suffering in This Life – Role of Mental Impurities.](#)"
- By the way, while listening to a discourse or reading a Dhamma post, one could get into *tadaṅga pahāna*. Then the content may become easily understood, and one could momentarily feel the *nirāmisā sukha* too. This is why one should read these posts at a time when the mind is relatively calm. That makes conditions for *tadaṅga pahāna* optimum and even extends to *vikkhambhana pahāna*, i.e., for a day or longer.

Nirāmisā Sukha* Appears With Removal/Suppression of *Kilesa

14. Now we can see how *nirāmisā sukha* comes during meditation sessions per question raised in a previous post, i.e., "*Nirāmisā sukha* is felt by which *citta*?"

- *Nirāmisā sukha* appears when the *asobhana cetasika* (or *kilesa*) and *pañcanīvaraṇa* are SUPPRESSED.
- In the next post, we will address the issue of how a Sotāpanna's mind automatically blocks certain types *asobhana cetasika* arising, via PERMANENTLY removing *pañcanīvaraṇa* and also by completely removing some of the *kilesa* or *asobhana cetasika*.

15. Above is a self-consistent, condensed summary. In the upcoming discussions, we will go into details and discuss the two types of hidden suffering in simple terms.

Next in the series, "[Suffering in This Life – Role of Mental Impurities.](#)"

4.4.2 **Suffering in This Life – Role of Mental Impurities**

September 2, 2016

1. In the post, "[Starting on the Path Even without Belief in Rebirth](#)" in this series ("[Living Dhamma](#)"), we introduced two types of hidden suffering revealed to the world by the Buddha, and discussed the first type of suffering that we experience in this life.

- Here we continue that discussion, and figure out ways to relieve that suffering.

2. In the previous post, "[What Are Kilesa \(Mental Impurities\)? – Connection to Cetasika](#)," we discussed how *asobhana cetasika* represent the mental impurities or *kilesas*.

- In this and a few more *desanās*, we will discuss that highly condensed post, in order to simplify and clarify the main ideas relevant to practice.

3. Here is the *desanā* ([You may need to adjust volume control on your computer](#)):

4.4.3 **Satipaṭṭhāna Sutta – Relevance to Suffering in This Life**

September 10, 2016

1. This is the sixth post in this series. It is important to follow the series from the beginning. All posts are at: “[Living Dhamma.](#)”

- Here I want show that what we have been discussing in this section is exactly what is recommended in the beginning of the *Mahā Satipaṭṭhāna Sutta*.
- Here we will discuss the key verse, “*ātāpī sampajāno, satimā vineyya loke abhijjhā domanassam*” that appears in the *sutta* numerous times. It is also the basis of the *Ānāpānasati bhāvanā*.

2. Many people believe that the *Sutta* is basically a *kammattana* that one recites or “meditate on.” But it is much more than a *kammattana*. I will provide more evidence in future posts, but here is the audio on the basics of the *Mahā Satipaṭṭhāna Sutta* (you may need to control the volume in your computer):

[WebLink: Audio Desana: Episode 3 - Satipaṭṭhāna Sutta - Relevance to Suffering in This Life](#)

Next post in the series, “[How Are Gathi and Kilesa Incorporated into Thoughts?](#)”

4.4.4 **How Are Gathi and Kilesa Incorporated into Thoughts?**

September 22, 2016

In this post, we will discuss why *mano saṅkhāra* are different from *kaya* and *vacī saṅkhāra*. Understanding this will help one to realize how our *gathi* can AUTOMATICALLY give rise to immoral thoughts.

- It will also help one understand how such initial immoral thoughts can be overcome by purposefully generating moral thoughts. This is actually the basis of the *Satipaṭṭhāna* and *Ānāpānasati bhāvanā*.
- Furthermore, we will discuss the issue of where our *gathi*, *kilesa*, or *cetasika* are “stored.”

This is the seventh post in this section: “[Living Dhamma.](#)” To get full benefits, one should start from the first post. I am using a combination of text and audio files to convey a lot of information in this section.

Here are the audio files :

[WebLink: Audio Desana: Episode 4 - How Are Gathi and Kilesa Incorporated into Thoughts?](#)

[WebLink: Audio Desana: Episode 4 - How Are Gathi and Kilesa Incorporated into Thoughts?](#) (Original - Larger file size)

October 22, 2017: I just listened to the above audio after one year. They are good and provide solid basis for understanding *gati* and how they can be changed by controlling *vacī* and *kāya saṅkhāra* that we have control over.

- It is important to realize that many *citta vīthi* flow in a second. But each subsequent *citta vīthi* is influenced by the previous one. So, they can take one on a downward path very quickly unless we intervene by being mindful.
- It is very important to realize that: *mano saṅkhāra* are generated AUTOMATICALLY based on our *gati*. *Vacī saṅkhāra* are generated when we “talk to ourselves, without getting the words out.” Both such “internal speech” and actual speech are associated with *vacī saṅkhāra*; bodily actions are *kāya saṅkhāra*.
- **July 26, 2019:** Reader Siebe just pointed out that at 14.30 mins I had defined speech as ‘*kāya saṅkhāra*. That is not correct, as explained in more detail in [“Correct Meaning of Vacī saṅkhāra.”](#)”
- We become CONSCIOUS about both *vacī* and *kāya saṅkhāra* quickly and thus have control over them; see, [“Correct Meaning of Vacī saṅkhāra.”](#)”

Posts mentioned in the *desanā*

1. Suicide statistics: [WebLink: Suicide and Depression](#)

- I know that most readers of this site do not have suicidal tendencies. But the point is that we underestimate the severity of mental suffering compared to our physical suffering.

2. If one has a hard time comprehending the *Tilakkhaṇa*, starting with *anicca*, one needs to first follow the mundane Eightfold Path, remove the first type of suffering, and experience the *nirāmisā sukha* as explained in the previous posts in this section.

- This is also pointed out in the [“Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)”](#) and [“Buddha Dhamma – In a Chart.”](#)”

3. More details on how our minds control our physical bodies are in the sections: [“Citta and Cetasika”](#) and [“Gandhabba \(Manomaya Kāya\).”](#)

- In particular, the following post illustrates how we perceive our external world: [“Citta and Cetasika – How Viññāna \(Consciousness\) Arises.”](#)”
- *Citta Vīthi* are discussed in [“Citta Vīthi – Processing of Sense Inputs.”](#)”

4. How thoughts can affect other people: [“Transfer of Merits \(Pattidana\) – How Does it Happen?.”](#)”

5. The brain architecture of humans and animals: [“Truine Brain: How the Mind Rewires the Brain via Meditation/Habits.”](#)”

6. The post mentioned in the discussion on the question “Where are these *gati* or *kilesa* or *cetasika* are maintained or stored?”: [“Our Two Worlds: Material and Immaterial.”](#)”

Next in the series, [“Noble Eightfold Path – Role of Sobhana Cetasika.”](#)”

4.4.5 Noble Eightfold Path – Role of Sobhana Cetasika

September 30, 2016; revised December 5, 2017 (#5)

1. In previous posts in this section, we have discussed how *nirāmisā sukha* or “peace of mind” arises due to both removal of *asobhana cetasika* (non-beautiful mental factors) or *kilesa* AND cultivation of *sobhana cetasika* (beautiful mental factors).

- In this post, I will point out that 7 of the 8 factors in the Noble Eightfold Path are in the set of *sobhana cetasika*.
2. The most important fact that one needs to comprehend from the posts in this series up to this point, is that our minds are heated/agitated by the presence of *asobhana cetasika* or *kilesa* or defilements.
- On the other hand, our minds are soothed and comforted and made joyful by the presence of *sobhana cetasika*.
 - One may not realize this until one comprehends this fact and actually practice cultivating *sobhana cetasika* while suppressing/removing *asobhana cetasika*.
3. As explained elsewhere at the site, *Abhidhamma* with its methodical analysis of *citta* and *cetasika* was not finalized for a few hundred years after the *Parinibbāna* of the Buddha at the Third Buddhist Council. This enlarged Canon completed at the Third Council was committed to writing in Sri Lanka in the first century BCE (29 BCE) at the Aluvihara Monastery at the Fourth Buddhist Council. This was the last Buddhist Council attended by *Arahants*.
- Soon after that the decline of the pure Dhamma of the Buddha started its decline with the simultaneous rise of the Mahayana; see, the section “[Historical Background](#).”
 - When Buddhaghosa wrote the *Visuddhimagga*, which was presumed to be a summary of the *Tiṭṭaka*, even *Theravadins* stopped using the *Tiṭṭaka* for convenience.
 - Therefore, no one seemed to have realized some important possible usages of *cetasika*: First, *kilesa* are the same as *asobhana cetasika*. Second, components of the Noble Eightfold Path are in the set of *sobhana cetasika*. This makes it easier to comprehend how one could systematically follow the Path, and that is focus of this post.
 - I will discuss the details in upcoming *desanās*, but here I would like to provide a summary that we can use for that discussion. Another such summary post that will used in these *desanās* is a summary given in one of the previous posts: “[What Are Kilesa \(Mental Impurities\)? – Connection to Cetasika](#).”
4. Let us start by continuing from the last *desanā*, where we discussed how **INITIAL thoughts in response to a sense event arises without us even being conscious about it**. These initial thoughts arise AUTOMATICALLY due to the set of *sobhana/asobhana cetasika* or *gathi* that we have. Any *akusala* thoughts arise due to our *kilesa* which are the same as *asobhana cetasika*.
- However, because our speech and bodily actions are much slower than the rising of those initial thoughts, it is possible for us to keep vigilant and reverse any such reactive *akusala* thoughts that are AUTOMATICALLY generated.
 - This is the basis of both *Satipaṭṭhāna* and *Ānāpānasati bhāvanā*. Please listen to that previous *desanā* on “[How Are Gathi and Kilesa Incorporated into Thoughts?](#)” and fully comprehend this important concept. Here is the link to that *desanā* in two parts (there is volume control on the right, but for the second *desanā*, you may need to turn up volume in your computer):
[WebLink: Audio Desana: Episode 4 - How Are Gathi and Kilesa Incorporated into Thoughts?](#)
[WebLink: Audio Desana: Episode 4 - How Are Gathi and Kilesa Incorporated into Thoughts?](#) (Original - Larger file size)
 - We also discussed the evidence for such *gathi* to be associated with any given person, and addressed the question of where they are “stored.”
5. We also saw in the above *desanās* that **those initial thoughts that arise in response to a sense event are called *mano saṅkhāra***. Therefore, we do not have conscious control over *mano saṅkhāra*, AND they arise within a fraction of a second DUE TO our *gathi* (set of *sobhana/asobhana cetasika*).

- **December 5, 2017:** Such *akusala mano saṅkhāra* CAN then lead to the generation of *vacī saṅkhāra* (silent speech in our heads *and speech*), and *kaya saṅkhāra* (speech and bodily actions). This is different from the *desanā*, and I have discussed the reasons for this revision in “[Correct Meaning of Vacī Saṅkhāra.](#)”
- But, if we are mindful (*sati*), we can catch any such *akusala mano saṅkhāra* and make sure they do not lead to *akusala vacī* and *kaya saṅkhāra*.
- In the Eightfold Path, such deliberately generated *vacī saṅkhāra* are called ***sammā saṅkappa* or *sammā sankalpa***.
- And those *sammā saṅkappa* were generated because one acted with ***sammā sati***.

6. In the above *desanās*, we discussed an example of a person X finding a lost ring. If X had strong greedy *gathi*, The initial thoughts (*mano saṅkhāra*) could be to keep the ring for himself. However, if X knows about being mindful, X has time to evaluate the situation with *vacī saṅkhāra* (in his head), and to come to conclusion that it is immoral to keep the ring for himself.

- If he made that correct decision, even after thinking about it, he can prevent an *akusala kamma* of stealing. Not only that, he can do a *kusala kamma* by making sure to get that ring returned to the rightful owner.
- **So, now we can see the critical roles of *sammā sati* and *sammā saṅkappa* in the Eightfold Path. We have the opportunity (unlike animals) to rationally think about our initial REACTIVE decisions, and to reverse them if they are immoral.**

7. If X acted with *sammā sati* and realized the problem with the initial reaction and made the right decision with *sammā saṅkappa*, then he can take next steps to ***sammā vaca*** (moral speech) and ***sammā kammanta*** (moral actions) to implement that decision. He can walk over to the counter, hand over the ring, and tell the office personnel to return the ring to the owner.

- This is just one possible example. We come across many such instances during a day. In another example, one may get annoyed by someone accidentally stepping on one's foot in a crowded place, and start yelling at that person without thinking about the consequences. That person obviously did not intentionally do that, especially since it is likely to be a stranger.
- Even if one started getting the words out, one could quickly stop oneself and smile at the person indicating that it is no big deal. That would make that person to be relieved, because most likely he/she felt bad about it.
- This simple act of kindness would lead to a “cooling down” on both sides. The other person will feel a relief and will thank for the kindness. Furthermore, it could have escalated into a shouting match and could have led to “heated minds” on both sides.

8. **When one sees the benefits of such mindful behavior, one will start doing more. One will start living a moral life. This is *sammā ajiva* or moral livelihood.**

- Not only that, one will make an extra effort to be mindful and catch any reactive thoughts that could lead to such *akusala kamma*. **This is *sammā vayama*, or moral effort.**
- In a few weeks or months, this will start changing one's ingrained *gathi*. When one stops using those *asobhana cetasika*, their power will diminish with time. At the same time, one is cultivating *sobhana cetasika* (i.e., *sammā sati*, *sammā saṅkappa*, *sammā vaca*, *sammā kammanata*, *sammā ajiva*, *sammā vayama*). Thus bad *gathi* will diminish and good *gathi* will grow.

9. Now, X was able to think rationally about the bad consequences of his initial decision (*mano saṅkhāra*) to keep the ring, because he had ***sammā diṭṭhi* or moral vision**, to some extent. Deep down he knew that such an act of stealing is immoral, and was able to fight off the tendency to keep it.

- *Sammā diṭṭhi* is related to the *sobhana cetasika* of *paññā*, which is loosely translated as “wisdom.” This “wisdom” cannot be cultivated by reading books, even just by reading Dhamma. The *paññā cetasika* is cultivated by both learning Dhamma and by living it (i.e., by following the Eightfold Path), thereby getting rid of *moha*.

10. Now let us examine the connection between the other factors in the Eightfold Path (here the mundane version) and some of the *sobhana cetasika*.

- First, three factors in the Eightfold Path have exactly the same names in the list of *sobhana cetasika*: *sammā vaca*, *sammā kammanata*, *sammā ajiva*; see, “[Cetasika \(Mental Factors\)](#).”

11. *Sammā sankalpa* are the *vacī saṅkhāra* that we deliberately generate even if we have *akusala mano saṅkhāra* arising due to sense inputs. *Vacī saṅkhāra* are described in the *suttā* as *vitakka* (pronounced “vithakka”) and *vicara* (pronounced “vichaara”). *Vitakka* is turning the mind towards a thought object and *vicara* is keeping the mind around that thought object.

- Those who are familiar with *jhānā* know that, *vitakka* and *vicara* are two *jhāna* factors in *anāriya jhānā*. In the first *anāriya jhāna*, one can for example turn the mind to a *kasina* object (*vitakka*) and keep it there (*vicara*). In *Ariya jhānā*, they are called *savitakka* and *savicara* because one is focused on *Nibbāna*.
- So, you can see that maintaining *sammā sankalpa* is the same as generating “moral” *vitakka* and *vicara* or *kusala vacī saṅkhāra*. Remember that these are generated in the head, not spoken out. They are called “*sankalpana*” in Sinhala.
- Also, we note that *vitakka* and *vicara* could be used in immoral path too. A master thief planning a robbery will focus on that task and spend many hours thinking about the plan. So, those two *cetasika* fall under the category called particulars or *pakinnaka*; they can appear in *kusala* or *akusala* thoughts as needed.

12. Now, *sammā vayama* arises from another of these particulars or *pakinnaka cetasika*, the *virīya cetasika*.

- When one is making an effort to live a moral life, that *sammā vayama*. If one is making an effort towards an immoral life, like that master thief, then he is making *micchā vayama*.
- Of course the *sati cetasika*, which is a *sobhana cetasika*, is *sammā sati*.

13. Now we are left with ***sammā samādhi***. This is the only factor that is not related to a *cetasika* directly. Most people have the idea that *samādhi* is *jhāna* or at least is attained only in formal meditation. But it is much more deeper. In the next *desanā*, I will discuss *samādhi*, together with the implications of what is summarized in this post.

- We are trying to comprehend and reinforce the FOUNDATION of Buddha Dhamma: How one can remove the “*thaapa*” or “heat” from the mind by getting rid of *asobhana cetasika* (*kilesa*) and SIMULTANEOUSLY “cool down” the mind and bring joy to it, by cultivating *sobhana cetasika*.

This was discussed in the first *desanā* in this series:

“The Hidden Suffering that We All Can Understand“

[WebLink: Audio Desana: Episode 1 - The Hidden Suffering That We All Can Understand](#)

[WebLink: Audio Desana: Episode 1 - The Hidden Suffering That We All Can Understand](#) (Original - Larger file size)

- More details were given in the following two *desanās*:

“Suffering in This Life – Role of Mental Impurities”

[WebLink: Audio Desana: Episode 2 - Suffering in This Life - Role of Mental Impurities](#)

[WebLink: Audio Desana: Episode 2 - Suffering in This Life - Role of Mental Impurities](#) (Original - Larger file size)

“Satipattana Sutta – Relevance to Suffering in This Life”

[WebLink: Audio Desana: Episode 3 - Satipatthāna Sutta - Relevance to Suffering in This Life](#)

[WebLink: Audio Desana: Episode 3 - Satipatthāna Sutta - Relevance to Suffering in This Life](#) (Original - Larger file size)

14. As discussed in the above *desanās*, *akusala* thoughts that arise with *asobhana cetasika* make our minds clouded and keep us in the dark. *Moha* is darkness; it leads to *lobha* and *dosa*. That darkness can be temporarily lifted (*tandanga pahāna*) during listening or reading Dhamma.

- The next step is to keep that “light on” for days and weeks by being mindful and stopping *akusala* thoughts that lead to *akusala kamma* for an extended time. This is *vikkhambana pahāna*, and that is what we are trying to achieve now. It is done by being mindful, i.e., with *sammā sati*.
- The ultimate goal is to permanently remove those *asobhana cetasika*, and to make that “cooling down” permanent (*ucceda pahāna*), even for future lives. We will get to that in future posts. But we need to establish a good foundation and actually experience the *nirāmisā sukha* for extended time periods (*vikkhambana pahana*) first.

15. In order to get rid darkness (*moha*) one has to bring light in. Light is *paññā* or “wisdom”, a *sobhana cetasika*. The Noble Eightfold Path is designed to optimize the *paññā cetasika* — via *sammā samādhi* — and to eliminate the *moha cetasika*.

- Other *sobhana cetasika*, like *karuna* and *mudita* (or *muduta*) also help with this process.
- In the end one will be able to see how different pieces of the puzzle (including *paṭicca samuppāda*) all fit together to make an easy-to-see picture of the whole process. That will make it easier to grasp the *Tilakkhaṇa*, and advance to the next stage.
- All these can be shown be consistent with the scheme of *sīla*, *samādhi*, *paññā*. In the *Cetana Karaneeya Sutta*, the Buddha has detailed how *sīla* (moral conduct) leads to *nirāmisā sukha*, and *nirāmisā sukha* leads to *samādhi*, and *samādhi* in turn leads to *paññā*. We will discuss all these in the upcoming *desanās*.

Next in the series, “[Getting to Samādhi](#).”

4.4.6 Getting to Samadhi

October 7, 2016

1. In the post “[Noble Eightfold Path – Role of Sobhana Cetasika](#),” it was discussed how 7 of the 8 factors in the Noble Eightfold Path are related to some of the *sobhana cetasika* or moral mental factors.

2. In the following *desanā*, we discuss how the cultivation of those 7 factors lead to the 8th factor in the Noble Path, *Sammā Samādhi*, or at least the mundane version of it first (volume control will appear on right when you start playing):

“[Getting to Samādhi](#)”

[WebLink: Audio Desana: Episode 5 - Getting to Samādhi](#)

[WebLink: Audio Desana: Episode 5 - Getting to Samādhi](#) (Original - Larger file size)

Links mentioned in the *desanā*:

3. Before one can comprehend the *Tilakkhaṇa* (*anicca, dukkha, anatta*), one needs to get to mundane *Sammā Samādhi*. There are two kinds of *Sammā Samādhi* and also a *micchā samādhi*:

- [What is Samādhi? – Three Kinds of Mindfulness](#)
- [Three Kinds of Ditthi, Eightfold Paths, and Samādhi](#)

4. The role of the brain in changing one's *gathi*:

- [Brain – Interface between Mind and Body](#)

5. Two types of suffering discussed in:

- [Starting on the Path Even without Belief in Rebirth](#)

6. Suppressing and eliminating the *pancanivarana* in stages:

- [Suffering in This Life – Role of Mental Impurities](#)

Next in the series, “[Micchā Ditthi – Connection to Hethu Phala \(Cause and Effect\)](#)”, ...

4.4.7 Sexual Orientation – Effects of Kamma and Gathi (Saṅkhāra)

January 14, 2017

This post will be helpful in not only clarifying Buddha's teachings on sexual orientation, but also that there can be many varieties of *saṅkhāra*, *viññāṇa*, and corresponding *bhava* and *jathi* arising according to *paṭicca samuppāda*.

1. In this beginning-less rebirth process, it is likely that we all had switched between male or female many times, just as we are likely to have been born in most of the 31 realms in the past.

- It is said that the *Bodhisattva* — before becoming Buddha Gotama — was a female when the *paramita* process to become a Buddha was initiated.
- However, once the *paramita* process progressed, and the *Bodhisattva* became a male, it never switched back to female.
- Only a male can actually be a Buddha.

2. Whether one is male or female is predominantly determined by one's *saṅkhāra*, and not due to a past *kamma*.

- But in some cases, *kamma* could be the direct cause. For example, if one intentionally severed or mutilated another's sexual organs, it is possible that one may be born without a sexual organ. Such a person is called a “*napunsaka*” in Sinhala (*pandaka* in Pāli), but I am not aware of a corresponding English word.
- An eunuch is a person who is castrated, so that also could be due to a *kamma vipāka* of a past *kamma*.

3. Male/female distinction is there only in the *kāma loka*. In the *brahma* realms (higher 20 realms), there is no such distinction. *Brahmā* do not have dense physical bodies or sexual organs.

- One is born in either the 16 *rūpa loka* realms or the 4 *arūpa loka* realms (*brahma* realms) because one has given up all desires for bodily pleasures, including sex, because one has seen the value of *nirāmisa sukha* (and *jhānic* pleasures) that can be achieved by giving up bodily pleasures.

4. One is born in *kāma loka* because one likes bodily pleasures, especially those associated with taste, smell, and sex. Of course, vision and sound that help satisfy those three bodily pleasures also come into play here.

- One is born in human or *deva* realms in the *kāma loka* because one has done meritorious deeds (*puñña kamma*). There are female *devas*, who have attained those births because of their *puñña kamma* just like male *devas*. One is born a female *deva*, because one has cultivated “*iththi saṅkhāra*”; see #5 below.
- One is born in the four *apāya* realms in the *kāma loka* because one has done immoral deeds (*pāpa kamma*). Here the corresponding *saṅkhāra* are *apuññabhi saṅkhāra*.

5. One is born male or female due to whether one cultivates “*purisa saṅkhāra*” or “*iththi saṅkhāra*” by thinking, speaking, and doing things accordingly. One does not do either *puñña abhisāṅkhāra* or *apuñña abhisāṅkhāra* here.

- Such *saṅkhāra* (*kaya*, *vacī*, and *mano*) are not necessarily meritorious (*puññabhi saṅkhāra*) or immoral (*apuññabhi saṅkhāra*). Those are in line with pure habits based on “*purisa gathī*” and “*iththi gathī*.”
- This can be compared to cultivating habits for playing a certain musical instrument. They are called “*vāsana keles*,” *keles* that do not have good or bad *kamma vipāka*, but more like ingrained habits.

6. *Purisa* is the Pāli or Sinhala word for a male and the word comes from “*piri*” or “full.” A male is likely to give more (especially to the wife) than to take from the wife. *Itthi* is the Pāli (and old Sinhala) word for female, and means “*ithiri*” or “left over space to be filled.” For example, if a cup is full that is “*piri*”; if it is not full, it needs more to become full, it has “*ithiri*.”

- So, a male is likely to willingly buy things for the wife, but does not care much about his appearance. Most wives expect gifts and sustenance.
- However, these “*purisa gathī*” and “*iththi gathī*” can have large variations. A male has more “*purisa gathī*” than “*iththi gathī*.” But we do see “alpha males” with close to 100% “*purisa gathī*” as well as females with very high “*iththi gathī*.”
- On the other hand, we also see females who like to act and dress more like males, and also males who like to act and dress more feminine. If they cultivate those *gathī* more, a sex change is possible in future lives (in rare cases even in this life).

7. In most families, if one examines the wardrobes of the husband and wife, one is likely to find many more items in the wife’s wardrobe (in particular, the man may have a couple of pairs of shoes but the wife will have many!). Females wear much more jewellery too.

- Furthermore, a female is more concerned about the appearance of her (and her husband). A guy usually grabs something to wear, but a woman is likely to pay much more attention. I know by experience that I have been “instructed politely” to change into something better many times when going out.
- Thus females constantly think about theirs (and their spouses and children’s) appearance. This is not necessarily due to greed, but mainly due to *sansāric* habits.

8. Therefore, as far as attaining *Nibbāna*, it does not matter whether one is a male, female, or somewhere in between (with mixed *gathī*).

- One is born in the *deva* realms due to good *kamma vipāka*, and there are male and female *devas*, just like in the human and animal realms. The type of sex is not determined by *kamma vipāka*.
- All *brahma* realms are “*unisex*.” They do not have *bhava dasaka*, which determine the sex type. Brahmā do not have dense bodies to experience touch, taste of foods, or smells. **They have very fine bodies with just the *hadaya vatthu*, *kaya dasaka*, *cakkhu dasaka*, and *sota dasaka*.**
- Therefore, a *brahma* “body” has only a few *suddhaṭṭhaka*, and is much much smaller than an atom in modern science. So, it is clear why sense pleasures are absent in *brahma loka*.

9. It is important to realize that there are moral *gathi* due to *puññābhisāṅkhāra* (*puñña abhisāṅkhāra*), immoral *gathi* due to *apuññābhisāṅkhāra* (*apuñña abhisāṅkhāra*), and “kammically neutral” *gathi* due to *saṅkhāra* that are not *abhisāṅkhāra*.

- While one is born in the human *bhava*, one would also have a “*iththi bhava*” (as a female) or “*purisa bhava*” (as a male).
- Not only that, one could be born in an “angry *bhava*” for a given period of time that would be triggered by a sense event such as seeing an enemy — if one has cultivated angry *gathi* by thinking, speaking, and acting with an angry mindset.
- One could be born in a “greedy *bhava*” the same way. If we start acting mindfully to think, speak, and act with less greed, those greedy *gathi* will reduce over time.
- The more one thinks, speaks, and acts in a “female way”, one will be cultivating “female *gathi*”; but these are not moral or immoral *saṅkhāra* as we discussed above.

10. In any of these cases, the more *saṅkhāra* one makes, one builds up the corresponding *viññāṇa* (*saṅkhāra paccayā viññāṇa*) and so on until it gets to strengthening *upādāna* and thus strengthening *bhava* (*upādāna paccayā bhava*).

- Therefore, *paṭicca samuppāda* explains not only how *bhava* in the rebirth process, but also in *bhava* that last only for short periods of time, like getting into an “angry state of mind” or “angry *bhava*.”

11. Another possibility that may come into play in a transgender person (a person whose sex is changed during the lifetime) can be understood if one understands the role of the *gandhabba* (mental body) that dictates the functioning of the physical body. *Gandhabba* is not a Mahayana concept: “[Gandhabba State – Evidence from Tipitaka](#).”

- When a *gandhabba* goes into a womb, it is not firmly attached to the zygote (the cell formed by the union of the father and the mother) during the first several weeks.
- Sometimes, the *gandhabba* just leaves the womb if it turns out to be not a good match with the parents. This is the reason for a miscarriage.
- If a *gandhabba* leaves the womb within such a short time period, in some cases another *gandhabba* can enter the womb and take possession of the partially formed physical body that was abandoned by the previous *gandhabba*. Now, it may happen that the second *gandhabba* is of opposite sex.
- For example, suppose the first *gandhabba* was a male and the second a female. So, this female is thus taking hold of a physical body that was taking shape to be a male and thus continue to form a male body. Once born as a male baby, and while growing the female character may start to convert the physical body to that of a female. This is what happens to a transgender person.

12. One is bound to the *kāma loka* because one has craving for bodily pleasures, whether it is tasting good food, watching movies, listening to music, smelling nice fragrances, or in engaging in sexual activities. **If one does those activities without engaging in immoral activities, then the only harm done is to be eligible to be born in the *kāma loka*.**

- One cannot be freed from even the higher realms in the *kāma loka* (human and *deva* realms), if one has desires for such bodily pleasures. However, it becomes relevant only at the *Anāgāmī* stage. A *Sotāpanna* or a *Sakadāgāmī* has not given up desires for sensual pleasures.
- **I have not seen anything in the *Tipitaka* that distinguishes between sexual activities based on who the partners are. So, it seems to me that homosexual or bisexual activities are not that different from heterosexual activities as far as *kammic* consequences are concerned. They are all done to achieve bodily pleasures.**

- However, if one engages in any immoral activities — in particular breaking the five precepts — then one would be eligible to be born in the lowest four realms of the *kāma loka*, the *apāyā*.
- I specifically made the comment on the homosexuality in answering a specific question by a reader. The main point is to make sure that **any pleasurable activity at the expense of hurting someone** will have bad consequences, and depending on the nature, could make one eligible to be born in the *apāyā*.

13. One way to understand the *anicca* nature is to take a good look at the transient nature of our physical body and that it can provide only temporary bodily pleasures, even though they are enjoyable.

- The *gandhabba* is the more long-lasting entity; a human *bhava* can last many hundreds to many thousands of years; a physical body is a temporary shell used by the *gandhabba* for about 100 years.
- The bodily pleasures that one experiences with this “physical shell” can last only part of that maximum 100 years. As one gets old, those pleasures go away, and there is no way to keep them the same.
- On the other hand, the *jhānic* pleasures — or at least *nirāmisa sukha* — can be enjoyed even at old age, as long as one keeps steps to maintain the brain in good condition. The *gandhabba* — since it is trapped inside the physical body — needs the brain to in order to be mindful and to cultivate good *vacī* and *mano saṅkhāra*; this is what is emphasized in the earlier posts in this section, and analyzed in detail (for those who need to go deeper) in the *Abhidhamma* section.

14. Finally, it is important to emphasize the point that it will take a concerted effort to understand these concepts fully. The more one reads, the more one will understand. It is not possible to gain insight by reading a few posts. One has to spend time and read relevant posts in order to “fill in the gaps.”

- A simple introduction to the concept of *gadhabbaya* is given in this section: “[Our Mental Body – Gandhabba](#).”
- A section in the *Abhidhamma* is devoted to the concept of *gadhabbaya*: “[Gandhabba \(Manomaya Kāya\)](#).” There are posts in other sections too, in relation to the material in those sections.

4.5 Mundane Sammā Samādhi

October 27, 2016

- [Micchā Ditthi – Connection to Hethu Phala \(Cause and Effect\) \(with Desana 6\)](#)
- [Suffering in This Life and Paticca Samuppāda \(with Desana 7\)](#)

4.5.1 Micca Diṭṭhi – Connection to Hethu Phala (Cause and Effect)

October 18, 2016

1. The main reason for many people having various types of *micchā diṭṭhi* (or wrong views) can be traced back to the fact that the workings of cause and effect involving living beings — and in particular the mind of the sentient beings — is complex.

- Science has been able to have much success in the material realm, simply because it is easier to see how cause and effect work in the material realm.

2. In the discourse (*desanā*) below, we will talk about cause and effect (*hethu-pala*) in Buddha Dhamma, and how **conditions** (*paccaya*) play a critical role in mental phenomena. **The complex relationship between causes and effects in relation to the mind is the reason why it is hard for many to comprehend how and why *kamma* lead to *kamma vipāka*.** As we discuss in the *desanā*:

- Nothing in this world can come to existence without suitable causes AND conditions,
- Rebirth process must be valid, in order to fully implement the principle of causality (cause and effect).

3. The critical link between *hethu-pala* and *paṭicca samuppāda* is *paṭṭhāna dhammā*, which describe the conditions under which causes (*hethu*) bring about effects or results (*phala*).

- In the near future, I will start a new section on *paṭṭhāna dhammā*. It is a deep subject, but it can be simplified to easily understand the relationship between *hethu-pala* and *paṭicca samuppāda*.

4. Here is the *desanā* (volume control on the right):

[WebLink: Audio Desana: Episode 6 - Micchā Diṭṭhi Connection to Hethu Phala Cause and Effect](#)

4.5.2 Suffering in This Life and Paṭicca Samuppāda

October 28, 2016

In a previous *desanā* in this section, we discussed how suffering in this life is described in the beginning of the *Mahā Satipatṭhāna Sutta*. In this *desanā*, we will discuss how it is described by *Paṭicca Samuppāda*.

“Suffering in This Life – According to Paṭicca Samuppāda”

[WebLink: Audio Desana: Episode 7 - Suffering in This Life According to Paticca Samuppāda](#)

[WebLink: Audio Desana: Episode 7 - Suffering in This Life According to Paṭicca Samuppāda](#) (Original - Larger file size)

Links mentioned in the *desanā*:

2. *Taṇhā*: [Tanhā – How We Attach Via Greed, Hate, and Ignorance](#)
3. *Mano saṅkhāra* arise automatically, without conscious thoughts. And conscious thoughts — **even without speech** — are *vacī saṅkhāra*:

[How Are Gathi and Kilesa Incorporated into Thoughts?](#)

- In this *desanā*, I incorrectly said that speech is *vacī saṅkhāra* because the mouth and the tongue are moved during speech. However, whether one talks to oneself or actually get the words out loud, both are *vacī saṅkhāra*. There is a difference between moving body parts in general (as in walking) and moving the lips and tongues during speech: They are done with two types of *rūpa*: *kāya viññatti* and *vacī viññatti* respectively. I will discuss this in detail later.
 - My thanks to the reader who pointed out my mistake in categorizing speech as *kāya saṅkhāra*. I had to dig deeper in *Abhidhamma* to find the explanation. I can and do make mistakes, and that is why I welcome your input. My goal is to have this website to be fully self-consistent.

4.5.3 Suffering in This Life and Paṭicca Samuppāda II

December 7, 2016

1. In the previous *desanā*, “[Suffering in This Life and Paticca Samuppāda](#),” we discussed one application of *Paṭicca Samuppāda* (PS).

- Here, we will continue that discussion to gain more insights and discuss the importance in controlling *vacī saṅkhāra* during *Satipaṭṭhāna* and *Ānāpānasati bhāvanā*.

2. I have posted three new essays in other sections at the website since that time.

- [Correct Meaning of Vacī Saṅkhāra](#)
- [Asevana and Annamanna Paccaya](#)
- [Sutta Learning Sequence for the Present Day](#)

They are relevant to the discussions in this section.

3. Here are the PS sequences for reference, as you go through the discussion. You may want to make a printout of this post or have this post open while listening.

- *Avijjā paccayā saṅkhāra, saṅkhāra paccayā viññāṇa, viññāṇa paccayā nāmarūpa, nāmarūpa paccayā salāyatana, salāyatana paccayā phassa, phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna paccayā bhava, bhava paccayā jāti, jāti paccayā jara, marana, soka, parideva, dukkha, domanassa, upasaya sambhavan ti.*”

The cycle ends with *marana* or death and describes the time evolution of how a *saṅkhata* (*sankata* in Sinhala) (whether it is a thought process or a living being or an inert entity) arises and eventually dies.

New *desanā*: “[Suffering in This Life and Paṭicca Samuppāda II](#)”

4.6.1 Is It Necessary for a Buddhist to Eliminate Sensual Desires?

September 28, 2018

Introduction

1. I saw the above question raised in a discussion forum recently (with a different title). The questioner stated: “Eliminating sensual desire as a lay follower doesn’t seem possible, or reasonable, especially if one plans on being in a relationship, or having motivation at work. ..”

- I think this is a critical question. Most people have not understood the fact that the Noble Path of the Buddha MUST BE followed sequentially.
- **Getting rid of sense desires (including sex, craving for food, etc.) is not necessary in the beginning and even up to the *Sotāpanna* stage.**
- Getting to the final stage of *Nibbāna* (*Arahanthood*) is a step-by-step process.

Following the Path Is a Step-by-Step Process

2. The necessary INITIAL steps involved are:

- (i). Be a moral person and avoid the mundane five precepts (abstain from killing, stealing, sexual misconduct, outright lying, and getting intoxicated) and also gossiping, slandering, and harsh speech; see, “[2. The Basics in Meditation.](#)”
- (ii). Understand the correct “wider world view” of the Buddha, and get rid of the ten types of *micchā diṭṭhi*; see, “[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\).](#)”
- (iii). Learn about the “deeper world view of the Buddha,” stated by *Tilakkhaṇa* (*anicca, dukkha, anatta* nature); see, “[Anicca, Dukkha, Anatta.](#)”

3. When one starts to understand the “*anicca* nature” (*anicca* means much more than just impermanence) of this world, one becomes a *Sotāpanna Anugāmi*. When that “correct vision” about “this wider world of 31 realms” sinks into the mind permanently, one becomes a *Sotāpanna*.

- **One does not need to even think about removing the desire for sex or any other sensory pleasure until one gets to the *Sotāpanna* stage.** That is a critical point that most people do not understand.

The futility of Starting at the End

4. Therefore, many people waste precious time by either first trying to suppress sense desires, and even in some cases try to eliminate the innate sense of “me” or “a self.”

- But like one cannot learn algebra or advanced calculus without learning how to do addition, those people will not make any significant progress. It is impossible to do so.

- Furthermore, while one may get a temporary relief from “stresses of day-to-day activities” by doing things like breath meditation, that will not provide the long-term release from suffering that the Buddha explained.
- Until one begins to understand *Tilakkhaṇa*, one will never get to the *Sotāpanna* stage.

Even a *Sotāpanna* Has Not Given Up Sensual Pleasures

5. Even during the time of the Buddha, there were many lay followers attained the *Sotāpanna* stage and continued to live “householder lives,” too. They were married and had regular jobs. There was no need to avoid sense pleasures, including sex, at all.

- For example, Vishākā (or Visākā), who was the leading female lay disciple at the time, attained the *Sotāpanna* stage at age seven and went on to get married and have twenty plus children.
- Many others were regular lay people with families who attained the *Sotāpanna* stage and continued to live that way.
- Of course, those who desired to attain higher stages of *Nibbāna*, made an effort to get rid of the craving for sense pleasures. Most of them became *bhikkhus* who abstain from sex and other sense pleasures.

Only at *Anāgāmī* Stage One Will Lose Craving for Sensory Pleasures

6. One needs to completely abstain from sense pleasures entirely only to become an *Anāgāmī*. Even a *Sakadāgāmī* still enjoys sense pleasures, even though he/she would not have the desire to “own” things that provide sense pleasures.

- For example, a *Sakadāgāmī* would still enjoy some sense pleasures,, but there would be no desire to own “things that provide sense pleasure” (houses, cars, etc.).

Losing Craving for Sensory Pleasures Comes After a Deeper Understanding of *Tilakkhaṇa*

7. One CANNOT just give up sense pleasures by sheer will power and become an *Anāgāmī*. One has to comprehend the “*anicca* nature” at a higher level than a *Sotāpanna*, and then those desires will NATURALLY go away.

- That may be hard for most people to understand: how the desire for sense pleasures will naturally go away. That is why one should follow the Path SEQUENTIALLY, one step at a time.
- By the way, the sense of “me” or ” a self” will go away only at the *Arahant* stage!

It is Necessary to See Harmful Consequences of Sensory Indulgences (*Kāmasukhallikānuyoga*)

8. However, it is important also to realize that one needs to stay away from both excessive sensory pleasures (*kāmasukhallikānuyoga*) as well as extreme ascetic practices of completely staying away from any comfort (*Attakīlamathānuyoga*.) The Buddha recommended the “middle path.” where one would live a simple, comfortable life without going to either extreme.

- Therefore, one cannot become a *Sotāpanna* by enjoying sense pleasures to the full, i.e., by maintaining a “playboy type” lifestyle.
- When one starts comprehending the *anicca* nature, one’s life WILL become simple.
- Even before one gets to the *Sotāpanna* stage, one will start feeling *nirāmisā sukha*, which is due to lessened stress on the mind due to this simple lifestyle.

9. Of course, one can speed up the process of the *Sotāpanna* stage by giving up sense pleasures. Those who take this path become *bhikkhus*. They voluntarily give up most sense pleasures, including sex.

- If one is to attain *jhāna*, one must at least SUPPRESS all sense desires. For example, in “[WebLink: suttacentral: Tapussa Sutta \(AN 9.41\)](#)”: “..So kho ahaṃ, ānanda, *viviceva kāmehi vivicca akusalehi dhammehi savitakkaṃ savicāraṃ vivekajaṃ pītisukhaṃ paṭhamaṃ jhānaṃ upasampajja viharāmi.*”
- That means one needs to have **all thoughts of sense pleasures and akusala kamma** removed from one’s mind at the time of getting to the *jhāna*.
- That statement appears in every *sutta* describing *jhāna*.

The Wider World View

10. According to the “wider world view” of the Buddha, there are 31 realms in this world. **Suffering in those realms decreases as one goes from the lowest four realms (*apāyā*) where the suffering is intense, to the human realm (where there is both suffering and happiness). In *deva* realms and 20 Brahma realms, there is increasingly more happiness.**

- The peaceful feeling one experiences in a *jhāna* are the same sense experience of *Brahmā* in the corresponding realms. But getting to *jhāna* has nothing to do with getting to *magga phala*, even though *jhāna* can provide a better mindset to do insight meditation.
- None of those realms can provide permanent happiness, because lifetime in any realm is finite. Even though the Brahma realms have very long lifetimes, one would eventually die and can be subsequently born in any of the 31 realms.
- If one’s goal is permanent happiness, one must eventually get to the *Arahant* stage of *Nibbāna*. However, if one can get to the *Sotāpanna* stage, one is guaranteed to get to the *Arahant* stage within a relatively few subsequent births.

Difference With Other World Religions

11. That is the main difference between Buddha Dhamma and other religions. Christianity and Islam promise permanent happiness in *deva* realms, and Hinduism promises lasting happiness in a Brahma realm.

- But the Buddha taught that nothing in this world is permanent. That holds for living beings and inert things in the whole universe.
- Scientists (including Einstein) believed as recently as 100 years ago that the universe is in a “steady state.” Now science has accepted that everything in our universe is in constant flux.
- Therefore, one born in any realm will die from there and be reborn in another realm.

There Is Nowhere in This World Where Suffering Ends (*Anicca* Nature)

12. The above sub-title summarizes the *anicca* nature of this world. One gets to the *Sotāpanna* stage by “seeing that.” When one first realizes the *anicca* nature of this world, one can immediately see the dangers in doing the strongest of *dasa akusala*. That realization will make one’s mind resistant to doing “*apāyagāmi* actions,” i.e., those makes one eligible to be born in the four lowest realms (*apāyā*).

- That understanding registers permanently in the mind of a *Sotāpanna* and is unbreakable. That is why he/she will never do any such immoral deed, no matter how tempting.
- At that time, one will have unbreakable faith in Buddha, *Dhamma*, and *Saṅgha*. One can see at that time how valuable *Dhamma* is. Of course, the Buddha discovered that *Dhamma*. It can be conveyed accurately only by a Noble Person.

- That is the reason for “unbreakable faith,” or “*aveccappasāda*” (*avecca pasāda*) in Buddha, *Dhamma*, and *Saṅgha*; see #4 of “[Sotapatti Anga – The Four Qualities of a Sotāpanna.](#)”
- One is also said to have “*Ariyakānta sīla*” or “unbreakable moral conduct” as a *Sotāpanna*. That does not mean one will not do any of the *dasa akusala*. But one will never again do a *dasa akusala* that would have strong *kamma vipāka* bringing rebirth in the *apāyā*. Such a mindset permanently removed.

Higher Stages of *Nibbāna* Come With Deeper Comprehension of *Anicca* Nature

13. A *Sotāpanna* would then get to the *Sakadāgāmī* and *Anāgāmī* stages by getting rid of the desire for sense pleasures in two phases.

- *Avijjā*, or the ignorance of the Four Noble Truths, is totally removed only at the *Arahant* stage. That is the time when one removes the “sense of me” or the “sense of a self.”
- It is a systematic long process.
- As I said at the beginning, one cannot expect to do advanced mathematics unless one first knows how to add/subtract, then how to do algebra, etc.
- Thus, moral conduct and getting rid of the ten types of *micchā diṭṭhi* are REQUIREMENTS for any stage of *magga phala*. Getting rid of the cravings for sense pleasures comes after that.

There Are Dangers in Craving for Sensory Pleasures

14. Finally, one may think that all one needs to do to get to the *Sotāpanna* stage because then one would be free from the *apāyā*. That is true. However, when one gets to the *Sotāpanna* stage, one will start seeing the sufferings in the *kāma loka*, including the *deva* realms.

As stated in the [WebLink: suttacentral: Dhammika sutta \(Snp 2.14\)](#):

- *Abrahmacariyaṃ parivajjayeyya,*
Aṅgārakāsuṃ jalitaṃva viññū;
Asambhuṇanto pana brahmacariyaṃ,
Parassa dāraṃ na atikkameyya.

Translated:

- **A wise person would live a celibate life (avoiding sex), as one would avoid falling to a pit of fire.** But if one is not yet at the stage of abstaining from sensory pleasures, one should at least not engage in sexual **misconduct**.
- Furthermore, sensual pleasures are not restricted to sex. Excessive attachment to ALL sensory pleasures come under *kāmasukhallikānuyoga* in #8 above. Also, see, “[What is “Kāma”? It is not Just Sex](#)” and “[Craving for Pornography – How to Reduce the Tendency.](#)”

4.6.2 **Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi**

September 2, 2017; revised September 14, 2019

1. These days, it is customary to state that the Noble Eightfold Path consists of three steps: *sīla* (moral conduct), *samādhi* (Concentration), and *paññā* (wisdom). However, that sequence holds only for the **mundane Eightfold Path**. It does not lead to *Nibbāna*, but only sets up the conditions to get into the Noble Eightfold Path.

- In this initial stage, one cultivates *sīla* by living a moral life by **making a determined effort** not to violate the five precepts; see, “[2. The Basics in Meditation.](#)”

- *Samādhi* is much more than just concentration; see, “[What is samādhi? – Three Kinds of Mindfulness.](#)” When one lives a moral life, one’s mindset will gradually change to a calm state (“*sama*” + “*adhi*”) as explained in that post.
 - With this calm mindset, one will be able to get rid of the ten types of *micchā diṭṭhi* (“[Miccā Diṭṭhi, Gandhabba, and Sotāpanna Stage.](#)” Then one reaches **mundane *Sammā Diṭṭhi*** or the first level of wisdom.
2. One must first follow the mundane Path before one can understand *anicca, dukkha, anatta*, and get into the Noble Path; see, “[Buddha Dhamma – In a Chart](#)” and “[What is Unique in Buddha Dhamma?](#).” **Thus, there are three necessary steps to *Nibbāna*:**
- Follow the mundane Eightfold Path by living a moral life (*sīla*) to remove the ten types of *micchā diṭṭhi*. Those include not believing in *kamma vipāka*, rebirth, etc. Then one get to mundane *samādhi*, and gain the first level of wisdom (*paññā*): *sīla, samādhi, paññā*.
 - Then start removing a DEEPER layer of *micchā diṭṭhi* (that this world can offer lasting happiness) by learning the CORRECT versions of *anicca, dukkha, anatta* (*Tilakkhaṇa*).
 - Once one grasps the basics of *Tilakkhaṇa* one becomes a *Sotāpanna Anugāmi*. One then starts living with this an **unbreakable *sīla*** to attain *Sammā samādhi* and the four stages of *Nibbāna* by following *paññā, sīla, samādhi*.
3. The first level of wisdom, achieved in the mundane path, is called ***kammassakatā Sammā diṭṭhi***: understanding that one’s actions, speech, and thoughts (*kāya, vacī, and mano saṅkhāra*) — one’s *kamma* — WILL have consequences in the future, both in this life and in future lives.
- With *kammassakatā sammā diṭṭhi*, one understands and accepts the fact that what we experience (*kamma vipāka*, good and bad) are due to our past *kamma*.
 - One understands that in order to encounter good *kamma vipāka* in the future (including future lives), one needs to **cultivate** GOOD *kamma* (i.e., good *mano*, *vacī*, and *kāya saṅkhāra*).
 - Even more importantly, one starts **avoiding** strong BAD *kamma*. Thus one starts getting rid of the coarse levels of *lobha, dosa, moha*, which is the same as preventing *dasa akusala*).
 - When one follows this “*sīla* step,” one will start experiencing the early stages of *Nibbāna* of “cooling down”; see, “[Nirāmisā Sukha](#)” and “[How to Taste Nibbāna.](#)”
4. Some people think that if one kills animals without knowing that will have consequences, that will not lead to *kamma vipāka*. That is not correct.
- There is no superhuman being that keeps track of what one is doing. **But when one intentionally kills an animal, one’s mind knows that, and one’s *viññāṇa* will adjust accordingly.** See, “[Viññāṇa – What It Really Means.](#)”
 - The more one kills animals that *viññāṇa* capable of killing will only grow. That will lead to a corresponding *bhava* in the *niraya* realm (hell) where similar suffering exists.
 - Therefore, being ignorant of nature’s laws is not an excuse, just like when one gets caught doing an illegal act, one will not be excused for not knowing that it was an unlawful act.
 - There is another type of action, where one kills animals unintentionally. For example, we kill many insects every time we take a walk. That does not lead to any *kamma vipāka*.
 - So, only those *saṅkhāra* (or more correctly *abhisāṅkhāra*) **done with intention** lead to *viññāṇa* (via “*saṅkhāra paccayā viññāṇa*”), and subsequently lead to births in different realms via “*viññāṇa paccayā nāmarūpa*,” etc to ...“*bhava paccayā jāti*.”
5. Most people also think that *kamma* are only bodily actions done via *kāya saṅkhāra*. But bodily actions, speech, and thoughts all contribute to *kamma*. It is the *cetanā* (intention) involved in thoughts, speech, and

actions (i.e., *mano*, *vacī*, and *kāya saṅkhāra*), that is *kamma*. That is explained in the subsection, “[Living Dhamma – Fundamentals](#).”

- When one starts comprehending how laws of *kamma* work (that causes lead to similar effects IF suitable conditions are present), one will gradually get to mundane *sammā samādhī*. Then one's ability to grasp more profound Dhamma concepts (*paññā*) will grow; see, “[Mundane Sammā Samādhī](#).”
- Future suffering can only be stopped by stopping the corresponding *abhisankhāra*, i.e., “*saṅkhāra nirodho bhava* (and *jāti*) *nirodho*.”
- But ***saṅkhāra can be only stopped by removing avijjā*** since *saṅkhāra* are unavoidable as long as *avijjā* is there: “*avijjā paccayā sankhārā*.” That is why *Sammā Dīṭṭhi* (understanding *Tilakkhaṇa*) is so important.
- One will have a good idea of how births in different realms are associated with different types of suffering. Furthermore, one would be able to see how one's actions (*saṅkhāra*) lead to such births. I have summarized them in the table below.

| Realm(s) | Level of Suffering | Causes | Generation/Stopping of Saṅkhāra |
|--|---|--|---|
| Niraya (Hell) | Incessant suffering | Dosa : Killing (especially humans), torture, rapes, etc | |
| Peta (Hungry Ghosts) | Starvation | Excess greed (may I get all, not others) | |
| Vinipatha Asura ('demons', titans, evil ghosts) | Spend time aimlessly; mostly heavy bodies not movable | Moha : Tina middha, vicikicchā (lazy, lacking wisdom). | |
| Animal (Tirisan: “tīri” + “san” or with all 3 causes) | Combinations of above three types | Combinations of lobha, dosa, moha | |
| Human (Manussa: “mana” + “ussa” or with advanced mind) | In between lower and higher realms | In between lower and higher realms | Almost all saṅkhāra responsible births in all realms occur here. |
| Deva (similar to human bodies, but much less dense) | Mostly no physical suffering and abundant sense pleasures (kāma). But there is mental stress. | Good kamma vipāka (done with alobha, adosa, amoha). Mental stress arises due to kāma rāga. | |
| Rupavacara Brahma (only manomaya kāya; cannot be even seen with a microscope) | Mental stress is much reduced. Mainly jhānic pleasures. Viparinama dukha when close death. | Suppression of kāma rāga and cultivation of rupavacara jhāna (while in the human realm) | |
| Arupavacara Brahma (only hadaya vatthu and mind) | Only arupavacara jhānic pleasures. Viparinama dukha when close death. | Cultivation of arupavacara jhāna (while in the human realm) | |
| Nibbāna | Permanent release from all suffering. | Elimination of all causes for existence, i.e., rāgakkhaya, dosakkhaya, mohakkhaya. | Mostly attained in the human realm, but possible in higher realms, especially after the Sotāpanna stage. |

6. Now it is clear how future suffering arises via one's own actions, speech, and thoughts (*saṅkhāra*). It is also clear that suffering decreases and “*nirāmisa sukha*” grows at successively higher realms.

- When one lives a sinful life and engaging in *dasa akusala* like killing, raping, etc. one is likely to be reborn in the lowest four realms (*apāyā*) and to face much suffering. engages in extreme. Such actions involve *kāya*, *vacī*, and *mano saṅkhāra* with *lobha*, *dosa*, *moha*.
- One is likely to be born in *rūpa* or *arūpa Brahma loka* when one cultivates *jhānā* by even abandoning *kāma rāga* (at least temporarily).
- When one has reduced *lobha*, *dosa*, *moha* to *rāga*, *paṭigha*, *avijjā* (see, “[Lobha, Dosa, Moha versus Rāga, Paṭigha, Avijjā](#)”) by following the mundane eightfold path, one is likely to be reborn in the human or *deva* realms. In these realms, suffering is much less, and especially in the *deva* realms, most remaining suffering is mental.

7. However, there is suffering that we tend to ignore. They are *saṅkhāra dukha* and *viparināma dukha*; see, “[Introduction – What is Suffering?](#)” and the follow-up post.

- That suffering arises due to *kāma rāga*, i.e., craving (*upādāna*) for sense pleasures. Thus even if one is not engaged in *dasa akusala*, one would not be released from *kāma loka* as long as one has *kāma rāga*.
- At the next higher level in the *rūpa* and *arūpa* realms, *kāma rāga* is absent, and thus one enjoys *jhānic* pleasures.
- Unlike sense pleasures, *jhānic* pleasures can be sustained for longer times, and are of much-refined nature. However, that is still not permanent as the *Nibbānic* bliss arrived at by eliminating all suffering.

8. As humans, we can overcome suffering in the *kāma loka* during this life itself, by cultivating *jhānā*. That essentially means being able to “temporarily live” in *rupavacara* or *arupāvacara* realms.

- That is done via either REMOVAL or SUPPRESSION of *kāma rāga* and *paṭigha*. Of course this is not possible if one is engaging in *dasa akusala*.
- There are Buddhist and non-Buddhist meditation techniques to achieve this. We will discuss this in detail in an upcoming series on *jhāna*.
- If one develops *jhānā*, one will be born in *rūpa* or *arūpa* realms in the next birth. However, as we can see from the above table, any future births in those *rūpa* and *arūpa* realms are temporary. One could later be reborn in the *apāyā*.
- The only permanent solution to end all future suffering is to attain *Nibbāna*, as shown in the above table.

9. When one gets to mundane *sammā samādhi* by cultivating *sīla*, one will be able to see the truth of the overall picture shown in the table above. It is at this stage – with this broader world picture — **one can take the second important step towards *Nibbāna* by comprehending the *Tilakkhaṇa***. However, one needs to know the correct versions of *Tilakkhaṇa*; see, “[Anicca, Dukkha, Anatta](#).”

- That is the *paññā* (wisdom) associated with the first path factor (*Sammā Diṭṭhi*) in the Noble Eightfold Path.
- It is then one will be able to comprehend the First Noble Truth about the suffering in this world, the *Dukkha Sacca*.

10. The key message of the Buddha is that one cannot find permanent happiness anywhere in this world. Any such temporary happiness would be miniscule compared to suffering in the *apāyā*, and *kāma loka*. That is very hard to be comprehend (no matter how well educated one maybe).

- This fundamental fact of nature is called *anicca* nature. It means that NOTHING in this world can bring a permanent state of happiness (and WILL only bring suffering). The only permanent state of happiness is *Nibbāna*.
- When one has the opposite perception of *nicca*, and focuses on seeking a long-term happiness in this world, one WILL face suffering (*dukkha*) in the long run.

- Thus, eventually one will become helpless in this rebirth process and that is called anatta nature.
- Those are the Three Characteristics of nature. **Therefore, the crucial second key step towards *Nibbāna* (permanent happiness) is to learn these critical characteristics of Nature from a true disciple of the Buddha.**

11. When one starts comprehending the *Tilakkhaṇa* to some extent, one becomes a *Sotāpanna Anugāmi* and enters the Noble Path; see, "[Sotāpanna Anugāmi and a Sotāpanna.](#)"

- In this third and last step towards *Nibbāna*, one starts with a NEW mindset about the real nature of this world. One can see that unimaginable suffering in the future if one does immoral things in seeking sense pleasures.
- **Thus one starts to understand the First Noble Truth or the *Dukkha Sacca*:** That there is unimaginable suffering in this world of 31 realms. At this initial stage, it is hard to see the dangers/suffering in the human and deva realms. But if one has comprehended the fact that *apāyā* (four lower realms) must exist in order for the laws of *kamma* to work, then one can see the unimaginable suffering in the *apāyā*.
- **The Buddha said that when one understands the First Noble Truth, one will simultaneously understand the other three Noble Truths.** One will be able to see that *lobha, dosa, moha* are the origins of that suffering (*Samudaya Sacca*), that one needs to remove those causes (*Nirodha Sacca*). And, the way to accomplish that is to follow the Noble Eightfold Path (*Magga Sacca*).

12. **This understanding becomes permanent forever (through future lives) when one attains the *Sotāpanna* stage.** From that point onward, one will not be CAPABLE of doing a *kamma* that could make one eligible for rebirth in the *apāyā*. Thus, one will be free from the worst suffering in the future.

- The post, "[Akusala Citta – How a Sotāpanna Avoids apāyagāmi Citta,](#)" explains how Nature enforces laws of *kamma*.
- One's mind will automatically reject any *apāyagāmi* act even on a sudden impulse.

13. **Understanding *Paṭicca Samuppāda* is critical.** It explains how future *bhava* (existences) arise due to the way one thinks, speaks, and acts (with *vacī* and *kāya saṅkhāra*). See, "[Saṅkhāra – What It Really Means](#)" and "[Correct Meaning of Vacī Saṅkhāra.](#)"

- If one is capable of hurting and killing others, then one will be subjected to similar conditions in the *niraya*.
- If one has excessive greed where one is willing to hurt others to get pleasures, then one could be born a *peta* (hungry ghost).
- Those who are lazy and depends on others cultivate *asura saṅkhāra*. That leads to *asura viññāṇa* and thus gives rise to an *asura* existence.
- And if one is capable of thinking, speaking, and acting like an animal, one is then cultivating animal *saṅkhāra*. Thus one could be born in an animal existence.

14. At this stage, one starts living by the *ariyakānta sīla*. This *sīla* is different from the *sīla* in the first step.

- In the first type of *sīla*, one forcefully avoided doing *pāpa kamma* or immoral acts. But there could have been occasions where one "could not help breaking the *sīla*," because the temptations were too strong.
- However, this new ***ariyakānta sīla* is unbreakable**, no matter how intense the temptation is. One's mind has grasped the fact that it is NOT WORTH to commit *apāyagāmi* actions. That is regardless of how much wealth or pleasures they could bring.
- For example, is it not worthwhile to make a lot of money by killing animals or fish, selling drugs that can harm others, by lying, bribing, etc.
- At this stage, one could still be attached to sense pleasures. Thus one could live a normal married life, which is "moral living."

15. It is not necessary to attain any *jhāna* to get to the *Sotāpanna* stage. These days there is too much emphasis on *jhāna*.

- **One needs to realize that *rūpāvacara* and *arūpāvacara jhāna* are the sensory experiences of the beings in the *rūpa* and *arūpa* realms.** Therefore, such experiences still belong to “this world” of 31 realms.
- The Buddha stated that any of his lay disciples with the *Sotāpanna* stage is million times well-off than a *yogi* who had attained all *jhānā* and all *abhiññā* powers.
- While those *jhānā* and *abhiññā* powers last only during this life, a *Sotāpanna* is freed from the *apāyā* FOREVER.
- However, understanding *jhānā* is important since it confirms the wider world view of the Buddha in the above table. There are many in the world today who have experienced *jhānā*.
- But some people mistakenly believe that *jhānā* are necessary to attain *magga phala*. But as the above table shows, *jhānā* are still part of “this world” and can be attained even by following “non-Buddhist meditations.” More details at “[Samādhi, Jhāna \(Dhyāna\), Magga Phala](#).”

4.6.3 Six Root Causes – Loka Samudaya (Arising of Suffering) and Loka Nirodhaya (Nibbāna)

July 19, 2018; revised December 23, 2018

1. “*Loka Samudaya*” (“*san*” “*udaya*”) means “arising of this suffering filled world”; “*loka nirodhaya*” (“*nir*” “*udaya*”) means “stopping the arising of this world.” By “this world” it is meant the 31 realms.

- As long as there are causes (*hetu*) exist for the world to arise for a given living being, that living being will be reborn and subjected much more suffering in the *apāyā* than any temporary happiness experienced in the “good realms” at or above the human realm.
- When three of those causes (*lobha, dosa, moha*) are removed, one will be released from “this world” and one would be free of suffering and would have attained *Nibbāna*.

2. There are 4 *paramatta dhammā* or “ultimate realities”: *citta, cetasika, rūpa*, and *Nibbāna*. Only the first three belong to this world of 31 realms.

- When one is in “this world”, his/her experience is described by *citta, cetasika, rūpa*.
- When one attains *Nibbāna*, one would be totally dissociated from *citta, cetasika, rūpa*.
- That is another way to describe *Nibbāna*.

3. **There are 6 root causes (*mūlika hetu*) that lead to the arising of one’s world: *lobha* (greed), *dosa* (hate/anger), *moha* (acting with 10 types of *micchā diṭṭhi*) and *alobha* (non-greed), *adosa* (non-hate/anger), *amoha* (absence of *moha*).**

- **When one acts with one or more of *lobha, dosa, moha*, one is giving rise to *kamma bīja* (*kammic* energy) that can lead to rebirth in the four “bad realms” or the *apāyā*.** In other words, one is generating bad *abhisankhāra* or “*apuñña abhisankhāra*,” therefore, “bad *viññāna*” etc, which lead to “bad *bhava*” and “bad *jāti*” (see, “[Paticca Samuppāda](#)”).
- In the same way, when one acts with one or more of *alobha, adosa, amoha*, one is giving rise to *kamma bīja* that can lead to rebirth in the “good realms” at or above the human realm. In other words, one is generating good *abhisankhāra* or “*puñña abhisankhāra*,” therefore, “good *viññāna*” etc, which lead to “good *bhava*” and “good *jāti*.”
- However, those three “good root causes” cannot lead to rebirths in the “good realms” after the three “bad root causes” are completely removed; see below.

4. It is said that *lobha*, *dosa*, *moha* are food (*āhāra*) for the *apāyā*; that is why they are called *kilesa* or “impurities.” That means they are food for the *kamma bīja* that give rise to births in the *apāyā*.

- In the same way, *alobha* is food or *āhāra* for the *deva* realms.
- *Alobha* and *adosa* are *āhāra* for the *brahma* realms.
- However, *amoha* is not a *cetasika* (mental factor), and instead what one cultivates is *paññā cetasika*. One attains *Nibbāna* by cultivating *paññā*. We will discuss this below.

5. Therefore, all six root causes lead to the continuation of the rebirth process. However, one needs to work to stop only the three “bad root causes” in order to stop the rebirth process (“*rāgakkhayo Nibbānaṃ, dosakkhayo Nibbānaṃ, mohakkhayo Nibbānaṃ*”).

- **The Path to *Nibbāna* STARTS with the reducing of the 3 bad roots and cultivating the 3 good root roots.**
- In order to attain *Nibbāna*, one MUST be in a good realm. Therefore, the first objective is to avoid births in the *apāyā*. The 3 bad roots (*lobha*, *dosa*, *moha*) are also called *kilesa* (or *keles* or impure), because they can lead to rebirths in the *apāyā*.

6. Furthermore, one’s *paññā* (wisdom) grows as one gets rid of the 3 bad roots and cultivate the 3 good roots. That is essential to be able to comprehend *Tilakkhaṇa*.

- When one comprehends *Tilakkhaṇa*, one will lose the desire to be reborn in the “good realms” too.
- **When one’s *paññā* becomes optimum at the *Arahant* stage, one will not go through the “*upādāna paccayā bhava*” step in *Paṭicca Samuppāda* leading to ANY rebirth.**
- This is why it is said that after completing the eighth step of *Sammā Samādhi* in the Noble Eightfold Path, one get to *Sammā Nāṇa* stage (when *paññā* is optimized) and one attains *Sammā Vimutti* (complete release from this world), i.e., “*dasa angehi samannāgato Arahant*.”

7. Thoughts can arise in the mind with EITHER good roots OR the bad roots (as far as *kammic* consequences are concerned).

- **All six roots are with a normal human as *anusaya* (hidden), but only one set can appear at a given time.**
- This is why even the “worst person” can do *kusala kamma* sometimes.

8. It is to be noted that *apuñña abhisāṅkhāra* arise in the mind when doing *dasa akusala* (i.e., when *asobhana cetasika* arise in *citta*). *Puñña abhisāṅkhāra* arise when doing *dasa kusala*, where *sobhana cetasika* arise in *citta*; see, “[Cetasika \(Mental Factors\)](#).”

- Those immoral actions (*dasa akusala*) done with *apuñña abhisāṅkhāra* have the three “bad roots” of *lobha*, *dosa*, and *moha*, and all those are *asobhana cetasika* (other types of *asobhana cetasika* can arise too). **It is to be noted that ALL *apuñña abhisāṅkhāra* are done with *citta* contaminated by the *moha cetasika*; *lobha* and *dosa cetasika* are in some of those *citta* that are associated with *dasa akusala*; see, “[Cetasika \(Mental Factors\)](#).”**
- “*Kusala*” comes from “*ku*” “*sala*” or getting rid of immoral (“*ku*”). *Kusala kamma* are done with the three “good roots” of *alobha*, *adosa*, and *amoha*. **It is also to be noted that *alobha* and *adosa* are in ALL *kusala citta*, but *amoha* is NOT EVEN a *cetasika*.**

9. **Therefore, one can do *kusala kamma* without getting rid of *moha*, i.e., without cultivating *paññā*:** most people engage in giving, have compassion for others, etc. This is a key point to remember.

- Anyone who has any of the 10 types of *micchā diṭṭhi* HAS NOT removed *moha*, and thus HAS NOT started cultivating *paññā*. But such a person can still do some *dasa kusala* (like giving), even though their *javana* power is not high compared to one who has removed the 10 types of *micchā diṭṭhi*.

- By the way, the *javana* power of *kusala citta* go up even more when one starts comprehending *Tilakkhaṇa*. In the *Abhidhamma* language, *javana* power is high in “*ñāṇa sampayutta citta*,” where *ñāṇa* is wisdom (*paññā*). And *paññā* grows with increasing comprehension of *Tilakkhaṇa*.

10. Therefore, “*kusala*” has two levels: within the mundane eightfold path, one can do *kusala kamma* “at a lower level”; these are also called “*puñña kamma*”; see, “[Puñña Kamma – Dāna, Sīla, Bhāvanā](#).” That will keep one away from births in the *apāyā*.

- However, those *kusala kamma* are “contaminated” to some degree, and they become more powerful in the Noble Path with the increasing comprehension of *Tilakkhaṇa*.
- For example, in “mundane *alobha*,” one loses craving for some things and is willing to share those with others. In “*lokuttara alobha*” one just loses craving by seeing the worthlessness of things in this world.
- In the same way, mundane *adosa* and *amoha* arise temporarily. But of course, they bring their *vipāka* to make it easier to cultivate *paññā* and to get to *lokuttara* roots, i.e., comprehend *Tilakkhaṇa*.

11. It is inevitable that even the most “moral normal person” WILL generate “bad *abhisankhāra*” either during this life or in the future life, until one REMOVES the three bad root causes from the mind by comprehending *Tilakkhaṇa*. Until then they remain as *anusaya*, and come to the surface under suitable conditions.

- For example, X may see an enticing object and greed (*lobha*) may come to the mind.
- But at another time, X may see a hungry person and may buy that person a meal with non-greed (*alobha*), non-hate (*adosa*), and *amoha*.
- An *Arahant* has removed all six root causes. But he/she may provide a meal to a hungry person out of *paññā* (wisdom) — doing the appropriate thing; it is also called a *kriya*, an action without *kammic* consequences.

12. When one removes *lobha*, *dosa*, *moha* from one’s mind, that will AUTOMATICALLY lead to the removal of *alobha*, *adosa*, and *amoha* too, because one’s *paññā* has now been cultivated to see the futility of all six causes to be born anywhere in the 31 realms.

- This is a key idea to comprehend. As one progresses on the mundane eightfold path — removing the three bad roots — one’s *paññā* will start to grow.

13. At that point, IF one gets to hear the essence of the Buddha Dhamma (Four Noble Truths/ Noble Eightfold Path/ *Tilakkhaṇa*), then *paññā* will start to grow much faster, as all six root causes will fade one’s mind.

- The key is to comprehend the *anicca* nature of this world of 31 realms: **Because of this *anicca* nature, one will be subjected to *dukkha*, and thus one will become helpless (*anatta*) in this rebirth process.**
- This is stated succinctly in the *Dhammacappavattana Sutta* in the following verse: “*yampiccam (yam pi iccam) nalabhati (na labhati) tampi dukkham*” or “one suffers when one does not get what one desires (*iccā*)”; see, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#).”
- That is because even if one desires and gets a birth in a *deva* or a *brahma* realm, that lasts only a finite time, and one will eventually be born in the *apāyā* and will endure much more and unimaginably harsh suffering.

14. This fact of not getting what one desires (“*na*” “*icca*,” which rhymes as “*anicca*,” just as “*na*” “*āgāmi*” rhymes as “*Anāgāmi*”) describes the key fundamental characteristic of “this world.” **This then leads to “*dukkha*” and thus to “*anatta*,” as expressed by the following verse in many suttā: “*yadaniccā tam dukkham, tam dukkham tadanattā*” (“*yad aniccā tam dukkham, tam dukkham tad anattā*”); see, “[Anicca, Dukkha, Anatta – Wrong Interpretations](#).”**

- This is a special knowledge that is grasped only by a Buddha. Of course, once a Buddha discovers this knowledge, he can explain it to others.

- It is to be noted that even when a Buddha is not in this world, there could be *yogis* who have removed the 10 types of *micchā diṭṭhi*. However, they would not have removed *avijjā*, until comprehending *Tilakkhaṇa*.

15. Therefore, until a Buddha or a true disciple of the Buddha explains the above “big picture”, AND until one’s mind “sees” the truth of this picture, one will be trapped in the suffering-filled rebirth process (*saṃsāra*).

- This is because one will ALWAYS believe that by “just being moral” (i.e., acting with *alobha*, *adosa*, *amoha*), one will be able to attain permanent happiness somewhere (in the heaven per most religions or in a *brahma* realm per Hinduism).
- Not believing in even the rebirth process and in the consequences of one’s actions (*kamma*), as well as not believing in the *paraloka* of *gandhabba*, are included in the 10 types of *micchā diṭṭhi*; see, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage.](#)”
- When one has those 10 types *micchā diṭṭhi*, one is more likely to do *apuñña abhisankhāra* (when the sense input becomes irresistible) and “become eligible” for the birth in the *apāyā*.

16. However, it must be clear that one cannot get to *Sammā Diṭṭhi* (or the correct vision) in the Noble Path (that leads to *Nibbāna*) merely by getting rid of the 10 types of *micchā diṭṭhi*.

- The next and critical step is comprehending the deeper characteristics of Nature or *Tilakkhaṇa* (*anicca*, *dukkha*, *anatta*), per above discussion.
- This is why the Buddha described two types of *Sammā Diṭṭhi* and two types of eightfold paths; see, “[Mahā Chattārisaka Sutta \(Discourse on the Great Forty\).](#)”
- **By following the first type of eightfold path, one stays away from the *apāyā*, and ALSO setup conditions to be able to comprehend *Tilakkhaṇa*.**
- Once on the first eightfold path, one can learn the true *Tilakkhaṇa* from a Buddha or a true disciple of the Buddha, contemplate on them, and start on the Noble Eightfold Path.

4.6.4 Ye Dhammā Hetuppabhavā.. and Yam Kiñci Samudaya Dhammam..

August 16, 2018; Revised January 20, 2020

This post will analyze two famous key verses to show the interconnections among the Four Noble Truths, *Tilakkhaṇa*, *Paṭicca Samuppāda*, and the Noble Eightfold Path. These are the main concepts that must be comprehended in order to benefit from Buddha Dhamma.

Ye Dhammā Hetuppabhavā..

Background

*“Ye dhammā hetuppabhavā,
Tesaṃ hetuṃ tathāgato āha;
Tesaṅca yo nirodho,
Evaṃvādī mahāsamaṇo”*

- From just hearing this verse uttered by Ven. Assaji, Upatissa (later Ven. Sariputta) became a *Sotāpanna*. That is the fundamental concept of Buddha Dhamma and is explained in detail in the *Paṭicca Samuppāda*.
- The correct translation is the following. “Whatever *dhammā* (which are *kamma bīja*) that give rise to the rebirth process, causes for those to arise have been declared by the Buddha; he has also explained how those causes can be stopped from arising (and thus end the rebirth process).”
- First, let us briefly discuss how we arrive at this translation.

What Does “*Hetuppabhavā*” Mean?

1. “*Ye dhammā*” means “those *dhammā*.” The compound word in the verse is *hetuppabhavā*: It is the combination of “*hetu*,” “*pa*,” and “*bhava*,” which respectively mean causes, repeated, and existence. The combination rhymes as *hetuppabhavā*, just as *dhamma cakka pavattana* rhymes as “*dhammacakkappavattana*.”

- Note that “*pa*” (meaning repeated) and “*bhava*” combine to rhyme as “*pabbhava*” with an additional “*b*.”
- So, *hetuppabhavā* means “causes leading to repeated birth or causes to sustain the rebirth process.”
- Note that both words *hetuppabhavā* and *pabhassara* have the words “*pa*” and “*bha*” embedded in them; see, “[Pabhassara Citta, Radiant Mind, and Bhavaṅga](#).”
- So, “*ye dhammā hetuppabhavā*” means “those *dhammā* that sustain the rebirth process or *saṃsāra*.”

Tesaṃ and *Tesaṅca* Both Have “*saṅ*”

2. *Tesaṃ* is “*te*” + “*saṅ*” or three “*saṅ*” of *lobha*, *dosa*, *moha*. These are those *hetu* or causes.

- Even though there are six root causes, they all can be eliminated by eliminating just three (*lobha*, *dosa*, *moha*); see, “[Six Root Causes – Loka Samudaya \(Arising of Suffering\) and Loka Nirodhaya \(Nibbāna\)](#).”
- Of course “*saṅ*” are the defilements that are responsible for the rebirth process for anyone, which are *dasa akusala*; see, “[San](#).”
- Again, “*te*” and “*saṅ*” combine to rhyme as “*tesaṅ*.”
- So, “*Tesaṃ hetuṃ tathāgato āha*” means “The Buddha has declared what those three causes are.”

3. The next part, “*Tesaṅca yo nirodho*” or “*Te saṅ ca yo nirodho*” has the second complex keyword of *nirodha*, which comes from “*nir*”+“*udaya*,” where “*nir*” means stop and “*udaya*” means “arise.” [*te* + *saṅ* + *ca* = *tesaṅca*]

- Thus *nirodha* means to stop something from arising; see, “[Nirodha and Vaya – Two Different Concepts](#).”
- The easiest way to understand *nirodha* is to see that a plant can be stopped from arising (i.e., coming into being) by destroying the seed. Put in the real context of the word *nirodha*, a plant’s coming into being can be stopped by **stopping the creation of that seed**.
- In the same way, a future existence (*bhava*) can be stopped by stopping the formation of the corresponding *viññāṇa* (*kamma bīja*), i.e., ***bhava nirodha* is achieved by *viññāṇa nirodha***.

How Is *Viññāṇa Nirodha* Realized?

4. By going backward further in PS, *viññāṇa nirodha* in turn is done by (*abhi*)*saṅkhāra nirodha*; see below too. Of course, *abhisāṅkhāra nirodha* cannot be done by sheer will power. One must cultivate *paññā* (wisdom) and get rid of *avijjā*. That requires comprehending of *Tilakkhaṇa* or the futility of clinging to this suffering-filled world of 31 realms that will make one helpless in the end (especially when born in the four lowest realms or *apāvā*).

- We can thus see that *viññāṇa nirodha* leads to the stopping of initiation of ***akusala-mūla Paṭicca Samuppāda*** (PS) cycles starting at the “*avijjā paccayā saṅkhāra*” step.

5. Now it is clear what is meant by “*tesaṅca (te saṅ ca) yo nirodho, evaṃvādī mahāsamaṇo*.” The Buddha (*mahāsamaṇo*) has explained how those defilements can be stopped from arising.”

- *Viññāṇa nirodha* is achieved via stopping *abhisāṅkhāra* or — **to put in a practical statement** — **by abstaining from all *dasa akusala***. That involves the three *akusala* done by the body (via *kāya saṅkhāra*), four *akusala* by the speech and defiled conscious thoughts (via *vacī saṅkhāra*), and three *akusala* done by the mind (via *mano saṅkhāra*).
- It is essential to understand what is meant by keywords like *saṅkhāra* and *viññāṇa*; see, “[Mental Aggregates](#).”
- It is important to realize that conscious thoughts are also *vacī saṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra](#).” It is not just immoral speech and deeds that matter, but immoral “daydreaming” counts too.

6. The way to achieve *viññāṇa nirodha* is, of course, the Noble Eightfold Path. When one follows the Noble Path, one's *avijjā* will be removed and thus no more initiations of PS cycles, i.e., no more suffering (there will not be “*jāti paccayā jarā, maraṇa, soka,...*”).

- In the [WebLink: suttacentral: Petakopadesa](#), this verse expresses the *four* Noble Truths (*cattāri ariyasaccāni*), and we can now see why.

Yaṃ Kiñci Samudaya Dhammaṃ..

Introduction

7. The second related verse “*yaṃ kiñci samudaya dhammaṃ sabbaṃ taṃ nirodha dhammaṃ*” is in the [WebLink: suttacentral: Dhammacakkappavattana Sutta \(SN 56.11\)](#). [*kiṃ* + *ci* = *kiñci*; *kiṃ* or *kiṃ* :[rel. or inter. pron.] what? *ci* : *cid*, indecl. an indefinite interrogative particle. *koci* [whoever], *kiñci* [whatever], *kadāci* [whenever], *kuhiñci* [wherever]. cf. *ca, cana, ce.*]

- **Translated:** “If there are *dhammā* that give rise to suffering (i.e., any *samudaya dhammā*), all such *dhammā* can be stopped from arising (via the Noble Eightfold Path).” [*samudaya* = *san* + *udaya* = rise of *san* (that leads to suffering)]
- “*yaṃ kiñci samudaya dhammaṃ*” means “any *dhammā* that eventually lead to suffering. And, “*sabbaṃ taṃ nirodha dhammaṃ*” means “all such *dhammā*” are *nirodha dhammā*, i.e., they can be stopped from arising.

Here *Viññāṇa* Is “Defiled Consciousness”

8. But we need to get the idea embedded in this verse, instead of just translating word-by-word.

- From what we have learned so far, we know that *samudaya dhamma* (or *kamma bīja*) are created by *viññāṇa*, for which the best translation is “**defiled consciousness**.”
- *Viññāṇa*, in turn, arise due to our own (*abhi*) *saṅkhāra*. And the reason that we do *abhisāṅkhāra* is that we are ignorant of the *anicca* nature, i.e., we have *avijjā*.
- That is what the *paṭicca samuppāda* states: “*avijjā paccayā saṅkhāra, saṅkhāra paccayā viññāṇa, viññāṇa paccayā nāmarūpa,*” leading to “*upādāna paccayā bhava, bhava paccayā jāti,*” which ends up in the whole mass of suffering: “*jāti paccayā jarā, maraṇa,...*”

9. So, again we can see that *samudaya dhamma* arises with defiled *viññāṇa* that occur due to *abhisāṅkhāra* done with *avijjā*!

- If we do not cultivate such defiled *viññāṇa* via *abhisāṅkhāra* (i.e., if we stop doing *dasa akusala*), then we will not end up with births leading to all types of suffering. Those are *jarā* (old age), *marāṇa* (death), *soka* (unhappiness), *parideva* (long lasting state of unhappiness where *soka* keeps bubbling up), *dukkha* (physical injuries, diseases, etc), *domanassa* (long bouts of depression), *upāsāya* (extreme distress where can faint or generates suicidal thoughts).”

- Those sufferings described above are mainly for the human realm. If one is born in the four lowest realms, it will be much worse, mostly physical suffering or *dukkha*.

***Kamma Vipāka* Are Not Deterministic**

In the above, we have discussed how to stop the formation of *kamma bīja*. But what about those *kamma bīja* that we have already piled up during this life and from previous lives? Will not they bring *vipāka* and initiate new *bhava* and *jāti* filled with suffering?

10. The key is to understand that one gets a “second chance.” *Kamma vipāka* are not deterministic, i.e., ***kamma bīja* cannot automatically bring *vipāka*.**

- In an *uppatti* (rebirth) PS cycle, we saw that *kamma bīja* form with the first two steps in the PS cycle: “*avijjā paccayā saṅkhāra*” and “*saṅkhāra paccayā viññāṇa*.” This *viññāṇa* is called a *kamma viññāṇa*.
- But when those *kamma bīja* try to bring back the *vipāka* corresponding to those *kamma bīja* at a FUTURE time, they are brought back as *vipāka viññāṇa*. That means is the mind is exposed to a “sign” called a “*nimitta*” that corresponds to the same *kamma* done to make that *kamma bīja*.

11. So, it is essential to realize that in an *uppatti* PS cycle, the “*viññāṇa paccayā nāmarūpa*” step starts much later, may be even in future life.

An Example

12. We can explained that with an example. Suppose person X kills another human being in this life. That involves a lot of *mano*, *vacī*, and *kāya abhisankhāra* and all those contribute to a defiled mindset (*viññāṇa*) that led to a *kamma bīja* which got the most contribution at the moment of killing via a *kāya abhisankhāra*.

- Now, that *kamma bīja* will be there waiting to bring its *vipāka* at a later time.
- Suppose X dies a few years later, but he has more *kammic* energy for this human *bhava* left. In that case, that *kamma bīja* cannot bring *vipāka*. He will leave a dead body as a *gandhabba* and wait for a suitable womb.
- However, *if X had killed one of his parents, for example, that would be a ānantariya kamma*, and thus that *kamma bīja* will bring its *vipāka* at the end of this life.

13. In either case, the “*viññāṇa paccayā nāmarūpa*” step will start the rest of PS cycle leading to a new *bhava* (let us say in the *niraya*) with the following way.

- So, X is now at the deathbed, whether in this life or in a future life as a human. Just before the dying moment, that *kamma bīja* will bring a sign (called *nimitta*) of that *kamma* to X’s mind. it could be a scene from that killing event or a scene from the *niraya* that he is about to be born.
- Since he had done this act with intention, that mindset will come back, and he will basically have that defiled mindset (*viññāṇa*) that was responsible for the killing. Then he will have that *nimitta* come in, and this is the “*nāmarūpa*” that comes to his mind at that time: “*viññāṇa paccayā nāmarūpa*.”

14. All his six sense faculties will transform according to that sign or *nimitta*: “*nāmarūpa paccayā saḷāyatana*.” Of course, the *nimitta* will come through only one, let us say like a picture from that killing event or a sound.

- His mind will now make contact (*saḷāyatana paccayā phassa*) just as in any sense event, and that leads to “*phassa paccayā vedanā*,” i.e., now he is about to re-enact the crime in his mind, starting at the “*vedanā paccayā taṇhā*” step.

15. But a critical point in these steps occurs at the “*vedanā paccayā taṇhā*,” “*taṇhā paccayā upādāna*” steps. When one gets that *nimitta* of birth in the *niraya* appears at the moment of death, one WILL NOT grasp it if one has attained the *Sotāpanna* stage.

- A *Sotāpanna*'s mind has grasped the truth of the “*anicca* nature” and has a higher level of *paññā* (wisdom), so it WILL NOT grasp that *nimitta*. That is why *Aṅgulimāla* was able to attain the *Arahanthood*, even after killing almost 1000 people. That past *kamma bīja* did not get to germinate.

16. Therefore, that *nimitta* will be ineffective if X had become a *Sotāpanna* in the intervening time, and a different (good or bad) next in line will appear. The process will continue until a suitable new *bhava* grasped at the “*upādāna paccayā bhava*” step.

- That is how a *Sotāpanna* avoids “*apāyagāmi kamma bīja*” from bringing their *vipāka*.
- Of course, if X had not attained the *Sotāpanna* stage, then he will be born in *niraya*.

Further Reading

17. Please do not hesitate to ask questions at the forum if this is not clear. *Kamma viññāṇa* are discussed in detail at: “[Kamma Viññāṇa – Link Between Mind and Matter](#).”

- The process of how past *kamma* try to bring *vipāka* with *vipāka viññāṇa* discussed in detail at, “[Avyākata Paticca Samuppāda for Vipāka Viññāṇa](#).”
- Of course, one needs to really understand what is meant by all these terms (*vedanā*, *taṇhā*, *upādāna*, etc.) to understand these processes; see, “[Mental Aggregates](#).”
- If one can truly comprehend this post, one could get to the *Sotāpanna* stage, because this is seeing the “way to *Nibbāna*,” i.e., how to stop the future suffering permanently. That is about getting to *lokuttara Sammā Diṭṭhi*.

4.7.1 Samādhi, Jhāna, Magga Phala – Introduction

October 12, 2017; revised April 28, 2018; September 13, 2018; February 11, 2020

Introduction

1. Apparently, there are a considerable number of people who have attained *magga phala* (with or without *jhāna*) recently all over the world. We are indebted to the late Waharaka Thero for this great awakening by clarifying the correct interpretations of Buddha’s teachings; now many are working tirelessly to make those interpretations available to others; see, “[Parinibbāna of Waharaka Thero.](#)”

- Over the years, I have seen some key issues related to *jhāna* and *magga phala* discussed at many online forums, without reaching a definitive conclusion. I hope this series of posts will be of use to settle this matter.
- I will try to put together a consistent picture solely based on material from the *Tipiṭaka*. One common problem that I see in online forums is that many people put *Tipiṭaka* on the same footing as commentaries (such as *Visuddhimagga*) written much later by people (non-*Ariyā*) like Buddhaghosa or Nagarjuna. That leads to confusion because those accounts have many contradictions with the *Tipiṭaka*.
- These posts are supposed to be read in the given sequence. Please read carefully at a quiet time.

What Is *Samādhi*?

2. *Samādhi* (“*sama*”+“*adhi*” where “*sama*” means “equilibrium” and “*adhi*” means “dominance”) means turning the mind towards an equilibrium state away from distraction (especially greedy, angry, or foolish thoughts.)

- The opposite of the Pāli word “*sama*” is “*visama*.” When either the body or the mind gets “away from equilibrium,” that is “*visama*” and we become uncomfortable.
- A good analogy is the following. We become restless if our environment becomes too hot. Then we try to find a way to cool ourselves. We get very uncomfortable if we are in a “too cold” environment also. Then we try to be warm by turning on a heater or wrapping ourselves with blankets.
- However, if the room temperature is moderate and away from both those extremes, then we feel comfortable. We feel contented.
- A similar effect takes place when the mind stops going to the extremes. A greedy or angry mind is in a “*visama*” state and is away from *samādhi*.
- However, if the focus is a *dhamma* concept, then the mind moves toward “equilibrium.”

- *Samādhi* is essential to attain *Magga phala*. *Jhāna* are a special category *samādhi* and are not essential to attain *magga phala*.

***Sammā Samādhi* Are Two Types**

3. *Samādhi* can be of many types. **What is essential to attain *magga phala* is *Sammā Samādhi*.** As we have discussed before, there is mundane *sammā samādhi* that is reached by getting rid of the 10 types of *micchā diṭṭhi*. Then there is *lokuttara Sammā Samādhi* that is reached by comprehending *Tilakkhaṇa* to some extent; see, "[Buddha Dhamma – In a Chart](#)."

- As discussed in the previous post, "[Sīla, Samādhi, Paññā to Paññā, Sīla, Samādhi](#)," one gets to mundane *Sammā Samādhi* via "Sīla, Samādhi, Paññā." Then one can comprehend the *Tilakkhaṇa* and follow the Noble Path via "Paññā, Sīla, Samādhi," with *Sammā Diṭṭhi* taking the lead.
- There is nowhere in the *Tipiṭaka* that says one needs *jhāna* to attain *magga phala* or *Nibbāna*.
- *Magga phala* means one is starting to break the bonds (*dasa saṃyojana*) to this world; see, "[Dasa Saṃyojana – Bonds in Rebirth Process](#)." One attains *magga phala* by getting into *lokuttara Sammā Samādhi* (*samādhi* to remove "san": "san" + "mā"; see, "[What is "San"? Meaning of Sansāra \(or Samsāra\)](#)."

Jhāna* Are Not Necessary to Attain *Magga Phala

4. **April 28, 2018:** I found a *desanā* by Waharaka Thero where he presents clear evidence that *jhāna* are not necessary to attain *magga phala* (It is of course in the Sinhala language):

[WebLink: Download "Are Jhāna Required for Magga-Phala"](#)

- The main point the Thero makes is that we know that there are *jāti Sotāpannas* born in the human realm. But if a *jhāna* was REQUIRED to attain the *Sotāpanna* stage, then that person WOULD NOT be born in the human realm, but in a *brahma* realm corresponding that *jhāna*.

Attaining *Jhāna* Has Nothing to Do With *Nibbāna*

5. In simple terms, *jhāna* are mental states existing in the 16 *rūpa* realms and the four *arūpa* realms. Thus by definition, attaining *jhāna* has nothing to do with *Nibbāna*. This can be easily seen in "[The 89 \(121\) Types of Citta](#)."

Jhāna falls into two categories (*Ariya* and *anāriya*) and — depending on the category — could be an **asset** or **hindrance**, as we will discuss in this section.

- As discussed in "[31 Realms Associated with the Earth](#)" those 20 realms lie above the realms of *kāma loka*. Those *rūpi* and *arūpi Brahmā* enjoy only ***jhānic* pleasures**, which are better than **sensual pleasures**.
- We all have been born in most of the 31 realms (except for the realms reserved for the *Anāgāmis*) an uncountable times, **and thus had attained those *jhānic* states uncountable times in previous lives**.
- As we know, **sensual pleasures** are present only in *kāma loka* (human realm, six *deva* realms, and the animal realm).
- Humans can cultivate *jhāna* by **suppressing (*anāriya*) or removing (*Ariya*) the craving for sensual pleasures (*kāma rāga*)**.
- One could approach *Nibbāna* via *Ariya* or *anāriya jhāna*; see, "[Ascendance to Nibbāna via Jhāna \(Dhyāna\)](#)."

Difference Between *Ariya* and *Anāriya Jhāna*

6. If those *Brahmā* are born there via cultivating mundane *jhāna*, then *kāma rāga* remain with them as *anusaya* (which means deeply hidden). So, when they die and are reborn in the lower realms, those *kāma rāga* re-surface. The suppression is only during the time they live as *Brahmā* in those higher realms.

- In the same way, those humans who get into *jhānā* SUPPRESSING *kāma rāga* can lose the ability to get into *jhānā* even in this life. The best example from the *Tipiṭaka* is Devadatta, who developed not only *anāriya* (mundane) *jhānā* but also *abhiññā* powers, and then lost all that and ended up in an *apāya*. Even though Devadatta was obviously exposed to correct *Tilakkhaṇa* (he was ordained by the Buddha himself), he had apparently not grasped them.
- The ability to get into *jhāna* is also related to our *gati* (pronounced “gathi”; our habits from past lives). Those who have cultivated mundane *jhānā* in relatively recent past lives can easily get into mundane *jhāna*.
- However, if one gets into even the first *Ariya* (supramundane) *jhāna*, one has essentially attained the *Anāgāmi* stage by removing *kāma rāga*; see, “[Mundane versus Supramundane Jhāna](#).”

Magga Phala Require Sammā Samādhi

7. *Magga phala* (including the *Arahant* stage) can be reached via going through any of the *jhānic* states or without going through any *jhānic* state; see, “[The 89 \(121\) Types of Citta](#).”

- This is also discussed in “[WebLink: suttacentral: Paññāvimutta Sutta \(AN 9.44\)](#)” and “[WebLink: suttacentral: Susimaparibbājaka Sutta \(SN 12.70\)](#).”
- Furthermore, a *Sotāpanna* may attain *anāriya jhāna* and be born in *brahma* realms lying below the *Suddhāvāsa* realms reserved for the *Anāgāmis*. But they also do not come back to *kāma loka*; see, “[Pathama Metta Sutta](#).” Of course, those who attain *anāriya jhāna* without *magga phala*, will come back to *kāma loka* and could be born in the *apāyā* subsequently.

8. More detailed information with references to *suttā* at, “[Ascendance to Nibbāna via Jhāna \(dhyāna\)](#),” “[Mundane versus Supramundane Jhāna](#),” “[Nirodha Samāpatti, Phala Samāpatti, Jhāna, and Jhāna Samāpatti](#).”

- There are a series of posts on *jhāna* (in simpler terms, without too many Pali words) in an older section: “[Power of the Human Mind](#).”

4.7.2 Vitakka, Vicāra, Savitakka, Savicāra, and Avitakka, Avicāra

March 7, 2019; revised December 3, 2019

1. It is critically important to understand the meanings of *vitakka/vicāra*, *savitakka/savicāra*, and *avitakka/avicāra*. I see many discussions on discussion forums without reaching a satisfactory conclusion, and most *sutta* translations are incorrect. In particular, *savitakka* and *savicāra* are commonly translated incorrectly as “with *vitakka* and *vicāra*.”

- As always, one MUST start with the basics. Trying to extract the meanings of such keywords from deep *suttā* is counter-productive.
- What we need to do is to start with the basic definitions and THEN verify that the meanings of verses in deeper *suttā* CAN BE figured out using these basic definitions. I have seen that this method ALWAYS works within the *Tipiṭaka*.
- In fact, if someone can point out a *sutta* in the *Tipiṭaka* that is not consistent with this post, please comment at the discussion forum.
- Possible inconsistencies MAY arise if one tries to make them compatible with late commentaries like the *Visuddhimagga*.

What Are *Vitakka* and *Vicāra*?

2. The words *takka*, *vitakka*, *vicāra* (තර්ක, විතර්ක, විචාර in Sinhala), the closest English words could be “**think one way**”, **further/counter analysis**, **investigate in depth**. They are same as *vacī saṅkhāra*.

- All those words describe conscious thinking about a thought object (*ārammaṇa*). One either silently “talks to oneself” or speaks out while analyzing the situation in the mind. [*takka* :[m.] thought; reasoning; logic. (nt.), butter-milk. *vitakka* :[m.] reflection; thought. *vicāra* :[m.] investigation; management; planning; discursive thinking.]

A clear explanation is given in *Abhidhamma*, in the discussion on *kāma dhātu*, *byāpāda dhātu*, *vihimsā dhātu*, *nekkhamma dhātu*, *abyāpāda dhātu*, *avihimsā dhātu*, in the following section: “[WebLink: suttacentral: Dhātuvihaṅga.](#)”

- For example, “*Tattha katamā kāmadhātu? Kāmapaṭisaṃyutto takko vitakko saṅkappo appanā byappanā cetaso abhiniropanā micchāsaṅkappo—ayaṃ vuccati kāmadhātu.*”

Translated: “What is the **element of kāma (indulgence)?** *takka*, *vitakka*, *saṅkappa*, *appanā*, *byappanā* (remaining there, which is related to *vicāra*), which lead to **establishing wrong views**. That is called the element of desire/indulgence.”

In other words, when one is constantly generating such thoughts, *kāma rāga* builds up.

3. The opposite, **element of nekkhamma** is defined as: “*Tattha katamā nekkhammadhātu? Nekkhammapaṭisaṃyutto takko vitakko, saṅkappa, ... pe ... sammā saṅkappo—ayaṃ vuccati nekkhamma dhātu.*”

- **Translated:** “what is the **element of renunciation?** *takka*, *vitakka*, *saṅkappa*, *appanā*, *byappanā* (remaining there, which is related to *vicāra*), which lead to **establishing correct views (leading to the removal of defilements)**. This is called the element of renunciation.”

In other words, when one is constantly generating such thoughts, *kāma rāga* is diminished.

- Similarly for *byāpāda dhātu*, *vihimsā dhātu*, and the opposites *abyāpāda dhātu*, *avihimsā dhātu*.

Vacī Saṅkhāra Are *Saṅkappa* (Conscious Thoughts)

It is important to see the connection between *vacī saṅkhāra* and *saṅkappa* (as in *Sammā Saṅkappa*.)

4. We can now see that *kāma (abhijjhā) saṅkappa*, *byāpāda (or vyāpāda) saṅkappa*, *vihimsā saṅkappa* are all “bad” *vacī saṅkhāra*. They associate with greed, hate, and ignorance.

- Their opposites are associated with *Sammā Saṅkappa*: *nekkhamma*, *abyāpāda*, and *avihimsā saṅkappa*.
- Note that *Sammā Saṅkappa* comes next to *Sammā Diṭṭhi* in the Noble Eightfold Path. Therefore, we can see the importance of *vacī saṅkhāra*.

5. Now we can also see the connection to *vacī saṅkhāra* as defined clearly in the “[WebLink: suttacentral: Cūlavedalla Sutta \(MN 44\)](#)“: ..” *vitakka vicārā vacī saṅkhāro*” OR “*vacī saṅkhāra* are *vitakka vicārā*.”

- *Vacī saṅkhāra* are “conscious thoughts that we silently generate” and also those thoughts that lead to the speech by moving the lips, tongue etc. Hate speech is due to *apuññābhi vacī saṅkhāra*. Thinking about a *Dhamma* concept is a *puññābhi vacī saṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra.](#)”

Vacī Saṅkhāra (Vitakka Vicārā) Are Saṅkappa

6. Another important *sutta* where this is discussed is, “[WebLink: suttacentral: Mahācattārīsaka Sutta \(MN 117\)](#)“:

“*Katamo ca, bhikkhave, sammāsaṅkappo ariyo anāsavo lokuttaro maggaṅgo? Yo kho, bhikkhave, ariyacittassa anāsavacittassa ariyamaggasamaṅgino ariyamaggaṃ bhāvayato takko vitakko saṅkappo appanā byappanā cetaso abhiniropanā vacīsaṅkhāro—ayaṃ, bhikkhave, sammāsaṅkappo ariyo anāsavo lokuttaro maggaṅgo.*”

- **Translated:** “And what, *bhikkhus*, is **Sammā Saṅkappa** that is Noble, without *āsava*, supramundane, a factor of the Noble Path? Those are Noble thoughts (*ariyacittassa*) that are devoid of cravings (*anāsavacittassa*), belong to the Noble Path (*ariyamaggasamaṅgino ariyamaggaṃ bhāvayato*) with **takko vitakko saṅkappo appanā byappanā cetaso abhiniropanā vacī saṅkhāro**: that is *Sammā Saṅkappa* that is Noble, a factor of the Noble Path.”

Vitakka Usually Reserved for “Bad Saṅkappa”

7. “[WebLink: suttacentral: Akusala Vitakka Sutta \(SN 9.11\)](#)” provides one example: “*Tena kho pana samayena so bhikkhu divāvihāragato pāpake akusale vitakke vitakketi, seyyathidaṃ—kāma vitakkaṃ, byāpāda vitakkaṃ, vihiṃsā vitakkaṃ.*”

- “*Bhikkhus*, do not engage in evil unwholesome thoughts which are: sensual thoughts, thoughts of ill will, thought of harming others (**pāpake akusale vitakke vitakkeyyātha, seyyathidaṃ— kāma vitakkaṃ, byāpāda vitakkaṃ, vihiṃsā vitakkaṃ**).
- Another verse in the same *sutta*: “*Ayoniso manasikārā, so vitakkehi khajjasi..*” or “with the wrong mindset (*ayoniso manasikara*), he is burdened with such defiled thoughts.”

8. Succinct explanations can also be found in the “[WebLink: suttacentral: Vitakka Sutta \(SN 56.7\)](#).”

Following is the basic idea of the whole *sutta*:

- “*Bhikkhus*, do not engage in evil unwholesome thoughts which are: sensual thoughts, thoughts of ill will, thought of harming others (**pāpake akusale vitakke vitakkeyyātha, seyyathidaṃ— kāma vitakkaṃ, byāpāda vitakkaṃ, vihiṃsā vitakkaṃ**).
- For what reason? These thoughts, *bhikkhus*, are without **real substance** (*Nete, bhikkhave, vitakkā atthasamhitā*), irrelevant to the fundamentals of the holy life, and do not lead to escape from the sense world, to dispassion, to cessation, to peace, to direct knowledge, to enlightenment, to *Nibbāna*. When your mind starts such thoughts, *bhikkhus*, you should think: ‘This will lead to suffering’.
- Instead, you should think: ‘These are the causes of suffering’; you should think: ‘The way to cessation of suffering by cultivating thoughts of renunciation and compassion.’ Such thoughts will lead to escape from the sense world, to dispassion, to cessation, to peace, to direct knowledge, to enlightenment, to *Nibbāna*.”

Vitakka/Vicāra and Savitakka and Savicāra

9. In many instances, the words **vitakka** and **vicāra** specifically indicate “bad thoughts” or defiled thoughts.

- However, in some cases, they indicate “all kinds of thoughts good or bad.”
- Therefore, one must be able to identify which meaning to use in the context that the words are used. The above examples illustrate that point.

10. When one generates thoughts that specifically do not involve **kāma rāga or other akusala** — but the opposites (**nekkhamma/kusala**) — **those are called savitakka and savicāra**.

- That is how one gets into *jhāna*: By eliminating (or suppressing) **vitakka/vicāra** and cultivating **savitakka/savicāra**.

11. You can clearly see that in any *sutta* that describe *jhāna*. For example, in “[WebLink: suttacentral: Tapussa Sutta \(AN 9.41\)](#)”: “..So kho ahaṃ, ānanda, *vivicceva kāmehi vivicca akusalehi dhammehi savitakkaṃ savicāraṃ* vivekajaṃ pītisukhaṃ paṭhamañ *jhānaṃ* upasampajja viharāmi.”

- **Translated:** “Ānanda, when one stays away from *vitakka/vicāra* with *kāma rāga* and *akusala* AND cultivates *savitakka/savicāra*, one will get into the first *jhāna*.”
- However, *vitakka/vicāra* with *kāma rāga* and/or *akusala* may come to the mind once in a while.

Avitakka and Avicāra

12. **The absence of any “bad thoughts” is indicated by *avitakka, avicāra*.** In this case, one would only have *savitakka, savicāra* (good thoughts).

- This happens in the second *jhāna*, where only *savitakka/savicāra* remains.
- Therefore, it is important to realize that *avitakka/avicāra* DOES NOT mean “without thoughts”; it just means the absence of bad thoughts.

13. This is very clear at the end of the “[WebLink: suttacentral: Upakkilesa Suatta \(MN 128\)](#)”: “ ..So kho ahaṃ, anuruddhā, *savitakkampi savicāraṃ samādhiṃ bhāvesiṃ, avitakkampi vicāramattaṃ samādhiṃ bhāvesiṃ, avitakkampi avicāraṃ samādhiṃ bhāvesiṃ, sappītikampi samādhiṃ bhāvesiṃ, nippītikampi samādhiṃ bhāvesiṃ, sātasahagatampi samādhiṃ bhāvesiṃ, upekkhāsahagatampi samādhiṃ bhāvesiṃ..*”

- **Translated:** “Anuruddha, I systematically cultivated the following *samādhi* in this order. *Savitakka savicāra samādhi, avitakka vicāramattaṃ samādhi* (absence of *vitakka* with a trace of *vicāra* left), *avitakka avicāra samādhi* (absence of *vitakka* and *vicāra*), *sappītikampi samādhi* (with *pīti* or joy), *nippītikampi samādhi* (absence of *pīti* or joy), *sātasahagatampi samādhi* (with only *sukha* left), and *upekkhāsahagata samādhi* (*sukha* also removed to be in the *upekkhā* state).”
- What the Buddha described above is getting to the first *jhāna* with *savitakka savicāra*, and then to the second *jhāna* with the absence of *vitakka* and *vicāra* (with *pīti* and *sukha*), third *jhāna* with just *sukha* (joy removed), and the fourth *jhāna* with *sukha* also removed and with just *upekkhā*.
- For a description of *Ariya jhāna* with *jhānāṅga* removed at each successive stage, see, “[WebLink: suttacentral: Rahogata Sutta \(SN 36.11\)](#),” for example.

Summary

14. *Saṅkhāra* are different types, so it is necessary to get an idea of how to use these basic definitions of *vitakka/vicāra, savitakka/savicāra* and *avitakka/avicāra*, in terms of different types of *saṅkhāra: puññābhisaṅkhāra, apuññābhisaṅkhāra, anenjābhisaṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra](#)” and “[Saṅkhāra – What It Really Means](#).”

- Further details in the post, “[Vacī Saṅkhāra – Saṅkappa \(Conscious Thoughts\) and Vācā \(Speech\)](#).”

15. Finally, the “[WebLink: suttacentral: Savitakkasavicāra Sutta \(SN 43.3\)](#)” clearly states that *Nibbāna* is reached (*asaṅkhatagāmi maggo*) via the following sequence. *Savitakka savicāra samādhi, avitakka vicāramatta samādhi, avitakka avicāra samādhi*.

“*Katamo ca, bhikkhave, asaṅkhatagāmimaggo? Savitakkasavicāro samādhi, avitakkavicāramatto samādhi, avitakkaavicāro samādhi—ayaṃ vuccati, bhikkhave, asaṅkhatagāmimaggo.*”

4.7.3 Jhānic Experience in Detail – Sāmaññaphala Sutta (DN 2)

March 2, 2019

Introduction

1. The *jhānic* experiences in the first four *jhāna* are clearly described by the Buddha in the “[WebLink: suttacentral: Sāmaññaphala Sutta \(DN 2\)](#).”

- There are many conceptions about what it feels like to be in different *jhānic* states. Therefore, it is good to have a description by the Buddha himself in order to get a good idea about the experience.
- It is a long *sutta*, and I will just provide the English translation for the relevant sections of *sutta*. The Pāli version can be found in the link above.

2. *Jhānic* experiences in *Ariya* and *anāriya jhānā* may have some common features, since these *jhānā* correspond to mental states of *rūpāvacara brahma* realms. However, the Buddha clearly stated that *anāriya jhāna* are “burdened” and not as peaceful as *Ariya jhānā*; see, “[Tapussa Sutta \(AN 9.41\)–Akuppā Cetovimutti](#).”

- In order to get into *jhāna*, one must transcend (elevate one’s mindset above) the sensual realms (*kāma loka*).
- This means one’s mind needs to be devoid of any sensual thoughts (*kāma rāga*) and *dasa akusala* AND focused on thoughts of renunciation and compassion (*savitakka/savicāra*). In any *sutta* describing the *jhānic* experience, there is this phrase: “So *vivicceva kāmehi, vivicca akusalehi dhammehi savitakkaṃ savicāraṃ vivekajaṃ pītisukhaṃ paṭhamaṃ jhānaṃ upasampajja viharati...*”
- Translated: “Withdrawn from sensuality, withdrawn from *akusala* thoughts, and engaged in thoughts of renunciation and compassion, he enters and remains in the first *jhāna*...”

Experience in the First *Jhāna*

3. “Withdrawn from sense pleasures, withdrawn from *akusala* thoughts, he enters and dwells in the first *jhāna*, which is accompanied by *savitakka* and *savicāra* (applied and sustained moral thoughts). His mind is filled with joy (*pīti*) and whole body is suffused and filled with bodily happiness (*sukha*) born from withdrawal from sense pleasures (*kāma*) and *akusala* thoughts. There is no part of his entire body which is not suffused by this rapture and happiness. (It should be noted that *vitakka/vicāra* or *kāma* and *akusala* thoughts are not completely removed in the first *jhāna*).

- “Great king, suppose a skilled bath attendant or his apprentice were to pour soap powder into a metal basin, sprinkle it with water, and knead it into a ball, so that the ball of soap-powder be pervaded by moisture, encompassed by moisture, suffused with moisture inside and out, yet would not trickle. In the same way, great king, the *bhikkhu* drenches, steeps, saturates, and suffuses his body with the rapture and happiness born of seclusion, so that there is no part of his entire body which is not suffused by this rapture and happiness. **This, great king, is a visible fruit of a life abstaining from *kāma* and *akusala*.**

Experience in the Second *Jhāna*

4. “Further, great king, with the **removal of *vitakka/vicāra* (but *savitakka/savicāra* remain)**, the *bhikkhu* enters and dwells in the second *jhāna*, which is accompanied by internal confidence and unification of mind, is without applied and sustained thought, and is filled with the rapture and happiness born of concentration. He drenches, steeps, saturates, and suffuses his body with this rapture and happiness born of concentration, so that there is no part of his entire body which is not suffused by this rapture and happiness.

- “Great king, suppose there were a deep lake whose waters welled up from below. It would have no inlet for water from the east, west, north, or south, nor would it be refilled from time to time with showers of rain; yet a current of cool water, seeping through underground channels, would maintain the water level, so that the entire lake is filled to the brim. In the same way, great king, the *bhikkhu* drenches, steeps,

saturates, and suffuses his body with the rapture and happiness born of concentration, so that there is no part of his entire body which is not suffused by this rapture and happiness. This too, great king, **is a visible fruit of a life abstaining from *kāma* and *akusala*.**

Experience in the Third *Jhāna*

5. “Further, great king, with the fading away of rapture (*pīti* or joy is lost), the *bhikkhu* dwells in equanimity, mindful and clearly comprehending, and experiences happiness with the body. Thus he enters and dwells in the third *jhāna*, of which the noble ones declare: ‘He dwells happily with equanimity and mindfulness.’ He drenches, steeps, saturates, and suffuses his body with this happiness free from rapture, so that there is no part of his entire body which is not suffused by this happiness.

- “Great king, suppose in a lotus pond there were blue, white, or red lotuses that have been born in the water, grow in the water, and never rise up above the water, but flourish immersed in the water. From their tips to their roots they would be drenched, steeped, saturated, and suffused with cool water, so that there would be no part of those lotuses not suffused with cool water. In the same way, great king, the *bhikkhu* drenches, steeps, saturates and suffuses his body with the happiness free from rapture, so that there is no part of his entire body which is not suffused by this happiness. This too, great king, **is a visible fruit of a life abstaining from *kāma* and *akusala*.**

Experience in the Fourth *Jhāna*

6. “Further, great king, with the abandoning of bodily pleasure (*sukha*), the *bhikkhu* enters and dwells in the fourth *jhāna*, which is neither pleasant nor painful and contains mindfulness fully purified by equanimity. He sits suffusing his body with a pure bright mind, so that there is no part of his entire body not suffused by a pure bright mind (**one’s physical body no longer is felt, and only a “white light” is discerned; that white light is the only “*rūpa*” left to be cognized**).

- “Great king, suppose a man were to be sitting covered from the head down by a white cloth, so that there would be no part of his entire body not suffused by the white cloth. In the same way, great king, the *bhikkhu* sits suffusing his body with a pure bright mind, so that there is no part of his entire body not suffused by a pure bright mind. This too, **is a visible fruit of a life abstaining from *kāma* and *akusala*.**

The *sutta* now proceeds to describe what could be further accomplished by the *bhikkhu*.

- “With his mind thus concentrated, purified, and bright, unblemished, free from defects, pliant, malleable, steady, and attained to imperturbability, he directs and inclines it to knowledge and vision. He discerns: ‘This body of mine is endowed with form, composed of the four primary elements, born from mother and father, nourished with rice and porridge, subject to inconstancy, rubbing, pressing, dissolution, and dispersion. And this consciousness of mine is supported here and bound up here.’
- In other words, the *bhikkhu* can now see the *ādīnava* (drawbacks) and the burden of carrying one's own physical body.

Essential Background to Attain *Jhāna*

7. *Sāmaññaphala Sutta* is an excellent *sutta* which also discusses **in detail** how one can setup the necessary background to attain *jhāna*.

- It is too long a *sutta* to be discussed in a post. One could read *Bhikkhu Bodhi*’s English translation to get a good idea: “[WebLink: PDF Download: The Sāmaññaphala Sutta.](#)” It is a pdf file that one can download.

8. Also note that while abandonment of the 10 types of *micchā diṭṭhi* is needed for even *anāriya jhānā*.

- *Ariya jhānā* require a level of comprehension of *Tilakkhaṇa* in addition, and thus only *Ariyā* (Noble Persons) can attain them; see, “[Tapussa Sutta \(AN 9.41\)– Akuppā Cetovimutti.](#)”

Eventual Outcomes of *Ariya* and *Anariya Jhāna*

9. Both types of *jhāna* lead to rebirth in corresponding *brahma* realms. However, those with *anāriya jhāna* will come back to the human realm at the end of lifetime there, and could be born in the *apāyā* in the future.

- On the other hand, those who have cultivated *Ariya jhānā* will never come back to *kāma loka*, let alone *apāyā*. They will attain *Nibbāna* (*Arahanthood*) in *brahma* realms.

10. This is clearly explained in the “[WebLink: suttacentral: Paṭhamanānākarāṇa Sutta \(AN 4.123\)](#)” and several other *suttā*.

For example, regarding those who have cultivated the first *anāriya jhāna*: “*Idha, bhikkhave, ekacco puggalo vivicceva kāmehi vivicca akusalehi dhammehi savitakkaṃ savicāraṃ vivekaṃ pītisukhaṃ paṭhamam jhānam upasampajja viharati. So tadassādeti, taṃ nikāmeti, tena ca vittiṃ āpajjati. Tattha ṭhito tadadhimutto tabbahulavihārī aparihīno kālam kurumāno brahmakāyikānaṃ devānaṃ saḥabyataṃ upapajjati. Brahmakāyikānaṃ, bhikkhave, devānaṃ kappo āyuppamānaṃ. Tattha puthujjano yāvatāyukaṃ thatvā yāvatakaṃ tesam devānaṃ āyuppamānaṃ taṃ sabbaṃ khepetvā nirayampi gacchati tiracchānāyonimpi gacchati pettivisayampi gacchati.*”

- **Translated:** “An individual, withdrawn from *kāma rāga*, withdrawn *akusala*, enters and remains in the first *jhāna* filled with joy (*pīti*) and whole body is suffused and filled with bodily happiness (*sukha*). If he does not lose the *jhāna* at death, he is born among the *Brahmakāyika devas*, who have a life span of an eon. **These normal humans (*puthujjano*), having used up all the life-span of those *devas*, may go to hell (*niraya*), to the animal realm, and to the state of the hungry ghosts (*peta*).”**

On the other hand, those who have attained the first *Ariya jhāna*: “*Bhagavato pana sāvako tattha yāvatāyukaṃ thatvā yāvatakaṃ tesam devānaṃ āyuppamānaṃ taṃ sabbaṃ khepetvā tasmimyeva bhava parinibbāyati.*”

- **Translated:** “But a disciple of the Blessed One, having stayed there, attains *Nibbāna* from there.”

11. The same is stated about those who have attained the second, third, and fourth *anāriya jhāna*. None of them is free from the *apāyā*.

- On the other hand, those who have cultivated *Ariya jhāna* attain *Nibbāna* from those corresponding *brahma* realms.

12. Finally, this discussion about getting rid of (or at least suppressing) any sensual thoughts or *kāma rāga* may discourage those who are new to Buddha Dhamma.

- That should not be the case; see, “[Is It Necessary for a Buddhist to Eliminate Sensual Desires?](#)” and “[Starting on the Path Even without Belief in Rebirth.](#)”

4.7.4 Ascendance to *Nibbāna* via *Jhāna* (*Dhyāna*)

October 4, 2017; #14 revised on October 5, 2017; November 15, 2017; November 30, 2018 (including #8)

1. There are three categories: One can attain *magga phala* without *jhāna*; one can attain *jhāna* and not have *magga phala*; one can attain *magga phala* and then cultivate *jhāna*. In order to sort these out, one needs to understand the difference between *Ariya* (supramundane) and *anāriya* (mundane) *jhāna*, and whether (and how) they are related to *magga phala*.

- In a series of posts based on material from the *Tiṭṭaka*, I will try to put together a consistent picture. Please let me know (lal@puredhamma.net) if I make any mistakes, because this is of great importance to everyone.
 - Even before the Buddha, ancient *yogis* cultivated *jhāna* and attained what they believed to be *cetovimutti* (liberation via calming the mind). But the Buddha showed that such *cetovimutti* is temporary; one would not attain *akuppā cetovimutti* (true and unshakable liberation) until *Nibbāna* is realized; see, “[Tapussa Sutta \(AN 9.41\)– Akuppā Cetovimutti.](#)”
2. *Nibbāna* can be approached two ways via *jhāna*: (i) through any of the *rūpavacara anāriya* (mundane) *jhāna*, (ii) first attaining the *Sotāpanna* stage and then through *Ariya* (supramundane) *jhāna*.
- Of course there is another way attain *Nibbāna*, without any *jhāna*, in *paññāvimutti* (liberation with wisdom); see below.
 - If one takes the path via *Ariya jhāna*., then one would attain *cetovimutti* and *paññāvimutti* at the same time, and is said to be an *ubhatovimutti Arahant*. This is also called *akuppa cetovimutti* or unshakable/unbreakable *cetovimutti*. That is what the Buddha attained on the night of the Enlightenment. [*ubhato* : [ind.] in both ways or sides; twofold.][It is also called ‘unshakable deliverance of mind’ (*akuppa-cetovimutti*)][*akuppa* : [adj.] steadfast; unshakable.]
 - Those *yogis* who attain *cetovimutti* via *anāriya jhāna* have not removed *avijjā anusaya*; that is why they are not liberated. They can be reborn in the *kāma loka*; see #4 below.
3. As the table below shows, the level of suffering decreases AND levels of both mundane and *nirāmisa sukha* increases as one moves successively to higher realms.
- In the post, “[The Grand Unified Theory of Dhamma – Introduction](#),” we described a model that consisted of 31 concentric “shells.” The actuality is pretty much close to that analogy, with some additional features. I have compiled a summary of the 31 realms in the table “[31 Realms of Existence](#).”
 - From those posts, it is clear that as one goes from the *apāyā* through higher *kāma loka* to *rūpa loka*, and finally to *arūpa loka*, attachments to “this world” get weaker AND actual suffering decreases too.
 - **It seems that the highest *arūpa* realm is quite close to *Nibbāna*. In a way it is — but technically it is far away too.**
4. *Yogis* like Āḷāra Kālāma and Uddakarāmaputta, who had attained highest *arūpa jhānā* at the time of the Buddha, believed that the highest *arūpavacara* state was *Nibbāna* (or final release, *vimutti*). Indeed, at that highest realm of *Ne’va saññā nā saññā*, connection to “this world” is ALMOST cutoff, and one can experience the “highest bliss” that can be attained without realizing *Nibbāna*.
- The Buddha (or rather the *Bodhisattva*), who learned to attain those highest *jhānā* from those *yogis*, realized that all living beings had attained those state many times in the rebirth process, and that is not the end of suffering.
 - He realized that until one completely removes all ten *saṃsāric* bonds (see, “[Dasa Saṃyojana – Bonds in Rebirth Process](#) “), one will never be free of ANY of the 31 realms. As discussed in that post, one SUCCESSIVELY and PERMANENTLY leaves the lowest realms (*apāyā*), higher *kāma loka* realms, and then *rūpa* and *arūpa* realms by breaking those bonds (*saṃyojana*) few at a time (by following the Noble Path).
5. However, one can TEMPORARILY enjoy the highest *arūpa* realms existence by cultivating even the corresponding MUNDANE *jhāna*, i.e., those attained without removing ANY *saṃyojana*.
- For example, while we live in this human realm we are not subjected to the harsh sufferings in the *apāyā*, and we can enjoy the sense pleasures, mixed in with some suffering.
 - In the same way, when one is born in the *rūpa* realms, one will not be subjected to the sufferings in the human realm, and the suffering is even less going from *rūpa* to *arūpa* realms.

- However, since no *saṃyojana* are broken, one can be reborn in any of the realms in the future (just like a normal human can be born in the *apāyā* in the future).

6. The easiest way to understand *jhānic* states is to examine the properties of the *rūpa* and *arūpa* realms, in comparison to those of the lower realms. The following table can be useful here.

| Realm(s) | Level of Suffering | Causes | Generation/Stopping of Saṅkhāra |
|---|--|---|---|
| Niraya (Hell) | Incessant suffering | Dosa: Killing (especially humans), torture, rapes, etc | |
| Peta (Hungry Ghosts) | Starvation | Excess greed (may I get all, not others) | |
| Vinipatha Asura | Spend time aimlessly; mostly heavy bodies not movable | Moha : <i>Thina middha, vicikicchā</i> (lazy, lacking wisdom). | |
| Animal (Tirisan: "tiri" + "san" or with all 3 causes) | Combinations of above three types | Combinations of <i>lobha, dosa, moha</i> | |
| Human (Manussa: "mana" + "ussa" or with advanced mind) | In between lower and higher realms | In between lower and higher realms | Almost all saṅkhāra responsible births in all realms occur here. |
| Deva (similar to human bodies, but much less dense) | Mostly no physical suffering and abundant sense pleasures (<i>kāma</i>). But there is mental stress. | Good <i>kamma vipāka</i> (done with <i>alobha, adosa, amoha</i>). Mental stress arises due to <i>kāma rāga</i> . | |
| Rupavacara Brahma (only <i>manomaya kāya</i> ; cannot be even seen with a microscope) | Mental stress is much reduced. Mainly <i>jhānic</i> pleasures. <i>Viparinama dukha</i> when close death. | Suppression of <i>kāma rāga</i> and cultivation of <i>rupavacara jhāna</i> (while in the human realm) | |
| Arupavacara Brahma (only <i>hadaya vatthu</i> and mind) | Only <i>arupavacara jhānic</i> pleasures. <i>Viparinama dukha</i> when close death. | Cultivation of <i>arupavacara jhāna</i> (while in the human realm) | |
| Nibbāna | Permanent release from all suffering. | Elimination of all causes for existence, i.e., <i>rāgakkhaya, dosakkhaya, mohakkhaya</i> . | Mostly attained in the human realm, but possible in higher realms, especially after the Sotāpanna stage. |

7. If you look at any *sutta* describing *Ariya jhāna*, it always starts with verse, “..*bhikkhu vivicceva kāmehi vivicca akusalehi dhammehi savitakkaṃ savicāraṃ vivekajaṃ pītisukhaṃ paṭhamaṃ jhānaṃ upasampajja viharati.*”

We can see why the above table is helpful in understanding how one gets to *jhāna* by first **abstaining from *akusala kamma* (*vivicca akusalehi dhammehi*)** and then ***kāma rāga* (*vivicceva kāmehi*)**.

- Until one abstains from *akusala kamma*, one has no hope of escaping the *apāyā*. Here abstaining does not mean complete removal.

- Until one overcomes *kāma rāga*, one has no hope of escaping the *kāma loka* and ascending to the *rūpavacara* realms.
- However, one does not need to REMOVE *kāma rāga* (with *anusaya*) in order to attain mundane (*anāriya*) *jhāna*, even up to the highest in the *arūpa loka*. This is why Alara Kalama and Uddaka Rama Putta, who are in the *arūpa* realms right now, could be even reborn in the *apāyā* in future lives.
- All one needs to do is to have the mind focused on a neutral object in order to make it free of *akusala* thoughts and *kāma rāga* while in the *jhāna*.

8. We can summarize the above conclusions in the following way:

- One who is frequently engaged in *akusala kamma* is LIKELY to be born in the 4 lowest realms (*apāyā*).
- One who is frequently engaged in *kusala kamma*, AND avoids *akusala kamma*, but has *kāmacchanda*, is LIKELY to be born in the human or the *deva* realms.
- One who abstains from *akusala kamma* and *kāmacchanda*, can cultivate *rūpavacara* or *arūpavacara jhāna*. With those ***mahaggata kusala kamma*** (*mahaggata* means higher), one WILL be reborn in *rūpa* or *arūpa loka* at the next *cuti-paṭisandhi* transition.
- However, one must not lose that *jhāna* until that moment, which means through possibly more births as a human within the current human *bhava*.
- **This also explains why some people can easily get to *jhāna*. Those had cultivated *jhāna* in recent human births within this human *bhava*.**
- However, if it is an *anāriya jhāna*, one has not been released from the *apāyā*, since one has not removed *avijjā* by comprehending *Tilakkhaṇa*.

9. **If one can stay away from *akusala* and also suppress *kāma rāga*, then one's mind AUTOMATICALLY moves to higher mental states.** In other words, one starts feeling *jhānic* pleasures (“*saṅkhāra paccayā viññāṇa*”).

- When one is striving to discard *kāma rāga*, one is said to be cultivating ***mahaggata kusala kamma***. Here one goes beyond mundane moral actions (*puñña kamma*) of giving, helping, etc, **and lose (or suppress) craving for *kāma rāga*.**
- Therefore, while *kusala kamma* lead to rebirth in higher *kāma loka* (human and *deva* realms), ***mahaggata kusala kamma*** lead to rebirth in *rūpa* and *arūpa loka*. One of course experiences those *jhānic* states in this life as well.
- The *jhānic* experiences experienced by *yogis* correspond to various *rūpa* and *arūpa* realms; see, “[31 Realms of Existence](#).” It is like one is born in the corresponding *brahma* realm for the duration of the *jhānic* experience.

10. *Mahaggata kusala kamma* can be cultivated using *Ariya* (supramundane) or *anāriya* (mundane) **meditation techniques**, and get to the same mental states (**the difference is in how one gets there and how permanent those states are**).

- Now it is easy to see that the key to cultivating the first mundane *jhāna* is to stay away from *akusala* and also to suppress sense cravings. Then one's mind will automatically pointed to the first *rūpavacara* mental state, i.e., first *jhāna*.

11. One can get to the **first *anāriya jhāna*** by maintaining one's attention on a fixed **mundane object (breath or a *kasina* object)**.

- When one does this for long periods of time and also abstains from sensual pleasures (like ancient *yogis* did), one can get in to the first *jhāna*, followed by successively higher *jhāna*, when one practices for longer times.
- The conventional breath meditation is a form of *kasina* meditation, since it focuses on the breath.

12. In fact, this is how all living beings in the lower realms get into the *Abhassara Brahma* realm when our world system (*Cakkavata*) is destroyed in a “*loka vināsaya*.” When the Sun starts heating up, fine sense objects start being destroyed, and with time less and less sensual objects will be there to trigger *kāma rāga*. All humans and animal will move to higher realms (over an *antakkappa* which lasts billions of years).

- When the human and animal realms are destroyed, all those beings would be reborn in the first *rūpa* realms. When that is gradually destroyed, they will be reborn in the next higher realm and so on, until they are all in the *Abhassara* realm.
- Even though all dense material realms are all destroyed at the end of the *loka vinasaya*, all *rūpa* and *arūpa* realms at or above the *Abhassara* realm remain intact. When the Solar system is “re-formed” after billions of years, they all gradually come down to lower realms. I will discuss this in more detail when I start explaining the *Agganna Sutta*.
- **Just like none of those living beings had removed their *anusaya* (or broken the *saṃyojana*), one engaged in mundane *jhānā* has not removed them either.**

13. On the other hand, one gets to the **first *Ariya jhāna*** by **focusing on the “cooling down” (*Nibbāna*)** that one has seen. This is normally done by reciting/contemplating the verse “*etan santan etan paneetan...*”, and also recalling one’s own experience of *Nibbāna* (cooling down).

The best example from the *Tipiṭaka* is Ven. Moggallana. We all know that Ven. Moggallana (who was *Kolita* before becoming a *bhikkhu*), attained the *Sotāpanna* stage upon hearing a single verse uttered by Ven. Assaji and then conveyed to him by Upatissa.

- Then *Kolita* (and *Upatissa*) went to see the Buddha and were ordained. It took them a week to two weeks to attain the *Arahanthood*. The [WebLink: suttacentral: Moggallana Samyutta in the Samyutta Nikāya](#) has 9 *suttā* that describe step-by-step how Ven. Moggallana attained *Ariya jhānā* one by one **starting with the first *Ariya jhāna***. Thus it is quite clear that the *Sotāpanna* stage comes before any *Ariya* (supramundane) *jhāna*.
- In particular, the very first *sutta* there describes how the Buddha came to him by *iddhi bala* and encouraged him to cultivate the **first *Ariya jhāna*** ([WebLink: suttacentral: Pathamajhāna Pañhā Sutta; SN 40.1](#)): “*..Atha kho maṃ, āvuso, bhagavā iddhiyā upasaṅkamtivā etadavoca: ‘moggallāna, moggallāna. Mā, brāhmaṇa, paṭhamaṃ jhānaṃ pamādo, paṭhame jhāne cittaṃ saṅṭhapehi, paṭhame jhāne cittaṃ ekodim karohi, paṭhame jhāne cittaṃ samādahā’ti..’*” OR “*..the Buddha came to me by *iddhi bala* and told me: Moggallana, Moggallana, Brahmana, do not become delayed, cultivate the first *jhāna*...*”
- The subsequent *suttā* in the *Moggallana Samyutta* describe how the Buddha instructed him through each successive *rūpavacara* and *arūpavacara jhāna* all the way up to *nirodha samāpatti*, where Ven. Moggallana developed all *iddhi bala* and became second only to the Buddha in supernatural powers.

14. Thus, one needs to be at least a *Sotāpanna* in order to start cultivating *Ariya jhāna*. However, one will truly be in the first *Ariya jhāna* only when one has REMOVED *kāma rāga*; see, for example, “[WebLink: suttacentral: Jhāna Sutta \(Aṅguttara Nikāya 9.36\)](#).” We will discuss this in detail in the next post.

- This means one is essentially an *Anāgāmi* by the time one is fully absorbed in the first *Ariya jhāna*. But a *Sotāpanna* could be in the vicinity of the first *Ariya jhāna*. There are three levels for a given *jhāna*: *hīna* (weak), *majjima* (middle), and *pañita* (strong).
- After that one gets to higher *Ariya jhānā* by doing *vipassana* (insight meditation) on the *anicca* nature of that *jhāna* that one is already in, i.e., by **eliminating successive *jhāna* factors** OR one may be able to attain *Nibbāna* directly from there; see, “[WebLink: suttacentral: Sallekha Sutta \(Majjhim Nikāya 8\)](#).”
- Since any *jhāna* is associated with either a *rūpa* realm or an *arūpa* realm, those states are subject to the *anicca* nature, just like everything else that belong to this world of 31 realms.

15. Those who have higher wisdom can attain even the *Arahant* stage **before** getting to any *jhāna* or from lower *Ariya* or *anāriya jhāna*; they are called *paññāvimutti Arahants*. They may cultivate (*Ariya*) *jhāna* after the *Arahanthood*, in order to seek relief until the end of the current life. *Jhānic* pleasures are the only “pleasures” recommended by the Buddha; of course, they are not sense pleasures belonging to *kāma loka*.

- It is said that those *Arahants* can cultivate all *Ariya jhāna* (and become *cetovimutti* as well) and then get into *nirodha samāpatti*, where full *Nibbānic* bliss can be experienced for up to 7 days at a time.
- Such *Arahants* are called “liberated both ways” or *ubhatovimutti*.

16. A question arises as to whether one can get into *anāriya jhāna* while cultivating *Ariya jhāna*, i.e., while following *kammatthana* that are based on contemplating the *Tilakkhaṇa* and taking *Nibbāna* as the *ārammana*. The unknown factor here is whether the meditator is really focused on those things.

- **Therefore, that is a question that can be answered only by the person in question.** Just because one is reciting *Ariya kammatthana* does not necessarily mean one will get to *Ariya jhāna*. What really matters is whether one has attained the *Sotāpanna* stage first, because one needs to keep *Nibbāna* as the *arammana*, not a worldly object (even light).
- We know that Devadatta, who had cultivated *anāriya jhāna* AND attained *iddhi* powers, finally ended up in an *apāya*. This was despite the fact that he had been exposed to the correct interpretation of *Tilakkhaṇa*; apparently he had not grasped them.
- I will discuss more on this in the next post, where I will present evidence from the *Tiṭṭaka* itself to make things clear.

17. However, *anāriya jhāna* cannot be labelled as “bad.” They are higher mental states, and those who have cultivated *anāriya jhāna* will have an easier time attaining *magga phala*. One needs to contemplate the *anicca* nature of *jhānic* states.

- One can attain any *magga phala* up to full *Nibbāna* (*Arahanthood*) **from the vicinity of ANY of the *anāriya jhāna***. This is how the 89 *citta* become 121 *citta*; see, “[The 89 \(121\) Types of Citta](#).”
- When it is said, “**from the vicinity of ANY of the *anāriya jhāna***,” that includes the vicinity of the first mundane *jhāna*, i.e., just *upacara samādhi*. This is why *jhāna* are not NECESSARY to attain *magga phala*, and it is “[Sammā Samādhi](#)” in the Noble Eightfold Path that gets to *Sammā Ñāṇa* and *Sammā Vimutti* (i.e., *Arahanthood*).

18. The key question is “If mundane and supramundane *jhāna* seem to have the same characteristics that one feels, then how does one determine whether one has attained mundane or supramundane *jhāna*?”

- As we saw above, one gets to the first *Ariya jhāna* by REMOVING *kāma rāga*, not just by suppressing as in *anāriya jhāna*, i.e., one is essentially an *Anāgāmī* if one can be fully absorbed in the first *Ariya jhāna*.
- While it may not be straight forward to determine whether one is a *Sotāpanna* or not, it is fairly easy to determine whether one is an *Anāgāmī*, who has removed all *kāma rāga*: one’s CRAVING for ALL sense pleasures (food, music, sex, etc) should not be there anymore. This DOES NOT mean, for example, one should not eat tasty foods, or that one will not taste the sweetness of sugar. But one will not have the urge to drink or to engage in sex, for example.

19. Finally, a common problem is that some people get attached to mundane *jhānic* pleasures, and get trapped there (for some people even a state of calmness is enough!). They need to realize that *anāriya* (mundane) *jhānic* states also belong to this world, and until those bonds to a given realm in this world are removed, one would remain in the rebirth process (and thus future suffering in the *apāyā* is not eliminated). **We all have attained highest *anāriya jhāna* numerous times in our deep past.**

- Those who can easily get into *anāriya* (mundane) *jhāna*, can do so most likely because they had cultivated *jhāna* in recent past lives, possibly in the current human *bhava*.

- Furthermore, those who are unable to get into even *anāriya* (mundane) *jhāna*, should not be concerned. It could just be that they had not cultivated *jhāna* in recent births. As discussed above, *jhāna* are not necessary to attain *magga phala*. **Thus there could be some people who have even attained the *Sotāpanna* stage, but may be stressed unnecessarily because of their inability to get in to *jhāna*.**

The basic layout was presented in this post. We will get into details in the upcoming posts.

4.7.5 Paññāvimutti – Arahantship without Jhāna

September 12, 2018; revised February 24, 2019

[*paññāvimutti* : [f] emancipation through insight.][[WebLink: suttacentral: Paññāvimutti Sutta \(AN 9:44\)](#)]

1. One could get to *magga phala* without ever going through *jhāna*. The Noble Eightfold Path, at its completion, takes one to *Sammā Samādhi*. Then one becomes an *Arahant* by completing the next two steps — *Sammā Ñāna* and *Sammā Vimutti* — to become an *Arahant*.

This is stated clearly in the [WebLink: suttacentral: Maha Cattarisika Sutta \(Majjhima Nikāya 117\)](#): “..*Tatra, bhikkhave, sammādiṭṭhi pubbaṅgamā hoti. Kathañca, bhikkhave, sammādiṭṭhi pubbaṅgamā hoti? Sammādiṭṭhissa, bhikkhave, sammāsaṅkappo pahoti, sammāsaṅkappassa sammāvācā pahoti, sammāvācassa sammākammanto pahoti, sammākammantassa sammāājīvo pahoti, sammāājīvassa sammāvāyāmo pahoti, sammāvāyāmassa sammāsati pahoti, sammāsatissa sammāsamādhi pahoti, sammāsamādhissa sammāñāṇaṃ pahoti, sammāñāṇassa sammāvimutti pahoti. Iti kho, bhikkhave, aṭṭhaṅgasamannāgato sekkho, dasaṅgasamannāgato Arahā hoti. Tatrapi sammāñāṇena aneke pāpakā akusalā dhammā vigatā bhāvanāpāripūriṃ gacchanti..”*

- Thus the Noble Path starts with *Sammā Diṭṭhi* and gets to *Sammā Samādhi*, at which point one is said to have completed **8 steps and is still a *sekkha* (in training): *aṭṭhaṅgasamannāgato sekkho*.**
- Then one fully comprehends the real nature with *Sammā Ñāna* and attains full release or *Sammā Vimutti* (*Arahantship*). Now, one has completed all 10 steps and is no longer in training (*dasaṅgasamannāgato Arahā hoti*).

2. **Each and every one of us have had attained *anāriya jhāna* in many births during our deep past.** Thus attaining a *jhāna* is insignificant compared to attaining a *magga phala*.

- It is also clear that even a *Sotāpanna Anugāmi* is million-fold better than one with not just the ability to get into *jhāna*, but even *abhiññā* powers, including the ability to travel through the air, create things by mind power, etc.
- Attaining *jhāna* can sometimes become a hindrance since many people get attached to *jhāna* and stop making an effort towards *magga phala*, which is sad to see.

3. It takes time to cultivate *jhāna*, **especially for those who had not cultivated them in recent past lives.** People who have high wisdom (*paññā*) may attain *magga phala* (even *Arahantship*) within a very short time, and they are called *paññāvimutti Arahants* or “wisdom-liberated.” Bahiya Daruchiriya, who attained *Arahantship* upon listening to a single verse by the Buddha is a good example; see, “[WebLink: suttacentral: Bahiya Sutta \(Udana 1.10\)](#).”

- There are many who got to *magga phala* without ever getting to a *jhāna*. Alavaka Yaksā, Upatissa, Koliṭa, Aṅgulimāla, minister Santati, and many others attained various stages of *Nibbāna* by just listening to a single *desanā*.
- The *Susima Sutta*, also called “[WebLink: suttacentral: Susimaparibbājaka Sutta \(Samyutta Nikāya 12.70\)](#)” discusses a group of *Arahants* who were *paññāvimutti Arahants*.

- In that *sutta*, the Buddha explained to Susima that there are *Arahants* without any supernormal (*iddhi*) powers, because they were *paññāvimutti Arahants*. Once attaining *Arahanthood*, they have no desire to cultivate *iddhi* (*abhiññā*) powers, since they have seen the *anicca* nature of those powers too.
4. In some exceptional cases, one may simultaneously gain *abhiññā* powers together with the *Arahanthood*, within a very short time.
- There are many who got to *magga phala* without ever getting to a *jhāna*. Alavaka Yaksa, Upatissa, kolita, Aṅgulimāla, minister Santati, and many others attained various stages of *Nibbāna* by just listening to a single *desanā*. The account of Santati can be found at: “[WebLink: tipitaka.net: Dhammapada Verse 142.](http://www.tipitaka.net/Dhammapada/Verse142)”
 - Another prominent example in the *Tiṭṭaka* is the story about the Culapanthaka Thero. He almost disrobed because he could not even memorize a single *gāthā* after trying hard for months. But with Buddha's help, he was able to attain the *Arahanthood* in a day, and simultaneously achieved *abhiññā* powers as well: “[WebLink: suttacentral.net: Cūlapanthaka.](http://www.suttacentral.net/Culapanthaka)”
5. Some argue that [WebLink: suttacentral: Sacca Vibhanga Sutta \(MN 141\)](http://www.suttacentral.net/SaccaVibhangaSutta(MN141)) states that *Sammā Samādhi* is attained ONLY WHEN one attains the first four *jhānā*. This is not correct. All one needs to do is to get to the vicinity of to ANY of those four *jhānā* (thus one could get to the *upcāra samādhi* for the first *jhāna*, for example), and attain *magga phala* from there.
- Here is the relevant verse from the above *sutta*: “..*Katamo cāvuso, sammāsamādhi? Idhāvuso, bhikkhu vivicceva kāmehi vivicca akusalehi dhammehi savitakkaṃ savicāraṃ vivekajam pītisukhaṃ paṭhamaṃ jhānaṃ upasampajja viharati, vitakkavicārānaṃ vūpasamā ajjhattam sampasādanaṃ cetaso ekodibhāvaṃ avitakkaṃ avicāraṃ samādhijam pītisukhaṃ dutiyaṃ jhānaṃ upasampajja viharati, pītiyā ca virāgā upekkhako ca viharati ... pe ... tatiyaṃ jhānaṃ ... pe ... catutthaṃ jhānaṃ upasampajja viharati, ayam vuccatāvuso: ‘sammāsamādhi’...*”
 - The key is “*upasampajja viharati,*” which means one stays close to any one of those *jhāna* (“*upa*” means close or in the vicinity), which means one can either get to that *jhāna* or can get to *upcāra samādhi* for that *jhāna*. This is why it is not labelled as “*Sammā Jhāna*” but “*Sammā Samādhi*.”
 - This becomes clear when you analyze how 89 types of *citta* become 121 *citta*, as explained below.
6. The 89 (or 121) *citta* existing in the 31 realms are discussed in “[The 89 \(121\) Types of Citta.](#)”
- There are 54 *citta* that could arise mainly in the *kamavacara* realms; 15 and 12 *citta* respectively mainly arise in the *rupāvacara* and *arupāvacara* realms respectively. The total so far is 81 *citta*.
 - **Without going through any *jhāna* at all**, there are 8 *citta* associated with the attainment of the four stages of *Nibbāna* (4 *magga citta* and 4 *phala citta*). Then the total number of *citta* is $81 + 8 = 89$.
 - Now, one can attain each *magga phala* **from the vicinity** of 5 *rupāvacara jhāna*. For example, the *Arahanthood* can be reached from the vicinity of each of those five *jhāna*. Thus in this case, the total number of *citta* becomes $81 + 40 = 121$.
 - **It is to be noted that the five *jhāna* in the terminology of *Abhidhamma* are the same as 4 *jhāna* in the terminology of the *suttā*; the first *jhāna* in *sutta* terminology is split into two in *Abhidhamma*.**
7. In *Anhidhamma*, the above explanation becomes even more clear when one looks at the *citta vūthi* to attain a *magga phala*):
- B B B B B “BC BU MD P U A G M P P” B B B B B.....
- where, B = *bhavaṅga*, BC (*bhavaṅga calana*), BU (*bhavaṅga upacceda*), MD = mind door, P = *parikamma*, U = *upacāra*, A = *anuloma*, G = *gotrabhu* (change of lineage), M = *magga citta*, P = *phala citta*.

- So, there is no *jhāna citta* preceding the *magga* or *phala citta* in the *citta vīthi* for a *magga phala*. Once one gets to the *upacāra samādhi*, it goes through *anuloma* and *gotrabhu* (change of lineage) to the *magga* and *phala citta*. This is why *upacāra samādhi* (which is *Sammā Samādhi*) is enough to attain even the *Arahanthood*.

8. On the other hand, a *citta vīthi* to attain a *jhāna*:

B B B B B “BC BU MD P U A G J” B B B B B.....

where, **J** = *jhāna citta*.

- Note that *upacāra citta* for *jhāna* is different from *upacāra citta* for *magga phala*, even though they are represented by the same symbol normally. *upacāra* means “close”, either to the *jhāna* or to *magga phala*, which are two different attainments. As we discussed earlier, *jhāna* are associated with “this world” and *magga phala* are associated with *Nibbāna*.
- **Gotrabhu (change of lineage) citta is the one that induce either a *magga phala* or a *jhāna*, and those are two very different changes: *jhāna* is just change of lineage to one of the 31 realms, whereas *magga phala* is to be dissociate from the 31 realms.**
- For a discussion on *citta vīthi*, see, “[Citta Vīthi – Processing of Sense Inputs.](#)”

9. There is another piece of strong evidence from the *Tiṭṭaka* that one does not need to attain even the **first Ariya jhāna** in order to attain the *Sotāpanna* stage. We all know that Ven.Moggallana (who was Kolita before becoming a *bhikkhu*), attained the *Sotāpanna* stage upon hearing a single verse uttered by Ven. Assaji.

- Then Kolita (and Upatissa) went to see the Buddha and were ordained. It took them a week to two weeks to attain the *Arahanthood*. The [WebLink: suttacentral: Moggallana Samyutta in the Samyutta Nikāya](#) has 9 suttā that describe step-by-step how Ven. Moggallana attained *Ariya jhānā* one by one starting with the first *Ariya jhāna*. This is conclusive evidence that one does not need to attain any *Ariya jhāna* before attaining even the *Sotāpanna* stage.
- In particular, the very first *sutta* there describes how the Buddha came to him by *iddhi bala* and encouraged him to cultivate the first *Ariya jhāna* ([WebLink: suttacentral: Pathamajhāna Pañhā Sutta: SN 40.1](#)): “..*Atha kho maṃ, āvuso, bhagavā iddhiyā upasaṅkamtivā etadavoca: ‘moggallāna, moggallāna. Mā, brāhmaṇa, paṭhamam jhānam pamādo, paṭhame jhāne cittaṃ saṅghapehi, paṭhame jhāne cittaṃ ekodiṃ karohi, paṭhame jhāne cittaṃ samādah’ ti..*” OR “..the Buddha came to me by *iddhi bala* and told me: Moggallana, Moggallana, Brahmana, do not become delayed, cultivate the first *jhāna*...”
- The subsequent *suttā* in the *Moggallana Samyutta* describe how the Buddha instructed him through each successive *rupāvacara* and *arupāvacara jhānā*, where Ven. Moggallana developed all *iddhi bala* and became second only to the Buddha in supernormal powers; see, “[Ascendance to Nibbāna via Jhāna \(Dhyāna\).](#)”

10. Therefore, one could get to the higher stages of *Nibbāna* via two paths.

- One could cultivate *jhānā* and attain successively higher *jhānā* by comprehending the *anicca* nature of those *jhānā* (as we mentioned above, they still belong to this world), and REMOVING successive *jhāna* factors.
- I will write more about this in the future, but the point is that those *jhānic* states are still subjected to both the *saṅkhāra dukkha* and the *viparināma dukkha*, even though exempt from *dukkha dukkha* temporarily.
- The second path does not require *jhāna*; *Sammā Samādhi* is enough. For those with higher levels of wisdom (*paññā*), higher stages of *Nibbāna* can be arrived without going through *jhāna*.

11. The second path is discussed in the [WebLink: suttacentral: Kimatthiya Sutta \(Aṅguttara Nikāya 11.1\)](#). Here one can start with comprehending *dukkha*, which leads to *Nibbāna* via the following steps: *saddhā*, *pīti*, *passadhi*, *sukha*, *samādhi*, *yathabhutanadassana*, *nibbida*, *viraga*, and to *vimutti*; see, “[WebLink: suttacentral: Upanisa Sutta \(Samyutta Nikāya 12.23\)](#).”

- When one starts with *lokuttara Sammā Diṭṭhi* and follows the *ariyakānta sīla* (*Sammā Vaca*, *Sammā Kammanta*, *Sammā Ajiva*), one will automatically get to *Sammā Vāyāma*, *Sammā Sati* and *Sammā Samādhi* (these three path factors constitute *Samādhi*). By the way, *Sammā Diṭṭhi* and *Sammā Saṅkappa* constitute *paññā*. So, the sequence is *paññā*, *sīla*, *samādhi*.
- That *Sammā Samādhi* is all one needs to get to *Sammā Ñāna* (ultimate wisdom) and *Sammā Vimutti* (ultimate release) and thus to attain the *Arahanthood*; fulfilling all ten factors lead to the *Arahanthood* (“*dasahangehi samannagato*”).

12. **One time a bhikkhuni asked Ven. Ānanda:** “.. ‘yāyaṃ, bhante ānanda, *samādhi* na cābhinato na cāpanato na ca sasaṅkhāraniggayhavāritagato, vimuttattā ṭhito, ṭhitattā santusito, santusitattā no paritassati. Ayaṃ, bhante ānanda, *samādhi* kiṃphalo vutto bhagavatā’ti?” OR

“*bhante ānanda*, I have this *samādhi* which is stable, without defilements, contented, joyful, and without agitation. What did the Blessed One call this *samādhi*?”

Ven. Ānanda replied: “.. ‘yāyaṃ, bhagini, *samādhi* na cābhinato na cāpanato na ca sasaṅkhāraniggayhavāritagato, vimuttattā ṭhito, ṭhitattā santusito, santusitattā no paritassati. Ayaṃ, bhagini, *samādhi* aññāphalo vutto bhagavatā’ti. *Evamsaññāpi kho, āvuso, tadāyatanaṃ no paṭisaṃvedetī’ti*,” OR,

“Yes, *bhikkhuni*, there is such a *samādhi*. The Blessed One called it *Arahant phala samādhi* that is without any defilements.”

- This is in the [WebLink: suttacentral: Ānanda Sutta \(Aṅguttara Nikāya 9.37\)](#). She was an *Arahant* and she did not even realize that!
- That *samādhi*, is *tadāyatana* or *Nibbāna*; see, “[Nibbāna “Exists”, but Not in This World.](#)”

4.7.6 Mundane versus Supramundane Jhāna

October 12, 2017; revised February 9, 2018; June 8, 2018

Here we will discuss three key *suttā* from the *Tiṭṭaka* to resolve some controversial arguments about mundane (*anāriya*) and supramundane (*Ariya*) *jhāna*. I would appreciate any comments (lal@puredhamma.net) pointing out any errors in my analysis or any suggestions.

- **February 28, 2019:** I have found several *Tiṭṭaka* references so far to *anāriya jhāna*, and a short one is discussed at the end. The post, “[Tapussa Sutta \(AN 9.41\)– Akuppā Cetovimutti](#)” clearly explains the difference between *Ariya* and *anāriya jhāna*.
- It is interesting to note that some *suttā* do not specifically label *jhāna* as *Ariya* or *anāriya*. **One has to read a given sutta carefully to figure out which jhāna are discussed, but the conclusion always is that *anāriya jhāna* are worthless by themselves unless used as a platform to attain *magga phala*; see, “[Samādhi, Jhāna, Magga Phala – Introduction.](#)”** As can be clearly seen in this *sutta*, a *Sotāpanna* can cultivate *anāriya jhāna* (i.e., without removing *kāma rāga*), and be born in lower *Brahma* realms. However, unlike those with *anāriya jhāna* without *magga phala*, that person will not come back to *kāma loka*.
- **June 8, 2018:** There are *suttā* that discuss the **critical differences**; see, “[Pathama Mettā Sutta.](#)”

1. The main characteristics and purposes of *Ariya* (supramundane) *jhāna* are described in detail in the “[WebLink: suttacentral: Jhāna Sutta \(Aṅguttara Nikāya 9.36\)](#).” The English translation ([WebLink: suttacentral: Mental Absorption](#)) at that site is not good, so I will translate most of the *sutta* here. However,

the Sinhala Translation ([WebLink: suttacentral: කොටන නිසේස ය න සුක්ඛං](#)) is much better; of course *anicca* and *anatta* are translated incorrectly there too.

- I will use key Pāli terms without translating, since anyone who is reading the post is likely to understand them. I think that would make it easier to read.

2. Now, I will translate the *sutta*, and the **numbers below** correspond to the paragraphs in the Pāli version: [“WebLink: suttacentral: Jhāna Sutta \(Ānguttara Nikāya 9.36\).”](#)

#1. *Bhikkhus*, I surely declare the removal of *āsava* (mental fermentations) via the first *jhāna*, second *jhāna*, third *jhāna*, fourth *jhāna*, *ākāsānañcāyatana*, *viññāṇañcāyatana*, *ākiñcaññāyatana*, *nevasaññānāsaññāyatana*, *saññāvedayitanirodha* (the last four are the *arūpavacara jhānic* states). Also, I have minimized wording to keep the paragraph short, just giving the meaning. [*āsava*: mental effluent, pollutant, or fermentation, (lit: influxes), ‘cankers’, taints, corruption’s, intoxicant biases. There is a list of four (as in D. 16, Pts. M., Vibh.): the canker of (wrong) views (*ditṭhāsava*), of sense-desire (*kāmāsava*), of (desiring eternal) existence (*bhavāsava*), and of ignorance (*avijjāsava*).]

- Thus the main purpose of *jhānic* states is to do insight meditation and remove *āsava*, not to enjoy that *jhānic* “pleasure” or relief. *Nibbāna* is attained via the removal of *āsava*: [“The Way to Nibbāna – Removal of Āsavas.”](#)
- There is a lot of important information in the next paragraph.

#2. *Bhikkhus*, I surely declare removal of *āsava* (mental fermentations) via the first *jhāna*. On account of what do I say that? A *bhikkhu* abstaining from sense pleasures (*viviceva kāmehi*), abstaining from *akusala*, arrives in the vicinity of the first *jhāna* and dispels cravings (*upasampajja viharati*). He thus contemplates on the **anicca nature (*aniccato*)**, **dukkha nature (*dukkhato*)**, disease-ridden nature (*rogato*), cancer-like nature (*gandato*), arrow-like nature (*sallato*), painful (*aghatato*), danger-ridden (*ābādhatato*), alien (*parato*), subject to destruction (*palokato*), an empty (*suññato*), **not-fruitful and leading to helplessness (*anatto*)** OF *rūpa*, *vedanā*, *saññā*, *sañkhāra*, *viññāṇa* (*rūpagataṃ vedanāgataṃ saññāgataṃ sañkhārāgataṃ viññāṇagataṃ*). He turns his mind away from those phenomena, and having done so, inclines his mind to *Nibbāna*: *‘etaṃ santam etaṃ paṇītam yadidaṃ sabbasañkhārasamatho sabbūpadhipaṭinissaggo taṇhākkhayo virāgo nirodho nibbāna’*ti. [“It is peaceful, it is serene, the expelling of all *sañkhāra*, breaking of bonds, removing greed and hate; *Nibbāna*”] Thus he gets rid of *āsava*. If he does not complete the removal of *āsava*, he would remove the first five *saṃyojana* and thus will be born *opapātika* (in *brahma loka*) and attain *parinibbāna* there, and will not return to this world (*No ce āsavānaṃ khayam pāpuṇāti, teneva dhammarāgena tāya dhammanandiyā pañcannaṃ orambhāgiyānaṃ saṃyojanānaṃ parikkhayā opapātiko hoti tattha parinibbāyī anāvattidhammo tasmā lokā*).

- Thus one cannot attain *Ariya jhāna* without comprehending ***anicca, dukkha, anatta*** nature of the *pañcakkhandha*.
- The common verse, “..(*pathamam*) *jhānam upasampajja viharati*..” is commonly translated as, “..enters and remains in the (first) *jhāna*...” However, “*upasampajja viharati*” (“*upa*” + “*san*” + “*pajja*”) means “abiding in the vicinity of clarifying and removing ‘*san*’”; of course ‘*san*’ are *lobha, dosa, moha* or *āsava*. The prefix “*upa*” means “near or close.” For example, “*upasampadā*” (“*upa*” + “*san*” + “*padā*”) means a *bhikkhu* has advanced and is getting close to “sorting out ‘*san*’” and thus to *magga phala*.
- Now, let us recapture the three important steps in the above paragraph: First, one gets to the *jhāna* by contemplating on a long list of faults (*ādīnava*) of the five aggregates *rūpa, vedanā, saññā, sañkhāra, viññāṇa* that make up one’s world; see, [“The Five Aggregates \(Paññakkhandha\).”](#) [*ādīnava*: m. 過患, 患難, 過失, 危難. bad consequences (suffering), difficult and dangerous situation (trouble), fault (inadvertent [not resulting from or achieved through deliberate planning] mistakes), danger and disaster (distress)]

- Once one gets to the vicinity of the first *jhāna*, one could intensify it and be fully absorbed in it, by contemplating on the relief that is already seen: ‘*etaṃ santam etaṃ paṇītam yadidaṃ sabbasaṅkhārasamatho sabbūpadhipaṭṭinissaggo taṇhākkhayo virāgo nirodho nibbānan*’*ti*. **This is the extra effort involved in cultivating *jhāna*, versus *paññāvimutti* path.** [It is peaceful, it is serene, the expelling of all *saṅkhāra*, breaking of bonds, removing greed and hate; *Nibbāna*]
- Thirdly, one can get to the higher *jhāna* by again contemplating the faults (*ādīnava*) of the five aggregates.

#3. “*Bhikkhus*, an archer or archer’s apprentice were to practice on a straw man or mound of clay, after a while he would become able to shoot long distances, to fire accurate shots in rapid succession, and to pierce great masses; in the same way, a *bhikkhu* abstaining from sensuality, abstaining from *akusala*, arrives in the vicinity (*upasampajja*) of the first *jhāna*.”

- The rest is essentially the same as in #2 above from that point onward about how *āsava* are removed by contemplating on those faults (*ādīnava*) of the five aggregates, to the following confirmation statement at the end of paragraph to emphasize the following: “*Bhikkhus*, I surely declare removal of *āsava* (mental fermentations) via the first *jhāna*.”

#4. This paragraph essentially repeats the same paragraph of #2 above, for the second, third, and fourth *jhāna*. It is interesting that even at the fourth *jhāna*, one could only be guaranteed to become an *Anāgāmī*. However, as mentioned in #2, one could attain the *Arahanthood* even from the first *jhāna*, if all *āsava* are removed, and that of course will apply to any *jhāna* through the fourth.

#5. Same verse as #3 repeated for the second, third, and fourth *jhāna*, with the paragraph ending, “..*Bhikkhus*, I surely declare removal of *āsava* (mental fermentations) via the fourth *jhāna*.”

#6 , #7. The paragraphs in #2 and #3 for the first *jhāna* are now repeated for the first *arūpāvacara jhāna*: *ākāsānañcāyatana*.

#8 , #9. The paragraphs in #2 and #3 for the first *jhāna* are now repeated for the second and third *arūpāvacara jhāna*: *viññāṇañcāyatana* and *ākīṇcaññāyatana*. Again, it is interesting that even at these higher *arūpāvacara jhānā*, one could only be guaranteed to become an *Anāgāmī*.

#10. “As for the two *saññāsamāpatti āyatana* – *nevasaññā nā saññāyatana samāpatti* and *saññāvedayitanirodho* – they remove *āsava* and will lead to the faultless state of *Nibbāna*.”

- Thus if one gets to the highest *arūpāvacara Ariya jhāna*, one will definitely attain the *Arahantship*, and also will be able to get to *nirodha samāpatti* (*saññāvedayitanirodho*).

3. That is, in essence, the complete *sutta*, which provides many key insights that have been hidden surprisingly. I almost fell off my chair when I first read it. I am not sure how and why modern translators failed to understand the importance of this *sutta*.

- Then I started reading more *suttā* and realized that these key pieces of information are in many other *suttā* as well. See, for example, “[WebLink: suttacentral: Cūla Vvedalla Sutta \(MN 44\)](#)” AND “[WebLink: suttacentral: Kāyagatāsati Sutta \(MN 119\)](#).”

4. We can learn a lot of key aspects of *Ariya jhāna* from this important *sutta*. Let us begin with the fact that one gets to the vicinity (*upasampajja*) of the first *jhāna* by contemplating the faults (*ādīnava*) of *pañcakkhandha* (*rūpa, vedanā, saññā, saṅkhāra, viññāṇa*); once getting there, one further removes *āsava* by the same process.

- Thus, one gets to *jhāna* with insight meditation (*Vipassanā*) on the unsuitability (faults of) *kāmāvacara* states, and then once getting to *jhāna*, starts doing *Vipassanā* on the unsuitability of any *jhānic* state in order to transcend that state.
- There is a long list of such faults (*ādīnava*) (from #1): *anicca* nature (*aniccato*), *dukkha* nature (*dukkhato*), disease-ridden nature (*rogato*), cancer-like nature (*gandato*), arrow-like nature (*sallato*),

painful (*aghato*), danger-ridden (*ābādhato*), alien (*parato*), subject to destruction (*palokato*), an empty (*suññato*), not-fruitful and leading to helplessness (*anatto*).

5. Therefore, the main goal at any given *Ariya jhāna* is to contemplate on all those faults (*ādīnava*) of that state — thus move to the next higher state — and to finally arrive at *Nibbāna* at the last (8th) *jhāna*. Of course, one could completely remove all *āsava* and attain *Nibbāna* from any lower *jhāna*.

- If one attains *Nibbāna* from a lower *jhānic* state (below the highest *arūpāvacara jhāna*), one is said to attain *paññāvimutti*. If one goes through to that highest *jhāna* and attains *Nibbāna*, one is said to have attained *akuppā cetovimutti*. I will have a separate post on this.
- While the word “*jhāna*” has come to common use, a better word is “*dhyāna*” (ධ්‍යාන in Pāli and ද්‍යාන in Sinhala, meaning “burning”).
- We will stick with the word “*jhāna*” instead of “*dhyana*” since it is in common use. It is just useful to know where the meaning comes from.

6. It is obvious that one can think clearly in any *jhāna*. Even intermittent *vitakka/vicāra* (“wheeling around” with stray thoughts) will be absent after the second *jhāna*, i.e., one is in the *avitakka/avicāra* (free of *vitakka/vicāra*) mode after the second *jhāna*; I will discuss *jhānanga* or *jhāna* factors in a future post.

- This is why *Ariya jhāna* are helpful in insight (*Vipassanā*) meditation. The mind becomes clear when more and more *saṅkhāra* are removed as one proceeds to higher *jhāna* states.

7. Even though the relief experienced in *Ariya jhāna* is the only “enjoyment” recommended by the Buddha, that is not the main purpose of *Ariya jhāna*. That is because if one gets attached to a *jhāna*, one is not able to move up to the higher one. In any case, it is mainly those who get to *anāriya jhāna*, get attached to them (**however, it is possible to attain any stage of *magga phala* even with *anāriya jhāna* or even without any *jhāna***). If one has seen the *anicca* nature, one would not get attached to a *jhāna*.

- In that context, in a previous post it was discussed that any *jhānic* state is a mental state corresponding “this world”; see, “[Ascendance to Nibbāna via Jhāna \(Dhyāna\)](#).”

8. *Pancanīvarana* are also completely removed at the first *Ariya jhāna*. From the [WebLink: suttacentral: Mahāvedalla Sutta \(Majjhima Nikāya 43\)](#): “.. *Idhāvuso, paṭhamaṃ jhānaṃ samāpannāssa bhikkhuno kāmacchando pahīno hoti, byāpādo pahīno hoti, thinamiddhaṃ pahīnaṃ hoti, uddhaccakukkuccaṃ pahīnaṃ hoti, vicikicchā pahīnā hoti...*”

- There are many *suttā* that clearly state such conditions for the first **supramundane** *jhāna*.
- In contrast, neither the five *saṃyojana* nor the *pañcanīvaraṇa* are removed in any **mundane** *jhāna*. The reasons are obvious: none of the *kilesa* (*klesha*/defilements) can be removed by taking a neutral object as the *ārammaṇa*.

9. This is why the Buddha told Ven. Saddhā: “..*Ājānīyajhāyitaṃ kho, saddhā, jhāya; mā khaḷunkajhāyitaṃ..*”, OR “Saddhā, cultivate the *ājānīya* (thoroughbred horse) *jhāna*, not the *khalunka* (mule) *jhāna*”: [WebLink: suttacentral: Saddhā Sutta \(Aṅguttara Nikāya 11.9\)](#).

- In the [WebLink: suttacentral: Sutta Central translation](#), *khalunka* is translated as a colt (a young horse). But the correct translation is a mule. As described in the *sutta*, a mule is lazy and useless, compared to a thoroughbred horse.
- As described in the *sutta*, one who cultivates mundane *jhāna* takes worldly objects (*kasīna*, breath) as *ārammaṇa*, and even though can attain *jhāna*, will not have the respect of the *devas* who can see the *ārammaṇa*.
- On the other hand, *devas* cannot see the *ārammaṇa* (*Nibbāna*) of those who have cultivated *Ariya jhāna*, and they pay to him from a distance.

10. Therefore, there is a HUGE difference in HOW one arrives at a given *jhāna*.

- One using the *anāriya* path gets to *jhānā* by focusing one's mind on a mundane object, i.e., an object belonging to this world (for example, one's own breath or a *kasina* object) and/or by contemplating on mundane moral thoughts (benevolent, kind, etc); we will discuss this in the next post.
- One on the Noble Path, on the other hand, arrives there by contemplating on *Nibbāna*, i.e., the *anicca, dukkha, anatta* nature of this world of 31 realms. One may or may not get to *Ariya jhāna* that one can get into *samāpatti* (meaning uninterrupted *jhāna*, where the *jhāna citta* runs continuously without break), before getting to the *Arahanthood*.
- However, *jhāna sukha* is the only *sukha* recommended by the Buddha, since sense pleasures will bind one to the *kāma loka*. It is said that some *paññāvimutta Arahants* cultivate *jhāna* after attaining *Arahanthood*.

11. Also see the previous post where it is discussed how Ven. Moggallana cultivated the first *jhāna* after attaining the *Sotāpanna* stage: "[Ascendance to Nibbāna via Jhāna \(Dhyāna\)](#)."

- One who can get fully absorbed in the first *Ariya jhāna* will be born in the *Suddhāvāsa* realms of the *rūpa loka*, and will not come back to the *kāma loka*, i.e., one is an *Anāgāmī*, as clearly stated in the *Jhāna Sutta* and several other *sutta* (REF).
- On the other hand, one who cultivates **mundane first *jhāna*** will be born in the **first *rūpāvacara Brahma* realm in the next birth**, but in later rebirths could be even born in the *apāyā* (since *kāma rāga* was only suppressed, not removed).

12. One can get into mundane (*anāriya*) *jhāna* via such breath or *kasina* meditation, and one could do *Vipassanā* from such mundane *jhānic* states.

- But the problem is, in many cases, people get addicted to those states and are unable to see the *anicca* nature of them.

13. In contrast to the above *suttā* (and more that I found) on *Ariya jhāna*, I found other *suttā* that discussed *anāriya jhāna*. **In none of these *suttā*, there was a specific label saying *Ariya jhāna* or *anāriya jhāna***. However, one can clearly see which is which when reading text.

- In the following reference, it is clearly stated that *kāma raga* is only suppressed (***vikkhambhanato***) in all *rūpāvacara* and *arūpāvacara jhāna*. On the other hand, it states that *kāma raga* is removed (***samucchedato***) in stages via *magga phala*.
- The difference between ***vikkhambhana pahāna*** and ***samuccheda pahāna*** is discussed in, "[Suffering in This Life – Role of Mental Impurities](#)."

The following are the two relevant passages from the *Khuddaka Nikāya, Mahāniddeśa, Aṭṭhakavagga*: [WebLink: suttacentral: 1. Kāmasuttaniddeśa](#) . There is no English translation there, but the Sinhala translation is given: [WebLink: suttacentral: කම භවනවිමුක්තිය](#) .

Paṭhamaṃ jhānaṃ bhāventopi vikkhambhanato kāme parivajjeti ... pe ... dutiyaṃ jhānaṃ bhāventopi ... tatiyaṃ jhānaṃ bhāventopi ... catutthaṃ jhānaṃ bhāventopi ... ākāsañāñcāyatanasamāpattiṃ bhāventopi ... viññāṇañcāyatanasamāpattiṃ bhāventopi ... ākiñcaññāyatanasamāpattiṃ bhāventopi ... nevasaññānāsaññāyatanasamāpattiṃ bhāventopi vikkhambhanato kāme parivajjeti. Evaṃ vikkhambhanato kāme parivajjeti.

- Translated: "***kāma***" is suppressed (***vikkhambhanato***) in the first *jhāna*, ...to *nevasaññānāsaññāyatana* (highest *arupavacara jhāna*). As we saw above, *kāma* is removed even before getting to *Ariya jhāna*. Thus, only *anāriya* (mundane) *jhāna* are meant here.
- I hope to discuss in detail the "[WebLink: suttacentral: Tapussa Sutta \(AN 9.41\)](#)" as another example.

Kathaṃ samucchedato kāme parivajjeti? Sotāpattimaggaṃ bhāventopi apāyagamaṇīye kāme samucchedato parivajjeti, sakadāgāmiṃmaggaṃ bhāventopi oḷārike kāme samucchedato parivajjeti, anāgāmiṃmaggaṃ bhāventopi anusahagata kāme samucchedato parivajjeti, arahattamaggaṃ

bhāventopi sabbena sabbaṃ sabbathā sabbaṃ asesam nissesam samucchato kāme parivajjeti. Evaṃ samucchato kāme parivajjetī—yo kāme parivajjeti.

- Translated: “*kāma*” is removed (*samucchato*) in stages via the *Sotāpanna*, *Sakadāgāmi* stages and is removed at the *Anāgāmi* stage; it is removed without a trace at the *Arahant* stage.

14. The following *sutta* clearly state the difference between *Ariya* and *anāriya jhānā*.

WebLink: [suttacentral: Pathamanānākarana Sutta \(AN 4, 123\)](#): “*Idha, bhikkhave, ekacco puggalo vivicceva kāmehi vivicca akusalehi dhammehi savitakkaṃ savicāraṃ vivekajaṃ pītisukhaṃ paṭhamam jhānam upasampajja viharati. So tadassādeti, taṃ nikāmeti, tena ca vittiṃ āpajjati. Tattha ṭhito tadadhimutto tabbahula-vihārī aparihīno kālaṃ kurumāno brahmakāyikānaṃ devānaṃ saḥabyataṃ upapajjati. Brahmakāyikānaṃ, bhikkhave, devānaṃ kappo āyuppaṃānaṃ. Tattha puthujjano yāvataṃyukaṃ thatvā yāvatakaṃ tesam devānaṃ āyuppaṃānaṃ taṃ sabbaṃ khepetvā nirayampi gacchati tiracchānayanimpi gacchati pettivisayampi gacchati. Bhagavato pana sāvako tattha yāvataṃyukaṃ thatvā yāvatakaṃ tesam devānaṃ āyuppaṃānaṃ taṃ sabbaṃ khepetvā tasmimyeva bhava parinibbāyati. Ayaṃ kho, bhikkhave, viseso ayaṃ adhippayāso idaṃ nānākaraṇaṃ sutavato ariyasāvakaṃ assutavatā puthujjanena, yadidaṃ gatiyā upapattiyā sati.*”

Translated: “There is the case where an individual, withdrawn from sensuality (*kāma*), withdrawn from *akusala*, enters & remains in the first *jhāna*: rapture & pleasure born from withdrawal, accompanied by directed thought & evaluation. He savors that, longs for that, finds satisfaction through that. Staying there—fixed on that, dwelling there often, not losing the *jhāna*—then when he dies he is born with the *devas* of Brahma’s retinue. The *devas* of Brahma’s retinue, monks, have a life-span of an eon. **A run-of-the-mill person having stayed there, having used up all the life-span of those *devas*, goes to hell, to the animal realm, or to the state of the hungry ghosts. But a disciple of the Blessed One, having stayed there, having used up all the life-span of those *devas*, attains *Parinibbāna*.** This, monks, is the difference, this the distinction, this the distinguishing factor, between a Noble disciple and a normal person who had not heard the Noble Truths (*assutavatā puthujjanena*), in regards to the *gati* and birth.”

- When one attains the first *Ariya jhāna*, one has become an *Anāgāmi*. He/she will be born in that *Brahma* realm and will attain *Parinibbāna* there, as clearly stated in the above *sutta*.
- In other words, *kāma rāga* is to be completely REMOVED to get to the first *Ariya jhāna*. It is only temporarily suppressed (*vikkhambana pahāna*) for the *anāriya jhāna*.
- Even some followers of *Waharaka Thero* in Sri Lanka do not seem to understand this point. However, *Waharaka Thero* has clearly explained this in the following short *desanā* (in Sinhala): “[WebLink: Ariya and Anariya Jhāna \(Audio\)](#).”

4.7.7 Nirodha Samāpatti, Phala Samāpatti, Jhāna, and Jhāna Samāpatti

February 13, 2018

1. *Nirodha samāpatti* and various *phala samāpatti* are different, and they are very different from *jhāna* and *jhāna samāpatti*.

- The first two are related to *Nibbāna*. *Jhāna* belong to “this world.” *Jhānā* are basically the mindsets that *rūpāvacara* and *arūpāvacara brahmā* enjoy.

2. Before starting the discussion, I would like to emphasize the following. Concepts that deals with in this post, as well as that of *Nibbāna* (*Arahanthood*, in particular), are virtually impossible to imagine for most people. However, there could be a few people who have studied these concepts in detail and have some “nagging questions”, and hopefully this information will be helpful.

- These concepts are contrary to ideas that normal humans are familiar with. Normal humans crave for things in the material world so much, it is almost impossible to rationalize why one would want to stop the rebirth process (i.e, to attain the *Arahanthood*). Therefore, it is a waste of time to spend too much time

thinking about such abstract concepts, at least until one gets to the *Sotāpanna* stage; these concepts really start making sense only when one gets closer to the *Anāgāmi* stage.

- In the same way, it is hard to imagine for a normal human how *nirodha samāpatti* (where all thoughts are stopped) can provide happiness. This is why I have explained in the “*Nibbāna*” subsection that *Nibbānic* bliss is NOT a feeling of a pleasure (that would involve the *vedanā cetasika*, and thus would belong to this world). It is more like the sense of relief one would feel when a long-lasting migraine headache goes away.
- With that out of the way, let us start the discussion.

3. First, it is important point to remember is that life is maintained by *kammic* energy, not via *citta vīthi*. Therefore, *kammaja kaya* is present at ALL TIMES. *Kammaja* (“*kamma*” + “*ja*”) means “*kamma* created.”

- The *kammaja kaya* or the *gandhabba* (*hadaya vatthu* plus the five *pasāda rūpa*) is created at the *cuti-paṭisandhi* moment. The blueprint for our physical body is in the *kammaja kaya* (*gandhabba*), and thus the physical body grows according to the *kammaja kaya* (*gandhabba*).
- When one’s *kammaja kaya* for the present *bhava* runs out of *kammic* energy, a new *kammaja kaya* matching the next *bhava* is initiated by *kammic* energy for the new *bhava*, at the *cuti-paṭisandhi* moment.

4. Therefore, each of us has had a *kammaja kaya* corresponding to most of the realms in this world from a time that cannot be traced to a beginning!

- For those who are not familiar with those terms can use the “Search box” to find relevant posts. For example, we have four types of “*kaya*”: *kammaja*, *cittaja*, *utuja*, and *karaja kaya*. That last one is our physical body. Such a physical body is absent in *rūpāvacara* and *arūpāvacara* realms (basically just the *gandhabba*).

5. *Cittaja kaya* means the flow of *citta vīthi*. *Citta* arise in the *hadaya vatthu* in the *kammaja kaya*.

- *Citta* always run in “packets” or *vīthi*. Each *pancadvara citta vīthi* ALWAYS has 17 *citta*.
- A *manodvāra citta vīthi* normally has 10-12 *citta*. However, as we mentioned above, when in a *samāpatti*, *manodvāra citta vīthi* can run continuously. Therefore, there is no set upper limit to the number of *manodvāra citta* running continuously when in a *samāpatti*.
- The mind could be in different types of *bhavaṅga* states in between *manodvāra/pañcadvāra citta vīthi*.

6. While the *kammaja kaya* is active AT ANY TIME, there CAN BE GAPS in the *cittaja kaya*.

- *Bhavaṅga* is a “state of mind” other than *bhavaṅga citta* that sometimes come inside a *citta vīthi*; see, “[Bhava and Bhavaṅga – Simply Explained!](#)”
- When in a *bhavaṅga* state, there are no *citta vīthi* running, so there are not even universal *cetasika* present. One just knows that one is living, but there is no thought object (*ārammana*).
- So, when the mind is in a *bhavaṅga* state, there are no *citta vīthi* running. But the mind is “on” and one knows that one is living. It is just that no *citta vīthi* running inside a *bhavaṅga* state.
- A crude analogy of the *bhavaṅga* state is a TV set that is not tuned to a station. We can see flickering of white dots on the screen and hear a background “hum.” But there is no picture. So, the mind is “on” but has no thought object.
- When an *ārammana* comes to the mind, the mind captures that sound, picture, smell, etc. That is like that TV being tuned to a station and one can see the picture.

7. The main difference between any *samāpatti* and *jhāna* is that *jhāna citta* do not run continuously. When one is in a *jhāna*, *jhāna citta vīthi* are interrupted by *pañcadvāra citta vīthi* running in between.

Pañcadvāra citta vīthi are those coming through the five physical senses. Therefore, when one is in *jhāna*, one can see, hear, etc.

- But when one is in any type of *samāpatti*, the corresponding *manodvāra citta vīthi* run continuously. Therefore, there is no opportunity for *pañcadvāra citta vīthi* to run, and thus one in a *samāpatti* is totally unaware of the external environment.

8. One could also be in a *jhāna samāpatti*. In this case also, there are no *pañcadvāra citta vīthi* interrupting the flow of *jhāna citta vīthi*. One in a *jhāna samāpatti* also will not see, hear, smell, etc.

- It is with practice that one who can get into *jhāna* can develop the ability to get into *jhāna samāpatti*. As one cultivates the *jhāna*, there will be less and less *pañcadvāra citta vīthi* coming in between successive *jhāna citta vīthi*. Initially, only 2-3 *jhāna citta vīthi* flow before a *pañcadvāra citta vīthi* comes in. With practice, one could be experiencing *jhāna citta vīthi* continuously for hours.

9. However, in the *asaññā* realm, there is no *cittaja kaya* or even a *bhavaṅga* state. **One does not even know that one is alive.** There is a fine physical body that is kept alive by *kammic* energy. So, the *kammaja kaya* is there.

- This is why the Buddha said it is a waste of time to get a birth in the *asaññā* realm by cultivating *asaññā* meditation techniques. One will live in the *asaññā* realm for 500 *mahā kalpa* (that is trillions of years), and just comes back to the human realm and start all over.
- In a previous post I provided evidence that *viññāṇa* cannot exist without a *rūpakkhanda*. However, *rūpakkhanda* can exist without *viññāṇa*.
- If we become unconscious for some reason, that is like living in the *asaññā* realm during that time. There is no *bhavaṅga* state there either. Life is maintained by the *kammaja kaya* via an active *rūpa jivitindriya* (not the *jivitindriya cetasika*).

10. When one is in a *phala samāpatti*, that *phala citta* runs continuously.

- For example, if one is in the *Sotāpanna phala samāpatti*, one has the *Sotāpanna phala citta* running continuously. If one is in the *Arahant phala samāpatti*, the *Arahant phala citta* runs continuously.

11. When one is in *nirodha samāpatti*, there are no *citta vīthi* or a *bhavaṅga* state. It is just like in the *asaññā* realm.

- But of course, there is huge difference between *nirodha samāpatti* and being in the *asaññā* realm. One who can get to *nirodha samāpatti* has removed ALL DEFILEMENTS (and thus *avijjā*), but one in the *asaññā* realm has not. So, at the end of the life in the *asaññā* realm, that person would come back to the human realm and can be reborn even in the *apāyā* in later rebirths.
- This point actually explains why it is so peaceful not to have any *citta* running through the mind. That is the closest explanation that can be given to a normal human as to how having no *citta* can be so peaceful. But this is hard even to imagine for a normal human, as I mentioned at the beginning. Those who cultivate *jhāna*, and get to higher *jhānic* states, can start seeing that this is true. That is why they cultivate *jhāna* all the way up to the 8th *jhāna* (*neva saññā nā saññā*).

12. *Nirodha samāpatti* is succinctly described in a verse in the [WebLink: suttacentral: Mahāvedalla Sutta \(MN 43\)](#), where the difference between a dead body and the body of one in *nirodha samāpatti* is described: “*Yvāyaṃ, āvuso, mato kālaṅkato tassa kāyasaṅkhārā niruddhā paṭippassaddhā, vacīsaṅkhārā niruddhā paṭippassaddhā, cittasaṅkhārā niruddhā paṭippassaddhā, āyu parikkhīṇo, usmā vūpasantā, indriyāni paribhinnāni. Yo cāyaṃ bhikkhu saññāvedayitānirodhaṃ samāpanno tassapi kāyasaṅkhārā niruddhā paṭippassaddhā, vacīsaṅkhārā niruddhā paṭippassaddhā, cittasaṅkhārā niruddhā paṭippassaddhā, āyu na parikkhīṇo, usmā avūpasantā, indriyāni vipasannāni. Yvāyaṃ, āvuso, mato kālaṅkato, yo cāyaṃ bhikkhu saññāvedayitānirodhaṃ samāpanno—idaṃ nesaṃ nānākaraṇaṃ”ti..*”

Translated: “*āvuso*, a dead body does not generate any *kāyasaṅkhārā*, *vacīsaṅkhārā*, or *cittasaṅkhārā*; its lifetime expired and it does not breathe, and the body gets cold with all sense organs dead. But that *bhikkhu* in *saññāvedayita-nirodha samāpatti*, even though his *kāyasaṅkhārā*, *vacīsaṅkhārā*, and *cittasaṅkhārā* all have ceased, and does not breathe, his body does not get cold and all sense organs are kept alive. This, *āvuso*, is the difference between a dead body and that *bhikkhu* in *nirodha samāpatti*.”

- Since all *saṅkhāra* are stopped, there are no *citta* with even the universal *cetasika* when in *saññāvedayita nirodha samāpatti*.
- This also clarifies that *saññāvedayita* means without any *saññā* or *vedanā*.

13. Not all *Arahants* can get into *nirodha samāpatti*. Access to *nirodha samāpatti* is NOT by taking *Nibbāna* as the thought object, but via the 8th *jhāna*. As one gets to higher *jhāna*, number of *cetasika* in a *citta* get smaller, i.e., *citta* become less and less “burdened.”

- An *Arahant* has to cultivate all the *jhānā*, and get to the 8th *jhāna* (*neva saññā nā saññā*). **The *neva saññā nā saññā* state is just a step away from stopping the arising of *citta vīthi*.**
- From that state, the *Arahant* can make a determination of how long to stay in *nirodha samāpatti*, and make the transition from the *neva saññā nā saññā* state to *nirodha samāpatti*.
- While *anāriya yogis* can get to the *neva saññā nā saññā* state, I am not certain whether they can make the transition to *nirodha samāpatti*. Furthermore, I vaguely remember hearing in a *desanās* from *Waharaka Thero* that an *Anāgāmī* who has cultivated the eight *jhānā* can get into *nirodha samāpatti*.

14. The “[WebLink: suttacentral: Pañcakaṅga Sutta \(SN 36.19\)](#)” also clarifies another important point. If there are no *citta* flowing with *saññā* or *vedanā*, when one is in *saññāvedayita nirodha samāpatti*, how can one say that it is the ultimate happiness (*Nibbanic* bliss)?

- *Nibbanic* bliss is not a *cetasika vedanā*, which would belong to this world. I have compared it to the relief one feels when a long-experienced migraine headache finally goes away; see, the *Nibbāna* subsection.

The above *sutta*, in the last verse, put it this way: “*Ṭhānaṃ kho panetaṃ, ānanda, vijjati yaṃ aññatitthiyā paribbājakā evaṃ vadeyyuṃ: ‘saññāvedayitanirodhaṃ samaṇo gotamo āha, taṅca sukhasmiṃ paññapeti. Tayidaṃ kiṃsu, tayidaṃ kathaṃsū’ ti?*”

Evaṃvādino, ānanda, aññatitthiyā paribbājakā evamassu vacanīyā: ‘na kho, āvuso, bhagavā sukhaññeva vedanaṃ sandhāya sukhasmiṃ paññapeti. Yattha yattha, āvuso, sukhaṃ upalabbhati, yaññiṃ yaññiṃ taṃ taṃ tathāgato sukhasmiṃ paññapeti’” ti.”

Translated: “It may happen, Ānanda, that Wanderers of other sects will be saying this: ‘The recluse Gotama speaks of the *saññāvedayita nirodha* and describes it as pleasure. What is this pleasure and how is this a pleasure?’

“Those who say so, should be told: ‘The Blessed One describes as pleasure **not only the feeling of pleasure**. But a *Tathāgata* describes as pleasure whenever and wherein so ever it is obtained.’”

15. No *citta vīthi* run in *nirodha samāpatti*, and *bhavaṅga* state is not present either. Life in the body is maintained with *kammic* energy. No *vedanā*, *saññā*, etc. Maximum time in *nirodha samāpatti* is 7 days. The *Arahant* can make a determination before getting into *nirodha samāpatti*, as to how long (up to 7 days) to stay in that state.

- *Parinibbāna* state is just like *nirodha samāpatti*. The only difference is that there is no “coming back” to this world upon entering *Parinibbāna*.

- Therefore, *Arahants* tend to get to *nirodha samāpatti* whenever possible, in order to experience the “*Nibbānic bliss*”, and to get away from the “burdensome worldly thoughts.” As I said, it is hard for normal humans to imagine this.

16. In other types of *samāpatti* (other than the *nirodha samāpatti*), *manadvāra citta vīthi* will flow continuously. There is no falling to *bhavaṅga* or to take an external object with a *pañcadvāra citta vīthi*. Thus one cannot see, hear, etc. Normally, *samāpatti* will eventually break on its own or (when one gets good at it) one can pre-set the time to be in *samāpatti*.

- *Arahant phala samāpatti* is where an *Arahant* experiences the *pabhassara citta*, a pure *citta* with just the universal *cetasika*, where the *saññā cetasika* is not contaminated. *Nibbāna* is the thought object made contact with *phassa cetasika* and *vedanā* and *saññā* are based on that (we have no idea about that). There, one does not hear, see, anything either, just like in *jhāna samāpatti*.
- When an *Arahant* is not in *nirodha samāpatti* or *Arahant phala samāpatti*, his/her *citta* get only to the “*mano*” state, in the sequence that normally ends up in the *viññāṇakkhandha* state for a normal human; see #4 of “[Pabhassara Citta, Radiant Mind, and Bhavaṅga.](#)”

17. Hopefully, that should cover the questions raised in the discussion forum under the topics: “[WebLink: Nirodha Samāpatti](#),” “[WebLink: Difference between “Arahant phala samāpatti” and “Nirodha samāpatti” ?](#),” and “[WebLink: Nirodha Samāpatti and Amoha.](#)”

- If there are more questions on this and related issues, please ask them under the topic “[WebLink: Difference between “Arahant phala samāpatti” and “Nirodha samāpatti” ?](#).” I am going to close the other two topics, in order to not have too many parallel and related discussions.
- Please also include any references **from the *Tipiṭaka***, for above descriptions. This post was put together from what I have heard from Waharaka Thero’s *desanās*, and I will also add references as I come across them in the *Tipiṭaka*.

4.8 Mental Body – Gandhabba

4.8.1 Our Mental Body – Gandhabba

December 26, 2016; revised February 1, 2020

Introduction

1. Grasping the message of the Buddha requires two essential ingredients. (i) **It is easier done with a mind that has less defilements** (*kilesa* or *keles* or *klesha*), (ii) **One needs to go beyond learning mundane interpretations of crucial concepts.**

- If those two conditions are satisfied, grasping deeper Dhamma concepts will not be a difficult task. If one can comprehend — not merely to memorize — the key concepts, it becomes easy to avoid getting the “*viparīta saññā*” or the “incorrect impression” of a given concept. [*viparīta* : [adj.] reversed; changed; wrong.]
- This process gradually leads to the comprehension of “*anicca saññā*” that is the key to the *Sotāpanna* stage of *Nibbāna*.
- In this post, we will start a discussion that will lead to a better explanation of “*saññā*” (which is one of the five aggregates) generally translated as “perception.”

Mental Body Is Primary and Physical Body Is Secondary

2. Here we will discuss how we grasp a given concept using any one of many human languages that are in use today.

- It is essential to understand that the mental body (*manomaya kāya* or *gandhabba*) is primary — initiating all our thoughts, speech, and actions. The physical body that we value so much is secondary.
- **While our brains help us grasp what is expressed in a given language (and we have to learn a given language), a *gandhabba* can understand that message directly — without using a brain or eyes, ears, etc. that are associated with the physical body.** The *gandhabba* — when outside the physical body — can see and hear without using eyes and ears, and grasp what is expressed by thoughts of other beings **directly** (where allowed by their *kammic* potential).

- *Gandhabbas* — and most living beings — communicate among themselves via “*saññā*.” There is no “spoken language” involved since they cannot “talk” like we do. See, “[Ghost 1990 – Good Depiction of Gandhabba Concept.](#)”
- That is somewhat similar to how we experience dreams. We do not use our ears to hear in the dreams. We “perceive” what others say in our dreams. That is the closest analogy with how a *gandhabba* hears when outside a physical body. Seeing is the same way. In dreams, we don’t use our eyes to see; our eyes are closed when we dream. **Both hearing and seeing are done just with the *sota* and *cakkhu pasāda rūpa* and the mind.**

Why Do We Highly-Value Our Physical Bodies?

Of course, until a Buddha comes to this world and explains the existence of a mental body, we would not be even aware of that distinction. Even today, scientists believe that the physical body is all we have and that our thoughts arise in the inert brain!

3. We crave ourselves physical bodies because we enjoy sense pleasures associated with smells, tastes, and body touches.

- **However, to experience those three types of sensory contacts, our mental bodies need to be trapped inside physical bodies.** We pay the price for those sense enjoyments because those physical bodies are subject to rapid and unexpected decay and also have relatively short lifetimes around 100 years.
- Furthermore, when the mental body is enclosed or trapped inside a physical body, it loses the ability to see external objects directly, hear external sounds, and also recall *dhamma* (memories/concepts). **All six sensory inputs now need to be processed by the brain and be converted to a form (“*saññā*”) that can be grasped by the trapped mental body (*gandhabba*).** For a more in-depth analysis, see “[Brain – Interface between Mind and Body.](#)”
- The sense of smell, taste, or body touches are not available to beings in the higher 20 (*Brahma*) realms. Those *Brahma* have mental bodies (with just a trace of matter) just like our *gandhabbas*. **Just like those *Brahmā*, the *gandhabbā* cannot sense smell, taste, or body touches, but can “directly see, hear, and grasp concepts” without the aid of a brain when outside a physical body.**
- Please contemplate and grasp what is meant by those statements before proceeding further.

The “Mental Body” Lives Much Longer!

4. Another critical factor is the difference between the lifetime of a physical body and that of a mental body (*gandhabba*).

- A human *gandhabba* that is born at the *cuti-paṭisandhi* moment can live for many hundreds to many thousands of years. Within a given “human *bhava*,” there can be many repeated births as a human with a human body; see, “[Bhava and Jāti – States of Existence and Births Therein.](#)”
- When a physical body dies (and if more *kammic* energy for the human *bhava* remains), that *gandhabba* comes out of the dead body and waits for a suitable womb to re-enter and make a **new human body**. This process can happen many times during a given human *bhava*. Each time a different physical body is acquired by the *gandhabba*, as discussed below.
- **Therefore, it makes more sense to focus on the well-being of the mental body (*gandhabba*) than on the short-lived physical body.**

Some Exceptions To The Above Rules

5. There are a few exceptions to the above process.

- If one commits a *ānantariya pāpa kamma* (killing a parent, for example), the *gandhabba* that comes out of a dead physical body “cannot survive.” Because of that strong *kamma vipāka*, it undergoes a *cuti-paṭisandhi* moment and will be instantaneously born in an *apāya* suitable for that strong *kamma*.
- If one develops *Ariya* or *anāriya jhāna*, then this also becomes a “good” *ānantariya kamma* and one will be born in a *brahma* realm (corresponding to the highest *jhānic* state attained) by skipping the remaining human births. However, those who get to *brahma* realms via *anāriya jhānā* will come back to human or lower realms. Any *Ariya* (starting with a *Sotāpanna*) who attains *Ariya jhānā* will never come back to *kāma loka*. Of course, a *Sotāpanna* (*Sakadāgāmi*) without *Ariya jhānā* will be reborn human (*deva*) realms.
- That is also why an *Arahant* is not reborn, even if there is *kammic* energy left over for the human *bhava*. The *gandhabba* that comes out “cannot bear” the mindset of an *Arahant*, and will instantaneously undergo a *cuti-paṭisandhi* moment. Still, since an *Arahant* will not grasp a new *bhava*, he/she will not be reborn.
- Those above cases — where the human *bhava* prematurely terminated — is similar to the burning of a heater coil used in an immersion heater, when the heated coil comes out of the water. As long as the heater coil is in the water, it can “bear” the heat. But once out of the water, the heater coil will quickly burn out. The physical human body has the unique capability of being able to “bear” any of those states discussed above.

Why Are Most People Not Aware of The *Gandhabba* Concept?

6. Even though there is no discussion about the *gandhabba* in Buddhaghosa's *Visuddhimagga*, it is a critical concept in Buddha Dhamma. The Buddha compared a *gandhabba* coming out of a physical body, to a sword being pulled out of the sheath. That *gandhabba* is sometimes called a *Tirokuddha* in *Suttā*.

- People with *abhiññā* powers can move the *gandhabba* out of the physical body at will.
- Some people had cultivated *abhiññā* powers in recent previous births and can do it at will even though they have less control over the mental body. One can float to the ceiling and watch one's physical body lying on the bed, for example. Furthermore, during heart operations, the *gandhabba* can come out and view the process from the above, and provide details about it later. See. “[Out-of-Body Experience \(OBE\) and Manomaya Kāya.](#)”

7. The *gandhabba* has only a trace of matter; it cannot be seen or touched, even though it has a trace of matter. It is our mental body or *manomaya kāya*.

- This mental body is like a fine mesh spread throughout the physical body with the seat of the mind (*hadaya vatthu*) overlapping the physical heart.
- If that mental body comes out of the physical body, the physical body becomes as inert as a piece of wood (as a dead body is).

How Can a “Mental Body” Control a Heavy Physical Body?

8. Let us start by addressing some fundamental objections that you may have on the concept of a mental body controlling the physical body. First, how can a mental body move a heavy physical body?

- A good analogy is to compare it to how a human operator controls a heavy military tank from the inside of that enclosed tank. There the human operator plays the role of the *gandhabba*.
- The human operator, of course, does not have enough energy to move the tank. He merely controls the direction of the movement by instructing the on-board computer. **The power to move the tank comes from the fuel stored in the military tank.**
- In the same way, the mental body (*gandhabba*) instructs the brain to generate required bodily movements or speech. Here, the brain plays the role of the computer in the military tank analogy. The

small amount of energy needed for the *gandhabba* comes from the *kammic* power that led to human *bhava*. **The energy for actual bodily movements (including speech) comes from the food we eat.**

- Back in the 17th century, French philosopher Rene Descartes proposed that there is an immaterial mind that controls the material body. But this proposal had a major problem of explaining how an immaterial-mind causes a heavy material body to move.
- The Buddha –2600 years ago — had described how this actually happens, as discussed above. More details are in the “[Origin of Life](#)” section.

Details of The “Operator Analogy”

9. In the above analogy, the operator is totally shielded from the external world. He can monitor the outside environment only via the audio and video equipment mounted on the tank. The video cameras, for example, feed in videos to an on-board computer, which analyzes and displays it on a monitor for the operator to see.

- In the same way, our physical eyes send a picture to our brain, which analyzes them, converts to a form (“*saññā*”) that can be “seen” — or comprehended — by the *gandhabba* inside. So, **our brain is the computer** that conveys the information to the *gandhabba* that is really trapped inside the solid physical body; see, “[Brain – Interface between Mind and Body.](#)”
- The *gandhabba* accesses the other four physical sensory inputs the same way, with the help of ears, tongue, nose, and the body.
- Our memories, future plans, etc (all mental) are also “out there” (in the *mano loka*) but, of course, cannot be seen. They are collectively called “*dhamma*”; see, “[What are Dhamma? – A Deeper Analysis.](#)” *Gandhabba* accesses those with the help of the *mana indriya* in the brain, which is the sixth sense input (like eyes for seeing, ears for hearing, etc.), and has not been identified by science yet.
- The *mano loka* co-exists with the *rūpa loka* (material world); see, “[Our Two Worlds: Material and Mental.](#)”

How Does A *Gandhabba* Hear When Outside a Physical Body?

10. Another possible question is: “How does the *gandhabba* see and hear when outside the human body?”

- It is only in the human (and animal) realms that beings communicate via speech (and bodily gestures). In other realms, living beings communicate directly via *saññā*, one of the five aggregates (*pañcakkhandha*). While not all living beings can communicate with all other (it depends on each realm), where it is possible, communications take place via *saññā* generated in one’s thoughts.
- This experience is similar to one’s experience with dreams. **In a dream, we do not “hear” what others say in the same way when we hear speech normally. In a dream, we perceive what they are saying.**
- That is how those with *abhiññā* powers (even a few of us with *gati* from previous lives where they had such *abhiññā* skills in recent lives) can communicate with beings in other realms.

Why DO PEOPLE HAVE Different Bodies in Successive Human Lives?

11. It is the “same” *gandhabba* that is born with human bodies in successive human lives. Then another question may arise, “Why do people look different in successive rebirths?” That is because the physical body in each human life (within the same human *bhava*) arise with contributions from the parents for that life.

- Even though the *gandhabba* brings in his/her *gati* (habits), *āsava* (cravings), *kilesa* (mental impurities), etc from the previous life, the **physical body** for each birth has significant contributions from the new parents.

- Therefore, the DNA of the physical bodies of two successive lives could be different due to this reason. The building of a new physical body is described in the post, "[What does Buddha Dhamma \(Buddhism\) say about Birth Control?](#)"
- Even then, a *gandhabba* needs to match the *gati* of the parents.

One Can Travel to *Deva* or *Brahma* Realms With the *Manomaya Kāya*

12. Another interesting piece of information comes from how the Buddha (and others with *Iddhi Bala*) traveled to *deva* or *Brahma loka* with the *manomaya kāya*. Here the physical body is left behind (the physical body does not die in this case, and is kept alive by the *rūpa jīvitindriya*). Upon returning, the *manomaya kāya* can re-enter the physical body.

- Those who attain the fourth *jhāna* can develop *iddhi* powers to be able to separate the *manomaya kāya* from the physical body. Then they can travel far with that *manomaya kāya*. Just as a sword comes out of its sheath, those with *iddhi* powers can pull the *manomaya kāya* out of the physical body.
- *Suttā* state that the Buddha visited *deva* or *brahma lokas* “within the time that takes a bent arm to be straightened.”
- It is also possible for some of those with *iddhi* powers to travel with their physical bodies. That involves a different mechanism that is not relevant to this discussion.

Connection to “Astral Travel”

13. Even today, some ordinary people can dissociate their mental body from the physical body and can “astral travel.” That *manomaya kāya* can then go to distant places within short times (this is what is called astral travel in the present day; see the Wikipedia article, "[WebLink: WIKI: Astral projection.](#)")

- A *gandhabba* is the same as an “astral body” that is described in such accounts; see, for example, “Journeys Out of the Body: The Classic Work on Out-of-Body Experience,” by Robert Monroe (1992). There are two sequels to that book, as well as books by others. Accounts in at least some of those books are consistent with the above mechanism.
- Also, the *gandhabba* can come out of the physical body under stressful conditions, in particular during heart operations. Many such accounts by a cardiologist have been documented in the book, “Consciousness Beyond Life,” by Pim van Lommel (2010).

Explanation of the “Time Gap” Between Two Successive Human Births

14. Many rebirth account features can be explained by the correct interpretation where the *manomaya kāya* (*gandhabba*) inherits many successive (but time separated) physical bodies.

- In rebirth stories, there is always a “time gap” between successive human births (*jāti*). That time gap can be several years or at least few years. In between those successive lives, that life-stream lives as a *gandhabba*, without a physical body.
- In most rebirth stories, the previous human life was terminated unexpectedly, like in an accident or a killing. Therefore, the *kammic* energy for the human *bhava* had not been exhausted. And the *gandhabba* just came out of the dead body and waited for another womb to enter.
- The Buddha told Vacchagotta that the *gandhabba* survives that intervening time by using *taṇhā* as *āhāra*. Some *gandhabbas* can “inhale” aroma from plants, fruits, etc., too.

Further Information

15. If one has been following — and trying to “live” the moral life recommended in the previous posts in the “[Living Dhamma](#)” section — it would be easier to follow the upcoming posts as we will be diving a bit deeper.

- One aspect of realizing the *anicca* nature is to see the futility of expecting to have a “future happy life” by trying to make one’s physical body to be the “main focus.”
- It is essential to keep one’s body in good condition by eating well and by engaging in a good exercise program, it is ALSO important to realize that this body will only last about 100 years. On the other hand, the mental body or the *gandhabba* can last many hundreds of years.
- Thus one should try to improve the condition of the mental body (*gandhabba*) by cultivating good *gati* and getting rid of bad *gati*.
- A detailed analysis of life, in general, is in the “[Origin of Life](#)” section.

4.8.2 Gandhabba State – Evidence from Tipiṭaka

September 16, 2017; revised September 30, 2107; November 14, 2018; August 31, 2019

Introduction

I will present extensive evidence from the *Tipiṭaka* that the *gandhabba* state is a necessary feature of human (and animal) *bhava*. It is not an *antarābhava* (a state “in between two *bhava*”). It is within the same human *bhava*.

- **One’s mental body (*gandhabba* or *manomaya kāya*) controls the physical body.**
- *Gandhabba* state remains through many successive human births within a given human *bhava* (which can last many hundreds of years). When a given physical body dies, the *gandhabba* is directed into another womb, when a matching one becomes available. Rebirth stories confirm this account.
- However, the *gandhabba* concept is different from the concept of a “soul.” A *gandhabba* will keep changing during its lifetime. Furthermore, it will make a drastic change when the lifetime of the human *bhava* comes to an end.

Background

1. At the Third Buddhist Council, Moggaliputta Tissa *Thero* proved that there is no *antarābhava* in a debate with the *Mahāyānist*s. That correct interpretation is in the *Kathavatthu* of the *Tipiṭaka*.

- Most current *Thervādins* erroneously believe that *gandhabba* state is an “*antarābhava*” state. That is not correct; see, “[Antarābhava and Gandhabba](#)” and “[Cutī-Patisandhi – An Abhidhamma Description.](#)”
- **A human *gandhabba* exists within the human *bhava*.**

2. A critical factor that contributes to this erroneous belief that the *gandhabba* state is an “*antarābhava*” is the inability to distinguish between *bhava* and *jāti*. **They erroneously believe that *paṭisandhi* takes place in the womb.** But it is evident in the *sutta* passages above, that it is *okkanti* (of the *gandhabba*) that happens, not *paṭisandhi*.

- A human existence (*bhava*) could last many hundreds or even thousands of years. Many human births (*jāti*) can take place during that time; see, “[Bhava and jāti – States of Existence and Births Therein.](#)”
- In rebirth stories, there is always a “time gap” (of typically several years) between successive human births (*jāti*). In between those successive lives, that lifestream lives as a *gandhabba*, without a physical body.

- Even during a given human life (*jāti*), the *gandhabba* may come out of the physical body under certain conditions, see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”
- It is the human *bhava* that is hard to attain (“[How the Buddha Described the Chance of Rebirth in the Human Realm](#)”). However, within a given human *bhava*, there can be many births until the *kammic* energy for that human *bhava* runs out. Otherwise, how can one explain all these rebirth stories, where a human is reborn only a few years after dying in the previous human life?

3. I understand the reluctance of many to discard the deeply embedded idea that *gandhabba* is a *Mahāyāna* concept. I used to have that wrong view too. But as I have discussed above, many things will be left unexplained, and there will be many inconsistencies without it.

- Most importantly, rejecting the idea of a *gandhabba* (i.e., the existence of a *para loka*) is a *micchā diṭṭhi*. Thus one cannot even become a *Sotāpanna Anugami* with that *micchā diṭṭhi*; see, “[Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage](#)” and “[Hidden World of the Gandhabba: Netherworld \(Para Loka\)](#).” So, I would urge everyone to sift through the evidence carefully and make an informed decision.
- More evidence is in many other posts at the site. There are two subsections on *gandhabba*: “[Mental Body – Gandhabba](#)” and “[Gandhabba \(Manomaya Kāya\)](#).”
- One can also use the “Search” box on top right to locate all relevant posts by typing “gandhabba.”
- A simple description of the human conception, according to Buddha Dhamma is at: “[Buddhist Explanations of Conception, Abortion, and Contraception](#).” It could be useful to read that first.

Three Conditions for Conception per *Suttā*

4. The Buddha has described how three conditions must be satisfied for a conception to occur. That includes how a *gandhabba* (nominative case singular is *gandhabbo*; plural is *gandhabbā*) descending to the womb. For example, in the [WebLink: suttacentral: Mahā Tanhāsankhaya Sutta \(Majjhima Nikāya 38\)](#): “..*Tiṇṇaṃ kho pana, bhikkhave, sannipātā gabbhassāvakkanti hoti. Idha mātāpitaro ca sannipatitā honti, mātā ca na utunī hoti, gandhabbo ca na paccupaṭṭhito hoti, neva tāva gabbhassāvakkanti hoti. Idha mātāpitaro ca sannipatitā honti, mātā ca utunī hoti, gandhabbo ca na paccupaṭṭhito hoti, neva tāva gabbhassāvakkanti hoti. Yato ca kho, bhikkhave, mātāpitaro ca sannipatitā honti, mātā ca utunī hoti, gandhabbo ca paccupaṭṭhito hoti—evaṃ tiṇṇaṃ sannipātā gabbhassāvakkanti hoti. Tamevaṃ, bhikkhave, mātā nava vā dasa vā māse gabbhaṃ kucchinaṃ pariharati mahatā saṃsayena garubhāraṃ...*”

Here is the [WebLink: suttacentral: English translation from the Sutta Central website](#) (I have slightly modified it): “..*Bhikkhus, the descent to the womb takes place through the union of three things. Here, there is the union of the mother and father, but the mother is not in season, and the **gandhabba is not present**—in this case no descent of an embryo takes place. Here, there is the union of the mother and father, and the mother is in season, but the **gandhabba is not present**—in this case too **no embryo can result**. All three following conditions must be met. Union of the mother and father, the mother is in season, and a **gandhabba is present. That leads to** the formation of an **embryo**. The mother then carries the embryo in her womb for nine or ten months with much anxiety, as a heavy burden..”*

- Even though the venerable *Bhikkhus* who manage the Sutta Central website do not believe in the concept of a *gandhabba*, they have at least correctly translated most of the Pāli verse.
- By the way, the Sutta Central site is a useful resource. It provides access to not only the Pāli version but also translations into several languages. I encourage everyone to contribute to that website to maintain that valuable database.
- One needs to keep in mind that some critical Pāli terms are translated are mistranslated there. Those include *anicca* as impermanence and *anatta* as “no-self.” Furthermore, translating

complex Pāli words like *viññāṇa* and *saṅkhāra* as just single words in English can lead to serious problems.

5. In the [WebLink: suttacentral: Assalāyana Sutta \(Majjhima Nikāya 93\)](#), there is more evidence that for conception to occur, a *gandhabba* needs to descend to the mother's womb at the right time. That needs to happen within a few days of the union of parents, and it needs to be during the mother's season.

Here, the Buddha explains to Assalayana how the seer Asita Devala questioned seven *brahmanā* who had the wrong view that they were heirs to *Mahā Brahmā*. Here are the questions that seer Asita Devala asked:

“*Jānanti pana bhonto—yathā gabbhassa avakkanti hotī'ti?*”

- “But do you, sirs, know-how there is conception in the womb?”

“*Jānāma mayaṃ, bho—yathā gabbhassa avakkanti hoti 'ti. Jānāma mayaṃ, bho – yathā gabbhassa avakkanti hoti. Idha mātāpitāro ca sannipatitā honti, mātā ca utunī hoti, gandhabbo ca paccupaṭṭhito hoti; evaṃ tiṇṇaṃ sannipātā gabbhassa avakkanti hotī'ti.*”

- ‘We do know, sir, how there is conception. There is coitus of the parents, it is the mother's season, and a *gandhabba* is present; it is on the conjunction of these three things that there is conception.’

“*Jānanti pana bhonto—taggha so gandhabbo khattiyo vā brāhmaṇo vā vesso vā suddo vā'ti?*”

- “But do you, sirs, know whether that *gandhabba* is a noble or *brahman* or merchant or worker?”

“*Na mayaṃ, bho, jānāma—taggha so gandhabbo khattiyo vā brāhmaṇo vā vesso vā suddo vā'ti.*”

- “We do not know, sir, whether that *gandhabba* is a noble or a *brahman* or a merchant or a worker.”

Therefore, the concept of a *gandhabba* was accepted even by other *yogis* at Buddha's time.

6. In the [WebLink: suttacentral: Mahā Nidana Sutta \(Dīgha Nikāya 15\)](#): “*..Viññāṇapaccayā nāmarūpan'ti iti kho panetaṃ vuttaṃ, tadānanda, imināpetam pariyāyena veditabbaṃ, yathā viññāṇapaccayā nāmarūpaṃ. Viññāṇaṅca hi, ānanda, mātukucchismiṃ na okkamissatha, api nu kho nāmarūpaṃ mātukucchismiṃ samuccissathā'ti? “No hetam, bhante.” “Viññāṇaṅca hi, ānanda, mātukucchismiṃ okkamitvā vakkamissatha, api nu kho nāmarūpaṃ itthattāya abhinibbattissathā'ti? “No hetam, bhante.”*”

Translated: “..With consciousness as condition there is mentality-materiality (*nāmarūpa*). How that is so, Ānanda, should be understood in this way: If *viññāṇa* were not to **descend** into the mother's womb, would mentality-materiality (*nāmarūpa*) take shape in the womb?” “Certainly not, venerable sir.” “If, the **descended *viññāṇa* were to depart**, would mentality-materiality be generated into this present state of being?” “Certainly not, venerable sir.”

- Here, is it clear that by “a *viññāṇa* descending to the womb,” the Buddha meant the descend of the *manomaya kāya* (*gandhabba*), not the *paṭisandhi citta*. A *paṭisandhi viññāṇa* cannot come out (depart) of the womb! In #7 below, we will present evidence that the other four *khandhas* always accompany *viññāṇa*. That includes the *rūpakkhanda* (and a *gandhabba* has all five *khandhas*).
- The Pāli word “*Okkanti*” is often mistranslated as “rebirth.” But it means the “descend” of an already formed *manomaya kāya* (*gandhabba*). Rebirth happens (and a *gandhabba* is born) within a thought moment, at the *cuti-paṭisandhi* moment; see, “[Cutī-Patisandhi – An Abhidhamma Description](#).”

More Details from *Suttā*

7. In the [WebLink: suttacentral: Kutuhala Sutta \(Samyutta Nikāya 44.9\)](#), Vacca asked the Buddha, “*..Yasmiṅca pana, bho gotama, samaye imaṅca kāyaṃ nikkhipati, satto ca aññataraṃ kāyaṃ anupapanno hoti, imassa pana bhavaṃ gotamo kiṃ upādānasmim paññāpetī'ti?* OR “..and, Master

Gotama, when a being has given up this body but has not yet been reborn in another body, what food does it consume?"

- The Buddha answered, “..*Yasmim̐ kho, vaccha, samaye imañca kāyaṃ nikkhipati, satto ca aññataram̐ kāyaṃ anupapanno hoti, tamahaṃ tañhūpādānaṃ vadāmi.*” OR “..When, Vaccha, a being has given up this body but has not yet been reborn in another body, I declare that it uses craving as food.”
- Thus when a *gandhabba* leaves one physical and is not yet reborn in another body, its life is sustained by *tañhā* (craving). That is similar to *rūpi brahma* making use of *pīti* (mental happiness) as food. Both *gandhabbā* and *rūpi brahmā* have subtle bodies (smaller than an atom in modern science; only a few *suddhaṭṭhaka*). However, some *gandhabbā* can inhale *odors* for food and become relatively more dense.

8. In the [WebLink: suttacentral: Sangiti Sutta \(Digha Nikāya 33\)](#), it is described how a *gandhabba* can enter a womb in four ways: “..*Catasso gabbhāvakkantiyo. Idhāvuso, ekacco asampajāno mātukucchiṃ okkamati, asampajāno mātukucchismiṃ ṭhāti, asampajāno mātukucchimhā nikkhamati, ayaṃ paṭhamā gabbhāvakkanti. Puna caparaṃ, āvuso, idhekacco sampajāno mātukucchiṃ okkamati, asampajāno mātukucchismiṃ ṭhāti, asampajāno mātukucchimhā nikkhamati, ayaṃ dutiyā gabbhāvakkanti. Puna caparaṃ, āvuso, idhekacco sampajāno mātukucchiṃ okkamati, sampajāno mātukucchismiṃ ṭhāti, asampajāno mātukucchimhā nikkhamati, ayaṃ tatiyā gabbhāvakkanti. Puna caparaṃ, āvuso, idhekacco sampajāno mātukucchiṃ okkamati, sampajāno mātukucchismiṃ ṭhāti, sampajāno mātukucchimhā nikkhamati, ayaṃ catutthā gabbhāvakkanti.*”

Translated: “..Four ways of **entering the womb**. Herein, *bhikkhus*, one descends into the **mother's womb** unknowing, abides there unknowing, departs thence unknowing. This is the first class of conception. Another descends deliberately, but abides and departs unknowing. Another descends and abides deliberately, but departs unknowing. Lastly, another descends, abides and departs **knowingly**.”

- This is the **okkanti** (descending of the *gandhabba*) into the womb (*gabbha*), as described in the *Mahā Tanhasankhaya Sutta* discussed above.
- Almost the same description is also given in the “[WebLink: suttacentral: Sampasādanīya Sutta \(Digha Nikāya 28\)](#).”

9. It is a *Bodhisattva* in the last birth that, “.. descends, abides and departs the womb knowingly”, the fourth way of entering a womb, mentioned above.

- In the [WebLink: suttacentral: Mahāpadāna Sutta \(Digha Nikāya 14\)](#): “..*Atha kho, bhikkhave, vipassī bodhisatto tusitā kāyā cavitvā sato sampajāno mātukucchiṃ okkami. Ayamettha dhammatā.*”
- Translated: “..Now *Vipassī bodhisattva, bhikkhus*, left the *Tusita* realm and **descended** into his mother's womb mindful and knowingly. That is the **rule**.”
- At the *cuti-paṭisandhi* moment in the *Tusita* realm, the *deva* died and a human *gandhabba* was born, who entered the mother's womb on Earth.
- By the way, this *sutta* describes in detail the last seven Buddhas including Buddha Gotama, who have appeared in our *cakkāvāta* within the past 31 *mahā kappa* (great eons). English translation of the *sutta* at Sutta Central provides a useful summary in a table [WebLink: suttacentral: English translation of the Sutta at Sutta Central](#).
- However, in this *sutta*, *gabbhāvakkantiyo* and *okkami* are translated incorrectly at Sutta Central.

Patisandhi Viññāṇa Same as Gandhabba

10. In the *Bija Sutta* ([WebLink: suttacentral: Samyutta Nikāya 22.54](#)), it is clear that *viññāṇa* cannot “travel” without the other four aggregates, including the *rūpakkhanda*: “..*Yo, bhikkhave, evaṃ vadeyya: ‘ahamaññatra rūpā aññatra vedanāya aññatra saññāya aññatra saṅkhārehi viññāṇassa āgatim̐ vā*

gatiṃ vā cutiṃ vā upapattiṃ vā vuddhiṃ vā virūhiṃ vā vepullaṃ vā paññāpessāmi'ti, netañ
ṭhānaṃ vijjati."

“*Bhikkhus*, I say that it is impossible for *viññāṇa* to exist, to grow, and to move at rebirth in the absence of form, feeling, perception, and *saṅkhāra*..”

- Therefore, the descending of a *paṭisandhi viññāṇa* to a womb MUST be accompanied by all five *khandhas*, which is the *kammaja kaya* of the *gandhabba*. *Viññāṇa* can never exist without a *rūpa*; even the *Brahmā* in *arūpa* realms have *hadaya vatthu*, a *suddhaṭṭhaka* made of *cattāro mahā bhūta*.

Antarāparinibbaya State and Gandhabba

11. The first seven *samyojana* include *kāma rāga*, *rūpa rāga*, and *arūpa rāga*. In the absence of those three *samyojana*, one cannot be reborn in any of the 31 realms in the *kāma*, *rūpa*, and *arūpa loka*. For a discussion on *samyojana*, see, “[Dasa Samyojana – Bonds in Rebirth Process](#).”

- When a person dies, the *gandhabba* comes out of the dead body. If that person had removed the first seven *samyōjana* by the time he dies, that *gandhabba* could not grasp a *bhava* in any of the 31 realms.
- However, since the last three *samyojana* of *māna*, *uddhacca*, *avijjā* are still there, that person will not be able to attain *Parinibbāna* either. In other words, *gandhabba* cannot die either.
- Then “that person” will remain in the *gandhabba* state until his *kammic* energy for the human *bhava* runs out. This is called the “*Anatarāpainibbāyāni*” state.
- Th described in the “[WebLink: suttacentral: Samyojana Sutta \(Aṅguttara Nikāya 4:131\)](#): “..*Katamassa, bhikkhave, puggalassa orambhāgiyāni samyojanāni pahīnāni, upapattipaṭilābhiyāni samyojanāni pahīnāni, bhavapaṭilābhiyāni samyojanāni appahīnāni? Antarāparinibbāyissa.*”
- The first 5 *samyojanā* are called *orambhāgiyā samyojanā*. *Rūpa rāga* and *arūpa rāga* are collectively called *upapattipaṭilābhiyā samyojanā*, and *māna*, *uddhacca*, *avijjā* are collectively called *bhavapaṭilābhiyā samyojana*.

There are many posts on *gandhabba*: “[Mental Body – Gandhabba](#),” “[The Grand Unified Theory of Dhamma](#),” and “[Gandhabba \(Manomaya Kāya\)](#).”

4.8.3 Antarābhava and Gandhabba

July 29, 2016; revised January 23, 2020

Title pronunciation:

[WebLink: Listen to Pronunciation: Antarabhava and Gandhabba](#)

What is Antarābhava?

1. There are many misinterpretations about the term “*Antarābhava*.” Just two to three hundred years after the *Parinibbāna* of the Buddha, Mahayanists started saying that there is an *antarābhava*, because they thought *gandhabba* belonged to an *antarābhava*.

- At the Third Buddhist Council, Moggaliputta tissa *Thero* proved that there is no *antarābhava* in a debate with the Mahayanists. That correct interpretation is in the *Kathavatthu* of the *Tiṭṭaka*.

2. *Antarābhava* (“*antara*” + “*bhava*,” where *antara* is “in-between”) means in between *bhava* or existences. For example, when a living being in the human *bhava* exhausts its *kammic* energy for that human existence, it grasps a new existence (*bhava*) at the *cuti-paṭisandhi* moment. Suppose the next existence or *bhava* is existence as a deer, for this example.

- The transition from a human existence to an existence as a deer happens in a billionth of a second from the *cuti citta* (dying moment in the human *bhava*) to the *paṭisandhi citta* (first thought-moment in the existence as a deer).
- **Therefore, indeed there is no *antarābhava*.** The time-lapse from the *cuti citta* to the *paṭisandhi citta* is negligibly small; see, “[Cuti-Patisandhi – An Abhidhamma Description](#).” **This was the point made by Moggaliputta Tissa Thero at the Third Buddhist Council:** there is no “*antarābhava*” between the “human *bhava*” and the “deer *bhava*” in the above example.
- *Gandhabba* is in the same “human *bhava*” until the *kammic* energy for the human *bhava* runs out (which could be many hundreds of years, compared to about 100 years of a lifetime for a human). In between successive human births within that human *bhava*, it is the *gandhabba* that lives in “*para loka*”; see, “[Hidden World of the Gandhabba: Netherworld \(Para Loka\)](#).”

***Bhava* and *Jāti* Are Two Different Things**

3. **The critical point is that *bhava* and *jāti* are two different things.** That is why in *Paṭicca Samuppāda*, there is a step, “*bhava paccayā jāti*.” There can be many “*jāti*” or births as a human within a single human *bhava*; see, “[Bhava and Jāti – States of Existence and Births](#).”

- Living beings in human and animal realms are not born with fully-formed physical bodies. In all other 29 realms, beings are born with fully-formed bodies, which are called *opapātika* or instantaneous births. Thus a *deva* or *Brahma* is born with fully-formed bodies.
- That means a *deva* or *brahma* will have the same body during that *bhava*, even though that body will change. **For them, there are only ONE *jāti* within that *bhava*.**

Humans (and Animals) Have Many *Jāti* Within That *Bhava*

4. In our example above, a human could have *kammic* energy supporting that human existence (*bhava*) for even thousands of years. However, a physical human body can last only for about 100 years.

- **The *kammic* energy of a human *bhava* is not in the physical body (*karaja kāya*), but is in the “mental body” or the *manomaya kāya* of the *gandhabba*.** There is a whole section on the *gandhabba* at this site; see, “[Gandhabba \(Manomaya Kāya\)](#).”
- As explained in the post, “[Manomaya Kāya \(Gandhabba\) and the Physical Body](#),” a *gandhabba* will inherit “many physical bodies” during a given human existence.
- As discussed in the post, “[Ghost in the Machine – Synonym for the Manomaya Kāya?](#),” the physical body is inert, and it is the *gandhabba* that “gives life” to that inert body.

Āyukkhaya Maraṇa* and *Kammakkhaya Maraṇa

5. This is why the death of the physical body does not necessarily mean that there is a *cuti citta* at that dying moment of a human; i.e. one is NOT released from the human *bhava*. One will lose the human *bhava* only if it is a “*kammakkhaya maraṇa*” or death where the *kammic* energy is exhausted (“*marāṇa*” in Pail or Sinhala is for death).

- But most human deaths are “*āyukkhaya maraṇa*,” i.e., the end of life for the physical body (here “*āyu*” means lifetime); there is still more *kammic* energy for the human *bhava* left. **There is no *cuti citta* at that time.** In that case, there is no change in the *gandhabba* at the moment of death of the physical body.
- That *gandhabba* would come out of the dead body and wait for another womb.

6. Thus if it is an “*āyukkhaya maraṇa*,” the *gandhabba* comes out of that dead body and waits for another womb. It is improbable that there will be a matching womb appearing exactly at the death of a human

physical body. In most cases, the *gandhabba* has to wait months and more likely years before a matching womb becomes available (*gati* of the *gandhabba* have to match those of the parents).

- Most deaths due to accidents are not due to “*kammakkhaya maraṇa*,” i.e., just the physical body dies. The human in question will be reborn with a new human body. That is why many rebirths accounts describe death in a previous life due to an accident, murder, etc.
- Of course one could die with *āyukkhaya maraṇa* even at old age.

Mahāyāna Concept of *Anatarābhava*

7. Now, the reason that the Mahāyānists say that there is an *antarābhava* is that they believe that the *gandhabba* is not human and is an “in-between state.”

- The irony is that many current Therāvādins even refuse to believe the EXISTENCE of a *gandhabba*, simply because they do not want to be seen as taking the side of the Mahāyānists. Those Therāvādins believe that when a human dies — and is going to be reborn human — the second human fetus start INSTANTANEOUSLY in a womb. In other words, the previous human dies at the *cuti* moment, and a billionth of a second later appears as a new baby in a human womb (*paṭisandhi*).
- However, that approach leads to many inconsistencies: (i) That kind of timing is an impossibility. (ii) The step “*bhava paccayā jāti*” in *Paṭicca Samuppāda* does not make sense: Is that new human birth a new *bhava*?. (iii) *Paṭisandhi* or grasping a new *bhava* happens within a thought moment, while birth of a human body occurs via a series of steps described in #8 below. (iv) As discussed in #9 – #11 below, rebirth accounts are also not compatible with rebirth occurring in the womb. (v) There is more evidence from the *Tipiṭaka* as discussed in #12, #13 below.

A Physical Human Body Versus *Manomaya Kāya (Gandhabba)*

8. According to the *Tipiṭaka*, a full-pledged human appears via a series of steps: *jāti*, *sanjāti*, *okkanthi*, *abhinibbanthi*, *khandhānan pātilabho*, *āyatanan pātilabho*. See, “[Manomaya Kāya \(Gandhabba\) and the Physical Body.](#)”

- Here, *jāti* is the *paṭisandhi* moment, when the *kammaja kāya* for the new *bhava* appears in a thought-moment. Moments later, that *kammaja kāya* is augmented by the *cittaja kāya* and a *utuja kāya* and a *manomaya kāya (gandhabba)* results. That is the *sanjāti* moment. This *gandhabba* comes out of the dead body in the previous life (*bhava*).
- When that *gandhabba* goes into a suitable womb, that is the *okkanthi* moment. In many *suttā*, that is described as “*viññāṇa* of a boy or girl descending into a womb.” Note that by the time descending into a womb, the sex is already determined. It is a human *gandhabba* that comes into a womb.
- There is no place in the *Tipiṭaka* that says *paṭisandhi* happens in a womb. Rather it says, “... *gandhabba okkanthi hoti.*”

9. Many rebirth account features are consistent with that correct interpretation where the *manomaya kāya (gandhabba)* inherits many successive (but time separated) physical bodies.

- In rebirth stories, there is always a “time gap” between successive human births (*jāti*). They are always separated by several years or at least a few years. In between those successive lives, that life-stream survives as a *gandhabba*. The Buddha told Vacchagotta that the *gandhabba* survives that intervening time by using *tanhā* as *āhāra*. Some *gandhabbas* can “inhale” aroma from plants, too.
- We all know that human existence is extremely difficult to get; see, “[How the Buddha Described the Chance of Rebirth in the Human Realm.](#)” If each human birth is categorized as a “brand new human existence or *bhava*,” that would be inconsistent since human existence is a rare event.

Human Births Within the Human *Bhava*

10. Then another question may arise, “Why do people look different in successive rebirths?” That is because the physical body in each human life (within the same human *bhava*) arise with contributions from the parents for that life.

- Even though the *gandhabba* brings in his/her *gati* (habits), *āsava* (cravings), *kilesa* (mental impurities), etc. from the previous life, the physical body for the new life has major contributions from the parents. The DNA of the physical bodies of two successive lives will be very different due to this reason. For details, see, “[Buddhist Explanations of Conception, Abortion, and Contraception.](#)”

Gandhabba's Gati Will Change With Time

11. Furthermore, even the mental body of the *gandhabba* WILL change in the next life. Thus *gati* (habits), *āsava* (cravings), *kilesa* (mental impurities), etc. will also change as one grows up in a new environment under a different set of influences.

- For example, one could have lived a moral life in the previous birth, but may be born into a family of drug addicts due to a bad *kamma vipāka*. In that case, the new life could drastically change to an immoral life.
- However, in most cases, the successive lives are not that drastically different, unless one makes drastic changes during the life: If one could attain the *Sotāpanna* stage, then one will not be born into an immoral family. If one reaches the *Anāgāmī* stage of *Nibbāna*, one will never be born a human, and will be born in the *Brahma* realm.
- On the other hand, even if one is born in a moral family but under the influence of bad friends becomes a drug addict and commits crimes, one is likely to be born into an immoral family in the next birth. If one commits a *ānantariya pāpa kammā* (say by killing a parent), then one will be born in the *apāyā* at death, even if there is more *kammic* energy left in the human *bhava*.

More Evidence From *Tipiṭaka*

12. Now, let us discuss more evidence from the *Tipiṭaka*. During the night of his Enlightenment, the Buddha (or more accurately the ascetic Siddhartha) first attained the “*pubbe nivāsānussati ñāṇa*,” before attaining the “*cutupapāda ñāṇa*” and finally the “*āsavakkhaya ñāṇa*.” It is the *āsavakkhaya ñāṇa* that led to the Buddhahood; see, “[The Way to Nibbāna – Removal of Āsavas.](#)”

- The first two pieces of knowledge (*ñāṇa*; pronounced “*gnana*”;) can be attained even with *anāriya jhānā* (with limited capabilities). Both those deal with the ability to look back at previous lives. But with the first one, *pubbe nivāsānussati ñāṇa*, one could only look at the **previous human births**.
- Here, “*pubbe*” means “previous,” “*nivasa*” means “house”, and “*anussati*” means “recall”, i.e., the knowledge to recall successive residences of a given *gandhabba*. In a given human *bhava*, a *gandhabba* could have many different “houses,” i.e., physical bodies. Thus with this *ñāṇa*, one could look at human births in the past, in multiple human *bhava* going back to very long times, depending on the capability of the *yogi*.
- The second one, *cutupapāda ñāṇa*, extends the capability to see **all previous rebirths in any realm**. Here *cutupapāda* (*cuti* means death and *upapāda* means birth) refers to all types of rebirths in various realms (*niraya*, animal, *deva*, etc.) in the past.

Connection to *Pubbe Nivāsānussati Ñāṇa*

13. Furthermore, the Buddha described how he saw human *gandhabbas* moving from one physical body to the next (in a single human *bhava*) with the *pubbe nivāsānussati ñāṇa*. He explained that with the following simile: If one is situated in an upper level of a multi-story building (yes, there were multi-storied buildings at the time of the Buddha) located at a busy junction, one could see people meandering in the streets below.

- Some people just stay on the street, sometimes sitting in a bench or standing by the road, etc.; this is analogous to *gandhabbas* just waiting for a physical body (i.e., a womb).
- Sometimes, a person enters a house and stays there for a long time; this is comparable to a *gandhabba* in a physical body for a long time, i.e., until old age.
- Other times, a person may enter a house and come out after a few hours. That is comparable to death at a young age.
- Also, a person could enter a house and immediately come out. That corresponds to abortion or an unsuccessful pregnancy.

14. Thus the *pubbe nivāsānussati ñāṇa* is limited to looking at past human lives. That is an excellent example that the Buddha clearly stated the concept of the *gandhabba*. The *cutupapāda ñāṇa*, extends the capability to see all previous rebirths in any realm.

- In the *Tirokudda sutta*, the *gandhabba* is called a “*tirokudda*”; see, “[Hidden World of the Gandhabba: Netherworld \(Para Loka\)](#).”

Change of *Bhava*

15. If a human dies at end of the *kammic* energy for the human *bhava*, then the *cuti-paṭisandhi* transition happens at the moment of the death. In the specific example of a human to deer transition, now a “deer *gandhabba*” comes out of that dead body and has to wait for a matching “deer womb” to become available.

- However, if the human was to become a *deva*, then a fully formed *deva* will appear instantaneously in a *deva* realm, the moment the human dies in a *kammakkhaya maraṇa*. A *gandhabba* is involved only in human and animal realms; see, “[Gandhabba – Only in Human and Animal Realms](#).”

Connection to Astral Travel

16. Another interesting piece of information comes from how the Buddha (and others with *iddhi* powers (*bala*)) traveled to *deva* or *brahma loka* with the *manomaya kāya* (which is the same as *gandhabba*.) Here, the physical body is left behind. Yet the physical body does not die, and is kept alive by the *rūpa jivīndriya* (*kammic* energy.) Upon returning, the *gandhabba* can re-enter the physical body.

- Those who attain the fourth *jhāna* can develop *iddhi* powers to be able to separate the *manomaya kāya* from the physical body and travel far with that *manomaya kāya*. The Buddha stated that just as a sword comes out of its sheath, those with *iddhi* powers can pull the *manomaya kāya* out of the physical body.
- That *manomaya kāya* can then go to distant places within very short times (this is what is called “astral travel” in the present day; see the Wikipedia article, “[WebLink: Wiki: Astral projection](#).” **A *gandhabba* is the same as an “astral body.”**
- In the *suttā*, it is said that the Buddha visited *deva* or *Brahma lokas* “within the time that takes a bent arm to be straightened.”
- It is possible for some yogis with *iddhi* powers to travel with the physical body. That involves a different mechanism, that is not relevant to this discussion.

17. If you have any other questions or unresolved issues about this discussion, please send me a comment. or post at the discussion forum. I can add to the post to address such questions.

4.8.4 Ānantarika Kamma – Connection to Gandhabba

June 2, 2018

1. *Ānantarika* or *ānantariya* comes from “*na*” + “*an*” + “*antara*.” That rhymes as “*ānantara*.” There are many words like this, meanings of which remain unclear to many. Pāli is a phonetic language, where some meanings can never be found grammatically.

- *Anatta* is the negation of “*atta*” or having refuge/having substance: “*na*” + “*atta*” (which rhymes as “*anatta*”): there is no substance/does not hold any ultimate truth; see, “[Anatta – the Opposite of Which Atta?](#).”
- The word *Anāgāmī* comes from “*na*” + “*āgāmī*” or “not coming back”: “*na*” + “*āgāmī*” rhymes as “*anāgāmī*.” It means “not coming back to the *kāma loka*.” He/she will attain *Nibbāna* from those *brahma* realms.
- Words like this cannot be analyzed grammatically. This is why current Pāli experts are wrong in interpreting such words (and are unable to interpret many key words).
- By the way, *anantara* means the opposite of *ānantara*; see, “[Anantara and Samanantara Paccaya](#).”

2. Going back to the word “*ānantarika*”: “*An*” or “*anu*” means “food” or “*kamma* seed” depending on where it is used. “*na*” means “not.” “*antara*” means stored somewhere away. Therefore, *ānantarika* means “not stored away to come back when conditions are right”, i.e., it will bring *vipāka* “right away.”

- When one does a *kamma* that is NOT *ānantarika*, its *kammic* energy is “stored away” at “*antara*” and can bring suitable *kamma vipāka*, when suitable CONDITIONS appear. Some *kamma vipāka* may not be realized for many lives simply because suitable conditions had not appeared.
- However, an *ānantarika kamma vipāka* SHOULD override any existing other *kamma vipāka*. Our life experiences (*citta vīthi*) ALWAYS start with a *kamma vipāka* (see, “[How Are Paticca Samuppāda Cycles Initiated?](#)”). Therefore, an *ānantarika kamma vipāka* SHOULD BE enforced right after the *kamma* is done, even before any other *pavutti kamma vipāka* (like a seeing, hearing event) is initiated, i.e., **instantaneously**. There should be no need for a delay until the death of the human. [*pavutti* : happening, proceeding, fate, event]

3. However, an *ānantarika kamma* will bring *vipāka* “right away” **ONLY in realms other than human realm** (*ānantarika kamma* are not relevant in the animal realm). In order to see why that is, let us first look at what types of *kamma* belong to *ānantarika kamma*.

- The BAD *ānantarika kamma* are five: killing one’s mother, killing one’s father, killing an *Arahant*, shedding the blood of a Buddha, creating *Saṅgha bheda*. These are listed towards the end of the following link in the *Tipiṭaka*: [WEBLINK: suttacentral: Nānakathā](#) [*bheda* : [m.] breach; disunion; dissension.]
- Then, there are several GOOD *ānantarika kamma*: *magga phala* (stages of *Nibbāna*) and attainment of (*Ariya* or *anāriya*) *jhānā*.
- Any of these, by definition, should lead to their *vipāka* right away. However, there is another factor that comes into play for humans, which we will discuss now.

4. All of the five bad *ānantarika kamma* are done by humans. Therefore, we need look at the good *ānantarika kamma* in order to see how they work in other realms.

- For example, if a *deva* attains the *Anāgāmī* stage, that *deva* will instantaneously be born in a *rūpāvacara brahma* realm. [*deva* : (lit: the Radiant Ones; related to Lat. deus) : heavenly beings, deities, celestials, are beings who live in happy worlds, and who, as a rule, are invisible to the human eye. They are subject, however, just like all human and other beings, to ever-repeated rebirth, old age and death, and thus are not freed from the cycle of existence and from misery.]
- If a *rūpāvacara brahma* attains the *Arahant* stage, that *brahma* will instantaneously attain *Parinibbāna*, i.e., will cease to exist in the 31 realms.

- In both those cases, the true meaning of the term *ānantarika kamma* will be enforced, i.e., the *vipāka* will take place without a delay, instantaneously.

5. In the human realm, the enforcement of an *ānantarika kamma* will be DELAYED due to the following reason.

- The primary “body” that is directly subjected to *ānantarika kamma vipāka* is the *kammaja kaya*, the “primary body” created by *kamma* for that *bhava* at the *cuti-paṭisandhi* moment. All living beings are born with a “mental body” (called “*trija kaya*” or three bodies) consisting of the *kammaja kaya*, *cittaja kaya*, and *utuja kaya*.
- *Brahmā* only have *trija kaya*. Even though *devas* in the six *deva* realms have a fourth “physical body” or a “*karaja kaya*,” that is very fine. Thus, the *trija kaya* (specifically the *kammaja kaya*) of a *deva* is not shielded sufficiently and any *ānantarika kamma vipāka* will take place without a delay.
- This *trija kaya* in human and animal realms it is given a special name “*gandhabba*.”

6. The *trija kaya* or the *gandhabba* of a human is shielded by the “dense human physical body.” Therefore, the instantaneous enforcement of the *ānantarika kamma vipāka* on the *kammaja kaya* cannot take place. It will have to wait until the death of the physical body.

- When the physical body of a human dies, the *trija kaya* (which is given the special name *gandhabba*) comes out and is no longer shielded by the physical body. **At that time, the *ānantarika kamma vipāka* will be enforced instantaneously.**
- This is the reason that the term *ānantarika kamma vipāka* does not apply to a human in the true sense of *ānantarika* (no delay).
- **Therefore, the working of *ānantarika kamma vipāka* cannot be explained without the concept of *gandhabba*.**

7. Now we can explain many applications of the *ānantarika kamma vipāka* for humans.

- On the “bad side”, for example, one can kill a parent or cause *Saṅgha bheda* and can live a full life. However, at the death of the physical body, one would be instantaneously born in the *apāyā* (even if there is more *kammic* energy for the current human *bhava* left).
- On the “good side”, one attaining a *jhāna* will be born in the appropriate *brahma* realm only after death. One attaining the *Anāgāmī* stage will be born in the appropriate *brahma* realm only after death, and one attaining the *Arahant* stage would undergo *Parinibbāna* (i.e., cease to exist in the 31 realms and immediately get to *Nibbāna*) only at death.

8. Now, another question may come up regarding the following situation: an *Arahant*’s or an *Anāgāmī*’s *gandhabba* may have to come out of the physical body when performing a supernatural action (*abhiññā*). Wouldn’t that *gandhabba* undergo instantaneous transformation at that time?

- The answer is no. The reason is that the *gandhabba* is still firmly connected to the living physical body (that is they can re-enter that body any time). It is as if the *gandhabba* is still protected by the physical body; the shielding is still active.
- This explanation holds also in the cases of astral projection and out-of-body experiences (OBE); see, “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).” In the case of astral projection or astral travel, it is said that the astral body is kept “attached” to the physical body by “silver cord.”

9. Now we can address another related issue. There seems to be two issues that may be difficult to grasp.

- A LIVING *Arahant* is subjected to *kamma vipāka* DURING his/her life.
- No *kamma vipāka* will come to an *Arahant* AFTER his/her death.

10. As we discussed above, a **human Arahant** will not attain *Parinibbāna* at the moment of attaining the *Arahanthood*, because of the presence of human physical body. Thus, a human *Arahant* has to wait until the death of the physical body to attain *Parinibbāna*.

- **Now, attaining a *magga phala* does NOT mean the removal of *kammic* energies for previous *kamma* (see below).** Therefore, those *kamma vipāka* will be still effective for the *Arahant* until death.
- This is why even the Buddha had to suffer from an injury to his toe, had back problems, and also had pains after the last meal.

11. There could many more *kamma vipāka* left for an *Arahant* at the time of death. However, at death, the *gandhabba* comes out of the dead body and will instantaneously disappear from the 31 realms of this world, i.e., attain *Parinibbāna*.

- Therefore, any remaining *kamma vipāka* will NEVER be able to materialize. They are said to have become “*ahosi kamma*,” or “ineffective *kamma*.”
- So, now we have answers to the two questions raised in #9 above.

12. However, **some *kamma vipāka*** other than an *ānantarika kamma vipāka* **will be overcome** by attaining a *magga phala* (at least the *Sotāpanna* stage), i.e., some *kamma vipāka* will become *ahosi kamma*. Of course, **all *kamma vipāka*** will become *ahosi kamma* at *Parinibbāna*.

- Let us discuss how some *kamma vipāka* can become *ahosi kamma* upon attaining stages of *magga phala*.
- In order to do that we need first to discuss what happens at the *Arahant* stage.

13. One attains the final stage of *Nibbāna* (*Arahanthood*), not by removing or exhausting all *kamma vipāka* from the past.

- One attains the *Arahanthood* by cultivating one's *paññā* (wisdom) to the level where one truly understands the real nature of this world. **At that point one's mind will not be tempted by ANY desire (*taṇhā*) to be born ANYWHERE in the 31 realms.** That is a CRITICAL POINT to understand.
- Now when the *gandhabba* comes out of the dead body of an *Arahant*, it immediately undergoes the ***cuti* (separation from the human *bhava*)**, due to the *ānantarika kamma vipāka* associated with the *Arahant phala*.
- But now, that life-stream CANNOT grasp a new ***bhava* (*paṭisandhi*)** anywhere in the 31 realms since there is no “*upādāna*” in the step of “*upādāna paccayā bhava*” in the *Paṭicca Samuppāda* process. This is because there is no *taṇhā* left for any existence in the 31 realms and thus “*taṇhā paccayā upādāna*” step will not happen.

14. Therefore, even though there are many good and bad *kamma vipāka* may be associated with that *Arahant*, all those will have become “*ahosi kamma*” (are not able to bring out *vipāka*), simply because one has lost ALL cravings (*taṇhā*).

- This is why *Āṅgulimāla* became free of the *apāyā*, even though he killed 999 people. That was not an *ānantarika kamma*. Only those *kamma* listed in #3 above are *ānantarika kamma*.

15. However, in the case of the death of an *Anāgāmī*, the *gandhabba* comes out, undergoes *cuti*, but can grasp a *bhava* in the *rūpāvacara brahma* realms reserved for the *Anāgāmīs*. Therefore, a *cuti-paṭisandhi* transition takes place leading to the rebirth in such a realm.

- But an *Anāgāmī*'s mind would not grasp a *bhava* anywhere in the *kāmāvacara* realms, since he/she has lost all “*upādāna*” (tied to cravings via *taṇhā*) for such realms. Therefore, any previous *kamma vipāka* that could have led to a rebirth in the lower realms will have become *ahosi kamma*.

16. In the same way, a *Sotāpanna*'s mind would not grasp a *bhava* in the *apāyā*. Any “*apāyagāmī kamma*” he/she had done have now become “*ahosi kamma*.” If one has “*apāyagāmī kamma vipāka*” waiting to bear fruit (as almost all normal humans do), attaining the *Sotāpanna* stage will OVERRIDE those *kamma vipāka*.

- To put it in another way: at the dying moment, a *Sotāpanna* WILL NOT grasp (*upādāna*) a birth in the *apāyā*. His/her mindset has PERMANENTLY changed. Therefore, such *kamma vipāka* will NEVER materialize even in future lives for a *Sotāpanna*.
- His/her *diṭṭhi anusaya* and *diṭṭhāsava* have been permanently removed, and the three *samyojanā* that binds one to the *apāyā* have been cut off; these terms describe the *Sotāpanna* attainment in different ways; see below.

17. Even though one who attained an *anāriya jhāna* would grasp a *bhava* in the appropriate *brahma* realm, that is just for that particular *cuti-paṭisandhi* transition.

- Since he/she had not attained a *magga phala* (and thus has not “seen” the futility/danger of “*apāyagāmī* actions”), a birth in the *apāyā* can happen in the future.
- One with an *anāriya jhāna* has only SUPPRESSED cravings for *kāma loka*, **but such cravings remain as *anusaya***: One has not removed *avijjā* to the level of truly realizing the dangers of *kāma rāga*, by comprehending *Tilakkhaṇa*. Thus, *kāma rāga anusaya* remains together with *kāmāsava*, and one has not broken through the *kāma rāga samyojanā*. These terms are explained in, “[Gathi \(Gati\), Anusaya, and Āsava](#)” and “[Dasa Samyojana – Bonds in Rebirth Process](#).”

18. Therefore, ultimately it is the true understanding of *Tilakkhaṇa* at various levels that lead to various *magga phala*.

- However, understanding of *Tilakkhaṇa* is possible only for one who has cultivated the mundane eightfold path, via discarding ALL 10 types of *micchā diṭṭhi*. [See the 10 types of *micchā diṭṭhi* at [Mahā Chattārisaka Sutta \(Discourse on the Great Forty\)](#), [Micchā Diṭṭhi, Gandhabba, and Sotāpanna Stage, Ten Immoral Actions \(Dasa Akusala\)](#), and [Three Kinds of Diṭṭhi, Eightfold Paths, and Samadhi](#)] [[WebLink: suttacentral: 62 views at WebLink: suttacentral: Brahmajala Sutta](#)]
- To put it another way, attaining *magga phala* at various stages is associated with getting rid of *dasa akusala* at various levels.
- *Micchā diṭṭhi* is the worst of the *dasa akusala*, and at the root of *micchā diṭṭhi* is are the 10 types of *micchā diṭṭhi*. The second level of *micchā diṭṭhi* is removed with the comprehension of *Tilakkhaṇa* (that is when one starts on the Noble Eightfold Path).
- All wrong views (*diṭṭhi*) are removed when one attains the *Arahanthood*. When all wrong views are removed, all other nine *akusala* are prevented. However, abstaining from other *dasa akusala* is necessary to remove wrong views, so they are all inter-connected.
- **I keep repeating this, but I am not sure how many pay attention to these basic facts. Many people seem to waste time trying to comprehend *Tilakkhaṇa*, before getting rid of the 10 types of *micchā diṭṭhi*.**

Discussion at: “[Anantariya Kamma, Euthanasia and Assisted Suicides](#).”

4.8.5 Mental Body (Gandhabba) – Personal Accounts

February 5, 2017; revised April 25, 2020

The evidence comes in three general types of accounts, as we discuss below.

1. Many people have at least briefly experienced an “out-of-body experience” (OBE), where the mental body just comes out of the physical body, and one sees one’s own physical body from above.

- In his book, “Travels”, the famous author of the Jurassic Park, Michael Crichton (1988, p. 307) mentions his ability to “shift my awareness out of my body and move it around the bedroom”, and he says, “..I didn’t think anything about it... I assumed that anybody could do it..”.
 - A similar account has been given by a woman recently who also thought that “everybody could do it”: [WebLink: ABCNews: Woman Has ‘Out of Body’ Experiences Whenever She Wants](#)
 - Robert Monroe (see #6 below) says mental bodies of most of us come out and wander around even without us realizing it. Sometimes, we are in a dream state (we believe) and then feel a “sudden fall” and wake up. He says this “dream state” is actually the mental body wandering around and we feel the “sudden fall” when the mental body re-enters the physical body.
 - **So it is not correct to assume that a *gandhabba* or the mental body as a “ghost.” In a sense, it is a better representation of us than our physical bodies that are discarded after about 100 years, because it may live for many hundreds of years until the *kammic* energy for this human *bhava* is exhausted.**
2. There are other — more dramatic — reported cases of OBE and some of them involve “near-death experiences” (NDE), where the person was presumed to be dead but revived later on. During that time, the mental body usually “went through a tunnel” to another dimension, but then came back to re-enter the body.
- Of course, there are many books written on OBE and NDE. “Consciousness Beyond Life”, by Pim van Lommel (2010) gives detailed accounts of case studies of OBE and NDE experienced by people undergoing heart operations, some of whom were declared dead but came back to life.
 - A third category involves the rebirth accounts from children, who were killed in an accident in the previous life. They can recall that incident from the previous life, where the mental body came out of a physical body and they watched the accident scene from above. They have provided accurate accounts of that scene. I will discuss one such account at the end of the post.
3. The experiences described in the accounts below need to be evaluated with the following nuances (subtle aspects) in mind. Once the mental body comes out, first it can be an exhilarating experience to be free of the heavy physical body. So, most people describe it as a “liberating experience.”
- However, without the physical body, one cannot enjoy smells (in many cases), the taste of food, and also bodily pleasures. Thus, if one had to live without a physical body for a long-time, one could become frustrated, and one could suffer. This is the status of a *gandhabba* in between two consecutive human births.
 - Therefore, even though it could be a “liberating experience” to come out from the shackles of the physical body for a short time as in OBE and NDE, **it may not be that pleasant to stay in that state state if one has not given up the desire for sensual pleasures since one cannot “enjoy” sense pleasures without a physical body.**
4. The other point to keep in mind is that many experiences (especially those from the Western world) are from people who have other religious backgrounds. In a way, this is good because we can get an unbiased opinion. But, unfortunately, they have a different bias due to their own religious beliefs. For example, many people say they visited heaven, which in reality could be a “good locality” of the *gandhabbā*.
- It must be kept in mind that *gandhabba* world is not just “one place”, even though physical locations cannot be assigned. It is much better to say that “good *gandhabbā*” with higher moral values hang out together (such localities may be referred to as “heaven”), and “bad *gandhabbā*” segregate away from those. And there can be many varieties in between.
 - It is similar to the case of people with similar *gathi* hanging together.
 - So, it can be thought of as there being many “*gandhabbā* worlds” in the nether world or *para loka*.
 - Some of the *gandhabbā* have very fine bodies, but others may have more dense bodies (still much less dense than our bodies). Some may “look” like humans, but some may have started already transforming

to animal forms (due to types *saṅkhāra* they cultivate) and may look half human and half animal. It is a very complex world.

5. Robert Monroe has written several books about the OBE experiences of himself and others. Two of his books are: “Journeys Out of the Body: The Classic Work on Out-of-Body Experience” and “Far Journeys.”

- Here is how he describes his first OBE experience (there are many other youtube videos on his accounts):

[WebLink: Youtube: Robert Monroe explains his first OBE](#)

6. Here is an interesting documentary, “Beyond Our Sight – documentary.” Thanks to Mr. Johnny Lim from Singapore for sending me this video.

[WebLink: YouTube: Beyond Our Sight - documentary \(52'\)](#)

7. In their book, “Soul Survivor: The Reincarnation of a World War II Fighter Pilot”, by Bruce and Andrea Leininger detail the amazing story of their son’s recount of a past life, mentioned in the above video. There the little boy vividly describes how he died in his previous life. This falls into the third category that I mentioned in #1 above. Here is a ABC News report on the story:

[WebLink: YouTube: Reincarnation - Airplane Boy \(abc Primetime\)](#)

- Another youtube video link was sent to me by a reader from Sri Lanka who did not want to be identified. This video is in Sinhala and is the account of a boy. This boy was an adult in the previous life and was killed in an accident. He describes how his mental body came out of the dead body and how he watched from above the scene of the accident.
- The actual account starts at 3 minutes into the video.

[WebLink: YouTube: wenasa](#) (Video not available 21 August 2018)

Several years later (during which time he was in the *gandhabba* world or *para loka*), he was born to a family in a different village in Sri Lanka.

- As is evident from the above two stories, successive births within a given *bhava* are likely to be— but not always — in similar geographic regions because of the tendency to match one’s *gathi*.

8. Some scientists believe that these are mind-made hallucinations. Here is a researcher’s account of his investigations into that possibility. He started the project to prove that it is a hallucination but ended up convincing himself otherwise.

[WebLink: YouTube: Larry King Interview with Melvin Morse](#)

9. There are some people trying to make money saying they can teach how to do “astral projection.” Astral projection is another name for OBE.

- This is not something that can be taught. So, don’t waste money.
- The only way to do it systematically is to cultivate *Ariya* or *anāriya jhānā* to the fourth *jhāna*. Then one can practice further and learn how to remove the mental body from the physical. The Buddha compared this to removing a sword from its sheath.
- However, most people who can naturally do it get it as a *sansāric* habit. They are likely to have cultivated *jhānā* and developed *abhiññā* powers in recent past lives.
- The most common situation is when the mental body just pops out of the physical body in highly stressful situations where the stress is affecting the heart. The *hadaya vatthu* of the *gandhabba* overlaps the physical heart, and thus when the heart is stressed out, *gandhabba* may just pop out of the physical body.

10. The idea of a mental body controlling the physical body discussed in the previous post in this section (“[Our Mental Body – Gandhabba.](#)”)

By the way, the mental body is not all mental. It has a fine material component at *suddhashtaka* level; see, "[Gandhabba \(Manomaya Kaya\)- Introduction](#)".

- There are many reported instances of this mental body coming out of the physical body, and I have mentioned some of those in other posts. But I would like to have some of that evidence in one place so that one can get an idea of why it is not an alien concept.
- But there are many made-up stories too. **So, my advice is not to get carried away too much about watching these youtube videos. That is a waste of time.** I just wanted to provide some idea that the mental body (*gandhabba*) is real.
- More information at, "[Mental Body – Gandhabba](#)," "[Gandhabba \(Manomaya Kaya\)](#)," and "[The Grand Unified Theory of Dhamma](#)."

4.8.6 Abnormal Births Due to Gandhabba Transformations

September 30, 2017

1. Modern science and technology, especially the internet, is a very useful resource to understand and confirm some concepts in Buddha Dhamma. All of us can now access rare events in remote places, that we would never have known without the internet.

- I started thinking about this post when I received a youtube video of a "strange looking animal" sent to me by Mr. Tobias Große from Germany. Then I did a Google search and found that there are many such "abnormal" human and animal birth reports from all over the world.
- Such observations can be explained with the concept of *gandhabba*, which is an essential concept for describing the life in the human and animal realms. I have two sub-sections at the website devoted to the important concept of *gandhabba*: "[Mental Body – Gandhabba](#)" and "[Gandhabba \(Manomaya Kāya\)](#)."
- Of course, *gandhabba* is NOT a Mahayana concept, see, "[Gandhabba State – Evidence from Tipitaka](#)," and without that there will be many inconsistencies, including the observed fact that there are gaps of several years in between successive human rebirths; see, "[Bhava and Jāti – States of Existence and Births Therein](#)."

2. As we have discussed in those posts, a human *bhava* (existence) could last for many hundreds or even thousand of years. Within that time, one could be born with a human body many times. When one is born with a human body and when that "physical body" dies, the "mental body" or the *gandhabba* state could have many hundreds of years of life left.

- Thus, unless the kammic energy for that "human *bhava*" has been exhausted, the mental body (*gandhabba*) comes of the dead physical body unharmed. Since we cannot see that very fine body, it is said that the *gandhabba* lives in "*paralowa*" (other world, sometime called nether world), compared to "this world" that we can see.
- That *gandhabba* has to wait for a suitable womb to become available, and at that time it is pulled into that "matching womb." This is why there is normally a gap of several years exists in between successive rebirths per rebirth stories; see, "[Evidence for Rebirth](#)."

3. During one's lifetime, the *kammaja kaya* of the *gandhabba* changes, and sometimes those changes can be drastic. If one kills a parent, that *kammaja kaya* does not change instantly only because it is "enclosed" in the dense physical body.

- But when the physical body dies, the *gandhabba* is automatically kicked out of that body, and will instantly transform to a *kamma kaya* suitable for a being in an *apāya*. Therefore, even if the original *gandhabba* had more *kammic* energy left for the human *bhava*, a *cuti-paṭisandhi* to a "hell being" will occur, and he/she will be instantly born in an *apāya*.

- There are such *anantariya kamma* that can instantly lead to births in *rūpa* and *arūpa loka*: If one had cultivated *jhāna*, then when the *gandhabba* comes out of the dead body, it will instantly undergo a *cuti-paṭisandhi* transition to a *brahma* and will be born instantly in the corresponding *brahma* realm.

4. Sometimes, a human *gandhabba* starts making the transformation to another *bhava* while in the *gandhabba* state after coming out of a dead body. This happens especially for those who are engaged in highly immoral deeds.

- For example, if one is cultivating “animal *gati*” (thinking and behaving like an animal), then the *gandhabba* will continue to generate such “animal *saṅkhāra*” after coming out of the dead body, and may gradually transform to an animal while in the *gandhabba* state. Then, if a matching animal womb comes available, that half-human creature will be pulled into that womb.
- Now, by “matching womb” what is meant is the mental state of the mother at that time. She could be a “good moral person”, but if for some reason her mental state at that time became “abnormal”, then it could become a matching womb for that creature, who could be half human, half animal.
- Depending on how far that transformation had taken place, that *gandhabba* could be pulled into a human womb or an animal womb, i.e., be born to a human or animal mother. Here is the video sent to me by Mr. Tobias Große from an animal birth that looks partly human:

[WebLink: gmx.net: Halb Mensch, halb Tier: Kuh sieht aus wie Fabelwesen](http://gmx.net: Halb Mensch, halb Tier: Kuh sieht aus wie Fabelwesen)

5. The following are some more examples of (both abnormal human and animal births) available as youtube videos (of course, in some cases “photoshop” may have been used; there are many on the internet and I have picked a couple that appear to be genuine):

[WebLink: Youtube: Half Animal Half Human Found In Real Life](https://www.youtube.com/watch?v=...)

[WebLink: Youtube: South African Sheep Births Half Human Half Beast](https://www.youtube.com/watch?v=...) (Video not available 21 August 2018)

- Here is more information on the above “beast”:

[WebLink: Youtube: HALF HUMAN-HALF BEAST CREATURE SENT BY THE DEVIL](https://www.youtube.com/watch?v=...)

- Thanks to Mr. C. Saket from India for the following video. Some abnormalities shown there could also be due to *gandhabba* transformation together with bad *kamma vipāka*:

[WebLink: Youtube: 10 REAL People With Shocking Genetic Mutations](https://www.youtube.com/watch?v=...)

- Please send me any good videos that you come across, so that I can add them to this collection.

6. Anything and everything in this world happens due to a cause, or more correctly due to multiple causes. The foundation of science is causes and effects. If things happen arbitrarily, then there is no way to predict the outcome of a scientific experiment.

- But modern science deals mainly with the properties of material objects. Also, material objects only have a short “history”; a building or a car is assembled and eventually destroyed. Thus it is easier to see the link between causes and effects.
- But living beings have minds and each living being has a past that extends to the deep past (due to rebirth). So, the causes that bring about results now, may have been done in the deep past. That is why it is hard to see the connection between causes and effects for living beings.

7. My late Noble teacher, Waharaka Thero, has mentioned in several *desanās* how he saw such “*gandhabba* transformations” while in *samādhi*.

- When an immoral human dies, the *gandhabba* that comes out will keep cultivating those “bad *saṅkhāra*,” and if they get strong enough the fine body of the *gandhabba* will start changing to match those “*saṅkhāra*” and thus “*gati*”; see, “[Gati and Bhava – Many Varieties](#)” and “[Gati to Bhava to Jāti – Ours to Control.](#)”

- For example, he had seen how a human *gandhabba* transforms to a bird. It started with the head getting longer and forming a beak. The rest of the body then changed gradually from top to bottom. When I heard that, those Egyptian pictures seen on pyramids of “bird men” with bird heads immediately came to my mind.

8. By the way, even some normal people can see those *gandhabbas* with fine bodies; this is due to “*puñña iddhi*” due to some past good *kamma*.

- There are different types of “*puñña iddhi*.” Surviving without food and water is known as “breatharianism” and has been documented or claimed by many. an extreme case of a Hindu *yogi*, Prahlad Jani, is baffling to many modern scientists:

[WebLink: Youtube: Snippet from "IN THE BEGINNING THERE WAS LIGHT" - Yogi Prahlad Jani](#)

- Thanks again to Mr. C. Saket for sending this video and the related comments above.
- The ability to have very detailed memories from this life is also such a “*puñña iddhi*,” see, “[Recent Evidence for Unbroken Memory Records \(HSAM\)](#)”, where a woman describes her memories from this life going back to many years. The level of detail she can remember is amazing.
- In fact, I am beginning to believe that in those early Buddhist Councils (*Sangāyana*), where *Arahants* recited the whole *Tiṭṭaka*, they were likely to have VERIFIED then by actually re-visiting each *sutta*'s delivery by *iddhi* power. When you listen to the woman describing past events in such detail, it is as if she is re-visiting that event.
- The ability of some people to see *gandhabbas* with fine bodies could be responsible for the misty “ghost figures” like the ones that we see in popular culture (in books, movies and on the internet).

9. A human *gandhabba* is a finer version of a human. When a human, say a middle aged person dies, the *gandhabba* that comes out looks very similar to that person (if one can see it). Then with time it will show normal changes that could be expected of a human: His hair and fingernails will grow, for example. In a few years, that *gandhabba* WILL look like ghost with long hair and long finger nails. **Imagine what will happen to one's human body if one doesn't cut one's hair, finger nails, or shave. One will look like a ghost. That is why some *gandhabbas* look like ghosts, according to Waharaka Thero.**

- Some of them get a bit denser by inhaling aroma and may become easier to see for those people with “*puñña iddhi*” that we mentioned earlier. However, when that *gandhabba* is pulled into a womb, it will shed all “added” mass (*utuja kaya*), and only the basic “*kammaja kaya*” with the *hadaya vatthu* and the *pasāda rūpa* (combined to be smaller than an atom in modern science) will merge with the zygote (the single cell formed by the union of mother and father) that is in the womb.
- Now that “new baby” will have a different body than the body in the previous life, because it have many features inherited from the parents (via DNA) in the zygote.
- But it is essentially the evolved *kammaja kaya* formed at the *cuti-paṭisandhi* moment that is still there for that next “birth” in the human world. **Thus while the *gandhabba* keep its *kammaja kaya*, but the physical body will be influenced by the parents.**
- This is discussed in detail in, “What does Buddha Dhamma (Buddhism) say about Birth Control?.”

This world is much more complex than we realize, and the “*paralowa*” of the *gandhabbas* is even more complex; see “[Hidden World of the Gandhabba: Netherworld \(Para Loka\)](#).”

4.8.7 Satara Āhāra for Mental Body or Gandhabba

February 11, 2017

1. As we have discussed in this subsection and elsewhere at the site, we have two bodies: the physical body (*karaja kāya*) and mental body (*gandhabba*). Both these bodies need food to survive.

- The food we eat to sustain the physical body is called *kabalin̄kāra āhāra*.

- Our mental body consumes three more types of food: *phassa*, *mano sañcetanā*, and *viññāṇa*.
 - The four types of food are called “*satara āhāra*.” We will see that all four can be food for the mental body (*gandhabba*).
2. Food is essential for all living beings. If one stops taking *kabalīnkāra āhāra* (which includes water) for about seven days or so, one’s physical body will die.
- However, unless one is an *Arahant*, one will be reborn somewhere in the 31 realms upon death, because one’s mental body (*gandhabba*) will not die.
 - We cannot stop suffering by committing suicide, i.e., via the death of the physical body. **The mental body needs to die in order to stop the rebirth process.**
3. If one can stop giving food to the mental body for seven days, **it will die**, and one will never be reborn anywhere in the 31 realms, i.e., one will attain *Nibbāna*; then that *Arahant* will not be reborn upon death of the physical body. Thus the unimaginable suffering associated with the rebirth process will be over **(as I discussed in the beginning of this section on “Living Dhamma,” stopping the rebirth process seems scary and it should not be contemplated when one is starting on the Path).**
- This is why in the *Mahā Satipaṭṭhāna Sutta*, the Buddha said that if one can practice the *sutta* without making any mistakes, one will attain *Nibbāna* in seven days.
 - Let us discuss how this is possible.
4. There are two conditions that must be satisfied to generate a new mental body at the *cuti-paṭisandhi* moment: (i) There must be a *kamma bīja* available to grasp, and (ii) one’s mind must willingly grasp that *kamma bīja*.
- We all have accumulated numerous *kamma bīja*, so the first condition is always satisfied for anyone. Therefore, it is the second condition — grasping a new existence (*bhava*) at the *cuti-paṭisandhi* moment that can stop the rebirth process.
 - At the beginning, we need to just focus on not grasping a *bhava* in the four lowest realms (*apāyā*).
 - As we have discussed before, this grasping of a new *bhava* is not done consciously, but automatically.
 - For example, a *Sotāpanna*’s mind will not grasp a *bhava* in the *apāyā*; A *Sakadāgāmi*’s mind will not grasp a human *bhava* in addition, an *Anāgāmi* will not grasp a *bhava* in the *kāma loka*, and an *Arahant* will not grasp any.
5. There is another way to look at this mechanism of grasping a new *bhava* at the *cuti-paṭisandhi* moment. In the *uppatti Paṭicca Samuppāda* (PS) cycle, a certain *bhava* is grasped at “*upādāna paccayā bhava*.”
- When we trace the cycle backwards, we see that it starts at “*avijjā paccayā saṅkhāra*” and “*saṅkhāra paccayā viññāṇa*.”
 - **The grasping (*upādāna*) happens only if that PS starts with *avijjā* and generates an appropriate *viññāṇa* for grasping that *bhava*.**
6. Therefore, it is important to realize the two roles that *viññāṇa* play. We can understand this by examining how a *Sotāpanna* avoids birth in the *apāyā*.
- (i) If one cultivates “*apāyagāmi viññāṇa*” by doing extremely hateful/greedy actions, *viññāṇa* will keep GENERATING *kamma bīja* (energy) that fuel a new *bhava* in the *apāyā*. When one attains the *Sotāpanna* stage, one will automatically stop generating any more such *kamma bīja*, but those ones that had been created will be there.
- (ii) However, after someone attains the *Sotāpanna* stage, his/her mind will not start a *uppatti* PS cycle with an *apāyagāmi viññāṇa*, because that level of *avijjā* has been removed. **That type of *viññāṇa* has been**

“killed” or removed from her mind and is no longer able to grasp a new *bhava* in the *apāyā*, even though *apāyagāmī kamma bīja* will still be there.

7. A good example from the *Tipiṭaka* is Ven. Aṅgulimāla. He killed almost 1000 people and definitely had accumulated enough strong *kamma bīja* to be born in the *apāyā*.

- But at death his mind was devoid of that kind of bad *viññāṇa* to grasp any type of *bhava* in the 31 realms. Therefore, he was not reborn anywhere in the 31 realms.

8. Therefore, the word *viññāṇa* represents much more than just consciousness: It can be “food” for accumulating new *kamma bīja* AND also “food” or “fuel” that leads to grasping a new *bhava*.

- *Viññāṇa* is opposite of *ñāṇa* (pronounced “gnana”) or wisdom. When one cultivates *ñāṇa*, one’s *avijjā* is reduced and certain types of *viññāṇa* are concomitantly reduced.

- Pronunciation of *viññāṇa*:

[WebLink: Pronunciation of Viññāṇa](#)

- Pronunciation of *ñāṇa*:

[WebLink: Pronunciation of ñāṇa](#)

- There are many types of *viññāṇa*; see, “[2. Viññāṇa \(Consciousness\) can be of Many Different Types and Forms.](#)”
- As one attains the four stages of *Nibbāna*, *avijjā* is removed in four stages and the strength of all types of *viññāṇa* are accordingly reduced (removed) and all are eventually removed at the *Arahant* stage.
- This pure level of consciousness — without any defilements and thus any cravings — is called *pabhasvara citta*; see, “[Pabhassara Citta, Radiant Mind, and Bhavaṅga.](#)”
- In other words, an *Arahant* can experience the world with a purified mind that is not blemished by even a trace of greed, hate, or ignorance. Therefore, at death, his purified mind will not grasp any existence (*bhava*).

9. As long as one has *viññāṇa*, one will be born somewhere in the 31 realms. **This is why *viññāṇa* is called a type of food for the mental body.**

- As one proceeds at successive stages of *Nibbāna*, one will crave for less and less things in this world. For example, at the *Anāgāmī* stage, one would have lost all cravings (and hopes) — or *viññāṇa* — for any type of sensual pleasures.
- **It must be noted that the birth in the *apāyā* is not due to cravings to be willingly born there (no one has such cravings), but due to immoral deeds one had done to enjoy sensual pleasures AND has not yet removed that mentality (desire to enjoy sense pleasures at any cost) or bad *viññāṇa*.**

10. Any type of *viññāṇa* is cultivated by thinking, speaking, and acting in such a manner. Thinking, speaking, and acting is done based on *mano*, *vacī*, and *kāya sañkhāra* which arise due to *sañcetanā* (“san” + “cetanā” or defiled intentions; *cetanā* is pronounced “chethanā”).

- For example, an alcoholic regularly thinks about drinking, likes to speak about it and likes to drink. The more he does those, the more that *viññāṇa* will grow.
- It is easy to see how a gambler, smoker, etc grow their corresponding *viññāṇa* the same way.
- Having such *viññāṇa* can lead to other immoral activities and corresponding *viññāṇa*, say tendency to lie, steal, and even murder.
- Therefore, all activities done in cultivating such *viññāṇa* are based on *mano sañcetanā*. **That is why *mano sañcetanā* are also food for the mental body.**

11. The triggers for such *sañcetanā* are sense contacts or *phassa*. These are not mere sense contacts, but those that give rise to “*samphassa ja vedanā*.”

- *Phassa* is a sense contact. When one just looks at something that is *phassa*. But if one looks at it with greed or hate (and ignorance) in mind, that is *samphassa* (“*san*” + “*phassa*”); see, “[Vedanā \(Feelings\) Arise in Two Ways.](#)”
- This is why sense contacts or *phassa* (more precisely *samphassa*) are food for the mental body. Such sense contacts can lead to thoughts about bad actions and can give rise to future *kammaja kāya*.
- Therefore, one needs to avoid sense contacts with sense objects that one has *taṇhā* for. We need to remember that *taṇhā* is attachment to something via greed or hate; see, “[Tanhā – How We Attach Via Greed, Hate, and Ignorance.](#)”
- So, it is a bad idea for a gambler to visit casinos, an alcoholic to make visits to bars, etc. **Furthermore, one needs to avoid friends who encourage such activities too.**
- It is best to avoid any type of contacts that can lead to sense exposures that provide “food” for the mental body, i.e, get us started thinking about those bad activities.

12. Now we can see how those three types of food act in sequence to feed the mental body: Sense contacts (*phassa*) can lead to *mano sañcetanā*, which in turn cultivate *viññāṇa*.

- Such sense contacts (*samphassa*) automatically start *mano saṅkhāra*; then we start thinking and speaking about those favorite activities, i.e., we start *vacī saṅkhāra* (consciously think about them and even speaking about them). Then when the feelings get strong, we will start doing them (using *kāya saṅkhāra*).
- It is important to realize that *mano saṅkhāra*, *vacī saṅkhāra*, and *kāya saṅkhāra* are all generated in the mind: *Vacī saṅkhāra* are conscious thoughts that can lead to speech; *kāya saṅkhāra* are conscious thoughts that move the physical body.
- All three types of *saṅkhāra* arise due to *mano sañcetanā*. We cannot think, speak or do things without generating appropriate *mano sañcetanā*.

13. As we discussed before, the physical body is just a shell; it is controlled by the mental body (*gandhabba*).

- Sense contacts come through the physical body. When we get attached to them, we generate *mano sañcetanā* and think, speak, and act accordingly, generating various types of *viññāṇa*.
- *Kabalinka āhāra* or the food that we eat are experienced through one of the six sense contacts (tongue or *jivha pasāda*). If we eat food with greed, that also lead to *mano sañcetanā* and corresponding “greedy *viññāṇa*.” Therefore, *kabalinkāra āhāra* can also be a food for the mental body. More details can be found at “[Āhāra \(Food\) in Udayavaya Ñāna.](#)”
- That is why all four types can be food for the mental body.

A deeper discussion on the four types of food (*āhāra*) is in the post, “[Āhāra \(Food\) in Udayavaya Ñāna.](#)”

Next, “[Micchā Ditthi, Gandhabba, and Sotāpanna Stage](#)”,..

4.8.8 Micchā Ditthi, Gandhabba, and Sotāpanna Stage

May 6, 2017; September 24, 2019

Two Eightfold Paths

1. There are two Eightfold Paths: **mundane** and **Noble**. See, “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#)..”

- First, one starts on the **mundane Eightfold Path** by removing the ten types of *micchā diṭṭhi* or wrong views.
- It is only then one's mind is capable to see the "bigger picture" and one could comprehend the Three Characteristics or *Tilakkhaṇa* (*anicca, dukkha, anatta*) of this world of 31 realms. When one starts comprehending *Tilakkhaṇa* one starts on the **Noble Eightfold Path**.
- Once one comprehends *Tilakkhaṇa* to some extent, one becomes a *Sotāpanna*. Subsequently one can attain higher stages of *Nibbāna*.

2. But there are many people today who have at least some of the 10 types of *micchā diṭṭhi* and believe that they are on the **Noble Path**. But it is clear from above that some may not even be on the **mundane Path**.

- **Those 10 types of *micchā diṭṭhi* cannot be given up just by saying to oneself that one believes in them. One's mind must be convinced of it, and that conviction comes by learning Dhamma, true nature of this world.**
- In this post, we focus on the *para loka* and *gandhabba* because many *Theravadins* incorrectly assume that *gandhabba* is a *Mahayana* concept.

The Ten Types of *Micchā Diṭṭhi* (Wrong Views)

3. The 10 types of *micchā diṭṭhi* are listed in many *suttā*, including the [WebLink: suttacentral: Mahā Cattarisaka Sutta](#) and *Pathama Niraya Sagga Sutta* ([WebLink: suttacentral: Aṅguttara Nikāya: AN 10.211](#)): "*Natthi dinnam, natthi yiṭṭham, natthi hutam, natthi sukata dukkaṭānam kammānam phalam vipāko, natthi ayam loko, natthi paro loko, natthi mātā, natthi pitā, natthi sattā opapātikā, natthi loke samaṇabrāhmaṇā sammaggaṭā sammāpaṭipannā ye imaṇca lokam paraṇca lokam sayam abhiññā sacchikatvā pavedentī'ti.*" Translated, the wrong views are:

- Giving (*dāna*) has no merits
- being grateful and responding in kind (for what others have done for oneself) has no merits
- respecting and making offerings to those with higher virtues has no merits
- what we enjoy/suffer in this life is not due to *kamma vipāka* but they "just happen"
- this world does not exist
- ***para loka* or the world of *gandhabba* does not exist**
- there is no special person as a mother
- no special person as a father
- **there are no *opapātika* (instantaneous) births**
- **there are no *Samana brahmana* (basically *Ariyā* or *yogis*) with *abhiññā* powers who can see both this world (*imanca lokam*) and *para loka* (*paranca lokam*)**

Micchā Diṭṭhi (Wrong Views) About the *Gandhabba*

4. I have highlighted three types of *micchā diṭṭhi* that are common. They are somewhat inter-related. But the one about the *gandhabba* is a common *micchā diṭṭhi*. Even those who believe themselves to be "devout Buddhists" seem to have that wrong view. They believe that the Buddha did not teach about *gandhabba* or the *para loka*.

- There is [WebLink: suttacentral: Tirokutta petavatthu](#) in the *Petavatthu* in the *Khuddaka Nikāya* (KN). This has been translated to English (not very good), but one can get the idea: [WebLink: accesstoinsight: Tirokudda Kanda: Hungry Shades Outside the Walls](#).
- Also see, "[Antarabhava and Gandhabba](#)."

5. In many *suttā*, including [WebLink: suttcentral: Mahāsaccaka Sutta](#) and [WebLink: suttcentral: Bodhirājakumāra Sutta](#) the Buddha described how he saw human *gandhabbas* moving from one physical body to the next (in a single human *bhava*) with the *Pubbenivasanussati Ñāṇa* on the night he attained the *Buddhahood*.

- While *Ariyā* with *jhānā* can attain both the *Pubbenivasanussati Ñāṇa* (about previous human rebirths) and the *Cutupapada Ñāṇa* (about past births in all realms), other *yogis* can mostly acquire only the first one, i.e., they can see only their previous human births. **Note that this is related to the last type of *micchā diṭṭhi*, i.e., to believe that no such *Ariyā* or *yogis* exist.**
- In the *sutta* links above, the Pāli version is correct but English and Sinhala translations are not correct, because there is no distinction made between the *Pubbenivasanussati Ñāṇa* and the *Cutupapada Ñāṇa*. **With the first *Ñāṇa*, one can see previous human births and the with the second, one can see previous births in all 31 realms.**
- By the way, hereafter I will try to provide *sutta* references at the [WebLink: suttcentral: SuttaCentral site](#). They have not only the Pāli version, but also translations in different languages. **However, it must be kept in mind that some translations are incorrect, as mentioned above and also with the translations of *anicca* and *anatta*.**

***Gandhabba* is a Human Without a Human Body**

6. We also need to realize that *para loka* or the world of *gandhabba* (of both humans and animals) is NOT a separate realm.

- **In all other 29 realms, beings are born fully-formed instantaneously (*opapātika*) contrary to the 9th *micchā diṭṭhi* on the list above.** Those instantaneous births, of course, do not involve a mother’s womb, and one *bhava* means just one *jāti* (birth). For example, a *deva* or a *Brahma* is born once instantaneously. That *Brahma* dies only once.
- The difference in the human and animal realms is that those dense physical bodies have lifetimes much smaller than the *kammic* energies for the two *bhava*; see, [“Gandhabba – Only in Human and Animal Realms.”](#)
- When a human or an animal dies — and if there is leftover *kammic* energy for the human or animal *bhava* — then a *gandhabba* comes out of the dead body and waits for a suitable womb to be born (*jāti*) again in the same *bhava* (same realm).
- **Thus, contrary to the widespread belief, *gandhabba* is not an “*antarābhava*” (in between *bhava*; “*antara*” means “in between”), but rather is in the same *bhava*.** The confusion arises with not knowing the difference between *bhava* and *jāti*.

***Gandhabba* Lives in This World**

7. Until they find a suitable womb, those *gandhabba* are in “*para loka*” or the netherworld, which co-exists with our world (but normally we cannot see those fine bodies of *gandhabbas*).

- Thus a human may be reborn many times before switching to another existence (*deva*, *brahma*, animal, *preta*, etc).
- This is why rebirth stories are common. It is the “human *bhava*” that is extremely hard to get as the Buddha explained. But once in the human *bhava*, one could be born many times as human; see, [“How the Buddha Described the Chance of Rebirth in the Human Realm.”](#)
- The difference between *bhava* and *jāti* is explained in, [“*Bhava and Jāti – States of Existence and Births Therein.*”](#)

8. So, I hope one can understand the fact that one still has *micchā diṭṭhi* if one adamantly rejects the concept of *gandhabba*, or the concept of *opapatika* births.

- If one has any one of the ten *micchā diṭṭhi*, one is not yet on even the mundane Eightfold Path; see, "[Buddha Dhamma – In a Chart](#)" and the post referred to in that chart, "[What is Unique in Buddha Dhamma?](#)."
- The Buddha discussed this clearly in the "[Mahā Cattārisaka Sutta \(Discourse on the Great Forty\)](#)."

It is a Step-by-Step Process

9. In order to get to the *Sotāpanna* stage, the first step is to make sure that one learns *Dhamma* and clear up any remaining doubts about those ten types of *micchā diṭṭhi*.

- When one gets rid of all ten *micchā diṭṭhi*, then one is truly on the **mundane Eightfold Path**.
- At that point, one's mind been cleansed to a stage where one can comprehend deeper Dhamma concepts. In particular, the Three Characteristics of Nature (*Tilakkhaṇa*): *anicca*, *dukkha*, *anatta*. This is a deeper *micchā diṭṭhi*, the second type described in the *Mahā Cattarisaka Sutta*.
- When one comprehends the *Tilakkhaṇa* to some extent, one attains the *Sotāpanna* stage of *Nibbāna*. **That is when one gets to the Lokuttara (Noble) Eightfold Path.**
- Then, by following the Noble Eightfold Path one reaches the higher stages of *Nibbāna*, culminating at the *Arahant* stage.

10. **The Path to *Nibbāna* has been covered for hundreds of years due to fact that the above steps have not been clear. Furthermore, the meanings of those keywords, *anicca*, *dukkha*, *anatta* have been distorted.**

- That slow process of degradation of Buddha Dhamma took place over about 1500 years. In the late 1800's when the Europeans discovered the ancient Sanskrit and Pāli documents, they did more damage.
- They first discovered Sanskrit Hindu *Vedic* literature in India (Buddhism had disappeared from India long before that), and later came across the Pāli *Tipiṭaka* in Sri Lanka, Burma, and other Asian countries.
- The key problem arose when they ASSUMED that Sanskrit words "*anitya*" and "*anātma*" are the same as the Pāli words "*anicca*" and "*anatta*." **The Sanskrit words "*anitya*" and "*anātma*" do mean "impermanent" and "no-self", but the Pāli words "*anicca*" and "*anatta*" have totally different meanings.** See, "[Misinterpretation of Anicca and Anatta by Early European Scholars](#)."

More Information

11. That historical background is fully explained in many posts at the "[Historical Background](#)" section. But at least read the posts starting with "[Incorrect Theravāda Interpretations – Historical Timeline](#)."

- The correct meanings of *anicca*, *dukkha*, *anatta* have been discussed in the section, "[Anicca, Dukkha, Anatta](#)."

12. As for the instantaneous births, instances of such *opapātika* births occur in many *suttā*. For example, in the [WebLink: suttcentral: Mahā Parinibbāna Sutta](#), the Buddha told Ven. Ānanda about *opapātika* births of many people who died in a certain village: “..*Nandā, ānanda, bhikkhunī pañcannaṃ orambhāgiyānaṃ saṃyojanānaṃ parikkhayā opapātikā tattha parinibbāyiniṃ anāvattidhammā tasmā lokā..*”

- As I mentioned, the translations are available in several languages in the above SuttaCentral link for the *sutta*. For example, the above verse is translated into English as “..The nun Nandā, Ānanda, through the complete destruction of the five lower fetters has arisen spontaneously in the Brahmā worlds, and will attain Final Emancipation there, without returning from that world...”
- In Sinhala as: “..ආනන්දය, නන්දානම භික්ඛුණිය පස් ආකාර මරමිභංගිය (සන්වයන් කාමල කෙයනේ රඳවන) සංය ජේනයන් නන්තිකරීම නිසා මපපංතිකව (බික්මල කෙයනේ) උපන්නිය. ඒ (බික්ම) ල කෙයනේ වනෙස්න මෙන ස්වභව ඇතින ඵෙභිදම ජාතිවන් පංතිය...”

- However, please keep in mind that those SuttaCentral translations also can have errors (as is the case at most online sites as well as books), as I pointed out in #5 above.

Grasping the Real Nature

13. Finally, there may be people who attain *magga phala*, but had never even heard about *gandhabba* in this life. If one comprehends the *Tilakkhaṇa*, that is all needed.

- In such cases, they had not rejected the concept of a *gandhabba*. If someone explained the concept to them, they would accept it since they can see that it must be true.
- However, if one has heard those explanations and reject them as “nonsense”, that is *micchā diṭṭhi*. Those are the concept of a *gandhabba* (and *para loka*), instantaneous births, the existence of other realms, and the existence of *Ariyā* or *yogis* who have the ability to see such realms as well as *para loka*, and one rejects them as “nonsense”, that is *micchā diṭṭhi*.
- The only way to get rid of such *micchā diṭṭhi* is to examine those concepts and convince oneself that those must be true.

14. In that process, it is also necessary that one lives a moral life staying away from *dasa akusala* as much as possible, as explained in the “[Living Dhamma](#)” section. It is important for anyone to experience the mental clarity (and the “peace of mind” or “*niveema*”) that comes with staying away from *dasa akusala*.

- By the way, the strongest of the *dasa akusala* is *micchā diṭṭhi*, which includes not only the 10 types but also ignorance about *Tilakkhaṇa*. This is why a *Sotāpanna* removes 99% or more of the defilement by getting rid of the BOTH types of *micchā diṭṭhi*; see, “[What is the only Akusala Removed by a Sotāpanna?](#).”
- **The first type of *micchā diṭṭhi*** is about the 10 types discussed in #3 above, which includes believing that nothing happens without a cause, bad causes (*dasa akusala*) lead to bad consequences, etc. **The second type** is about not knowing the true nature of this world of 31 realms, i.e., that it is not possible to maintain anything to one’s satisfaction (*anicca*), one is subjected to suffering because of that (*dukkha*), and thus, one is truly helpless in this rebirth process (*anatta*).
- However, it is difficult to “see” those *Tilakkhaṇa* until one believes in that bigger picture. That includes the 31 realms and the rebirth process and the concept of *para loka* with *gandhabbas*.

4.8.9 Working of kammā – Critical Role of Conditions

May 21, 2017

1. We can see various levels of human happiness/suffering around us. We see some people live with relatively higher levels of health, wealth, and happiness, while others live in poverty, ill-health, and misery.

- We become distraught upon hearing that a child died prematurely, or someone was brutally murdered. Of course, we should generate empathy and sympathy, and also do our utmost to prevent such horrible occurrences.
- However, we also need to look at the CAUSES for such things to happen. Once we understand the underlying causes, we will be able to prevent such things happening to us in the future, if not in this life, in future lives.
- Nothing happens in this world without a reason or without a cause (normally multiple causes). In order to prevent tragic outcomes, we need to locate the causes and eliminate them.
- **This is the key message of the Buddha: It is not possible to eliminate the suffering that has arisen (we can minimize it), but we can eliminate FUTURE suffering from arising.**

2. The principle of cause and effect (*hetu/phala*) is a key principle in Buddha Dhamma, as in modern science.

- Science is all about finding out HOW things HAPPEN around us due to CAUSES. A pebble on the ground will not go up by itself unless some energy is given to it, i.e., we have to pick it up and throw it up.
 - We receive sunlight because of the Sun is putting out a vast amount of energy every second. And science has figured out how that happens: That energy comes from nuclear reactions in it; Sun is a giant fusion reactor.
 - With the development of modern science we have figured out that nothing happens without a cause; normally there are more than one cause that lead to an effect.
3. However, science has not yet figured out that what happen to humans or any living being are also due to causes.
- Does it just happens that X is born healthy and wealthy, Y is born healthy but poor, and Z is born handicapped and poor?
 - There must be REASONS why X, Y, and Z are born that way.
 - Not only that, many times a person born rich can become poor, and vice versa. Or a person in good health can die suddenly in an accident or by a heart attack. There must be reasons for such “turnarounds” too!
 - The laws of *kammā* can explain all the above. But the laws of *kammā* are not just based causes and effects, they DEPEND on CONDITIONS. That is what prevents laws of *kammā* being deterministic, i.e., one's future is NOT determined by one's past actions or *kammā*.
4. Science has been unable to come up with explanations for the effects discussed above. There are two key reasons for this lack of progress in science.
- **First**, unlike with inert objects like a pebble, **a living being has a mind**. When a person moves, the cause for that movement originates in that person's mind, i.e., the person decides to move. Your hand will not move until you decide to move it. **And you have the power to STOP its movement too!**
 - **The second difference** is that for living beings **there is a rebirth process**. The laws of *kammā* cannot be explained without accepting the rebirth process. This is why not believing in rebirth is a strong *micchā dīṭṭhi*. With that wrong vision, one will never be able to figure out the true nature of the world and explain why there are so many variations of happiness/misery in living beings; see, [“Complexity of Life and the Way to Seek “Good Rebirths”](#)” and [“Micchā Dīṭṭhi, Gandhabba, and Sotāpanna Stage.”](#)
 - The present life of about 100 years is only an extremely short time in our *sansāric* journey (rebirth process). As we go from life to life, our mental states as well as our physical appearances change; see, [“What Reincarnates? – Concept of a Lifestream.”](#)
5. So, anything and everything in this world happen due to reasons or causes. However, just because there is a cause, it is not guaranteed that it will give rise to the corresponding effect.
- **In the terminology of Buddha Dhamma, past *kammā* do not necessarily lead to *kammā vipāka*.**
 - We can grasp this key idea with an example.
6. A seed CAN give rise to a tree. It has the POTENTIAL to bring a tree to existence. However, for that to happen, suitable CONDITIONS must be present.
- If we keep a seed in a cool, dry place it will not give rise to a tree, and will remain a seed with that POTENTIAL for hundreds of years.
 - Eventually, that potential to bring about a tree will go away and the seed will be “dead.”
7. When a strong *kammā* is done, that creates a *kammā bīja*, or a *kammā* seed, that works pretty much like a normal seed that we discussed above.
- For that *kammā bīja* to bring about its result, i.e., *kammā vipāka*, suitable CONDITIONS must exist.

- If suitable conditions do not materialize for long times, then that *kammā bīja* will lose its energy and it is said that it will become an *ahosi kammā*, i.e., that *kammā* will not bring about any *kammā vipāka*.
8. As we mentioned above, the other important factor in this complex process is that a given living being has gone through a rebirth process that has no discoverable beginning.
- **In this unimaginably long rebirth process, we all have accumulated uncountable *kammā* seeds, both good and bad.**
 - Those good *kammā* seeds can bring about good results (health, wealth, beauty, etc), and bad *kammā* seeds bad results (ailments, handicaps, poverty, etc).
 - But either kind can run out of energy without giving results (*vipāka*), if suitable CONDITIONS do not appear within a period of time.
9. A seed cannot germinate unless required CONDITIONS are provided (i.e., it should be placed in the ground and water, sunlight, and nutrients need to be provided).
- In the same way, we can avoid many possible bad *kammā vipāka* by being mindful and not providing conditions for them to appear. We can also MAKE conditions for good *kammā vipāka* to bring about good results.
 - For example, if one goes into a bad neighborhood at night, that is providing conditions for any suitable bad *kammā* seeds waiting to bring about their bad *vipāka*. On the other hand, we cannot be successful in any project unless we are willing to provide right conditions: to pass an examination, we must prepare for it by studying.
 - Even if one is born poor, one could work hard and come out of poverty. If one is prone to catching diseases, one could eat healthy, exercise, and overcome at least some of the recurring ailments. *Kammā* is not deterministic, see, "[What is Kamma? – Is Everything Determined by Kamma?](#)"
10. But of course it will be difficult to overcome the results of very strong *kammā* seeds. One may be born handicapped due to a strong *kammā* seed that was generated in a previous birth.
- In the same way, strong good *kammā* seeds can bring about good results without much effort. Some are born rich, healthy, and wealthy due to a past strong good *kammā* seed coming to fruition.
11. So, I hope it is clear that one's happiness in this life could be determined by several different factors.
- In relatively few cases, one could automatically (without much effort) receive health, wealth, and RELATIVE happiness due to strong *kammā* seeds. In the same way, some others could be facing miserable lives.
 - However, on the average, one's happiness in this life to a large extent is determined by one's willingness to make right CONDITIONS for good *vipāka* to take place and prevent bad *vipāka* from appearing.
 - Even more importantly, one could make conditions for health, wealth, etc in future lives by living moral lives and doing good deeds.
12. Now let us look at what happens when a result materializes due to a *kammā vipāka*. Once a bad *vipāka* materializes, we can certainly manage it to minimize its effects, and in some cases even get rid of it by working to making conditions for a good *kammā* seed to overcome it.
- For example, if one comes down with cancer, in some cases it can be overcome by good medical treatment, i.e., making conditions to counter the initial effect.
 - If one is born tall or short, there is nothing much one can do about it. If one is born handicapped, one will have to live the whole life that way.
 - As we can see, we can improve some of those *kammā vipāka*, while we cannot do much about some others.

- Even the Buddha could not avoid certain *vipāka*. He had back aches and Devadatta was able to injure his foot. Ven. Moggallana was beaten to death.

13. Another observation we can make from the above discussion is that when one becomes an *Arahant* (or even a Buddha), his suffering is not completely ended at the *Arahanthood*. He still had to suffer due to the physical body that had already “started.”

- So, what was meant by “removal of suffering” when one attains *Nibbāna*? It is the future suffering (i.e., suffering in future lives) that is ended. When an *Arahant* attains *Parinibbāna* (i.e., physical death), he/she will not be reborn in this suffering-filled world of 31 realms, and that is when the suffering completely ends.
- However, as we have discussed, part of suffering ends with the attainment of *Arahanthood*: suffering associated with “*saṅkhāra dukkhā*” or what is called “*samphassa jā vedanā*”; see, “[Vedanā \(Feelings\) Arise in Two Ways.](#)”

14. Of course, IN THE LONG RUN (in the rebirth process), no matter how hard one strives, it will be IMPOSSIBLE to attain PERMANENT happiness **anywhere in this world**. This is called *anicca* nature. That is why we need to strive to attain *Nibbāna* to avoid future suffering.

- However, it is not an easy task to even to beginning to comprehend the *anicca* nature, until one enters the **mundane Eightfold Path** by getting rid of the 10 types of *micchā ditṭhi*, **which include not believing in rebirth or the concept of a *gandhabba***; see, “[Micchā Ditṭhi, Gandhabba, and Sotāpanna Stage.](#)”
- Only when one enters the **mundane Eightfold Path** that one will be able to grasp the Three Characteristics of Nature (*anicca, dukkha, anatta*), and start on the **Noble Eightfold Path** to attain *Nibbāna*.
- The two types of Eightfold Paths were discussed by the Buddha in the “[Mahā Cattārīsaka Sutta \(Discourse on the Great Forty\)](#).” Also see, “[Buddha Dhamma – In a Chart.](#)”

15. Finally, the role of conditions in the laws of *kammā* are inherent in the *Paṭicca Samuppāda*; see, “[What Does “Paccaya” Mean in Paṭicca Samuppāda?](#)” and “[Paṭthāna Dhamma – Connection to Cause and Effect \(Hetu Phala\)](#).”

- *Paṭicca Samuppāda* is discussed in the section: “[Paṭicca Samuppāda.](#)”

4.9 Nāma & Rūpa to Nāmarūpa

May 26, 2017

In this important subsection, we will discuss the link between mind (*nāma*) and matter (*rūpa*). These are deeper analyses. For simpler analyses, see, “[The Five Aggregates \(Pañcakkhandha\)](#).”

- [Rūpa Aggregate](#)
 - [Bhūta and Yathābhūta – What Do They Really Mean](#)

4.9.1 Rūpa Aggregate

[Bhūta and Yathābhūta – What Do They Really Mean](#)

[What are rūpa? – Dhamma are rūpa too!](#)

4.9.1.1 Bhūta and Yathābhūta – What Do They Really Mean

December 28, 2017

1. *Yathābhūta* is normally translated as “true nature” (which is a bit close to the true meaning). From that, it seems, *bhūta* is translated as “nature”; sometimes *bhūta* is translated as “becoming.” Both are wrong.
 - These words are also associated with *yathābhūta ñāṇa*. By the end of this discussion one will know what that *ñāṇa* or wisdom is about.
2. *Bhūta* is a Sinhala word as well as a Pāli word. It literally means a “ghost.” The deeper meaning is associated with the “*satara mahā bhūta*”: *pathavi, āpo, tejo, vāyo*.
 - One cannot ever see those *satara mahā bhūta* individually. The smallest unit containing any of them is a *suddhaṭṭhaka*, which consists of those four (*pathavi, āpo, tejo, vāyo*) AND *varna, gandha, rasa, oja*. Thus a *suddhaṭṭhaka* (“*suddha*” + “*ashta*” where “*suddha*” is pure or fundamental and “*ashta*” is eight) means “pure octad” or “pure unit of eight.” How a *suddhaṭṭhaka* is formed is discussed in “[The Origin of Matter – Suddhatthaka.](#)”
 - It should also be noted that *satara mahā bhūta* are the primary *rūpa*. All others, including *varna, gandha, rasa, oja*, are derived from them and are called *upādaya rūpa*.
3. As mentioned in that post, *bhūta* have their origins in “*gathi*.” When one cultivates a certain *gathi* and when they become strong, they can lead to the creation of *bhūta (suddhaṭṭhaka)* produced via their *javana citta*.
 - So, in order to get a good understanding of these key words, one needs to know about *gathi* (I have sometimes spelled as *gati*), which is discussed in many posts at the site. For example, see, “[Gati, Bhava, and Jāti.](#)”
4. Scientists have now verified the illusive nature of matter at very small scale. Atoms were thought to be the smallest possible division of matter until 1897 when J.J. Thomson discovered the electron. Then it was realized that an atom is made of smaller units (protons, neutrons, and electrons), and then those were found to have structure too, but they sub-units (quarks, etc) cannot be detected individually).
 - With the advent of quantum mechanics, the distinction between matter and energy has become blurred. The mass of a particle depends on its speed, and its mass when it is at rest is the smallest. Photons or “particles of light” have zero mass at rest, i.e., zero rest mass. It is now typical to state the mass of an elementary particle in terms of energy units.
 - It has become clear that matter has an illusive nature when tried to figure out the “smallest units” from which all matter is composed of.
5. Furthermore, it is not possible to determine the exact position of an elementary particle at a given time. For example, it is only possible to say that an electron can be within a certain region of space. Thus, an electron is like a ghost. It cannot be pinned down to be at a certain location.
 - The situation is even worse for a photon, a particle of light. When a photon is released, one can only find it at a later time by stopping it at a detector. It is IMPOSSIBLE to state the exact path of the photon from the source to the detector. It could have been anywhere in between. The same applies to an electron too, even though it has a non-zero rest mass.
 - This has been referred to as “quantum weirdness.” Those small particles are as elusive as ghosts.
6. That is exactly what the Buddha said. A *suddhaṭṭhaka* is much smaller than even a photon, and the Buddha said that *satara mahā bhūta* are the true “smallest units of matter.” This is why he called them *bhūta*. One can NEVER see them or detect them individually. As we mentioned above, the smallest unit of *rūpa*, or a *suddhaṭṭhaka* consists of eight sub units.
 - Furthermore, these *bhūta* arise from *gathi* of living beings (mostly human and above); see, “[The Origin of Matter – Suddhatthaka.](#)” A person with rough character qualities is likely to create *suddhaṭṭhaka* with higher proportion of *pathavi*, etc.

7. No one will be able to “see” or figure out how *gathi* are transformed to *bhūta* or *suddhaṭṭhaka* stage. Only a Buddha can discern that.

- Billions of billions of *suddhaṭṭhaka* are combined to lead to the *mahā bhūta* stage of *rūpa*. *Brahmā* have bodies made of *mahā bhūta*. Only *brahmā* can see such fine *rūpa*.
- When large number of *mahā bhūta* combine, that leads to the *dhātu* stage of *rūpa*. Bodies of *devas* are at fine *dhātu* stage. Our human bodies are made of much denser *dhātu* stage of *rūpa*.

8. All mater that we see are made of such dense *dhātu*. Rocks have *dhātu* that have mostly *pathavi*. Water mostly has *āpo*. Fire mostly has *tejo*, Wind mostly had *vāyo*. That is why earth, water, fire, wind are loosely referred to as *pathavi*, *āpo*, *tejo*, *vāyo*.

9. When someone comprehends what we discussed above about the true nature of matter that exists in this world, one is said to have the *yathābhūta ñāṇa*. However, just reading about them is just the start. That *ñāṇa* grows as one comprehends the finer details.

- *Yathā* means the true nature. *Yathābhūta* means the true nature of matter or true nature of *bhūta*, which arise via the MIND. Of course, more finer details need a good understanding of *Abhidhamma*.
- However, for most purposes, it is sufficient to have the above discussed rough idea. As one learns more, the details will be automatically filled in.

10. This is also why the Buddha said, “*mano pubbangamā dhammā, mano settā manomayā*” in the famous *Dhammapada gāthā*.

- It means “everything in this world has its origins in the mind, all are set by the mind and prepared by the mind.”

11. *Suddhaṭṭhaka* by themselves are inert. They acquire “life” when energized by the mind in the formation of “*kammaja rūpa*.” This energy is embedded as rotation (*paribramana*) and spin (*bramana*). When that embedded energy runs out, rotation and spin stop and they again become inert.

- For example, a *hadaya vatthu* for a new existence comes into being as a *kammaja rūpa* at the *cuti-paṭisandhi* moment. During its lifetime, the *hadaya vatthu* maintains its spin and rotation. When the *kammic* energy embedded is exhausted, its motion stops and the *bhava* ends. At that time, a new *hadaya vatthu* for a new *bhava* is formed by *kammic* energy.

12. The *hadaya vatthu* is also called “*vatthu dasaka*” where *dasaka* means ten. This is because the *hadaya vatthu* or *vatthu dasaka* has two modes of energy (spin and rotation) in addition to the 8 parts in the inert *suddhaṭṭhaka*. That why it is called a *dasaka* (made of ten units).

- This added spin and rotation is what gives life to an inert *suddhaṭṭhaka*. That power of energy is given by *javana citta* (mind). The more energy given to a *kamma bīja*, it will sustain a *bhava* (*hadaya vatthu*) that arises from it for a longer time.
- Same is true for the five *pasāda rūpa* (*cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*) formed at the moment of *cuti-paṭisandhi*. There are two *bhava rūpa* which are also *dasaka*, and *jivitindriya rūpa* which is a *navaka* (just spin or *bramana*). How different modes of rotation and spin give rise to these nine “life forming” basic units is discussed in the post: “[Gandhabba Sensing the World – With and Without a Physical Body.](#)”
- By the way, the word *kammaja* comes from “*kamma*” + “*ja*” where “*ja*” means birth. Therefore, those nine *kammaja rūpa* are created by *kammic* energy.

13. Now we can clearly see that our heavy physical body, by itself, is totally inert. The real life is in the *gandhabba* with the *hadaya vatthu* and the five *pasāda rūpa*. Our body movements are controlled by the *kāya dasaka* of the *gandhabba* and it is spread like a very fine mesh over the whole body.

- At the death of the physical body, this life-carrying *gandhabba* leaves the body and the body becomes inert and starts decaying.
- In the case of an out-of-body experience (OBE), even though the *gandhabba* leaves the physical body, it is still connected to the physical body (by a “silver cord” in the terminology of astral projection) and that is why the body does not start to decay: “[Manomaya Kāya and Out-of-Body Experience \(OBE\)](#).”

14. Therefore, in all life forms in the 31 realms the real life is in the ultra-fine life form of a *hadaya vatthu* accompanied by up to five *pasāda rūpa*. In *arupavaccara brahma* realms, there is only the *hadaya vatthu*. In *rupavaccara brahma* realms, *hadaya vatthu* is accompanied by *cakkhu* and *sota pasāda rūpa*. In all other realms, five *pasāda rūpa* exist with the *hadaya vatthu*.

- The only exception is *asañña* realm, where only the *kāya dasaka* is maintained by the *jivitindriya* (no *hadaya vatthu*, since thoughts are not generated).
- **This is another critical factor in the *yathābhūta ñāṇa*: All life forms are like *bhūta* (ghosts); in essence, life is maintained by a ultra-fine body that is impossible to see and have temporary existence.** Any life in any realm is short-lived in the *samsāric* scale. In the *samsāric* scale trillion years is like a drop of water in the ocean.

15. **This *yathābhūta ñāṇa* about the real nature of our body also helps to get rid of the “*ghāṇa saññā*” about our bodies.** One values one’s dense body so much because one believes that there is a “self” in the physical body.

- Those with *ucceda diṭṭhi* (like most current scientists and philosophers) believe that our physical body (and its brain) is all that is there.
- Those with *sāssata diṭṭhi* believe that there is a mental body that lives forever.

16. Buddha discovered that both those are wrong views. There is a mental body, but it drastically changes from *bhava* to *bhava*. One could be a *deva* or a human for a time being, but the next *bhava* could be in the *apāyā*.

- There is nothing in our physical body worth to be taken as “mine.”
- When one comprehends this fact, *sakkāya diṭṭhi* (which is one of four conditions to attain the *Sotāpanna* stage) is removed. However, it is just one way to remove *sakkāya diṭṭhi*.
- This aspect is discussed in “[WebLink: suttacentral: Mūlapariyāya Sutta \(MN 1\)](#),” “[WebLink: suttacentral: Kaccānagotta Sutta \(SN 12.15\)](#),” AND “[WebLink: suttacentral: Mahā Hatthipadopama Sutta \(MN 28\)](#),” among others.

17. Now we see that the precursors for all matter in this world, *satara mahā bhūta*, are mind-made and have a transient existence. They are “*bhūta*” or “ghosts.” And since everything else is made of them, what we consider to be “solid, tangible things” in this world are really “ghost-like.”

- The knowledge of this real “ghost-like” nature is called “*yathābhūta ñāṇa*.” When one has that knowledge, one looks at the world according that correct view, which is called “*anu bhūtam*.”
- **When one is not aware of this true nature, it is called “*na anu bhūtam*” which rhymes as “*ananubhūtam*.”** It is to noted that many key Pāli words are composed that way: *anatta* is “*na*” + “*atta*”; see, “[Anatta – the Opposite of Which Atta?](#).”
- *Anantariya* is “*na*” + “*an*” + “*antara*.” Words like this cannot be analyzed grammatically. This is why current Pāli experts are wrong in interpreting such words (and are unable to interpret many key words).
- This word “*ananubhūtam*” comes in several key *suttā*, including the ones mentioned above in #16.

18. One good example is the famous [WebLink: suttacentral: Brahmanimantanika Sutta \(Majjhima Nikāya 49\)](#): “*Viññāṇaṃ anidassanaṃ anantaṃ sabbato pabhaṃ, taṃ pathaviyā pathavattena ananubhūtaṃ, āpassa āpattena ananubhūtaṃ, tejassa tejattena ananubhūtaṃ, vāyassavāyattena ananubhūtaṃ,*

bhūtānaṃ bhūtattena ananubhūtaṃ, devānaṃ devattena ananubhūtaṃ, pajāpatissa pajāpatittena ananubhūtaṃ, brahmānaṃ brahmattena ananubhūtaṃ, ābhassarānaṃ ābhassarattena ananubhūtaṃ, subhakiṇhānaṃ subhakiṇhānaṃ subhakiṇhattena ananubhūtaṃ, vehapphalānaṃ vehapphalattena ananubhūtaṃ, abhibhussa abhibhuttena ananubhūtaṃ, sabbassa sabbattena ananubhūtaṃ..”

Translated: “*Viññāṇa* is unseen, infinite, and leads to the rebirth process for all. With *viññāṇa* one cannot comprehend the real nature of *pathavi, āpo, tejo, vāyo, bhūta, deva, pajapti brahma, abhassara brahma, subhakinha brahma, vehapphala brahma*, etc. and everything in this world (*sabba*).”

- One has a **defiled consciousness or *viññāṇa*** until one attains the *Arahantship*. Until then one cannot fully comprehend the real “ghost-like” nature of everything in this world, i.e., one’s *yathābhūta ṇāṇa* is not complete.
- We will discuss the first part of the verse “*Viññāṇaṃ anidassanaṃ anantaṃ sabbato pabhaṃ..”* in the next post. **This short phrase is commonly mistranslated.**

19. Another major sutta where it appears is “[WebLink: suttacentral: Saḷāyatana Vibhaṅga Sutta \(MN 137\)](#)“: “*Rūpānaṃ tveva aniccataṃ veditvā vipariṇānavirāganirodham, ‘pubbe ceva rūpā etarahi ca sabbe te rūpā aniccā dukkhā vipariṇāmadhammā’ ti evametam yathābhūtaṃ sammappaññāya passato uppajjati somanassaṃ.*”

Loosely Translated: Any *rūpa* that has existed or in existence now, has the “ghost-like transient nature.” That is the reason why they change unexpectedly (*viparinama*) and **have the *anicca* nature. When one comprehends this true nature, it leads to joy in one’s mind (*somanassa*).**”

4.9.1.2 What are rūpa? – Dhammā are rūpa too!

May 13, 2017; revised November 4, 2017

All our conscious thoughts start with one of the **six** senses getting an input from the external world. With those six sense faculties, we detect six types of *rūpa* “out there” in the world.

1. Many people think *rūpa* means just “material things” that we can see out in the world. **But EVERYTHING that we sense through our six senses are *rūpa*.** I will systematically explain this.

- Those things that we detect with our five physical senses are what we can call “dense *rūpa*” made of *suddhaṭṭhaka*, i.e, they are made of *mahā bhūta (pathavi, āpo, tejo, vāyo)*.; see, “[The Origin of Matter – Suddhatthaka](#).”
- **Such *rūpa* that we detect with the *mana indriya* are called “*dhammā*.”** These are **just energies** and have not condensed to the *suddhaṭṭhaka* level, i.e., **they are below** the *suddhaṭṭhaka* stage.
- It is good to remember that *dhamma* refers to a doctrine (like in Buddha Dhamma,) and *dhammā* refers to such very fine *rupā*.
- Let us discuss those two types of *rūpa* in detail first.

2. **All things that we experience through our SIX senses are *rūpa*, but the first FIVE types of sensory inputs come through five “sensors” obvious to everyone (eyes, ears, nose, tongue, and body).** The SIXTH one, called *mana indriya* (located in the brain) is not known to science. That is clearly stated in the *Cha Chakka Sutta*, as discussed below.

- **All six types are eventually EXPERIENCED by the mind, i.e., with *citta* (thoughts) with *cetasika* (mental factors) in them.**
- For details of how the mind experiences the sensory inputs that come through the six “sense doors,” see, “[Brain – Interface between Mind and Body](#).”

3. Those that we experience through our FIVE physical senses (eyes, ears, nose, tongue, and the body) are “dense *rūpa*.” They have *suddhaṭṭhaka* made of the four great elements or the “*cattāri mahā bhūta*.”
- Those five kinds of *rūpa* are all in our “*rūpa loka*,” the world that we experience.
 - What we touch with our **body** or see with our **eyes** are the *rūpa* that are familiar to everyone. They are sometimes called “*rūpa rūpa*” or “*vaṇṇa rūpa*” (*varna rūpa* in Sinhala or Sanskrit) to distinguish from other four types.
 - However, we need light to “see” those “*rūpa rūpa*.” Light consists of tiny particles called photons. Those photons have very small masses due to their energies.
4. Now, let us look at the other four types of *rūpa* that we detect with our ears, noses, tongues.
- It is easy to see that what we taste are also “*rūpa rūpa*,” i.e., solid food or liquids.
 - What we detect with the nose are scents, which are really very small particulates. So, they are also “*rūpa rūpa*.”
 - When we hear sounds, our ears detect disturbances in the air due to that sound. Sound, therefore, involves energy, just like light. Sometimes sound energy is attributed to energy packets called “phonons.”
5. Therefore, detection of *rūpa* in the “*rūpa loka*” involve matter or energy, and all those are above the *suddhaṭṭhaka* stage.
- Yes. The light particles or photons are also made of *suddhaṭṭhaka*.
 - They are above the *suddhaṭṭhaka* stage, so one can see how minute a *suddhaṭṭhaka* is; it is much, much smaller than an atom in modern science.
 - For example, a photon in the visible range (which is a *suddhaṭṭhaka*) is a billion times less massive than a hydrogen atom, the smallest atom. That is like the mass difference between a grain of sand an average airplane.
 - A *suddhaṭṭhaka* could be a billion times smaller than that photon.
6. That is actually another example of how Buddha was ahead of modern science 2500 years ago. He had categorized all five “objects” sensed by the five physical senses as “*rūpa*” made up of *suddhaṭṭhaka*. It was only about 100 years ago that science identified photons as particles, with the advent of quantum mechanics.
- Even many physicists did not accept the particle nature of light until the single-photon detection experiments of Grainger, Roger, and Aspect in 1986: [WebLink: PDF file: Grainger et al-Experimental Evidence for a Photon Anticorrelation Effect-1986](#)
 - Now it is accepted that light is made up of particles called photons.
7. Now let us think about what else we experience, other than those detected with the five physical senses. Imagine someone trapped in a cell with soundproof walls with no light inside and nothing in that room except its walls.
- That person can only touch the walls. He cannot see, hear, smell, or taste anything.
 - But touch is not the only sense experience he has. He can think about anything he wants to. He can think about past events, and he can think about what can take place in the future.
 - Those thoughts do not come at random, but due to *kamma vipāka*. Of course, one can willingly recall them too. They are one's memories and future hopes, among others. That is the part that most people don't even consider.
8. As we discussed above, those are the finer *rūpa* detected by the mind lie below the *suddhaṭṭhaka* stage. They are detected by the *mana indriya* in the brain (another fact unknown to science) and subsequently sensed by the mind.

- *Kamma bīja* — that are generated by our minds (via our thoughts) — are also part of *dhammā*. They bring *kamma vipāka* back to from time to time. These are what we think of as “random thoughts” that come to us about things and people.
- Those *dhammā* are not coarse enough to be “seeing” even with *abhiññā* powers and do not make contact with other five coarse senses. Thus they are called, “*anidassanaṃ appaṭighaṃ dhammayatana pariyapanna rūpaṃ*.”
- Here, “*anidassana*” means “cannot be seen” and “*appaṭigha*” means “cannot be touched or sensed with even the finest instrument.” And, “*dhammayatana pariyapanna rūpaṃ*” means “can make contact only with the *dhammāyatana* or *mana indriya*”; see, “[What are Dhamma? – A Deeper Analysis](#).”

9. We see a person when light reflected off of that person comes to our eyes. A sound is heard when the air disturbances due to that sound reach our ears. We smell a scent when tiny particulates of scent reach our noses. When food particles make contact with our tongues we taste the food.

- So, we have five physical “sensors” on our bodies to detect those five five sense inputs. They are **eyes, ears, nose, tongue, and our bodies**. They are called *cakkhu, sota, ghāṇa, jivhā, and kāya indriya*.
- The sixth sense that we have is called the *mana indriya*. It is located in the brain. But I have not yet been able to identify it with the known components in the brain. Of course, scientists do not think about it that way. This is how the Buddha described it.

10. We detect “*dhammā*” with the *mana indriya*, just like we detect pictures with *cakkhu indriya* or sounds with *sota indriya* (ears). But all these sense inputs are “felt” by the mind (*hadaya vatthu*) located close to the physical heart; see, “[Brain – Interface between Mind and Body](#).”

- **These *dhammā* are also *rūpa* in Buddha Dhamma**, but they are even finer (subtle) than those light particles or photons.
- “***Dhammā*” are just energies that lie BELOW the *suddhaṭṭhaka* stage. They cannot be detected with even the finest scientific instrument.**
- **That person locked up in an isolated room can generate thoughts about his past or future. That involves *dhammā* and the *mana indriya*.**

11. Just like the dense *rūpa* that we detect with our five physical senses are in our “*rūpa loka*,” these *dhammā* (which are the same as *kamma bīja*) are in our “*mano loka*”; see, “[Our Two Worlds: Material and Mental](#).”

- This *mano loka* is also called “*bhava*” because that is where one’s *kamma bīja* are, as we mentioned above, in #8. We all have numerous *kamma bīja* that can give rise to a variety of *bhava* at the *cuti-paṭisandhi* moment when a new *bhava* is grasped (the strongest *kamma bīja* corresponding to an appropriate *bhava* is selected).
- Of course, *kamma vipāka* during a given life also arise due to smaller *kamma bīja*, as mentioned above.
- When *kamma bīja* lose their energies over long times, they become just “records,” of what happened. Now they cannot bring any more *vipāka*, but become only “memories.”

12. So, these *dhammā* (or *kamma bīja*) are *rūpa* that are below the *suddhaṭṭhaka* stage, and are in our “*mano loka*” or “mental world,” as opposed to those dense *rūpa* that are in our “material world” or “*rūpa loka*.”

- The “mental world” is all around us, just like the “material world,” but of course we cannot “see it,” just like we cannot “see” all those radio, television, and cell phone signals that are all around us.
- But we do know that those radio, television, and cell phone signals are there because we can receive them with our radios, TVs, and cell phones. Just the same way, we receive those “*dhammā*” with our *mana indriya*.

- One may be engaged in some task, say washing dishes in the kitchen, but all of a sudden, a thought may come to mind about a friend far away or some incident at work. That is due to “*dhammā*” impinging on *mana indriya* due to *kamma vipāka*.
- Also, we can recall such memories at our will too.

13. Those who are familiar with *Abhidhamma* know that a “seeing event” is a sense input through the eyes: “*cakkhuñca paṭicca rūpe ca uppajjati cakkhuviññāṇaṃ*,” i.e., “eye-consciousness arises when a ***rūpa*** (*rūpa*) (with the aid of light) impinges on the eyes.”

- Similarly, hearing is due to: “*sotañca paṭicca sadde ca uppajjati sotaviññāṇaṃ*,” etc. for other physical senses of *ghāṇa* (smell), *jivhā* (taste), and *kāya* (body).
- Finally, detection of *dhammā* with the *mana indriya* is stated as “*manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ*.”

14. We also need to realize that “*dhammā*” can have somewhat different meaning too, depending on the where used.

- Buddha Dhamma means the teachings of the Buddha. Here it is usually written as “Dhamma,” but some do write it as Buddha Dhammā.
- So, we need to take the appropriate meaning of a given word depending on the context.

15. For those who are familiar with *Abhdhamma*, we can state the above with *Abhdhamma* language as follows. According to Buddha Dhamma EVERYTHING in existence can be put into four ultimate realities (*paramatthatha*):

- Thoughts (***citta***)
- Thought qualities or mental factors (***cetasika***)
- Matter (***rūpa***) which (includes energy and *dhammā*.)
- ***Nibbāna***

16. As we will see later, it is these *dhammā* that eventually lead to the formation of dense *rūpa* that we enjoy with our five physical senses.

Such **dense *rūpa*** have finite lifetimes (they are impermanent). **Besides, they change unpredictably during their existence, and that is called *viparinama lakkhana*.**

- But no matter how hard one tries, one is unable to maintain such **dense *rūpa*** to one’s satisfaction (*anicca*). Thus, such **dense *rūpa*** leads to more **suffering** than any pleasure.
- Five types of **dense *rūpa*** are in our “*rūpa loka*”, the less dense *dhammā* are in our “*mano loka*”; see, “[Our Two Worlds: Material and Mental](#).”
- A living being exists to experience such **dense *rūpa*** and hopes to enjoy them with the mind (with *citta* and *cetasika*). That is the basis of existence in a sentence.

17. The Buddha said, “*sabbe dhammā |anattā|*,” i.e., “all *dhammā* are without essence at the end” and must be given up to attain *Nibbāna*. But that cannot be done by sheer will power: One has to comprehend the true nature — *Tilakkhana* — to see the real nature of all *rūpa*, including *dhammā*.

- We make our own world by creating *dhammā* our own. That is a critical point that I will try to explain in future posts in this “[Living Dhamma](#)” section.
- The basis for making *dhammā* are our thoughts with *javana citta*. A *javana citta* generates “*kamma bīja*,” and they give rise to future *kamma vipāka*. So, *kamma bīja* are *dhammā*. They are very tiny packets of energy below the *suddhaṭṭhaka* stage.

- But some *javana* (especially in *jhāna samāpatti*) can create energies above the *suddhaṭṭhaka* stage, i.e., they can produce tangible *rūpa*. That is how one with *abhiññā* powers can “create” physical objects.
18. Any *rūpa* (including *kamma bīja*) that one makes for oneself, cannot be maintained to one’s satisfaction.
- Any *rūpa* with energy will eventually be destroyed, or that energy will wear out. Furthermore, such *rūpa* can and will change unexpectedly while in existence too; that is the *viparinama* characteristic and is a root cause of suffering.
 - The only *dhammā* that are “permanent” are *nāma gotta*, **records** of our *saṅkhāra*, which do not have energy in them; “[Namagotta, Bhava, Kamma Bīja, and Mano Thalaya \(Mind Plane\)](#).”
19. When one sees the perils of this rebirth process (after one grasps the *Tilakkhaṇa*), one stops making those causes via *abhisāṅkhāra*, and also gives up the craving (*taṇhā*) for them, which leads to *Nibbāna*.
- **Nibbāna** results when all those causes are removed, no *rūpa* can arise. Hence *Nibbāna* is permanent. No more suffering!

20. Finally, our six sense inputs (*āyatana*) and the six types of *rūpa* that we experience with them are discussed in several *suttā*. For example, in the “[WebLink: suttacentral: Cha Chakka Sutta \(MN 148\)](#)“:

“*Cha **ajjhattikāni** āyatanāni veditabbānī’ti—iti kho panetaṃ vuttaṃ. Kiñcetaṃ paṭicca vuttaṃ? Cakkhāyatanaṃ, sotāyatanaṃ, ghāṇāyatanaṃ, jivhāyatanaṃ, kāyāyatanaṃ, manāyatanaṃ. ‘Cha ajjhattikāni āyatanāni veditabbānī’ti—iti yaṃ taṃ vuttaṃ, idametaṃ paṭicca vuttaṃ. Idaṃ paṭhamaṃ chakkaṃ. (1)’*”

“*Cha **bāhirāni** āyatanāni veditabbānī’ti—iti kho panetaṃ vuttaṃ. Kiñcetaṃ paṭicca vuttaṃ? Rūpāyatanaṃ, saddāyatanaṃ, gandhāyatanaṃ, rasāyatanaṃ, phoṭṭhabbāyatanaṃ, dhammāyatanaṃ. ‘Cha bāhirāni āyatanāni veditabbānī’ti—iti yaṃ taṃ vuttaṃ, idametaṃ paṭicca vuttaṃ. Idaṃ dutiyaṃ chakkaṃ. (2)’*”

- Thus, there are six (*Cha*) **internal** *āyatana* (*ajjhattikāni āyatanāni*) and six **external** *āyatana* (*bāhirāni āyatanāni*).
- The sixth internal *āyatana* is *manāyatana*, and it detects *dhamma* (called *manāyatana*, just like *sadda* or sound is called *saddāyatana*).

A more in-depth analysis of *dhammā* is at, “[What are Dhamma? – A Deeper Analysis](#).”

4.9.2 Mental Aggregates

[Vipallāsa \(Ditthi, Saññā, Citta\) Affect Saṅkhāra](#)

4.9.2.1 Saññā – What It Really Means

.1

December 31, 2017; revised August 22, 2019

1. *Saññā* is usually translated to English as “perception” and sometimes as “recognition”; it is both and more! *Saññā* has a much deeper meaning and at the same time, a more straightforward definition.

- *Saññā* is pronounced “sangnā” and gives an encoded meaning in Pāli and Sinhala with that pronunciation ([click to play the audio](#)):

[WebLink: Listen to the Pāli word “saññā”](#)

- It means “sign” or even closer, “the embedded message.” That latter expresses it well since it is how one “instantaneously gets the idea of what is meant by an external signal.”
2. When we understand what is meant by *saññā*, we can clarify many things, including how humans can communicate with beings in other realms via *saññā*.
- *Saññā* is the “universal language.” To give an analogy: if there is a sign that reads, “winding road ahead,” only those who know English can understand what that sign says.
 - But those universal signs — showing a picture of a winding road — provide the “*saññā*” that a road ahead is going to be curvy.

- A second example (on the right above) shows a sign. That conveys the “*saññā*” to stop.
3. At the fundamental level, *saññā* means “recognition” of an object or a person or a concept; **getting “full comprehension” of what it is AND what it means.**
- Whether one says fire in English or “*ginna*” in Sinhala, or “*fue*” in French, if a person knows how to associate any of those words with “fire”, that is the *saññā* that comes to one’s mind when one hears either the word “fire”, “*ginna*”, or “*fue*.”
 - If a person does not speak those three languages, those words do not mean anything to that person. However, with the following picture, anyone will have the idea that it is about a fire or a flame:

4. Therefore, *saññā* is the “full picture that comes to the mind instantaneously.”

- When we think about a fire, that “sense of what a fire is,” arise automatically. The mind can visualize a fire.
- Therefore, regardless of the language, one speaks in, everyone who has seen a fire generates the same feeling about a fire in one’s mind. **That is a crucial point to contemplate on, and will be valuable in comprehending the “*anicca saññā*.”**

5. Our mental body (*gandhabba*) can register only pure *saññā*. When two *gandhabbas* are communicating, they cannot use words OR pictures. So, the process is much simpler. What one *gandhabba* X thinks about what to say to *gandhabba* Y, that message or *saññā* is automatically transmitted to Y, **if Y is pointing attention to X.**

- When *gandhabba* X wants to see what is happening at a given location, it just needs to point to that direction and can see that location. We will not discuss the details here, but essential point is that a *gandhabba* does not “see” things using light as we do.
- In the same way, a *gandhabba* does not hear using an ear. Sound waves propagating through the air are not needed.
- That is how most beings — who don’t have physical bodies like us — communicate and interact with the external world, as emphasized briefly in the previous post, “[Our Mental Body – Gandhabba.](#)”
- When someone gets to the fourth *jhāna* and attains *abhiññā* powers, he/she will be able to see and hear without eyes and ears. These capabilities are *dibba cakkhu* or “divine eye” and *dibba sota* or “divine ear.” One using one’s own mental body (*gandhabba*). Then seeing and hearing is not limited to short distances.

6. However, when a *gandhabba* is trapped inside a physical body, one does not have those capabilities (in a normal human). Then one needs to rely on the sense faculties located in the physical body (eyes, ear, etc.) to capture information that comes via pictures, sounds, etc. The brain to convert those signals to “*saññā*” and to transmit them to the *gandhabba* inside.

- If you are not clear on this point, please re-read the previous post, “[Our Mental Body – Gandhabba.](#)”
- In that post, we compared how a *gandhabba* trapped in a physical body to a human operator enclosed in a military tank. That is a good analogy.

7. At conception, the *gandhabba* takes hold of a single cell formed by the union of a mother and a father. That single cell grows to a baby inside the womb, and a grown adult after birth. See, “[Buddhist Explanations of Conception, Abortion, and Contraception.](#)”

- In an average human, the physical body shields the, the *gandhabba*. Thus, it cannot receive direct *saññā*. Pictures and sounds come through the eyes and ears not as *saññā* but as video and audio signals. Those need to be converted to *saññā* that can be grasped by the *gandhabba*.
- When a baby grows, the eyes and ears (as well as nose, tongue, and body) need to develop to capture those sense inputs. The brain also needs to build circuitry for converting that information to a “*saññā*” that can be transferred to the *gandhabba* so that it can grasp what object, person, or concept it is.

- Once those capabilities develop, the signal transmission goes from the brain to the *hadaya vatthu* located close to the heart via “*kirana*” or in the language of modern science electromagnetic waves. That was discussed briefly in the post, “[Gandhabba \(Manomaya Kāya\) – Introduction.](#)”

8. When a baby is growing up, it learns to associate words and pictures with each object, person, concept that it experiences. That requires many parts of the brain. That is why it takes a newborn baby several years to become fully functional in the world.

- So, when a person hears someone yelling “fire”, the brain matches that with a visual of a fire, converts it to the correct “*saññā*” of a fire, and transmits that signal to the *gandhabba*.
- The association of a word with its meaning happens in the brain (which is acting like a computer). Then only the meaning is conveyed to the *gandhabba*, where our thoughts are generated.
- As I have discussed in the posts on the *gandhabba*, a human *gandhabba* is born at a *cuti-paṭisandhi* moment. It could live to thousands of years in age, and during that time could be born many times as a human (of course with different bodies). See, “[Bhava and Jāti – States of Existence and Births Therein.](#)”

9. If the relevant parts of the brain are damaged later in one’s life, one may not be able to recognize one’s surroundings. That is what happens to people with Alzheimer’s disease.

- When a person gets old, the brain starts degrading, and then again, one’s ability to interact with the external world could become limited.
- When that person dies, the *gandhabba* comes out of the dead body if there is leftover *kammic* energy for the human *bhava*. When a suitable womb becomes available, it can start another human body. This is how there can be several births during a given human *bhava*.

10. Now we move to the next level of *saññā* where it is more than just recognition. For example, when two people hear the name of a person X, they will have the picture of that person (or “*saññā*”) coming to their mind automatically. But not only that, they would register some qualities that they had attached to that person through their interactions with X. One may say, “It is my Dad. I love him so much.” Another would say, “Oh, he is a crook..”

- Then based on that *saññā*, each will generate different feelings (*vedanā*) about X. That could lead to creating good or bad thoughts (*mano saṅkhāra*) automatically. If one keeps thinking about X some more, then one will be consciously generating more thoughts about X, and may even speak out (*vacī saṅkhāra*). If the feelings get strong, one may generate *kaya saṅkhāra* (thoughts leading to actions), and, for example run to Dad and give him a hug (or avoid the person perceived to be a crook).
- Therefore, based on the same thought object, different people can get different *saññā* and thus can respond differently.

11. In general, how we make decisions about interacting with others or respond to external stimuli depends on our “world views.” This is what is called “*diṭṭhi*” in Buddha Dhamma.

- When one has wrong world views or *diṭṭhis*, one could make wrong decisions based on “distorted *saññā*.”
- When one’s mind is free of greed, hate, and ignorance, it is easier to sort out wrong *diṭṭhis*. The meanings of greed and hatred are apparent. Ignorance here is the ignorance about the message of the Buddha. That message, of course, can be grasped only in stages.
- First, it is crucial to realize that one MUST live a moral life and follow that mundane Eightfold Path by abstaining from *dasa akusala* as much as possible.
- Then it will become easier to cultivate the “*anicca saññā*,” start grasping the *Tilakkhaṇa* and become a *Sotāpanna*. We will discuss the *anicca saññā* in upcoming posts.

4.9.2.1 Future Suffering – Why It Arises .2

January 22, 2017

In the subsection “[Living Dhamma – Fundamentals](#),” we mentioned that there are two types of suffering that can be eliminated according to Buddha Dhamma. In that subsection, we discussed and explained how **some suffering in this life** can be stopped from arising. With this post, we will start a discussion on the **second type suffering associated with future rebirths — which is even more important** — can be stopped from arising.

1. Let us first review the existing ideas from other religions and philosophies. First, let us discuss the dominant religious view.

- Most major religions have a world view that is based on three “realms” of existence: the human realm, the heavenly realm, and hell. If one lives according to the religious teachings, one will live in happiness in the heaven forever; if not, one will suffer in the hell forever.
- It is not explained how one is born in the human realm to start off. It could be that the Creator created Adam and Eve and their descendants are just born. In this view, the sentient beings in this world started off at just two and will grow with time; see below.
- In Hinduism, the “eternal realm of happiness” is not the heaven, but the *Brahma* realm (there is only one, where one merges with *Mahā Brahma*). Also, there is no permanent hell, as I understand.

2. Based on whether one lives according to the “particular religious teachings” or not, one will be born either in heaven or hell FOREVER.

- Of course, these religious teachings will vary from one religion to another.
- Furthermore, even within one religion, they can be changed by a decree from the “head of the Church.”
- Since all those who are making those decisions are human, It seems illogical that they can decide on basically their own fate.

3. Turning to philosophy, many people today — especially those who believe that the above religious reasoning is illogical — take the materialistic view, that one is born out of inert matter only to die and to be recycled back to the Earth. They are the so-called atheists.

- In this case, the logic would say that one could live immorally since any immoral actions to benefit oneself would not have any consequences.
- Still, most who belong to this category live moral lives. They have an innate feeling that morality must be adhered to, but cannot quite explain why.

4. I have discussed the above points in several posts:

- On religion, see, “[The Language of God](#)” by Francis Collins” and “[What Does Buddha Dhamma Say about Creator, Satan, Angels, and Demons?](#).”
- On the belief in a materialistic view, see, “[Why Does the World Exist?](#)” by Jim Holt” and “[Waking Up](#)” by Sam Harris.”
- In the commonly-used sense of the word “religion”, Buddha Dhamma is not a religion; see, “[Is Buddha Dhamma \(Buddhism\) a Religion?](#)” and “[What is Unique in Buddha Dhamma?](#).”
- I would welcome any comments/criticisms on my points above. I can go to more details if needed, and I believe that the above points cannot be logically refuted.

5. Buddha Dhamma (true and pure Buddhism) does not belong to either of the above two categories.

- The complex world view of Buddha Dhamma is explained in the subsection “[The Grand Unified Theory of Dhamma](#),” but a brief introduction is in the post, “[What Reincarnates? – Concept of a Lifestream](#).”

- Briefly, one is born in one of 31 realms of existence. From a beginning-less time, we all have been undergoing this rebirth process. **But most times we are born in the lower four realms filled with suffering, and thus the long-term solution is to stop the rebirth process.** This is done in four steps, and at the *Arahant* stage, one stops the rebirth process.
- This is not a nihilistic or pessimistic view, see, “[Nibbāna ‘Exists’, but Not in This World.](#)”

6. So, that is the background for our discussion. Now, let us discuss how one can get to *Nibbāna*, or to stop future suffering.

- Some Buddhists believe that *Nibbāna* can be attained by living a moral life and doing meritorious deeds (*puñña kamma*).
- We will now discuss why just living a moral life and doing *puñña kamma* will not lead to *Nibbāna*, even though they are necessary parts of the process.

7. We are born in one of the 31 realms due to six root causes (*hethu*): *lobha*, *dosa*, *moha* and *alobha*, *adosa*, *amoha*. This categorization can be used to look at births in different realms in another way.

- Deeds (*kamma*) done with *lobha*, *dosa*, *moha* lead to rebirth in the *apāyā* (lowest 4 realms). For these deeds, *moha* is always present with either *lobha* (*pretha* and *asura* realms births) and or with *dosa* (*niraya* or the lowest realm). Births in the animal realms can be due to either.
- Those deeds done with one or more of *alobha*, *adosa*, *amoha* lead to rebirth in the higher realms, starting with the human realm.

8. As discussed, for example in the [Dutiyasikkhāpada Sutta \(AN 4.236\)](#), a verse that summarizes the results of meritorious deeds and immoral deeds is: “*Atthi, bhikkhave, kammaṃ kaṇhaṃ kaṇha vipākaṃ; kammaṃ sukkaṃ sukka vipākaṃ..*”

Here the word *kaṇha* means bad or dark. *Sukka* means pure or white.

- So, the word “*kaṇhaṃ*” in the above verse refers to immoral deeds done with *lobha*, *dosa*, *moha* and other *asobhana cetasika*. “*Sukkaṃ*” implies meritorious deeds done with *alobha*, *adosa*, *amoha*, and other *sobhana cetasika*.
- How different types of *cetasika* contribute to either defile or purify our minds is discussed in the subsection, “[Living Dhamma – Fundamentals](#)”.

9. In this beginning-less rebirth process, this is how we have been born in almost all of the 31 realms due to the fact that we keep accumulating both *kaṇha vipāka* and *sukka vipāka*.

- Furthermore, we have accumulated enough of both kinds to bring about many, many future births in all those realms.
- Even if we do not commit a single *kaṇha vipāka* in this life, we have done enough of them in the past to bring about births in the *apāyā* in the future. This is a point that not many people understand. I have heard many people say, “I don’t harm anyone, so I hope to get a good rebirth”. Unfortunately, they are wrong.

10. *Puñña kamma* with “*sukka vipāka*” leads to two important results in this and future lives that **make suitable conditions** for attaining *Nibbāna*:

- Rebirth in the “good realms” (human realm and above). Attaining *Nibbāna* — or even working towards it — is possible only in the good realms and especially in the human realm.
- If done correctly, merits acquired through *puñña kamma* can lead to a long life (*āyusa*), flawless sense faculties (*vaṇṇa*), healthy life without much physical suffering (*sukha*), and necessary resources to live without hardships (*bala*). These benefits make suitable conditions for one to focus on attaining *Nibbāna*. For example, if one is sick or is very poor, it is not easy to follow the Path.

11. On the other hand, “*kaṇha vipāka*” or results of immoral deeds lead to births in the *apāyā* where the suffering is intense.

- We have been born in the human realm due to a good *uppatthi sukka vipāka*.
- But in this unique human realm one is subject to both *kaṇha vipāka* and *sukka vipāka* as *pavutti kamma vipāka* that bring results during the lifetime.

12. Births in the human realm could be a *tihethuka* (“*tī*” + *hethu*,” meaning all three of *alobha*, *adosa*, *amoha*), *dvihethuka* (“*dvi*” + *hethu*,” meaning *alobha* and *adosa*), or *ahethuka*.

- Those humans with *tihethuka* births can attain *magga phala* in this life if they strive enough.
- Those humans with *dvihethuka* births cannot attain *magga phala* in this life. Since they do not have the *amoha* root cause, their wisdom level (*paññā*) cannot grow beyond a certain point. However, they can do *puñña kamma* and be eligible to be reborn a human with a *tihethuka* birth in future lives.
- Even though the word *ahethuka* literally means “without causes”, here it means a weak version of *dvihethuka*. Here *ahethuka* means “without sufficiently good *hethu*” to be able to follow the Path. They are born with mental deficiencies that are obvious.

13. It is very important to realize that no one (at the present) can distinguish between *tihethuka* and *dvihethuka* births. On the surface, both types appear the same. For example, there could be people with higher education, who are *dvihethuka*, and some with no education who are *tihethuka*.

- So, the thing to do is to strive to the best of one’s ability. No matter whether one is *tihethuka* or *dvihethuka*, the efforts will pay off in the long run. Furthermore, being *tihethuka* does not take one automatically to *Nibbāna*; one has to strive.
- Furthermore, no one should be discouraged and believe they are *dvihethuka*, if the efforts are not paying off quickly. One prominent example in the *Tipiṭaka* is the story about the Culapanthaka Thero. He almost disrobed because he could not even memorize a single *gātha* after trying hard for months. But with Buddha’s help, he was able to attain the *Arahanthood* in a day, and even developed *abhiññā* powers: “[WebLink: suttacentral: Cūlapanthaka.](#)”

14. Therefore, by thinking good thoughts, doing good deeds and by living a moral life, we can improve our chances (but not guarantee) of a good future rebirth. **In fact, this is the goal of all major religions (to be born in heaven and live there forever).**

- However, nothing in this world of 31 realms is everlasting — and moreover — we do not have control over where we will be born in the next life, regardless of how well we live this life.
- It is important to realize that one or more of past bad deeds (*kamma vipāka*) may still lead to a bad rebirth, and then it will be very difficult to again get a good rebirth.
- This is one aspect of the ***anicca nature***, the futility of believing that there is happiness to be achieved somewhere in this world.
- The opposite belief that somehow happiness to be achieved somewhere in this world gives rise to deeply-embedded ***nicca saññā*** (a sense of hope) in our minds.
- One cannot avoid future suffering until one comprehends first that immoral deeds done with the *nicca saññā* lead to *kaṇha vipāka* and will bring much suffering. Even though moral deeds done with the *nicca saññā* lead to *sukka vipāka* with happiness, **one cannot avoid immoral deeds in the long run, BECAUSE OF this *nicca saññā*.**

15. Therefore, until we change our wrong view (and the corresponding wrong perception or *saññā*) that there is happiness to be had in this world, we will never be released from future suffering.

- This is the unique message of the Buddha. We will discuss how we can get rid of this *nicca saññā* and cultivate the *anicca saññā* in the next post.

4.9.2.1 Vipallāsa (Diṭṭhi, Saññā, Citta) Affect Saṅkhāra .3

January 28, 2017; re-written October 15, 2019

The word *vipallāsa* (used in plural) means “confusions.” One gets confused because one has wrong views (*diṭṭhi*). That leads to distorted perceptions (*saññā*), which in turn affect the way one thinks (*citta*). That is how we generate (*abhi*)*sankhāra* that lead to future suffering. This is just another way to analyze the origin of suffering.

- You may want to read the previous posts on *saññā* and *saṅkhāra*. See, “[Saññā – What It Really Means](#)” and “[Saṅkhāra – What It Really Means](#).”
- This post is a re-write of an old post, “*Diṭṭhi, Saññā, and Saṅkhāra – How They Relate*.”

Wrong Views Come First

1. One’s perceptions (*saññā*) are closely associated with one’s views (*diṭṭhi*), and both of those affect how we think (*citta*), and generate *saṅkhāra*.

Most of our world views are based on ideas from our families, friends, and religions that we are born into. Those inputs play a major role in our views. Those, in turn, mold our perceptions and how we think — and thus generate *saṅkhāra*.

- It is not possible to get rid of the wrong or distorted perceptions (*viparīta saññā*) without getting rid of the erroneous views (*micchā diṭṭhi* or simply *diṭṭhi*).
- There are some dominant world views which must be removed before one can even hope to get an idea about *anicca saññā*. We will discuss some of these critical factors first.

Wrong Views on Heaven, Hell, and Human Realms

2. Most people believe in an eternal heaven after death. That perception is based on the world view of three “major categories or realms.” They are hell, human world, and heaven. This world view and the corresponding perception or *saññā* come from families who have been taught that world view through generations via religious teachings.

- That world view is also that a Creator created the Earth. That Creator resides in the heavens, and those who live by those teachings will join the Creator. Those who disobey those teachings are supposed to be born in the hell for eternity.
- Even though modern science rejects that cosmic world view, most people still go by that wrong view. The heavens comprise of trillions of planetary systems, just like our Solar system.
- It is astonishing to see that even some prominent scientists are willing to disregard scientific facts. They believe (i.e., have the perception) that a Creator created the Earth and the whole universe. I am not sure where they think that Creator resides among those trillions of star systems.

Wrong Views About Animals

3. Another example is killing animals for sport, which includes fishing. This is based on the view that animals are not sentient and were created by the Creator for human consumption. That is such an ingrained *diṭṭhi* that many people who live otherwise moral lives fail to see the suffering endured by these animals.

- While fish cannot cry out, the severe pain felt by a wriggling fish caught on a hook is quite apparent. It is feeling both the pain in mouth due to hook. It is also suffering due to lack of oxygen since it cannot breathe as we do.
- Higher animals are capable of showing their pain, among other emotions. Anyone who has a pet dog or cat knows that they do have emotions as we do.

- But we tend to disregard such easy-to-see things, because of our *ditṭhi*. The underlying reason is the religious view that animals are here for our consumption.

4. However, we all have had animal births, as well as *deva* and *brahma* births. Comprehension of this fact can help change one's perception about animals.

- However, even in Buddhist countries, there are fishing villages where fishing is the livelihood of many, who have done it for many generations.
- Some may say that those people need to make a living to sustain their families. But that argument is no better than the argument that a drug addict needs to inhale another dose to get through the day: the long-term consequences are infinitely worse.
- It is customary for the older generations in many countries to teach their children or grandchildren how to fish or hunt animals for sport. That custom passes through generations.
- **Still, we cannot equate animal lives to human lives, as some animal right activists believe.** When one comprehends Buddha Dhamma, one can avoid going to either extreme.

Wrong Views Lead to Wrong Perceptions (*Saññā*)

5. The above are several prominent examples of major *micchā ditṭhi*. One can remove distorted perceptions (*viparita saññā*) by removing such wrong views (*micchā ditṭhi*). Learning Buddha Dhamma helps getting rid of wrong views.

- The key reason that those *ditṭhi* propagate through generations is the inability to “breakthrough” such ingrained beliefs by contemplating on facts.
6. Another wrong view (and hence the wrong perception) that we have is about the high value placed on the “beautification” of our physical bodies. This perception is predominant in Western countries but is growing in other countries as well.
- People spend billions of dollars a year in trying to make their physical bodies “more beautiful.” They don't realize — or don't even contemplate — the following fact. No matter how much money one can spend, one's body will not stay at peak condition for too long.
 - That wrong perception leads to an enhanced level of suffering at old age when one's body becomes frail and not so appealing. This can lead to severe depression.
 - For those who have comprehended the *anicca* nature, the old age is a fact of life. While the brain is working optimally, one needs to spend one's “peak years” not trying to beautify one's body but to make progress on the Path. When the body starts degrading at old age, the brain deteriorates. So, one must exercise and eat healthy to keep both the body and the brain in good condition as long as possible.
 - That happens to everyone, regardless of how powerful or wealthy they are. At President Trump's inauguration, this was quite obvious by looking at the ex-Presidents.
 - Think about any famous, beautiful or wealthy person that has grown old, to convince of the truth of this *anicca* nature.

Characteristics of Anything (*Sañkhata*) In This World

7. Anything in this world — living or inert — has that *anicca* nature. A *sañkhata* is born, goes through the formation process, reaches the peak condition, starts to decay, and becomes dead or destroyed at some point; see, “[Root Cause of Anicca – Five Stages of a Sankata.](#)”

- Some things (*sañkhata*) last a short times: for example, a fly or a flower. Other things can last for tens of years: for example, humans or a car. Then some things/beings live much longer: for example, a *Brahma* or a star system like our Solar system.

- But eventually, anything in this world — a *saṅkhata* (*sankata* in Sinhala) — decays and is destroyed at some point.
- Even though those things that reach the peak condition can provide/enjoy sense pleasures, they do not last long.
- The overall effect or the net effect is suffering, when one considers the rebirths in the 31 realms in the long term.

Three Types of *Vipallāsa* (Confusions)

8. The Buddha stated that there are three types of *vipallāsa* or distortions about *anicca*, *dukkha*, *anatta*, and *asubha*. See, [WebLink: suttacentral: Vipallāsa Sutta \(Aṅuttara Nikāya 4.49\)](#). We have discussed the first three in detail at this website. *Asubha* (not fruitful) is the opposite of *subha* (fruitful or beneficial).

- No matter how appealing those sense pleasures or sense objects can be, they all make one get trapped in the rebirth process. That is why they are *asubha*.
- The three types of *vipallāsa* are *diṭṭhi vipallāsa*, *saññā vipallāsa*, and *citta vipallāsa*.
- Those are the distortions associated with views, perceptions, and the way we think. We think (and speak and act) with *saṅkhāra*, and especially *puñña abhisāṅkhāra* and *apuñña abhisāṅkhāra*; see, [“Saṅkhāra – What It Really Means.”](#)

Confusion About a *Nicca* Nature Is the Key – They Lead to *Saṅkhāra*

9. Let us consider the *diṭṭhi*, *saññā*, and *citta vipallāsa* about the *anicca* nature as an example.

- We have the **wrong view that things in this world have *nicca* nature**, i.e., that they can provide with happiness. That is the *diṭṭhi vipallāsa* about the actual *anicca* nature.
- Because of this wrong view, we develop the *saññā vipallāsa* about the *anicca* nature of things: We tend to **perceive** (*saññā*) that worldly things can provide happiness.
- Because of the wrong perception, we tend to **think** (*citta*) that things in this world can provide us with happiness. Thus we do (*abhi*) *saṅkhāra* that prolong the rebirth process for *puñña abhisāṅkhāra*. Even worse, they make one suffer mightily in the future rebirths through *apuñña abhisāṅkhāra*.
- Therefore, we constantly generate *mano saṅkhāra* (automatic thoughts about worldly sense objects), *vacī saṅkhāra* (conscious thoughts or speech), and act accordingly (*kāya saṅkhāra*).

Saṅkhāra Lead to Future Suffering

10. All three types of such *saṅkhāra* lead to suffering in this world AND also in future rebirths. These are the *saṅkhāra* that arise due to *avijjā* (not realizing the true nature of this world): “*avijjā paccayā saṅkhāra*.”

Those *saṅkhāra* eventually lead to *bhava* and *jāti* via *paṭicca samuppāda*. Here *jāti* means both future rebirths AND also “births during this life,” see, [“Suffering in This Life and Paticca Samuppāda.”](#)

- That is why it is essential first learn Dhamma and first grasp the fact that suffering in this life can arise due to our conscious thoughts and actions. Not only that, but that suffering CAN BE stopped from arising.
- Once one comprehends this fact and lives accordingly, one can actually experience the *nirāmisā sukha* when one removes this type of suffering.
- Furthermore, this helps one build true faith (*saddhā*) in Buddha Dhamma. It will convince one of the truth in the much worse type of suffering in future rebirths.
- More details in the first few subsections in the [“Living Dhamma”](#) section.

11. At that stage, one may be able to comprehend the *anicca* nature of the rebirth process. The truth of the rebirth process that nowhere in the 31 realms can one find happiness.

- Moreover, one will “see” that unimaginable levels of suffering are present in the lowest four realms (*apāyā*). That will help get rid of the *diṭṭhi vipallāsa* about *dukkha*. Instead of the wrong view that there is happiness in human, *deva*, or *Brahma* realms, one will “see” that any pleasure to be had is only temporary. Furthermore, there is much more suffering inevitable if one stays in the rebirth process.
- Then one will also “see” that one is genuinely helpless if stayed in this rebirth process (*saṃsāra*). Thus one will get rid of *diṭṭhi vipallāsa* (that this world is of *atta* nature) and truly “see” the “*anatta* nature.”
- One will also “see” that — in the long run — things in this world are not *subha*, i.e., they are not beneficial or fruitful. Attachment to anything in this world will lead to suffering in the long run. Thus a *Sotāpanna* will have removed the *diṭṭhi vipallāsa* “distorted views” about *subha* nature as well.
- That is how one gets rid of *diṭṭhi vipallāsa*. That leads *Nibbāna* by dissociating from the material world, see, “[Nibbāna](#).”

Saññā Vipallāsa

12. *Saññā* (pronounced “sangna”) comes from “*san*” + “*gnana*,” which means “wisdom” about “*san*.” But regular humans have only *viparīta sangna* or *saññā vipallāsa*: they do not see “*san*” as bad.

- Removal of *saññā vipallāsa* requires getting rid of *diṭṭhi vipallāsa* which in turn requires attaining *sammā diṭṭhi*. Then one will be able to perceive the benefits or the harm in each speech or action that one is about to make.
- When one has right vision and perceives things as they really are, then one will start thinking along those lines. Then one will begin removing *citta vipallāsa*.

Removal of Vipallāsa

13. For completion, we will end with the following technical details. *Diṭṭhi vipallāsa* about *anicca*, *dukkha*, *anatta*, and *asubha* disappear at the *Sotāpanna* stage.

- *Saññā vipallāsa* about *anicca* and *anatta* removed at the *Sotāpanna* stage. But *saññā vipallāsa* about *dukkha* and *asubha* are removed in stages and is completely removed only at the *Arahant* stage.
- The same is true for the *citta vipallāsa*: *citta vipallāsa* about *anicca* and *anatta* go away at the *Sotāpanna* stage, but *citta vipallāsa* about *dukkha* and *asubha* reduce in stages. It is only at the *Arahant* stage that they cease to exist.
- That is why even though a *Sotāpanna* can “see” that things in this world can eventually lead to only suffering, he/she will still tend to enjoy sense pleasures. However, those do not involve *apāyagāmi* deeds.
- Even though an *Anāgāmi* has removed the desire for sense pleasures in the *kāma loka*, he/she will still tend to enjoy *jhānic* pleasures.
- All *vipallāsa* go away entirely only at the *Arahant* stage. An *Arahant* does not make *apuñña abhisankhāra* that leads to heat (or *thāpa*) in mind and makes one eligible to be born in the *apāyā*. He does not make *puñña abhisankhāra* that make one eligible to be born in the “good realms” either. He makes only *kammically* neutral *sankhāra* or *kriya* that allows maintaining life until *parinibbāna* or death.

4.9.2.2 What Is Vedanā (Feelings)?

February 18, 2017

[Vedanā and Samphassa Jā Vedanā – More Than Just Feelings](#) replaces (11Nov2018) [Vedanā – What It Really Means](#)

[Does Bodily Pain Arise Only Due to Kamma Vipāka?](#)

4.9.2.2 **Vedanā and Samphassa Jā Vedanā – More Than Just Feelings**

.1

February 18, 2017; November 10, 2018 Rewritten and replaces [Vedanā – What It Really Means](#)

1. *Vedanā* is conventionally translated as “feelings”, but it is much more than just feelings. The Buddha said that *vedanā* can be analyzed in many ways, with simple or deeper meanings. Here we will analyze *vedanā* in a way that will be most helpful at this stage (for those who have been following the “[Living Dhamma](#)” section from the beginning).

- In this analysis, we will discuss 9 types of *vedanā*.
- By understanding these 9 types of *vedanā*, we can understand how to correctly do *vedanānupassanā* in the *Satipaṭṭhāna bhāvanā*.

2. At the very fundamental level *vedanā* means “*veema danaveema*” (විම දැනවිම) in Sinhala, which means “one becomes aware (of a sense input)” and experience the corresponding good, bad, or neutral *kamma vipāka*.

- That is the *vedanā* experienced by an *Arahant*. He/she simply is aware of a sense input, and does not ADD anymore *vedanā* in his/her mind to that sensory input.
- A *vedanā* can be a ***dukha vedanā*** (due to a past bad *kamma*), a ***sukha vedanā*** (due to a past good *kamma*), or a neutral sensation — like feeling the wind on the body — called an ***upekkha vedanā***.
- Even an *Arahant* will experience those *dukha* or *sukha vedanā*, as long as he/she has the physical body. It is only those “*samphassa-jā-vedanā*” that will not arise in an *Arahant*; see below. No more *vedanā* of any type arising in an *Arahant* after the death, because he/she will not be reborn in the 31 realms of “this world.”
- However, normal humans go far beyond that and generate **three additional types** of their own mind-made “*samphassa ja vedanā*,” as we will discuss below.

3. It is important to realize that *sukha* and *dukha vedanā* due to *kamma vipāka* are felt by the physical body. They result due to past good or bad *kamma vipāka*. This can be verified by referring to *Abhidhamma*:

- *Akusala kamma vipāka* coming though the body are listed as, “*dukkha sahatagataṃ kāya viññānaṃ*,” and *kusala kamma vipāka* coming though the body are listed as, “*sukha sahatagataṃ kāya viññānaṃ*.”
- **Neutral (*upekkhā*) *vedanā* can arise via all five physical senses; see #7 below.**

4. A normal human being will **mentally generate** three more type of *vedanā* due to those *sukha*, *dukha*, and neutral *vedanā* that initially arise due to *kamma vipāka* via all five physical senses.

- If it is *dukha vedanā* (due to a headache, getting injured, etc.), one is likely to start worrying about it and **add more suffering. Those are *domanassa vedanā* or *āmisā dukha vedanā*.**
- If it is *sukha vedanā* (getting a massage, lying in a luxurious bed, etc.), one is likely to start generating thoughts about how good it is and how one can enjoy similar *sukha vedanā* in the future. Those are ***somanassa vedanā* or *āmisā sukha vedanā*** ; one could also be generating them by remembering past such *sukha vedanā*. These are also added in by the mind.
- *Somanassa* means “mind-made joyful.” *Domanassa* means “mind-made misery”, which is basically a depressed mindset.

- If a *vedanā* due to a *kamma vipāka* is not that strong one may just generate neutral feelings about it; that is ***āmisā upekkhā vedanā***.

5. Let us take some examples to illustrate how those additional types of *vedanā* can arise due to initial *dukha vedanā* and *sukha vedanā*.

- Suppose someone comes down with an illness. Any pain (*dukha vedanā*) due to that illness CANNOT be avoided by anyone once the illness takes hold: It is the RESULT (*vipāka*) of a previous CAUSE (*kamma*).
- Of course, it is possible that one could have avoided the *kamma vipāka* to materialize by trying to minimize CONDITIONS (*paccayā*); see, “[What Does “Paccayā” Mean in Paṭicca Samuppāda?](#).” That is why *kamma vipāka* can be avoided by being mindful and taking precautions.
- Once an illness starts, all one can do is to take medicines and also take any possible actions to reduce the pain.
- However, people tend to make the situation worse by starting to generate negative feelings about the situation. This gives rise to *domanassa vedanā*.

6. In the same way, one can start generating *somanassa vedanā* based on a *sukha vedanā* that was brought by a good *kamma vipāka*.

- For example, when one is eating a delicious meal, one could be generating joyful thoughts about how delicious it is and how one can eat it again in the future. Such joyful thoughts (*somanassa vedanā*) may be generated even long after the meal.
- Both *domanassa* and *somanassa vedanā* are “mind-made.” They are called “*samphassa-jā-vedanā*”; see #8 below.

7. ***Kamma vipāka* also leads to sense inputs at the other four physical senses. They are all neutral.** Thus neutral *vedanā* can arise via all five physical senses.

- *Kusala* and *akusala vipāka* coming through those four sensory doors are listed as, “*upekkhā sahatagataṃ cakkhu viññāṇaṃ*,” “*upekkhā sahatagataṃ sota viññāṇaṃ*,” “*upekkhā sahatagataṃ ghāṇa viññāṇaṃ*,” and “*upekkhā sahatagataṃ jivhā viññāṇaṃ*.”
- For example, when we see an “eye-pleasing picture”, the initial *vedanā* felt by the mind is neutral.
- However, that “neutral feeling” may not even register in one’s mind because “*samphassa-jā-vedanā*” that we discuss next arise automatically and instantaneously based on one’s *gati*.

8. But if one has cravings or repulsion to such pictures, one will start generating “*samphassa-jā-vedanā*,” or feelings that arise due to “*samphassa*” (“*san*” + “*phassa*” or contacts with “*san*” that is in one’s mind); see, “[What is “San”? Meaning of Sansara \(or Samsara\)](#).”

- It is easy to understand this when one contemplates on some examples. Upon seeing person X, an enemy of X will generate what are called “*domanassa vedanā*” or bad feelings, whereas a friend of X will generate “*somanassa vedanā*” or good feelings.
- The same is true for sounds, tastes, and smells. Even though there appear to be “universally good” tastes, that is not true for an *Arahant*. We just cannot comprehend it at this stage. But we know that some foods enjoyed by some could be repulsive to others, for example.
- In *akusala-mūla paṭicca samuppāda*, the “*phassa paccayā vedanā*” step, the *vedanā* that arises is really “*samphassa-jā-vedanā*”; see, “[Akusala-Mūla Paṭicca Samuppāda](#).”

9. Three more types of **mentally generated** *vedanā* can arise in those who are on the Noble Eightfold Path. These arise by **suppressing or eliminating** those *āmisā vedanā* or “*samphassa-jā-vedanā*” discussed above.

- In the beginning of this section we discussed how heat or *tāpa* in the mind arise due to “san” which are greed (*lobha*), hate (*dosa*), and ignorance (*moha*); see, “[Suffering in This Life – Role of Mental Impurities](#)” and “[Satipatthāna Sutta – Relevance to Suffering in This Life.](#)”

10. When one constantly is attached or repulsed by all those sensory inputs that one experiences in a given day, one’s mind can get really stressed out. A normal human being may even not be aware of this heat (*tāpa*) in the mind; see those two posts mentioned above, and other posts in the beginning of the “[Living Dhamma](#)” section.

- Even if one is generating *somanassa vedanā*, those inevitably lead to the stress in the mind. However, the effect is easily seen with *domanassa vedanā*.
- This is very important to grasp. You may want to go back and read those posts.

11. When one stays away from generating too many “*samphassa-jā-vedanā*” of both kinds, one will start feeling three more types of *vedanā*. These are called *nirāmisa vedanā*, because they arise due to staying away from cravings (and repulsion) to worldly objects.

- When one prevents the mind from heating up by comprehending the adverse effects of “san” and staying away from them, one’s mind starts “cooling down.” This is the *nirāmisa sukha vedanā* that we have discussed in many posts.
- This is what is emphasized by “*ātāpi sampajāno*” in the *Mahā Satipatthāna Sutta*; it means “remove the fire or heat from one’s mind by being aware of the ‘san’ or ‘immoral tendencies’”; see, “[Satipatthāna Sutta – Structure.](#)”
- The pleasant feelings one feels during *jhānā* are also *nirāmisa sukha vedanā*. They are devoid of *tāpa* or heat.
- Such feelings can also be experienced when one is doing a meritorious deed, such as giving or helping out someone in need. Those are also devoid of *tāpa* or heat and are *nirāmisa sukha vedanā*.
- *Nirāmisa sukha* can, of course, be experienced while engaging in meditation, especially *Metta Bhāvanā*. This is optimized when one does those *bhāvanā* with comprehension of *anicca*, *dukkha*, *anatta*, i.e., when one does it with full comprehension of “*ātāpi sampajāno*.”

12. There are two more types of *vedanā* that one experiences when proceeding on the Noble Eightfold Path.

- Sometimes, one gets a bit discouraged by not advancing “fast enough” on the Path. One thinks about “why am I not getting to the *Sotāpanna* stage?” or “Is there anything that I am missing in order to make progress?”, etc.
- Those are not *domanassa vedanā* (because they are devoid of *paṭigha anusaya*); they are *nirāmisa dukha vedanā*. It is common for one to experience such *vedanā*.
- If a *vedanā* is not that strong one may just generate neutral feelings about it; that is *nirāmisa upekkha vedanā*.

13. The key to *vedanānupassanā* in the *Satipatthāna bhāvanā* is to be able to recognize which type of *vedanā* one feels.

- If it is a *dukkha (vipāka) vedanā*, one understands that one needs to bear it (after reducing it as much as possible with medicines, etc). One needs to understand why such a *vipāka vedanā* arise, and remedy it as much as possible. After all, our goal is to stop any type of suffering.
- A good example is a pain one feels when sitting cross-legged at meditation retreats. Just by saying “I feel this *vedanā*” will not of any use. That *vedanā* can be removed by shifting one’s posture. I have seen some instructors, advice people, to just bear the pain saying that it will go away. It may go away because the nerves may become numb. That is not good in the long term.

- Also, one needs to understand why one should stop generating *domanassa* and *somanassa vedanā*, per above discussion.
- And one should, of course, cultivate *nirāmisa sukha vedanā* that arise when one starts on the Path (especially upon comprehending *Tilakkhaṇa* to some extent) and reduces the tendency to generate *domanassa* and *somanassa vedanā*.

14. *Vedanānupassanā* is all about first identifying the types of *vedanā* one is experiencing, and then deciding what to do about them. Getting rid of all *vedanā* — as some people believe — is the wrong thing to try to do.

Vipāka vedanā do not have *lobha*, *dosa*, *moha*, but *vipāka vedanā* **can lead to *samphassa-jā-vedanā*** which will have *lobha*, *dosa*, *moha*.

- *vipāka vedanā* needs to be experienced with *upekkhā*.
- *samphassa-jā-vedanā* are the ones to be stopped.
- *Nirāmisa vedanā* are the ones to be cultivated.

15. In summary, try to avoid *vipāka dukha vedanā* by trying not to make conditions for them to appear; see, “[Anantara and Samanantara Paccayā](#).” Do not indulge in *vipāka sukha vedanā* when those arise. Suppress and gradually eliminate *samphassa-jā-vedanā* and cultivate *nirāmisa vedanā*, which is what the “[Living Dhamma](#)” section is all about.

- That is — in brief — what *vedanānupassanā* is all about.

More details on *vedanā* can be found at: [Vedanā \(Feelings\) Arise in Two Ways](#)” and “[Feelings: Sukha, Dukha, Somanassa, and Domanassa](#).”

4.9.2.2 Vedanā – What It Really Means

.1.1

February 18, 2017; this is being replaced by [Vedanā and Samphassa Jā Vedanā – More Than Just Feelings](#)

1. *Vedanā* is conventionally translated as “feelings”, but it is much more than just feelings. The Buddha said that *vedanā* can be analyzed in many ways, with simple or deeper meanings. Here we will analyze *vedanā* in a way that will be most helpful at this stage (for those who have been following the “[Living Dhamma](#)” section from the beginning.

- In this analysis we will discuss 9 types of *vedanā* (highlighted in ***bold italic red***).
- By understanding these 9 types of *vedanā*, we can understand how to correctly do *vedanamupassana* in the *Satipaṭṭhāna bhāvanā*.

2. **At the very fundamental level *vedanā* means “*veema danaveema*” in Sinhala, which means “one becomes aware (of a sense input)” and experience the corresponding good, bad, or neutral *kamma vipāka*.**

- That is the *vedanā* experienced by an *Arahant*. He/she simply is aware of a sense input, and does not ADD anymore *vedanā* in his/her mind to that sense input.
- A *vedanā* can be a ***dukkha vedanā*** (due to a past bad *kamma*), a ***sukha vedanā*** (due to a past good *kamma*), or a neutral sensation — like feeling the wind on the body — called an ***upekkha vedanā***.
- An *Arahant* will bear them all with a neutral mind even though the *dukkha* or *sukha* sensation cannot be avoided.
- However, normal humans go far beyond that and generate **three additional types** of their own mind-made “*samphassa ja vedanā*,” as we will discuss below.

3. It is important to realize that *sukha* and *dukha vedanā* due to *kamma vipāka* are felt by the physical body. They result due to past good or bad *kamma vipāka*. This can be verified by referring to *Abhidhamma*:

- *Akusala kamma vipāka* coming through the body are listed as, “*dukkha saḥagatham kāya vinnanam*,” and *kusala kamma vipāka* coming through the body are listed as, “*sukha saḥagatham kāya vinnanam*.”
- **Neutral (*upekkha*) *vedanā* can arise via all five physical senses; see #7 below.**

4. A normal human being will mentally generate three more type of *vedanā* due to those *sukha*, *dukha*, and neutral *vedanā* that initially arise due to *kamma vipāka* via all five physical senses.

- If it is *dukha vedanā* (due to a headache, getting injured, etc.), one is likely to start worrying about it and **add more suffering. Those are *domanassa vedanā* or *amisa dukha vedanā*.**
- If it is *sukha vedanā* (getting a massage, lying in a luxurious bed, etc.), one is likely to start generating thoughts about how good it is and how one can enjoy similar *sukha vedanā* in the future. Those are ***somanassa vedanā* or *amisa sukha vedanā***; one could also be generating them by remembering past such *sukha vedanā*. These are also added in by the mind.
- *Somanassa* means “mind-made joyful.” *Domonassa* means “mind-made misery”, which is basically a depressed mindset.
- If a *vedanā* due to a *kamma vipāka* is not that strong one may just generate neutral feelings about it; that is ***amisa upekkha vedanā*.**

5. Let us take some examples to illustrate how those additional types of *vedanā* can arise due to initial *dukha vedanā* and *sukha vedanā*.

- Suppose someone comes down with an illness. Any pain (*dukha vedanā*) due to that illness CANNOT be avoided by anyone once the illness takes hold: It is the RESULT (*vipāka*) of a previous CAUSE (*kamma*).
- Of course, it is possible that one could have avoided the *kamma vipāka* to materialize by trying to minimize CONDITIONS (*paccaya*); see, “[What Does “Paccaya” Mean in Paticca Samuppāda?](#).” That is why *kamma vipāka* can be avoided by being mindful and taking precautions.
- Once an illness starts, all one can do is to take medicines and also take any possible actions to reduce the pain.
- However, people tend to make the situation worse by starting to generate negative feelings about the situation. This gives rise to *domanassa vedanā*.

6. In the same way, one can start generating *somanassa vedanā* based on a *sukha vedanā* that was brought by a good *kamma vipāka*.

- For example, when one is eating a delicious meal, one could be generating joyful thoughts about how delicious it is and how one can eat it again in the future. Such joyful thoughts (*somanassa vedanā*) may be generated even long after the meal.

7. ***Kamma vipāka* also lead to sense inputs at the other four physical senses. They are all neutral.** Thus neutral *vedanā* can arise via all five physical senses.

- *Kusala* and *akusala vipāka* coming through those four sense doors are listed as, “*upekkha saḥagatham cakkhu vinnanam*,” “*upekkha saḥagatham sota vinnanam*,” “*upekkha saḥagatham ghana vinnanam*,” and “*upekkha saḥagatham jivha vinnanam*.”
- For example, when we see an “eye-pleasing picture”, the initial *vedanā* felt by the mind is neutral.

8. But if one has cravings or repulsion to such pictures, one will start generating “*samphassa ja vedanā*,” or feelings that arise due to “*samphassa*” (“san” + “phassa” or contacts with “san” that is in one’s mind); see, [“What is ‘San’? Meaning of Sansāra \(or Samsāra\).”](#)

- It is easy to understand this when one contemplates on some examples. Upon seeing person X, an enemy of X will generate what are called “*domanassa vedanā*” or bad feelings, whereas a friend of X will generate “*somanassa vedanā*” or good feelings.
- The same is true for sounds, tastes, and smells. Even though there appear to be “universally good” tastes, that is not true for an *Arahant*. We just cannot comprehend it at this stage. But we know that some foods enjoyed by some could be repulsive to others, for example.

9. Three more types of **mentally generated** *vedanā* can arise in those who are on the Noble Eightfold Path. These arise by **suppressing or eliminating** those *amisa vedanā* or “*samphassa ja vedanā*” discussed above.

- In the beginning of this section we discussed how heat or *tāpa* in the mind arise due to “san” which are greed (*lobha*), hate (*dosa*), and ignorance (*moha*); see, [“Suffering in This Life – Role of Mental Impurities”](#) and [“Satipatthāna Sutta – Relevance to Suffering in This Life.”](#)

10. When one constantly is attached or repulsed by all those sense inputs that one experiences in a given day, one’s mind can get really stressed out. A normal human being may even not be aware of this heat (*tāpa*) in the mind; see those two posts mentioned above, and other posts in the beginning of the [“Living Dhamma”](#) section.

- Even if one is generating *somanassa vedanā*, those inevitably lead to the stress in the mind. However, the effect is easily seen with *domanassa vedanā*.
- This is very important to grasp. You may want to go back and read those posts.

11. When one stays away from generating too many “*samphassa ja vedanā*” of both kinds, one will start feeling three more types of *vedanā*. These are called *nirāmisa vedanā*, because they arise due to staying away from cravings (and repulsion) to worldly objects.

- When one prevents the mind from heating up by comprehending the adverse effects of “san” and staying away from them, one’s mind starts “cooling down.” This is the ***nirāmisa sukha vedanā*** that we have discussed in many posts.
- This is what is emphasized by “*ātāpi sampajāno*” in the *Mahā Satipatthāna Sutta*; it means “remove the fire or heat from one’s mind by being aware of the ‘san’ or ‘immoral tendencies’”; see, [“Satipatthāna Sutta – Structure.”](#)
- The pleasant feelings one feels during *jhānā* are also *nirāmisa sukha vedanā*. They are devoid of *tāpa* or heat.
- Such feelings can also be experienced when one is doing a meritorious deed, such as giving or helping out someone in need. Those are also devoid of *thāpa* or heat, and are *nirāmisa sukha vedanā*.
- *Nirāmisa sukha* can of course be experienced while engaging in meditation, especially *mettā bhāvanā*. **This is optimized when one does those *bhāvanā* with comprehension of *anicca, dukkha, anatta*, i.e., when one does it with full comprehension of “*ātāpi sampajāno*.”**

12. There are two more types of *vedanā* that one experiences when proceeding on the Noble Eightfold Path.

- Sometimes, one gets a bit discouraged by not advancing “fast enough” on the Path. One thinks about “why am I not getting to the *Sotāpanna* stage?” or “Is there anything that I am missing in order to make progress?”, etc.
- Those are not *domanassa vedanā* (because they are devoid of *paṭigha anusaya*); they are ***nirāmisa dukha vedanā***. It is common for one to experience such *vedanā*.

- If a *vedanā* is not that strong one may just generate neutral feelings about it; that is ***nirāmisa upekkha vedanā***.

13. The key to *vedananupassana* in the *Satipaṭṭhāna bhāvanā* is to be able to recognize which type of *vedanā* one feels.

- If it is a *dukha (vipāka) vedanā*, one understands that one needs to bear it (after reducing it as much as possible with medicines, etc). One needs to understand why such a *vipāka vedanā* arise, and remedy it as much as possible. After all, our goal is to stop any type of suffering.
- A good example is the pain one feels when sitting cross-legged at meditation retreats. Just by saying “I feel this *vedanā*” will not of any use. That *vedanā* can be removed by shifting one’s posture. I have seen some instructors advice people to just bear the pain saying that it will go away. It may go away because the nerves may become numb. That is not good in the long term.
- Also, one needs to understand why one should stop generating *domanassa* and *somanassa vedanā*, per above discussion.
- And one should of course cultivate *nirāmisa sukha vedanā* that arise when one starts on the Path (especially upon comprehending *Tilakkhaṇa* to some extent) and reduces the tendency to generate *domanassa* and *somanassa vedanā*.

14. *Vedananupassana* is all about first identifying the types of *vedanā* one is experiencing, and then deciding what to do about them. Getting rid of all *vedanā* — as some believe — is the wrong thing to try to do.

Vipāka vedanā do not have *lobha, dosa, moha*, but *vipāka vedanā* **can lead to *samphassa ja vedanā*** which will have *lobha, dosa, moha*.

- ***Vipāka vedanā* needs to be experienced with *upekkha*.**
- ***Samphassa ja vedanā* are the ones to be stopped.** [*ja*, (-°) [adj. -suffix from *jan*, see *janati*; cp. °ga; *gacchati*] born, produced, sprung or arisen from]
- ***Nirāmisa vedanā* are the ones to be cultivated.**

15. In summary, try to avoid *vipāka dukha vedanā* by trying not to make conditions for them to appear; see, “[Anantara and Samanantara Paccaya](#).” Do not indulge in *vipāka sukha vedanā* when those arise. Suppress and gradually eliminate *samphassa ja vedanā* and cultivate *nirāmisa vedanā*, which is what the “[Living Dhamma](#)” section is all about.

- That is — in brief — what *vedananupassana* is all about.

More details on *vedanā* can be found at: “[Vedanā \(Feelings\) Arise in Two Ways](#)” and “[Feelings: Sukha, Dukha, Somanassa, and Domanassa](#).”

4.9.2.2 Does Bodily Pain Arise Only Due to Kamma Vipāka?

.2

January 12, 2018

1. *Vedanā* can be categorized into five types ([WebLink: suttacentral: Pathama Vibhaṅga Sutta; SN 48.4](#)):

- **Two are generated by the mind** (called *cetasikam sukham* and *cetasikam dukkham* in the above *Sutta*) due to one’s *gathi*: *somanassa* (joy) and *domanassa* (depression).
- **Two felt by the body** (called *kāyikaṃ sukham* and *kāyikaṃ dukkham* in the above *Sutta*) and are “real”, not mind-made: *sukha* (bodily pleasure) and *dukkha* (bodily pain).
- **Neutral**: *adukkhamā sukha* (without pain or pleasure) or *upekkha* (without *somanassa* or *domanassa*). In the *Sutta* stated as : “*Katamañca, bhikkhave, upekkhindriyaṃ? Yaṃ kho,*

bhikkhave, kāyikaṃ vā cetasikaṃ vā nevasātaṃ nāsātaṃ vedayitaṃ—idaṃ vuccati, bhikkhave, upekkhindriyaṃ.”

- *Kāyika sukha* and *dukkha* are also experienced by the mind, but they come through the body as direct results of previous *kammā*, as we discuss below.

2. As clearly stated in the [“WebLink: suttacentral: Nakulapitu Sutta \(SN 22.1\)”](#):

- The two types of *vedanā* generated by the mind do not arise in *Arahants*. They are called “*samphassa jā vedanā*”; see, [“Vedanā \(Feelings\) Arise in Two Ways,”](#) and at a deeper level [“Vedanā – What It Really Means.”](#)
- Those two felt by the body due to *kammā vipāka* are experienced also by the *Arahants*.
- This is also explained in the [“WebLink: suttacentral: Salla Sutta \(SN 36.6\),”](#) saying that while a normal human experiences both types of *vedanā* when pierced by a spear (including “*samphassa jā vedanā*”), an *Arahant* experiences only the “direct *vedanā*” caused by the wound.

3. This is why In *Abhidhamma*, all sense inputs via the other five sense inputs (other than physical body) are initially felt as *upekkha* (neutral) *vedanā*. Only the bodily sense inputs could lead to *dukkha vedanā* (getting injured, headaches, cancer, etc) or *sukha vedanā* (good massage, lying on a comfortable bed, etc).

- When we generate joy upon seeing something that we like, for example, it comes in as a neutral *vedanā*. We generate joy via “*samphassa jā vedanā*” based on our *gathi*.
- A good example is seeing a well-known politician. Some people generate good feelings and others may generate bad feelings; **but it is the same person they were all looking at. The joy or disgust was not in the politician, it was within the observer.** One may need to contemplate this and let the idea sink in. It is an important point. It holds true for any sensory input other than the bodily sense inputs (except *kāma guna*, discussed in #6 below).

4. Regarding *Abhidhamma*, most people use the book [“A Comprehensive Manual of Abhidhamma”](#), by Bhikkhu Bodhi (First Edition 2000). This is the English translation of the “*Abhidhammattha Sangaha*”, a commentary to the *Abhidhamma Piṭaka* in the *Tipiṭaka*, by *Acariya* Anuruddha, who lived around the same time as *Acariya* Buddhaghosa, who wrote the commentary *Visuddhimagga*.

- Both these recent commentaries have material inconsistent with the *Tipiṭaka*; see, [“Incorrect Theravada Interpretations – Historical Timeline.”](#)
- I have started a discussion focused on the book “A Comprehensive Manual of Abhidhamma”, by Bhikkhu Bodhi (2000) at the discussion forum: [“Comprehensive Manual of Abhidhamma \(Bhikkhu Bodhi\) – Grave Error on p. 164.”](#)

5. Going back to our original discussion, the key point from *Abhidhamma* is that only bodily sense inputs (experienced via the physical body) can bring in *sukha* (pleasant) or *dukkha* (unpleasant or painful) **bodily** sensations.

- In other words, when we experience joy (upon seeing a loved one) and dislike (upon seeing an enemy) are both mind-made; same is true for taste, sounds, smell. The same is also true for *dhammā* that comes to the mind (recalling past events or future plans).
- However, *kāyika sukha* or *kāyika dukkha* arises due to injuries and sicknesses (headaches, cancer, etc), and are thus “real.”
- We have discussed these in various posts, but I wanted to find a couple of *Suttā*, where this is clearly stated concisely. Those are given in #1 and #2 above.

6. It must also be stated that the Buddha has described *vedanā* as two types to 108 types depending on the analysis; see, for example, [“WebLink: suttacentral: Bahuvedanīya Sutta \(MN 59\).”](#) For this discussion, the five types are appropriate.

- Another complexity involved is due to sensory experiences that arise as part of a being's *bhava* (yet at the root still determined by *kammā*), which are called "*kāma guna*"; see, "[Kāma Guna, Kāma, Kāma Rāga, Kāmaccandha](#)." This is also mentioned in the above *Sutta*.
- For example, dogs and pigs eat feces because they taste such things as tasty. Humans, in general, taste sugar as sweet and salty as salty, etc. Those are *kāma guna* associated with each *bhava*; An *Arahant* would taste them the same way.

7. **Everything in this world arises with the mind as the root cause.** That is what is meant by the *Dhammapada gāthā* : "*mano pubbangamā dhammā, mano setta manomayā...*"

- At the very fundamental level, those "*kammā bīja*" or "*kammic energy*" has its root in *javana citta* with one or more of the six root causes: *lobha, dosa, moha, and alobha, adosa, amoha*.
- It is also important to realize is that the three types of *kammā* are done by *mano, vacī, and kāya saṅkhāra*: "[Saṅkhāra – What It Really Means](#)."

8. This vicious cycle of "*vipāka*" leading to new "*kammā*" (via acting with *avijjā*), which in turn lead to more "*vipāka*", is the process that binds us to the *saṃsāra* of endless rebirths, or perpetuate our "world" of suffering; see, "[How Are Paṭicca Samuppāda Cycles Initiated?](#)"

- The Buddha described this as, "*kammā vipākā vaddanti, vipāko kammā sambhavo, tasmā punabbhavo hoti, evan loko pavattati*."
- That means, "*kammā* lead to *vipāka*, *vipāka*, in turn, lead to *kammā* and thus to rebirth (*punabbhavo*), and that is how the world (existence) is maintained." Here "*sambhava*" is "*san*" + "*bhava*," or "adding more existences." Also, "*loka*" is world and "*pavatta*" means "maintain."

9. However, the working of *kammā/kammā vipāka* is NOT deterministic, i.e., just because one has done a bad (good) deed in the past, that DOES NOT mean one would get the corresponding result (bad or good); see, "[What is Kamma? – Is Everything Determined by Kamma?](#)"

- This is because "conditions" are a key aspect of *Paṭicca Samuppāda* (cause and effect) in Buddha Dhamma. Just because there are causes (*kammā bīja*), corresponding *vipāka* do not take place unless suitable conditions come into play; see, "[How Are Paṭicca Samuppāda Cycles Initiated?](#)" and "[Paṭṭhāna Dhammā](#)."

10. **On the other hand, things DO NOT just happen.** One or more causes MUST act as the root cause for a good (or bad) effect. Therefore, a past *kammā*, is ALWAYS needed to act as the cause.

- The above is an important point, so let me give an example. When someone gets a headache or cancer that is a bodily *vedanā* arising solely due to a *kammā vipāka* **and one's action at that time does not come into play. Of course, one can take subsequent actions to either alleviate that problem or even to get rid of it.**
- On the other hand, one may encounter sufferings that seem to be not directly due to *kammā vipāka*. For example, one may have breathing problems because one's body has excess phlegm (*semha*). **So, it appears that the cause of breathing problems is excess phlegm. But there is a root cause for phlegm to be present at high levels in one's body**, and that is a past *kammā*. The same is true for bile (*pita*), gas (*vāta*), body fluids (*sannipāta*), change in climate (*utu*), careless behavior (*visama*), others' harmful actions (*opakkama*).

11. There are three *Suttā* (SN 36.21, AN 5.104, and AN 10.60) that the reader Siebe mentioned in the discussion forum ("[Could Bodily Pain be due Causes Other Than Kamma Vipāka?](#)," that list 8 such possible "secondary causes" for bodily pain:

- One should read that discussion topic to get a good understanding of how this discussion evolved, but let me briefly describe the background.

12. **Those other seven “causes” (except *kammā*) are not root causes.** They all have past *kammā* as the root cause. **Nothing in this world happens without a connection somewhere to the six root causes: *lobha, dosa, moha, and alobha, adosa, amoha.***

- One may get an idea to stand on one’s leg. But if one is mindful, one can see the bodily pain associated with that action and decide not to go through with it. Note that the *kammā vipāka*, in this case, came initially as a mental input (through *mana indriya*). But one has the CHOICE not to go along with that. Therefore, a second *kammā* of actually standing on one leg (one’s willingness to go along with it) is needed for the *kāya vedanā* to arise.
- The first case above in #10 (cancer etc) illustrates the *vipāka* solely attributed to past *kammā*. Pain due to standing on a leg is also an immediate *kammā vipāka*. Other cases involve those *vipāka* arising due to the seven other types of causes that are discussed in the *Suttā* mentioned in #11.

13. **Therefore, sometimes it may not be easy to figure out what is the cause and what is the effect, because the result of a past action itself can act as a (new) cause.**

- The above example of standing on one’s leg is a good example. The *kāya vedanā* WOULD NOT arise unless one lets the initial *kammā vipāka* (came through the *mana indriya*) to proceed. One has the ability to stop that *kāya vedanā* from arising.
- On the other hand, one cannot stop the cancer by will. One could take actions (called *upakkama* or *prayoga*) to alleviate a bodily *vedanā* due to a *kammā vipāka*. By the way, *upakkama* is one of the eight mentioned loosely as causes in those *Suttā* that mention possible eight causes for *kammā vipāka*.

14. Those *upakkama* or *prayoga* can work in the following way too. A *upakkama* by person A may cause harm to person B. For example, when person B detonate a suicide bomb, person A may die as a result of that action.

- But here again, person A MUST have a pending *kammā vipāka* for that action by person B to cause harm for him. As I have mentioned many times, we have collected innumerable *kammā vipāka* and they are waiting for such conditions to appear to give *vipāka*.
- (Twenty four such conditions are listed and discussed in “[Patthāna Dhammā](#).” So far, I have discussed only a few).
- Some people escape such attacks “miraculously.” There is no miracle, just the fact the there may not have been a suitable *kammā vipāka* waiting to be ripened, OR, a past good *kammā* could overcome even some pending bad *vipāka*.
- This is why the Buddha said that it is impossible for a human to figure out the causes of *kammā vipāka*.
- Another such special case is the demise of all living beings in the realms BELOW the *abhassara brahma* realm at the destruction of the “material world” (*loka vināśaya*); over a long time, all beings in the lower realms are reborn in higher realms above the *abhassara brahma* realm until a new world (new Earth in our case) is formed over billions of years. We will not get to discuss this for a while, since more background material is needed.

15. One would think that the Buddha’s good *kammā* done in his last life would be more than enough to override any *kammā vipāka* from the past. However, remnants of *vipāka* of an *anantariya kammā* were there, and also there could have been other strong *kammā*. That is the only exception, and that is the *kammā vipāka* listed among the eight other possible causes. **The other seven are really not the root causes, but actually effects that appear as causes.**

- The Buddha is said to have to face 12 *kammā vipāka* (“[WebLink: suttacentral: Pubbakammapiṭikabuddhaapadāna ; Therāpadāna.](#)” An English translation is at: “[WebLink: ancient-buddhist-texts.net: The Connection with Previous Deeds – Pubbakammapiṭika-Buddhāpadānam](#)”). Much merits to the two readers who sent me the reference!).

- Five of those 12 were due to **remnants** of *anantariya papa kammā* involving verbally or physically hurting Buddhas in past lives. Two were for killings, two for abusing sages, one for breaking the back of a wrestler, one for giving wrong medication intentionally, and another for watching others engaged in fishing and enjoying it.
- By the way, Moggallana *Thero* was beaten to death due to remnants of a *kammā* of killing his parents in a past life. He paid for most of his *kammā* in a *niraya* (worst realms in *apāyā*).

16. Finally, I would caution that material in the *Milindapanha* are based on conversations that took place between Ven. Nagasena and King Milinda more than 100 years after the Buddha's *Parinibbana*. Even though most of the material in *Milindapanha* seems to be compatible with the *Suttā*, it is possible that Ven. Nagasena referred to those extra seven causes as “root causes” just because those three *Suttā* in #11 above (SN 36.21, AN 5.104, and AN 10.60) did not elaborate on the deeper explanation that we discussed above.

- Furthermore, as reader Akvan pointed out in the discussion forum, Ven. Nagasena's statement about Buddha not having to face *kammā vipāka* is not correct (I have not personally read that account in *Milindapanaha*, if it is there).

17. One's understanding in how *kammā/kammā vipāka* operates will grow only with an understanding of basic concepts. Until then, one's ingrained belief systems will be operating based on the 10 types of *micchā ditṭhi*. **There are actually two levels of *micchā ditṭhi***. First one needs to remove the **ten types of *micchā ditṭhi***.

- Then one can start on the Noble Eightfold Path AFTER learning about the deeper level of *micchā ditṭhi*. That is to realize that it is a wrong view to believe that things in this world can bring long-term happiness. **This second level** of wrong views are dispelled when one comprehends *Tilakkhaṇa*, the Three Characteristics of this world: *anicca, dukkha, anatta*.
- The strongest immoral deeds are done by the 10 types of *micchā ditṭhi*. They inevitably lead to suffering and can lead to rebirth in the *apāyā*.

18. One can attain *Nibbāna* only by getting rid of the second level of *micchā ditṭhi*, i.e., only by comprehending *Tilakkhaṇa*. **Thus ultimate and permanent happiness can be attained only by getting rid of the second level of *micchā ditṭhi***.

- Both types of *micchā ditṭhi* are discussed in the post: “[Micchā Ditṭhi, Gandhabba, and Sotāpanna Stage.](#)”

4.9.2.3 Saṅkhāra – What It Really Means

February 25, 2017; revised January 3, 2018; September 23, 2018; November 1, 2018; July 25, 2019; May 17, 2020

1. “Mental formations” and “formations” are conventional translation for *saṅkhāra*. Certainly the latter is a better translation. But it is much better to grasp the idea of *saṅkhāra* and just use that word. I recommend the same for most key Pāli words like *saññā* and *viññāṇa*.

- It comes from “*san*” + “*khāra*” or actions that involve “*san*”; see, “[What is “San”? Meaning of Sansāra \(or Samsāra\).](#)”
- However, all *saṅkhāra* arise in the mind. When they lead to conscious thinking or speech, they are called *vacī saṅkhāra*; those that lead to bodily actions are *kāya saṅkhāra*; those that arise automatically in the mind are *mano saṅkhāra*.
- Therefore, “*san*” is associated with anything that one is thinking about doing or actually doing.

- ***Saṅkhāra* are responsible for just getting things done to live the current life (everyday activities). They can also lead to moral/immoral actions that can bring results (*vipāka*) in future lives.**
- The latter type (those that can bring *vipāka* in future) are called strong *saṅkhāra* or *abhisāṅkhāra*.

2. Let us look at some examples now.

- Thinking about going to the bathroom is a *vacī saṅkhāra* (*kammically* neutral). One gets the body to move to the toilet using *kāya saṅkhāra*.
- Thinking about killing a human being and carrying it out is a *saṅkhāra* with great *kammic* consequences or a *vacī abhisāṅkhāra*; doing the actual killing is done with *kāya abhisāṅkhāra*. Such *vacī* or *kāya abhisāṅkhāra* are *apuñña abhisāṅkhāra* (or *apuññābhisāṅkhāra*). They can lead to a birth in the *apāyā*.
- On the other hand, *puñña abhisāṅkhāra* (or *puññābhisāṅkhāra*) (thoughts responsible for proper speech and actions) have good *kammic* consequences and can lead to “good births.” Even more importantly, they are essential for making progress on the Path.
- Good or bad *kammā* are done via those types of *saṅkhāra*. They can bring results (*kamma vipāka*) immediately, in this life, or in future lives. However, not all *kammā* lead to *kamma vipāka*; see, “[What is Kamma? – Is Everything Determined by Kamma?](#)”

3. The word *saṅkhāra* is commonly used to indicate those with *kammic* consequences, as in “*avijjā paccayā saṅkhāra*,” where it really means, “*avijjā paccayā apuññābhi saṅkhāra*” or “*avijjā paccayā puññābhi saṅkhāra*.”

- Here *abhi saṅkhāra* means “strong *saṅkhāra*”, and the word *apuññābhi* comes from “*apuñña*” + “*abhi*,” which combine to rhyme as *apuññābhi*. Here “*apuñña*” means “bad” or “immoral.” Thus, *apuññābhi saṅkhāra* means strong immoral *saṅkhāra*.
- In the same way, *puñña* + *abhi* + *saṅkhāra* becomes *puññābhi saṅkhāra* (for strong good *saṅkhāra*).
- So, one really needs to pay attention to exactly what meaning need to be taken in a given case.

4. **All our thoughts, speech, and bodily actions are based on *saṅkhāra* that arise in the mind.** Therefore, it is essential to realize that *vacī saṅkhāra* and *kāya saṅkhāra* also arise in the mind. One speaks and acts based on those such thoughts.

- ***Saṅkhāra* are thoughts. *Kammā* are actions based on such thoughts.**
- *Kāya saṅkhāra* are “conscious thoughts” that make our bodies move. Killing, stealing, and sexual misconduct are *apuññābhi kāya saṅkhāra*.
- ***Vacī saṅkhāra*** are “conscious thoughts that we silently generate” and also those thoughts that lead to a speech by moving the lips, tongue, etc. Hate speech is due to *apuññābhi vacī saṅkhāra*. Thinking about a *Dhamma* concept is a *puññābhi vacī saṅkhāra*; see, “[Correct Meaning of Vacī Saṅkhāra](#).”
- On the other hand, ***mano saṅkhāra*** are “unconscious thoughts” that arise automatically. We are not aware of when they appear. They arise due to our *gati* (character/habits) and can indicate our level of *moha* or *avijjā*. Since they arise unconsciously, *mano saṅkhāra* are unlikely to be *abhisāṅkhāra* that have substantial *kammic* consequences.
- The fact that *cetanā* plays a vital role is evident when we look at the following definitions: “*kāya sancetanā kāya saṅkhāra*,” “*vacī sancetanā vacī saṅkhāra*,” and “*mano sancetanā mano saṅkhāra*.”

5. Let us take some examples to illustrate these three types of *saṅkhāra*.

- To move the body, the mind or the mental body or the *gandhabba* must first generate thoughts about moving the body. Then that thought is executed with the help of the brain that sends necessary signals to the leg muscles, say, to move the legs.
- So, those *kāya saṅkhāra* are responsible for moving the legs. Now, if the purpose of moving the body was to go somewhere to commit an evil deed, then it becomes an *apuñña abhisāṅkhāra*. **These thoughts would have *asobhana cetasika* (like greed or hate) in them.**
- If the purpose were to go somewhere to do a good deed, then it would become a *puññabhi saṅkhāra*. **These thoughts would have *sobhana cetasika* (like faith and compassion) in them.**
- If the purpose were to go the bathroom (*kammically* neutral), then it would be just a *kāya saṅkhāra*, not an *abhisāṅkhāra*. Breathing involves moving body parts (lungs), done without conscious thinking, but they are *kāya saṅkhāra* too. **Those thoughts would not have *sobhana* or *asobhana cetasika* in them.**
- Therefore, the *kammic* nature of an act is decided by the intention that is in the mind, i.e., type of *cetasika* (mental factors) that arise with those thoughts; see, [“What is Intention in Kamma?”](#)

6. Now, if a person gets angry at another person, he may not move any body parts, but may generate evil thoughts like: “I wish I could hit this person right now”). Those are *vacī saṅkhāra*; see [“Correct Meaning of Vacī Saṅkhāra.”](#)

- When those *vacī saṅkhāra* build-up energy, one may actually say those words out. They are still called *vacī saṅkhāra*.
- Whether one is just talking to oneself or actually speaks out such evil words, they are both *apuñña abhisāṅkhāra*.
- Of course, *vacī saṅkhāra* can be *puñña abhisāṅkhāra* too. Person X watching a good deed by person Y, may be generating good thoughts about Y; those are *puñña vacī saṅkhāra*.
- Those also will be distinguished by the type of *cetasika* as in *kāya saṅkhāra* above.

7. Whether they are *vacī* or *kāya saṅkhāra*, if they have *asobhana cetasika* in them, they tend “heat up” or “stress” the mind (Pāli word is “*thāpa*”).

- On the other hand, if *sobhana cetasika* arise as *vacī* or *kāya saṅkhāra*, they have the tend to “cool” a mind.
- In the earlier post, [“What Are Kilesa \(Mental Impurities\)? – Connection to Cetasika,”](#) it was discussed in detail why understanding this fact is the pre-requisite for the *Satipatthāna bhāvanā*; see, [“Satipatthāna Sutta – Relevance to Suffering in This Life,”](#) and [“Satipatthāna Sutta – Structure.”](#)
- Just by comprehending this fact, one can start cultivating *nirāmisa sukha*.

8. All other thoughts that arise in the mind **without conscious thinking** are *mano saṅkhāra*.

- For example, when one gets hit by a cane, say, one feels the pain associated with it, and one realizes that another person hitting with a cane caused the pain. So, the *mano saṅkhāra* that arise at the beginning have two *cetasika* of *saññā* (recognition of what happened) and *vedanā* (pain caused). **Another way to say it: *mano saṅkhāra* are involved in the *vipāka* stage.**
- **However, based on that “sense input” of getting hit, now one could start generating *vacī saṅkhāra* and even *kāya saṅkhāra*.** Such *vacī saṅkhāra* may involve just creating evil thoughts about that person or actually saying bad things to him. If the pain was intense, one might generating bad *kāya saṅkhāra* and hit that person.

9. So, it is essential to realize that all of the following involve thoughts : automatically thinking (*mano saṅkhāra*), “just talking to oneself” or speaking out (*vacī saṅkhāra*), or using the body movements (*kāya saṅkhāra*).

- Those thoughts arise in the *gandhabba*, and become the commands to the brain to carry out the tasks of speaking and body movement. That is how the mental body (*gandhabba*) controls the physical body; see, “[Our Mental Body – Gandhabba.](#)”

10. Those initial *mano saṅkhāra* are automatically in mind due to one’s *gati*. Then subsequent *vacī* and *kāya saṅkhāra* are generated, and we do have control over those; see, for example, “[Correct Meaning of Vacī Saṅkhāra.](#)”

- So, the seeds for thinking, speaking, and acting start at the instant of the first sense input, say, seeing something or hearing something that gets one’s attention.
- If the sense input is substantial (and one gets interested in it via like or dislike), one will start many such *citta vīthi* in a short time. This leads to corresponding *vacī* and *kāya saṅkhāra* to “talk to oneself”, speak out or to do bodily actions.

11. Without getting into details, conscious thinking that could lead to speaking and physical actions occur in the seven *javana citta* in a *citta vīthi*.

- *Vacī* or *kāya saṅkhāra* arise due to many *citta vīthi* running one after another. As we discussed previously, billions of *citta vīthi* can run in a second; see, “[Amazingly Fast Time Evolution of a Thought \(Citta\).](#)”
- Another critical point is that the *javana citta* in subsequent *citta vīthi* gets stronger and stronger. This is why when we start thinking about a person that we like or dislike, we can keep generating increasingly stronger feelings about the situation.
- Sometimes, we can see people getting angry by the minute. They are generating a lot of *vacī saṅkhāra* even without getting a word out. But one can see the person getting highly agitated: the face gets red and facial expression can show how angry he/she has become.

12. Therefore, even if we may start generating *vacī* and *kāya saṅkhāra*, we may not become aware of it for a short time. If one gets angry one may lose control and may not even realize that one is getting into a bad situation.

- “Catching oneself early” in the process of becoming angry is the key to control anger management. When one understands how this process happens and that it can escalate quickly into a bad situation, one can determine to catch it earlier next time.
- We can prevent a lot of suffering in this life by catching such *vacī* and *kāya saṅkhāra* early.
- As we discussed in the *desanā* in the post, “[Satipatthāna Sutta – Relevance to Suffering in This Life](#)”, this is the key to *ānāpāna* and *satipatthāna bhāvanā*.

13. In the previous post, “[Vedanā – What It Really Means](#)”, we discussed how “*samphassa jā vedanā*” could arise in our minds after initial *vipāka vedanā*.

- Those “*samphassa jā vedanā*” arise when we generate *vacī saṅkhāra* and *kāya saṅkhāra* as a result of the initial *vipāka vedanā*.
- Those “*samphassa jā vedanā*” are all made by us consciously. However, for someone who has not cultivated *satipatthāna* or *ānāpāna* (the correct versions), this may not be obvious.

14. If one is mindful, one could see for oneself when one starts consciously having good or bad thoughts about sensory input. With practice, one can “catch oneself” before generating too many “*samphassa jā vedanā*” or — to say the same thing differently — before making a lot of *vacī* or *kāya saṅkhāra*.

- This concept may need a bit of thinking, but let us take some examples to clarify.

15. We first need to pay attention to those “*samphassa jā vedanā*” that arise due to immoral thoughts, i.e., due to immoral *vacī* and *kāya saṅkhāra*.

- Suppose person X starts generating bad *vacī saṅkhāra* because he is verbally abused by enemy Y. Such *vacī saṅkhāra* give rise to a “bad state of mind” or *domanassa* via “*samphassa jā vedanā*.” If the situation escalates, stronger *vacī saṅkhāra*, i.e., thoughts of hitting Y, may arise and may lead to *kāya saṅkhāra* of hitting Y.

16. On the other hand, when one is eating a delicious food, one will taste it as pleasant, whether one is an average human or an *Arahant*. It is a “*kāma guṇa*” associated with the human realm; see, “[Kāma Guna, Kāma, Kāma Rāga, Kāmaccandha](#).” That is not an immoral thought.

- The difference is that while a normal human will have a **craving** for that food, an *Arahant* will not.
- One generates *mano saṅkhāra* automatically based on one's *gati*. Then, conscious *vacī saṅkhāra* and *kāya saṅkhāra* lead to the critical ***upādāna* (willingly binding or craving)** stage; see, “[Difference Between Tanhā and Upādāna](#).”

17. All this is put together at the *viññāṇa* stage. The discussion on *viññāṇa* will complete our simplified discussion on the four aggregates that are associated with the mind or the mental body, *gandhabba*; see, “[Viññāṇa Aggregate](#).”

- Furthermore, we will see that *vedanā* (excluding “*samphassa jā vedanā*”) and *saññā* are associated with *mano saṅkhāra*, which arise automatically due to *kamma vipāka*.
- Starting with such *mano saṅkhāra*, we then consciously generate *vacī* and *kāya saṅkhāra* initiating new *kamma*. Furthermore, “*samphassa jā vedanā*” arise during that process.
- When *kamma vipāka*, in turn, lead to making new *kamma* (thus giving rise to more *kamma vipāka*), the whole process repeats itself over and over. This is how the rebirth process rolls on forever unless one determines to stop initiating new *kamma*, especially strong immoral *kamma* via *apuññābhi vacī* and *kāya saṅkhāra*.

18. I recently came across the following “wise words” on the internet:

- Watch your thoughts; they become words.
- Watch your words; they become actions.
- Watch your actions; they become habits.
- Watch your habits; they become your character.
- Watch your character; it becomes your destiny.

Those statements summarize what I have been trying to explain above and also in posts on *Paticca Samuppāda*. Our thoughts or *saṅkhāra* define and guide our destiny.

19. Further details on *saṅkhāra* and *abhisāṅkhāra* at “[Kamma, Saṅkhāra, and Abhisāṅkhāra – What Is ‘Intention’?](#)”

- Also, see “[Paticca Samuppāda – Not ‘Self’ or ‘No-Self’](#).”
- Difference between *saṅkhāra* and *dhammā* at, “[Difference Between Dhammā and Saṅkhāra](#).”

4.9.3 Viññāṇa Aggregate

November 30, 2017

[Viññāṇa – What It Really Means](#)

[Kamma Viññāṇa – Link Between Mind and Matter](#)

[Anidassana Viññāṇa – What It Really Means](#)

4.9.3.1 Viññāṇa – What It Really Means

May 26, 2017; revised May 16, 2020

Two Types of *Viññāṇa*

It is a good idea to read the post, “[Amazingly Fast Time Evolution of a Thought \(Citta\)](#)” first. More at “[Essential Abhidhamma – The Basics.](#)”

1. So far, in this subsection on the mental aggregates, we have discussed *saññā*, *vedanā*, and *saṅkhāra* in simple terms, mainly focusing on their relevance to stay on the Path. See, “[Nāma & Rūpa to Nāmarūpa.](#)” My main goal is to provide the key and essential aspects of these terms so that one can see “how to cool down the mind” and progress towards *Nibbāna*.

- *Viññāṇa* can be said to **encompass (include)** all those three mental categories: *saññā*, *vedanā*, and *saṅkhāra*. So, we can say that *viññāṇa* is the overall effect our awareness encompassing our perceptions (*saññā*), feelings (*vedanā*), and our likes and dislikes (*saṅkhāra*).
- **But *viññāṇa* represents a bit more** — mainly “our hopes and desires that we want to from this world.” That is the more critical aspect — which makes the connection with *rūpa* — that we need to understand, **but first, we need to know that there are two types of *viññāṇa*.**

Vipāka Viññāṇa

2. When we see something, a *cakkhu viññāṇa* arises. A split second later we may hear something, and *sota viññāṇa* arises. When we watch a movie, it seems like we are seeing and listening at the same time, but it only appears that way because our mind is so fast.

- Basically, six types of *viññāṇa* can arise via our six senses: eyes, ears, nose, tongue, body, and the mind, called *cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, and *mano viññāṇa*. They are all ***vipāka viññāṇa***.
- Therefore, ***vipāka viññāṇa* can be six types**, and they will bring *vipāka* even for an *Arahant* until the death of the physical body.
- We don’t have control over them once they arise. But we can, of course, avoid some. For example, if we don’t want to watch a movie, we can decide not to view it.

Kamma Viññāṇa

3. Then, based on that *vipāka viññāṇa*, *kamma viññāṇa* CAN arise, IF we get attached to that *vipāka viññāṇa* via greed, hate, or ignorance.

- For example, person X may see a person Y that X dislikes. That seeing event is a *vipāka*, and thus the *viññāṇa* generated is a ***vipāka viññāṇa***.
- But as soon as X sees Y, hateful thoughts may come to X’s mind, with which X can generate NEW *KAMMA*. Those thoughts have *kamma viññāṇa*.
- *Kamma viññāṇa* ALWAYS arise in the MIND door (not at the other five doors) i.e., ***kamma viññāṇa* are ALWAYS *mano viññāṇa***. That is in contrast to *vipāka viññāṇa* which can arise at any of the six sense doors.

Six Types of *Vipāka Viññāṇa*

4. So, a *vipāka viññāṇa* can arise due to any of the six senses. Seeing a *rūpa* with eyes (“*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇam*”), hearing a sound with ears (“*sotañca paṭicca sadde ca uppajjati sotavīññāṇam*”),...*dhamma* with *mana indriya* (“*manañca paṭicca dhammē ca uppajjati manovīññāṇam*”).

- Note that *vipāka viññāṇa* DO NOT arise via “*saṅkhāra paccayā viññāṇa*.” They ALWAYS appear via eyes seeing a *rūpa*, ears hearing a sound, etc.
- We are all familiar with how “visual awareness” or *cakkhu viññāṇa* arise due to seeing a *rūpa*. Similarly, auditory awareness arises due to hearing a sound, etc. But most of our *vipāka viññāṇa* occur due to “mental awareness” or *mano viññāṇa* resulting via *dhamma* impinging on the *mana indriya*; see, “[What are rūpa? – Dhamma are rūpa too!](#)”.
- Note that *rūpa* that we see with our eyes are *rūpa rūpa* (or *vaṇṇa rūpa*); they usually are just called *rūpa*, but this can lead to confusion if someone is not aware of this detail.

5. In general, all we experience in this world are *rūpa*: *rūpa rūpa*, *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, *phoṭṭhabba rūpa*, and ALSO *dhamma*.

- *Dhamma* are not called *rūpa*, simply because they are below the *suddhatṭhaka* stage. They have not yet “condensed” to the *suddhatṭhaka* stage; see, “[The Origin of Matter – Suddhatṭhaka](#)”.
- They are very subtle *rūpa* that cannot be seen or touched: “*anidassanan appaṭighan*”; see, “[What are rūpa? – Dhamma are rūpa too!](#)”.

Based on *Vipāka Viññāṇa* We Initiate *Kamma Viññāṇa*

6. To summarize: *vipāka viññāṇa* can arise at any of the six senses, and thus can be *cakkhu*, *sota*, *jivhā*, *ghāna*, *kāya*, or *mano viññāṇa*.

- If the *vipāka viññāṇa* is strong (i.e., if the experience liked or disliked), then because of *avijjā*, **we start generating *saṅkhāra* about it**, which lead to a *viññāṇa* that we create on our own, a *kamma viññāṇa*.
- Therefore, in contrast to *vipāka viññāṇa*, *kamma viññāṇa* arise via “*saṅkhāra paccayā viññāṇa*.”
- They start automatically as *mano viññāṇa*, via *mano saṅkhāra*. But then we consciously start generating more via *vacī* and *kāya saṅkhāra*, and that will strengthen *kamma viññāṇa*.
- We have discussed how *mano saṅkhāra* arise automatically due to our *gati*, and then we consciously generate *vacī* and *kāya saṅkhāra*: “[How Are Gati and Kilesa Incorporated into Thoughts?](#)”.

Examples of *Vipāka Viññāṇa*

7. Let us first consider a couple of examples of *vipāka viññāṇa*.

- We may get to eat a tasty food item. The experience of that food on the tongue generates taste (*jivhā viññāṇa*), which is a *vipāka viññāṇa*. We got to taste that as a result of a previous good *kamma vipāka*. That experience includes identifying what food it is (*saññā*), and the taste it gives (*vedanā*).
- If we get a headache, that is bad *kāya viññāṇa* that arose due to a past bad *kamma*, i.e., a *kamma vipāka*. We know it is a headache (*saññā*), and we feel the pain (*vedanā*).
- **When the sense input first comes**, we just become aware of it. There are no *kamma* done with *vipāka viññāṇa*.

Examples of *Kamma Viññāṇa*

8. Based on those six types of *vipāka viññāṇa* that arise, **we generate** new mental states on our own. These are called *kamma viññāṇa*.

- In the above first example, if we like the taste, we immediately start getting attached to it and begin generating *saṅkhāra* about that food. We begin to create *vacī saṅkhāra* (talking to ourselves) about how good the food is. **That is a different mental state that we make on our own.** Of course, we are

likely to generate *kāya saṅkhāra* also when eating that food again. We have discussed the three types of *saṅkhāra* in “[Saṅkhāra – What It Really Means.](#)”

- A *kamma viññāṇa* arises within a fraction of a second after the *vipāka viññāṇa*, so that we usually cannot differentiate between the two mental states. (For those who are familiar with *Abhidhamma*, this is discussed at the end of this post).
- Of course, *vipāka viññāṇa* lasts while we eat the food. A large number of *jivhādvāra citta vīthi* run while we eat. *Kamma viññāṇa* also arise later in the same *citta vīthi*, but they also occur well after the meal. We can recall eating that food later at night (with a *mano viññāṇa*) and generate more *kamma viññāṇa* (mainly via *vacī saṅkhāra*) by consciously thinking how good it was.
- In the second example above, a split second after we start experiencing the headache (*vipāka viññāṇa* and the associated feeling of pain), we start getting depressed and generating *vacī saṅkhāra* about how this is going to ruin the day and mess up all our plans.

Kamma Viññāṇa Create Kamma Bija

9. In both those examples, our first mental state (*vipāka viññāṇa*) was so strong that we — on our own — generated a *kamma viññāṇa* which also gives rise to a *kamma bīja*.

- That *kamma bīja* can come back to our mind later as a *vipāka viññāṇa* (this is a *mano viññāṇa*). That is how we recalled our experience with tasty food later at night.
- If that headache was terrible, we might be able to recall it days or weeks later.

10. Thus the important point is that a *kamma bīja* is the same as a “*dhammā*” that makes contact with the mind to give rise to a “mind sense event”; see, “[What are rūpa? – Dhamma are rūpa too!](#).”

- Just as a seeing event arises when the *cakkhu indriya* makes contact with a *rūpa* (“*cakkhuñca paṭicca rūpe ca uppajjati cakkhuvīññāṇaṃ*”), a “mind event” occurs when a *dhammā* makes contact with the *mana indriya* (“*manañca paṭicca dhammē ca uppajjati manovīññāṇaṃ*”).
- One may attach to the taste of that delicious food. While thinking about how to taste it again in the future, many strong *javana citta* can lead to a *kamma bīja*.
- Don’t be put off by those Pāli words. Once you get to know the meanings behind these words, it will become easy to see what happens.

More Kamma Viññāṇa Lead to Strengthening of Kamma Bija

11. The strength of a given *kamma bīja* determines how likely would it to come back and make contact with the mind later on. For example, if it were a regular sandwich, one would not make craving for that and thus would not create strong *kamma bīja* or a “*dhammā*.” Then it is likely that one would have forgotten that meal in a few hours.

- However, if the meal were delicious, one would be thinking about it many days after leaving the restaurant, and each time one generates *javana citta*, one will be making that *kamma bīja* stronger. The more one thinks about it (i.e., generates *vacī saṅkhāra*) about it, the more robust it gets.
- See, “[Correct Meaning of Vacī Saṅkhāra](#)” to see how thinking itself can lead to *kamma* generation.

Three Types of Saṅkhāra

12. This is how one becomes an alcoholic gradually. One starts remembering past “drinking events” and generate a lot of *mano* and *vacī saṅkhāra* even when not drinking.

- By the way, drinking is a *kāya saṅkhāra*, since it involves moving body parts.

- *Mano saṅkhāra* arise automatically when one first think about a past drinking event (due to “*manañca paṭicca dhammē ca uppajjati manoviññāṇaṃ*.” Then when one starts consciously thinking about that past event, one starts generating *vacī saṅkhāra*; see, “[How Are Gati and Kilesa Incorporated into Thoughts?](#)”.
- All three types of *saṅkhāra* contribute to “feed the *viññāṇa* for alcohol” via “*saṅkhāra paccayā viññāṇa*” *Paṭicca Samuppāda* step. While we do not have control over *mano saṅkhāra* that arise AUTOMATICALLY, we do have control over *vacī* and *kāya saṅkhāra* that one generates CONSCIOUSLY, as discussed in the above post. That is the key to *Ānāpāna* and *Satipaṭṭhāna bhāvanā*.

Transition from *Vipāka Viññāṇa* to *Kamma Viññāṇa*

13. Let us look at the time-line of how these two types of *viññāṇa* arise. *viññāṇa* is not an “entity” that is always there. As with *saññā*, *vedanā*, and *saṅkhāra*, a given *viññāṇa* arises with a thought.

- When thoughts are not there, the mind is in the *bhavaṅga* state. Sometimes we see people — usually when they are not alert — staring out into space. Unless they are in deep thought (which is also possible), their minds are likely to be in the inactive *bhavaṅga* state.
- Our minds are moved away from the dormant *bhavaṅga* state to conscious thoughts first via a *vipāka viññāṇa*. Then if get attached (*taṇhā*) to that, we start generating *kamma viññāṇa*, which will bring future *kamma vipāka*.
- It is essential to recognize this time-line. We start with a *vipāka viññāṇa* and then begin generating *kamma viññāṇa*. Of course, *kamma* leads to more *vipāka* later, and the whole process continues without end. That is how we go through the rebirth process.
- To stop this, we need to be mindful and stop generating *kamma viññāṇa*. Especially those lead to bad *kamma vipāka*. That is the key to *Ānāpāna* and *Satipaṭṭhāna Bhāvanā*.
- That is a lot of information to grasp. One may need to re-read and also read relevant posts to fully understand.

The transition from *Vipāka Viññāṇa* to *Kamma Viññāṇa* is Fast

14. Finally, the time delay between *vipāka viññāṇa* and *kamma viññāṇa* is unimaginably small.

- In *pañcadvāra citta vīthi* with 17 thought moments, the *vipāka viññāṇa* arise at the beginning of the *citta vīthi* with the *pañcadvārāvajjana citta*. *Kamma viññāṇa* generate in *javana citta* that occur towards the end of the *citta vīthi*. Of course, many more *pañcadvāra* and *manodvāra citta vīthi* run if one gets attached to that object (*ārammaṇa*).
- When *dhamma* impinges on the *mana indriya* to start a *manodvāra vipāka* event, a *manodvāra citta vīthi* with around ten *citta* runs, with the initial *vipāka viññāṇa* arising at the mind-door adverting thought-moment. Again, *kamma viññāṇa* generate at *javana citta* at the end of the *citta vīthi*.
- Those who are into *Abhidhamma* can consult, “[Citta vīthi – Processing of Sense Inputs](#)” for details.

Viññāṇa is the Link Between Mind and Matter

15. *Viññāṇa is the link between mind and matter*, even though it is in the “*nāma* or mind category” sometimes.

- In the [Pattecasamuppāda Vibhaṅga](#), *nāma* is defined as only the first three *khandha*: “*Tattha katamaṃ nāmaṃ? Vedanākkhandho, saññākkhandho, saṅkhārakkhandho—idaṃ vuccati “nāmaṃ.”*” That is a clear indication that *viññāṇa khandha* does not belong in the “*nāma* or mind category.”

- Information in these posts on *viññāṇa* could be new to many readers but are critically important. If one can grasp them, one will have the “*nāmarūpa pariccheda ñāṇa*.” See, “[Kamma Viññāṇa and Nāmarūpa Pariccheda Ñāṇa](#).”
- One must read a couple of more posts before making that critical connection. See “[Viññāṇa Aggregate](#).”

Next, “[Kamma Viññāṇa – Link Between Mind and Matter](#)”, ...

4.9.3.2 Kamma Viññāṇa – Link Between Mind and Matter

November 30, 2017; revised February 6, 2020

Vipāka Viññāṇa Versus Kamma Viññāṇa

1. In the previous post in this series, we discussed that there are two types of *viññāṇa*: *vipāka viññāṇa* and *kamma viññāṇa*; see, “[Viññāṇa – What It Really Means](#).”

- We don’t have control over *vipāka viññāṇa*, but we do have control over *kamma viññāṇa* (via controlling our *saṅkhāra*), and that is why it is possible to attain *Nibbāna*.
- We cannot do anything about the *vipāka viññāṇa*. Even in an *Arahant* they arise as *kamma vipāka*; he/she will also see, hear, etc like anyone else.
- *Vipāka viññāṇa* can arise via any of the six sense doors, i.e., as *cakkhu*, *sota*, *ghāṇa*, *jivhā*, *kāya*, or *mano viññāṇa*. Based on those, WE initiate new *kamma viññāṇa*, as we discussed in the above-mentioned post. This process is analyzed in detail in, “[How Are Paṭicca Samuppāda Cycles Initiated?](#).”
- What we can — and need to do — is to stop “*saṅkhāra paccayā viññāṇa*” — **specifically strong *vacī* and *kāya abhisāṅkhāra*** — leading to new strong *kamma viññāṇa*. *Kamma viññāṇa* ALWAYS arise first as *mano viññāṇa*.

Controlling *Kamma Viññāṇa*

2. *Ānāpāna* and *Satipaṭṭhāna bhāvanā* involve controlling *kamma viññāṇa* by being mindful of the *mano saṅkhāra* that AUTOMATICALLY arise and controlling them with *vacī* and *kāya saṅkhāra* that we consciously generate. The basis of this critical fact is discussed at, “[Root of All Suffering – Ten Immoral Actions](#).”

- In formal sitting-down meditation, this means just controlling our *vacī saṅkhāra* (conscious thoughts), since we do not move our bodies or speak.
- However, during all waking hours we need to control both *vacī* and *kāya saṅkhāra* (i.e., our conscious thoughts, speech, and bodily actions); see, “[Root of All Suffering – Ten Immoral Actions](#).”
- By the way, please do not ignore the initial posts in the “[Living Dhamma](#)” section, such as the above mentioned post. **It is not possible to grasp complex posts like this one without that basic knowledge.**

Paṭicca Samuppāda Has *Kamma Viññāṇa*

3. In *Paṭicca Samuppāda* it is the *kamma viññāṇa* that comes into play in, “*saṅkhāra paccayā viññāṇa*,” NOT the *vipāka viññāṇa*.

- All *saṅkhāra* are generated in our minds. While *mano saṅkhāra* arise automatically, we CONSCIOUSLY generate *vacī* and *kāya saṅkhāra*, leading to *kamma viññāṇa*; see, “[Root of All Suffering – Ten Immoral Actions](#).”
- This is why *saṅkhāra* are food for the *viññāṇa*, specifically for the *kamma viññāṇa*.

4. Furthermore, the next step in *Paṭicca Samuppāda* is “*viññāṇa paccayā nāmarūpa*.” As you can see, this is where the connection to *rūpa* is made. We will discuss in detail below.

The KEY POINT is that *kamma viññāṇa* is not totally mental: The mind — when attached to something — will create an energy (i.e., a *kamma bīja* or a *dhammā*) that will be recorded in the *kamma bhava*.

- Then in the future, that *dhammā* can come back to the *mana indriya* and trigger a mind-sense event via “*manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ*.” that we discussed in “[What are rūpa? – Dhamma are rūpa too!](#).”
- Then, in the latter part of that *citta vīthi*, more *kamma viññāṇa* are created; see, “[How Are Paticca Samuppāda Cycles Initiated?](#).”
- Thus it is a feedback process that gets strengthened with time.

Kamma Viññāṇa Make Kamma Bīja

5. That *kamma viññāṇa* can be building up a *kamma bīja* (or a *dhammā*) in the *kamma bhava* overtime via the *Paṭicca Samuppāda* process: “*viññāṇa paccayā nāmarūpa*”, “*nāmarūpa paccayā saḷāyatana*”, “*saḷāyatana paccayā phassa*”, “*phassa paccayā vedanā*”, “*vedanā paccayā taṇhā*”, “*taṇhā paccayā upādāna*”, and “*upādāna paccayā bhava*.”

- Then under suitable conditions (see, “[Anantara and Samanantara Paccaya](#)”), that *kamma bīja* (or a *dhammā*) can come back — as a *vipāka* — and start that process all over again; see, “[How Are Paticca Samuppāda Cycles Initiated?](#).”
- A *dhammā* with energy or a *kamma bīja* created previously can come back to the mind as a *vipāka viññāṇa* via “*manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ*.”
- Every time one generates *vacī* or *kāya saṅkhāra* relevant to that *viññāṇa*, that makes *viññāṇa* stronger.

Nāmarūpa Are Precursors to Rūpa Created by the Mind

6. As *viññāṇa* gets stronger, “*viññāṇa paccayā nāmarūpa*” makes *nāmarūpa* stronger. **This *nāmarūpa* is the first stage of a *rūpa* that is created by the mind**, with the *viññāṇa* acting as the intermediary.

- It is also important to remember that *dhammā* includes not only *kamma bīja*, but also any record of anything that has been done by a given person. So, we can also recall events that have nothing to do with *kammic* energy, for example, remembering talking to someone or seeing something or solving a math problem; see, “[Difference Between Dhammā and Saṅkhāra](#).”

7. For example, an alcoholic has a “*viññāṇa* for drinking.” He (she) constantly thinks about drinking, and will build up a “drunk existence (*bhava*)”, which comes back to his mind as a *dhammā* to trigger more thoughts about drinking.

- Until he breaks that loop by willfully controlling his thoughts and actions involving drinking, that *viññāṇa* will grow with time.
- The only way to break that habit of drinking is to be mindful about the bad consequences of drinking and to forcefully suppress any thoughts about drinking (*vacī saṅkhāra*) and abstain from drinking (*kāya saṅkhāra*).

Kamma Viññāṇa Is the Link Between Mind and Matter

8. What we discussed above is quite important. ***Kamma viññāṇa* is the link between mind and matter. It is an energy made by the mind. A *kamma viññāṇa* creates tiny amounts of matter (*rūpa*) below**

the *suddhaṭṭhaka* stage. It is important to fully understand this point for one to fully grasp the meaning of “*mano pubbaṅgamā dhammā...*” This is in fact how the mind (*mano*) is creating *dhammā* via *viññāṇa*.

- This is confirmed in the [WebLink: suttacentral: Majjhe Sutta \(AN 6.61\)](#), where it is stated that *nama* is at one end, *rūpa* is at the other end, with *viññāṇa* in the middle: “*nāmaṃ kho, āvuso, eko anto, rūpaṃ dutiyo anto, viññāṇaṃ majjhe.*” [“Name (*nāma*), friends, is one end; form (*rūpa*) is the second end; consciousness (*viññāṇa*) is in the middle; and craving is the seamstress.” For craving sews one to the production of this or that state of existence. It is in this way that a *bhikkhu* directly knows what should be directly known; fully understands what should be fully understood; and by doing so, in this very life he makes an end of suffering.]
- It would be helpful if one had followed the preceding posts in the “[Living Dhamma](#)” section.

9. The goal of a given mind is to extract sense pleasures from the outside world, which is made of *rūpa* both above and below the *suddhaṭṭhaka* stage; see, “[Our Two Worlds: Material and Immaterial.](#)”

- We all are familiar with sense enjoyment via the five physical senses. But the most enjoyment we experience is through the sixth sense, the mind.
- The five physical senses only bring in imprints of the five types of “solidified *rūpa*”: *rūpa rūpa*, *sadda rūpa*, *gandha rūpa*, *rasa rūpa*, and *pottabbha rūpa* (in other words, sights, sounds, smells, tastes, and body touches).
- All those sense imprints that come in are enjoyed by the mind. In addition, the mind can also enjoy thinking about such past sense experiences AND also any planned future events. The “fine *rūpa*” involved here are “*dhammā*”; see, “[What are rūpa? – Dhammā are rūpa too!](#).”

Connection to *Dhammā*

10. How does the mind enjoy past sense experiences or future expected experiences? The answer to this question leads us to the concept of *dhammā*, those *rūpa* that are below the *suddhaṭṭhaka*, and thus are really energies.

- Just like we “bring in” external *rūpa* (or *rūpa rūpa* or *vaṇṇa rūpa*) with our eyes, external sounds with our ears, etc, we bring in external *dhammā* through the *mana indriya*, as explained in “[What are rūpa? – Dhammā are rūpa too!](#).” [*vaṇṇa* : [m.] colour; appearance; colour of the skin; sort; caste; a letter; quality.]
- Some of those *dhammā* are made by the mind via *kamma viññāṇa*! That *kamma viññāṇa* had created a *dhammā* that got deposited in the *kamma bhava* as *kamma bīja* or ***dhammā with energy***. This is the connecting piece of the puzzle. We discuss this in different ways, in order to grasp this key idea.
- All *dhammās*, including *nāma gotta* and *kamma viññāṇa* (also called *kamma bīja*) are in the *nāma loka*; see, “[Our Two Worlds: Material and Immaterial.](#)”

Rūpa Generation Process

11. The point is that “*saṅkhāra paccayā viññāṇa*” starts the “*rūpa* generation process” the “*viññāṇa paccayā nāmarūpa*” completes it.

- In *Paṭicca Samuppāda* cycles leading to rebirth, this *nāmarūpa* is the blueprint for the new existence via “*nāmarūpa paccayā salāyatana*,” a new set of *indriya* are formed. In the case of a human birth, this is the single cell (zygote); see, “What does Buddha Dhamma (Buddhism) say about Birth Control?.”
- In *Paṭicca Samuppāda* cycles operating during a lifetime, this *nāmarūpa* just gives rise to new sense events via “*nāmarūpa paccayā salāyatana*,” where existing *indriya* become *āyatana* for a new sense event.

- Note that our *indriya* (*cakkhu, sota, ghāṇa*, etc) do not always act as *āyatana*. Only when we act with *lobha, dosa, moha* that they act as *āyatana* to lead to new *kamma*.

Connection to *Gati* (Habits/Character)

12. In many posts at the site, we have discussed how our *gati* lead to the creation of *viññāṇa* for certain things we crave (and dislike); see, for example, “[2. Viññāṇa \(Consciousness\) can be of Many Different Types and Forms](#)” and “[3. Viññāṇa, Thoughts, and the Subconscious](#).”

- We have also discussed how such *viññāṇa* arise due to our *gati*, see, for example, “[Gati to Bhava to Jāti – Ours to Control](#),” “[The Law of Attraction, Habits, Character \(Gati\), and Cravings \(Asavas\)](#).”
- So, *gati* and *kamma viññāṇa* are related to each other, feed on each other, and enhance each other.

We Don't Have Control Over *Vipāka Viññāṇa*

13. *Vipāka viññāṇa* are results of previous *kamma*, and cannot be stopped. What we need to stop is *kamma viññāṇa* that AUTOMATICALLY arise due to our *gati*; see, “[Avyākata Paticca Samuppāda for Vipāka Viññāṇa](#).”

- Now we are essentially putting together the pieces of a puzzle to come up with the Buddha's world view to illustrate how the mind creates the world. Key pieces to the puzzle are in various sections of the website. In the “[Living Dhamma](#)” section all those components are put together starting from the basic components.
- The picture will become more clear with the next post in the series, “[Kamma Viññāṇa and Nāmarūpa Paricceda Ñāna](#).”

4.9.3.3 Anidassana Viññāṇa – What It Really Means

January 6, 2018; revised October 10, 2019

Introduction

1. I have seen several discussion forums discuss the verse, “*viññāṇāṃ anidassanaṃ anantaṃ sabbato pabham..*” Many times I have seen it be referred to as “there is controversy as to the precise meaning of this enigmatic phrase.”

- Most common translations say something like, “Consciousness non-manifest (sometimes as consciousness without surface), infinite, radiant all around.”
- Such incorrect translations have then led to another drastic error by saying that “*anidassana viññāṇa*” is the same as the “*pabhassara citta*” and even as *bhavaṅga*. All these are astonishingly wrong!

What Is *Viññāṇa*?

2. *Viññāṇa* is a central and critical concept to understand. I have started an in-depth discussion of *viññāṇa* in an advanced subsection of the “Living Dhamma” section: “[Viññāṇa Aggregate](#).”

- In this post, I describe a meaningful translation to the verse, “*viññāṇāṃ anidassanaṃ anantaṃ sabbato pabham.*” that is consistent with all the *suttā* in the *Tiṭṭhaka*. I would welcome any evidence to the contrary.
- Now we are getting into deep concepts. I would urge reading other related posts mentioned above first. Depending on one's background, it may take time to grasp these concepts.
- One needs to read the posts in the subsection “[Nāma & Rūpa to Nāmarūpa](#)” of which “[Viññāṇa Aggregate](#)” is a part. If one does not understand those concepts, one could keep going back to earlier sections in the “[Living Dhamma](#)” section. It is designed to go from simple to profound.

What Does *Anidassana* Mean?

3. First, let us find the meaning of “*anidassana*” from the *Tipiṭaka*. The meaning of the word *nidassana* means an ‘illustration’ that is visible. *Anidassana* implies something that is not visible.

- For example, *dhammā* impinge on the *mana indriya* and gives rise to *mano viññāṇa* via “*manañca paṭicca dhamme ca uppajjati manoviññāṇam.*” Those *dhammā* also cannot be seen; *dhammā* are just energies lying below the *suddhaṭṭhaka* stage.
- These dhamma are, “*anidassanaṃ appaṭighaṃ dhammāyatana pariyaṇanna rūpaṃ*” or “**cannot be seen**, cannot be touched, and can make contact only with the *dhammāyatana*”; see, “[What are rūpa? – Dhamma are rūpa too!](#).”

4. In the [WebLink: suttacentral: Kakacūpama Sutta \(MN 21\)](#): “*..Seyyathāpi, bhikkhave, puriso āgaccheyya lākhaṃ vā haliddiṃ vā nīlaṃ vā mañjiṭṭhaṃ vā ādāya. So evaṃ vadeyya: ‘ahaṃ imasmiṃ ākāse rūpaṃ likhissāmi, rūpapātubhāvaṃ karissāmī’ti. Taṃ kiṃ maññatha, bhikkhave, api nu so puriso imasmiṃ ākāse rūpaṃ likhēyya, rūpapātubhāvaṃ kareyyā’ti? ‘No hetam, Bhante.’ ‘Taṃ kissa hetu’? ‘Ayañhi, Bhante, ākāso arūpī anidassano. .’*”

Translated: “*..Bhikkhus, a man may come along bringing off white or yellow or dark green or crimson colors, and may say: ‘I will draw shapes in the sky, I will make material shapes appear. What do you think about this, monks? Could that man draw pictures in the sky with those colors?’ ‘No, Bhante. It is not possible to draw shapes in the empty sky that are visible, that can manifest as figures.’*”

5. In the “[WebLink: suttacentral: Nibbāna-The Mind Stilled](#)” series, Venerable Kaṭukurunde Ñāṇananda has provided more evidence that “*anidassana*” means “something that is not visible” or ‘something that does not manifest’; see, Sermons 7 and 8 in Volume II, which can be found under the references at, “[Kaṭukurunde Ñāṇananda Thera.](#)” [[WebLink: PDF File: seeingthroughthenet.net: Books by Venerable Kaṭukurunde Ñāṇananda](#)]

- However, his explanation of *viññāṇa* is critically wrong, as I explain below. That is a common mistake that I see in many current interpretations.

Viññāṇa Is More Than Consciousness

6. Even in *Theravāda* textbooks, *Viññāṇa* is loosely translated as “consciousness” or “awareness.” But it is much more than that. *Viññāṇa* represents much more: “**our hopes and desires that we want from this world.**” This is the critical point — that makes the connection between mind and matter (*rūpa*).

- We believe that things in this world will provide us with long-lasting happiness. Thus we do *vacī* and *kaya saṅkhāra* to achieve them. Then, “*saṅkhāra paccayā viññāṇa*” leads to the cultivation of a corresponding *viññāṇa*.
- *Viññāṇa* means without *ñāṇa*. When one follows the Noble Path, one will comprehend the Three Characteristics of nature (*anicca, dukkha, anatta*). Then one realize the unfruitfulness of having such false hopes, i.e., cultivate *paññā*.

7. That is quite clear from *Paṭicca Samuppada*: “*avijjā paccayā saṅkhāra; saṅkhāra paccayā viññāṇa; viññāṇa paccayā nāmarūpa, nāmarūpa paccayā saḷāyatana, saḷāyatana paccayā phasso, phassa paccayā vedanā, vedanā paccayā taṇhā, taṇhā paccayā upādāna, upādāna paccayā bhavo, bhava paccayā jāti, jāti paccayā jarā, marana, soka-parideva-dukkha-domanassupāyasā sambhavan’ti.*”

- **All future suffering** arises because we act with *avijjā* (i.e., generate *abhisāṅkhāra*) to achieve pleasurable worldly things and thereby create *viññāṇa*.

Two Types of *Viññāṇa*

8. Each individual *citta* of a human — which exists only for a billionth of a second — is contaminated in 9 stages. Then it is added to the *viññāṅkhandha*! See; “[Pabhassara Citta, Radiant Mind, and Bhavaṅga.](#)”

- A *kamma viññāṇa* is a contaminated *citta*. Those arise via “*saṅkhāra paccayā viññāṇa.*” However, *vipāka viññāṇa* are just consciousness or “awareness”; see, “[Viññāṇa – What it Really Means.](#)”
- The contamination of a *citta* manifests in *saññā* and *vedanā*.”
- See detail in “[Nāma & Rūpa to Nāmarūpa.](#)”

9. It is stated in the “[WebLink: suttacentral: Saṅgīti Sutta \(Dīgha Nikāya 33\)](#)”: “*Tividhena rūpasāṅgaho— sanidassanasappaṭiḅhaṃ rūpaṃ, anidassanasappaṭiḅhaṃ rūpaṃ, anidassanaappaṭiḅhaṃ rūpaṃ.*”

Translated: “Threefold classification of *rūpa* (matter) – visible and graspable, invisible and graspable, invisible and ungraspable.”

- Three types of *rūpa* are sensed with the six sense faculties -five physical senses and the *mana indriya*.
- Those *rūpā* detected with the *mana indriya* are *dhamma*: “*manañca paṭicca dhamme ca uppajjati manoviññāṇaṃ*”; see, “[What are rūpa? – Dhammā are rūpa too!](#).”
- These are the *rūpa* of the third kind: invisible and ungraspable (*anidassanaappaṭiḅhaṃ*): “*anidassanaṃ appaṭiḅhaṃ dhammāyatana pariyaṅanna rūpaṃ*”; see, “[What are rūpa? – Dhammā are rūpa too!](#).”
- Those *rūpā* of the third kind are same as *nāmarūpa* that arise due to *viññāṇa*: “[Kamma Viññāṇa and Nāmarūpa Paricceda Ñāna.](#)”
- That is explained systematically in the subsection: “[Nāma & Rūpa to Nāmarūpa.](#)”

Viññāṇa Is The Link Between Mind and Matter

10. *Viññāṇa* is also the link between mind and matter, even though it is in the “*nāma*” or mind category” most of the time.

- In the [WebLink: suttacentral: Patīcasamuppāda Vibhaṅga](#), *nāma* is defined as only the first three *khandha*: “*Tattha katamaṃ nāmaṃ? Vedanākkhandho, saññākkhandho, saṅkhārakkhandho— idaṃ vuccati “nāmaṃ.”*” This is a clear indication that *viññāṇa khandha* does not really belong in the “*nāma* or mind category.”
- Even though *vipāka viññāṇa* is conclusively in the “*nāma*” category, *kamma viññāṇa* have energies, and thus fall into the *rūpa* category. Sometimes *viññāṇa* is not included in the “*nāma*” category for this reason.
- That was pointed out in the post, “[Viññāṇa – What It Really Means.](#)” You may want to read that first. As pointed out in that post, *kamma viññāṇa* are different from *vipāka viññāṇa* in that *kamma viññāṇa* have energies embedded in them.
- Solid confirmation is in the [WebLink: suttacentral: Majje Sutta \(AN 6.61\)](#), where the Buddha stated that *nāma* is at one end, *rūpa* is at the other end, with *viññāṇa* in the middle: “*nāmaṃ kho, āvuso, eko anto, rūpaṃ duttiyo anto, viññāṇaṃ majjhe.*”

Viññāṇa Is The Cause For Rebirth and Suffering

11. The real nature of *viññāṇa* as cause for suffering is clearly stated in the “[WebLink: suttacentral: Dvayatānupassanāsutta \(Sutta Nipata 3.12\)](#)”:

“*Yaṃ kiñci dukkhaṃ sambhoti,*

Sabbaṃ viññāṇapaccayā;

Viññāṇassa nirodhena,

Natthi dukkhassa sambhavo.”

Translated: “Whatever suffering that arises, all that arises due to *viññāṇa*; **With the not arising of *viññāṇa*, there is no existence with suffering.**”

- That should lay to rest any arguments about *viññāṇa* being the same as *Nibbāna*, *pabhassara citta*, or *bhavaṅga*.
- A critical point that I have been trying to make is that when one sees such dramatic contradiction somewhere, one should be skeptical about the trustworthiness of that source. That is the only way to make progress.

Brahmanimantanika Sutta (MN 49)

12. The phrase “*viññāṇāṃ anidassanaṃ anantaṃ sabbato pabhaṃ.*” appears in the [WebLink: suttacentral: Brahmanimantanika Sutta \(Majjhima Nikāya 49\)](#). I will first provide the essential parts of the Sutta that are relevant to discuss the meaning of this verse.

Here is the essence of the Sutta in plain English:

At one time, The Buddha saw that the following wrong view came to the mind of the Baka *Brahmā* (who is the leader of the Mahā Brahma realm; see, “[31 Realms of Existence](#)“): “My existence is permanent, it is stable, it is eternal, and is not liable to passing away.”

In order to correct the wrong view of the Mahā Brahma, vanishing from near the great sāl-tree in the Subhaga Grove at Ukkatṭhā, the Buddha appeared in that Brahma-world.

Baka *Brahmā* saw the Buddha coming, welcomed him, and told him: “*Idaṅhi, mārisa, niccaṃ, idaṃ dhuvam, idaṃ sassataṃ, idaṃ kevalaṃ, idaṃ acavanadhammaṃ, idaṅhi na jāyati na jīyati na mīyati na cavati na upapajjati. Ito ca panaññaṃ uttari nissaraṇaṃ natthī’ti.*”

Translated: “This existence, good sir, **can be maintained to my liking, it is stable, it is eternal.** It encompasses all, not liable to passing away. It is not born, nor does it age or die or to pass away or uprise. There is not another further release from this existence.”

The Buddha replied: “You are ignorance. You say your existence can be to your liking, but that is not so, it is not permanent as you say...” (*yatra hi nāma aniccaṃyeva samānaṃ niccanti vakkhati, addhuvamṃyeva samānaṃ dhuvanti vakkhati*).

- By the way, here it is important to note that the Pāli word for “permanent” is “*dhuva*”, and not “*nicca*.”

The Buddha added, “..although you say there is no further release that can be attained, there is indeed a permanent release” (“*santaṅca panaññaṃ uttari nissaraṇaṃ “natthaññaṃ uttari nissaraṇaṃ”ti vakkhatī’ti.*”

- Then there is an account of how Māra the deva, having entered a particular company of *Brahmā*, spoke to encourage the Brahma. I will skip that account, in order to get to the crux of the matter.

Baka *Brahmā* then replied to the Buddha: ‘But, good sir, I say “*nicca*” because it is so, I say “stable” because it is stable, I say “eternal” because it is eternal. There is no more suffering...I have escaped from the cravings for *pathavi, āpo, tejo, vāyo dhātu.*” (meaning he has overcome *taṇhā* for the sensual pleasures available in the *kāma loka* comprised from the *cattāro* (four) *maha dhātu*).

The Buddha told the Baka *Brahma* that indeed he knew that the Baka *Brahma* had transcended the *kāma loka*, and was fully aware of his powers. The Buddha added that there were things in this world that the Brahma was not aware of: (1) There are higher Brahma realms, (2) Mahā Brahma himself was in the

Abhassara Brahma realm, died there and was now reborn in this lower Brahma realm. The Buddha told the Baka *Brahma*: “you neither know nor see those higher realms, but I know and see them.”

Here is the really relevant part of the Sutta where the Buddha tells Mahā Brahma: “*Pathaviṃ kho ahaṃ, brahme, pathavito abhiññāya yāvatā pathaviyā pathavattena ananubhūtaṃ tadabhiññāya pathaviṃ nāpahosiṃ, pathaviyā nāpahosiṃ, pathavito nāpahosiṃ, pathaviṃ meti nāpahosiṃ, pathaviṃ nābhivadiṃ...*”

Translated: Brahma, knowing *pathavi* to be just *pathavi* (devoid of life), knowing the true nature of *pathavi*, I do not take *pathavi* to be me (No attachment to things in the *kāma loka* made out of the *cattāro* (four) *mahā bhūta*).”

- Then he repeated the same verse for the other three *mahā bhūta* of which the bodies of beings in *kāma loka* are made of *āpo, tejo, vāyo*.

Finally, he summarized it all in the following verse, which we discussed in the last post: “*Viññānaṃ anidassanaṃ anantaṃ sabbato pabhaṃ, taṃ pathaviyā pathavattena ananubhūtaṃ, āpassa āpattena ananubhūtaṃ, tejassa tejattena ananubhūtaṃ, vāyassavāyattena ananubhūtaṃ, bhūtānaṃ bhūtattena ananubhūtaṃ, devānaṃ devattena ananubhūtaṃ, pajāpatissa pajāpatittena ananubhūtaṃ, brahmānaṃ brahmattena ananubhūtaṃ, ābhassarānaṃ ābhassarattena ananubhūtaṃ, subhakiṇhānaṃ subhakiṇhānaṃ subhakiṇhattena ananubhūtaṃ, vehapphalānaṃ vehapphalattena ananubhūtaṃ, abhibhussa abhibhuttena ananubhūtaṃ, sabbassa sabbattena ananubhūtaṃ..*”

Translated: “*Viññāna* is unseen, infinite, and leads to the rebirth process for all. With *viññāna* (defiled consciousness), one cannot comprehend the real nature of *pathavi, āpo, tejo, vāyo, bhūta, deva, pajapati brahma, abhassara brahma, subhakinha brahma, vehapphala brahma*, etc., i.e., everything in this world (*sabba*).”

- See, “[Bhūta and Yathābhūta – What Do They Really Mean.](#)”

Then, the Buddha concluded: “Thus Brahmā, I am not merely on an exact equality with you as regards super-knowledge; I am indeed higher in knowledge.”

Then the Brahma challenged the Buddha, saying that he is going to disappear and If the Buddha is indeed of higher knowledge, try to find him. But he was unable to hide from the Buddha.

Then the Buddha said, “Now I am vanishing from you, *Brahmā*. Find me if you can.” Of course, the Brahma was unable to find the Buddha and thus had to concede defeat.

That is the essence of that long *sutta*, that is relevant for this discussion.

There Is No Refuge In Any of The Thirty One Realms

13. We have to realize that indeed the *Mahā Brahmā* has a very long lifetime of a quarter of the age of our universe (several billion years).

- Furthermore, since *Brahmā* do not have solid bodies like ours, they are not subject to diseases or bodily pains. So, they live a peaceful life until the end of their *bhava*. So it is no surprise that the Baka *Brahma* thought that he had overcome all suffering by getting rid of the human body. See the post on “[Body Types in 31 Realms – Importance of Manomaya Kāya](#)” for details on bodies of beings in other realms.
- Of course, Brahmā can still have future births in the *apāyā*. Unless they had attained at least the *Sotāpanna* stage of *Nibbāna*, they have only suppressed *kāma rāga*, and have not removed any of the ten *saṃyojana*.
- That should give us a lot to think about our suffering-causing body that lasts only about 100 years! There is absolutely nothing to be proud of one's physical body or to think that it is worthwhile to take this foul body to be “mine.” **That is one way to get rid of *sakkāya ditṭhi*.**

- **The question is not whether there is a “self” or not. It is wise to think that it is worthwhile to have the perception of a “self”? The wrong perception of a “self” only leads to immoral actions and thus suffering in future lives.**

14. I hope this post — together with the other posts in this subsection — makes it clear what *viññāna* is, and what is meant by the famous verse, “*viññāṇāṃ anidassanaṃ anantaṃ sabbato pabhaṃ.*”
